Local Government Official Information And Meetings Act 1987

Tāmaki Path Stage 2 project

Thank you for your information request dated 30 January 2026, regarding the Tamaki Path Stage 2 Project. The specific details of your request and our response is below.

The arborist’s report referenced in the Resource Consent, including details relating to tree removals.

You can find the arboricultural assessment in **Document A**. This report measures how the bridge, boardwalk, and track construction affects the area. It includes a summary of our tree protection methods and the specific details you asked for regarding tree locations and removals.

The Geotechnical report for the steep bank along the 98-104 Taniwha Street boundary.

The geotechnical report for the project, including the bank along the 98-104 Taniwha Street boundary, is attached as **Document B**.

Structural engineering reports, including the boardwalk design along the boundary, and stormwater and runoff calculations for the 2-3m wide concrete path, including any erosion assessments.

The following documents cover the structural and environmental details of the project:

- **Document C:** The latest engineering drawings (dated December 2025)
- **Document D:** The construction methodology and the erosion and sediment control plan
- **Document E:** Structural calculations for the boardwalk and bridge.

A note on stormwater and runoff - Because the path is long and narrow and follows the land's natural shape, the project will not change the area's natural hydrology. The path takes up a very small part of the site, so stormwater will naturally disperse across the land rather than being discharged from a single point.

The estimated value of works stated on the Building Consent application.

We did not require an estimated value of works for this project.

Because a chartered engineer designed the structures and will monitor the construction, the project was granted an exemption from the building consent process. This was done under clause 2 of Schedule 1 of the Building Act 2004. The exemption was granted because the work is unlikely to endanger people or property and will be carried out in line with the Building Code.

The exemption is subject to the following conditions:

- a PS3 (Construction Review) from the contractor
- site observations and a PS4 (Producer Statement) from the Chartered Professional Engineer
- the owner, applicant, or contractor must ensure all work complies with the Building Code
- all exempt work must meet the requirements and conditions of the Resource Management Act 1991.

Decisions regarding the information being released to you were made by Taryn Crewe, General Manager Parks and Community Facilities.

Please note due to the size of these documents, you can access the information by using this [OneDrive link](#)¹. Please note the link expires after 30 days. We recommend you save the information to your personal computer.

Should you believe Auckland Council has not responded appropriately to your request you have the right to seek a review of the decision from the Ombudsman.

If you have any further queries please contact me on 09 301 0101, quoting LGOIMA No. 8140018362.

Ngā mihi
