

Kaipātiki Local Board Open Space Network Plan 2022-2032

December 1 2021

Purpose of the workshop

- Update members on our progress since the last workshop
- Seek feedback on the completed draft open space network plan
 - Seek feedback on revised Key Moves
 - Seek feedback on prioritisation of actions
- Outline our next steps

Recap

- Clarification was needed on the purpose of an open space network plan – particularly in relation to a Local Parks Management Plan.
- Staff provided a one pager with options analysis, recommending Option B - Develop a skeleton Open Space Network Plan that includes key moves and prioritisation principles but excludes a park-by-park analysis.
- Local board agreed, as long as the revised document is clear about gaps in the network.

Recap: alignment with Local Parks Management Plan

Open Space Network Plan

Open Space Network Plans are **non-statutory** documents that set out the aspirations of the local board for the future development of the open space network. They create a cohesive view of the open space network and provide decision-makers with a tool to prioritise budget allocation.

Open Space Network Plans include

- an assessment of open space provision including principled opportunity for acquisition/optimisation/reconfiguration of parks as per the [Parks and Open Space Acquisition Policy 2013](#).
- advocacy actions to the governing body or stakeholders.

The plans aim to be a 10-year living document and can be **subject to review** by the local board. OSNP are concise, high-level documents that cover three main sections: current state, key moves and prioritisation principles and actions.

Local Parks Management Plan

Local Parks Management Plans are **statutory** documents that set local boards and public expectations about how individual parks are used, managed and protected. The plans address what needs to be considered when developing and enhancing our parks. The plans are **developed with** mana whenua and **consulted on** with the local community to ensure their needs and aspirations for local parks are considered.

Local Parks Management Plans are detailed documents with two volumes, four sections and appendices spanning approximately 500 pages.

The Kaipātiki Local Parks Management Plan is currently on hold (as per memo dated 18 August 2021 to the local board) and is estimated to be nearing completion at the end of 2022. As the notifications of the draft plan and subsequent hearing are likely to be around the election period, staff will need direction from the local board on timing to finalise.

Update on progress

- Thorough provision / gaps analysis in the current state and how to address this in the Key Moves and actions
- Key Moves have been refreshed to better reflect local board's priorities and feedback
- Actions have been prioritised using prioritisation principles for discussion with you
- We have worked alongside the Local Parks Management Team to ensure our plans align
- Mana whenua engagement

Previous Key Moves

Resolution KT/2020/38

1

Key Move 1 –
Growth and
changing
demographics

2

Key Move 2 –
Improving and
developing network
connections

3

Key Move 3 –
Managing
ecological quality
and diversity

4

Key Move 4 –
Accessible and
social open spaces

Revised Key Moves

1

Key Move 1 –
Provide equitable
access to open
space across
Kaipātiki

2

Key Move 2 –
Enhance and
broaden the visitor's
experience

3

Key Move 3 –
Treasure our natural
and cultural
environment

4

Key Move 4 –
Enhance walking,
cycling and green
corridors to connect
our communities

Prioritisation criteria

- existing capital works programmes and contractual commitments
- areas zoned for high growth (metropolitan centre, town centres, local centres, mixed use, terrace housing and apartments) and areas where a gap in provision has been identified
- areas of deficiency and/or poor-quality open space are prioritised over areas of good provision and/or good quality open space
- alternative options that still deliver high benefits for the community
- planning and funding cycles and other influences such as land acquisitions, large infrastructure projects, integrated planning with neighbouring local boards and other stakeholders.

Ongoing action	Grey
High priority (1-3 years)	Red
Medium priority (3-5 years)	Yellow
Low priority (6-10+ years)	Green
