Dear Trevor

Re: Response to request for further information in accordance with section 92 of the Resource Management Act 1991 for the Airport to Botany Rapid Transit Project.

We refer to your letter of 31 January 2023 requesting further information under section 92 of the Resource Management Act 1991 (RMA) in relation to the Notices of Requirement by Auckland Transport for four designations (NoRs 1 – 4a) and the Notice of Requirement by Waka Kotahi NZ Transport Agency (Waka Kotahi) for an alteration to Designation 6717 (NoR 4b).

This letter contains the response to each request. For ease of reference, the following table includes the request and the relevant response. Where appropriate, reference has been made to the relevant lodgement documentation that should be read in conjunction with a response.

In preparing this response, Auckland Transport and Waka Kotahi have updated some proposed conditions that were submitted with the Notices of Requirement. Appendix A contains the updated conditions in track changes. We welcome further discussion with Council on appropriate conditions in due course.

As per Section 1.2.3 of the AEE, the Requiring Authorities have previously requested public notification of the Notices of Requirement for the Airport to Botany Rapid Transit Project. As agreed, the Requiring Authorities request that public notification proceeds on Friday 10 March.

If you have any queries regarding the information contained in this response, please do not hesitate to get in contact.

Yours sincerely

Juli.

1	Please provide an assessment of the tree carbon sequestration that will need to be provided in mitigation of the proposed tree removals, within a more detailed calculation of the ecosystem services that will need to be replaced. This will assist in determining the tree species and numbers of replacement trees required, although ecosystem services are not the only mitigation function to be provided by the new trees. Rationale: This will assist in determining the tree species and numbers of replacement trees required, although ecosystem services are not the only mitigation function to be provided by the new trees.	Given the timeframes for construction (approx. 15 years) and the current route protection stage of the Project, it is not considered appropriate to apply a tree carbon sequestration calculation at this stage. The Project Team arborist notes that this an evolving area of tree mitigation and any calculations and methodology would likely be superseded by the time construction works for the Project have commenced. As such a Tree Management Plan is proposed to address replacement planting for the Project.

2	Please provide more description of mitigation planting that will be provided by the ULDMP. As it will be mitigation, the typical plant (tree) species and distribution and intensity of planting need to be provided as objectives of the ULDMP, so that certification of that final design management plan is not a further consent. Rationale: As it will be mitigation, the typical plant (tree) species and distribution and intensity of planting need to be provided as objectives of the ULDMP, so that certification of that final design management plan is not a further consent.	Given the timeframes for construction (approx. 15 years), the Project Team does not consider it is appropriate to specify the typical tree species, distribution and intensity of planting in the Urban and Landscape Design Management Plan (ULDMP) objectives. This approach provides the opportunity for Manawhenua to be involved as partners in the selection and supply of tree species for the Project, closer to the time of construction. On that basis, the Requiring Authority does not consider amendments to the ULDMP are appropriate.				
3	Please provide further information about how to ensure retained council trees would tolerate the anticipated level of disturbance associated with the proposed works. Rationale: This could possibly be achieved by offering a condition requiring a Tree Protection Management Plan.	This matter is provided for in the proposed Tree Management Plan condition.				
4	Please provide further information about increasing the replacement planting ratio. Rationale: Planting of approximately 2000 trees will not sufficiently mitigate the removal of 1,150 trees identified as warranting mitigation. Given that most trees have reached maturity, and to replace canopy cover more swiftly, a target for replacement planting for the mature trees that are proposed to be removed should be at a 4:1 ratio, rather than the 2:1 originally proposed. Council has an Urban Ngahere Strategy 2019 and responsibilities under the Climate Change Response Act	Given the timeframes for construction (approx. 15 years) and the current route protection stage of the Project, it is not considered appropriate to apply a calculation at this stage. As set out in the proposed conditions, the Tree Management Plan requires confirmation that the trees that are currently identified remain in place at the time of construction. We consider that it is appropriate to consider replacement planting and ratio at that time, based on the number and species of trees that exist prior to the construction of the Project.

Stormwater and Flooding

Please provide further information on why Condition 10 should not be amended to achieve better stormwater management and flooding outcomes. Healthy Waters is recommending Condition 10 as follows (additions <u>underlined</u>, deletions <u>strike-through</u>):

(a) The Project shall be designed to achieve the following flood risk outcomes:

- (i) no increase in <u>1% AEP</u> flood levels for existing authorised habitable floors that are already subject to flooding <u>or with a freeboard of less than</u> 150mm;
- (ii) no more than a 10% reduction in freeboard in 1% AEP event for existing authorised habitable floors with a freeboard of over 150mm;
- (iii) no increase of more than 50mm in <u>1% AEP</u> flood level on land zoned for urban or future urban development where there is no existing dwelling;
- (iv) no increase in 10% AEP flood levels for existing authorised habitable floors that are at risk of flooding;
- (v) no new flood prone areas;
- (vi) no increase in flood hazard (defined as flow depth times velocity) for main access to existing authorised habitable dwellings that are already classified as significant hazard; and
- (vii) <u>for areas with other hazard classifications</u>, no more than a 10% average increase of flood hazard (defined as flow depth times velocity) for main access to authorised habitable dwellings existing at time the Outline Plan is submitted.
- (b) Compliance with this condition shall be demonstrated in the Outline Plan, which shall include flood modelling of the pre-Project and post-Project 10 year & 100 year ARI flood levels (for Maximum Probable Development land use and including climate change).
- (c) Where the above outcomes can be achieved through alternative measures outside of the designation such as flood stop banks, flood walls, raising existing authorised habitable floor level and new overland flow paths or varied through agreement with the relevant landowner, the Outline Plan shall include confirmation that any necessary landowner and statutory approvals have been obtained for that work or alternative outcome.

<u>Rationale:</u> No justification has been provided for why a lesser standard of stormwater and flooding management should apply to these NoRs

The Requiring Authorities do not consider that any amendments are required to the proposed condition. A meeting has been scheduled with the Healthy Waters team to discuss and seek clarification on the proposed amendments. An update following the meeting will be provided to the Auckland Council processing team.

6	What is the time frame for preparation of an Urban and Landscape Design Management Plan? Rationale: Lisa Mein (Council – Urban Design) notes preparation of an ULDMP for all NoRs is recommended within the Urban Design Evaluation and reiterated in the AEE, and supports this. However, there is no detail on likely timeframe. In the absence of a timeframe, could we have a condition of consent requiring this and including the urban design outcomes and opportunities outlined within the UDE?	As set out in the proposed designation conditions, the Urban and Landscape Design Management Plan (ULDMP) will be prepared prior to the start of construction. Manawhenua will be invited to participate in the development of the ULDMP at least 6 months prior to the start of detailed design.				
7	Why no station at Memorial Drive? (NoRs 4a and 4b) Rationale: Lisa Mein (Council – Urban Design) had previously recommended consideration be given to additional stations at Rongomai Park and Manukau Memorial Gardens. She accepts that Rongomai can be served by the stations at Ormiston Town Centre and Dawson Road as it is located between these. She notes the UDE identifies an opportunity for a future station location at Memorial Gardens and supports this, however would like to see rationale for why no station at Memorial Gardens at this stage, particularly in light of the proposed alignments of NoRs 4a and 4b at SH20B and array of likely future land uses in the surrounding locality.	Station locations along the Project corridor have been considered through a previous business case process. Generally, proposed Bus Rapid Transit (BRT) stations along the corridor are equidistant, separated by walkable catchments and located at major intersections. Appendix A of the AEE provides an overview of the consideration of station locations. A station at Manukau Memorial Gardens was looked at, however, based on the existing and planned low density land uses in the area, it was considered that a local bus service would better serve the catchment. Notwithstanding this, if there is a need for a station at Manukau Memorial Gardens in the future, there is sufficient width within the proposed designation boundaries to provide for a BRT station in this location.				
8	Please provide more detail on the properties highlighted in blue/red on the General Arrangement Plans. Rationale: It is assumed from the legend that these properties will be acquired/purchased for raingardens/stormwater ponds, but would appreciate further clarity as these will have impacts on the surrounding built environment.	Section 6.4 of the AEE sets out the approach to stormwater management for the Project. The proposed stormwater infrastructure required for the Project will be further developed through future consenting and detailed design. The proposed Urban and Landscape Design Management Plan (ULDMP) condition requires that the ULDMP provide details of how the Project is designed to integrate with the adjacent urban and landscape context. Clause (g) of the proposed ULDMP condition also requires that the ULDMP include landscape and urban design details that cover landscape treatment of permanent stormwater infrastructure.				
9	Will there be pre-conditions for Universal Access and CPTED audits? Rationale We note safety is one of the principles (2.5) and universal access is highlighted within the UDE in addition to CPTED. It would be good to understand whether there are proposed conditions requiring these outcomes and if not, why not?	Universal access and CPTED considerations are specific matters referenced in the proposed Urban and Landscape Design Management Plan condition – clauses (e)(iii) and (e)(iv).				
10	There does not appear to have been any response to earlier Urban Design feedback about opportunities to support a sense of place – firstly for mana whenua, but also acknowledging other communities that have lived in South Auckland for several generations. Rationale: Ms Mein (Council – Urban Design) thoroughly supports Mana Whenua being actively involved in every stage of the project, and opportunities to bring their cultural narratives to the fore. However, there are other ethnicities	The overall project traverses several areas of significant cultural value to Manawhenua. As such, Manawhenua have been actively involved through the development of the NoR documentation and the proposed conditions. This provides for the ongoing partnership between Manawhenua and the Requiring Authorities through future phases of the Project. Engagement with other communities adjacent to the corridor has occurred through the NoR phase and in particular through the development of the Social Impact Assessment (refer to Appendix D). Opportunities for other communities to inform the future development of the Project is provided through the Stakeholder Communication and Engagement Management Plan (SCEMP) and the Development Response Management Plan (DRMP).

Where in the material are the opportunities for Pacific Island communities and South Asian communities (for example) to shape the environment around the corridor and see their "faces" in these places?						
11	Please provide more detail on the impact of the Puhinui Road bridging up to Puhinui Station concourse on the residential dwellings adjoining the corridor. Rationale: Detail on this is sparse, in particular why the NoR designation boundary misses out some of the properties between Puhinui Road and Bridge Street that will be adversely affected.	proposed Project. Some pro	The effects associated with the proposed BRT bridge are set out in Sections 9.5.1 and 9.5.2 of the AEE and Appendix C of the AEE. The proposed designation boundaries have been informed by the area required for the construction, operation, maintenance and mitigation of the Project. Some properties between Puhinui Road and Bridge Street are not within the proposed designation boundary as the Requiring Authority does not consider that these properties are reasonably necessary to achieve the objectives for which the designation is sought.				
12	Please provide more detail on the future access for those properties within the "integrated lane". Rationale: The access of these properties will be affected during construction, but also potentially after. More detail and offered conditions of consent for mitigation would be helpful.	It is proposed that access for properties within the proposed 'integrated lane' will be retained throughout the construction and operation of the Project. The Requiring Authority does not consider any further amendments are required to the proposed conditions.					
13	What is the proposed edge condition for properties adjoining cut or fill batters? <u>Rationale:</u> This will affect residential properties in particular. More detail and offered conditions of consent for mitigation would be helpful.	Clause (g) of the proposed Urban and Landscape Design Management Plan (ULDMP) condition requires that the ULDMP include road design details including how the carriageway gradient and associated earthworks interface with adjacent land uses. Therefore, the Requiring Authority does not consider any further amendments are required to the proposed conditions.

	Rationale: Under section 6.1, p34 of the AEE the RA explains the purpose of the designation and that final re-alignment will be determined through appropriate reinstatement of walkways, driveways and landscaping where necessary. This is supported by their urban design report and landscaping assessment. While the applicant has offered an urban design assessment and landscaping assessment and consequential management plans, the applicant has not provided a mitigation, enhancement and compensation assessment against the loss of open space or existing assets as a primary recreation function where permanent land take is proposed. There is no other assessment provided as to why they are proposing to take permanent land take other than protecting the function and maintenance of the proposed NoR	NoR 1	Kellaway Drive Reserve	Open Space – Informal Recreation Zone	20R Kelvin Hart Dr East Tamaki	No classification	3,811

Ref Request Rationale: Under section 9, p88 of the AEE the applicant refers: The land required for the Project is shown in the general arrangement layout plans included with the NoR (refer to Volume 3). Land required for the permanent work will be acquired prior to construction. Following the Completion of Construction, the designation boundary will be reviewed and any land that is not required for the permanent work or for the on-going operation, maintenance or mitigation of effects of the Project will be reinstated in coordination with directly affected landowners or occupiers. This will include: Reinstatement of construction areas and reintegrating with the

- surrounding landform;
- Reinstatement of driveways, accessways, fences and gardens; and
- Integration of batters and cut/fill slopes with the landscape.

These matters will be discussed prior to or during construction with directly affected landowners and will follow the provisions under the Public Works Act 1981 which is a process separate from the requirements of the RMA.

Based on their assessment, there is a strategic need for the Project corridor to address the existing and future demand for public transport in the southern and eastern areas of Auckland. Where impacts on properties and businesses cannot be avoided, the potential effects are discussed in this section and detailed in Section 9.5 and the Airport to Botany -Social Impact Assessment Appendix C, Volume 4.

The applicant has clearly demonstrated in their AEE under Section 9. And 9.7, p83 -88 that the measures to avoid, mitigate and remedy effects on properties is to offset the effects created by the NoR. There is a concern for the loss of open space specifically relates to Puhinui Domain, Hayman's Park, Manukau Sports Bowl and Velodrome, Manukau Memorial Gardens, Sancta Maria Ponds and Medvale Reserve. In the AEE, the applicant provides an assessment against the future receiving environment anticipating an increase in intensification and density, the applicant has not provided an open space assessment against the ongoing purpose, function and importance open spaces will have within these same future receiving environments. While the applicant has said they have consulted with various parks and community facilities members, all the various SME's (Parks and Places Specialist, Areas Operation Manager, Active Sports and Recreation and Land advisory) for parks and community facilities have not agreed to any permanent land take for the purpose of a future designation over existing parks, especially relating to Hayman's Park and Manukau Sports Bowl where there are active communities participating within these open spaces. These parks have ongoing master plans already in progress to develop the parks to meet the needs of the future communities within the same receiving environment.

Engagement with Auckland Council Community Facilities has been ongoing throughout the development of the AEE and will continue post lodgement.

Zone

It is anticipated that the outcomes of these discussions will be subject to some form of formal agreement between the various parts of Auckland

Utility reserve

We intend to update the Auckland Council processing team on these discussions in advance of the hearing and preferably in advance of the release of the initial s42A report.

Notwithstanding the above, one outcome of discussions to date is an agreed revision to the proposed Network Utility Operators condition to include specific reference to Auckland Council and park facilities:

Response

Ref	Request	Response
17	Please provide and address an assessment against the loss of open space or recreational assets or proposed mitigation in existing nearby parks to compensate for value and amenity and service provision loss. Rationale: All matters which are considered relevant under the Public Works Act, the Reserves Ac, the NPSUD, the Auckland Unitary Plan and the AUP, other than acquisition. The loss of open space within an existing urban fabric must be compensated for land elsewhere. There is no space to acquire additional open space in areas increasing in density and intensification. It is essential to protected and enhance the existing open space where it is being affected. All these reserves have been registered as having a primary function of recreation. Please provide an assessment against The Reserves Act 1977, the reserve management plans and / or any master plans prepared for the affected reserves. Rationale: The reserve management plans govern the uses that are allowed to take place on each type of reserve, what cannot take place in reserves, and the procedures that must be adhered to concerning any business regarding reserves. The relationship of the Reserves Act to the Resource Management Act is a complementary one. Together the Acts operate a dual mechanism for the protection and management of land classified as reserve land under the Reserves Act. The Resource Management Act sets the legal basis for the associated district plan in managing the effects on the environment of activities taking place on public open space zones. While the Reserves Act ultimately determines the types of uses appropriate for those public open space areas that are classified under the Reserves Act, the purpose and principles of the Resource Management Act must guide all environmental policy and management. In doing so consideration must be given to any proposed master plans for existing open spaces, the function and purpose of the open spaces,	Network Utility Operators (Section 176 Approval) (a) Prior to the start of Construction Works, Network Utility Operators (including Auckland International Airport Limited) and Auckland Council with existing infrastructure and/or park facilities located within the designation will not require written consent under section 176 of the RMA for the following activities: (i) operation, maintenance and urgent repair works; (ii) minor renewal works to existing network utilities and/or park facilities necessary for the on-going provision or security of supply of network utility and/or park facility operations; (iii) minor works such as new service connections; and (iv) the upgrade and replacement of existing network utilities and/or park facilities in the same location with the same or similar effects as the existing utility and/or facility. (b) To the extent that a record of written approval is required for the activities listed above, this condition shall constitute written approval.
18	their management plans and strategies prepared under other Acts. Please provide, with respect to open spaces where there are major sport events, an assessment or understanding of the play time of the clubs on the sport fields, the use of parking facilities during the construction phases, if the construction will alter the play time and whether they have proposed alternatives sites while the parking and accessibility are affected. Rationale: The Requiring Authority has only provided the proposal for construction management plans with the purpose of continuous accessibility/ alternative accessibility.	Given the timeframes for construction (approx. 15 years), the Project Team does not consider it is appropriate to assess the existing use of the parks facilities to inform the proposed construction management approach. Engagement with park users will occur during the delivery phase. The Requiring Authorities have made amendments to the proposed Stakeholder Communication and Engagement Management Plan (SCEMP) condition to clarify this as follows: (a) A SCEMP shall be prepared in consultation with stakeholders, community groups and organisations 18 months prior to the Start of Construction for a Stage of Work. The objective of the SCEMP is to identify how the public and stakeholders (including directly affected and adjacent owners and occupiers of land) will be engaged with prior to and throughout the Construction Works. To achieve the objective, the SCEMP shall include: 1
19	Please provide details of consultation and engagement with the sports clubs using the reserves and their carparking areas. Rationale: The Manukau Sports Bowl and Rongomai Sports Park will have various clubs facilitating the parks facilities through lease agreements utilising parking facilities and accessibility. It is not clear if the applicant has consulted	(iv) a list of stakeholders, organisations (such as community groups, organisations facilities) and businesses who will be engaged with; Access to parks will be maintained through the construction and operation of the Project. These are specific matters addressed in the proposed Stakeholder Communication and Engagement Management Plan and the Construction Traffic Management Plan.

Ref Request these various sports clubs on the use of the parking spaces. Club members often drive with cars from far away. These club groups will directly be affected by both the construction period and permanent land take. We cannot tell if the integrated transport assessment addresses the utilisation of these car parks during massive sport events, the amount of car parks that have been approved and anticipated for under the management plan and what the proposal is for mitigating or proposing alternatives to park. Historic Heritage / Archaeology / Notable Trees 20 Two of the trees proposed for removal in the Airport to Botany proposal are scheduled Notable trees. Please provide an assessment of why the route alignment or design cannot be changed to avoid the removal of those two trees Rationale: The application documents do not adequately justify the removal of these two trees, and nor do they show the alternatives considered which could enable their retention. In addition, AEE page 51, Figure 13 the flowering gum (proposed for destruction) is not shown as a green triangle, when it is.

Response

As set out in Appendix B of the AEE, the trees are in varying degrees of health:

- The Notable Magnolia tree is in good visual health, but its optimal structure has been heavily modified due to frequent pruning to clear the adjacent powerlines. This has resulted in an upright, largely one-sided canopy form with several pruning wounds and pockets of decay visible near the base of the tree. This ongoing pruning has likely to have reduced the tree's long term structural health and longevity.
- The Notable Flowering Gum tree is currently in good visual health. However, some structural concerns were noted. The structural issues identified are a result of heavily weighted limbs and cambial cracking due to wind loading stresses. These have been managed to some degree by periodic limb reduction and canopy management.

Careful consideration has been given to retaining the notable trees in their current location. It was noted that locating general vehicle lanes and/or walking and cycling facilities in close proximity to the notable trees would curtail the future growth of both trees and/or potentially require significant trimming to provide sufficient clearance.

The proposed TMP condition requires that measures to avoid, remedy or mitigate any effects on trees, including notable trees within the proposed designation boundary are demonstrated through the design and location of project works.

Transport

Please revise the Assessment of Transport Effects (ATE) and Assessment of Environmental Effects (AEE) to fully consider transportation effects during the construction phase.

Rationale: The Assessment of Transport Effects (ATE) and Assessment of Environmental Effects (AEE) clarify that assessment of the NoRs is based around a 'no project' scenario versus 'full build out' scenario. However, this does not take account of the interim period for construction, estimated to be some 4 to 6 years, during which time intersections will be reconfigured with reduced capacity and parking will be removed, but without the benefit of the BRT route in operation, to provide relief to traffic and parking pressures. Indeed, the ATE's assessments for both network operation and parking removal rely upon modal shift to the new BRT route in order to counter such adverse effects.

The preparation of a Construction Traffic Management Plan (CTMP) is required as part of the proposed conditions. The objective of the CTMP is to manage adverse construction traffic effects as far as practicable. We do not consider that additional analysis is appropriate to understand the construction traffic effects at this stage. This is on the basis that timeframes for construction (approx. 15 years) and the likely change in traffic patterns, bus services, adjacent land use, impacts of wider projects and policies and the specific construction methodology. Any mitigatory measures to manage adverse construction traffic effects will be appropriately addressed through the CTMPs.

Ref	Request	Response
	With regards to the NoR relating to the 'full build out' scenario, consideration should be given to mitigatory measures which are required for the construction phase. Examples of mitigatory measures could perhaps include travel planning measures or temporary park and ride operations, such as was implemented for Phase 1 of AMETI.	
22	Network Performance – Mitigatory Measures to parts of adjoining road network with Significantly Poorer Levels of Service Please provide further detail in relation to identified opportunities for mitigation to the adverse road network effects identified in Section 5.9 of the Assessment of Transport Effects – or else confirmation that no such opportunities have been identified to address certain locations with poor Levels of Service. Rationale: While the ATE report refers to some potential bus priority measures around the southern fringe of Manukau, it remains silent on potential mitigatory measures for other notable 'hotspots', including: • Great South Road / Ronwood Avenue • Puhinui Road / Plunket Avenue • SH20B / Campana Road There needs to be further discussion on options to mitigate adverse traffic effects, or else justification for why no mitigation has been identified.	Mode shift towards public transport is a key outcome of the Project. Modal priorities are expected to change over time with less priority given to general traffic flow. In this regard, the future operating environment is anticipated to tolerate increased delay and queuing for general traffic, at certain intersections, at certain times. It is acknowledged that general traffic delays do increase for some locations, however the overall travel time reduces as a result of the Project, given the provision of other mode choices (BRT and walking and cycling). With regards to the specific intersections, it is noted that: - The SH20B / Campana Road intersection, along with the ramp meters on the SH20B ramp play an important role in the SH20B/SH20A/SH20 network, managing flows around this 'triangle'. Future forecast general traffic demand in this location is close to the capacity of the wider motorway network and therefore, these locations are used to balance flows and assist the network to operate as efficiently as possible. - The Puhinui Road / Plunket Avenue intersection will be converted from a priority-controlled intersection to a signalised intersection which will naturally result in increased delay / queuing from the signal operation. However, signals will significantly improve safety provisions at this intersection for active modes as well as general traffic, while enabling public transport priority necessary for BRT operation. - Intersections located within Central Manukau will generally give the highest priority to other modes such as walking, cycling and public transport. As such delay and queuing to cars is to be expected but has been considered within the context of the enhanced safety, access and efficiency provided to those other modes.

23	Please provide a description of how the NoR3 northern-side cycle and walking facility is proposed to safely link to the NoR 4a/b southern-side only cycle and walking facility Rationale: The plans don't clearly show the link between the cycle facilities on the northern side of Puhinui Road and the southern side of SH20B	The figures below illustrate the connection of walking and cycle facilities between NoR 3 and NoRs 4a and 4b. There is an existing shared path on the northern side of SH20B (see aerial image). No changes are proposed to this as part of the Project.

Ref	Request	Response
24	When considering parking (both on-site and on-street) and loss of property access, did the wider project team or SIA engagement collect data from directly affected businesses, residents and users to inform the assessment? Rationale: To understand the level of community input into the assessment of potential effects	Both on-street and on-site parking were discussed through engagement. This included discussions with landowners and businesses. In these discussions, the Project Team noted that some on-site parking impacts would be temporary to provide for the construction of the Project. However, it was noted that there would also be permanent impacts to on-site parking. The proposed conditions provide for ongoing discussions with the stakeholders, community groups and organisations to communicate timeframes and manage the impacts of construction on identified businesses.
		Given the timeframe for construction (approx. 15 years), the provision of specific on-street car parking will be determined on a case-by-case basis at the future detailed design stage.
25	For each proposed mitigation strategy within the SIA, please describe the thinking behind why the General Conditions listed in Form 18, NoR documents do not include the SIA's proposed mitigation strategies? These include Community Wellbeing, Social Outcomes, Good neighbour, and respite and relocation. Rationale: Many of the potential effects were assessed as high. To mitigate, a strong mix of mitigations will be required and several potential options recommended by the SIA team have not been included in the Project	The recommendations in the Social Impact Assessment are integrated across the proposed conditions and are intended to be read as whole. For example: - Matters raised in the community wellbeing recommendation have been included in the proposed Project Information condition. In addition, independent support is currently available to landowners and will remain in place until construction of the Project is completed. - Respite and relocation are matters covered through the Construction Environmental Management Plan and provided for in the Construction Noise and Vibration Management Plan. With regard to the social outcomes strategy recommendation, it is noted that the scope of this strategy is broader than the Project and is an evolving workstream that the Requiring Authorities are actively reviewing.
26	What effective mitigations are proposed for the loss of parking (on-street and on-site) and changes in access to properties, both business and residential during construction? Rationale: The loss of parking and changes to property access are considered to have a high impact (SIA, Appendix E), however there appears to be no mitigation available to these effects in the SCEMP or DRMP within the NoR General Conditions	As set out above, some on-site parking will be temporarily impacted to provide for the construction of the Project. On-site parking that is permanently impacted by the Project will be addressed as part of the acquisition and compensation process under the Public Works Act 1981 (PWA) which will commence during detailed design. With regard to the access, the proposed Stakeholder Communication and Engagement Management Plan (SCEMP) condition requires that the methods and timing to engage with landowners whose access is directly affected is set out in the SCEMP. Given the timeframe for construction (approx. 15 years), the provision of specific on-street car parking will be determined on a case-by-case basis at the future detailed design stage.
27	What effective mitigations are proposed for high negative social effects during operation? Rationale: No mitigations are proposed to address the operational, high negative effects of severance, reduced property access from right-hand turn restrictions, and loss of car parking	As set out in Appendix A of the AEE, there are several areas along the Project where right-turn access is restricted due to existing solid medians (for example, Te Irirangi Drive, Manukau Central). It is recognised that all movements are possible at access points within NoR 3. The Project will restrict these movements to left turn in and left turn out. However, the local residential side street pattern and general road network in the surrounding area, is such that there are alternative routes and the increase in expected travel distance is no more than 2.5 km (refer to Figure 1 and 2 below). Over time it is considered that residents will adjust their travel patterns to access their properties using a left turn in/left turn out configuration.

Ref	Request	Response
	<u>Rationale:</u> Providing surety of this level of detail would support the findings of the Urban Design Evaluation which has identified the need for cross corridor permeability in several sites that are not intersections	
29	In the Assessment of Traffic Noise Effects, can you explain why building modification is not proposed for protected premises and facilities which are assessed to receive Category C traffic noise during operation? Rationale: A small number of PPFs remain exposed to Category C noise from road traffic after modelling with low-noise road seal. Noise barriers are discussed as a potential mitigation but are unlikely to work for most elevated premises or those with driveway access. Building mitigation is not recommended despite being mentioned as an option on page 15 of the Traffic Noise Assessment. Yet building mitigation is proposed in the General Conditions?	As set out in Appendix H of the AEE, no specific traffic noise mitigation has been identified beyond low noise road surface. The conditions provide for mitigation options to be considered and refined closer to construction, when detailed design has been developed. Any PPFs receiving noise levels within Category C following the installation of structural mitigation (i.e. low noise road surface and barriers where appropriate), will need to be assessed in relation to their internal noise level as is required by the proposed conditions.

These methods shall include, but are not limited to:
NoRs 1, 2, 3 and 4a	24.	Pre-Construction Ecological Survey (a) At the start of detailed design for a Stage of Work, an updated ecological survey shall be undertaken by a Suitably Qualified and Experienced Person. The purpose of the survey is to inform the detailed design of ecological management by: (i) confirming whether the species of value within the Identified Biodiversity Areas recorded in Schedule 3 are still present; and (ii) confirming whether the project will or may have a moderate or greater level of ecological effect on ecological species of value, prior to implementation of impact management measures, as determined in accordance with the EIANZ guidelines (or any subsequent updated version). (b) Mana Whenua shall be invited as partners to observe how the ecological survey in (a) will be undertaken. (c) If the ecological survey in (a) above confirms the presence of ecological species of value in accordance with Condition 24(a)(i) and that effects are likely in accordance with Condition 24(a)(ii), then an Ecological Management Plan (or Plans) shall be prepared in accordance with Condition 25 for these areas
NoRs 1, 2, 3	25.	(Confirmed Biodiversity Areas). Ecological Management Plan (EMP)
and 4a		 (a) An EMP shall be prepared for any Confirmed Biodiversity Areas (confirmed through Condition 24) prior to the Start of Construction for a Stage of Work. The objective of the EMP is to minimise impacts of the Project on the ecological values of Confirmed Biodiversity Areas as far as practicable. The EMP shall set out the methods that will be used to achieve the objective which may include: if an EMP is required in accordance with Condition 24(b) for the presence of long-tailed bats:

- A. measures to minimise disturbance from construction activities within the vicinity of any active roosts that are discovered until such roosts are confirmed to be vacant of bats;
- B. how the timing of any construction work in the vicinity of any maternity long tail bat roosts will be limited to outside the bat maternity period (between December and March) where reasonably practicable;
- details of areas where vegetation is to be retained where practicable for the purposes of the connectivity of long tailed bats;
- D. details of how bat connectivity will be provided and maintained (e.g. through the presence of suitable indigenous, or exotic trees or artificial alternatives) will be provided and maintained; and
- where mitigation isn't practicable, details of any offsetting proposed.
- (ii) If an EMP is required in accordance with Condition 24(b) for the presence of Threatened or At-Risk birds (excluding Wetland Birds):
 - A. how the timing of any Construction Works shall be undertaken outside of the bird breeding season (September to February) where practicable;

 - C. undertaking a nesting bird survey of Threatened or At-Risk wetland birds prior to any Construction Works taking place within a 50m radius of any identified Wetlands (including establishment of construction areas adjacent to Wetlands). Surveys should be repeated at the beginning of each wetland bird breeding season and following periods of construction inactivity:
 - D. what protection and buffer measures will be provided where nesting Threatened or At-Risk wetland birds are identified within 50m of any construction area (including laydown areas).
 Measures could include:
 - a 20m buffer area around the nest location and retaining vegetation. The buffer areas should be demarcated where necessary to protect birds from encroachment. This might include the use of marker poles, tape and signage;
 - monitoring of the nesting Threatened or At-Risk wetland birds by a Suitably Qualified and Experienced Person.
 Construction works within the 20m nesting buffer areas should not occur until the Threatened or At-Risk wetland birds have fledged from the nest location (approximately

		30 days from egg laying to fledging) as confirmed by a Suitably Qualified and Experienced Person; and				
		 minimising the disturbance from the works if construction works are required within 50m of a nest, as advised by a Suitably Qualified and Experienced Person. 				
		 adopting a 10m setback where practicable, between the edge of wetlands and construction areas (along the edge of the stockpile/laydown area); and

		(b) The EMP shall be consistent with any ecological management measures to be undertaken in compliance with conditions of any regional resource consents granted for the Project.				
		(c) Where appropriate, and in partnership with Mana Whenua, flora and fauna values identified in the ULDMP are reflected and included within this EMP.				
		Advice Note:				
		Depending on the potential effects of the Project, the regional consents for the Project may include the following monitoring and management plans: (i) Stream and/or wetland restoration plans; (ii) Vegetation restoration plans; and				
		(iii) Fauna management plans (e.g. avifauna, herpetofauna, bats).				
NoRs 1, 2, 3		Tree Management Plan				
		 (a) Prior to the Start of Construction for a Stage of Work, a Tree Management Plan shall be prepared. (b) The objective of the Tree Management Plan is to avoid, remedy or mitigate effects of construction activities on trees identified in Schedule 4. (c) The Tree Management Plan shall: 				
		(i) confirm that the trees listed in Schedule 4 still exist; and				
		(ii) demonstrate how the design and location of project works has avoided, remedied or mitigated any effects on any tree listed in Schedule 4. This may include:				
		 A. planting to replace trees that require removal (with reference to the ULDMP planting design details in Condition 13; 				
		 B. tree protection zones and tree protection measures such as protective fencing, ground protection and physical protection of roots, trunks and branches; and 				
		 C. methods for work within the rootzone of trees that are to be retained in line with accepted arboricultural standards. 				
		 (iii) demonstrate how the tree management measures (outlined in A – C above) are consistent with conditions of any resource consents granted for the project in relation to managing construction effects on trees. 				
NoRs 1, 2, 3	27.	Network Utility Management Plan (NUMP)				
and 4a		(a) A NUMP shall be prepared prior to the Start of Construction for a Stage of Work.				
		(b) The objective of the NUMP is to set out a framework for protecting, relocating and working in proximity to existing network utilities. The NUMP shall include methods to:				
		 provide access for maintenance at all reasonable times, or emergency works at all times during construction activities; 				
		(ii) manage the effects of dust and any other material potentially resulting from construction activities and able to cause material damage, beyond				

levels established in accordance with NZS 6806 when determining the Best Practicable Option for noise mitigation (i.e. Categories A. B and C):

		(h) NZS 6806 – means New Zealand Standard NZS 6806:2010 Acoustics – Road-traffic noise – New and altered roads;
		 (i) Protected Premises and Facilities (PPFs) – means only the premises and facilities identified in green, orange or red in Schedule 2: Identified PPFs Noise Criteria Categories;
		(j) Selected Mitigation Options – means the preferred mitigation option resulting from a Best Practicable Option assessment undertaken in accordance with NZS 6806 taking into account any low noise road surface to be implemented in accordance with Condition 28; and
		(k) Structural Mitigation – has the same meaning as in NZS 6806.
NoRs 1, 2, 3 and 4a	30.	The Noise Criteria Categories identified in Schedule 2: Identified PPFs Noise Criteria Categories at each of the PPFs shall be achieved where practicable and subject to Conditions 29 to 41 (all traffic noise conditions).
		Achievement of the Noise Criteria Categories for PPFs shall be by reference to a traffic forecast for a high growth scenario in a design year at least 10 years after the programmed opening of the Project.
NoRs 1, 2, 3 and 4a	31.	As part of the detailed design of the Project, a Suitably Qualified and Experienced Person shall determine the Selected Mitigation Options for the PPFs identified on Schedule 2: Identified PPFs Noise Criteria Categories.
		For the avoidance of doubt, the low noise road surface implemented in accordance with Condition 28 may be (or be part of) the Selected Mitigation Option(s).
NoRs 1, 2, 3 and 4a	32.	Prior to construction of the Project, a Suitably Qualified and Experienced Person shall develop the Detailed Mitigation Options for the PPFs identified in Schedule 2: Identified PPFs Noise Criteria Categories, taking into account the Selected Mitigation Options.
NoRs 1, 2, 3 and 4a	33.	If the Detailed Mitigation Options would result in the Identified Noise Criteria Category changing to a less stringent Category, e.g. from Category A to B or Category B to C, at any relevant PPF, a Suitably Qualified and Experienced Person shall provide confirmation to the Manager that the Detailed Mitigation Option would be consistent with adopting the Best Practicable Option in accordance with NZS 6806 prior to implementation.
NoRs 1, 2, 3 and 4a	34.	The Detailed Mitigation Options shall be implemented prior to completion of construction of the Project.
NoRs 1, 2, 3 and 4a	35.	Prior to the Start of Construction, a Suitably Qualified and Experienced Person shall identify those PPFs which, following implementation of all the Detailed Mitigation Options, will not be Noise Criteria Categories A or B and where Building-Modification Mitigation might be required to achieve 40 dB L _{Aeq(24h)} inside Habitable Spaces ('Category C Buildings').
NoRs 1, 2, 3 and 4a	36.	Prior to the Start of Construction in the vicinity of each Category C Building, the Requiring Authority shall write to the owner of the Category C Building requesting entry to assess the noise reduction performance of the existing building envelope. If the building owner agrees to entry within three months of the date of the Requiring Authority's letter, the Requiring Authority shall instruct a Suitably Qualified and Experienced Person to visit the building and assess the noise reduction performance of the existing building envelope.
NoRs 1, 2, 3 and 4a	37.	For each Category C Building identified, the Requiring Authority is deemed to have complied with Condition 36 above if:
		(a) The Requiring Authority's Suitably Qualified and Experienced Person has visited the building and assessed the noise reduction performance of the building envelope; or

		(b) The building owner agreed to entry, but the Requiring Authority could not gain entry for some reason (such as entry denied by a tenant); or
		(c) The building owner did not agree to entry within three months of the date of the Requiring Authority's letter sent in accordance with Condition 36 above (including where the owner did not respond within that period); or
		(d) The building owner cannot, after reasonable enquiry, be found prior to completion of construction of the Project.
		If any of (b) to (d) above apply to a Category C Building, the Requiring Authority is not required to implement Building-Modification Mitigation to that building.
NoRs 1, 2, 3 and 4a	38.	Subject to Condition 37 above, within six months of the assessment undertaken in accordance with Conditions 36 and 37, the Requiring Authority shall write to the owner of each Category C Building advising:
		(a) If Building-Modification Mitigation is required to achieve 40 dB L _{Aeq(24h)} inside habitable spaces; and
		(b) The options available for Building-Modification Mitigation to the building, if required; and
		(c) That the owner has three months to decide whether to accept Building- Modification Mitigation to the building and to advise which option for Building- Modification Mitigation the owner prefers, if the Requiring Authority has advised that more than one option is available.
NoRs 1, 2, 3 and 4a	39.	Once an agreement on Building-Modification Mitigation is reached between the Requiring Authority and the owner of a Category C Building, the mitigation shall be implemented, including any third party authorisations required, in a reasonable and practical timeframe agreed between the Requiring Authority and the owner.
NoRs 1, 2, 3 and 4a	40.	Subject to Condition 37, where Building-Modification Mitigation is required, the Requiring Authority is deemed to have complied with Condition 39 if:
		 (a) The Requiring Authority has completed Building Modification Mitigation to the building; or (b) An alternative agreement for mitigation is reached between the Requiring Authority and the building owner; or (c) The building owner did not accept the Requiring Authority's offer to implement Building-Modification Mitigation within three months of the date of the Requiring Authority's letter sent in accordance with Condition 37 (including where the owner did not respond within that period); or (d) The building owner cannot, after reasonable enquiry, be found prior to completion of construction of the Project.
NoRs 1, 2, 3 and 4a	41.	The Detailed Mitigation Options shall be maintained so they retain their noise reduction performance as far as practicable.

 - A. measures to minimise disturbance from construction activities within the vicinity of any active roosts that are discovered until such roosts are confirmed to be vacant of bats:
 - how the timing of any construction work in the vicinity of any maternity long tail bat roosts will be limited to outside the bat maternity period (between December and March) where reasonably practicable;
 - details of areas where vegetation is to be retained where practicable for the purposes of the connectivity of long tailed bats;
 - D. details of how bat connectivity will be provided and maintained (e.g. through the
 presence of suitable indigenous, or exotic trees or artificial alternatives) will be
 provided and maintained; and
 - E. where mitigation isn't practicable, details of any offsetting proposed.
 - (ii) If an EMP is required in accordance with Condition 22(b) for the presence of Threatened or At-Risk birds (excluding Wetland Birds):
 - A. how the timing of any Construction Works shall be undertaken outside of the bird breeding season (September to February) where practicable;
 - B. where Pipit are identified as being present, how the timing of any Construction Works shall be undertaken outside of the Pipit bird breeding season (August to February) where practicable;
 - C. where works are required within the Confirmed Biodiversity Area during the bird breeding season (including Pipits), methods to minimise adverse effects on Threatened or At-Risk birds; and
 - D. details of grass maintenance if Pipit are present.
 - (iii) If an EMP is required in accordance with Condition 22(b) for the presence of Threatened or At-Risk wetland birds:
 - A. how the timing of any Construction Works shall be undertaken outside of the bird breeding season (September to February) where practicable;
 - B. where works are required within the Confirmed Biodiversity Area during the bird breeding season, methods to minimise adverse effects on Threatened or At-Risk wetland birds
 - C. undertaking a nesting bird survey of Threatened or At-Risk wetland birds prior to any Construction Works taking place within a 50m radius of any identified Wetlands (including establishment of construction areas adjacent to Wetlands). Surveys should be repeated at the beginning of each wetland bird breeding season and following periods of construction inactivity;

- D. what protection and buffer measures will be provided where nesting Threatened or At-Risk wetland birds are identified within 50m of any construction area (including laydown areas). Measures could include:
 - a 20m buffer area around the nest location and retaining vegetation. The buffer areas should be demarcated where necessary to protect birds from encroachment. This might include the use of marker poles, tape and signage;
 - b. monitoring of the nesting Threatened or At-Risk wetland birds by a Suitably Qualified and Experienced Person. Construction works within the 20m nesting buffer areas should not occur until the Threatened or At-Risk wetland birds have fledged from the nest location (approximately 30 days from egg laying to fledging) as confirmed by a Suitably Qualified and Experienced Person; and
 - minimising the disturbance from the works if construction works are required within 50m of a nest, as advised by a Suitably Qualified and Experienced Person.
- E. adopting a 10m setback where practicable, between the edge of wetlands and construction areas (along the edge of the stockpile/laydown area); and
- F. minimising light spill from construction areas into wetlands.
- (b) The EMP shall be consistent with any ecological management measures to be undertaken in compliance with conditions of any regional resource consents granted for the Project.
- (c) Where appropriate, and in partnership with Mana Whenua, flora and fauna values identified in the ULDMP are reflected and included within this EMP.

Advice Note:

Depending on the potential effects of the Project, the regional consents for the Project may include the following monitoring and management plans:

- (i) Stream and/or wetland restoration plans;
- (ii) Vegetation restoration plans; and
- (iii) Fauna management plans (e.g. avifauna, herpetofauna, bats).

24. Network Utility Management Plan (NUMP)

- (a) A NUMP shall be prepared prior to the Start of Construction for a Stage of Work.
- (b) The objective of the NUMP is to set out a framework for protecting, relocating and working in proximity to existing network utilities. The NUMP shall include methods to:
 - (i) Provide access for maintenance at all reasonable times, or emergency works at all times during construction activities;
 - (ii) Manage the effects of dust and any other material potentially resulting from construction activities and able to cause material damage, beyond normal wear and tear to overhead transmission lines in the Project area;
 - (iii) Demonstrate compliance with relevant standards and Codes of Practice including, where relevant, the NZECP 34:2001 New Zealand Electrical Code of Practice for Electrical Safe Distances 2001; AS/NZS 4853:2012 Electrical Hazards on Metallic Pipelines; and AS/NZS 2885 Pipelines – Gas and Liquid Petroleum.
- (c) The NUMP shall be prepared in consultation with the relevant Network Utility Operator(s), (including Auckland International Airport Limited) who have existing assets that are directly affected by the Project.
- (d) The development of the NUMP shall consider opportunities to coordinate future work programmes with other Network Utility Operator(s) where practicable.
- (e) The NUMP shall describe how any comments from the Network Utility Operator (including Auckland International Airport Limited) in relation to its assets have been addressed.
- (f) Any comments received from the Network Utility Operator (including Auckland International Airport Limited) shall be considered when finalising the NUMP.
- (g) Any amendments to the NUMP related to the assets of a Network Utility Operator (including Auckland International Airport Limited) shall be prepared in consultation with that asset owner.

Schedule 1: General accordance plan and information

The proposed work is an upgrade of the existing State Highway 20B (SH20B) from the SH20/20B Interchange to Manukau Memorial Gardens. This is for the construction, operation and maintenance of the State Highway including a Bus Rapid Transit (BRT) corridor, walking and cycling facilities and associated infrastructure. The proposed work is shown in the following Concept Plan and includes:

- a) An upgrade of the SH20B corridor between the SH20/20B interchange and the intersection of Manukau Memorial Gardens to provide westbound lanes, walking and cycling facilities and a ramp from SH20B onto SH20 for southbound traffic while enabling the provision of a BRT corridor;
- b) Associated works including but not limited to intersections, bridges, embankments, retaining walls, culverts, stormwater management systems; and
- c) Construction activities, including vegetation removal, construction areas and the re-grading of driveways.
