

Iwi GeoMaps Guide

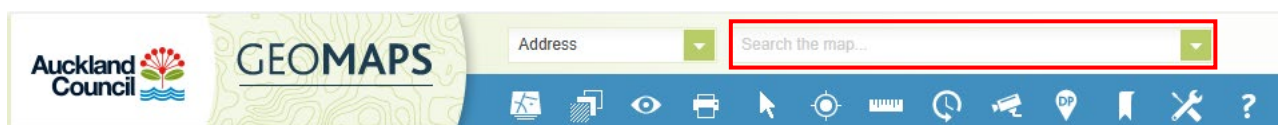

1. Launch [GeoMaps](#).
2. Click the **Data Discovery** tool and type **TangataWhenuaQuery**.
3. Click on **Go** to display the service below, and then on **Add**.

4. Once added, click on the **Legend** tab and expand the **TangataWhenuaQuery** layer.
5. Tick the **IwiRoheAreaOfInterest** layer.

6. Use the **address search** to zoom to the property.

7. Activate the green  **identify icon** at the base of the zoom tools (the colours will invert), and click on the property on the map.
8. In the Results tab, change the dropdown to **IwiRoheAreaOfInterest** to obtain a list of all overlapping rohe. You will see results similar to this:

Info		Legend		Results	
IwiRoheAreaOfInterest					
Iwi Name	Iwi Name Label	Extent Type	Extent Status	Unique ID	
Ngati Paoa	Ngāti Pāoa	2	Current	2	
Ngati Te Ata	Ngāti Te Ata	1	Current	16
