Hi Bradley,

Please find attached resource consents of the cement works at Onehunga Wharf. The resource consent issued in 1996 includes the cement silo, walkway between the silo and sundry pipe work. There is also a COC issued in for air discharges. You will note in the description of the activity in the COC report that the operation includes the transfer of cement from ship to the silos via a sealed pneumatic system. On the basis of the attached consents and apart from the mooring of vessels, we do not consider that any further consents are required as part of the coastal permit operation.

I also attached the email and letters for the MACA engagement.

Regards
