As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland's infrastructure is already crumbling. We need more investment, not less.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

We should encourage city centre living by reducing rates. This will reduce traffic congestion and stimulate local businesses that are suffering due to people working from home.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Improving public transport. More walkable streets. Less council owned land being used by golf clubs for almost no money.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is key urgent issue. I believe we have still so much to do Like removing single use plastic (cups and straws) from cafes and restaurants.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: interest rates are low and ignoring investments last decade has meant that we've fallen behind on things like water quality, transportation and housing. Need to think long-term

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is going to be one of the biggest challenges we'll face in the future

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality has continued to decline and we can't swim after a heavy rain. There used to be fish in the Hauraki but now it's all silted up and we accept this as the norm

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: sounds better than just continuing business as usual

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

nil

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: It doesn't affect me so I don't think my decision should be counted

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support to a degree however I massively disagree with the price hike for petrol Auckland has.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is the single biggest issue we are faced with today

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: If it lowers the carbon footprint I support

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Overall i support it but have a few things that i feel are missing or wrong (outlined in further question below).

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Support, but feel that waste reduction and household waste education is missing. A huge number of people do not recycle or do not recycle correctly. Composting and community composting facilities could be a much bigger focus, as well as waste reduction.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: No issues

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support, provided community facilities are still accessible to all and available online. Libraries are very important to me and this is a service i dont want to see change much, although appreciate the need to maybe close the smaller ones (like grey lynn). The only thing with libraries is that if you close a library it may make it more difficult for people to return books. Local parks and reserves are also very important and should not be sold. With the increase in housing, community green spaces are vital, particularly as a lot of these townhouses/apartments dont give people much outdoor space. They need to be able to utilise local reserves for day to day nature breaks, picnics etc. Nature play a big part in mental health for me and green spaces must stay.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

No

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: If you charge too much they will resent the service. We need people to want to use public transport.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I do feel that local infrastructure isn't highlighted enough. Improving sewer ways and water ways given the massive housing growth is vital. Support, but feel that waste reduction and household waste education is missing. A huge number of people do not recycle or do not recycle correctly. Composting and community composting facilities could be a much bigger focus, as well as waste reduction.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: like council, every other person is affected by covid financially. you can claim your impact via compulsory rates increase but what about others who already have been affected and this rates increase on top of that. you do care about this?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: if we are struggling financially, such projects should be on hold or budget re calculated. you cant put pressure on people to fund such projects. families are affected.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: again, think about how this impacts on lifes of families. you are sacrificing family life to expensive projects

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: these facilities are there for a purpose and its not free. council charges for these facilities so those funds shou;ld be used for the upgrades and not rates. if they are in the community, then whoever uses them needs to pay for them.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

should be self funded and not rates used

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: why should they be funding.....where is the investment fund going....

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: though they are ok for the community. the upgrades or priorities do not come for free for the community. people still have to pay for services even thou our money is used for those facilities

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

great for housing but very expensive and difficult for the developers. the building processes and applications takes forever and costs a lot of money. council earns money from every aspect but nothing is relaxed by council.

You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is important that Council continues to invest in core services and to avoid falling into an austerity mindset.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support this increase as the best option given but do not believe that this level of spending will be sufficient to reach our vision of a zero carbon economy. There needs to be more of an emphasis on realigning the existing budget to shift spending towards climate action and away from carbon emissions. Auckland Council needs to examine the spending they have locked in for the future and analyse the effects these have on climate change emissions. We need to reduce overall reliability on cars and improve the transport system. Accelerate change to a zero emissions bus fleet, dramatically accelerate enabling Aucklanders walking and cycling, diverting more waste from landfill, more protection and better restoration for Hauraki Gulf, more tree planting.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The health of both the Waitemata and Manukau Harbour have decreased drastically over the past century and in recent years. The need for investment in these areas as well as the Tāmaki River is well overdue. Biodiversity in our water is crucial to supporting all other flora and fauna (as well as endangered species that are living in them). With lots more people moving to and living in Tāmaki Makaurau we need to fund more protection and remediation of our awa.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Local Boards should have the final say on facilities in their area and the support they require.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Not applicable as I do not live in the area.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Focus on active transport improvements in our area such as cycling infrastructure and improving walkability and building more street trees and water fountains.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Tree canopy cover and green space protected in urban city to align with projected growth. Look to what has been developed in the past and respect it. 10 years ago the pocket parks that dot the city were installed as a mitigation to projected urban growth and to bring birds back to the city. This worked. Yet now in a response to covid funding shortages, the same council is selling all of these land holdings to make space for more built environment. Climate action needs resilience counted as a tangible asset - our cities must be green too.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to raise rates to ensure we can continue to support local communities and take action for climate change.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I think we could raise the amount committed to Climate Change, more education, more support of local initiatives and existing resource centres and eco neighbourhood groups.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: More now than ever our community spaces are vital for healthy communities. Space is one of the hardest things for groups to access and as ratepayers, these are our assets that should remain within our communities. Online is not the solution, it may be appropriate when we are in Covid lockdown but otherwise, communities need to be together in person, to smile, to cry to share with each other, to access education and grow. Plenty of communities are delivering workshops, ideas and inspiration and they need our community spaces to do this and for them to be kept up to standard.

I think it is irresponsible of the council to consider selling these assets in the face of building community and education when we consider the United Nations Sustainability Goals 1- Zero Hunger, 3-Good Health and well being, 4- Quality Education, 10- Reduced consumption, 11- Sustainable Cities and Communities, 12- Responsible consumption and

production, 13- Climate Action, 15- Life on the land, 17- Partnerships for the Goals. Our Community spaces provide the space to deliver these goals to the community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Albert-Eden are supporting the community and I would like to see the Eco-neighbourhoods continue to grow, further funding towards climate action and funding towards more low-key solutions for a sustainable community to empower citizens. What I would like to see more of it, bike repair stations along the bike paths and the extension of cycle paths within the board area.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Please don't sell off assets, this is a short-sighted solution, people must be before profit and once assets leave the hands of the council they become profit for a business. The council must lead by example and look after the community and local.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The faster that the diesel buses go the better and the faster initiatives around cycling can be pushed forward the better.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is critical to our image, having creeks and beaches that are unswimmable is a terrible look for us as a city and as a country.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Everyone benefits from more buses, those who don't use them benefit from lower traffic volumes. Everyone wins so everyone should contribute.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: Enviroment, sports grounds and civic spaces sound good to me :)

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Other

Tell us why Pretty neutral, I don't feel very affected by it.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Good cycling infrastructure, clean water, nice public spaces.

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Lines charges are already expensive and continue to go up. They'll just pass these charges on to the customers. City council should just maintain the trees.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: The locals who benefit from this service should pay more for it.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: There are a lot of services only used by a few that is wasting too much money to up keep. Either start charges users or scrap the facilities. Bike paths are ok and good for the communities.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland has serious issues that need sorting immediately.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Its not going far enough. Auckland desperately needs a reduction in traffic and an increased investment in walking and cycling not only for emissions reduction but also liveability. Look to Paris and other global cities. Auckland is being left behind. We need bold action, not just nibbling around the edges. That approach has led us to where we are today, playing catch up.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Urban water pollution is national embarrassment. The farming community are right to point out this hypocrisy.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community buildings and spaces are the heart of this city. Not investing in spaces like libraries is appalling. People make cities. We need more community interaction, in real life, not less.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Currently Auckland is a car centric city. This is problematic for multiple reasons. We need an investment in walking and cycling everywhere. We need safe streets for PEOPLE, not just car drivers, to move around. We need better transport links to allow drivers to leave their car at home. We need to charge drivers for parking on footpaths. We need better and more varied street planting that reflects the area and make walking a more enjoyable act.

To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Older folk are being squeezed too much as it is and I would rather see the working folk pay a bit more so that truly local facilities are available. I am not against facilities being closed if they are not being used and plans to increase usage do not work, but I am against well-used facilities being closed due to lack of funding.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Mostly support - but needs further policy development on climate change, public transport and environmental protection. More funding should be allocated to these areas by increasing rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support the alternative proposed that allocates MORE funding to climate change response. We need to allocated more funding with a rates increase to make public transport electric and develop walk/cycle paths.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland needs a lot of work on infrastructure, and people have an expectation that existing services are maintained. It is not possible to achieve this without increasing funding.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: This is common sense.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: This is common sense.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I would like to see the parking issue addressed for new and recent housing addressed. Compulsory parking off street . Streets are becoming increasingly congested and hazardous.

I would also like stronger clear rules against rubbish dumping on streets with a cheaper option that is quick and simple to access for all.

Tightening of responsibilities ,home owners and landlords, need to maintain their property/s, externally so property values in all areas are not compromised / devalued due to neglect by owners.

Tell us why: Auckland Botanic Gardens seems to have been overlooked for capital investment over the next 10 years. As one of Auckland's most popular cultural attractions with more than one million visitors per annum we request that this is reconsidered. Specifically we ask that the two following projects be given priority.

The Pacific Pathway project was partially completed and the first stage opened to the public in late 2019, however, the final stage from the Rose Garden to the Children's garden has yet to be completed. We request that Council consider providing the required funding to complete this important visitor circuit. We understand that the cost would be in the vicinity of \$800,000.00

We also request \$1,800,000.00 Capital Development funding is made available to develop a traditional Maori Garden in the Auckland Botanic Gardens, in line with the Botanic Gardens Master Plan. The intention is to work in partnership with Mana Whenua to showcase and conserve pre-colonial economic plants and horticultural practices. This is envisaged as a major visitor attraction and educational resource.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: you are penalizing homes owners, making Auckland far too expensive to live in, a better option is to make it mandatory for Power/Gas/Water/Communications/Akl transport to all work together so that if 1 of these is installing a service, they all need to do it at the same time, example in my area (Sandringham) watercare smashed up the footpath, upgraded the water lines, new footpath put down, shortly after chorus smashed up sections of the footpath, installed fibre, patched up the footpath which now looks very ugly, next vector plan to smash the footpath up again to put

the power lines under the ground, so far the footpath would be smashed and replaced 3 times, this is a massive waste of our rates money, when all servers could be done at the same time, so you smash and replace the footpath once,, just forcing this work together policy for util providers, would easily save the \$1 billion you need, and you wont need to force already struggling people/families with more expenses.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: you need to have hydrogen fuel stations around, i think this technology is much better than, full electric/battery powered vehicals, as a hydrogen cell car you can dismantle and recycle, you cant do this with an EV, the batteries cannot be recycled in this point in time.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: in any big city in the world the surrounding harbour water is never clean, this would be a waste of money,

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: would like parks/playgrounds to be much bigger, and a lot of sail shades put up, as a parent i talk my kids lots of different parks, but there is never any shade for parents,

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I think everyone has been impacted by Covid-19 and money is tight everywhere. Charging residents for the surplus is a little unfair, perhaps this deficit could be charged to overseas investors

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is a huge upcoming issue and public transport in Auckland needs to improve greatly

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Auckland in general has huge issues with the disrepair and demolition by neglect of historic buildings. This includes government owned buildings. We are going to lose a lot of heritage if this is not reviewed

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

This is not the time to increase rates or fees to fund tree management

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Bus stops need to be located in a areas near parking lots - we live near one and our whole street gets filled and emptied during rush hours and people are often left stranded trying to get the bus

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: The chamberlain golf course is a waste of space in an urban environment

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Auckland needs more investment in medium density housing and investment in protecting historic buildings. There are a lot of buildings being demolished by neglect; there should be a better programme to encourage developers to save these buildings

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Very much support the targeted rate on vector. If cost for trimming trees out of lines is forced back onto Vector this will help reflect the true cost of overhead lines and help them justify undergrounding their lines. Why not do the same for phone and fibre lines. Undergrounding and getting rid of power poles will also make roads and footpaths safer.

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Don't do this unless same targeted rate for all properties by bus links.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I want to live in a city that works and provides services for all Aucklander 5% increase will not affect me at all.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It really important that we take action now to hopefully minimise the affect of climate change. we have to do our part and look forward.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We have to take responsibility for our water and if. We can't not increase charges because people don't want to pay for it.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I'm not sure about this depends what buildings will be going...

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: The more people we can get on buses the better and the wider community benefits from better traffic flow if more people are on buses.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: We really need a new swimming pool. It would be great if we could put one on chamberlain park and reduce the golf course to 9 holes. With all the building going on with greater numbers of people this should be a priority.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I haven't heard what is planned

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

With all the infill housing going in around the point chevalier area I am worried about how all the infra structure is going to handle it. I am hoping I can trust the council to factor in and keep ahead of the demand.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rather than hitting everyone with a rates increase, this additional revenue could be collected from wealthy property investors, leaving those of us who are really struggling alone. A wealth tax of sorts.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Anything to reduce climate change and reduce carbon levels can't come quickly enough.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Rather than hitting everyone with a rates increase, this additional revenue could be collected from wealthy property investors, leaving those of us who are really struggling alone. A wealth tax of sorts.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Leasing or shared facilities and consolidated multi-use facilities sound good, so long as this doesn't translate to facilities just being closed.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I am not impacted by this proposal so have no strong view either way.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We shouldn't need a safe swim website to determine where is safe to swim. Everywhere should be safe to swim. Let's spare a thought to future generations who will inherit our environment. Rather than hitting everyone with a rates increase, this additional revenue could be collected from wealthy property investors, leaving those of us who are really struggling alone. A wealth tax of sorts.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change response is extremely important and it affects all of us.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I believe that you should do what you can to improve the environment and waterways. I support that decision.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Are there any plans for doing something about the homeless and drug addicts in Auckland CBD? The problem has been growing increasingly over the years and it feels like nothing is being done about it or to help them off the streets.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Two reasons:

1. The Council has high debt despite frequent rate rises that outpace inflation, and yet plan higher rates (above inflation) to fund yet more "investments". I have no confidence that the "investments" being made are ever returning to the benefit of ratepayers. Perhaps this inability to separate capital and operational accounts needs to be explained.

2. Despite the proposal being for a one off rate increase, and then 9 years of a smaller rate increase, I do not trust that other reasons for "extraordinary, one off" rates increases will not be found in future years. So, I believe 10 years is too long a horizon to have confidence.

3. The one off effects of Covid-19 should be funded with debt. The fact that there is little debt ceiling available is indicative of council to manage budgets in the past. So, these future plans give me no confidence.

4. The lack of attention to climate change- the only risk that represents an existential threat to this city and society- is alarming. With this budget, council will not (in my opinion) meet its climate commitments. Far more needs to be done to abate the current pattern of emissions. Planting more trees (and the excessive cost to do so) is futile. Instead- discourage cars, redesign communities, live within our ecological means (See Donut economics). This is the only investment that warrants rates increases beyond inflation, and I'd be happy to pay it.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support increased investment to respond to climate change, but not "the " proposed investment. The reason is that climate mitigation and emissions reduction is not an add-on to be charged extra for! It is a realisation that things need to be done differently! Transport, waste, town planning. I do not see acknowledgement of this change in the budget. So, electric only buses are a good start, but of little impact if 2M people still commute in their cars each day!

Integrate zero-carbon thinking into all council planning to win my support.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Investment is needed, any COVID related shortfall should be recovered. Austerity will further damage the economy.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Need sensible but urgent action to meet climate change. Would suggest more nature-based solutions to protect coastal infrastructure.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing - we need a mix of development in current urban areas and infrastructure for greenfield expansion.

CCOs - need better control. Auckland Council as the owner should have majority control over the boards. Remuneration should be controlled similar to State service commission or remuneration authority.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Economic crisis due to Covis is the worst time to increase the rates and we expect the council to cut down the rates and give some relief to the tax payer. Also reduce the salaries Council staff who are paid more than \$100,000 and that will save lot of money for the council. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Economic crisis due to Covis is the worst time to increase the rates and we expect the council to cut down the rates and give some relief to the tax payer. Also reduce the salaries Council staff who are paid more than \$100,000 and that will save lot of money for the council.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: I expect the council to reduce my rates and water charges as we are facing worst economic situation. First of all reduce the salaries of council and watercare staff who are paid more than 100k per annum. There are so many deserved people out there to do those jobs.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Economic crisis due to Covis is the worst time to increase the rates and we expect the council to cut down the rates and give some relief to the tax payer. Also reduce the salaries Council staff who are paid more than \$100,000 and that will save lot of money for the council.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Economic crisis due to Covis is the worst time to increase the rates and we expect the council to cut down the rates and give some relief to the tax payer. Also reduce the salaries Council staff who are paid more than \$100,000 and that will save lot of money for the council.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The council is using the pretext of developing Auckland into a world class city for future generations. Do you guys want the present generation to suffer economically with increased cost of living and rates. I strongly oppose any rates increase as middle class and lower middle class is heavily burdened with tax increase. Any tax increase in this worst economic situation is strongly opposed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: At times like these when the economy is in recession the City council needs to consider a budget which returns to its core business of providing water care, waste disposal and collection and public amenities. At some future time when the economy can afford such luxuries as city centre development planting trees and capital expenditure on transport outside what is already committed.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: A view of Auckland shows an area the size of Greater London but with a great deal more water and a lot less people. This must impinge on transports viability. the logistics of moving people around Auckland is an insurmountable problem. The cost of running large empty busses in off peak time needs more thought as does the \$12B unspecified budget.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: In the mid 1990's Aucklanders were told not to flush their toilets as the water shortage was acute due to the drought. Don't remember any mention of the new buzz words " global warming" at the time. However, it seems that nothing was done to alleviate this problem going forward. Years of prognostication has only increased the financial burden. It is a major role of the council to fulfil this basic need of supply and waste water treatment to ensure the health of the community.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: While the role of libraries today may have shifted from the hushed venues of the past, they certainly provide a need. How they fit into the modern needs of society could probably do with the same sort of initiative as the new foiling yachts. Not sure what you mean by locally driven initiatives. As for providing for the multinational culture of the city, perhaps a look at London may help you realise that the ethnic groups are happy to do their own thing without monetary support and do their best to fit in with the prevailing population. I have a friends in the city from quite different ethnic groups who want only to be seen as Kiwi.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

So Vector will increase their charges to cover your tree planting? As for the way money is collected to pay for the basic facilities from which all people in the area benefit, seems in need of upgrading. The current system of collecting from property does not appear fair. Perhaps a collection based on the taxation collected or the people enrolled to vote would cover more individuals and possible collect more revenue. There certainly would appear for some rethinking of revue collecting.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: have no knowledge of the area concerned

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why**7. What is important to you?****Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Growth infrastructure is something that all council need to consider before development of land. Presumably the infrastructure is paid for by the developer.

Housing should be left to the private sector and any social housing needed that is deemed necessary should be bought off the private sector who seem capable of building structures cheaper than any government agency.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: It's not fair for only raising funds from landlords. Due to Covid-19, landlords not allow to raise rental payment but their income decreased significantly (e.g. reduced rental / give a rental break, and many landlords even could not meet their bank loan obligations. Increase council revenue should think to involve all Aucklanders, not just landlords.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Organic (read food and greenwaste) waste diversion actually reduces the renewable energy production and tends to send the waste to less economically productive areas i.e. compost which is a saturated market, essentially subsidised by tax payers. We should be focusing on diverting/ reducing items that do not break down and take up space permanently in the landfill. Organics eventually breakdown freeing up space for more refuse. They should not really be thought of as waste

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I think these could be consolidated to be more efficient. If you have two community halls that are each only in use 50% of the time then you should merge them and sell one off. Or build mid-rise apartments to help increase the supply of housing in Auckland

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Why should people have to pay for a bus that they are not using it? If the demand for this bus route is so great (which I doubt) then surely the cost could be covered by bus fares. If not than let people use their own money to figure out their own transport.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support the budget and realise the need to raise funds through rates increase.

But to be frank my family can't afford it. We are a one income family with a child at school. I also care for an elderly father with dementia and working on a university degree via distance learning.

Auckland is such an expensive city to live in already. Our household income of \$1000 after taxes a week is already very stretched. After mortgage repayments, house/contents/car insurance/rates, retirement funds, life/medical and funeral cover, car payments and running of a car, water, power, internet/phone bills we are left with a little under \$200 for grocery shopping and clothing for the 3 of us.

Hubby spends so many hours earning that \$1000 it leaves no time for us to enjoy the facilities that our rates contribute to. Because we don't meet the set thresholds, we do not qualify for rates rebate.

I love Auckland and am a proud Aucklander. I have lived here all my life and for all my adult life have contributed to rates, support free local events as much as time and circumstances allow and will proudly promote Auckland to out of town and overseas family and friends.

However this City I am proud of is actually and in reality becoming unaffordable to live in for me and many other families like mine. Please help us make the city we love and live in affordable.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I try and do my part for the planet. I recycle, I have a compost bin. I buy fresh products with less packaging and even am mindful of products like dishwashing detergents, washing powders etc and the impact they have on the environment. I definitely would support a plan that is environmentally friendly.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Sadly as much as I love Auckland, I will not swim at any of our local beaches. Pt Chev is my closest then anything along the waterfront, Okahu, Mission, Kohimarama, St Heliers unfortunately I do not trust for swimming, especially after a storm and the amount of times they have made the "unsafe for swimming" list over the past few years. So anything to improve that would be awesome!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or

rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Reducing carbon foot print and lowering costs is always a great thing. However, can we please ensure that closures are fully considered in consultation with the users of before it happens. For example, I have 3 libraries all within close proximity to my home. However, they are so well used that often I will have to go from one to the other to find room. It is a great thing to see these facilities being utilised and if one were be closed then we need to ensure that the remaining facility will be able to cater for a whole heap more customers.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

ENRTR: Quite sustancial funds are put into this kind of maintenance. However, I'm not entirely sure that the work is carried out. For example I know in the past 10 years the tree that was outside our property was only attended to once. It has since been removed altogether as during a storm last year during covid it became a safety hazard. The tree stump was to be removed once the restrictions were lifted we were told. It is now over a year later and it is still there. We have family and friends who have trees outside their properties so high and overgrown that not only is it obstructing powerlines to their home, but also a lamp from a street light. So the lamp post is there but the tree totally obstructs the post and any lightit gives off. Who is responsible for ensuring these matters are sorted? Does the resident need to ring and ask for the maintenance to be done?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: All these rate hikes should and must be fair and affordable to everyone. If one can afford a house out there then the likelihood is they can afford to travel in from those distances to work for example and will not even use the

proposed bus service. Sadly those who have limited resources are once again being asked to pay out more on top of transport costs.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: The majority of those being asked to contribute do not utilise this facility enough to warrant paying towards its upgrade.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why So long as all upgrades are end user friendly with green spaces.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

If we are are going to be expected to contribute and we will be expected to if the majority support, can we at least address as a local government that other areas of the lives of our super city residents be looked at eg living wages (measured against what it actually cost to live in Auckland). Rate rebate thresholds vs what households actually receive. Government help to be measured against what households actually receive in hand not on what shows in the payslip before taxes are deducted. Because as in my families case it almost \$400 less. That just does not make sense.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I think a rates increase of 5% ongoing would be more sensible

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I would like to see more investment and action in this area. Climate change mitigation should be our top priority.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality and climate change are interrelated. I would like to see even more investment here, accepting that this means less investment elsewhere.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Fewer facilities that provide multiple services seems a better way to go. Co-locating services like service centres in libraries is good. Low utilisation facilities should be sold, ideally to local community groups or residents where new facilities are built, these must be in areas of community need to restore equity in access to services.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Climate change impacts should not only 'be considered', climate change impacts must be the key driver in all decisions. Get rid of golf across the board, convert spaces to urban forest.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Closing facilities and reducing or stopping services is an inevitable result of working under an illusion of never ending funding, while difficult to accept for some, this is necessary. Climate change mitigations are more important than new and shiny facilities and infrastructure.

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The development of the economy depends on labor to create social value, rather than harvesting various taxes on labor

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Sustainable development must be supported

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Still I do not agree to get the money necessary to improve water quality through various taxes

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The rate payers' rights should include access to certain free communities services, eg. libraries

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Government can get funding somewhere else rather than rate. Eg capital gain tax

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Can postpone after pandemic

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Can postpone after pandemic

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Can postpone after pandemic

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Can postpone after pandemic

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Saving all funding in order to support the recovery of pandemic

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: This added investment is needed to keep the city moving forward

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This needs to be addressed immediately. The longer we leave it the more it will cost

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: This needs to be addressed immediately. The longer we leave it the more it will cost

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: The extra investment is needed to help communities grow

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: This will add extra options for travel to residents in this area.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: These look to be well considered and address areas of need in the community.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why N/A

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

N/A

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Need to increase budget as population grows.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Make a compost rubbish bin like what they started in Hamilton, Waikato

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: do not live in that area

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: I am against the changes proposed to Chamberlain park as the redevelopment is costly and I don't think will add benefit other than to make an increasingly busy place more busy. In the future relatively undeveloped (within an inch of their lives) areas will become rarer and we will miss the associated peace and tranquillity they bring to all. I do not play golf but appreciate the 'space' that is there in a crowded life.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I am concerned at the increasing number of apartments being built without thought to parking. Like it or not most people have cars and for a long time the public transport system will be unable to manage and until then parking is on the road making it more dangerous and and unpleasant. if apartments are to be built then adequate off street parking needs to be required to ensure safety and benefice to the community instead of just a greed mentality.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Good idea, could help Auckland be a better place and earn more money.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is a global issue that requires urgent solving.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I feel like money could be spent on other things.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: The works in progress have got to be completed and other improvements made and it all takes money.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We have travelled on the new electric buses on Waiheke and they are great, no fumes and quiet.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We need to keep water systems up to scratch, we don't want Wellington's problems

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I basically support the proposal but I am worried about libraries. I use the library to borrow books and I notice school students there and I think they go there because it's quiet where as at home it's probably noisy with brothers and sisters watching television.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The targeted rate on Vector sounds like we lose some of our Entrust Dividend. It's nice to think that some things stay the same.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: We don't live out there.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The most important issue to me are the libraries and I would be sad at the thought of them being cut back,

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support a 5.9% one-off rates increase for 2021/2022 (rather than the proposed 5% increase) to ensure the \$320 million climate budget can be progressed. I also think Council should introduce parking levies (ring-fenced for public transport investment) and congestion charging to help fund our climate response.

I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support further funding beyond the proposed investment. I want "Option 2: More significantly accelerate Auckland Council's climate action". This will put \$320 million rather than \$150 million towards climate initiatives so that we can achieve a 100% zero emissions bus fleet by 2030 (rather than 50%), further investing in Māori-led climate change action, more than doubling our street tree planting programme to 29,000 in total, address coastal erosion faster and more.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Whau Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?

Tell us why Auckland Council must lobby the govt to get the changes needed to protect the mature trees we have. The situation at Canal Road, Avondale should not have happened. Architects could have designed a scheme that protected the trees and the value of the site could have reflected this. We need to use a holistic balance sheet/costing.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Auckland Council must lobby the govt to get the changes needed to protect the mature trees we have. The situation at Canal Road, Avondale should not have happened. Architects could have designed a scheme that protected the trees and the value of the site could have reflected this. We need to use a holistic balance sheet/costing. I want Council to be

aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: The 5% rates increase is needed (as a minimum) in order to sufficiently invest in Auckland. I would prefer to see greater sustained rates rises to fund even greater investment (particularly in protecting the environment, climate change, cycling and active mode transport infrastructure, public transport, organic waste collection, recycling, wastewater management etc.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It's desperately needed, and our responsibility to future generations. Would prefer to see greater rates increases to provide even greater investment and more rapid transformation.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality should never have been allowed to get this bad, need to invest to improve water quality as rapidly and widely as possible

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I would support this but I think you should first take from budgets that are allowing removal of thousands of healthy trees from our maunga - which is unnecessary and barbaric considering we are in a climate emergency. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I would support this but I think you should first take from budgets that are allowing removal of thousands of healthy trees from our maunga - which is unnecessary and barbaric considering we are in a climate emergency.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This is an issue that needs to be dealt with sooner rather than later

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: we are a growing population - we need every one of these to remain for generations to come

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I don't support the removal of hundreds of healthy trees on Mt Albert - this will devastate Mt Albert its birdlife and ecosystem. WE are in a climate emergency and we need to retain our mature trees to help. Please reduce budgets to organisations that support this destruction.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why**7. What is important to you?****Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Please STOP removing all these beautiful native and exotic trees that our previous generations have planted for us. We need them not only for our climate emergency but also our mental health. New housing can be incorporated around the existing trees like it is done in other countries. Please please don't go down the road of continuing to remove all our mature trees for concrete blocks to encourage heat traps.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I support the overall increase in budget, the increase in borrowing, and the increase in rates. Personally I believe that given the increase in house prices, that rates should increase more to reflect a proportionate increase.

The problem is that the investment does not address climate change.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: the budget does not begin to adequately address or invest in climate change. In fact, the net effect is to increase emissions. It is essential reduce emissions by 50% or more.

the investment in roads is harmful and should be removed.

the investment in active transport is absolutely inadequate. Worse, it is less than was previously planned.

the WHO recommendation is that 20% of transport budgets should be spent on active travel. I believe that it should be more; this is a minimum. We need a complete, fully connected network of cycleways. We should already have it. This should be the number 1 transport goal.

Further, the investment in public transport is insufficient. where are the dedicated buslanes, the 24 h enforcement? Where are the dedicated speed and redlight cameras? Where are the school car free streets? Where is the road pricing enforcement?

In conclusion, I strongly believe that Council should pursue a far, far more ambitious investment in accessible public transport, and active travel, including safe cycleways and safe footpaths.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: The Chamberlain Park 18-hole golf course should be redeveloped as a 8 story THAB housing development plus sporting grounds for the community. Golf is a ecological disaster that should not be supported by our rates. the general, non golfing public have no access. It is absurd that it is subsidised.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Yes. We need a net work of protected cycleways now. Parking is NOT a priority. It is a dangerous cost. Parking must be removed to support cycleways and reduce road danger. "Flow of vehicles" is not the same as movement of People. cycling is 5x more efficient than car traffic. Public transport is at least 20 to 105x more efficient than cars. the efficient and safe movement of people must be prioritised over cars.

This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: 10 years is far too long period to plan and make accurate budget.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Government should subsidise purchase of eco friendly buses.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Encourage individual water collection and subsidise it.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Modernization and restructure of existing facilities will bring more value than maintenance of existing ones.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Only residents in those areas should have voting power on this topic.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: Are we going to keep beggars in hotels and keep the CBD like a slum?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why: Are you going to tax the average person or the big companies?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why: Be a shame if the water issue wasn't resolved in a country like nz

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Are we going to keep subsidising expensive artwork, largely ugly, instead of investing it on things like health, education and sports?

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Are we going to keep bringing refugees and paying for a victimised generation of beneficiaries too soft to get their act together

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: It's a time to be prudent and cut costs . Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is vital that Council continues to invest in core services and to avoid falling into an austerity mindset.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support this increase as the best option given but do not believe that this level of spending will be sufficient to reach our vision of a zero carbon economy. There needs to be more of an emphasis on realigning the existing budget to shift spending towards climate action and away from carbon emissions. Auckland Council and its Council Controlled Organisations need to examine the spending they have locked in for the future and analyse the effects these have on climate change emissions. Building more carbon intensive infrastructure, such as Mill Road, will lead to an increase in car dependency.

Add specific ideas about kinds of transitions we need that may be achievable with Option 2's \$320m: eg accelerate change to a zero emissions bus fleet, dramatically accelerate enabling Aucklanders walking and cycling, diverting more waste from landfill, more protection and better restoration for Hauraki Gulf, more tree planting

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Support the extension and the increase. The health of both the Waitemata and Manukau Harbour have decreased drastically over the past century and in recent years. The need for investment in these areas as well as the Tāmaki River is well overdue.

Biodiversity in our water is crucial to supporting all other flora and fauna (as well as endangered species that are living in them). With lots more people moving to and living in Tāmaki Makaurau we need to fund more protection and remediation of our awa.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Local Boards should have the final say on facilities in their area and the support they require.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: As noted above when you need money for projects etc the solution can't always be increase the rates. I would like to see more effort to reduce your operating costs.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: people are struggling to pay mortgages, its ok to delay development to beautify the city, but stop rate increases, try to find more efficient ways of using funds you already have

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: can hold of till we get ourselves back on track re economic recovery. If I delay my payment by a few days you charge a heavy penalty, where is this money going? prioritise expenditure and dont waste our money.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Please, start relooking at the Hefty salaries you're paying to people and get your savings to fund any initiatives you want to do.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is clear that many Auckland Council projects have been underfunded historically and it is important that we move now to remediate and invest in more sustainable urban and suburban environments. I support the proposed investment from Auckland Council.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support the increased investment but think that Auckland Council should invest even more in climate change response to ensure that we are aligned with the Paris climate agreement, limiting global warming to 1.5 degrees. I believe there is a great opportunity for Auckland Council and its' CCOs to be a leader for the rest of Aotearoa on climate action.

I support the statement made under alternative one that more work is urgently needed to support our native species and ecosystems to be resilient to climate impacts. The programmes that have not made it into this budget must be addressed and added to the council's programmes of work urgently. I suggest that the council take the following actions on climate change:

- more thorough investment in transitioning the city to active transport modes in consultation with active transport road users (cyclists, walkers), especially connecting up major arterial cycling connections throughout the city and on into the national cycle trail
- a more intensive strategy to divert methane-emitting food waste from landfills
- consider scrapping any future investments that involve high emissions
- tree planting and community tree planting programmes
- a more urgent transition to an electric bus fleet
- restoration of the Hauraki gulf
- pedestrianising key urban centres for a more walkable city

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It is absolutely essential to protect the waterways of Tamaki Makaurau and it is terrible how often beaches are unsafe to swim. I can't imagine the effect this must have for the wildlife in these areas, please invest now so we can fix it!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I fully support this proposal. I think that local boards probably do know what's best for their communities, and I fully agree that these services should be catered to those in greatest need. I am a regular visitor to community arts venues and I would like to see the council's support of the arts maintained, but also agree that a multi use facility can allow people to access and learn about more services all at once.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Natural Environment Targeted Rate - Totally support, I have seen the devastation of kauri dieback and I appreciate what the council has been doing in this area. Continued investment in this good work is essential to stop the spread of kauri dieback disease.

Extending the duration of the City Centre Targeted Rate - In support, it is essential to complete the good work started on green infrastructure, walking and cycling, and the city rail link.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I don't live in Upper Harbour so I don't think I need to comment on this, but in principle I support additions of new bus links that help communities.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Thank you to Margi Watson and the local board for highlighting considering the impacts of climate change in the priorities of Albert-Eden. Albert-Eden has a wealth of local biodiverse parks and I support investment in environmental restoration projects in our local area. In fact, the primary reason I selected "I support most priorities" is because I believe that Albert-Eden could invest even more into environmental services in principle given the urgency of environmental protection, limiting the effects of climate change, and the valuable wellbeing effects of living near and visiting our local maunga.

I strongly agree with the advocacy to repurpose the Chamberlain Park gold course into a place that can be enjoyed by all and not just a small group that does not truly reflect the diverse population of Albert-Eden. It is obvious that all of the great Albert-Eden walking and cycling initiatives have been a massive success, people are always out there enjoying and using these facilities and I would consider Albert-Eden to be a leader in this regard.

I think that the board should advocate for more safety expansions to the already at-capacity northwestern cycleway in key safety areas near Kingsland and advocate for more cycle commuting connections in our area. However when developing new cycle routes it is important this is done in consultation with local cyclists to ensure that cycle lanes aren't heavily compromised (eg. Grey Lynn cycleway).

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why I support expansion of the Dominion road BID to improve the economic performance of Dominion Road. I am a regular visitor to this area and I think it is a great place to invest and promote more economic activity.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I highly value the following:

CCO accountability regarding their adherence to sustainability - Embedding climate change considerations into investment decision-making and planning, and corporate policies regarding both emissions reduction and addressing the impacts of current and on-going climate change. Fully assessing and disclosing its climate-related risks to support Council's reporting requirements in the Climate Change Response (Zero Carbon) Amendment Act and its commitment to disclosure on climate-related financial risks through its group Annual Report. I commend Auckland Council's efforts to improve CCO reporting and co-operation on fulfilling our target to limit global warming to 1.5 degrees. A definitive plan to work with all CCOs on climate change is essential to a just and ambitious transition to a more sustainable future.

The Auckland Unitary Plan - the council must continue to support a "build up, not out" strategy creating more urban density - this ensures more access to local facilities and preserves our valuable green spaces and valuable agricultural areas in places such as Pukekohe.

Generally, I am hoping for completion of the Auckland SkyPath to get more cars off the road and more people into active modes of transport to ensure healthier and more sustainable outcomes for city centre users. Action on climate change by creating cities that are more active, and less dependent on fossil fuels is key. This link between the North Shore and City Centre is a crucial asset for our future generations.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: this has been talked about for decades and we're still not on top of this. wastewater overflows should only be occurring in extreme events, not several times a year. Climate change will exacerbate this. Council and Watercare should be accelerating their programmes to reduce overflows and generally improve water quality.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: I support restoration of natural environment as a priority.

The other priorities are not very specific 'range of programmes', etc. not aware of the reason or impact of Dominion Road Business Improvement District.

I hope you're going to deal with the rabbit population that has grown from escapees from 13 Watling Street. Don't get me started on that one.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Area of the budget expenditure are not necessary. Ok with the rates increase, but more care on the expenditure please. Its OUR money. Also, does the increase rates reflect the increasing rates grab through increased house prices/rental price calculations? if these increased 20% at least in 2019/2020, then wont there be a financial windfall from the way rates are calcluated?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Make some efforts, but don't believe the full commitment with alter climate change to any significant degree but good chance it slows down our local economy through excessive debt and distorting transport needs.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Dont pass your poor planning onto us. Live within the budget and be innovative as to how the targets can be achieved.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It is such a struggle to get decent rentals as most landlords are investors living overseas. Noone is here to look after the property but you're still paying \$550 for a leaking, cold, old 2 bedroom property with the responsibility of up keep.

Getting into the housing market is an absolute joke in Auckland, we have a 10% deposit for 720k but still can't manage to secure anything and our mutual income is \$3000 over the first home grant and first home loan cap which blocks us out of the housing market at the ages of 30+. What is the point of this? Who are you trying to help?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: At a time when people have lost jobs and money due to the pandemic, to increase rates by 5% in this next year seems the wrong way to do it..I would suggest delaying the increase in rates for the people of Auckland, but not putting off the needed spending, thereby borrowing the extra money needed and then slowly increasing the rates each year after the next 2 years to pay back the extra money needed now. This next year is not the time to put more financial

burden on Aucklanders who have suffered more loss than the rest of the country in terms of the COVID-19 economic fallout.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Whilst I am supporting the proposed investment, I would like to add that we should be thinking much further ahead and in the longer term in relation to climate and transport, ie electric buses are short term thinking..we should be looking to make Auckland the first/best city in the southern hemisphere to use autonomous cars and by doing so, not everyone then has to own their own car. This kind of thinking requires radical mindset shift, and it will take decades to change the cultural thinking around kiwi's and their car ownership, but if we don't start now, we will be far behind the rest of the world. Putting this kind of real future thinking at the forefront of decision making around climate and transport will make a bigger difference in the long run and would create massive jobs in many areas in the short and long term.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water is so important! Must be a major priority and be done as fast and as best as possible.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I can't give my support and yet I don't disagree either. Community investment is very important and I also agree to make better use of the facilities and resources we already have and if we have to close some that's ok. I am however not sure I trust that the council will do the right thing in the right places..sorry. I have seen too much money wasted on things that don't help our communities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

6. Local Boards**Albert-Eden Local Board**

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: They all seem rather weak priorities but I am in support nevertheless.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Dominion Road is a major hub for transport, business and community. The BID should be expanded and more money brought in from business rate payers to improve the area as fast as possible.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I don't support unnecessary spending. You need to prioritize based on existing rates. Upping them when we all took financial hits during covid is irresponsible.

Halt selected projects for a year if you have to.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Got to start some time.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Our rates have doubled over the last 10yrs. Phenomenal increase. But we are at last investing properly in infrastructure like rail transport and the central interceptor. We need to act Now to reduce our climate change impacts.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to act Now to reduce our climate change impacts.

Very disappointed in the ATAP update for example. Minor tweaks are no response to a Climate Emergency.

I am willing to give more money in an effort to convince AC to commit to real change.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: This is not as important as Climate Change issues.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: As long as services are not reduced, sharing buildings etc are a great way to reduce costs and improve use of assets and reducing carbon footprint

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: I am assuming the wider area will benefit from the service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: A lot of the commitments are vague but supportive of community.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I would like to see a more concrete commitments - especially with regards to combatting climate change.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I mostly support the 10 budget and Im glad that the environment is a big part of it. But there are a couple of issues that could be better addressed which I'll get into below

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Its great news that we're planning no new internal combustion engine buses. Is this set in stone? I know the bus companies actually do the buying.

But the big question is why are we supporting hydrogen engines? Sure they're environmentally friendly, but this technology has lost out to battery electric vehicles. To quote VW: "The conclusion is clear" said the company. "In the case of the passenger car, everything speaks in favour of the battery and practically nothing speaks in favour of hydrogen."

Not only is it an inferior technology but supporting it in our fleet will mean costly infrastructure such as specialised refilling stations, specialised vehicle operations and maintenance training etc. In summary its much more efficient to just support 1 technology

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Its fine putting money into maintenance for community libraries, halls & centres, but what about the online facilities to access them? I know I spend more time on the Auckland Libraries app (to search and request books) than I do in the library (to pick up the books)

Yet the Auckland Libraries app is a total joke. The 2 star app rating is deserved. It is just the mobile website wrapped up into an app, with a clunky unfriendly user interface, extremely slow loading and is hardly ever updated.

I actually thought I could do a better job so I developed my own app to access the Auckland Libraries, its got the most common features, its quicker, easy to use, and it actually remembers you and doesn't always log you out.

Id just developed it last year just for me, so I could delete the official app, but Ive put it on the App Store for free to show you what your Auckland Libraries app could look like.

Try it out yourself <https://apps.apple.com/us/app/auckland-libraries/id1530459090>, screenshot attached

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: You cant get things done without money. If you live in this city then you contribute to the costs.Go ahead.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is the area I believe there needs to be the most done. I know there is interconnectedness with all of the plans for Auckland. But as individual, city ,nation and global citizen there is nothing more pressing

We need to re-look at the protection we are offering the trees in our city. Yes it may impact how fast or the way in which buildings that are needed are passed through council .But I see no excuse to remove the trees we have. They need their protection.

The way we waste in this city is by OECD stadars atricious. When I witness builders removing material from sites I am so dissymayed (time is money is the mantra for this waste) charge the waste and charge it hard. Yes costs go up ,but over time I can assure you ways will be found to stem this waste and re use, the incentive need to be put in and they need to be severe.

The recycling of glass, wood, plastic and paper is also going to take huge investment and cost to us all. Do it!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Abuser pays, charge people and business.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: These are ways that community can come together if we use them well. They cost us in the short term, but the long term gains I think far outweigh these costs. A public library is a massive source of learning and enquiry we should be. The librarians are a community asset that can be used to stimulate the young and old mind to be lifetime learners and lovers of books and learning.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why Don't know enough about it to say.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Our natural environment above all.If we do not make this the biggest focus, then to be honest we are fools.The cost financially and to human and animal wellbeing is far to high .We exist within,not outside our naturall environment,we cannot exist without its health.At this point in time it most definitely is far,far from healthy .

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It's not like you are asking for a 10% increase for the next 10 years and we all need this boost

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to move quicker for a future generations.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: There are constant issues here and I don't see an increase making much of a difference at this stage, just get it done

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Do you have any comments on any of our proposed changes to rates and fees charges?

Not now for heavens sake. We need to get people re-employed and address covid related issues.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Not now for heavens sake. We need to get people re-employed and address covid related issues.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Much more important things to spend the funds on. Like lowering the crime rate in this area. Making it safer to use public spaces and to be able to walk the neighborhood safely, especially if having to take public transport in the evenings.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why Not of interest or relevance to me.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need more low cost, affordable housing as a huge priority. We need safer neighborhoods and to get people back into jobs. We need more and more accessible physical and mental health services in this area.

I care about the environment, but the above is more important to address first.

We have had so much of our money wasted over the past few years on the ridiculous amount of speed bumps on residential streets, the wasteful amount of unnecessary road works (we always see workers sitting around, work not being progressed and not just due to covid, etc.).

And more and more homeless and disenfranchised people wandering the streets and living unsafe lifestyles. Often accompanied by drug use, poor health outcomes, prostitution, decline in mental health - just to name a few.

So what are you doing about the broader social issues????

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Too much money being wasted. AT is out of control, TMA should not be getting indiscriminate amounts of money without transparency

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Why is council allowing mass destruction of trees, and then having to spend money on trees. Property developers are ruining "leafy suburbs"

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Water infrastructure and quality of water is necessary. is necessary. Property developers need to pay more.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Leasing is taking two steps backwards.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Civic square in Mt. Albert is a total waste of money. Protect trees instead. AT have already made a mess up of Mt. Albert shops and traffic. Traffic fumes are terrible at times, due to AT changing the lanes etc

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Protect trees. Stop TMA from it's proposed ruination of the mountain by chopping trees down

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: You cannot have a society without an environment for it to live in. Climate change disproportionately affects the Pacific and it is our responsibility to make a tangible change for the future of our peoples.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Please do not spend our money on refurbishing a golf course. I want the money to be spent on the communities and places that actually need the support. I would like to see more money put towards the climate change response and community support.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I support the removal of library fines as these disproportionately affect the communities that need the services the most. Our revenue should not be as a result of disadvantaging Aucklanders. Fines put people off interacting with our library spaces and services which only adds to the issue.

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Economic and cultural development is often the area of the budget that is the first to be cut. We love the arts but we don't like paying for the arts.

Lack of investment in the arts could further damage a \$1 billion industry that has already suffered due to covid.

Asset management needs to continue in order to inspire creativity and community in these changing times

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: we need to replace old infrastructure with the newest one.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: we need to replace all petrol and diesel vehicle fleet (busses and other cars and equipment) with electric.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: water is the most important item for our human being and we need a take care about the water quality.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: i don't support closing community facilities and services. we should increase the Auckland Council offer to people of Auckland.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I am supporting proposed changes to rates if we pay all workers employed by Council and its companies and contracted workers a living wage.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We should increase the housing for low decile people in Auckland to give a home to everybody in our City. In addition, nobody should be paid less than living wage in our City.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We desperately need investment in making Auckland greener, slower, safer. Cyclists keep being killed on the roads in Auckland and it has to stop.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Runaway Climate Change is already happening and makes all other concerns seem petty. Let's get away from a "greed is good" mentality and move towards greater community and a safer city.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Looking after the water in this city is a no-brainer. It is shocking that some beaches are still not safe to swim on after rainfall. That Oakley Creek is still not swimmable (even though many people choose to swim there).

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The community facilities that Auckland has to offer are invaluable. We need to stop following the demolish and replace and think smarter ... "Never demolish, never remove or replace, always add, transform, and reuse!" (Lacaton & Vassal - winners of the Pritzker Prize). Privatising these facilities might seem like a good idea driven by commercial incentives but in the long term it misses the point. These facilities are community assets. Perhaps the answer is to have the community to take more responsibility for their upkeep rather than sell them off and lease facilities ... this builds community and could reduce costs.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I don't know much about this but it makes sense that people need to pay for the level of service they are receiving. My concern is that there be relief for people who are not able to afford the increased levels of rates where they may be long term residents who find they are living in a very changed rating environment. This could be achieved by scaling rates according to length of stay in a property, which would also encourage people to stay longer in an area and encourage community.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Makes sense

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: The proposals and advocacy initiatives make good sense

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why I don't know much about this but it seems to make sense from a community point of view

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I believe some of the developments occurring lack any kind of reference to the surrounding environment (I am thinking of the five story development on Point Chevalier Road) I understand the need for more dwellings at greater density but these could reference the neighbouring buildings with more sensitivity. We risk creating slums in a hundred years time.

Auckland seems to be caught up in a "greed is good mentality" where it is all about how flashy we can be. As climate change starts to affect the way we live, community is going to become more and more important in terms of our survival. It does not make sense to be building tall concrete buildings at this time. Something has to change.

The Climate Emergency has to be front and centre of everything we do from here on. What would New Zealand look like with no international air travel and rising sea levels. How do we live together in community?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Due to the pandemic, citizens are under reduced income, and a 5% increase in rates is an additional burden,.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Apart from planting new trees, there also needs to be protection for existing trees.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Leasing buildings and going towards a user-pays model is good. Ratepayers should not pay for yoga classes we do not go to.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Support Removing library late return fines.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is vital that Auckland Council escalates response to climate change and maintains core services.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We won't be a liveable city unless this is addressed. Tree planting, waste reduction, reducing transport emissions and environmental care are vital. Council should consider rewards for people who contribute personally, e.g. anything from reduced rates or free pool passes if you significantly reduce energy or don't drive daily etc. Reduction of dependence on private cars is vital, and cars should already be banned from K-Rd and the city centre (or required to pay a levy to enter)

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Improving the water and the sea-edges of our harbours and streams also relies upon addressing upstream pollution. Any business or individual found polluting water should meet with serious monetary and other penalties, including deportation if not a NZ citizen.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Communities are important. Local Boards must be accountable to communities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

It is fair that investors and developers in these areas pay parks fees to develop public parks and to plant tree they cut down, BEFORE they cut them down. They should also be tasked with ensuring ANY deforestation they incur, they rectify, by planting and developing with a minimal green area per development. Also ALL development MUST be carried out with strict environmental control, and developments must be zero energy. Watertanks, solar panels, composting, public transport community services and green space mandatory,

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Paremoremo has a high income rate. Put bus stops near all the wealthy homes and make them pay.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I don't see any mention of Oakley creek or a board walk around Waterview. I think Albert-Eden focus on wealthier areas and don't represent me well. I hope they can prove me wrong.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why The Dominion Road Business Association has no interest or commitment to addressing climate emissions, and there is no mention of this anywhere on their site. They spent 20% of their budget on "Chinese Ambassador" and I see nowhere anything about reducing car traffic, improving air quality or planting trees. Shame on them.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Be clear - when you are allowing developers to build homes (and they DO make a lot of money from this) - they MUST also align with the environmental goals of the council. DO NOT compromise - make them plant trees BEFORE cutting, make them build sustainable buildings with water tanks, solar, insulation, outdoor areas... , make them pay for parks for the people who live in the buildings they are profiting from. This refers to key issues 2, 3, 4 and 5.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I am disappointed that so little is being set aside for climate change projects. Less than 0.5% of the Budget is dedicated to climate change efforts. I am disappointed that councillors voted for the least ambitious option presented to them. I would like to see councillors get behind the more ambitious option that was originally proposed.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Needed.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

There is no excuse for Council to keep investing in things that are causing pollution to the climate. All of Council's investments, from now on, must contribute to building a safe and stable future for current and future generations.

I encourage Council to pursue a much more ambitious investment in accessible public transport, safe cycleways and safe footpaths. Council needs to direct its efforts to the things that matter most. Right now, transport is our biggest source of climate pollution. It's happening because many people don't have the option to leave the car at home. Investing in accessible busways, trainlines, safe cycleways and footpaths will give more people climate-friendly transport choices. The more people who are able to make the switch, the more space there is on Auckland's existing roads for those who really need to use them, including persons with disabilities or tradespeople. I don't want to see more investment in roads. I want to see a much bigger investment in accessible public transport and safe cycleways and footpaths.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Council must continue to invest in its communities and core services.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is the best option given but I do not believe that this will be sufficient to reach our vision of a zero carbon economy. There needs to be a bigger shift towards climate action and away from carbon emissions. Auckland Council and its Council Controlled Organisations need to examine the spending they have locked in for the future and analyse the effects these have on climate change emissions. Building more carbon intensive infrastructure, such as Mill Road, will lead to an increase in car dependency. A bigger emphasis on public transport across the wider Auckland region is absolutely necessary to discourage the use of personal vehicles for commuting, especially since the property market is utterly out of control and people are moving further and further out.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Biodiversity in our water is crucial to supporting all other flora and fauna (as well as endangered species that are living in them). With lots more people moving to and living in Tāmaki Makaurau we need to fund more protection and remediation of our awa.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Local Boards should have the final say on facilities in their area and the support they require.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: More investment in environmental protection and improvement.

Focus on active transport improvements, better cycling infrastructure and improving walkability.

Ensure local communities are involved in Council decisions including vulnerable communities!

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It's important that our cities across NZ be green and do their part to focus on climate change. We have the highest population density and so it is our responsibility to ensure we are looking to the long term impacts of our decisions and whether they are enough.

The property market is pushing people to travel further. Covid taught people they could stay within their pocket community to work as well as live. Encouraging that to continue and providing greener ways for people to travel across

Auckland and the country and vital to us unlearning our worst habit: driving. Aucklanders drive themselves everywhere. Public transport in its current state is not enough to support the demand or equate to a worthwhile exchange of the convenience of a personal vehicle. We need less cars per capita, and less cars on the roads. We need less roads, more tracks, nationwide.

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Not opposed to the rise as such, but not in favour of the bias of the increases. I believe the increase in the Parks and Community budget should be split instead across Environmental management and Regulation, and Transport.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Would be happy with additional funding in this area; however, Alternative one didn't appear to provide significant additional benefits given the extra funding, other than halving organisational emissions by 2030 and planting additional street trees.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is often woefully poor and needs to be addressed.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The increase seems disproportionately high.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Don't agree with library late fines being removed. A better solution may be to reduce the fee or provide an initial warning system, but it removes part of the incentive to return them on time if it is removed altogether.

The residential rates are proposed to increase significantly, particularly in year one. I think the % increase should be based on the property value, i.e. the higher the property value, the higher the increase. People are stretched already to get on the housing market, particularly first home buyers, so the proposed increase will only serve to stretch those buyers further financially, potentially to the point of becoming prohibitive.

Given the record rise in house values recently, the number of properties moving in to the higher brackets (1.5, 2, 3 millions +) are already going to provide increased rate revenue.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Low environmental spend and weak climate change proposals.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Don't agree with library late fines being removed. A better solution may be to reduce the fee or provide an initial warning system, but it removes part of the incentive to return them on time if it is removed altogether.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Sustainability is very important for me and my whanau. I believe Auckland needs to massively increase it's efforts to encourage motorists to switch to electric vehicles. This will help the air quality in the city and for the health of the residents. Some of the ways Auckland city could encourage motorists to switch from petrol/diesel to electric is to offer no toll charges to electric vehicles, zero emissions charge to EV's in central city, and to offer free parking and recharging parking spots to EV's. All this can be funded by increasing the costs to petrol/diesel cars and the worst offenders of clean healthy air in the city. Another option is to charge on a sliding scale for parking, tolls, emissions charge depending on the efficiency of the vehicle and give maximum savings to zero emissions cars. Auckland is falling far behind other cities with adapting to clean electric vehicles and it needs to catch up and create the infrastructure for it.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need more safe cycling paths. Perth in Australia is a good example

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There is a cost plus attitude, why is the council not having to SERIOUSLY reduce its cost base. Where is the competitive pressure on real costs

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It has not been properly investigated and costed

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Once again, this organisation has a cost plus attitude. Fancy trucks, offices, seriously high salaries. Lets get some value rather than having a cost plus attitude

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: About time we stopped thinking everything needs to be in each suburb. Use technology and co-use sites.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Why is Vector not paying for this already? Another example of the council not seeking and thinking like a proper business

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Why are you asking the whole of Auckland about a rate for a specific area, just ask them, or has this question been designed so most say yes as it does not cost them.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Just another example of cost plus.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It has not been properly investigated and costed

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: This a major concern for Auckland to remain a liveable city.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Love libraries but doing away with time limits of books borrowed is madness

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

City centre is dead. Don't waste more investment. Suburban centres are future of Auckland.
 The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Rapid Rail is a very expensive option when compared to more bus lanes and electric buses.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We are already facing the consequences of decades of under investment in infrastructure in the Te Atatu Peninsula, Henderson, Massey areas and experience frequent sewage overflows into our Awa [Henderson Creek]. In addition, right now there is a sharp rise in housing density which will put further pressure on infrastructure. Not investing in infrastructure improvements such as the waste water network and storm water networks will be very negative for our community and the well being of our whanau.

The population growth in the north-western region of Auckland City has placed intense strain on infrastructure. Wastewater from Westgate, Whenuapai, Hobsonville Point, Hobsonville, West Harbour and parts of Massey all pass under our awa (Henderson Creek) and flow along the coastal strip from Renata Esplanade, through Taipari Strand and again under the awa to The Concourse Detention Tank. Frequent overflows have occurred in this aged section of the transmission line. Essential Capital expenditure on such infrastructure should be prioritized under the Recovery Budget.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We are already years behind where we should be in addressing climate change and we are seeing evidence of the increasing impact of climate change. Pausing now could have a big impact on our futures. We must increase our efforts to address climate change, not reduce.

Section 7.2 of the Supporting Information supplement to the 10-Year Budget 2021 – 2031 proposes three options for climate action:

1. Moderately accelerate climate action
2. Significantly accelerate climate action
3. Status Quo (do nothing)

Option 1 costs of about \$15m would be accommodated in the proposed overall 5% general 21/22 rates increase. An Option 1 Plus costs of about \$45m would require an uplift of the general 21/22 rates increase to 5.9%. Option 3 does not require any change in the general rate. Option 1 is preferred by Auckland Council.

Option 1 appears to provide only for planning and response to natural hazards. An Option 1 plus provides for physical protective works and a pilot study on 4 critical coastal landfills. The supporting document does not provide detail for a full Option 2.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We support the extension and increase in investment in Water Quality on the proviso that there is increased investment in the water quality for Te Wai o Pareira, [Henderson Creek]. This waterway has suffered decades of abuse with frequent sewage overflows which need addressing urgently. The targeted rate MUST be spent to benefit the community that has paid for it.

The Supporting Information supplement identifies the size and scope of the wastewater network. It identifies wastewater overflows from the network as a major issue and these overflows have significantly impacted Te Wai o Pareira, [Henderson Creek]. The proposed water quality targeted rate extension specifically includes Hobson Bay to St Heliers and the Manukau Harbour but makes no mention of the upper Waitemata Harbour. This targeted rate should be applied equally to addressing water quality issues across the whole of the region.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Public transport would be twice as useful if services were reliable. 27 is one of the few lines that can actually be used to get to work as they arrive so frequently and it doesn't matter whether the bus doesn't arrive on time or at all, since the next one arrives five minutes later.

Additional cycling lanes are great.

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I am not convinced this will be enough to reach international zero carbon economy targets. There needs to be more of an emphasis on the shift towards climate action and reducing carbon emissions. The Council should revisit the spending already committed and analyse its effects on climate change emissions. Eg. will infrastructure projects such as Mill Road, help decrease dependence on cars and other carbon intensive transport?

I'd like to see accelerated change to a zero emissions bus fleet, walking and cycling options, diverting more waste from landfill, more protection and better restoration for Hauraki Gulf, more tree planting

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Biodiversity in our water is crucial to supporting all other flora and fauna (as well as endangered species that are living in them). With lots more people moving to and living in Tāmaki Makaurau we need to fund more protection and remediation of our awa.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: But it is important for all Aucklanders to have access to libraries and other community facilities. It's Ok to share spaces as long as services are still available.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Extending the Urban Rating Area : I support subject to tougher assessment of the services available to the communities concerned, plus plans to deliver services where there are deficits.

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service: I support subject to tougher assessment of the services available to the communities concerned, plus plans to deliver services where there are deficits.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I don't live in this area so am not qualified to comment

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Because the community extends north and south along Dominion road. It's useful to include all businesses along the road in a shared vision

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

climate change, active transport, pedestrianisation of precincts, connection with the outdoors, bringing green space into the city and preserving our native species. Walkability to local amenities. Supporting all citizens to improve their homes to perform better, reduce demand on utilities/ cost of utilities, and improve health outcomes. Add third party verification of home performance and/or sustainability (eg. HomeFit and Homestar ratings) to LIM reports.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Need to invest in our assets and bringing budget forward 3 years to do this is worth an increase of rates by 5%.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Need to invest to lessen the impact on climate - better use of our assets will help this but we need to invest to do this.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We are on the way to improving water quality so we need to continue with this and extending the targeted rate as well as increasing it will achieve this outcome sooner - which will be good for everyone.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Facilities need to be multipurpose - cover a lot of different activities in one place. This has been happening with the new facilities being built such as Te Manawa, Toia, Te Atatu Library and Community Centre.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Agree with the introduction of Electricity Network Resilience Targeted Rate on Vector to fund Council's tree management programme.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: Support the local board's resolution to change its OLI from the Chamberlain Park Masterplan to the realignment of the 18 hole course and creation of a new neighbourhood park - this is especially needed to support the new communities being created in this area (especially if the Unitech site is developed into housing). Also support the need to increase sportfield capacity - this is an issue currently affecting sporting groups and will only get worse as the local board area increases in population (from all the new housing being undertaken - especially with Kianga Ora developments).

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why Support the advocacy for the Waikowhai boardwalk Stage 2 - allows connections along the Manukau foreshore. Support the priorities of valuing natural spaces and heritage, increase in tree cover and improving connections through the area for the community. This is another area that is going to grow in population with large areas of Kianga Ora housing being intensified so the need for open spaces is going to be important.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

With the Auckland Housing Plan support in infrastructure and open spaces will be required in the Puketapapa and Albert-Eden local board areas - this is vital as there will be a great increase in housing therefore more people. Connections will be important - connections to parks, facilities, transport and schools.

Support the proposal of a long lease for Bledisloe House and the properties in the Wynyard Quarter. Also support the selling of the heritage assets in Devonport-Takapuna - it is a shame but the cost to restore and refurbish is too great a cost for the council to bear. Need to ensure the properties are retained as part of a sale (even though we will not achieve as much for the sale).

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: "One off" seems misleading. Isn't this the 3rd one off increase over the past few years. Basic wages and costs of living are our stripping ability to in Auckland. 5% is adding to those risks and burden.

Investment is need yes. But lets focus on the CORE services. The councils job is to support rate payers not take on wider business, environmental or community issues.

The "loss of 1 billion" in revenue highlights the unbalanced nature of the spending. Need to spend within out means not be a revenue generating organisation at the expense of living city.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: "we heard Aucklanders want greater action" - this statement isn't trusted. Where is this proof and mandate?

Council needs to make sound business and cost effective choices. That can include environmental based choices but not where it comes at a significant expense and inconvenience to the people that can't afford it.

The vocal/noisy minority have good intentions but don't necessarily bear the unworkable costs of some decisions.

Electric buses are supported. But balanced against total cost of ownership. Electricity needs to come from somewhere and I see in 2020 NZ important more coal to fill the gap. So the decisions aren't always clear cut.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: The base rate payer can't not afford this continual growth in expenses from the council. Rates take is not being matched with improved value for money or basic salary increases. Its actual adding to the affordability of living in auckland. Auckland isn't the most livable city, its going backwards.

This is an example of CORE services, its should be coming base rates over the years and into the future. The fact a targeted rate is needed shows the unbalance of funding focus. Only approve the extension so we catch up on the infrastructure debt, as that will hurt long term.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Our sourcing never works out in the long run. As it adds layers of people/businesses wanting the clip the ticket and loss of control.

This is another example of a core service for the rate payers. If we own the asserts and manage correctly they should be a better value return short and long term.

Also in part communities should be getting "extras" from business contribution/sponsorship or local fund raising. If the support is not there then the average rate payer shouldn't be forced to fund a marginal desire. Exceptions apply to some things.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

We should not be forcing unreasonable rate increases on people because of life style choices and then boundaries that change. A transition strategy should apply, i.e. when sold the new urban rates apply. So people buy with foreknowledge and can match income to the expense rather than being forced from the home.

"City Centre Targeted Rate" - given how unreachable and undesirable the central city has become this rate is not value for money. Its is not a core service, these are pet projects with questionable community buy in.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: USER pays. If public transport is so good it will pay its own way. The wider community should suffer the costs. And there is already the regional tax to cover such investments.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why: Its hard to relate to most of the priorities. Many seem pet projects from minority groups or loud environmentalists.

Don't care about the golf course and the walking/cycling is already good enough.

The civic square is supported. Albeit Mt Albert is now a dangerous traffic chock point. It will always remain a core cross community road carriage way and designs need to accommodate both public and private transport "Together" and equally.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why Don't know what this is or the impacts.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Affordable living in Auckland. i.e. housing, rent, transport (e.g. petrol, and bus)

Ability to get around the city to enjoy living. 10-15 years ago I could visit 2-3 communities in a day. Now with the loss of dual carriage way roads between suburbs, to bus lanes/cycle ways, and forever traffic light stops, its near impossible to get around the city.

Public transport is only good for special one off/all day trips or to/from work. Takes too long (routes and stops) or too many broken connections required.

The city centre is unattractive to get to now. Taxis have no stands, cost too much. 1 to 2 hours via public transport for 30min-1 hour in the city is not sensible use of time. Can't even get to the doctor anymore because of the lack of parking/reliable flow in and out of the city.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is important that in these difficult times the council acts to continue and maintain core services and continue community support. It must do this while maintaining fiscal responsibility.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I don't believe we have a choice.

People can and are acting responsibly individually but unless large organisations such as council also act responsibly it will be for nothing.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: As bad as the timing is financially we cannot continue to endanger public health by not acting to prevent sewerage pollution.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Previous fiscal irresponsibility in under investing in these assets has led us to this juncture. If we were to sell real estate assets we will never be able to afford to re-purchase them. Even if the facilities become unsafe the future investment to redevelop them will be so much less having retained ownership of the real estate. If the facilities are not meeting community needs then they need to be redeveloped. Surely it will be cheaper to redevelop them already having ownership of the real estate.

If we move to a model of relying on external providers to supply assets then clearly this will cost much more in the long term as the costs of development, maintenance and a profit margin will be on charged to the council. This sounds like a short term gain for a long term loss. How can this be justified?

I believe that a move to online services will reduce the accessibility of services for the elderly, poor, computer illiterate, and those with english as a second language. The very people who need and benefit from community services the most will be disenfranchised. The question then will be what is the point of the services.

In challenging times we need resilience. Resilience comes from relationships. Through community assets and services councils build community relationships. Don't limit community services to some segments of society or reduce future development opportunities by selling realstate assets.

I note the examples of new spending in this area are both projects in growth areas. Were these facilities not planned and budgeted for 10-20 years ago when these areas first started development? Why should they get new facilities fit for purpose? Mt Albert for example has a high proportion of the population with english as a second language. This is a segment of the community that will potentially be limited by a move to online services. Wouldn't it be better to redevelop the existing facilities to be fit for purpose? It would make for a greater diversity and multi-cultural community which we would all be able to reap the benefits of.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Are they going to be enough to be fiscally responsible?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Too expensive for people on fixed incomes. Not enough consultation. Not enough environmental assistance and which assets are to be sold off?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I fear the loss of libraries and see that always we have to battle to keep them open. They are a viable part of our community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?

Tell us why: I would like to see completion of the Waterview Coastal Boardwalk from Heron Park to Howlett Reserve. The proposed development at the end of Alverston and Alford Streets has been canned, so maybe the council could consider purchasing that land and turning it into a park for all to enjoy. It would probably also help protect the marine reserve.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Why do we allow more and more people into Auckland without the infrastrucute to support them? I am concerned about more and more housing being built. We are losing the New Zealand way of life and I don't understand where the economic benefits are coming from. Imhave lived in Auckland all my 54 years, but now feel like moving out to make way for all the newcomers. It seems that there is scant regard for the well-being of the locals.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Housing, public transport, employment, education, air quality, safe climate are among the basics of life quality for Auckland's population (well, world's population). The Council is pretty good.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Really really CRUCIAL. Electric buses the start. Light rail too, please. And indeed, expansion of the train services - there were wider plans earlier this century, eg running by side of motorway). Support for bicycles (green lanes?)

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Improvement good, but cost is an issue. Eg in Christchurch, domestic water use is not charged for - a great benefit for the poor, but only possible is actual cost of water is not too high.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: The difficulty of financing all the wonderful and worthwhile facilities is a real problem. And they are pretty crucial for a good society. But maybe there is a wider scope, eg employing students and pensioners (at a lower rate) who are less desperate for funds than the unemployed but could benefit from the work by the social contacts and by learning other aspects of life they had not earlier experienced.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: They all seem to enhance local life

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing - yes, vital. Along with State Housing. There are too many homeless people about - far more than when I arrived in Auckland a couple of decades ago.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: There is so much infrastructure that we need to both maintain and develop especially if we are to meet climate change requirements.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: If we want a more pedestrian-friendly environment we have to move to electric or hydrogen public transport. In the short term Queen St will be most unpleasant with all the diesel buses routed through the street.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Cleaning up our harbour and waterways is imperative to bring them back to their original ecological state. Describing NZ as a 'clean, green country and 100% pure' is a load of rubbish. Things will get worse with an increased population.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support in principle but would want to know what would be proposed for each facility/community area

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland Council needs to put climate change at the forefront of every plan and project. Investing just 0.5% of the budget in climate change issues is shamefully insufficient. With transport contributing to 40% of Auckland's greenhouse gas emissions it must be here that we invest in huge changes. Much more ambitious investment in accessible public transport, safe cycleways and safe footpaths is essential. Investing in accessible busways, trainlines, suburban car rental schemes, safe cycleways and footpaths will give more people climate-friendly transport choices.

These changes will free up Auckland's existing roads for those who really need to use them, including persons with disabilities or tradespeople. Stop investing in more roads and make a much bigger investment in accessible public transport and safe cycleways and footpaths.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: The additional spend on climate change needs to be vastly more to reduce emissions. See Q1 answer.

Paul Winton speaks with practical knowledge and solutions on this issue - saying that " the country could save \$4.5 billion per year in energy by ditching petrol and diesel in cars and trucks as well as reaping climate and health benefits. <https://www.stuff.co.nz/environment/climate-news/123216764/lets-save-4b-by-bidding-goodbye-to-petrol-by-2030--campaigner>

as does Simon Wilson - He said under the current transport funding proposal Auckland's net carbon emissions will increase by 6% over the next 10 years.

<https://www.rnz.co.nz/national/programmes/afternoons/audio/2018788073/solving-the-world-s-problems-with-simon-wilson>.

As well as planting more trees another crucial issue for Auckland and New Zealand is to bring back legislation to protect trees. Since tree protection was removed in 2012 by the National government Auckland alone has lost one third of its tree canopy.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Improving water quality should involve other things such as water conservation and reticulation systems in new building developments and estishing more wetlands in suburbs and along Auckland coastlines. Annabeth Cohen from Forest and Bird has reported , "coastal wetlands can store carbon 60 times faster than tropical rain forests" <https://www.rnz.co.nz/national/programmes/afternoons/audio/2018781951/forest-and-bird-calls-for-wetland-restoration-plan>

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The Covid recovery projects nationally seem to have had a heavy focus on construction and roading and this is particularly apparent in Auckland. These projects seem to have been prioritised at the expense of the environment and broader social issues. There needs to be an integration of environmental social, and economic values in all projects

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There are 40,000 unoccupied dwellings in Auckland (2018 census). That's because we've made it attractive to buy property, do nothing to maintain it as a dwelling, and sell for astronomical profits only 5 years later. It's a tax free haven (why is this not taxed like other income/profits?!). But you have a \$1 billion revenue deficit, we have 1000s of homeless, high rent and property prices. If people don't make use of property as it should (ie to live in or provide accommodation for others) then these people should pay twice the rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council has not generated revenue where it could. By now it should be possible to hike rates by whatever amount is required to get this generation to pay for this generation's expensive and polluting lifestyles.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It's a lovely token. It doesn't go anywhere far enough. Councillors voted to mainstream the climate targets but this plan does not do so.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is hugely important. There is zero justification for continuing to pollute it.

Council needs to do much more, however. The stormwater running into the combined sewers during storms is a problem of allowing low rise car dependent infill that paves over too much land. The Development Strategy needs overhaul to allow quality low footprint, high rise no-car development. Council also needs to make it easy to link rainwater tanks to toilets, hot water cylinders and washing machines as this is an effective way to provide peak stormwater retention capacity.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council need to keep maintaining these community facilities and buy more because with climate change, we need to be living more locally, and we should have more residents using them due to intensification. The proposal to sell some is pure selfishness when combined with trying to keep rates to an unhealthy low level and refusing to find other revenue sources like parking levies.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

How will you make sure the Vector overhead power lines rate doesn't lead them to declare more larger trees "need" removal each time they do underground work?

The Accommodation Provider Targeted Rate should be reinstated and far, far higher. The cost of Covid is largely due to the aviation and tourism industries, but they are not being charged.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Sprawl costs us dearly. One way is in having to support low ridership bus routes. These properties MUST have public transport - people who don't drive have transport poverty otherwise - and while I would like the Councillors who have lobbied for sprawl to have to pay for the bus services, I don't think that will fly. Adding a targeted rate means they might use the bus, since they're paying for it.

But Council, take the lesson: Overhaul your stupid Development Strategy and stop sprawling.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

See attached file. The Development Strategy must be overhauled. Sprawl must stop. Council can't wait for instruction from Government and must do everything it can to turn this ship around before we are a complete wreck.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

Submission on the Auckland Council Long Term Plan 2021

by

The Long Term Plan pays insufficient attention to the risks, including financial risks, Aucklanders face due to climate change.

This plan sets our children up to fail in so many ways:

- Leaving a very expensive car dependent transport system,
- Leaving a very energy intensive urban form that is not climate-ready nor liveable,
- Paying so much money continuing to build this regressive transport system and urban form that there isn't sufficient money to invest in the normal things a city needs,
- Failing to generate revenue from carparking, carpark repurposing and driving, the multiple benefits of which have been known since last century,
- Borrowing excessive levels of money, adding to our children's debt,
- Leaving an ever-growing "liability" asset base that is creating a crisis level of renewals,
- Paying so little attention to transport emissions that Aucklanders and all New Zealanders will be paying high taxes to cover carbon credits as well,
- Leaving fewer and fewer 'revenue-earning' assets so our children will be even less well equipped to pay for the renewals and the debt repayments than we are.

Together, these failures amount to a level of negligence to our children's needs that is inhumane.

Relying on the Government to resolve the transport emissions problem through policy around EV's is not just irresponsible on a technical, financial and social level as I've described below. It also demonstrates that Council has ignored the entire premise of C40 membership, which is that C40 cities aim to lead, knowing that national governments are dragging the chain. Cities need to do this regardless of the assistance coming from state governments.

I will be asking detailed questions about the processes undertaken by Council to understand what Council has done to alter its approach to stewardship, risk management and financial processes in response to declaring a climate emergency.

Street trees.

The plan calls for some 11,000 street trees additional to the current policy of replacement when one dies and of putting new trees in some streetscape plans. It also has a new approach to incentivising Vector to underground the powerlines. I'm interested in others' thoughts on whether this could have perverse effects.

Introducing the Electricity Network Resilience Targeted Rate

What we are proposing

We are proposing to introduce a targeted rate of \$10.5 million per year on Vector. This will fund our tree management programme around the Vector overhead power lines. This will allow for an enhanced level of service that will reduce risk to Vector's powerlines from trees owned by the council. It would result in:

- improved public safety around power lines
- reduced power outages.

This rate would only be paid by Vector. Vector has said paying for the rate would increase the average residential electricity bill of their customers by approximately \$1 per month.

Pruning more trees to the best arboriculture practices will create a more resilient urban forest and a more resilient electricity network. However, it may result in some loss of tree canopy.

To manage the impact on the tree canopy of the enhanced approach to tree maintenance we will:

- spend \$500,000 of the rate collected from Vector on new tree planting
- the new rate will free up \$1.5 million of general rates funding. We propose to spend this on further additional tree planting and more pruning in parks and town centres.

But is this enough? Our streets form a full 50% of Auckland's open space. Trees reduce temperatures and provide shade, enabling people to comfortably walk and cycle on hot days, and they are critical to our success at becoming a compact, low carbon city because of their improvement to street liveability.

Auckland needs trees at a spacing of 20m – or closer – both sides of the road, and for our 7500+ km of streets, this means over 750,000 trees.

Council has advised me we currently have about 150,000 street trees – so we need to find a way to plant about 600,000 more. They need to be planted this decade so they can be providing decent levels of shade – and finding their own water – before climate change brings more extreme weather events. That means 60,000 new street trees per year.

Because street trees are part of walking infrastructure and placemaking in the road corridors, their planting should be funded as part of the basic management of the local roads. It's as important as the concrete and asphalt, line markings and kerbs.

To scale the proposed policy up, Council needs to instruct Auckland Transport to reallocate funding from sprawl roads or "intersection upgrades" that involve widening.

Also, Council needs to overrule Auckland Transport's position on people planting their own trees and instead provide the public with a long list of species suitable for different streetscapes which will form canopies. And maybe run some volunteer planting days.

Next, something that should be in the Long Term Plan:

Image credit: @playmeetstreet

Opening the Streets

A full city-wide Low Traffic Neighbourhood Plan is a fast, cheap way to make our city liveable and low carbon, and it makes traffic engineering easier by reducing vehicle travel demand. It's something Council and the Local Boards could lead, tasking AT with some elements of delivery.

And there should be funding for a programme of regularly opening our streets to the people, to help demonstrate the benefits.

Next, two sorely-needed pieces of responsible fiscal management that also aid climate action but seem to be held up on ideological grounds.

Repurposing Carpark Assets

The Long Term Plan lists these assets:

Parking	\$0.2b	2,064,256m ² of at grade car parks, 9 car park buildings, 969 payment machines
----------------	---------------	---

The at grade car parks alone are enough land to accommodate over 50,000 apartments.

But the value of \$200 million seems very low. The chart below is from an OIA request just about car park buildings. They alone were valued at \$660 million in 2018/2019.

2017-2018 Results			
Carpark	Capacity (Spaces)	Net Operating Surplus ('000)	Current Book Value (\$000)
Downtown	2106	8,862	137,000
Civic	1096	4,195	79,177
Victoria	1267	3,537	61,030
Fanshawe Street	488	498	19,040
Davies Ave (Ronwood)	661	527	21,498
McCrae Way Carpark	224	-101	11,348
Other Carparks	Various	2,323	348,369

2018-2019 Results			
Carpark	Capacity (Spaces)	Net Operating Surplus ('000)	Current Book Value (\$000)
Downtown	2016	8,275	136,242
Civic	1096	3,821	77,515
Victoria	1267	3,539	60,537
Fanshawe Street	488	558	19,015
Davies Ave (Ronwood)	661	501	21,268
McCrae Way Carpark	224	-22	11,126
Other Carparks	Various	2,383	334,653

Note that the park and rides are included elsewhere, and considered part of public transport:

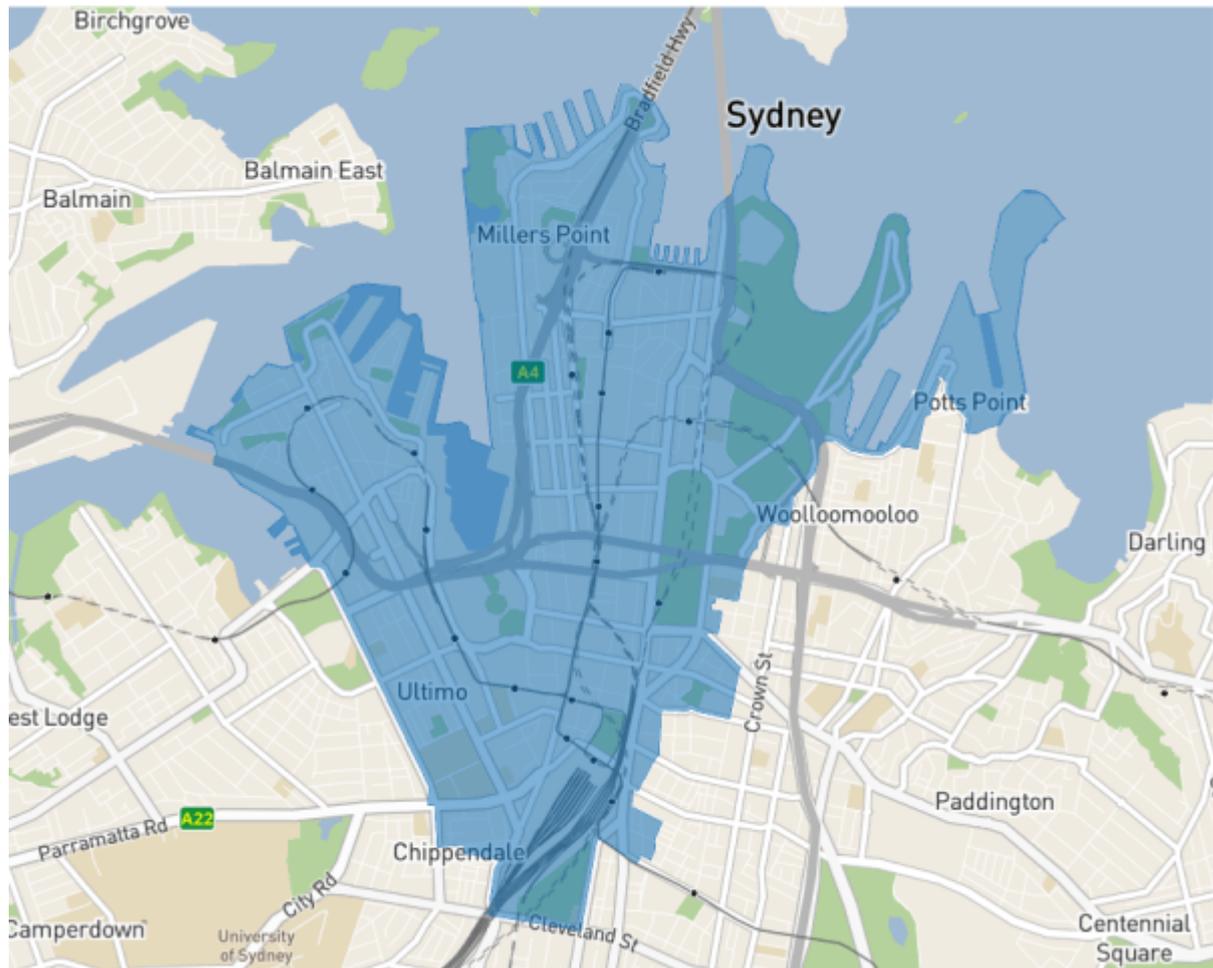

Public transport	\$1.5b	1,482 bus shelters, 6 bus stations, 7 bus park and rides, 41 rail stations, 57 electric trains, 10 diesel trains, 22 rail park and rides, 23 ferry wharves, 5 ferry buildings
-------------------------	---------------	---

Perhaps the value of all this land is listed elsewhere? Either way, Council has not identified carparks as an important asset to repurpose into climate-appropriate mixed use development including housing and local green parks. Why not?

Excessive carparks are yet another subsidy to driving that worsens the experience for people using other modes and prevents modeshift. Repurposing them would reduce traffic, emissions, and improve walking and cycling considerably. It would be responsible from a housing, health, safety, climate, fiscal and equity perspective.

Car Parking Levies

Auckland is missing out on a significant source of revenue.

[Sydney](#) introduced a parking levy in 1992, which provides ring fenced funds for public transport investment. The levies currently are:

- NZD 2,677 a year for each private parking space in the city centre
- NZD 946 in selected town centres

Another example is [Nottingham](#) where a workplace parking levy was introduced in 2012. It applies to employers who provide more than 10 parking spaces and is NZD 830 per space per year. The funds were ring fenced from the beginning to extend the tramway network.

A [2017 study](#) demonstrated its impact on reducing congestion.

Auckland had [27,592 private parking spaces](#) in the city centre in 2007 – it's probably similar now. If Council introduced a levy in the city centre at Sydney's rates, that initially would reap \$73 million a year. However, we could expect 10% of parking spaces to be quickly taken out of commission to avoid paying the levy, as was recorded in Perth. After this likely drop in spaces, Auckland would still see \$66 million revenue per year.

Workplace levies city wide would be a significant revenue stream.

Council should have been requiring government introduce any legislation required to achieve this since unification, but last year when Covid affected Council's finances, it's unbelievable this didn't get established quickly.

Now, onto the biggie.

Climate Action

Auckland Council has had plenty of time to ensure this Long Term plan addresses climate change:

- New Zealand ratified the Kyoto Protocol in 2002
- Council has been a member of C40 since 2015,
- Council declared a climate emergency in June 2019
- Council adopted the Auckland Climate Plan in July 2020

Since the Council renewed their C40 membership last month, there's been no change in political or economic outlook. So Aucklanders should be able to expect the Long Term Plan to give full effect to the [commitments](#) Council made then, which include that Council will:

- **be on track in 2024**, to deliver the Auckland Climate Plan, including its emissions targets,
- **mainstream the climate targets** – using the necessary financial, regulatory and other tools – in the “most impactful city decision-making processes” such as this Long Term Plan,
- demonstrate global climate leadership and **inspire others to act** in support of the Paris Agreement.

The Long Term Plan has a climate package and that's all good. Make sure you give a tick to support it (you know the silly numbers games that go on.) But it's less than 0.5% of the budget, not “mainstreaming” the climate targets at all.

Yet Council say they would need more money to meet the targets:

e. Responding to climate change

In June 2019 we declared a climate emergency reflecting the threat that climate change poses to our economy, environment, and way of life.

This was followed in June 2020 by Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, which sets out a plan for the region to:

- reduce greenhouse gas emissions by 50 per cent by 2030
- reach net zero emissions by 2050
- create a pathway to prepare for the impacts of climate change.

While we are already doing a lot of work tackling emissions, more investment will be needed to play our part to help meet these regional goals. More investment will also be needed to make our infrastructure more resilient to the effects of climate change. This includes the impacts of rising sea levels and more frequent extreme weather events.

As we've seen with ATAP, low carbon projects can easily be funded by halting the expensive and destructive projects, in a win-win reallocation of money from bad to good. Council have also had since July last year to figure out new revenue streams, and as I showed above, have ignored some big ones.

What the plan is missing is the concept of transformation – making organisational U-turns. Mindset is preventing progress.

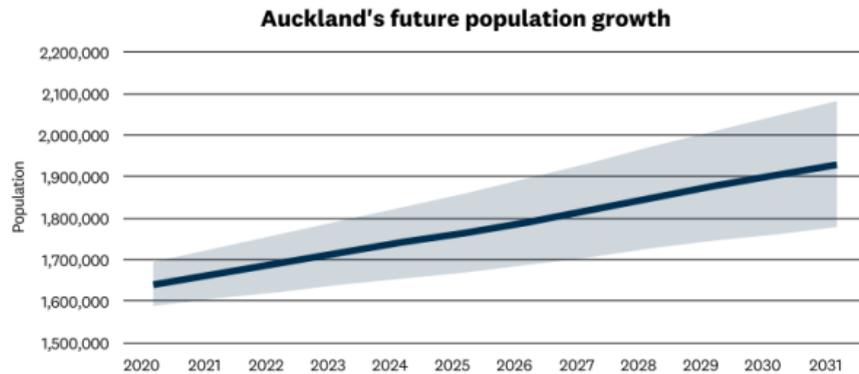

The Development Strategy

a. Rapid growth

Auckland's population continues to grow rapidly. This means we need to provide more services to more people. More people also put more pressure on housing supply and housing affordability. While we do not build houses, we need to do our bit to ensure there is enough infrastructure (such as roads, water pipes, public transport, parks, and community facilities) to accommodate growth.

We also need enough infrastructure to support new business developments, as more people will need more places to work and do business. As Auckland grows, we will also need to spend more to mitigate the impacts of growth on the natural environment and the health of our waterways.

The following chart illustrates the rapid growth we are expecting, and the potential uncertainty that the COVID-19 pandemic may have on growth in the near term:

Council lists rapid growth as a “challenge” when in fact is a climate action opportunity.

In Auckland, population growth offers us a chance to take enormous climate action: to change our urban form rapidly. If all the new housing built is achieved through intensification, the city will become more compact – bringing more amenities to walking distance of more people more quickly. This is the core climate action a sprawling city needs to take, and we could be world leaders at it.

Aucklanders know the ecological destruction sprawl is causing is unsustainable. We know that putting on barely-used bus services to new subdivisions is costly when those same homes put into existing low density suburbs would've increased ridership on an existing bus service, making it more economical. We don't want the long commutes and the too-long-to-cycle distances. We don't want the obesity and mental health problems that come with the car dependence, nor the reliance children have on being driven around.

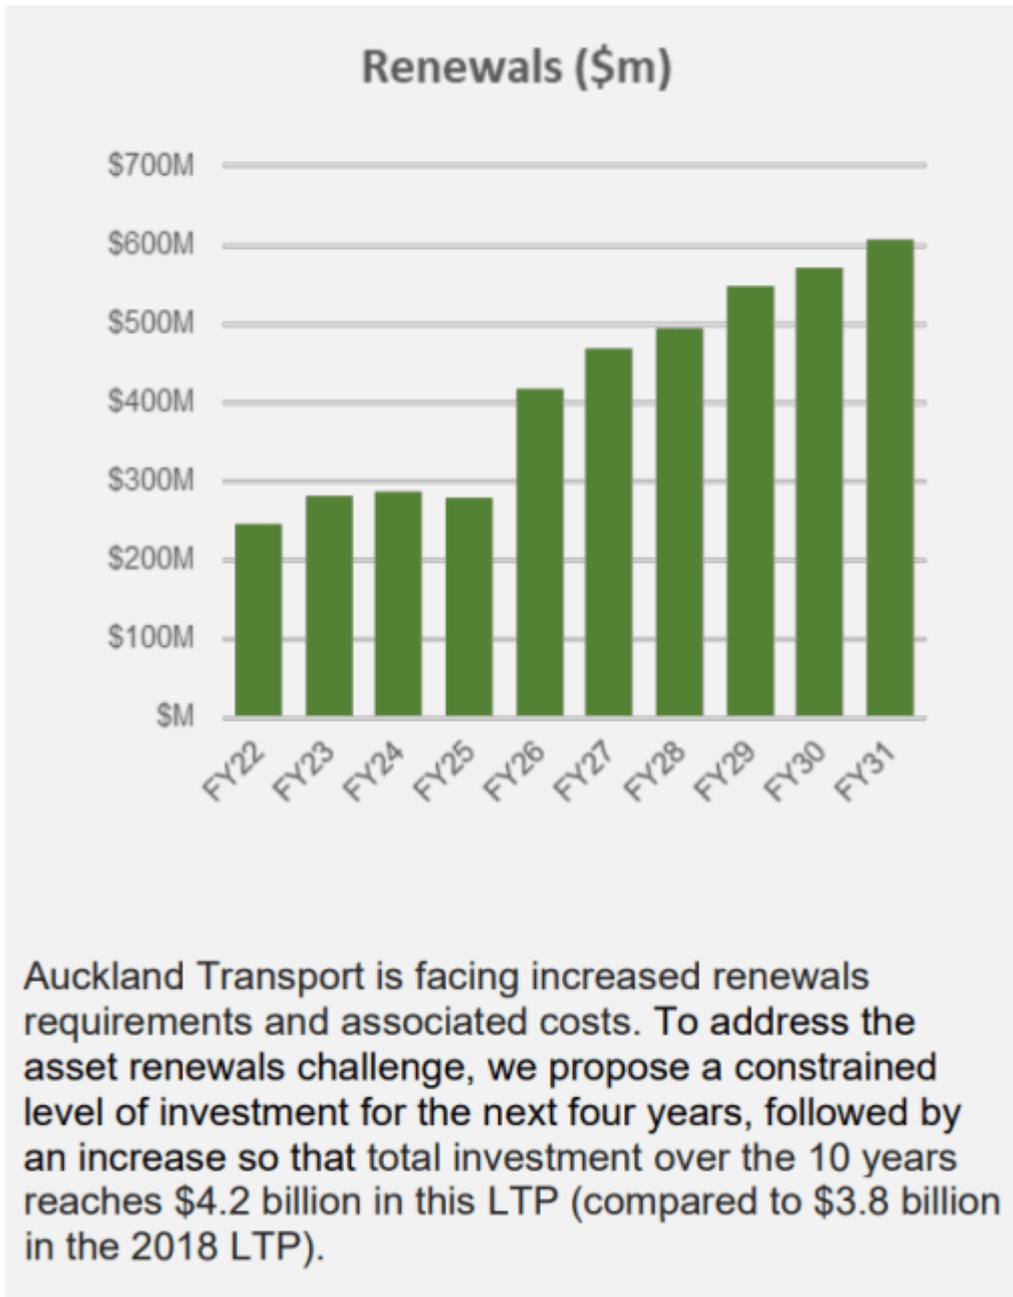

And the costs of the infrastructure required for sprawl are just unacceptable. But we've been fooled that the economists' "law of supply and demand" means we have to keep releasing land for development in order to keep prices down.

It's a fallacy. Recently [the OECD studied how to decarbonise land use and transport in Auckland](#), and found sprawl will send house prices up further if we persist with it:

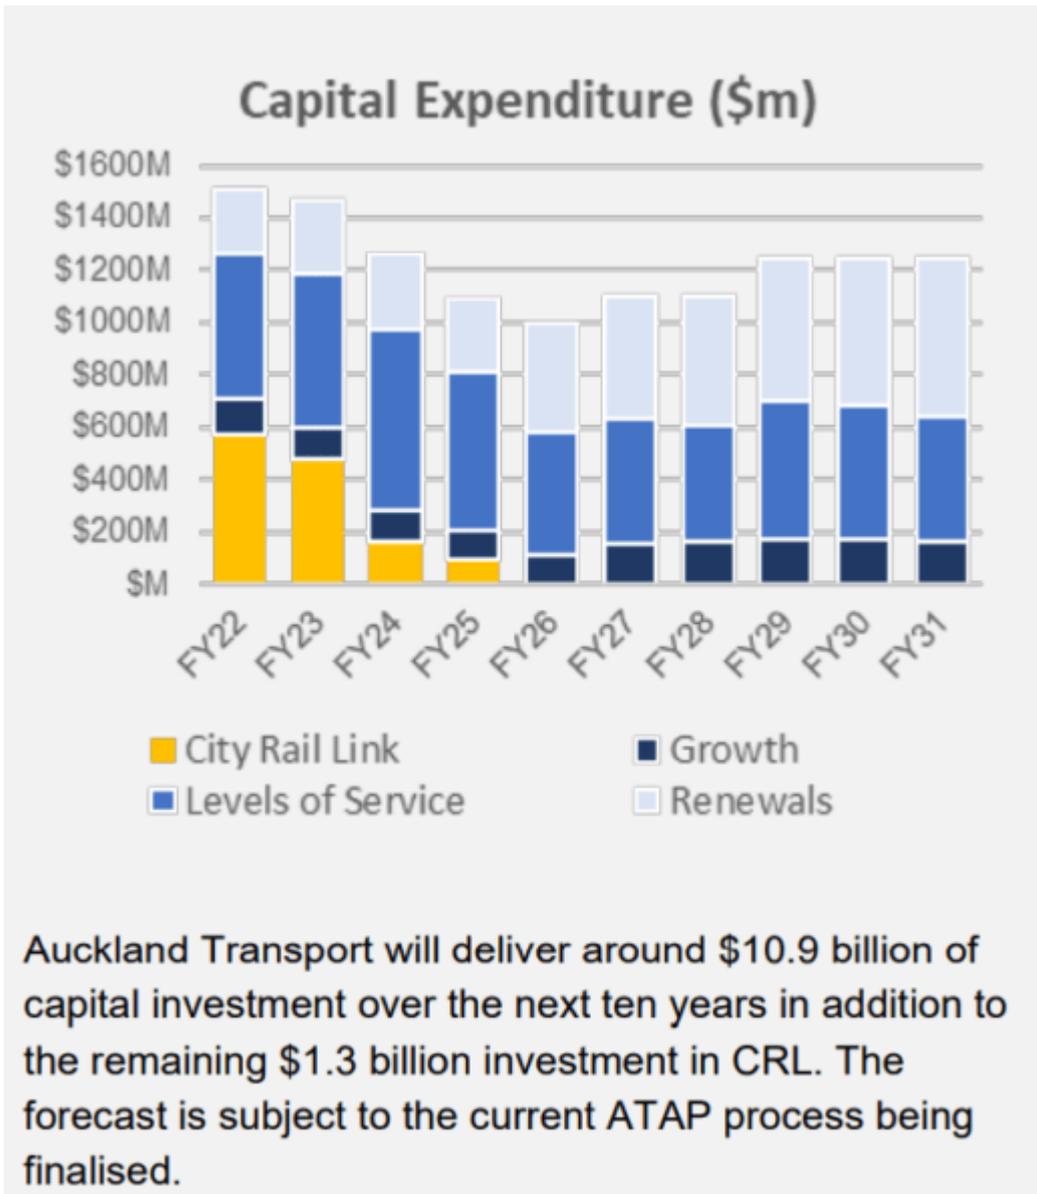

In addition to reducing emissions, policies that increase population density may entail further social benefits by curbing the growth in the cost of housing. By implementing a set of land-use policies that enable widespread densification, the tripling of housing prices in Auckland projected in the period 2018-2050 can be reduced to an increase of 57%. The associated welfare gain of such policies is substantial. The report finds that this gain exceeds 7% of net income in 2050.

The Auckland Climate Plan signalled that the Development Strategy needs review. This Long Term Plan should have overhauled the funding in preparation for stopping all sprawl as part of the climate emergency.

The legacy of all this sprawl includes all the extra infrastructure we need to maintain. It shows up, for example, in the increasing cost of Auckland Transport's renewals programme:

Sprawl means the cost of renewals will go from being a smaller part of our capital expenses to around half by 2031! It is an inexcusable, irresponsible legacy to be leaving for our children.

Which brings us to:

c. Transport demands

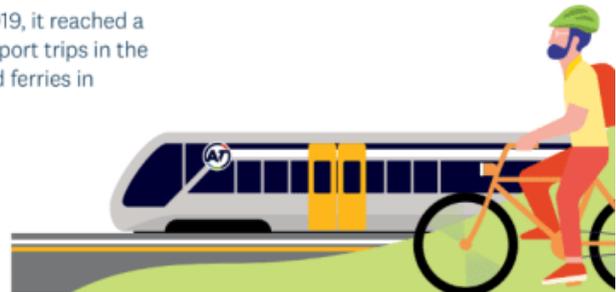

Traffic congestion has a big impact on the Auckland economy. The benefits of decongesting Auckland's transport network have been estimated to be between \$0.9 billion and \$1.3 billion per year (approximately 1 to 1.5 per cent of Auckland's GDP). A recent business survey found that 33 per cent of respondents now view traffic congestion as the main obstacle to growth and operations, up from just 5 per cent four years ago.

Auckland has a serious problem with road deaths and injuries. In 2019 alone, 40 people died and 567 people were seriously injured on our roads.

At the same time, road transport related emissions accounted for about 38 per cent of Auckland's total emissions in 2016. Between 2007 and 2017, on-road transport emissions increased by about 9 per cent.

Public transport use in Auckland is growing fast. In June 2019, it reached a milestone - Aucklanders had made 100 million public transport trips in the past year, making that the biggest year for buses, trains and ferries in the city since 1951.

Substantial investment is needed in Auckland's transport network to address these issues and continue to provide more transport choices for more Aucklanders.

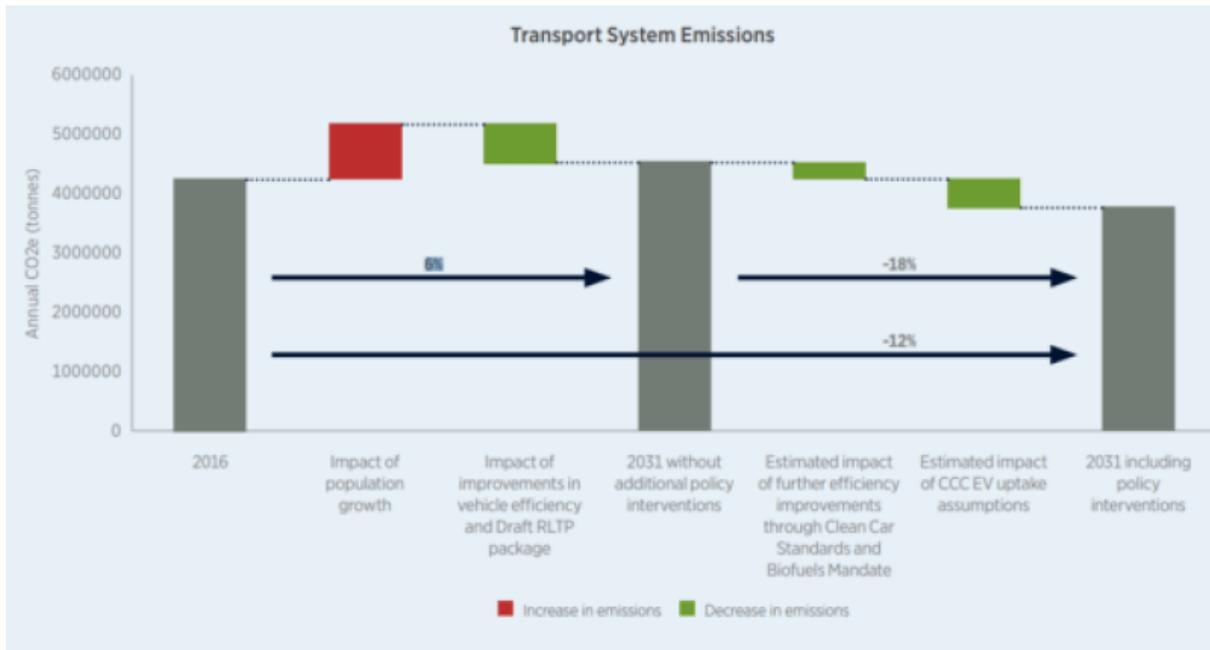

The draft Regional Land Transport Plan (RLTP)

This transport plan is a part of the Long Term Plan. It was just released yesterday, which doesn't leave enough time to really consider it.

At its core, it has sprawl roads inducing traffic, and is based on serious flaws of understanding about how to create modeshift, improve safety and encourage lower carbon travel.

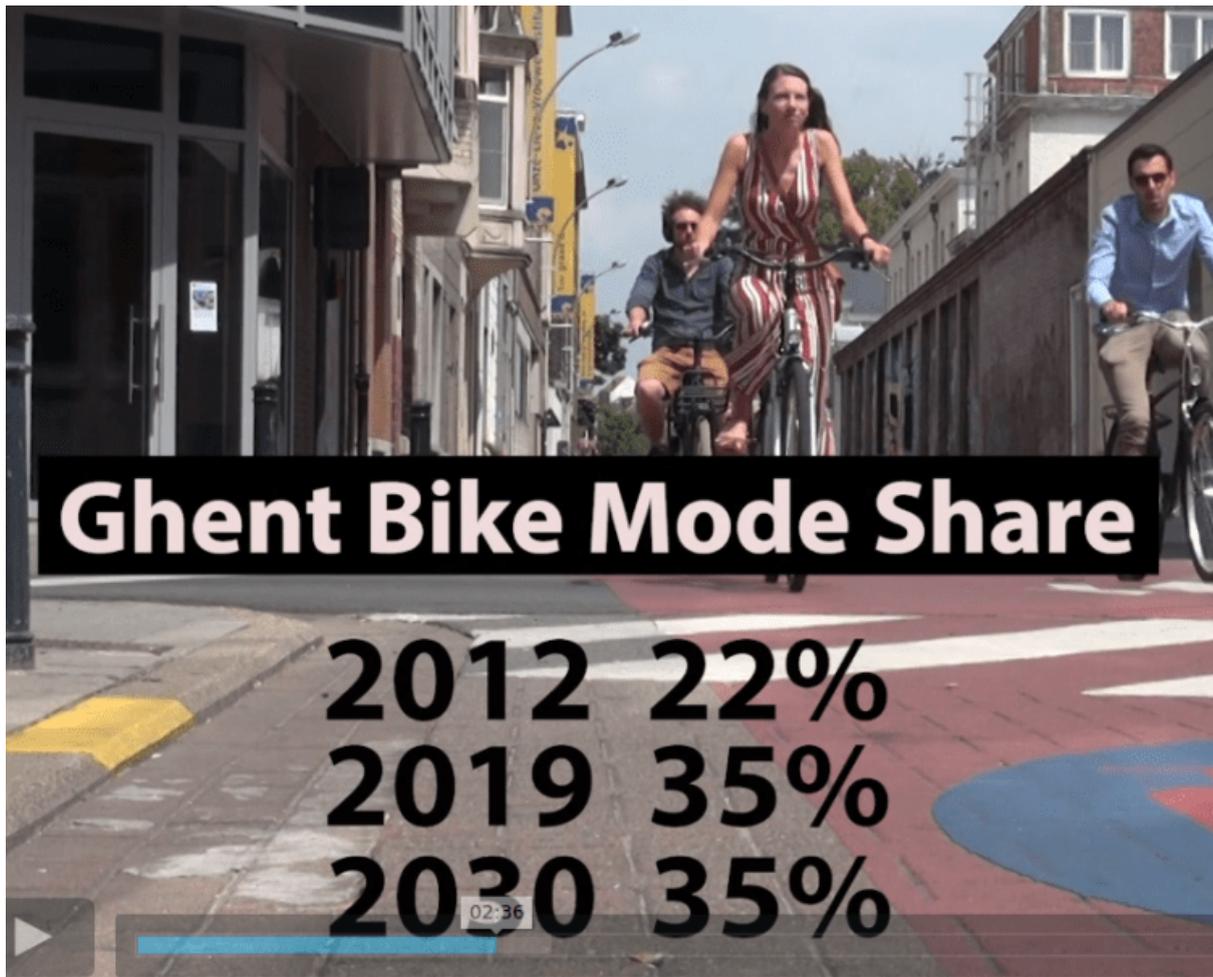

However, at best, an investment-only approach could only hope to hold private vehicle travel to today's levels – leaving the problem of existing travel and emissions.

The diagram below illustrates the mindset problem well. The left hand green box below includes all the emissions reductions Auckland Transport think they can muster without policy interventions from government to help with EV uptake (and pricing).

It's as if they've never heard of cities that have reduced their transport emissions through modeshift before the era of electric vehicles! Remember how [Ghent](#) planned to increase its cycling modeshare by 13 percentage points over an 18 year period? And how instead of 18 years, it only took them 7? Berlin is aiming for 82% sustainable modeshare, and Vancouver for 67% sustainable modeshare by 2030. That's how you reduce emissions.

We can set meaningful targets as well, and change what we do to meet them.

The transport sector seems to be pegging their ambitions on EV's for the same reason the system has become as polluting, soul-destroying and life-threatening as it is – their methods are faulty and they are dominated by people don't want to change the system.

Council needs to do their due diligence on this. [Relying on EV's is regressive policy](#) that misses out on the many cobenefits of using a vehicle travel reduction strategy, increases vehicle travel (due to lower operating costs) and [displaces and limits the expansion of more efficient modes](#).

Community Goals	Cleaner Vehicles	Vehicle Travel Reductions
<i>Total Vehicle Travel</i>	<i>Increased</i>	<i>Reduced</i>
Congestion reduction	Worse	Better
Roadway cost savings	Worse	Better
Parking cost savings	Worse	Better
Consumer savings and affordability	Mixed	Better
Traffic safety	Worse	Better
Mobility options for non-drivers	Worse	Better
Energy conservation	Better	Better
Pollution reduction	Better	Better
Physical fitness and health	Worse	Better
More compact development	Worse	Better

By reducing vehicle operating costs, Cleaner Vehicle strategies increase total vehicle travel, sprawl, and associated costs. Vehicle travel reduction strategies help achieve many multiple goals.

These transport plans will be infuriating many of the Councillors who recognise the poor direction they are sending Auckland. So why did the Mayor accept transport plans that so obstinately conflict with the Auckland Climate Plan and C40 commitments?

The link between roads like Mill Rd and Penlink and increasing emissions is robust. Our mayor has claimed climate change is his top priority but he's sat by while Councillors have lobbied for road expansion and sprawl. These Councillors are wasting our time and our money, are undermining good urban planning for climate, and causing an enormous headache for the Council officers and Councillors who are actually trying to get our emissions on track.

The Mayor should be loudly pointing out the hypocrisy of lobbying for sprawl (and sprawl roads) while simultaneously voting for climate commitments (adopting the Auckland Climate Plan and renewing the city's membership of C40). Had he publicly explained how irresponsible lobbying for roads is, and publicly demanded more climate-responsible behaviour, government would have been less likely to include those damaging roads in the NZ UP programme. In any case, there would've been some integrity to then trying to get the transport plans into a responsible shape for climate:

- A few more big roading cuts, and no more motorway widening
- A whole lot of active and public transport projects funded from the money saved in making all those cuts, and
- An overhaul of a few out-of-date AT programmes.

Easy, cheap, transformational.

It required our mayor to challenge sprawlist Councillors – and sprawlist MPs – and demand they wake up to what urban planning for climate change is about.

It's called leadership.

Other Transport Elements

We need a programme of emergency pop-up cycle lanes throughout the city, [like Melbourne managed](#) in the early stages of Covid (the thread is worth looking at):

Melbourne Way @MelbourneWay · 17h

Many of Melbourne's earlier covid-era protected bike lanes are now on Street View.

These are quick-build approaches that can be improved over time.

Long thread ↓

William St at Flagstaff Gardens:

google.com.au/maps/@-37.8116...

1

14

23

There should be funding to implement a default 30 km/hr speed limit throughout the city, as [Paris is doing](#). It's an important element of a safer network for active travel, and is a quick pathway to transport transformation and major modeshift. It's also easiest for drivers to adjust to than piecemeal area changes.

The Long Term Plan should have funding for consolidation hubs for deliveries and freight, to keep most trucks on the arterials and smaller vehicles on the smaller roads.

Governance Tools

The Auckland Climate Plan's emissions targets haven't been transferred into a performance measure in the LTP for transport emissions, apart from for AT's assets (ie buses):

Performance measure	Actual	Target	Indicative Long-term Plan targets			
	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25-30/31
The percentage of the total public transport operating cost recovered through fares	33.7%	47-50%	40-45%	43-47%	Maintain or improve	Maintain or improve
<i>Farebox recovery measures the contribution passenger fares make to the operating cost of providing public transport services. The measure calculates farebox recovery in accordance with NZ Transport Agency guidelines.</i>						
Percentage reduction of greenhouse gas emissions from AT's assets (baseline 2018/19)	N/A	New measure	9%	9%	9%	9%

Council writes nice plans about modeshift and increasing active travel, but their performance measures are heavily weighted towards “ride quality” for drivers. There is no performance measure for implementing cycling infrastructure or modeshift. These are needed.

The Long Term Plan needs to put enough money into a team large enough to actually monitor all the performance measures and give feedback automatically to change programmes when they go off track. Not once every three years or year, but on a continual basis.

And funding is also a core governance tool. Funding for Auckland Transport should be contingent on meeting sound, numerical performance measures.

Community Services

Community services help ensure our diverse communities are socially connected so they are more resilient to social, economic, cultural and environmental change. This becomes more important in a recovery environment where some communities may be more impacted than others.

As a population grows, there are economies of scale and larger interest groups within society, that make it more efficient to maintain a wider array of community services.

Auckland Council is doing something seriously wrong, because they're finding it harder:

At current funding levels we are not able to sustain the extensive community asset portfolio.

*Prioritisation ensures we invest in critical renewals to maintain compliance and satisfy health and safety requirements but **at current funding levels the portfolio will continue to degrade over time.***

There are three options to consider how to invest in the community portfolio:

- *Status quo – our current operating conditions continue*
- *Additional investment – increased funding to retain existing portfolio and provide for anticipated growth based on current provision guidelines*
- *Focussed investment (preferred) – tailor our services and reframe our portfolio to ensure it is effective and affordable.*

This is outrageous, but not unexpected. It follows logically from two destructive policies:

Keeping rates low: Failing to maintain the assets built up by past generations, focusing instead on keeping rates low for the current generations, while ruining future prospects for future generations is extraordinary selfishness.

And sprawl: None of this would be true if we were intensifying, because there would be a bigger population to share the costs of a more compactly held asset base.

The investment required to provide regional and local community services is significant and continues to increase as our community asset portfolio ages and grows in size as we respond to growth in Auckland and adapt to and mitigate climate change impacts. As our portfolio has increased in size the investment requirement to support those assets over the long term also increases.

It's important to both keep a well-maintained portfolio and to make sure it is fit for purpose. But this gap is actually reasonably small and should be funded.

The gap between capacity and renewals requirement is approximately \$800 million over 10 years. Because some of our assets are old and in poor condition it is prudent to consider how well they can meet our current and future service requirements before we continue to invest significantly in them. In some instances, alternate options may offer greater value and benefit to our customers.

What is prudent is planning for climate, which means planning for people to live more locally, retaining our local community assets and increasing rates and finding other revenue streams – particularly those that would encourage behaviour change away from climate-destroying practices.

Which brings me to:

Asset Recycling

The theory of asset recycling is fine. Technology, cultural values and challenges are all changing so it makes sense to buy and sell different assets to ensure the asset base remains relevant.

But when maintenance is deferred until the asset needs “renewal” is that considered a new asset? And does that mean its “renewal” warranted the selling of another asset?

Because to my mind, that will simply erode our asset base. It is the responsibility of each generation to pay – from its rates and revenue – for the maintenance, renewal and upgrades of all the assets it needs.

We propose to increase our asset recycling target over the next 3-years from \$20 million to \$70 million each year. This is on top of other asset sales programmes across the group including those undertaken by Panuku, including

as part of the Transform and Unlock programme, and as part of our corporate property optimisation strategy.

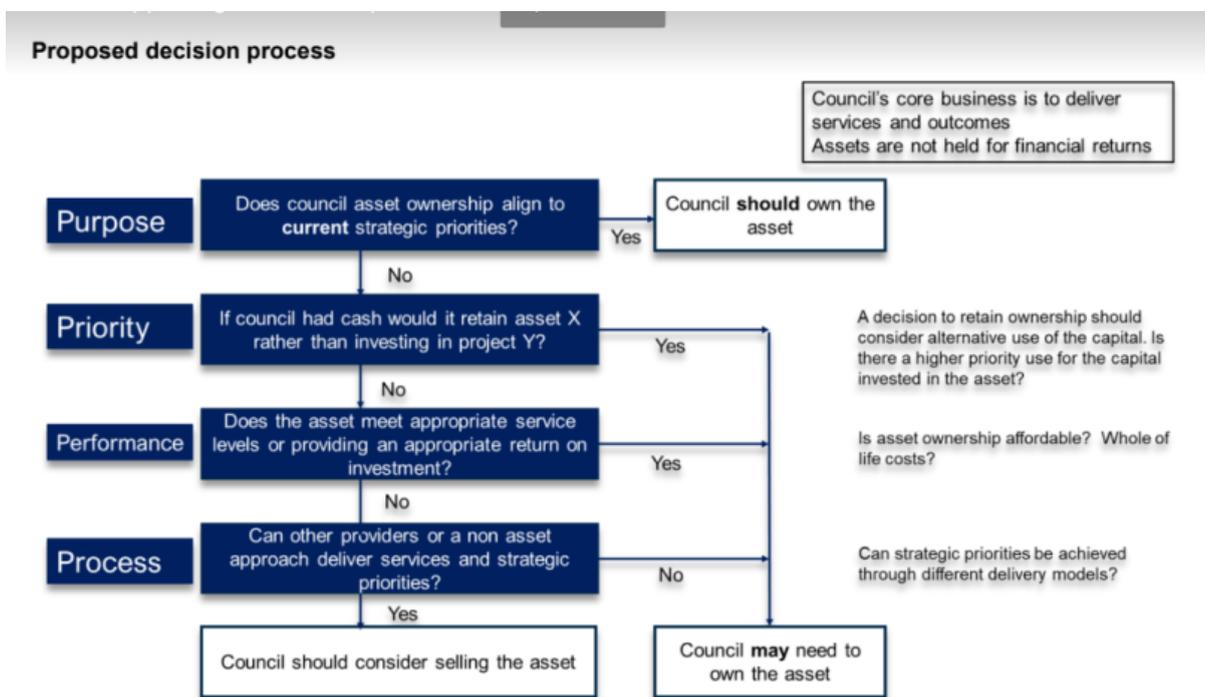

How many Aucklanders understand what this really means? I'd like the Long Term Plan to have the information presented in a way that makes this clear to people like me, who aren't accountants.

In preparing the Emergency Budget 2020/2021 staff identified a pipeline of non-strategic, non-service assets that could be considered for sale or long-term lease. This work supported the council's decision to set a target for \$244 million of asset recycling in the 2020/2021 year. Alongside the work to deliver on this target staff have continued to identify further opportunities for asset recycling. To support the supply of investment capacity it is proposed that asset recycling targets are increased to \$70 million per annum for the first three years of this plan.

I think the \$244 million is too high and that should be for the decade? Am I right?

What is not clear to me is if Council's real net worth is increasing or decreasing, and whether we're simply eating through our capital to fund new "assets" that are little more than maintenance-heavy sprawl infrastructure.

Can any reader help? Because this flowchart is inadequate and has me feeling uneasy:

Climate planning is not central to this process. Instead, "Assets are not held for financial returns" is straight out of the neoliberal play book, and prevents good planning for the future.

This is EXACTLY the sort of impactful decision-making process that C40's member requirements mean about using the necessary financial regulatory and other tools to mainstream the climate targets.

Councillors committed to mainstreaming these processes, but haven't given oversight of what the Council officers are doing.

Developers are building sprawl roads and infrastructure every year, and vesting them in Council to form part of the asset portfolio. For all I know, Council could be slowly diminishing the assets that return an income and building up a set of assets that are an enormous liability of maintenance.

Yet our children need as many revenue-earning assets in the future as they can get to help pay for the enormous and irresponsible renewals and maintenance burden we're leaving them.

Council, we need to see a chart of our real net worth, adjusted for the increased complexity and cost of systems and adjusted for purchasing power – given how much more property costs. Separate out the non-revenue earning infrastructure like roads and pipes that are liabilities, and, finally, it needs to be worked out on a per capita basis.

If that isn't rising, we're depleting the Council's asset base and ruining our children's chances in yet another way.

Benchmarks

Too often, we hear that the actions we want from Council can't happen because of various financial reporting and prudence benchmarks that Council is meant to meet. These benchmarks are discussed on pages 195 onwards:

Rates affordability benchmark

Debt affordability benchmark

Balanced budget benchmark

Essential services benchmark

Debt servicing benchmark

As these benchmarks aren't mentioned in Te Tāruke-ā-tāwhiri: Auckland's Climate Plan, I doubt they've been climate-checked. The Long Term Plan needs to have a:

Generational equity benchmark

Asset conservation benchmark

Climate readiness benchmark

Environmental stewardship benchmark

And probably several others.

Overhaul

We're struggling to find the money to maintain our assets and to modernise our city for two reasons.

First, Council is failing to use the tools they have for gaining revenue:

Auckland Council has a suite of tools available to meet these funding requirements, including:

- *Rating (both general and targeted)*
- *Growth charges, development contributions, and special purpose vehicles;*
- *Fees and charges for the services we provide; and*
- *Partnerships, for instance with central government or the private sector, working towards shared priorities.*

Second, we're continuing to sprawl, which makes everything harder to do and more expensive. The Long Term Plan is entirely ruined by three ["fault lines" preventing better policy in land use and transport planning](#):

a) continued and very large scale spending to produce increases in road capacity in many parts in and between towns;

b) continued allocation of scarce space to car parking in preference to other uses; and

c) continued encouragement of land use planning for patterns of activity which depend on car use for access.

The Long Term Plan is continuing the same business-as-usual practices that are keeping us locked in high carbon systems, denying us the revenue we should be harnessing and investing for our future.

It is not fit for purpose and needs to be completely rewritten from a climate and people perspective.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I agree with most of the proposed topics but I vehemently oppose wasting ratepayer's money on the supposed climate emergency as this is based on flawed modelling and is an absolute lie.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It is unnecessary spending ratepayer's money to respond to "climate change" which is nothing more than what has been happening over the Millennia.

The climate of the world is almost entirely influenced by the activity of the Sun of which mankind has no control.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: For the answer to this question, I answer it with a heavy and cautious attitude because I know that the answer to this question must be given a very correct answer by me. This is because I feel that I can not be sure that my answer will be correct. So I chose " other" as my answer.

I have learned from the documents you provide me here: there is very difficult one in choice making. The current situation is there is a need for 31 billion investment in next 10 years for Auckland city further development however due to the impact of the covid 19, at moment government's fiscal revenue is temporarily restricted, which it also limits the council ability to invest in Auckland city. Now the council proposes to use "the short - term borrowing" and "increasing the rates pay" to increase the income of the government's revenue to have a good ability invest in city in the next few years.

I mainly want to ask here is whether this is the best way out of no choice. If there are other choices, I still hope that this method should not be used as much as possible, but if there is no better solution under the choice, I will agree to this proposal.

For more point, I chose " other" as my answer because in your proposal you did not mention what is the loan rate of this short - term borrowing. I do not know anything about it, so I only can choose "other" as my answer.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Because the topic of climate change is closely related to our human life and development, we can not ignore this phenomenon, so we must take our responsibility from now on to protect the earth from the climate disaster.

I personally agree make this investment.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The lack of water resources and the pollution of water resources have increasingly become a serious problem on the earth. It is not the problem of Auckland city. We can not ignore this phenomenon.

A good supply of water and water quality can improve people's well - being and health in life. This is a very positive and meaningful thing, so I decided that we must do it.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I think this is a very good proposal, because I think this solution can not only reduce the cost of maintaining these famous traditional buildings, but at the same time it can also maintain and protect these traditional buildings to a certain extent.

This is a good idea that kills two birds with one stone.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Because I am not very familiar with this area, I chose the second option because I chose the one that is relatively low cost in target rate (\$153) , but I also know this option may not be the best option because the development of the city requires a certain amount of funds to shape its future.

I said above already, I chose this solution based on the viewpoint of low cost, not based on other aspects.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Upper Harbour Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why I am not very familiar with in this area, so I an not make a very correct decision. Regarding "the priorities" in the attachment, I feel I can not be sure of me. So I chose "Other" as my answer.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Regarding the government 's proposal to spend more money, on the quality of water resources, I very much agree with the government's proposal, because I think the quality of water is related to the health of NZ citizens, and NZ citizen's health is also related to the development of society.

so I am here to reiterate my great support for the water quality improveing investment proposal.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You have hundreds of staff paid over 100k. Have them all take a 5% (100-200), 10% (200-300) and 20% (300+) pay cut. It is ludicrous that inflation has run at <3% for every year the last 10 years yet my rates have nearly tripled in just over 10 years. Enough is enough - get a grip and start budgeting and paying like a business rather than a government!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Extensions, surcharges, etc. are all a have. You should be delivering your services within the huge revenue stream you get from us already. The mindset needs to change. Would you spend the \$ if it were YOUR \$? If not...don't. And my bet is that most of the stupid spending that Auckland Council does (latest I saw was a bunch of flags on Mt Eden - "love the maunga" - really, what s**t.)

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Depends - if they are not well used, sure. If they are well-used then no.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Super City was supposed to SAVE ratepayers. All it's done is cost us more and more. Inflation over 10y was <50%. Rates increases >100%. Council needs to get it internal spending under control and start slashing. Cut those 100K+ salaries by between 5% and 30% would be a bloody good start. Slash the "communications" spend. I'd also love to know how much is wasted on "consultants". If the Council was run like a private business it would actually deliver. At the moment all it does is spend more, deliver less, and tell us with glossy brochures how well it's done in a self-congratulatory orgasm of nonsense.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I've run that route. There's nearly nobody to catch these services. This is classic wastage. NOOOOOO.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: The euphemisms abound in this "plan", e.g. "social connectedness". What BS. Focus on delivering core infrastructure. There's >\$10m spend in this "plan". Stop. Spend NONE of it and reduce rates. You are leeches who never stop increasing spending of others' money. I'm sick and tired of it. Zero increases, with a maximum of CPI and a reduction target of getting back to per capita levels of 2010 should be the target. Get real and stop spending money like drunken sailors.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why Let businesses survive or die. That's business. Do your core shit, road and water job and leave the rest to private sector. You are forever adding cost to ratepayers. Stop.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The euphemisms abound in this "plan", e.g. "social connectedness". What BS. Focus on delivering core infrastructure. There's >\$10m spend in this "plan". Stop. Spend NONE of it and reduce rates. 10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Very hard to answer this question when you don't just provide a simple list of what services aren't delivered on the lower budget. Don't bury this in pages of waffle.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: This question doesn't tell me enough about the implications of the proposed change.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The Living Wage. The Living Wage is important to me and my household because it ensures that our lowest-paid workers and contracted workers are being paid a wage that enables them to be active citizens in our community. The Auckland Council plan is good, but the people who will be doing the hard work need to be valued and paid fairly. Auckland Council becoming an accredited employer is also important because it keeps the Council accountable to these workers who are doing the hard work.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland requires significant investment to meet the needs of Aucklanders. Not investing will impact on the quality of life going forward and will require greater investment in the future if not addressed now. This will become even more of an issue if the forecasted population growth is realised.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is probably the greatest issue that humanity faces and the need to mitigate the impact is critical. There needs to be a fundamental change on how we live and move about our city. Getting people out of cars and onto public transport or using other mobility options such as cycling will only happen if there is infrastructure in place to do it with ease and without inconvenience.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Ensuring that the quality of our waterways is good is important for the wellbeing of Aucklanders (safe swimming) as well as the marine life.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community Facilities need to meet the needs of Aucklanders. Investment in ensuring that there are adequate recreational facilities is essential for an improvement in both the physical and mental health of our communities. Inactivity has a greater impact on certain parts of our community than others. The benefits of investment into sports and recreation include:

- . better community engagement

- . better access to facilities for those Aucklanders who are disadvantaged or live in deprivation
- . a reduction in obesity
- . significant cost savings in healthcare
- . greater participation in physical activity

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: This does not have any impact on my household

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: Sports fields within the Albert-Eden area require significant funding to meet the the growing demand from a growing population. The proposed housing development at Unitec, the continued infilled housing and the numerous apartment developments in the area are going to put more pressure on fields that are already under pressure.

Considering our natural environment and supporting action against climate change are key initiatives

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I do not have any knowledge or concern with this

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

A compact growth strategy is preferable to an extension of the city's boundaries and greenfield developments.

There, however needs to be adequate infrastructure spend to for this.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Improvements are needed.

Too many people for the existing our network assets.

Real-estate has increased in value 20% in the last year so a one year rate increase of 5% is nothing.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is probably the number one issue needing to be addressed. If we and the world don't start to address this we will need more than 3.5 or 5% increases in rates to address this. NZ can lead by example.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Support in principle, although not in all your detail. e.g. it's not a one-off increase if the rates don't return to the cost if the increase wasn't 5% and future increases will be on top of the new base. A one-off levy would be more honest and transparent.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support the one time 5% rate increase. However, I think the rate increase should be proportional to the median income of the neighbourhood. The council seems desperate for revenue due to the Covid-19 impacts. I believe that a modest progressive rate increase based on average house prices or median income will give the council more money.

Further, the proposed transport goals of electrifying the bus fleet at an earlier rate are good and welcome - but they should be secondary to the mass participation in public transport.

To me that means that the council must do everything it can to reduce public transport ticket prices for the public, and maintain/increase the fuel tax in order to improve the public transport options. I believe that getting cars off the road is of greater importance than purely just electrifying the fleet.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: We HAVE to go hard and go early on climate change. This is not a university assignment we can leave to the last minute.-----For me that means that we need targeted, massive action now. Capital can be raised by increasing taxation on those with the means to support it and increasing the debt ceiling. We can't wait for future technologies to save us, because changing the very way we live and view wealth is going to take time.-----I would like the council to be a lot bolder on its actions on climate change. I want the greatest action possible to be undertaken - therefore I support the proposed alternative one (the larger investment package)-----I very much support the focus of changing behaviour as written in the supporting documents. However, a lot of support is required to ALLOW people to do that. Someone who is struggling financially and has a family cannot realistically make significant changes to their lives and behaviours. For example, to take the bus over a car is difficult if a) the car is significantly faster so they can spend more time with their family b) driving and taking the bus are roughly the same price (or public transport is more expensive).-----I support all of the focuses layed out in section 1.0 of the 10 year budget supporting information, especially circularising the economy and reducing waste. Not all plastic packaging can be eliminated (e.g. medical/sterile application) but waste management needs to be improved as well as longer service life from all household appliances (right of repair rules etc.)----- Further, the proposed transport goals of electrifying the bus fleet at an earlier rate are good and welcome - but they should be secondary to the mass participation in public transport. To me that means that the council must do everything it can to reduce public transport ticket prices for the public, and maintain/increase the fuel tax in order to improve the public transport options. I believe that getting cars off the road is of greater importance than purely just electrifying the fleet.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: During recent heavy rainfalls many of Aucklands beaches were deemed unsafe to swim in. This is not acceptable.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Make it sustainable! Mutli-use spaces make sense.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

There are two other important issues for me that I would like to comment on.

1) Democratic participation.

The council must continue to improve the way that it seeks feedback from Aucklanders. I believe that we need to move towards a participatory democracy model similar to Porto Alegre. Participation must be sought from the earliest stages of the decision making process, not right at the end. I believe people are capable and willing to step up and contribute a lot more to their local neighbourhood and city if they are shown that they have the power to make meaningful change.

2) Housing.

Obviously this is a major issue for Auckland. Although important work is being undertaken on the supply side (e.g. Northcote development). I think a few separate models of housing need to be explored. 20 self contained apartments will likely have 20 washing machines, driers, dishwashers etc. Although I am aware this is not desirable for all people (but they have plenty of other places to go) - from my perspective a better model, and one I've been living for 5 years now, is to live a lot more communally. That means that those 20 apartments may have their own private sleeping quarters, entertainment area - but the building is furnished with large, fit for purpose, communal areas for cooking, cleaning and washing. This builds community and is a much more efficient use of resources. I believe these sorts of arrangements should be built for state housing and encouraged by local investors by the council.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support the proposed increased investment, but do not believe it does enough. I would advocate for even more additional investment into combating climate change and making Auckland a sustainable city to live in.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Fixing water quality is an issue hugely important to Aucklanders and our way of life. Improving water quality will have long-term benefits to everyone who lives here and comes to visit.

In addition to the focus on quality, there also needs to be investment and focus into our issue of supply so that we are able to adapt to future drought conditions.

Research needs to be conducted into using treated (but non-drinkable) water for watering our sports fields and green spaces, freeing up clean water for consumption.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support with the proviso that this is done logically and with consideration as to what is truly beneficial to our communities.

Certain community facilities are needed and increased investment into them would be welcomed.

Libraries play a hugely important role not only in providing access to reading materials but also in providing a work area for those who don't have it at home.

Similarly, sports clubs (clubrooms, other facilities) are vital bricks and mortar physical assets which we simply could not do without and need additional investment. Sports clubs play a huge role in bringing people together and promoting physical activity. The recent impacts of Covid have also highlighted the positive role sports play for peoples mental well-being.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I would like to see targeted investment (city-wide, but at minimum from Local Board) into providing a community facility for food waste / composting - there is evidence of this working overseas with common drop-off points for rubbish, recycling and food scraps. If we are serious about making Auckland a great place to live with a lower environmental impact, then Council needs to lead the way on addressing food waste and this is a simple, practical way that we can start.

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The accommodation provider targeted rate was ridiculous - the implementation was terrible and it unfairly penalised some people.

And why should it be used to fund events? Guests stay for many reasons, and events often don't feature. Work, family visits, private functions, general tourism are more likely. When there are events, Airbnb is needed to cope with the demand for accommodation, not disincentivised.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Locally driven, smaller projects are less risk and are more likely to succeed.

Improving cycling and walking is my main interest.

Like the idea of the town square but if the implementation looks like Newmarket Station then that will be a second travesty.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Local initiatives using the skills and knowledge of the people living in those neighbourhoods.

Transport - more and safer cycleways that actually connect with neighbourhoods. Get cars off the road with more park and ride available in the outer suburbs, more frequent services will get people more inclined to use public transport.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: As long as rates rebates are available and fair, those of us who live here should pay more. Rates were too low for far too long - lower than in smaller towns with far fewer amenities than Auckland offers. I also think AC needs to borrow more if it can, and get stuff done!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We have to get on with it!

BUT the proposals in ATAP are not going nearly fast enough for alternative transport systems. There's been such slow progress on cycle paths! Why on earth, when other cities we admire around the world are going so much faster? This is not only a solution to climate change needs but also benefits health, and reduces congestion.

Please do cycle paths that are away from roads wherever possible- the Waterview Shared Path is such a treat after teetering along in the skinny lane on Mt Albert Rd. Or worse, being terrified on Balmoral Road.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community buildings need to be close to feel like they are really ours. Selling off buildings like Sandringham Community Centre would be a thoroughly retrograde step. We need community spaces to meet in and best of all to run ourselves, under the CLD model, like the Gribblehirst Community Hub.

Using the Hub as the example: why not partner with the community to access participation by DIA in renovating community buildings? Gribblehirst has facilitated \$200,000 of DIA funding into upgrading its building. But a far more flexible approach is required from Council in working with communities under such arrangements. Some community groups would require far more close guidance than we did, and this should be available.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why: I support the priorities as listed, but:

- An upgrade to Sandringham Village has been budgeted for over a decade - but where is it? Sandringham Village is booming... but its footpaths are still a mess - still no greenery - no litter project - no artworks - no traffic management - no open streets. The Local Board commissioned the community's Vision Report so long ago now, and NOTHING except faffing around.

- there's nothing in here about promoting the arts in Albert-Eden. Will the funding stay with the arts brokers? This is such an effective way of promoting local arts initiatives.

- there's no mention of supporting community facilities. Support for community groups is admirable but groups need places to meet.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Makes sense, as long as the expanded area is now in agreement.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I am strongly in support of urban intensification. AC needs to use its urban design panels wherever possible to ensure quality development.

I urge AC to borrow to the max and develop as much infrastructure as it possibly can. Waiting never makes anything cheaper and we are so behind through unwillingness to do stuff. Auckland aspires to being a great city but great cities have complete cycle networks and light rail. Where are Auckland's?

Management of CCOs: AT has been inflexible and slow delivering walking and cycling infrastructure. Let's ensure that new systems make it possible for AC to demand action on these.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: balanced approach

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I believe action to reduce climate change is desperately urgent

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: this is something everyone wants. Swimming will be important as temperatures rise

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: particularly libraries

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: do not know that area

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: all proposals seem useful

I trust the work the community board does

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

more housing, public transport and climate change are my priorities

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: climate change is the biggest existential threat to this civilisation, and the sooner substantial action is taken the more effective it is.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: multi-use facilities are probably a good idea but leasing seems to me a more expensive option that just defers most of the cost to the future. If a private entity can make a profit leasing a building to the council while maintaining it, surely the council could own and maintain the same property to the same level for less cost?

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Rich people should pay more, both because they can and because they have benefited more.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I don't watch or play sports so more sports fields are not a personal priority, but if it can be demonstrated that sports fields facilitate community-building and improve health without encouraging tribalism, unhealthy drinking habits, and increased car use, I guess I support them. I think the Chamberlain Park Golf course should become a public park and/or residences if geologically suitable.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Living wage for all council workers and contractors. No new or widened roads, to discourage car use. Improved footpaths, cycleways and green spaces. Focus building planning around public transport corridors. Build up not out. Forget about tourism except that which sustainably supports conservation and education. No interest in the America's Cup.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I do not support increasing rates at a time when many are struggling financially.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support these initiatives, but without increasing rates. Savings should be made in other areas e.g. reducing the council workforce (which has doubled since the formation of the super city council) and reducing the ridiculously high remuneration packages for many senior council employees.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Investment in water quality is important but should be paid for by redirecting current spending.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Why can't we put the cable underground?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why: Did the report talk about CUTTING COST? We need to monitor how money is spent. We need to control the crazy salary inside the Auckland Council. If the Council fails to deliver, who will be responsible? How would they take responsibility? More transparency, more accountability. Please make use of all the taxes collected. Why tax is the only solution? Why the Council NOT cutting cost or making profitable events/business to be more self-sufficient???

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Council is working too slow and too poor. e.g., the public transport system is a joke. Only a few train lines and bus lines DO NOT make you an international or world-class city. People need to have sufficient access to public transport. Current terrace houses normally only have one carpark, which is a joke to any family. Do you really think a working couple only need one car? Do you think your public transport system is able to connect everyone? NO. So please consider how the basic infrastructure can accommodate the development of the city.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Increasing the Rates will inevitably increase the rent and property prices. It will make the house prices more unaffordable. Council income should be increases through other methods, for example, by encouraging the unemployed to work, and by increasing working opportunities and etc.. 增加地稅会变相提高房租和房价。使本来难以负担的房价更加雪上加霜。应当通过其他方法增加政府收入。比如鼓励失业人员就业。增加创业机会。等等。

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It is important to use clean energy. But the electricity cost should be lowered too. Charging facilities should be boosted. coal-fired power should be reduce. 使用清洁能源很重要。但是应该相应降低电费。增加充电装置。并且减少火力发电。

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: The existing trees and forests in Auckland are enough. I don't think it is necessary to increase the planting. One more important thing is to deal with the old landfill site exposure problem near seashores caused by big storms.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Please consider more Public-Private Partnership on community projects, which could reduce the financial pressure of Auckland Council. Private sectors can also benefit from supporting public sector's investment.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Not taking or spending enough. Should have higher rates and higher expenditure.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Cleaner air is always nice, more trees are also better.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Should be a larger increase, isn't really acceptable for a city like ours to have raw sewage going into the sea at all.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Sounds like cutting facilities and services. Should spend more to help, and increase rates to pay for the spend. A growing city shouldn't be cutting facilities, only adding.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Re the Vector rate, should be doubled, and the other 10.5 million spent on additional undergrounding of powerlines. More resilient powerlines, less need for tree maintenance, so allows more trees, and increases the value of nearby properties.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Not convinced on the golf course thing, should be adding to green space.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Better PT, better infrastructure, more rates so things don't get cut, just added. Plus add extra rates to greenfields places so they pay a greater proportion of costs.

The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I think the Avondale Waterview and Point Chevalier Communities should have a coastal boardwalk completing the connection from Eric Armishaw Reserve in Point Chevalier to Holly Street in Avondale. This would be of benefit to all 3 communities. Kainga Ora is intensively developing their housing stock in all 3 of these communities, more so than elsewhere within the local board area and there should be an increase in community facilities and amenity to match the increase in population.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

that the Council shows leadership on Climate Change and water quality

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: No problem with the rates increase but it is unwise to borrow more money. The more you borrow the more you have to pay back and that will result in further rates increases.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Converting the bus fleet to electric will increase green house gases. Any increase in Auckland's electricity usage comes from Huntley power station which runs on imported coal. These coal imports exceeded 1.1 million tons last year. When analyzing green house gas emissions you need to concentrate on the big picture.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Auckland's sewage pipes need upgrading and/or replacing as they have been neglected for too long. Clean, safe beaches are a huge asset.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Could be a good idea but I have no strong leaning on this proposal.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: As with most bus services it is unlikely that enough passengers will use the service to make it worthwhile.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I think the community spend of \$11.2 million is too high. Some of the proposed activities such as the Mt Albert square should be cancelled.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The councils priority should be the maintenance and upgrade of existing essential services. If there are insufficient funds for maintaining what we already have then it's ridiculous to borrow money and invest in new nice to have facilities.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: It is still TOO TIMID and TOO CONSERVATIVE, especially in regard to climate change (and public transport). Sure the Council has suffered because of Covid19, but the general economy remains resilient (in large part due to our "go early/go hard approach on Covid19) and interest rates are low.

I would support (a) a greater rate increase and for longer (yes, I am a ratepayer), (b) even greater borrowing than that proposed, and (c) more ingenuity on thinking up more targeted rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Again, too timid and too conservative. The Council has declared a climate change emergency and yet the plan talks about having 10 years to achieve change -- what rubbish. We are given the analogy of the time it takes to turn an oil tanker but that seems to be used as an excuse for delay, rather than the need to get on with it as hard as we can go.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: I would be surprised if there are not significant fishhooks in this approach. Need to know a lot more, with specific examples.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Generally support. Again I support a greater and longer increase in the general rate.

However, I strongly oppose an further readjustment between business and residential rates. I have yet to see the justification for this and, at the very least, it should be put on hold during any "extra" increase in the general rate.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: Especially, please get on with funding (a) the realignment of Chamberlain Park golf course and (b) the aquatic centre. NB. I support Rocket Park/Mt Albert War Memorial Reserve as the site for the later (including because of its proximity to Baldwin Station).

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support the overall thrust of the budget but believe that you could raise money by selling off assets such as the Ports of Auckland.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change will be an increasingly important feature of our future, we need to invest now to mitigate the harmful impacts.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is essential to our future, we need to invest to improve it now.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I don't agree with reducing facilities such as libraries, they are a vital component of community life. Not all of us want a digital future so I am not in support of increased on-line services. I would be more than happy to pay extra rates to maintain our community libraries. I accept that some facilities could become multi-purpose and this would allow greater utilisation of these facilities but I do not want to see library services reduced.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I am generally supportive of the overall rating policy. I would be happy to pay more rates if services e.g. libraries can be maintained.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I would probably support a targeted rate if I lived there.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Generally the A/E Local Board does a good job for our community. I would like more clarity on support for community facilities such as libraries and parks. There is no information on the future of Mt Albert Library which is under threat by expansion of the St Luke's shopping centre. Also no word on the future of the Mt Albert Swimming Pool. I would support Chamberlain Park remaining as an 18 hole golf course.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I have already indicated that my top priority is retention of community facilities such as libraries, parks, swimming pools etc. I am more than happy to pay increased rates to maintain these.

In terms of strategic assets, I support relocating the Ports of Auckland to Whangarei/Tauranga and developing the vacated area for housing and public spaces.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The key is not to take money from the properties' owners, the key to get the economic reviving shall be providing encouragement to business owners, let them to earn more money and pay more tax, therefore, the government can get funding. Take rates from properties owners will only pushing up the rent and make people 's living more harder.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change shall be the second priority to the country, this is not urgent, the investment shall be steady, rather than increase as the economic reviving is underway.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Water quality is affecting the live of the people. But again, as the economic reviving is underway, this shall be second priority as climate change.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Again, when economic revived, the investment shall take off.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do not support increasing the rates of the property. Council should think about other ways to encourage business owners to do more business, rather than charging the land owners.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Either way is unfair and arbitrary.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Business owners needs to get more chances to do business and have surports from other owners.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Council needs to continue investing in core services and resist any moves towards an austerity mindset. It's essential we invest in our communities.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is the best option I can choose but I also believe this level of spending will not be sufficient to achieve our vision of a zero carbon economy. I would prefer to have the option to endorse the alternative investment package of \$320 million which would as the document says "significantly accelerate our climate action work in some key areas". We're in a climate crisis - we need to respond like it is just that, a crisis.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: There's a pressing need for investment in the Waitemata and Manukau Harbours - the health of both has been significantly declining for over a century. We need to support the biodiversity of awa and moana, it's absolutely critical to ensuring these spaces flourish and to secure our own futures too.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I support this proposal and believe that Local Boards are well placed to make the final call about facilities in their area and what support is required.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I thoroughly support removing library late return fines. I have had a career in libraries and a postgrad qualification in Information Studies (librarianship), and have seen first hand how fines are a huge deterrent to people wishing to access the library. There's a significant body of research to support removing fines from library books - the benefits to the community far, far outweigh the revenue generated from fines. Libraries are at the heart of our communities and removing the barriers to access them, especially for at-risk and marginalised peoples, is incredibly important. If 35,000 library members a year are not using library services because they owe more than \$10 in fines, that's a huge number of people missing out on a core service and the myriad positive benefits including educational, mental health, sense of belonging, access to the internet, etc. It also means children may be missing out if their parents are too embarrassed to go to the library/see the cost as a barrier, and given how important those early years are in creating a love of reading and accumulating knowledge and connecting with others, we need to change this. Remove library late return fines now, please. :)

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The Council responding to climate change with urgency is my number one priority. We need to support people to use more active and public transport, with better cycling infrastructure and improved walkability of our streets. We need to restore the health of our Hauraki Gulf, harbours and other waterways. We need to have tree canopy cover and green space protected in our urban environments. We need to follow the lead of Mana Whenua as kaitiaki and ensure our environment thrives. We need to ensure local communities are involved in Council decision-making, really importantly those vulnerable communities who are often overlooked.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I think this is a major priority but I also think that a variety of trees should be considered for native plantings in order to reduce pollen

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It is vital to protect our water quality

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I think there is benefit to owning the buildings community services are provided through. I also worry that multi use spaces often have too many compromises of utility in order to accommodate competing interests

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support a 5.9% one-off rates increase for 2021/2022 (rather than the proposed 5% increase) to ensure the \$320 million climate budget can be progressed. I also think Council should introduce parking levies (ring-fenced for public transport investment) and congestion charging to help fund our climate response.

I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support further funding beyond the proposed investment. I want "Option 2: More significantly accelerate Auckland Council's climate action". This will put \$320 million rather than \$150 million towards climate initiatives so that we can achieve a 100% zero emissions bus fleet by 2030 (rather than 50%), further investing in Māori-led climate change action, more than doubling our street tree planting programme to 29,000 in total, address coastal erosion faster and more.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The most important thing for me is our climate change objectives. I want the goals set up by the council and the government to be achieved, I would like Auckland transport to build the bike lane they promised already a few years ago. Stop running for the responsibilities and objectives you set up yourself, stop prioritizing cars, and start the change. This budget does not dedicate enough money for it, analysts and journalist have already made the calculation, with this current plan we won't meet our objectives. I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Investment in infrastructure is essential, but it needs to be prioritised to support essential infrastructure (water) and to enable growth in affordable housing (including the Dom Rd Tramway & Kumeu bypass). Postpone non essential bike lanes and new playgrounds.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Focus investment where there is a business case such as electric buses rather than in greenwashing projects like native tree planting.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water are too low, and should be graduated so that high water users pay more and low water users pay less - reduce the base fee and increase the variable rate, with an extra/penalty rate for household of business usage over in the top quartile.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: there are already too many underutilized trophy buildings - it should be about providing services not buildings.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Lifestyle properties are a lifestyle choice for those with good incomes or assets. Most of these people can afford to pay more rates and should because they are also putting a heavier burden on the motorway network by choosing to live in more remote areas.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Should be a decision for the local community to make, not the whole of Auckland. Having said that, I suspect most of the people in the area have multiple cars in each household, and would prefer abundant, safe and free parking at the nearest current bus stop. - maybe supported with a community car pooling scheme.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Money needs to be prioritised for essential long term infrastructure rather than pet projects like Chamberlain park or town centres. I doubt whether most locals would support this level of budget if it was a targeted rate.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why Can't see any information about what this is.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Absolutely support the focus on infrastructure and strategic assets. Beyond what is planned, I would also like to see...

- 1) The Dom Rd tramway to Roskill South (but please keep it simple with stations only at existing wider sections (like next to Mt Eden Hall), and no parking at pinch points (like Balmoral shops) so that it can be done with minimal disruption and investment - NO Monorail)
- 2) Better connections from Neilson St to the motorway at Onehunga
- 3) Bypass at Kumeu and/or motorway extension past Kumeu

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Parking needs to be sorted. People now park on berms and so close the driveways that people are struggling to get in and out of their houses safely. This needs to be actively patrolled and ticketed.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

The population of Auckland is set to grow, while new dwellings are designed to become more compact. This suggests that 'community assets' (or public spaces) will become more important for future residents. Such spaces provide residents with a sense of community and contribute to their sense of well-being.

The idea of having physical community hubs adjacent to public transport deserves further exploration, especially as we seek to revitalise local town centres, support local businesses and reduce our own carbon footprint.

There is a suggestion (p.251), however, that library books could be substituted with greater access to digital information. As Allison Dobbie noted around the time of her retirement, the role of libraries has never been more important as it is now, in supporting BOTH literacy and digital skills and allowing all citizens to participate in democracy.

As suggested (p.529-30) the removal of late return fines may encourage wider community use of libraries. Worth considering!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why: While I fully support the local board's concern over playing fields and the revitalisation of the town centre, there are two further issues that should be taken into consideration:

1. The provision of parks/open space for children to play, without necessarily taking away other amenities such as the existing public golf course at Chamberlain Park, which in itself is likely to become increasingly popular as the population grows and existing golf clubs sell off their assets and raise the cost of membership.
2. The Board mentions the creation of a 'Civic Square' at the entrance to the Mt Albert railway station, but fails to mention any future plans for Mt Albert library when Westfield St Luke's proposed redevelopment goes ahead.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Avoid austerity measures and continue long-term investment.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Would like to see further investment than what is outlined here.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland is becoming a very expensive place to live, reduce unnecessary expenditure and concentrate on such items as water and sewage and transport, forget cycle ways as they seem to be seldom used, and reduce holdings in assets such as ports etc. also reduce no of council flats as we have a government department that provides state housing, and there is no need for any increase in wages at higher levels within the council.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: First show that our actions are the cause, I have yet to see any figures showing increase in co2 levels and nowhere has anyone measured a rising sea level. By the way the pacific islands that have been mentioned are all coral atolls.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Let us see what the future will bring before committing Aucklanders to even more costs

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Sounds like better use of existing facilities

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is critical to continue investing into Auckland. However, I recommend that the general rate increase to 5% should be permanent, not one-off, such that Auckland rates are closer to comparable cities elsewhere. Also, as emergency measures, I recommend that Auckland Council use additional measures such as shared land value uplift, car park levies, and bringing forward proposals for congestion charging.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support the increased investment. However, I believe that the scale of investment is inadequate, and moreover the isolation of climate change as a "key issue" is the wrong approach. At this stage of the low-emission transition, which is rapidly accelerating around the world, the entire LTP should have a climate change lens, which excludes investments that prolong or induce fossil fuel usage (such as roading expansions like Mill Road) and accelerate low-emissions alternatives, especially the provision of safe cycling infrastructure for e-bikes and other forms of micromobility. CCOs should be required to provide such infrastructure at low cost at great haste.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The targeted rate should be leveraged to create a blue bond, which enables impact-oriented investors to supply the capital to undertake water quality projects with greater haste, using the targeted rate as a repayment.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I would like to see far greater urgency around climate change issues, especially the provision of safe cycleways throughout the area. AT should be providing these with urgency, even through cheaper temporary structures if need be.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

- I support Auckland Council in pursuing all efforts to diversify its revenue, such as capital gains uplift, car park levies, and congestion charging.

- I support all efforts to prioritise urban densification, including in the Albert-Eden Local Board where I reside.

- I strongly support Auckland Council to treat the issue of providing safe and sensible infrastructure for e-bikes, e-scooters, bicycles and other forms of micromobility as an urgent priority. No roading upgrade should be permitted that

does not include the incorporation of such infrastructure, even if this comes at the expense of street parking. Street parking on main roads like Dominion Road, Sandringham Road and Mt Eden Road should be replaced with protected lanes immediately, even if this requires lower cost infrastructure as a temporary compromise.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The rate increases are very high and should be limited to less than 5%. Money should be used from other places. It is a significant increase for people who are already stretched with Covid and other expenses.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Support if the investment is worthwhile

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Rates are too high, Should be funded by another source. Need clean water,

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: its is necessary

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Though this is a good start an even larger focus needs to be had on climate action. Council did not include all options in this consultation that were provided by officers and these should have been on the table. More climate action now means less costs for Aucklanders and our environment in the future.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Legislate to protect mature trees. Do not sell public open space. Limit area of property allowed to be paved. We need planted earth that can absorb rainwater runoff (and breathe). Promote water storage tanks. Encourage (low) planting of berms. Develop Dome Valley as a dam not as polluting landfill.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: See comments in previous question. And fix leaks promptly!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Need better facilities for kids in less advantaged areas - parks, play areas, libraries.

Streamline council staffing: too many managers on far too high pay. Implement efficiencies. Do not cut service workers' jobs. Pay Living Wage as minimum. Do Not cut library services or positions. Library investment is high value.

Support cultural activities and informal sport opportunities..

Increase public toilet availability and improve its servicing. Also install public water fountains.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

You do not ask about (1) future harbour crossing: for now direct heavy traffic round improved upper harbour roaming. (2) selling assets such as airport: currently don't. (3) moving the port: currently no - it's Auckland's original reason for being here and still of major importance - but do stop the car imports through here, now.

Also re city centre:

It caters to upmarket. Old Downtown had range and life, the replacement doesn't. Queen Street needs interspersed showcase spaces replacing empty shops. Book short term promotions, a variety of eg. regional tourism initiatives, upcoming events, cultural, educational, community or industry promotions, mini expos of new goods and services. Something to interest everyone, not just expensive brand name designer goods. Wouldn't you like to see a city garden shop in Queen Street?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I would prefer you spend more and meet our carbon emission reduction targets. It's not bold enough.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: But you need to reduce the amount of driving through parking restrictions and traffic restrictions.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Clean water at our beaches and in our streams is a priority.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: In order to reduce travel people need more services they can walk to.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Support but make rates increase permanent. Also, as emergency measures, I recommend that Auckland Council use additional measures such as shared land value uplift, car park levies, and bringing forward proposals for congestion charging.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support the increased investment. However, I believe that the scale of investment is inadequate, and moreover the isolation of climate change as a "key issue" is the wrong approach. The entire LTP should have a climate change lens, which excludes investments that prolong or induce fossil fuel usage (such as roading expansions like Mill Road) and accelerate low-emissions alternatives, especially the provision of safe cycling infrastructure for e-bikes and other forms of micromobility. CCOs should be required to provide such infrastructure at low cost at great haste.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: *I have some reservations about some of the proposals that have been made under this budget.

*I am concerned about what constitutes surplus property and some

aspects of expenditure eg overpaid managers - something the Mayor Goff had pledged to address - and decisions that some of these managers have initiated eg the move of council premises and the excessive amount spent on the new building.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: *The number of people cycling is encouraging to see, but I think it will

reach a peak as not all people want to cycle in all weathers or have provision for showers etc once they reach their workplace.

*Cycle lanes often restrict access for motor vehicles resulting in traffic congestion - cars idling for longer and increased emissions.

*Bus routes need to be expanded to be more accessible - perhaps even some smaller vans/buses.

*I support the idea of replacing diesel buses with electric.

*Planting more trees is crucial, but so is the protection of existing trees.

I am extremely disappointed about the recent destruction of trees that had protected status eg Canal Road and the proposal to remove exotic species from areas such as Mt Albert. Just as we value diversity in our population so should we value diversity in the plant species that surround us.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: * I absolutely do not support the reduction of community assets. It is

imperative that libraries, community facilities, parks etc are retained and maintained. I am opposed to the idea of closing any of these facilities. The idea of delivering community services online is definitely not promoting the real meaning of community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I am unsure about why the council is having to fund a tree management programme around overhead power lines. I understood that Vector was supposed to be undergrounding these - years ago!

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why: *I support some priorities.

*I consider that some projects - like the Civic Square and the Chamberlain Golf Course - while nice to have, could be delayed.

*If the Albert/Eden Ngahere (Forest) Project is the one that proposes to remove all exotic trees from the maunga I am opposed to it as, while increasing the planting of native trees is to be encouraged, so is the diversity of the plant species.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

*The problem of 'ghost houses' needs to be addressed.

*Increased water storage is a priority. I have seen it suggested that the Dome Valley site that is being considered as a dump site could be considered as for water storage. Even if this is not possible I am opposed to it being used for landfill.

* Some major expenditure on 'nice to have' projects, such as cycle lanes over the Harbour Bridge, should be shelved for now.

*The extension of rail lines from Onehunga to the airport rather than light rail along Dominion Road which would bring further congestion.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why: How environmentally valuable are electric vehicles? I understand there are poisons liable to provide problems for the environment from the batteries. Also, the overuse of packaging is a major problem for landfill. Is there any requirement for suppliers to take responsibility i.e. return to sender or prohibit use?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why: It appears there are many polluted water-ways in Auckland (e.g. Cox's Creek in Westmere and also Meola Reef and inlet). These have been neglected for decades. What's happening?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: My local community centre is very well utilised and seems to be constantly busy. The Grey Lynn/Ponsonby Citizen's Advice Bureau uses 3 rooms in the centre for telephone and face to face interviewing and provision to the public of necessary information to assist in the understanding of local and central government rules and regulations. Justice of the Peace services are also provided along with Budget advice, counselling and legal services. This service is crucial to a large proportion of the public.

The requirement for communications and services to be carried out 'online', is obstructive and discriminatory. A large proportion of society can not afford the technology; prefer to conduct their business face to face in discussion with actual people or prefer writing cheques or letters to conduct their personal affairs. Using these traditional methods should be the choice and right of all citizens.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?

Tell us why I understand funding is under consideration for a number of possible Council projects including the Leys Institute.

This building and the Gymnasium have been the focal hub for the Ponsonby community for decades. Following its closure the area has declined-many shops in the adjacent mall have closed lacking the foot traffic attracted by the institute. Many locals used the library to meet and socialise, to use the computers in cases where they did not own one themselves creating an harmonious nurturing environment for all to enjoy.

This important amenity needs to reopen as soon as possible and should be given top priority for this round of funding

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Whatever has to be done, must be done. Climate change is the most important issue facing the planet. Auckland must do all it can.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This "new approach" is nothing other than a neo-liberal cop out. It will NOT serve to maintain community facilities. Community services being at the mercy of private owners is NOT acceptable. Don't dress it up as something other than that. Owning and maintaining publicly owned facilities must be budgeted for even if it means increased rates over time.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I am concerned that 'extending the urban rating area' might mean such areas are currently 'rural' and this could be ignoring the problem of resource consents being given for land that is possibly rural/agricultural so therefore encouraging productive land disappearing.

Rodney area ratepayers should be consulted about the targeted rate for stormwater drainage.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: These options should be put to the rate payers in that area

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I do not understand what the word realign means. "Advocate to the Governing Body for funding to realign the Chamberlain Park 18-hole golf course, to develop a new park, walking and cycling connections and stream restoration. " If it means eliminating or reducing the current PUBLIC golf course open to all, I do not support it.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I see in the supporting information that the Local Board planned to send out a questionnaire to the Business peoples involved and so this indicates it's only they who are considered as 'stakeholders'. The information supplied doesn't give any detail about the area. It seems on the surface that it's a means of increasing the budget which the businesses themselves will vote on.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I would not support light rail down Dominion Road. It is not mentioned as far as I can delve in the material supplied but if the Labour Govt announces it shortly, I have no doubt the Mayor will support it and the Local Board will have no say in it. Dominion Road is far too narrow for such a system. Putting Electric buses into the fleet to carry on expansion of the current services along Dominion Road is what I would support.

It is very important to me that the Council Controlled Organisations are targeted further for their uncontrolled modus operandi and ratepayers get feedback on the reduction of the very high salaries within the 'top echelons'. Rodney area ratepayers should be consulted about the targeted rate for stormwater drainage.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I am also concerned that there has been mismanagement of finances by the Council, and acting not to the best interest of the rate payers. e.g. much of the rate rises could be avoided by council participated with the Auckland Airport capital raise, which was offered a heavy discount to the traded share prices at the time, and such capital raise could be anticipated and Council could have worked with reserve bank to coordinate quantitative easing, targeted council bonds to lower borrowing interest required to support the capital raise, given it was literally free money available.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: makes little difference from a worldwide view point. do what is feasible/ sensible to ensure sustainability

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Needs better access and build more reservoir as opposed to relying on Waitato river. also consider better use of salt water for flushing toilets, (and build appropriate infrastructure.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: selling assets are generally results in higher costs, and loss of capital gain, same case of Auckland Airport, concerned that ownership level has fallen over time.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I propose reduction in rates.

I am also concerned that there has been mismanagement of finances by the Council, and acting not to the best interest of the rate payers. e.g. much of the rate rises could be avoided by council participated with the Auckland Airport capital raise, which was offered a heavy discount to the traded share prices at the time, and such capital raise could be anticipated and Council could have worked with reserve bank to coordinate quantitative easing, targeted council bonds to lower borrowing interest required to support the capital raise, given it was literally free money available.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: does not affect me, may be best to take a user pays approach.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: I do not support the following, as they are not good use of rate payers money.

do not support volunteer groups and initiatives that encourage social connectedness and strong communities, recognising the impacts of COVID-19 and changes brought about by urban development

Do not provide additional protection our natural environment by supporting projects like the Albert-Eden Urban Ngahere (Forest) Project and restoration of the biodiversity of our rock forests, urban streams and coast

ensure a range of programmes, tailored to serve the needs of our local, diverse population, are delivered at our community facilities, libraries and recreation centres

consider climate change impacts in our decisions and projects, and support education, awareness raising and action

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Having a collective and coordinated approach seems sensible.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I am also concerned that there has been mismanagement of finances by the Council, and acting not to the best interest of the rate payers. e.g. much of the rate rises could be avoided by council participated with the Auckland Airport capital raise, which was offered a heavy discount to the traded share prices at the time, and such capital raise could be anticipated and Council could have worked with reserve bank to coordinate quantitative easing, targeted council bonds to lower borrowing interest required to support the capital raise, given it was literally free money available.

Needs better management of strategic assets.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Marine reserves in the Hauraki gulf should be part of the plan.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Transport is the most significant contributor to carbon emissions. We have a huge opportunity to reduce emissions by changing the way people get around. The proposal does nothing to address this opportunity. We should be much more to get people out of cars and into alternative options such as electric trains and buses, bikes, e-bikes, scooters, walking.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to keep moving forward with the goals we have set ourselves previously (climate change, water quality, environmental) while also recognising the need for infrastructure upgrades and support for new housing/developments to address the housing crisis. What is proposed provides for all of these things, balancing as best as possible.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support any move that brings forward our carbon reduction targets. I would also support more investment in this space to make it happen faster. This is key to our city being a great place to live.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality in Auckland has been allowed to degrade due to no investment in infrastructure upgrades as the city has grown. For us to have healthy harbours and streams, and therefore swimmable beaches and happy communities, we need to have investment in improvements. I would like to see more accountability for where the money is going as it seems like a lot of people (consultants) have their fingers in the pie (which increases costs to ratepayers without as much demonstrable benefit).

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: This seems like a sensible approach, particularly considering that some of these facilities stand empty for much of the time. I would also encourage more advertising/awareness raising to let the public know that these facilities exist and can be used. This would generate more interest/open up to more users and aid in the cost reduction.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I would like to comment on the Natural Environment Targeted Rate. The remit of this targeted rate is quite narrow and it would be beneficial to widen its reach to address more - recognising the limited funds available but there is a wider range of environmental issues that could benefit from additional investment.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I do not live in this area and don't think I should comment.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: I support these priorities as they recognise a balance between community need and environmental need. I would encourage more funding into the environmental priorities, particularly where these can be supported by volunteer groups/hours to get more bang for buck.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why I understand the desire to increase funding from this area, however I would also want to see targeted benefits back to the community and the businesses from this. Key would be changes to parking along Dominion Road, to enable better public transport travel and to reduce the amount of traffic travelling past businesses. Taking some of the cars off the road/reducing congestion along Dominion Road will make it a more pleasant place to eat and enjoy.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing and growth infrastructure - It is imperative that new greenfield development areas have sufficient infrastructure to future proof development in these areas. Similarly, brownfields developments need to be well thought out to ensure that existing infrastructure can cope with the intensification - one corner property being turned into apartment blocks or townhouses will contribute to increased housing supply, but may also impact infrastructure. Council may need to support this to meet the increasing demand for houses (but should not be the only source of that funding - developers must pay their share).

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Two reasons:

1. The climate response is nowhere near the start of what would be appropriate. Your investment seems to focus on those aspects the Council manages (water, internal vehicles), while the need comes from the transport people use (cars) and dairy. Your budget and action NEED to address modal shift in a serious way, making walking, public transport and

cycling true modes of choice (as demanded by the Auckland Plan), and needs to help agriculture transition away from animal farming and towards crops for human consumption and restoration of the native bush.

2. Growth and transport. You speak about the difficulty of providing "new infrastructure" - this is not the way to go. Auckland needs to be intensified around the existing and planned infrastructure, namely the CRL! There needs to be a focus on walkable, low traffic neighbourhoods, connected to high quality public transport services. This is missing!

For those reasons, my opinion is that the plan is not satisfactory and needs an overhaul that is serious about climate change and growth.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: As per above, I support it but it's largely insufficient!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I support action but think that spending needs to target the source - DAIRY! instead of merely dealing with the symptoms.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Those resources are much needed.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: I support extended public transport services but struggle with the fact that so many detached units have been consented, when we know that (1) Auckland needs to be intensified, not spread out; and (2) public transport cannot be both efficient and reasonably priced in low density areas, by design, meaning that investing there is a bit of a missed opportunity, and that those areas will remain car-dependent.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: You speak of "protect[ing] our natural environment by supporting projects like the Albert-Eden Urban Ngahere (Forest) Project and restoration of the biodiversity of our rock forests, urban streams and coast" while you allowed the cutting of mature trees in Avondale, despite experts' advice and a massive community resistance. Right now I just don't feel inclined to trust you anymore, I think that this all might be nice speeches.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Climate change, loss of biodiversity and a city that functions better for humans. Auckland is FAR from doing well on any of those, and I am sad that this plan is not more serious about any of them.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: \$31 Billion in Investment will only scratch the surface. As a 26 year old we have watched the older generation underinvest and keep the money in their pocket. They also increased immigration dramatically so need to find the money to pay for the infrastructure they need (they don't pay to help til they are already using it. We need more money and a bigger vision. This city is going to double in size then double again. Think big and be loose with spending, interest rates are so low its our only shot to do this. Covid is the opportunity to do something different.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support the buses but we already have a huge park expense with many trees. There has to be a balance of open space with sun and grass for people to sit on and dense, damp NZ native bush. With a huge number of planting already happening it should not be a priority for Auckland.

I believe we should actually start cutting a lot more mature trees down. In Mt Eden these trees dominate and leave lovely areas damp and depressing to be next to. It covers houses in complete shade. So really cutting down trees where we have to many of them will increase the livability of an area.

I say this as they took down a big tree since it hit a powerline. Twice as many people use the small park now as they can get some sun or shade and the ground is no longer muddy.

Cutting trees is always bad ya hippies

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

Do you have any comments on any of our proposed changes to rates and fees charges?

Tax the landowners, they fucked my generation so they might as well start paying for the stuff they have neglected so we at least inherit a nice city, even though we cant afford to live there.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why: I support the buses but we already have a huge park expense with many trees. There has to be a balance of open space with sun and grass for people to sit on and dense, damp NZ native bush. With a huge number of planting already happening it should not be a priority for Auckland.

I believe we should actually start cutting a lot more mature trees down. In Mt Eden these trees dominate and leave lovely areas damp and depressing to be next to. It covers houses in complete shade. So really cutting down trees where we have to many of them will increase the livability of an area.

I say this as they took down a big tree since it hit a powerline. Twice as many people use the small park now as they can get some sun or shade and the ground is no longer muddy.

Cutting trees ist always bad ya hippies

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

World Leading Infrastructure. We arnt doing big picture projects because they are expensive.... They will only ever get more expensive so just do it now. We delayed the CRL and other projects, just to be in a worse situation and having to do them anyway and at a higher cost. Jump the gun, think big for a change, lets make this City future proof for 100 years over the next 20 years.

We cant keep only looking 5 years ahead, think 5million will be here in 2100. Lets actually think about the future generation for a change.

Interest rates are low, so borrow more then any council has ever borrowed. Its basically interest free at the moment. We have a once in a lifetime chance right now. Dont be scared

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Would prefer focus on climate and environment and things like organic rubbish collection over things like sporting investments.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Affordable house in the inner Auckland area and supporting first home buyers.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Necessary to keep investing in Auckland's future so we are a great city to live in.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is the biggest long term issue facing the world and we must do our bit.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate
