10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It strikes a reasonable balance between achieving the plan and affordability.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is a very urgent matter and the Council's initiatives are excellent and need to be fast-tracked to make way for even more radical change.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality and the health of our waterways is of utmost important, and the increases will assist in enhancing these taonga. However, once most of the improvement work has been done I would not expect to continue to see increases in the targeted rate.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Work smarter not harder! So long as no loss to our communities (especially our old, young and vulnerable communities) occurs.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I do not agree that sportsfields require additional funding over other matters such as waterway health, civic square etc.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Needs to encapsulate the vibrant shops in the southern end of Dominion Road.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the

Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: How about you finish what you've started. The city is an absolute shambles of road works that have been going for years. In our location we have had all the footpaths upgraded that did not doing, waste of money and resource. Our rates are high enough already on top of auckland being an incredibly and unaffordable city to live in with petrol taxes and the likes.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The bus service is useless. I live off dominion road and for me to get a bus to lower queen street or the likes of fanshawe street it costs almost as much as parking for the day and takes three buses and over an hour in travel that takes ten minutes in the car. It is in now way comparable to the services overseas.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Yes our water quality needs fixing its absolutely incomprehensible our local beaches are not safe to swim in most of summer. But, how about you do something with Watercare first, we pay an extortionate amount for water in Auckland and the capture of the water has not been dealt with we should not face shortages all the time, so sort that out.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: We have far more desperate situations in Auckland that need funding

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support the investment but I don't feel like we have done enough cuts to non-essential council services. The scope creep of council into almost philanthropy over the years needs to be reigned back in.

Please do an exercise for the public by noting down all obligations the council is required to do by legislation, and then all the services that council is choosing to do.

This would be ultimate transparency for what we as rate payers are paying for that we aren't required to do so.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Stop putting so much in fill housing in places that do not have access to buses or supermarkets. Waterview is over populated. The value of our properties increasing will mean there is a natural increase without being hit with another increase.

Fix the infrastructure that has not been maintained despite the collection of fees from developers.

Stop chopping down trees that have protection and are listed.

The value of our properties increasing will mean there is a natural increase without being hit with another increase.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support increased investment but I feel we should be borrowing more if necessary to prepare for the effects of the climate emergency that is here. It's not a matter of if it's when. Our low communities will be first hit - this needs to be Auckland NUMBER ONE priority this year. Listen to the climate scientists and their recommendations. The budget should be specific with deadlines and penalties in place. There needs to be a bring drive to reducing household waste across Auckland. All households should be composting /have option of free collection of green waste.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Please make this the climate budget. As much investment as possible to mitigate the effects that are coming our way.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I vehemently do not support the proposed 10-year budget and the 5% rates increase proposal.

I believe Auckland council has way overstepped the mark on what its core business should be, and in many of the areas that it does operate, it is actually worsening problems rather than creating solutions.

As a principle, Auckland Council does not adhere to customer-centric values and is very autocratic and unaccountable.

I point to these examples:

1. Auckland Transport. Absolutely terrible reputation and brand. Seen as autocrats with fake public consultations. This CCO has butchered parts of the central city such as the West Lynn shops and is seen as pandering to the anxiety of spandex clad cyclists in Point Chevalier and other central-western suburbs. Most importantly, there is very little evidence these people actually know what they are doing. As an organisation it just doesn't have the credibility to lead people as an expert in this area. Some would say they have the 'reverse midas touch' - everything they touch appears to turn to the proverbial.

To break it down even further, this is what I see as the result of Auckland Transport touching things:

- 1.1 Traffic worsens under some ridiculous ideology of getting Aucklanders out of cars and into public transport. Who on earth appointed Auckland Transport to do this? We (your customers) are capable of deciding this for ourselves. Provide better public transport and then people will self-select. If you continue this ideology of pushing people onto public transport without providing an adequate product, then you will lose even more credibility.
- 1.2. The uglification of community areas. What happened at the West Lynn shops was a disgrace and financially disadvantaged many local shop owners by reducing their customers and running some out of business. I am terrified of upcoming plans to bastardise Ponsonby Road. Leave it as it is and tell the cyclists to take a different route.
- 1.3. An absolute blind-spot around commercial sensibilities. See above.
- 1.4. Also, what business of Auckland Transport's is it if my diesel kms are out of date? I was 3 weeks late on paying them and was ticketed - I now have to pay a \$200 fine and for what? This is an issue between me and central government.
2. Consents. The red-tapes, the arrogance, the long lead times, the absolute void of any kind of reasonable service times. You are a massive bottleneck on development and progress. Auckland Council has a lot to be blamed for, for property inflation.
3. Panuku. Specific concerns around corruption and backhanders around the sale (behind closed doors) of Marinas to richlisters. You know exactly who I am talking about. This organisation has almost as bad a reputation as Auckland Transport - and is on a corruption level up with the government of the Phillipines.
4. Executive salaries and huge amounts of wasted financial resources that could be repurposed to meet some of the goals you wish to raise additional money from your customers from in the form of rates.
5. The debacle from Watercare.
6. Phil Goff's ideology peddled by Auckland Council through its various CCO's is absolutely destroying the CBD. Its costing livelihoods and ruining the city. Making Queen st walking only is a typically naive idea. Make Phil work in one of the Queen st retail units for a week for some perspective.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I absolutely do not support any additional rates being charged to support Auckland City positioning itself as being able to have any direct impact on climate change.

Sure, planting native trees and making your public transport more efficient is a good idea - but either use existing funds more efficiently in order to do this, or don't do it.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: See above. Reuse existing ratepayer money more efficiently to do this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

You need to start spending the existing revenue more efficiently and put a cap on executive salaries before you have any credibility in this area.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Don't ruin Western Springs by cutting down the pines.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Yes, while I acknowledge my comments above are quite bitter, I absolutely genuinely believe Auckland Council and its CCO's just come across as incredibly arrogant, out of touch with commercial realities, and idealistic in ways which its customers just don't require it to be. Take care of the parks, the water, the roads and the consents first before getting involved in peripheral issues.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I'm really concerned that not enough is being done or fast enough to address long standing issues on our environment water quality at our beaches

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Auckland's delivery of cycle ways is taking forever and ends up being a slow bureaucratic and expensive exercise endless consultation as if there was no climate crisis ie take our local no existent but consulted cycle ways in grey Lynn and pt chevalier - it's not good enough

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Let's get this job done - slow and currently inadequate progress to date

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: We have to address these environmental issues - it's the poorest areas that suffer the most ie south Auckland

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: We need protected cycle ways built at speed across the area particularly linking schools and colleges current delivery is extremely slow and too costly

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The environment air water green spaces

Tell us why: It's a start but enough nor fast enough

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Not enough and not fast enough to address backlog of issues

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: More protection on our existing trees / we have lost too many to consented developments / more tree planting - encourage rate payers to plant trees - especially Burms

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Investment in improved services - improved environment and strategic investment - increase investment in public transport - vast increase in cycle ways across the city

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Don't you think we've paid enough already? Look at all your C-level people. Some are paid more than the MPs. How can you justify paying your people that much and delivering so little? Multiple teams do similar jobs, why? If you want to raise more capital, get your internal mess sorted and made some hard decisions to restructure your organisation. I can go on, but I'll refrain.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I prefer investment in trains. Add more train stations.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Budgets blows over not because they are too small. It's because of the way you manage your projects. Manage it like a proper businesses.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: N/A to me.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I have no issue paying my rates and council bills. In fact, I'm happy to pay more. But I currently do not support many of your initiatives purely because I know (as a former contractors at the Council) there's real need for the Council and all its business units (incl. Community Facility, Watercare, Panuku, AT, etc.) to address their own internal issues. Your organisation is way to large and, please do not deny this, way to slow and ineffective in managing your daily tasks. Please do not impose more expenses to us rate payers if you're not being efficient or effective enough to take care of your own internal managerial issues. I beg you.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: It is time Akl Council only spend what they have in hand

NO LOANS

NO BORROWING

USE WHAT YOU HAVE SENSIBLY

DONT RELY ON WHAT YOU DONT HAVE

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Stop spending

Use what you have better

Yes - replace items with carbon neutral appliances where ever possible BUT ONLY SPENDING THE SAME AMOUNT AS PLANNED PRIOR

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: This is shocking that Akl does not already have pure plentiful water on tap - what has been happening in the past with this budgeted allowance - yes begin WHAT YOU CAN AFFORD WITH ALREADY ALLOCATED ALLOWANCE

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Think before you change anything - a city needs many many parks and facilities - down grade but keep

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Think very very carefully before you change and charge more in rates - the city population will diminish if you hit people soooo hard. Cut your office costs and payments to sensible levels

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Think first - keep costs at minimal - cut spending- be sensible

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why: Spend sensibly and with money already in budget

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Other

Tell us why No - keep as is

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Maintain AKI as it is - a beautiful friendly city

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Low rates

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: I am uncertain of how much a rate increase would actually improve the delivery of key services and other assets listed above.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change and awareness is a real issue but there are other more pressing issues too that the Council needs to address.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Auckland has recently suffered a severe water shortage and we are still not out of it. This was mostly due to mismanagement and lack of forward planning. I am not prepared to keep giving more to improve quality of water when we are still facing restrictions on the usage of water.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Many of our existing venues and assets are run down and look tired. This may also be due to our pathetic building standards. It is important that we have a better looking city and so we do need to upgrade many of our facilities and buildings.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do not believe that Auckland council is doing a thorough job of issuing proportionate capital valuation on residential properties. They are blindly updating property values every 3 years without investigating the quality of properties. Even though CVs do not reflect market values they do set a basis for house prices. Auckland Council has been irresponsibly using mass appraisal techniques without in effect assessing the real value of properties, for a very long time. As a result, some low quality houses are issued extremely high CVs and some really good houses in the same zone, issued with exceptionally low CVs that are disproportionate to the real value of the property. There needs to be a better tool and method of property appraisal for issuing accurate CVs before increasing rates.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: It would be more relevant for people living in that area to voice their support or lack of it.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: As mentioned above, a lot of our facilities need to be upgraded.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I am not entirely informed on this.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need to improve our building standards considerably as we have very poor building standards in our country. We need to upgrade our city center and our infrastructure to make it on par with some of the other cities around the world.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Happy to pay ... just get on with it. I support a 5.9% one-off rates increase for 2021/2022 (rather than the proposed 5% increase) to ensure the \$320 million climate budget can be progressed. I also think Council should introduce parking levies (ring-fenced for public transport investment) and congestion charging to help fund our climate response.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: as above (Happy to pay ... just get on with it.) I support further funding beyond the proposed investment. I want "Option 2: More significantly accelerate Auckland Council's climate action". This will put \$320 million rather than \$150 million towards climate initiatives so that we can achieve a 100% zero emissions bus fleet by 2030 (rather than 50%), further investing in Māori-led climate change action, more than doubling our street tree planting programme to 29,000 in total, address coastal erosion faster and more.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: as above

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

get one with it...

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: as above .. get on with it.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

To get a= n awesome city we named to spend and spend well. I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: "\$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade" : evidently the planning of previous councils has well underestimated growth and has not adequately accounted for emergencies, regardless of disease risk. This is the fault of the council and not of the Auckland rate payer. The country as a whole should be responsible for this oversight as Auckland is NZ's hub of business. Reduce the cost to Aucklanders and increase the cost to the entire country.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Only support if you do not insist on going down the hydrogen path. Hydrogen as a power source is a contrivance to gather public support rather than a sensible utility. Hydrogen is notoriously inefficient. It is NOT a source of energy, it is merely a means of storing it.... and a ridiculously leaky and inefficient one at that. FFS, give it up. Even if derived from renewable energy you need to store it, transport it and cleanly (the only means being hydrogen fuel cells) release the energy from it. It is not the answer. Hydrogen fuel cells are heavy, inefficient (about 50%) and degrade more rapidly, arguably more so than electrochemical batteries. The only reasonable use for them is in very heavy industry and shipping. If you encourage people to go down that path for private vehicles, fleet vehicles and trucks you are doing the equivalent of encouraging Nicola Teslas "wireless power". Its a nonsense. GIVE IT UP.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: We need to focus on the water quality in rural areas where it is the major problem. Dairy is the most polluting source in this country. Do you see much dairy industry in this city? You need to get your priorities right.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support only if you promise not to maintain physical assets. If people want community assets so much they will be willing to support it as individuals.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Priorities seems to be centred on sports and activity. Can we please have some focus on transport and environment. Installation of EV charging, development of useful public transport hubs and lanes and less focus on sports. Not everyone is interested in grown men and women running around chasing after their balls.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

More housing, lower cost, higher quality, MORE SPACE NOT LESS.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland needs to spend up large on its long neglected infrastructure.

Poor prioritisation and poor management need to be fixed urgently

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: BUT council also needs to consider cause of climate change - too many vehicles on the roads. Tolls, fuel taxes, parking fees to discourage private car use - majority of which have one person in them - why? Encourage use of public transport by improving everything about it. Encourage walking and cycling by improving footpaths that are in an atrocious state.

One very easy fix: change the phasing of traffic lights to respond to pedestrians. Often the wait between pedestrian phases is 3 minutes, sometimes with not a single vehicle using the junction - slow the cars instead. Use sensors!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Bring NZ up to first world standard

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Surely people are the most important - physical and mental health depend on the retention and improvement of community services

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Do it once and do it properly

Spending would be far more efficient if less work was contracted out to private companies who are in it for profit. Instead, council needs its own workforce so that it has more control

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Bus service should be instated but any targeted rate is difficult to justify

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: most are worthy initiatives - organisation needs to be sensible

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I think there are more urgent programmes neede to improve this area

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It is of utmost importance to prioritise climate action for people now and in the future. I support swift and drastic action to mitigate the affects of climate change. I would also like to see the protection of urban trees added to the planting of 2 million native trees as new trees do not offset the destruction of old trees.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Climate action and environmental preservation.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We keep going into lockdown and businesses are suffering enough and now you want to increase rates.
Not cool

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Not sure that not using diesel buses will change much

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Water quality fine as it is. We

Have world class water

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Great idea to lease

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Makes sense they pay for a service in their area

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Climate all a bit wishy washy and I think a waste of money. Likewise chamberlain park and a civic square. Aquatic and sports fields yes!

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

If you actually did things right the first time then our rates money would not be wasted ie tamaki drive cycle way. Who signs this off as a good idea? Or road layout and then the actual tarmac itself is a joke. Stop wasting our money

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: i too have my income affected by Covid19. i am on 50% of salary as i work in tourism. while i do want the Auckland council to make the infrastructure investments, it must talk to central government to get funding from them, the majority of ratepayers in Auckland can no longer afford to keep being the main source of revenue for Auckland local government. The rates system is broken and not able to generate enough income to pay for major national infrastructure

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: as per my earlier comments, AKL council needs to get more of its required funds from Central government. half a million rate payers cannot pay for all this very necessary infrastructure

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: We really need some Auckland council funded swimming pools in the Mt Eden area. We have had our only pool closed for more than a year now, and the aquatic facilities in the area are suffering from over demand lack of supply. Mt albert has a great pool, so am confused why they are being prioritised? Also the roads nearby the major high schools are dangerous and constantly congested. We need either zebra/pedestrian traffic light controlled crossings on Mountain road close to Aubury Avenue so that the hundreds of youg adults are able to safely cross there to get to Epsom girls grammar, as currently they have to dodge and weave between huge volumes of traffic.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why Albert Eden board have not done a very good job of informing local residents about tis, i had never heard of it until now and just had to look it up

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

better and safer roads. Better Swimming facilities, yes to sensible environmental initiatives. No to rate increases above 3%. Its time Auckland council negotiated with central government for greater funds to pay for the necessary infrastructure and plans. Central government collectas all the money and then expects Auckland ratepayers to provide ever greater tax

through rates. our city is down 1-2 Billion dollars (public and private) due to Covid, this needs to be covered by central government

Important privacy information

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I am certain much of the budget is correct and necessary, but I believe there is a huge waste of funding, in particular around roading. How do roads like Franklin take years to put new sewers and storm water drains in and then once it's completed it gets dug up again. The same with Picton Street and other sin Ponsoby. Also, perfectly good footpaths get dug up and replaced, yet Ponsoby Road, one of Auckland's preminent streets has some of the worst

footpaths in Auckland. It truly appears that there is very little planning or impact analysis completed to determine the impact on traffic or the Auckland economy.

While I'm on roading, how can there be a 30kph speed restriction on Franklin road, but 40 kph outside schools and actually on Ponsoby Road. That is ridiculous as there is far more chance of hitting a pedestrian and doing real damage on P Rd than on Franklin. It really does seem to just be a lottery.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Our water quality is currentl a disgrace

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The spending of our rates being carefully planned and implemented and spending being carefully managed and reported. Also, that the spend is the best use of funds for the greater good.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland Council should try to decrease spending on non-core areas to save money rather than just increasing rates

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I think a lot can be done to help the environment without increasing spending. Stop cutting down established trees, encourage recycling, tree planting, using public transport etc

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is a core business which the council should be trying to improve for Auckland

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I do not support putting any extra money into this. Consolidating what there is already and divesting poor quality rooms and halls.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: There seem to be a lot of unnecessary projects going on all over Auckland. In a fiscally tight time we should not be persisting with a lot of "nice to have" projects and spending.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is important to me is that the Council is more responsible with money and looks to save money on non-core business before increasing rates more and more.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Please don't build a town square , no one uses them except the homeless.

Mt Albert shops have already undergone an unnecessary 'upgrade' from AT.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why Let's get over covid repercussions first. Please stop spending ratepayers money.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Council is in financial trouble.

There is no more money from ratepayers.

Find it somewhere else.

Stop all nice to have projects for 3 years.

Lobby Govt to slow population growth.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I appreciate the upgrade is needed and it's been neglected for so long.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I'm a firm supporter of public transport and want less pollution with electric vehicles everywhere.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It's about time, too many of our waterways polluted.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community centres are the life's blood of our population. Every family uses some aspect be it library, evening classes, markets etc.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Talking of annual council rates, an increase will impact on those asset poor who own their own place. The refund needs to be increased pro rata.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Providing a bus service will be a blessing and encourage people to move out to the area.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We personally cannot afford any more rates increases. We're at breaking point and at risk of losing our home.

I believe the council needs to reprioritise the budget and accept that people have suffered severely through covid and will continue to be impacted for years to come.

My preference is to delay as much as possible from the budget to allow people to recover.

I believe most people will happily accept delays in services rather than swallow higher rates increases.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Would welcome some budget on keeping berms mowed and tidy. Certainly key ones. Would improve overall look of Auckland

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: You are the experts and know what is required

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The future looks grim otherwise....

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Needs to be done

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: The revenue raised from selling off assets needs to be used wisely.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Those who it is provided for should pay towards the service

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Infrastructure should be paid for by the developers and the government - existing ratepayers should not be covering the costs.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: 10 yrs is a long time. Any budget planned for this period will be subject to changes. So there is no point in planning uncertain and vague budget targets.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is a fact but council has very limited influence on it. It shouldn't affect council planning just because climate change awareness is a fashionable trend in local politics.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Do not support additional funding for transport. Support additional funding for wastewater and water supply and stormwater. Do not support additional funding for parks and community. Do not support additional funding for environmental management and regulation. Support additional funding for economic and cultural development.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Libraries and community centres provide great meeting places for humans to interact socially and to remove those would be detrimental to society generally.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: There is already a critical shortage of water infrastructure and the present plan (including the central interceptor) is very inadequate. I would never swim in the Manukau harbour at all or Waitemata harbour most days. Meola Stream is contaminated within 100 metres of its place of origin in Sandringham. Oakley Creek and Whau River are in terrible shape. The river underneath Queen St is basically a sewer line now.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I agree with a rates increase to provide for money for upgrades but just own it. People (including me) are making huge capital gains so for the most part they can just cough up some higher rates. However, I do not closing down smaller centres which are the life blood of many communities. Focussing on online services often does nothing to support vulnerable members of our community like older people, sick people, immigrants who can't easily travel, communicate or use the internet. Consolidation and online services are also not in keeping with the Council's required spend on education. The Sandringham Community Centre is old and run down but it has a lovely spirit and is such an important part of the community. Parents get to know each other through playgroups, vulnerable community members

get to know each other through the market, and the whole community uses the community library that Zora from the council looks after. Closing a smaller centre like that would be absolutely terrible for the community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Despite complaints, property owners can afford this. Also, the cost to individual Albany households of sitting in traffic with an inadequate bus service is more than \$238 per year.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: I do wish Chamberlain Park had been turned into a 9 hole course and I really think the board bowed to a small minority there but going forward I really support their focus.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Libraries are the heart of the community and cater to all age groups for community activities from Wriggle and Rhyme for toddlers right through to Dementia Book Clubs. Browsing and borrowing books and magazines is a big service to the community - you don't necessarily know what you want which is why the browse function is so important for serendipitous finds and connections. Auckland Council needs to stop buying books from Australian library suppliers. This does nothing for the wellbeing of the NZ book economy, local businesses or our local writers earnings - we are all part of this community including writers, who are also ratepayers. Our local council should use local ratepayer money to support local writers. I do not want to see library functions merged into service centres - or the loss of the word library, or librarians. Libraries are treasure, and downgrading them bit by bit downgrades this taonga for all.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Libraries encourage social connectedness and strong communities more than any other facility - more support for libraries is required.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Devonport-Takapuna Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why More money for Takapuna Library, a high functioning community centre which encourages people into the city; and also a facility which encourages social connectedness and strong communities via excellent programming for all age groups.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need much more housing in the city and suburbs, more multi-level townhouses and apartments close to transport hubs, which will encourage more people to live centrally, use cars less, and be more connected to each other in the community.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Have everyone be on minimum wage. So that way you have enough money. Don't have it come from our pockets.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Why dont you wait for the the busses to brake down first than REUSE it to make the new busses to help with climate change. SPENDING MORE MONEY ON STUFF DONT STOP CLIMATE CHANGE.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Not enough people use them the ones that use the building should fund it

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Stop giving people in pay rise have them work on minimum wage. When your city people that the rate money is coming from are losing their jobs

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Bus only is a waste of space and a lean. If you are going to make a whole new lane let it be T2 and electric cars use too

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why The business are already having it tough. Customers need to be able to park their cars to get to the business to support them. They dont need buss lanes

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

To be able to have water. Pipes that arent cracking. Business that we can support and have access too. For everyone not just the able people that can wait more than 50 meters from their cars

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Way overdue

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change the most pressing issue today

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Get back to when I was young

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Will lose the intimacy

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know

Water pipe lines need upgrading. The pipes are almost 100 years old. All pipes, from piped water to drainage and storm water. They all need upgrading. We need more planned work related to water so leaks don't occur. The pipes are old. That's why they leak. Replace the pipes and they won't leak anymore. The tax payer saves money and the council saves money.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Aucklanders cannot afford this plan. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Prioritise the need to have, and not the nice to have

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: If you made cuts internally, you could find the cash to invest in the se capital projects

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why: Only if you achieve the lowered costs promised

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do not support any of the initiatives above as all will lead to increased rates and fees

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: If the service is not viable commercially without the need for targeted rates, do not introduce the new service

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: You are spending too much time dreaming up ways to spend our rates. Roads, lighting, footparks, sports grounds maintenance and rubbish - anything else is outside of your perview

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The compliance costs and red tape for new builds, renovations and development are prohibitive, and fuel house price inflation. Red tape needs to be reduced, and costs significantly reduced.

Your bureaucracies are too inefficient and employ far too many people in comparison to the value you provide to ratepayers.

Do not increase rates or fees. Cut your cloth to suit your means. Downsize.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Too expensive in light of current house prices rises

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Buses are under utilised

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: How can ratepayers afford all this extra cost? Where is government assistance

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Unnecessary and under utilised

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Stop planting tall trees under power lines

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Rates are lower for property there

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Seem sensible

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Minimising wastage on contractors

Mow the verges!!! So many new developments do not take any responsibility for them as it is council land.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We can't put off important infrastructure

However what is a want and what is a need and we trust the council to make those decisions

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: You have a good reason why

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why: I worry about the leaks and find the waste of water due to leaks appalling is this being addressed do we not pay for this?0

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I think there is a chance for some refinement and revenue for example the Leys library needs a lot of work and soon before it deteriorates

Why not have the ply jet operate out of the library

The toy library operate out of the basement

And sell that bit of land

Does anyone look at vacant council land?

Small random sections of land that are not parks but just land

Can we cash some of these

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: If people have buy In they will make use of something because they paid for it

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: whats that new rate money will be put in. Is the plan changing for investing in new way of living post covid?
for example more cycle patch and walkways etc.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Invest in virtual reality as well, make museum accessible via virtual tech

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The revenue impact of Covid19, quoted as around 1 billion dollars, is being squarely passed onto Auckland rate payers and businesses, who too were significantly affected by the epidemic. Aucklanders should not have to pay additional money in the form of rate increases to cover these costs. Auckland has been disproportionately affected by Covid19 due to having international arrivals and MIQ facilities here. A stronger case by Council could have distributed this cost throughout NZ rather than making Aucklanders pay this additional cost. Additional revenue could and should be

sought elsewhere (toll roads, rent tax as opposed to rate increases, development taxes as a lot of spending is going to newer developed areas to support the ever expanding Auckland). Also the Auckland City Hall Rich List provides interesting reading on salary costs in Council...

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Money from this should come from AT, revenues from public transport.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Why does this responsibility sit with Council when Watercare deliver and maintain water services in Auckland, and have proposed significant increases over the next 10 years.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community facilities are a great part of living in Auckland. I support the upgrade and replacement of aging facilities, however for new facility builds this should be supplemented by the developers building there.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Targeted services should be paid for proportionally by those who will utilise them.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: The intended priorities seem insignificant in comparison to wider Auckland policy

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why I support the expanding BID programme but this should be funded by those businesses that would benefit from this rather than rate payers...

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the

Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are high enough as they are. I don't believe increasing them will help. Make cuts in unnecessary spending before increasing rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There is so much financial hardship that people do not need any more difficulties with money

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Planting that many native trees is nothing more than wasting money. Diesel buses are hardly a priority.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

Do you have any comments on any of our proposed changes to rates and fees charges?

No comment

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: The main priorities should be to care for what we have at present. This area looks shabby and uncared for. Too much concentration on pulling down and building new dwellings which will become like slum areas in a few years whereas present streets, footpaths and grassy areas are neglected.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Howick Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

Feedback we received during the local board plan consultation last year clearly told us that we need to focus on renewals and upgrades for the 69 play spaces in our local board area.

In addition, we want to explore the idea of a "destination" play space and would love to hear your thoughts on what one would look like.

What should a "destination" play space include for all ages?

No comment

Where do you think is the best location for a "destination" play space in the Howick Local Board area?

No idea

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Stop putting up more houses until roads and infrastructure can cope.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need the funds to support Auckland and Aucklanders, to maintain infrastructure and do our share to reduce emissions and mitigate against climate change.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Investing in action to decrease emissions is the most important thing our city can do.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: High Water quality is beneficial to human enjoyment of the city and surrounds and essential to the numerous species that are reliant on natural water sources. It should be a high priority to reverse degradation of all natural spaces and increase native biodiversity.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: When control goes out of council hands there is less opportunity to maintain the standards of service and ensure that operations meet the standards expected by NZers. For example meeting climate targets, living wage for workers, etc

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Ratepayers are also being forced to budget harder..

You should too.

Cut out the sweets and just deliver the vegetables. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is not the time to indulge in virtue signaling. Make sure the existing bus services are well planned and on time.

EV 'S have a huge initial carbon and resources input .this takes a long time to recover from.maybe 5-10 years minimum

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Learn to make do !!

Wanting to put a surcharge on a surcharge shows lack of management skill

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Selling a few parks that cost you nothing !!

Sell those stupid airport shares...oops there price has crashed

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

A targeted rate on vector just hides council from its idiot tree plantc behavior.

If you are accountable perhaps you will be careful when planting and minimize maintenance.

Anyway when are you actually going to give the trees in nolan a proper trim ?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Targeted rates are an evil uncontrollable charge that is collected and its use is kept secret. And they are never removed

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Not one mention of fixing the failed new footpaths in greenlane.

Not one mention of any expenditure on anything in greenlane .

Not one mention of controlling the terrible environmental and social effects on us caused by the ridiculous infill crap apartments being built everywhere.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why Bid's are are evil tax that are stolen from many by means of hidden charges on rates bills in order to give to a small "club" funds to overpay a few ineffectual staff

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I disagree with the overall plan to fill up auckland with crap in fill developments.!!!

Regional development is the only solution.

Or perhaps your master plan is to force us to leave auckland once you make it totally unlivable?

You are heading that way now.

More is not better

Quality not quantity

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The funding of Council operations and capital investment through rates levied on property valuation is unfair and economically unsustainable. Two things are needed. First property rates on owner occupied homes should be drastically (25-50%) lowered, while rates on commercial properties should be greatly increased. This will have the effect of encouraging business to move operations out of Auckland (e.g., call centers) which will have the benefit of reducing population pressure in Auckland and lifting the regions. More importantly, Auckland needs a tax on income so

that people earning high salaries but renting will also be contributing to the funding of the city. This would be much fairer than simply relying on property rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is critical but it should be coupled with measures to reduce population pressure in Auckland which is creating traffic gridlock and other pollution problems.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Greater focus on rainwater harvesting should be occurring. Also, developers should pay 100% of infrastructure costs for new developments.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This affects the quality of life in the city. Spend rates money on these assets.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Vector should pay for tree management as part of managing their assets.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Bus services should be funded by a vehicle tax initially to encourage people out of cars.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Auckland should not grow any larger--it is economically and socially unsustainable and represents a huge risk to New Zealand as a whole. Active steps should be taken to encourage businesses and organisations to relocated to the regions. Auckland needs a tax on income so that people earning high salaries but renting will also be contributing to the funding of the city. This would be much fairer than simply relying on property rates. Developers should pay 100% of infrastructure costs for new developments.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Underwhelming list of priorities for \$17.5m - not sure where that money is going, seems like a lot of talking and "support" but very little actual delivery.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates should be increased more to better fund the services Auckland Council provides

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: While I support the increased investment, I would prefer greater investment, even if it means higher rates. We should do what is right, regardless of how much it costs

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The existing problems appear to be due to a lack of previous investment, and council needs to fix that and begin investing into the issue at a rate that keeps pace with population growth, climate change, etc

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: A change in approach to facilities that are better suited to the communities they serve is good, but significant consultation should be done before any facilities close. This should also not be seen as a lower cost model, and I do not support leasing or sharing facilities, instead they should be properly funded and maintained, even if this involves raising rates.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

All rates should be raised until there are sufficient funds to adequately fund all services the council offers, have a low environmental impact, and maintain assets appropriately. It should also be high enough that public transport can be invested in so that it is functional, and free for everyone.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Public transport should be free for everyone, and therefore should be paid for by all rate payers

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: It is unclear how the Chamberlain Golf Course upgrades are funded, I believe they should be funded by a user pays approach and the cost to use the golf course should increase to cover this, as it is a facility that a very small minority of people use.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Increasing funding (and therefore rates) in basically every area. Specific areas of concern are housing infrastructure, and public transport. It is inexcusable to kick the problem down the road to future generations and refuse to solve Auckland's

issues due to a lack of spending. Public transport should be made free for everyone, and widely expanded in both geographical coverage, frequency, and should run 24/7

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Are you serious? At a time when most people are struggling, you want to raise the rates more? How about you itemise in detail every single payment that you're making with OUR money so that we can see where it goes? Just like your ratepayers do with their own finances.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It's time for people to tighten their belts, not start throwing other people's money around again.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: If this is needed to maintain essential council core services, then I support this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: You should be trimming the fat elsewhere, if you're unable to provide for your core services. Your job is to look after your buildings within your means. It's not my job to give you extra money so that AC can waste it on your bureaucracy.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: If you can't organise a bus for people willing to pay for the usage of said service, best you don't organise the bus!

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: The only principle that I don't support is:

Ensure a range of programmes, tailored to serve the needs of our local, diverse population,

We as ratepayers need to know what these services are? how much money do they need?

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It's important for me that the council acknowledge the stress that their ratepayers are under, and trim their costs, rather than increase rates.

Important privacy information

interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: THIS COUNCIL IS OUT OF CONTROL - WASTING A MASSIVE AMOUNT OF \$\$\$\$\$... !!!!

WAY TO MANY IDEAS

WAY TO MANY DREAMS

WAY TO MUCH PC

WAY TO LITTLE CONSULTATION

WAY TO MANY EMPLOYEES EARNING OVER .. OVER \$ 100,000 .. !!!!

AUCKLAND IS BEING DESTROYED BY EXPENSIVE LEGACY - USELESS DREAMS N SCHEMES

CUMULATIVE RATE INCREASES OVER 3 YEARS ALONE = 5 % + 3.5 % + 3.5 %

THAT's 12 % IN JUST 3 YEARS !!!! & COUNTING !!!!!!!!!!!!!!!!!!!!!

COUNCIL CV's WILL INCREASE ASTRONOMICALLY

DUE TO CRAZY - INFLATED PROPERTY PRICES

THIS WILL BE ANOTHER WINFALL .. !!!!

FOR THIS ILL - DISCIPLINED COUNCIL

99 % OF WHAT IS PLANNED BY COUNCIL - IS WANTED BY COUNCIL

YOU ASK US FOR OUR THOUGHTS ON MARCH 15

WITH CUT OFF TO SUBMISSIONS ON MARCH 22

WHY NOT ASK US 6 MONTHS OUT FROM SUCH AN IMPORTANT DECISION

OF SPENDING BILLIONS OF DOLLARS OF OUR RATEPAYER MONEY

2 WORDS = ABSOLUTELY DISGUSTING

YOU HAVE NO MANDATE TO - SPEND RATEPAYERS MONEY

IN A TOTALLY IRRESPONSIBLE WAY !!!!!!!!!!!!!

WHY ARE YOU " NOT MOWING THE VERGE " ????

WHY DO SOME VERGES LOOK BEAUTIFUL

OTHERS VERGES - LOOK LIKE A " DOGS BREAKFAST "

SURELY THIS IS A " BASIC FUNCTION "

THAT AUCKLAND COUNCIL SHOULD BE DOING & ARE NOT ... !!!!

***** WORST PART OF AUCKLAND COUNCIL - IS AUCKLAND TRANSPORT !!!!! *****

AUCKLAND TRANSPORT IS - ARROGANT & DESTROYING RETAILERS IN :

* TAKAPUNA

* ST HELIERS

* OTAHUHU

* WEST LYNN

* TAMAKI DRIVE

* K RD

* JUST TO NAME A FEW ... "

GRIDLOCKING OUR ROADS WITH UNUSED SO CALLED BEAUTIFICATION.

NO ONE IS SITTING ON THE SEATS OR USING THE NEW MASSIVE FOOTPATHS.

INSTEAD OTAHUHU IS NOW A " FRUSTRATION DESTINATION " ... !!!!!

NO PARKING - I'VE BEEN IN ONLY A COUPLE OF TIMES IN 2 MONTHS

I CAN'T JUST POP IN ... & GRAB SOMETHING FROM A SHOP - (SO NOW I WON'T !!!!!)

WITH TOTALLY USELESS SO CALLED BEAUTIFICATION ????????
YOU ARE KILLING OFF - SMALL ALREADY STRUGGLING RETAILERS IN HIGH STREETS
TRADE SERVICES - COURIERS - TRANSPORT DELIVERY IS TAKING FAR TO LONG
MANY OF THE SPEED HUMPS - ARE VICIOUS & FOR NO GOOD REASON
YOU'RE PC ROAD DESIGNERS ARE PIG HEADED
THESE ARE ALL USELESS - UNWANTED DESIGN BY OVER PAID \$\$\$\$\$\$\$\$\$\$\$\$\$

- * CONSULTANTS
- * CONTRACTORS
- * EMPLOYEES

AUCKLAND COUNCIL - SUMMARISED IN ONE WORD

***** SELFISH *****

AUCKLAND TRANSPORT - SUMMARISED IN THREE WORDS

***** ARROGANT - NO ACCOUNTABILITY *****

***** RIP - AUCKLAND *****

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland’s Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: YES - GOOD IDEA TO CONSOLIDATE FACILITIES TO SHARE BETWEEN GROUPS

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: BECAUSE - I HAVE NO FAITH IN AUCKLAND TOWN PLANNING

& YOU'RE CONSULTATION PROCESS IS 1 YEAR TO LATE !!!!!

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why BECAUSE - I HAVE NO FAITH IN AUCKLAND TOWN PLANNING

& YOU'RE CONSULTATION PROCESS IS 1 YEAR TO LATE !!!!!

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

STOP DESTROYING AUCKLAND SUBURBS

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: Have Council looked at cutting costs within council? I very much doubt it with their history of over spending. Hitting up ratepayers who have suffered financially the past year is pretty unfair.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: While I do support the initiatives I see it links back to securing extra funding from ratepayers.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I'm getting pretty frustrated reading these questions. Hobson Bay for example has been a festering cesspool for over a year and now you're saying you'll address it if you get extra funding? What is happening right now with ratepayers money??

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Libraries provide so much more than book loans. They are also a place for the elderly and lonely. By consolidating libraries you will be denying many the freedom and choice to go. As you know public transport isn't wonderful in Auckland unless you reside on a main road.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: because rates are consistently raised and we dont seem to get anything more for the constant increases and so i find it very hard to believe that the council will actually use this extra money wisely

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: we need to act on climate change now and not tomorrow otherwise it will be too late

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: i dont support the civic square at 915-919 New North Rd, Mt Albert. I think this would be a waste of money and would provide little to no community benefit. That money would be better spent elsewhere

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I believe the council are wasting money on things that are not bringing revenue and quality to the city

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I believe this is a complete waste of rate payers money and is not a scientifically proven issue

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Water are have been a complete disgrace the way they have managed infrastructure and yet rate payers and Aucklanders are asked to conserve water and curb their lifestyles because of incompetence

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Covid 19 has not only impacted on the Council, everyone are in the same situation. If we pay the increased rate, where are we to seek the extra compensation? All employers have frozen pay increments due to losses encountered with the covid 19 situation.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Why is the Council buying busses? Isn't this being done by private ownership?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: We are paying water rates, not sure why are we having to pay separately for water treatment?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: What has the Council done to date to reduce the carbon footprint. This is a luxury initiative and should only be participated when times are good.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Do not support any of the proposals, let us rebuild people's spirit first after the impact of covid 19 as opposed to burdening them further with rate hikes, if required reduce the salaries of Council staff for the extra funding?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Building people's confidence

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need infrastructure investment especially building new rail corridors or underground lines. Road traffic (ie. buses) are not the future as they will be stuck in the congestion. We also need to be planning the new harbour crossing...yesterday!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Don't fall into trap that only native trees can be planted. Natives are great but some exotics are better for street trees for example

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Increased investment not required. Change of focus and policy, but not urgent compared to getting basic services running properly first

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: No more bus lanes in areas that 100% do not need them

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Stop the chamberlain park change. Ludicrous

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why Not core business for cash strapped council

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Stopping high spending levels on low use high cost conversions of roadway to cycle ways. Continued infrastructure spending to develop new housing areas sooner near URban Rural boundary. Return cbd roads to cars, or have public transport actually work... getting rid of cars but no decent public transport is a joke

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: waste of money

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Not impressed with what they have done in the past. MT Albert shops is one example of poor choices made - also the lack of parking and traffic flow is shocking.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why If we can't park we can't use

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Biggest issue for me is traffic flow - buses are not convenient for me. The council is making it difficult for me to support local business,

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: During election time, campaign promises are made that rates will not increase/only go up by 'x' amount. This changes once people are in office and I feel that by supporting a 5% increase now, it will change to a larger increase later

I also don't agree with selling property, it's a short term fix. Instead there should be better costing upfront of projects and accountability when they run over

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Need to reduce pollution where possible in Auckland

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Give all council building s to housing for kiwi rent payers . not migrants. Then get out of our loves

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Screw you for getting us debt and high rates. You've lost touch with reality. How many of you are getting bribes from chinese banks to get us more debt.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: No more debt. You are extorting us cause you can

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Happy to invest more in better infrastructure, services and better public transport

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Need to do more to get people out of their cars and onto public transport.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: As long as it does not impact the accessibility.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: Please fast track the chamberlain park realignment! This golf course is only enjoyed by a very small community of people, the space could be much better utilised for everyone to use. Its on the cycle path so is a great spot for access and getting everyone on their bikes.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Happy to pay increase rates to improve housing and growth infrastructure. Particularly transport. But also feel that people on lower incomes i.e community services card holders should pay less public transport fees.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Many of your ratepayers have also been hugely impacted financially by Covid. I don't need or want or can afford more drain in my greatly reduced income , certainly not at this point in time.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Ypu need to delay the implementation of capital purchases until the economy both at a personal level (mine) and a local level (Auckland) has recovered. Thus us not the right time.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: As the above answers. I do not need or want or can afford increases in costs to my reduced my covid income. The money needs to come from elsewhere

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Make the existing assets work smarter. Increases to 'user-pays'to cover costs

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

User pays so reinstate the accommodation provider targeted rate.

I do not understand the vector targeted rate. Unless what I think I'm hearing is another rate increase called by a different name. Council needs to find money from sources other than its ratepayers.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Add the cost to the bus fare

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is critically important at the moment for me is that the council is not taking more money from my covid impacted reduced income. I am struggling with costs at the moment. Council needs to get leaner and smarter

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support most of what the budget is proposing but would like to see increased funding to address the climate emergency and am also worried that c the limited investment in new infrastructure for developments is mostly targeted to areas with limited affordable housing (e.g. Roskill, which has no Kiwibuild houses and where open market new builds are selling for upwards of \$900k)

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I see climate change and housing as two of the crucial long-term issues facing Auckland. I support the increased investment and would support the higher level of investment that has been considered by council

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I support the principle behind this proposal but I think council needs to be really careful that in centralising/clustering services and amenities it's not inadvertently harming groups of people who may be using current facilities. I wouldn't feel comfortable relying on my local board to know what the community does and doesn't use so I hope the council directly asks communities before committing to closures/changes in locations

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Whyyyyyy is funding being put into Chamberlain golf course? There are so many more important things to fund than a golf course that a small proportion of people use, on prime land that should at least partly be used for housing (as was originally proposed) or at the very least accessible to EVERYONE

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Agreed that Auckland needs improvements on services and infrastructure and that spending in the short term is the best way to keep us up to date.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support the proposed increased investment with the caveat that it hits our climate emergency goals. There is a lot more planning that needs to happen around around zero waste households - a better recycling model, food scraps collection maybe? In general I support this move but would like it to be more progressive.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Wastewater overflow is unacceptable

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: While this plan feels a bit under baked, I agree that it would be best to give local boards the chance to decide on what to do with their facilities. In general, I agree with the idea of consolidating the use of certain facilities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I don't understand some of these well enough to comment on them. I support the removal of library fees.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I don't fully understand the difference between the two options

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: The Mt. Albert area is improving but needs to continue to do so into the future. This plan seems to address some of those concerns for me though some points seem vague.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I would need more information on this and what it means

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Climate change action, upgrades/maintenance to our facilities, and easier methods of getting into the city center

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: If you care about the environment clean our parks, plant trees, and stop established gardens and trees being destroyed to allow building cheap apartments and townhouses on every bit of land.

We want an honest wholesome council, that can imagine a city where people can walk and have communities. We vote you in and watch you destroy our inner city communities. Stop selling us out to developers with no soul, and no cultural connection to our values. For instance: We want our Ponsonby Library, yet you attempted to pull that down.

Ponsonby Road is not going to have any heritage buildings if you stay on this trajectory. People are talking and you don't understand our values. We want functioning communities.

Want to talk about ecology? I love water fountains to fill our bottles. I know of one public tap at the start of Ian Mackinnon Drive, we need many more- to stop single use bottles.

We could get employers to provide ashtrays so that their employees butts do not go into the ocean. Many people new to New Zealand are not ecologically minded, have no connection to our heritage buildings and seem disconnected from building communities. We pay so much in rates and have to watch what we value being undervalued for the developers to make money out of our inner city suburbs.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Stop putting houses on the futile land around Auckland where our market gardens were. Plan ahead for regions like Albany, this could have been beautiful with forested areas, but everything is for cars and endless cheap ugly buildings.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Now make the developers pay and not the home owners

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: We pay enormous rates. We have so few parks and trees. We want our libraries and all of the above. Can you not see the future Auckland you are creating, millions of cars, no heritage buildings, no where for the tax payers, teenagers and elderly to have communities. So sad. Areas of our waterfront should be carless and plant trees with our rates.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Stop heritage houses being replaced with ugly town houses, that have no gardens and will not last. Why do you allow our few heritage suburbs to be turned into a Botany Downs aesthetic. Council planning is shameful.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Having lived half of my life in Europe I wonder why people think so many people travel to Europe and love it. I think it is because the city centres are planned and built with people in mind. There are areas with very wide footpaths and little squares, with cafes and restaurants, trees and seats. Young people can congregate on mopeds, the elderly can play boules and sit and chat, parents with young children have somewhere to meet.

Silo park is an example of this sort of thing being provided in Auckland, or the play ground near the beach at Devonport and the wide paths where everyone can walk along the harbours edge under the trees.

Many people use these areas, and tourists love these destinations. We want more of this kind of facility. Just simple, fresh air, good seating and tables, lots of trees. Please don't close down our parks and libraries and halls.

I worked at Silo park and teenagers loved the basket ball court. And it is not just a middle class destination, everyone, from all walks of life goes there.

We believe that town planning has lost its heart and does not represent the values of who they serve.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I don't really trust you. I hope that the senior management team are all about transparency and ensuring people and planet are looked after (without those 2 things, everything is nothing), however I'm not sure that's what it's all about. Once one is on a high salary, one becomes divorced from reality and more about one's own little world. Many of us feel like you're there for the very rich, rather than for the long term and for the people.

For sure we need better transport systems, and a better water strategy. E.g. rather than spending billions on expanding the system, what about figuring out how to do it smarter e.g. subsidising household holding tanks that provide grey water and stop the harbour becoming inundated in a downpour.

I don't mind paying an extra 5% (although I probably won't be able to afford to live in Auckland - I can't right now) if it's being spent on sensible things by trustworthy people. That's the battle you have.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It's a no brainer - the money or the bag where the bag is all the bad things that come to us if we don't have a low carbon future.

We cannot NOT do these things - and we need to do even more if humanity is going to get through the next 100 years.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Again - it has to happen, and not investing in infrastructure is a bad idea when we have unsustainable levels of population growth. That's the actual problem - too much growth. We need to NOT grow, we need to figure out how to make do with what we have AND ensure it's zero carbon.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Seriously? That sounds like a sneaky way of getting approval for another programme of selling the family jewels to the highest bidder. Once they've gone, they've gone. And then the taxpayer/ ratepayer has to buy them back again when private enterprise fails to deliver. COME ON. Like I said - we don't trust you based on past performance.

Communities are about social fabric - something new and bright and shiny doesn't do the job.

I hope you are using other means of consultation - you need to get out there IN the communities, physically, at grass roots, and talk to people about their needs. Or maybe talk to some people who study communities and can give you some decent advice - and I don't mean paying management consultants who will tell you what you want to hear / confirm senior management biases for a massive fee. We have public servants in universities who need the funding more and who can give you the good oil.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I don't know anything about any of this, and I have a PhD. What chance do others have? I feel like this is a box ticking exercise. We need to be able to trust you to look after our best interests vs looking after special interests.

What I do know is that property owners / rate payers are getting to a dangerous point. At the top end they're the rich who can evade social costs, or so called investors (i.e. speculators - it's not investment as the ROI is risible with capital costs) with multiple properties - they're not gonna like any increases, and will just pass them on to their tenants, and at the bottom end people who are struggling to pay their mortgages, which is most of us. The middle has gotten reamed out. Putting rates up means that tenants and strugglers are going to be forced to sell their homes, putting them at the mercy of speculators. Is that what we / you want?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Option 2 seems fairer as spreads the load - but again I do not know. Is there a 3rd way of providing the transport services people need? E.g. if it's to service a privately owned prison, then the prison folks should provide it.
Pinging

Poor people use buses. You're asking property owners who aren't famously worried about poor people to subsidise them ... They're gonna love that - NOT. How about getting some innovative / entrepreneurial thinking going around the problem? There HAS to be a better way of getting people from A to B without trashing the planet or people.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: It all sounds good. We need devolution vs centralisation, and zero carbon like yesterday else we're all literally toast.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

As per previous - we need to bite the bullet on a few things to ensure a zero carbon future - and that won't be popular. Unfortunately a lot of it has to do with central government. 'Growth' is not good - we need to not do that. Greed is not good - it leads to lack of trust as you are seeing here, which makes it hard to change anything. Ah well. We just have to do the best we can.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: essential to get basic infrastructure , water etc fit for purpose for the years ahead.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Wish we could progress faster to electric buses, clean air, less rubbish to tip etc.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Clean water ways and harbour essential for environment

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Infrastructure needs to be developed for more recycling (plastics >55mm) reducing waste to landfill. Packaging needs to become circular and much reduced. Community incentives to reduce, reuse and recycle need to be implemented. These foster a sense of community which benefits our society.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You have to be kidding yourselves if you think ratepayers will keep coffing up compounding increases for your grandiose plans. I dont get 3.5% increase every year to support you.

Also, this is the "average". I have seen my mother's house rates increase vastly more than the 3.5%- 5% you talk about.

Scale back your plans.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Make do - as we have to do with what we get.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Get them back to undergrounding the power lines so you dont have to fund the tree management and we dont get shitty looking trees with v's cut in them.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Covid-19 has impacted many people and adding an additional 5% rates will potentially increase rents for those of us struggling to buy property in Auckland, as well as adding significant cost to any chance of purchasing a home.

Also the ridiculous housing market pricing currently would only exponentially increase your revenue. If you seek to raise revenue then readjust your property valuations which will add a natural increase in revenue. By adding 5% to current values you then have the opportunity to double-dip on rates revenue by readjusting property valuations after the initial increase which I believe would be very dishonest and detrimental to Aucklanders in this very tough market.

2. Climate change

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I do not support the continued rates increases which are in excess of the rate of inflation

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I think characterising the replacement of diesel busses with electric as climate change is ridiculous. It could better be described as "upgrading" the fleet.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: There should be greater investment in libraries which provide a significant educational resource for the community

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I oppose the continual rates creep that seems to be adopted by the Council. The "Supercity" was supposed to reduce costs. Bad management and poor decision making at the top means that this has not occurred. Rather than play around with cycle lanes and such unnecessary luxuries more focus should be upon providing basic required services. The Watercare debacle is a classic example

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Now is the time to move forward upgrading our infrastructure. It has been ignored far to long and needs action now.

I think a bit less focus on climate and environmental challenges as these are mostly buzz words to keep the greenies feeling good.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Fix the roads, streamline traffic flows, Less useless bicycle lanes and leave the trees alone that you seem so keen to cut down in all of our parks and public places. Fine with planting more natives but no Karaka trees but not at expense of removing existing non native trees. They are part of our heritage.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Should have already been under way. Get on with it smartly.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council needs to keep and maintain its existing facilities and build more as needed. Less focus on spending that is a feel good factor. I think council wastes too much money on things like movies in the parks concerts and such. Let events people do this and they can make money from it. Get back to your core basics!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do not mind an increase in rates for all the necessary items but I see the council as a very inefficient and closed minded about the real problems Auckland is facing. Up grade the roads, use toll system, raise speed limits in city center back to 50 kmph, synchronize traffic lights and keep the flow of traffic moving instead of worrying about more bicycle lanes. They are nice to have but I am sorry we are not Holland. Kiwis use cars and public transport if it is reliable and efficient and most of all stop dithering and get on with making Auckland a world class city. You are so far behind the 8 ball you think you are first!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I do not live in those areas but good public transport is a necessity and should be available to everyone in the Auckland area.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Planning and governance spend look a bit over the top compared to others. Council needs to be more cost effective. You are a business not a slush fund. Clean out the dead wood.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Infrastructure spend and public transports are my main areas I would like to see more money spent on. Why does it take so long to build roads, rail lines ect. I most other non 3rd world countries they are a lot more efficient.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: You'd BETTER provide investment rather than channeling it into sweeteners for the "business community". I support a 5.9% one-off rates increase for 2021/2022 (rather than the proposed 5% increase) to ensure the \$320 million climate budget can be progressed. I also think Council should introduce parking levies (ring-fenced for public transport investment) and congestion charging to help fund our climate response.

I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Should be MUCH MUCH BIGGER, considering how many low-lying areas will be underwater in 20 years. I support further funding beyond the proposed investment. I want "Option 2: More significantly accelerate Auckland Council's climate action". This will put \$320 million rather than \$150 million towards climate initiatives so that we can achieve a 100% zero emissions bus fleet by 2030 (rather than 50%), further investing in Māori-led climate change action, more than doubling our street tree planting programme to 29,000 in total, address coastal erosion faster and more.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This is "public private partnership" under a new name. The new owners of Council-run facilities will cream off a portion of our rates revenue and there will be no improvement in services.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Spread the burden

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: The Community Board at the last election were captured by supporters of the elitist Chamberlain Park Golf Course. They want to be able to chase their little balls around, and to hell with the housing crisis. I would support this 100% if Chamberlain Park were turned into community sportsfields and affordable housing.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why No info on whether this has anything to do with amenities for residents not just business owners

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

More housing. More growth infrastructure. More climate change resistance. No more consultants or landlords "clipping the ticket" of rates increases. I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It's the last thing you should be looking at when you are 10 billion dollars in debt

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: People have no money give them a break

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Stop micromanaging everything, least facilities to private enterprises

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Not the right time for that

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Don't introduce stupid fees just because you are broke

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I think we need to delay some projects to minimise rates increases as much as possible as the general population in Auckland has been very hard hit due to Covid restrictions. Priorities need to be looked at to ensure essential infrastructure and services are met and other things a re delays. Look at what we need and not at what we want.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is an area that is not essential right now and should be delayed to minimise rates increases. Its a want not a need.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: We need BETTER water management but we do not need more increases in rates. By better management I mean more productive working wioth what we have.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: If there seems to be a huge need for a new service then it should be paid for by those that are likely to use it, however I would ask whether it needs to be done now or whether this is a project that could be deferred.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Communities require dedicated facilities for certain activities. Multi-use facilities are suitable in certain areas but it is valuable to have a diverse range of facilities on a localized, micro-level as opposed to large conglomerates that can be alienating to many sections of the community. Some smaller facilities will not be fit for purpose and will need to be sold or replaced - however, it is important to maintain a tangible presence in communities. Large parts of the population are not information literate and are unable to access online services and the Council must not 'outsource' the responsibility they have to these citizens.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why I don't understand how a Business Improvement District functions and what the rates gathered will fund.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I look forward to seeing the City Rail Link come to fruition, and support further development of the public transport network. I hope to see housing supply and affordability increase as I look to my future in Auckland. Strong financial and institutional support for the arts, museums and libraries are essential for an informed and cultured citizenry.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Short-term pain for long-term gain.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to run public services sustainably.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality in the Hauraki and Manukau Harbour is vital. Freshwater to the city is essential.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council owned and/or operated community assets like libraries, halls, community centres, community houses, arts venues and parks ARE the Auckland Council manifest in our city. The privatisation or partial ownership of these assets means Communities would no longer own these assets to be represented. It also means the Council would no longer hold responsibility for their maintenance or growth; this will mean the decline in our civic responsibilities, connection and intersections. Find a way to grow and leverage sponsorship, corporate support and philanthropy from these civic assets without jeopardizing their core purpose and principals. Auckland Council needs to do better at valuing its assets and attracting non-interventionist partnering support.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Auckland Council needs to require Vector to undertake a major and extensive programme to future-proof its network throughout the city. All suburban lines must be laid underground. Dividing trees is fugly and unnecessary.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Auckland Council needs to provide services the city can afford. Partner with a corporate entity that can support the service bus service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Whau Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Continued council ownership and growth of assets like libraries, arty venues, galleries, and parks are essential in a fast-expanding population base in an intensifying area. The re-roading and narrowing of access through roads, is clearly increasing driver anxiety and aggression. Likewise, parking is becoming more limited. While decreasing traffic volume is necessary, movement through the city and around the city has become constricted. Ludo Campbell Reid's urban design has been an unmitigated disaster on our urban street planning. It is difficult to navigate, dangerous and confusing.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Trees, noise control, parks, better roading maintenance, and design, infrastructure - there is a lot to do. Auckland city needs to maintain neighbourhood charm. Auckland Council needs to listen and collaborate with its neighbourhoods and

communities. A greater emphasis on innovative and elevated urban design is sorely needed. Auckland looks like a pimply adolescent city because any old cheap shit is built. We need a premium on better aesthetics. Grand Designs are great, but it must also be Ground Designs; meaning preserve our wilderness spaces, create meaningful architecture that serves grassroots communities and urban need. Community murals are a stale idea, try more professional public art and elegance.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Needs to be a bigger increase

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Protect and enhance libraries

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There is not enough money given to the CBD to keep it safe, clean and vibrant. The city centre is not well taken care of and becoming unsafe.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is important to the city and the country as a whole. It should, however, be considered as part of council solutions not the sole driver.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The increasing population makes this critical.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: More people are living in apartments. These services are essential to well being. Any leasing or shared facilities need to be commercially savvy.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: There is no targets for reducing waste and crime in the area. This area is right behind the City with all the CBD issues of a city. There is an issue with rubbish and dumping but it is not addressed. There is also a huge issue with parking.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing and infrastructure - Alternative one - increased funding - there appears to be no additional trains in the plan to link up the new suburbs and developments springing up. This needs to be considered before housing is put in. It will dictate who can live outside Auckland and who can work in Auckland.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I don't mind the increased rates but there needs to be more spend on Environmental management and regulation and more work done here. Why is the lowest budgeted item on the list when this is one of the most urgent.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Absolutely support this but I think there needs to be more spend and more done.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I think its great that we are improving water ways but they're not bad enough to want to get them done sooner by increasing our rates.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I like the idea of shared facilities, so long as these facilities don't get too far away for some people to get to as it's often people who catch public transport going to these places.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Regarding housing, rates should be increased by a greater amount each year to fund public services. Increasing rates at a rate lower than valuation increases is just yet another subsidy for property.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: If you charge higher rates landlords will just pass that charge onto tenants. I think school buses should be free and uniform costs should be slashed to help child poverty

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I think school buses should be free. If buses were free more parent would send their kids to school on the bus as most families just cant afford it. It will help because there will be less traffic at the schools which will be good for the environment. uniform costs should be slashed to help child poverty

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Because landlords will pass higher rates onto the tenants. I think school buses should be free and uniform costs should be slashed to help child poverty

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I think school buses should be free and uniform costs should be slashed to help child poverty. Also if everyone in parliament and council had a pay cap at \$100,000 we could use that money for parks instead. If you close parks etc down there will be less places for children living in poverty to go to play which is mean. Children living in poverty suffer enough.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Electricity already costs too much. If people live further out from Auckland they should be paying more because Aucklanders pay enough and it costs more money in infrastructure so they should be liable for those costs.

The Upper Harbour Local Board are proposing a new bus service between Paremōre and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I think pay cuts in parliament is the best option. If we have money for them we should have money for everything else

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: A LOT more funding should go into environmental management and regulation. Perhaps take \$1 billion and put in environmental. We NEED to look after Papatūānuku!!!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: the more attention into climate change management the better :)

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: Because I didn't read the plan carefully due limited storage space for download on my phone.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I have lots of concerns about tree-cutting, building construction projects in my neighborhood. I hope Auckland council could resume the protection of trees and other valuable heritage sites. And, probably, I want to see the future of Auckland zoo and spca, if not museums.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We have a lot of aged infrastructure, especially sewage and water mains, roading and even some of our public buildings and areas could do with some love. I'd really like to see money invested in this and would support a one off rates increase of 5% to support this.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I agree with how you are wanting to invest this extra money

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Yes we urgently need to fix this and invest in our aged infrastructure here as well as improving the water quality. If we dont it would be so disappointing for kids not to be able to swim at their local beaches etc

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: just makes sense

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Electricity Network Resilience Targeted Rate on Vector - I agree that the council needs to spend more money on the trees that surround the power lines etc. I live on Francis St, Grey Lynn, not only do we have at least one or two power cuts each year as a result of the trees hitting the lines in winter. The tree roots are lifting our footpaths making them a hazard, as well as lifting areas of our homes - we aren't the only street like this and I'd like to see someone done to better this.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I support most, however what is happening with the cycle lanes that started in West Lynn and surrounding areas - I thought these were supposed to be fixed, however more than 12 months later we still have unfinished cycle lanes which are dangerous.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: According to my knowledge, the council spend money without adequate supervision and wasting money and paying a lot of money for the projects which could be done with very less budget.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The council doesn't have good budget management.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Without good budget management, the extension is wasting more money.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The Council needs to become more efficient and productive rather than a budget to be spent attitude. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Where is the proof "we heard Aucklanders want greater action on climate change." The questions were so loaded that it was an unfair survey. Try asking less biased questions to get true feedback

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: I live in Ponsonby and have been paying a water surcharge for 25 years when our waste water has been "dumped" into Cox's Creek. Think Efficiency within Watercare and try thinking of the ratepayer as a customer, not as a cash cow. This organisation has been incredibly short sighted and mismanaged

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or

rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community facilities should be "core business" for a council. To abrogate this responsibility and reduce services is appalling. This is what a council exists for surely!!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Think Productivity and efficiency, not blind budget spending increases. The Council try to venture into the commercial world disastrously when the should try commercial thinking to rating

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Closing facilities goes completely against what the actions of the Council are

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The Council have a long term ratepayer focused view rather than bureaucratic decisions being thrust upon as is currently happening with AT and Watercare

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Unless the average Aucklander is getting pay increases in line with proposed rate increases then the budget doesn't make sense. From either a practical standpoint, or an ethical one.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is an issue well past needing to be addressed.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This is straight up corporate, bean counting, self serving bullshit. Community groups with decades of history and heritage being wiped out overnight by council policies in this area already. The council exists to support the community. Not 'get a return' on facilities. Facilities gifted to the council by communities (Pukekohe) and families (Leys Institute) deserve much, much more care and respect. And the council needs to provide them as private 'leased' options will never, ever work out to financially for those vital small community groups.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate Change will be creating havoc so anything we can do to mitigate this HAS to take priority; city won't have much to offer if this doesn't get addressed.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is essential to a liveable city; with steadily increase of population there is only going to be more pressure on this.

This should include looking at the health of the Hauraki Gulf

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community Facilities should become more community owned as long they remain as accessible and affordable for community events etc

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: When more people use public transport everyone benefits; meaning the roads are clearer for those who live further away so everyone should contribute equally. It will also encourage people to find places to live closer to bus stops rather than creating disincentive by higher rates

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why increase vibrancy and is along existing bus route

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Top priority should be addressing climate change related issues. The Council should be a role model in this regard and all staff, operations and facilities should be prioritising sustainability principles in every aspect of Council projects etc.; it shouldn't be just one part of the Council that focusses on this. There should also be more incentives for people to do home composting where able, to reduce their waste and to harvest their own rain water and to chose public or active

transport over private cars. Currently I see nothing that encourages more sustainable behaviour, and trying to mitigate worst impact of climate change. There are so many choices individual citizen's can make but this needs to be encouraged, and modelled by the Council.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Having no confidence in Council I would expect "targets" to take 2 or 3 times longer than already over estimated and at 2 or 3 times the cost - unfortunately with little to zero value

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: How on earth do you confuse buses with diesel with landfill ? Council has already completely stuffed Auckland roads with scooter lanes and minimising road lanes to cause maximum traffic delay.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Firstly why not try to explain why Auckland has not had adequate reserves for water shortage.

Paying ridiculous salaries for absolutely zero benefit. Think about the plan instead of dreaming.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: who uses a library these days ? Minimise capital input, repair / renovate as required. No capital for new facilities until ACC can manage their operations.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

cut the trees down and save the cost now and into the future

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: If you provide a bus service let the passengers meet the cost either in fare or rates

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

FREEMANS BAY resident -- doesnt appear to have a "local board" according to your lists.

Strange for the ridiculous rates we pay.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: Don't know how impartial your Proposed investment package report is.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The city needs to support walking - that means pavements have to be physically safe in terms of surface, lighting and separation from wheeled traffic such as scooters and bikes. Kids going slow are OK - others are a hazard to walkers.

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: Need to continue providing for growth & increased population, but, the wastage is also an issue.

What has been happening to all the increased rates & road taxes etc etc?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Hopefully become more efficient with less funds going to 'managers' who may not be all that productive

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It is all very well to keep increasing the rates, but, less & less is actually being delivered into various areas.

For example where I live, a number of new busy businesses have opened up - retail & 2 gyms - creating impossible traffic flows of people, buses & cars in a "No Exit" street. The litter, dumping stuff on pavements & noise is a big problem, so too the parking.

So, over the years we have seen a steady decline of our neighbourhood which is considered inner-city. We have regularly complained to Council but get the usual non-committal generic response.

How would areas like ours be better served by these increases?

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The effect of Covid19 has affected business and household income dramatically. Specifically hospitality business have suffered immensely to a level where most have closed down or suffered massive losses. Some to a level where even supporting thier own families have been a challenge. In such circumstances increasing rate percentage as or implementing new taxes specifically targeted at hotels in Auckland is unjustified.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Fundamental changes need to be made in the structure of the Council before I can fully support the 5% or necessary larger increase. This involves greater engagement with the community and understanding how Council operates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: However much more needs to be done on climate change. such as using regional parks as examples of climate change agriculture and horticulture in reducing emissions.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: There are questions on how efficient Water Care is and this needs to be examined before great increases. Also more local water collections systems [house water tanks] and treatment facilities needed. overall increased expenditure needed

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I put other because far more needs to be expended and changed on these vital infrastructures. I am concerned at the generalized and commercial approach that is proposed.

Savings can be made by devolving to local control of local assets and greater attention to promoting volunteer engagement. There is too much fancy play equipment, paving and structure being put in parks. Eg if old trees are felled why are logs that can be used for play are removed and chipped? Many savings can be made in small ways.

There needs to be far less “mowing and blowing” of berms and parks – let the weeds and grass grow to bring back novel biodiversity. Saving can be made here.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council’s tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Tree issue is a serious one facing Auckland. I do not support funding this unless there is a more fundamental Urban Tree Plan operating for Auckland - street by street or in local areas - with the public fully involved. If large trees area removed an equal space for planting and protecting large trees needs to be provided especially in pocket parks. See Map

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

am concerned over the lack of parks especially informal nature based ones where casual recreation and wellbeing with nature can take place. Also where trees can be planted to address / mitigate the loss taking place as more infill housing take place.

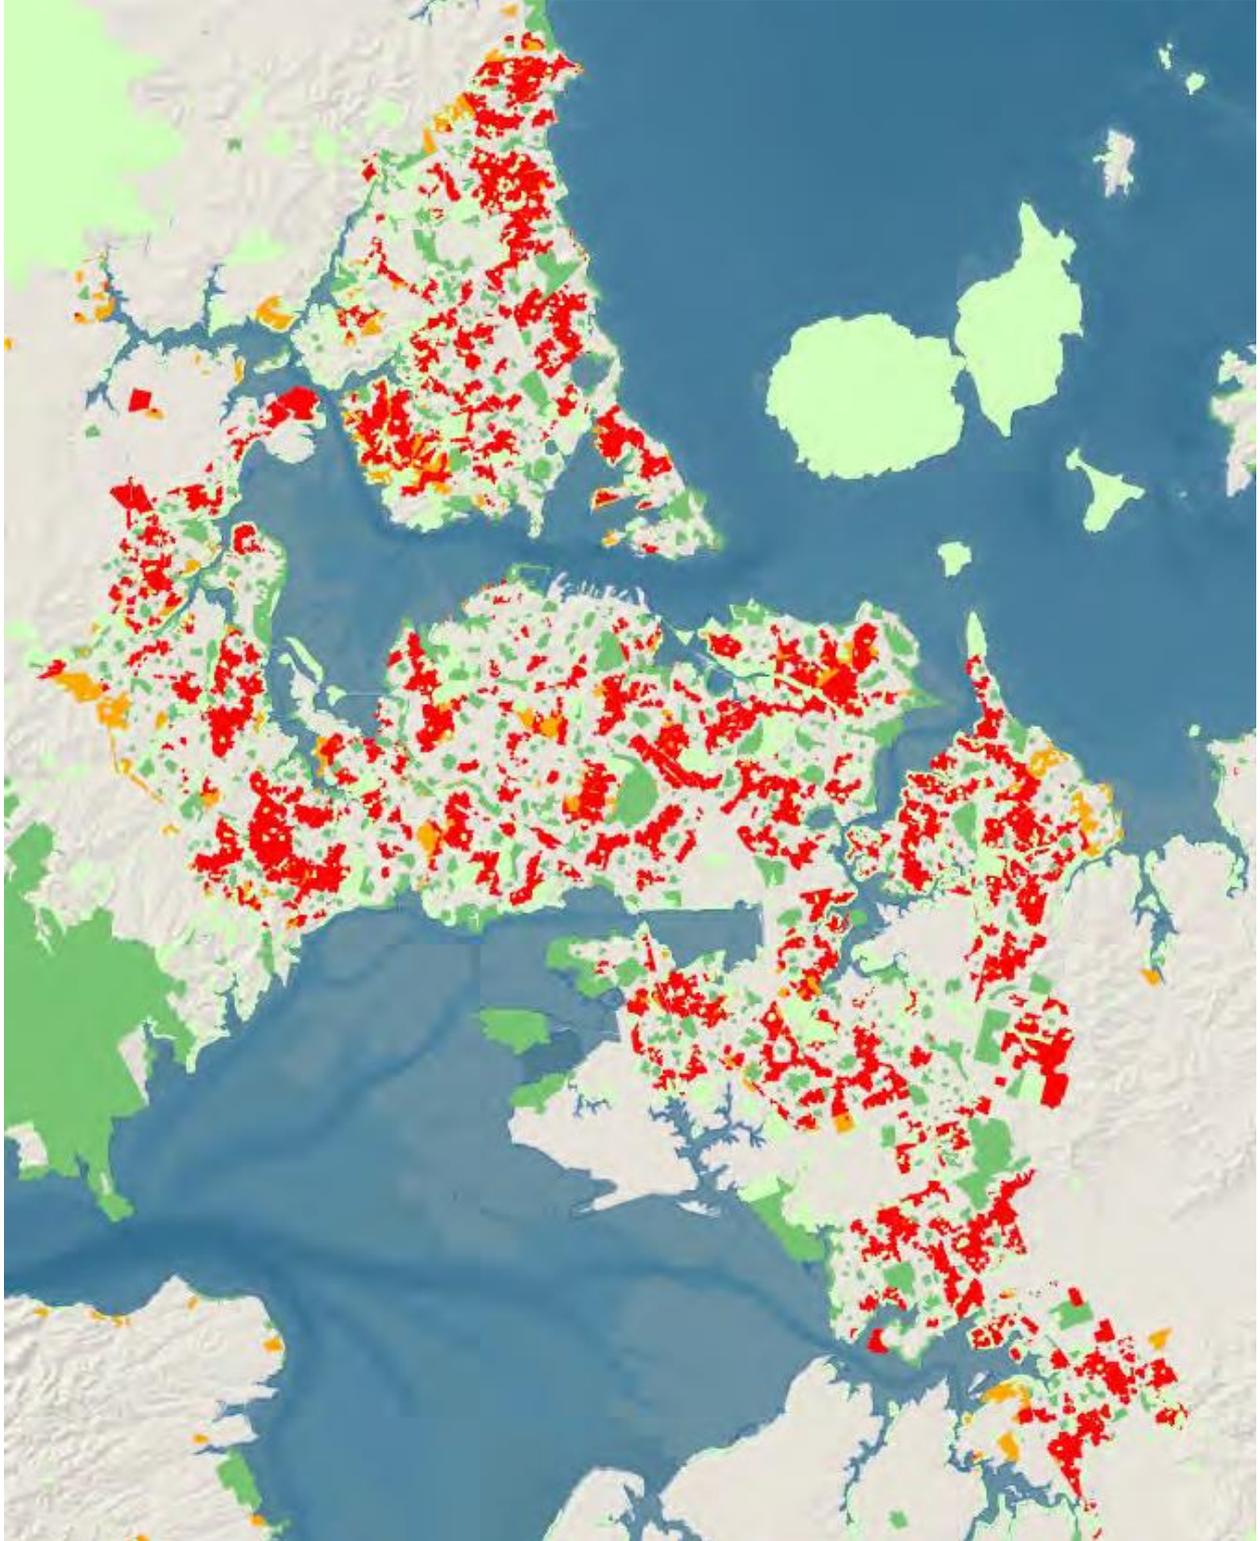

The seriousness is expressed in the attached map. Policies and plans urgently needed to enable future populations easy access by foot to green space within 500 m of where they live.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Already struggling to afford rates

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Buses should be replaced gradually through attrition

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Desperately need to address safe swimming at city beaches

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Environmental management - stop the tree felling on our volcanoes, Mt Albert in particular. Local users should have the greatest say.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Do not support redevelopment of Chamberlain park. Strongly feel Mt Albert needs to be left as is whilst natives grow up around current trees. Mt Albert centre has been ruined by the narrowing of the road, a town square would only make it worse.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why Don't understand what is involved

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Very worried about how current infrastructure will cope with increased housing/population

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need a rates increase of AT LEAST 8%. 3.5% is not strong enough. Covid has hit our communities really hard, and cutting Council services and facilities will hurt even harder. We need to fight back with spending, and while revenue has dried up because of Covid, house inflation has not. Time to support our city with a rates increase!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to at least double this investment, but this is a good start.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: This fee can be increased as well. Wwealthy people are quick to criticise our water quality, but seem reluctant to contribute. Let's do this!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: We need to preserve the community facilities we have now, and not shrink them. We need to spend more on this vital infrastructure, especially because of Covid.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Vector has not supported undergrounding - this is shameful. Vector needs to be forced to do the right thing. Hotel providers and Air BnB owners are getting away with not paying their fair share. They should pay more.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Needs to be heavily subsidised at first, rest of the city needs to help out here as well as the locals.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: Chamberlain Park needs to be opened up to the community. Board members who are not even from the Owairaka ward are blocking genuine progress. The community is very disappointed by this. Why should we have fewer open spaces and community facilities from other parts of the city.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need to maintain our world class library service. Older people get a lot of joy from our libraries Children and young people love spending time in the libraries. Job seekers and students rely on our public libraries for access to vital resources. We need to do our best to maintain the library collections and not lose any library jobs. Covid has shown how there is a disconnect between wealthy and their access to the internet, and the less well off. Libraries are a force for positive social change, and help reduce wealth inequality. It is up to us to support public libraries and keep funding this valuable service.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I support the investment in infrastructure, especially if that entails a large scale investment in public transport, environmental protection and restoration, community development, renewable energy and watercare.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Diesel buses are archaic. We need to make the move to some form of environmentally friendly alternative. Although buses are a small part to a larger solution, we NEED to make big strides to make Auckland an environmentally positive city. More greenery, better public transport as a whole which covers more areas and can service more people and very importantly we must clean up our waterways!

Planting Mangroves across the region would be a great way to give nature a chance to help restore the environment, and would work even better if we were putting active work into cleaning it up as well.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: As stated before, I fully support movements to clean up our water. However, in tandem with technology we should also be using nature as well. Water cleaning facilities would be great, but working in tandem with Mangroves and other wildlife which naturally cleans water? That would be perfect.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community is so important in keeping Auckland a healthy place to live. Fully support the investment into these beautiful places.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

We do not need to keep building outwards!! Building further outwards and destroying more wildlife is stupid, we need to build UP. Apartment buildings, skyscrapers. We are a CITY. We should not be afraid to build these structures.

On top of that, we should be working towards eco-friendly buildings that can support wildlife and plantlife. I know those are hard to do and aren't quite there yet, but we should be working towards it!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I just want a serious push for environment, infrastructure and community development. Don't listen to rich people that just want to have as much money as they possibly can, those people's brains are poisoned with greed.

We will ALL SUFFER if we do not make these investments and move on from the archaic ways of the past. Those old conservative farts in their big houses preach about the economy as if it's a god or something, when in reality we need nature more than big numbers in our bank accounts.

Anyone who doesn't support investment into the natural life of our city, region, country and world are psychopaths and should not be listened to. They will happily watch everyone, including their descendants, starve and die if it means they get a bit more money in their pockets. DO NOT LET MONEY CONTROL WHAT WE DO!!

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I am happy to have the proposed 5% rates increase but would like to see more investment in responding to climate change and less investment in roads and car-supporting policy. I would like to see more spending on cycleways, public transport, green spaces and diversification of planting in Auckland.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support increasing investment in responding to climate change and reducing carbon emissions however I believe the Auckland Council need to go further than what is proposed. I would support greater investment in cycleways, public transport and reduced spending on roads. I would support greater charges for parking to incentivise use of other forms of transport. I would support intensification of housing density in the central city to enable better use of public transport and lower emissions travel.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I do not support the further investment in cycleways which are rarely seen with a few cyclists on them. I do not support the further extension of bus lanes, buses and investment in light rail. I observe many buses driving around with under 10 passengers and many buses with zero passengers how is this a good use of rate payers money. I likewise dont support the further narrowing of already narrow roads to provide cycleways. what I do support is safety upgrades of roads, resealing undertaken regularly as many roads are uneven and pot holed. I am rather tired of our rate payer

money going towards these projects and further limiting spending on actually fixing Auckland's transport routes - we are an undulating city that is very spread out and it doesn't make sense that much of the work force lives in far away suburbs and they do take cars for many reasons. I would like to see work done on the congestion of our motorways and arterial routes as for people who are still rate payers but needing to get to appointments are impacted by congestion delaying our travel time also

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I do not support replacing buses which are almost new they should have a 5-7 year phase out plan it is more impact on the environment to try to recycle these buses which many are very short into their useful life. I do support climate initiatives but this one is a ridiculous waste of money there should be more accountability put into these ideas and council should act as if it was a private company when making decisions so as not to be wasteful with financial resources

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council's mis-manamgenet of funds is legendary

No one else can just demand an increase from who pays them because they 'need more money to live' - why should council.

Also - stop paying Watercare CEO the salary he was on, how many others are being paid high salaries and can't even provide the one job they have to provide to the public of Auckland.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Why does the council not go on a large native tree planing project.

I would have less of an issue with rates increase if something like that was announced than to repair water mains - that should have been fixed 10 years ago - but you know, paying the CEO high salary was more important than infrastructure repair.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Do you have any figures as to how many people will be using this service.

I think perhaps a 6 or 12 month run of the service to see if it will be successful should be done, before its implemented full time - and should be funded from the already well funded AT - who seem to be a law unto them selves and responsible to now one, not even council.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why Its already a nightmare to travel down Dominion road - as well as Sandringham Road, as well as Mount Albert Road..

I assume AT will just do watever they can to stop people from getting around these areas, so no point in answering this question really is there.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I don't support spending money upgrading sports fields when they are often empty and there are facilities at schools that could be used by the community if it were arranged.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I'm not going to claim to be an expert, but I question why Auckland's budget is so low and shortfalls have to be filled internally when we are the economic powerhouse of the country and more than deserve better funding from central government if the country wants to recover. I don't believe a rate increase is the solution, rather a better solution would be better central funding.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is vital that Council continues to invest in core services and to avoid falling into an austerity mindset.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support this increase as the best option given but do not believe that this level of spending will be sufficient to reach our vision of a zero carbon economy. There needs to be more of an emphasis on realigning the existing budget to shift spending towards climate action and away from carbon emissions. Auckland Council and its Council Controlled Organisations need to examine the spending they have locked in for the future and analyse the effects these have on climate change emissions. Building more carbon intensive infrastructure, such as Mill Road, will lead to an increase in car dependency.

Add specific ideas about kinds of transitions we need that may be achievable with Option 2's \$320m: eg accelerate change to a zero emissions bus fleet, dramatically accelerate enabling Aucklanders walking and cycling, diverting more waste from landfill.

PLEASE (!!!) more protection and better restoration for Hauraki Gulf (protect Kennedy Point) and more tree planting + look after our current tree for example: Canal Road native trees.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

7. What is important to you?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I have watched over the last several years that the council has stopped mowing berms. If we want a first class city, we need to mow berms. If you travel around the country as I do, you will see that most councils mow the grass and make their city look good.

We also need to get rid of beggars on Queen St. It is a disgrace to have beggars every 20 mtrs.

We also need to outlaw smoking in Restaurant and Bars outdoor area. Disgusting.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates need to be reduced and costs reduced. If you dont have the money dont spend what you dont have. Some planned expenditure should not be undertaken. Costs for ratepayers are too high.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: You dont have the income to undertake all you plan to spend

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Present ratepayers should not be hit with extra costs. Do less now.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Spend on items that benefit all such as parks and libraries rather than some that benefit only a few

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

City centre targeted rate should be paid only by business and not residential rate payers in the suburbs

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why: Better to reduce rates and not spend the money

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Existing ratepayers should not subsidise new Auckland residents. Get funding from central government. Auckland Council needs to reduce staff and the large number of highly paid staff. These are not required if the Council only did essential things required in a city. The expenditure in Quay St creating wide footpaths for example was totally unnecessary when rates needed to be increased to pay for it. Funding Social issues are the responsibility of central government and not local councils. The increase in rates since the super city was created is totally unacceptable.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The council is renowned for being wasteful, so they need to change tack and tighten their belts and become efficient rather than so wasteful. Despite rate rises, they never achieve any more, and in fact reduce services at the same time. Why would an increased budget result in any other outcome

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The Council have not the expertise or capability to achieve anything in this area.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: The Watercare organisation is inefficient, and increased funding only increases their inefficiencies.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: These facilities should be making some sort of profit, so the maintenance can be managed from those funds. How is a hall can be hired, but not charged for maintenance. Libraries are slowly becoming irrelevant as well. The only thing that really needs maintenance are parks which are widely used by the public

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why: They do very little, so it would seem it is a waste of time for the local board to exist.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Other

Tell us why If other businesses want to join why not, but it should not be just another trough for someone to get their snout into.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Release more land for housing

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Far too much unnecessary expenditure within council

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change - which has yet to be proven - is a main government issue and as such, local government should focus more on city infrastructure. Why is council considering a land fill in Dome Valley?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This has been spoken about for years now and every year the water quality of inner city beaches deteriorates, too much infill housing with little regards to the infrastructure that is needed to support more population growth.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: its fine to put everything online but it is the interaction that makes a community. Shutting people out of community facilities will eventually lead to a greater mental health problem overall. This is where council needs to be putting a great focus on.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Rates income and council expenditure are not transparent enough, there should be more transparency in regards to contractors hired for specific works and terms of those contracts should include guarantees for the work commenced. Too much expenditure on consultants instead of the paid workforce actually doing their jobs. All departments needs auditing and to be accountable to the ratepayers for dollars spent.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Public transport is abysmal in Auckland, the construction of high rise apartment blocks will lead to more congestion as Auckland slowly gets so choked that moving around the city will be a logistical nightmare, and STILL there will be the people that need to use their own vehicles, it's the layout of the city! The reduction in major arterial route lanes over previous years and the lack of use of clearways in just plain dumb.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Attention needs to be on improving roads, not creating nightmares with cycleways. Plenty of berm space means the footpaths can be made wider, then with a centre lane down the footpaths they can ride there (as plenty of them do now!). Simple education to home owners and cyclists alike would ensure it works and far less expenditure.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why Dominion road is one of the last shopping experiences in the suburbs, maybe council could make it better by running free bus shuttles up and down, better than a tram in the middle of an already narrow route. Stop ruining small business by taking away their parking and accessibility for both shoppers on foot but also the ones who want to 'stop on the way' or try and shop local.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Little thought has gone into the infrastructure needed for the growth of the city over the previous years and now it becomes a knee jerk reaction. Too much money is being misspent and allocated to areas that have not been prioritised correctly. More accountability in the expenditure department including contracts and contractors, maybe the council needs to go back to being an employer rather than using contractors, they could become the city's biggest trades apprenticeships program, empowering people with employment.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Housing is a mess and if the bit of extra cash helps fix it then good.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The planet is dying omg, good for the electric buses

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Build an industrial composting plant so we can make a switch to compost able plastic and have a compost rubbish bin system!! (Also recycling in this city is a joke, maybe make it so we can sort our own recycling at stations and then people are more aware and we can recycle more effectively). Housing is a mess and if the bit of extra cash helps fix it then good.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: This is bringing an additional financial burden on Auckland home owners during this critical period of COVID-19.

Rate increase can not be one way of addressing the challenges of climate change and environmental sustainability.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is not a critical issue for now.

We need to be considerate towards the people suffered and still suffering from COVID-19 pandemic.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Again this can progress at a later stage. The water quality that Aucklanders use is of a good quality.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Should not trigger major cost that would impact only ratepayers.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Other

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: A step in the right direction but woefully inadequate in a city that has one of the highest per capita petrol car ownership rates in the world.

Those T2/T3 lanes are flimsy plasters in a transport network that is utterly dominated by cars.

Please hurry the development of greater cycleways and train networks. The current situation is completely untenable.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I think there are other ways to fund the 1b deficit- by taking up rates there may be a longer knock-on effect of inflating rent prices due to passing on of the rates

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Until public transport becomes the majority mode of transport, I think that the changes will be more cosmetic rather than having the intended effect of reducing the carbon footprint. Better to encourage car pooling or increased use of buses through better planning etc.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are high enough now

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is left wing propaganda

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: The cost should be shared by all Auckland including people who rent and the unemployed and Maori

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The rates are high enough as it is , The cost of this should be shared by all Auckland including people who rent the unemployed and Maori

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Way too much focus on "wrong" spending. The introduction of the Super City was promised to reduce costs and this still has not been realised with so many "self" interested parties and a succession of incompetent leadership.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: See Q1.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Too much financial waste in areas of council expenditure. Focus needs to be placed in these areas before further 'theft' of rate payers is undertaken. Why hasn't water quality been a focus since 2010?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Support the principle of libraries and community. However, the description of proposal concerns me that this principle will reduce further and eventually fade away, as the political class scramble for more money in the future.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Require further investigation before being able to comment.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: Over the years I have seen a lot of wasteful spending and unimpressive "wins". The local boards achievements have been totally underwhelming and, frankly, disappointing, especially when hear all the 'back slapping' every three years at election time.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Other

Tell us why Don't know too much to be able to comment but having seen other similar projects, I am dubious about a positive outcome.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

There has been a massive increase in housing, especially apartments in the urban areas over recent years, thereby increasing population significantly but no changes to infrastructure to support this. This is causing a decrease in the general quality of life.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support some of it but a Covid hit country on less wages do not need a Rates increase , we can't afford it and are struggling to pay rates as sit is

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We need to Waite ten years before we implement this as I don't believe auckland can afford it at present , spend money wisely for a few years before this

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I don't believe the average home owner can afford this in the present Covid climate , wages have gone down not up

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Again the average house hold can not sustain a rates increase We are all trying to recover financially

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Any increase in rates will effect me and the way my family lives , we have been hit by the Covid effect and wages are down massively for us , we are struggling to recover and would have issues with increased rates

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: Not enough understanding of economics but know that work has to be done somehow

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: No brainer. More trees for Auckland and more cleansing of Waitemata

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The Waitemata is a taonga

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Libraries are a sanctuary

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Trees are more precious than \$

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Don't understand properly

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: Trees and Ocean are more impressive than cycleways

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why No info but an dead area that could be more people friendly and less like an inner city highway

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

No up with info

This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Live within your means. Focus on core necessary expenditure. Less spent on stupid pet projects of people with no clue, causing traffic and mayhem, and other 'feel good' crap.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Be responsible but dont go overboard.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Older more established areas with insufficient infrastructure should pay more to help bring their supporting infrastructure up to standard. Exclusions being new developments that should have this infrastructure correctly set from the start.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Dont believe there would be demand for this service

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: The biggest drawback will be on people who are renting the houses as landlord will eventually increase the rents b/c of rate increase on property. This will led to cycle of instability among families who are renting.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Well that's the future we need to cut our carbon emission so best option is electric public transport as well to grow more trees but would recommend to grow trees with fruits so that same time it can benefit community .

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: We should find innovative ways and organic ways to sustain our water demands and quality. It is better to invest in research and development programmed to achieve this goals.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: To lease the community assets is okay that will generate some revenue which can be used for maintenance and work.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: It will cost individually less and cut their overheads.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The most importantly I would like to have planning for twin city concepts which are used in most developed countries like USA, Singapore, Malaysia etc.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: I haven't read it fully

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is an important issue, I hope that more work will be done to incentivize public transport use

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I hope that some of the spending will go to community group efforts so that coordinators can be paid properly and local efforts get better publicity

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I am concerned that there will not be enough community facilities within walking distance and that the land where decommissioned community buildings are on will be developed, one of the good things about underutilised community buildings is that many of them have green space and access to green space is important for our cities future

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: It would be great to have a disc golf course in Albert - Eden. This sport is popular as it has extremely low barriers to access (a pack of 3 discs is \$40). It is not intrusive so can be in the park sharing space with walkers, cyclists, families and dogs. Neuro-diverse people struggle with team sports, disc golf is one of the few sports appropriate for people on the spectrum. Disc golf is good for physical exercise and for people to connect with their local community and environment.

It would also be great to have more community gardens in Albert-Eden, with intensification fewer people have access to growing space. Gardens are a place where people can connect, learn skills and continue cultural practices

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I hope more funding will be allocated to town planning, green spaces and community facilities

Tell us why: It's not enough to make a difference

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Our children wont have a decent world to live in if we don't act now

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Its a waste of money if we don't

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Investment in recycling

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I don't support a 5% rate increase. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is not a priority - stick to Council core business

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do not support any changes that result in a 5% rates increase. I want Auckland Council to cut costs internally, before passing increases and non core business to the rate payers

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support an ambitious investment in a better future for our city. The proposed 10-Year Budget doesn't meet that vision. It is not ambitious enough and does not achieve the necessary changes.

I am disappointed that so little is being set aside for climate change projects. Less than 0.5% of the Budget is dedicated to climate change efforts. I am disappointed that councillors voted for the least ambitious option presented to them. I would like to see councillors get behind the more ambitious option that was originally proposed.

There is no excuse for Council to keep investing in things that are causing pollution to the climate. All of Council's investments, from now on, must contribute to building a safe and stable future for current and future generations.

I encourage Council to pursue a much more ambitious investment in accessible public transport, safe cycleways and safe footpaths. Council needs to direct its efforts to the things that matter most. Right now, transport is our biggest source of climate pollution. It's happening because many people don't have the option to leave the car at home. Investing in accessible busways, trainlines, safe cycleways and footpaths will give more people climate-friendly transport choices. The more people who are able to make the switch, the more space there is on Auckland's existing roads for those who really need to use them, including persons with disabilities or tradespeople. I don't want to see more investment in roads. I want to see a much bigger investment in accessible public transport and safe cycleways and footpaths.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Instead of widening our roads get more busses to be reliable enough and cheaper fare for public so they dont use much private cars.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Concentrate on core services (roads, rail, services etc) to Aucklanders. Don't waste our rates \$ on things only used by tourists and a small number of Aucklanders. Remember the residents of Auckland also went through COVID and some have loss income and health. People feel when the council wants to fund a project, they put rates up.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Let central government lead the way on climate change. Its our countries problem not Aucklands alone. Focus your spend on essential services which are lacking.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Let private business deliver assets that attract visitors. To the rate payer, they see no difference between a council owned venue and a private one. The entry \$ is the same. Stick to core services.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

We are tired of having rates increases to fund council spending desires. You are a cost centre using our money. Show us value instead of spending like there's no tomorrow. Remember house values mean zero until you sell.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why: What I would have liked to see was a priority for cycle lanes in our area. If Pt Chev road had lanes, it would like to the western existing lanes. Meola road would be costly but link to existing lanes in west Lynn etc. I'm terrified my little kids will fall off the thin strip of footpath on the sloped part of meola and will fall onto the road in front of traffic. We won't allow our kids to cycle alone and we would with bike lanes (and we would reduce our car use also). Even road cones or cheap cycle lane options would be fabulous, pt chev road seems a no brainer, it's enormous.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What's important to me is community facilities, cycle lanes, education programs, sustainability and livable communities where a diverse range of people can thrive. Maintaining existing library services is extremely important to my whanau. What I would have liked to see was a priority for cycle lanes in our area. If Pt Chev road had lanes, it would like to the western existing lanes. Meola road would be costly but link to existing lanes in west Lynn etc. I'm terrified my little kids will fall off the thin strip of footpath on the sloped part of meola and will fall onto the road in front of traffic. We won't allow our kids to cycle alone and we would with bike lanes (and we would reduce our car use also). Even road cones or cheap cycle lane options would be fabulous, pt chev road seems a no brainer, it's enormous.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: People who own property should fund Auckland's infrastructure as they can afford it

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Reduce carbon emissions, plant trees, increase protection for existing trees of all kinds not just native - WE NEED TREES!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It is as that so many waterways in the Auckland area are polluted. Improve storm water structure and increase regulations to make sure companies are complying. BIG FINES FOR THOSE WHO BREAK THE RULES!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I'm not sure about this - it isn't as important to me as pollution and climate change and taking action to protect our natural environment but I know we can't do it all.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I think people who own property and therefore pay rates should have to pay their way more and may have some increases coming in order for us to achieve what we need to. They have the equity in their properties with the housing market the way it is, so they should shoulder a heavier burden, especially those who don't live in their property ie developers or investors - they should pay BIG!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: That's not a lot to pay

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: It sounds a bit wishywashy - hard to tell exactly what that all means. Are you going to stop cutting down exotic trees on our Maunga - that is very misguided and underhand something most Aucklanders don't even find out about until it's too late! We also need bigger rubbish bins and recycling bins at Point Chev Beach and elsewhere I'm sure. And if you could stop planting native trees in inappropriate environments for them and walking away to let them die - it's depressing and a waste of money - not to mention the life of the tree!

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Protecting our waterways from pollution and cleaning up the polluted ones, increasing protection for our trees - not just native ones but exotics too as they all provide habitats, not letting developers get away with cutting down trees or

polluting the land, climate change initiatives such as making public transport free - only then will you stop people using their cars.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The Council is quite capable of tightening the budget simply by stopping the extravagant funding of "Politically Correct" hair brained issues. One example would be the Statue in Potters park, another the use of contractors to cut sown perfectly good trees because they are not natives (What ever that means) and replanting with "Native grasses"???!!! e.g. The Mt Albert proposal. These just a couple of issues - I wont wasted time on pointing out more - **STICK TO ESSENTIAL SERVICES THAT IS THE JOB OF THE COUNCIL** -

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The Climate has always been changing, despite the ongoing never ending propaganda - there is NO consensus that AGW is a factor. I suggest that there is a "vested Interest" in promoting this modern myth. Moore's recent Documentary film "Planet of the Humans" should be required watching - your proposal for electric and Hydrogen !? busses is pure politically correct fantasy. DO SOME HOMEWORK. NEW BOOK OUT ON THIS - BY THE FOUNDER OF GREENPEACE NO LESS. Patrick Moore - "Fake invisible catastrophes" and many others show the FACTS

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: If there was any council transparency we would be told why there is a "water shortage" in Auckland - It is purely due to bad maintenances of the lines from the Hunua Dam and the hiring of incompetents to run this so-called watercare farce. Check it out!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: so - you are going to do what exactly with the so-called assets? in the name of consolidation -? you are already increasing rates every year - are you going to sell them!? built and paid for by generations of auckland ratepayers.. as for reducing "carbon Footprint" ? Uh ? another meaningless politically correct term - it will make absolutely no difference - it might make your propoganda department feel good, but are you not simply transferring these to the proposed "partners"?

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Public transport should be on a user pays

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: I fail to see what so-called Climate change has to do with any of the Key Advocacy initiatives.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Other

Tell us why does not concern me - I fail to see why the Council should be involved in any of the dominion road businesses anyway except for bleeding them for Rates.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I wish to see Council using single language only - commonly understood - ENGLISH. The continual "peppering" of your correspondence with Maori words is a source of irritation. This is nothing but "Political Correctness" if the Council wishes to communicate in Maori - by all means - after all it is an "Official" language - but use a separate site for those who wish to communicate in this language. I need not remind you that the Chinese and pacific island communities well outnumber those of "Maori". If you are to be consistent - instead of discriminatory - please start using Tongan, samoan, Fijian & Chinese mixed in with your communications. THIS IS BECOMING INSTITUTIONALISED RACISM

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why:

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I think it is important that the council implements prudent financial management and reduces waste spending before putting more burden on ratepayers

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland has historically suffered from underinvestment that is yet to be remedied given the growth rate. Rates increases are the best way to address this.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This does not go far enough. Not only does the public transport fleet need to be de-carbonised, but public transport should be made free and prioritised as a mode over private vehicle trips. It needs to be cheaper, faster and easier than driving or of course people will drive as it's the most convenient solution. AT/Council needs to take proper action here - often it will involve measures to make driving less convenient. I love the pipeline of seedlings and replanting of native forest. I want to see more of this, and opportunities for the public to volunteer to speed up the process.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Past history shows that Auckland City Council is a waster of rate payers money e.g. the underground railway. What a shambles all for a Mayor to have his name put on a plaque. What an outstanding citizen he was. Also truth and honesty are humble values of human kind yet the Council sees fit to hood wink land owners into selling without revealing the bigger picture i.e "stay in your home as it will be worth thousands more down the line".

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: clean, green fresh air can't be beat and the wild life would also appreciate same

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: the water quality is terrible as the amount of chlorine is so high you can smell it straight out of the tap and need to run the water for a good 3 to five minutes therefore wasting water which we preciously need.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: great to share

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

As long as vector replaces tree for tree then nothing lost. Of course in suitable areas that would greatly benefit from tree plantings and make them native

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: buses are empty because the bus routes aren't user friendly and travel by bus takes ages. Why would people give up their cars door to door in half the time

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why: because money is being wasted and usually done by poor management decisions which usually go against the majority. Underground rail when you have a bus system that covers that route. Ridiculous.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Support

Tell us why More business more jobs

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Increased safe housing, more housing, house the homeless, improved infrastructure that is affordable and user friendly

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why: More progress around shared coastal paths would encourage cyclists and walkers and raise awareness of biodiversity in these areas.

What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

focus transport spending on shared paths that advantage cyclists and pedestrians. Enhanced tree protection to safeguard loss of these habitats. Coastal pathways connect our people with our coast and develops respect for biodiversity that thrives there and also brings the importance of water quality to front of mind. Finally, the effects of climate change will be extremely varied. Those of us who continue to build and develop on low lying land or soft cliffs subject to erosion should bear the costs of their losses in the future. The council cannot rely on central govt alone. Consider targeted rates for coastal hazard.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option
