# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Organisation (if applicable):

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension and the increase**

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Do not support**

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

#### **Tell us why:**

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

#### **Tell us why**

## **7. What is important to you?**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** many people are not in a position to service a 5% increase in rates. Rather, the council might want to look into reducing the expenditure to manage in a post-COVID economic climate. OR to extend the 10year plan to a 12-year plan to cope.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** unless we also have the infrastructure and planning in place to get more people onto busses this spending could be better used elsewhere.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Because to place an extra burden on households will only add to the difficulties Aucklanders are facing.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** This is a option to only touch the surface of what is needed to make a difference on the issue of climate change. Companies that add to climate change need more regulation. Start with the offenders.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** There must be a greater focus on Libraries as our education standards are slipping further and further. Libraries allow those who cannot afford books for research or leisure to have access to a vital resource that promotes Reading and Learning

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

There is currently TOO MUCH focus on the city centre. More focus needs to be place on areas such as West and South Auckland

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** The plan is too wishy-washy feel good stuff. There is no mention of important works that are needed such as the upgrading of Lincoln Road which is arguable the major link road in the Henderson area

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

There needs to be a focus on learning opportunities incl a focus on libraries, museums (zoo, war memorial museum, maritime museum, MOTAT etc.). There needs to be a major upgrading roads to handle future requirements (e.g. Lincoln Road) that are barely coping now.

Government needs to be consulted to get the second harbour crossing underway. The container truck accident showed just how vulnerable the current showing is, yet there is nothing in the plan for this vital infrastructure

### **Important privacy information**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

**Tell us why:** A lot of it seems very vague, a 5% increase is HUGE considering the people of Auckland were affected from COVID-19 just as much as the council and government were affected. We have already suffered. Some areas it seems budgets that could improve resident wellbeing have not been a priority for the Council, and areas that might make Auckland look like a super-city in the eyes of other countries have millions in the budget. Pause future investments

for now, and focus on rebuilding our communities, our waterways, water supply, and rebuilding our businesses, and our homes. Focus on the people!

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** During this period of financial struggle, I would prefer mild investment that concentrates on what our city needs now such as landfill solutions, "trees for babies", and cleaning waterways, not other luxuries such as fancy buses.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Other

**Tell us why:** More action should've already been taken. Including hiring hundreds of people to pick up rubbish and debris on a regular basis from around our waterways, planting around the streams and coastal areas are all things that can start this month with less financial investment. "Work starting in 2028" seems a little ridiculous, things can start NOW.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Other

**Tell us why:** The community needs our city council to provide these basic services, and family focussed events, and family focussed venues. Libraries are important to the community, it provides a safe place for children to meet and

interact in a wholesome way. The centres provide services that no private company will be able to provide. Find another way, such as \$1 fee for people using the centre, or library, don't force rate payers to pay for everything and prioritise a budget for the funding needed in our communities.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

no

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Do not support either option

**Tell us why:** Why have you been unable to provide these areas with basic needs such as transport. Assign more budget to the communities

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I feel more emphasis could be placed on a Henderson Creek clean up and maintenance, as well as finding more land that can be built on for Kainga-Ora projects to create more homes.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Creating communities that are still green and beautiful for our mokopuna

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Like many people I am frustrated that Auckland has not kept up with demands of a growing population. Previously it has always been about NOW with apparently little forward planning. I don't like the idea of increased rates anymore than anyone else but recognise we have to turn things around. We have to play catch up on the inadequacies of the past and bite the bullet for the sake of the future.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** If we continue to abuse our environment everything else is a waste of time and money.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Don't know

**Tell us why:** While I recognise the importance of the waterways this section is hard to assess alongside the water shortages we have experienced. I know it's not the same, but can we also sort out our water crisis & future proof Auckland's drinking water.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** This sounds to me to be 'outsourcing' and my experience of this has been less than positive. The companies themselves are there to make money so I feel there is a mismatch of purpose. I would support a plan that focused on good quality STANDARD facilities- we can't afford state of the art, top of the range buildings. The library at Westgate being a case in point. When times are tough you do what you can and do it well, you do not go top end.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Charging farm & lifestyle properties: This would make some farmers leave, lifestyle blocks become only for the rich.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** It is not up to individuals to pay based on their proximity to a bus stop. The provision of a bus service is for the benefit of the community and as such they pay through rates and taxes. I do not live within walking distance of any bus service and I do not expect a refund. Having bus services is about getting people to work, productivity and health - everyone benefits, everyone pays, just build it!!!

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** I can not see how these address the following issues

- dreadful traffic congestion
- Westcity & surrounds tatty and unwelcoming (how many \$2 shops does Henderson need)
- too many less than A graded food outlets
- rubbish and graffiti
- with the increase in properties in Henderson, Swanson, Birdwood, the train car parks are all too small. You should be planning for when the inner city rail link is finished, promoting our area as easy access to the city, getting cars off the roads.

I do agree on the need for more water facilities, West wave is woefully inadequate and not well situated for traffic congestion.

## 7. What is important to you?

### Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

In the west, the rail system is such an asset. There is an opportunity to make this the most amazing place to live and still get to work. There is so much building going on but I see no real plan for the future of our wonderful region.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** As Aucklanders we have been paying far too much for our water and absolutely nothing has been done in the past to support the increased infrastructure in this area. Watercare are a joke, and until they can prove that they are capable of managing Auckland's water issues, then no additional funding should be given - they are all paid far too much and I resent having to pay additional funds for the incompetence shown so far. Charge Aucklanders when the issue has been resolved, not before.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** We need more community hubs, not less.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Be bold, be decisive, and serve the longer-term interests

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Supporting any climate-change initiatives as long as it serves the city's best interests and promote new development opportunities.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension and the increase**

**Tell us why:** Absolutely a necessity, get on with it;

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Support**

**Tell us why:** Get on with it but use money wisely;

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Support these initiatives but use money wisely; do everything as if you are never gonna regret it when talking to your grandchildren and beyond.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:** Never go with the stingy option if the better option is only pricier upfront.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why** No objections.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Amenities including playgrounds, walkways, library, shops etc.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Community services – especially those that allow face-to-face interaction, provide quiet places for people to reflect, etc. are much more important now than they were before Covid and before the digital age. I do not support the closure of any such services/buildings that provide them. There is no need for yet more 'social distancing' by way of online services; that is not how a community is nurtured.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

I am a renter, not a rate payer, so I will not comment on these. However, I support any policy that aims to protect, preserve and improve our environment.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

**Tell us why:** I don't live in the area, and I don't know the situation. I have no idea how well used the service would be therefore can't really comment. I would say that both options sound like a lot of money to charge a household that may never use the service. But I do in general very much support the improvement and promotion of uptake of public transport.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

#### **Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities**

**Tell us why** They all sound reasonable to me. I don't know what the Te Rangi Hiroa Reserve nursery site is and I was unable to find out more information about this online.

## **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I'm commenting on the housing and growth infrastructure proposal: this is a huge topic of which I'm not that informed, to be honest. The following is based on my observations, and may not be relevant to Council reach. What I know is that I'm a 45-year-old, university-educated professional who is unlikely to ever own her own home in Auckland due to the insane housing prices (because I was unlucky enough to be born to parents who did not, for example, buy a house in Devonport in the 1980s and therefore have no means of undersigning any mortgage for me). I also rent a semi-rural property out West and am troubled to see rural land rezoned for residential developments that are dotted higglety-pigglety around the place with seemingly little thought given to the impact on the surrounding areas or to the infrastructure that will serve them. Rents are also insane in Auckland, so I would like to see attention paid to curbing rent prices, as well as the soaring property prices.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Because we have been taxed enough. You need money to do project A or B why don't you use the money that's already been taken from our account? If I create the property rate by 5% and use it to contribute to the current project. When will you EVER lower the rate? Will you lower the property rate once the project is finished? I guess not. I carried 30 years mortgage to get my first home and me and my partner are hard working tax payers. We do not want to see our hard earned income been abused on some random projects. If you need the money, cut your own costs.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** I don't support it.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** I support the extension but you can get your fund via cutting off your own costs.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Other

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Build more houses to solve the housing crisis. Maybe importing premade houses because the NZ Labour is not making enough. Without increasing supply the house price will go up and no one wants to see that keeps happening.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** 5%? First you acknowledge the impact covid has had on all aucklanders, and then you up the amount we have to pay what what feels like no palpable change or increase in usable services?

You haven't outlined why the budget is so outrageously blown. You haven't outlined what steps the council is taking to reduce costs. It feels as though you're passing the buck on to the average aucklander for an incredible misuse of previous years funds. 5% is massive and given that you've now lost trust, I do not believe it will be "one off"

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Don't know

**Tell us why:** I don't think the diesel busses should be replaced until they're ready to be replaced. Agree that any new busses should be more climate friendly. However does this cost get passed on in bus fees? I drive to work because it's cheaper than the bus and I cannot afford the bus.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** Please sort the water. It's a real shame it's got this bad.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Don't know

**Tell us why:** It's unclear if this privatization would then result in a user pays model. Which if I am already paying increased rates, to then lose the few basics like free access to the library, would be a real blow to the community.

You need to provide a lot more information/ guarantee that this isn't just passing the expense on to the public in a more hidden way.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

There is no tree management. I can not get assistance with an overgrown oak tree that is damaging my property.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** So if someone lives near where you decide a bus stop is needed, they have to pay for the bus stop irrespective of whether they use the bus or not? This is so unclear

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Safe roads. Safe schools. Affordable public transport that runs more frequently. Safe water.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** The work needs to be done and it is not going to get any cheaper.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** It just needs to be done

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** The sooner the better, NZ's water quality is a disgrace.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** There needs to be more shared services or facilities to better utilise assets and keep costs down

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:** User pays

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Maori have too much say in what happens. Community led initiatives are more likely to end up in local squabbles and not be very efficient.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

There is far too much red tape and not enough common sense. The council needs to make the decisions, do-so in a timely, cost effective manner and take responsibility if things go wrong.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Woe betide Goffs future if he reneges on returning the rates to 3.5

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** This is a central government problem who are bound to increase taxes for this purpose. why should rate payers be stung twice

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** Water are needs a careful looking at to see where their ( our) money is being wasted

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Why should vector which means the ratepayer pay for city council ineptitude when it comes to council planted trees causing outages/ vector having to carry out preventative maintenance to prevent outages

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** We May have had a covid lock down but during this time we were still paying rates So council still had the same income. Start using our hard earned dollars more wisely and you won't need to keep increasing our rates. Use the money on important things in stead of wasting it installing overpriced sculptures.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Council will have received huge amounts of money from developers and builders getting consent for properties to have multiple buildings built to replace one. This infrastructure should not be now many years later falling to the rate payers to cough up for. Council neglected to undergo work required to keep up with storm water and sewerage many years ago as the number of Housing was increasing. Why should we all pay extra now, this should have been budgeted for and dealt with before it became an issue, instead council wastes money like it grows on trees.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Again, Budget, spend money on necessities instead of wasting it on sculptures and frivolous non necessities.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** There are other ways to fund the services for aucklanders, not just increase the rate, the rate is ready too high, so do not support to increase 5% .

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:** When there is no enough fund to do all the things, there are things which need to cut down or wait for the time when Auckland have fund for these things.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal?** Do not support either change

**Tell us why:** Do it when Auckland is not in the bad financial situation, this is not the right time

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal?** Do not support

**Tell us why:** Proposed increased rate 3.5% is enough for the community upgrade, there is no need to add another 1.5% on top of it.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Proposed increased rate 3.5% is enough for the community upgrade, there is no need to add another 1.5% on top of it.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:** People who use this service will benefit from it, therefore, they should pay for it.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** The economy is in bad shape at the moment, the housing price is crazy, the rental is also so high, everything is so expensive, a lot of people who lost their job. Now is not right time to do all the things that have been proposed.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Government need to get the housing price down, stop making the house smaller and smaller, everyone can afford to buy a house to live in, everyone can afford to rent a home, everyone can afford to live in Auckland

### **Important privacy information**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Surely you have been putting aside money for repairs to and for new infrastructure.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** I notice Council allows trees to be felled with no thought to replacing them in the concerned community.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** You have failed us miserably with water quality. Especially in and around our beautiful beaches and bays. Why should you want more money, did you not earmark anything from rates in the past?

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Other

**Tell us why:** Personally I think Council now take on too much. It used to be Water/Roads/Rubbish and that was it.

Now Council take on so many responsibilities that it is mind boggling.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Auckland City as we once new it is slowly being destroyed and turned into a concrete jungle. Housing is frantically being built with no coordinated plan to insure adequate infrastructure at the same time. So how will MORE money help?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Where do you think the money is coming from?

Governments can print off money at a whim but you and I cannot. We know that the working people are hard put to feed their children. Others have difficulty putting a roof over their families head. People my age can just about manage to put food on the table and keep their heads above water. (I am so lucky that I own my own house otherwise I would be destitute) then you would come along and put the rates up for your think big projects, and others that were under resourced from the beginning. So you asking for more and more money from an already impoverished nation is ridiculous and totally uncaring.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

Yes

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** Your ideas make me nervous. apart from giving local boards cant blanch about what assets to sell of, with little or no public discussion. It also bothers me that one ethnic group is being singled out to advance their history and ideals whilst other ethnic groups are completely ignored. Yes I understand that we do not want Maori heritage to die or be forgotten but New Zealand is now a multi cultural nation and this needs to be recognized Nationally.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Sadly the previous government led us into a social trap.

By increasing immigrant population with no consideration as to how to house feed and nurture these people, we Aucklanders have to foot the bill.

To my mind Government has totally turned their back on the mess and said, Auckland Council deal with it.

They should to my mind be footing this horrendous bill we now have to contend with.

### Important privacy information

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Removing combustion products from transport functions is great but we must also address the elephant in the room: combustion products from home heating. There should be funding for loans for conversion from combustion heaters to electric heat pump heaters for both water and household environment.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** This has already taken too long to action and needs to be done asap to preserve the Watemata.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** The community is the people and the places they work, live and "play".

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

I do not support upgrading the City Centre and it should not have any special treatment over the local urban centres. The concept of a city centre is now out-dated in the new generation of decentralisation. Local urban centres encourage shorter trips and

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

**Tell us why:** Why is such a specific question being asked in a city-wide survey?

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Their priorities are so political and not really addressing the on-going needs of the community at large. Nor are they in alignment with the city plan as a whole.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Auckland needs to find a way to reduce the need for so many people to travel so much each day. This would save fuel, time (which could be better spent on local healthy and/or cultural activities) and lessen our carbon footprint.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Auckland infrastructure needs urgent upgrade to cater for rapid population growth. This 1.5% increase for just a year is affordable.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Long term water infrastructure investment is a must to ensure water quality and good to spread out over next 10 years.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** These facilities afford the opportunities in helping young people in the community to focus their attention and energy in positive ways. than wanders into drugs or gangs.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Do not support Removing library late return fines

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Infrastructure and community security/crime rate improvements

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Why not spend money solely on projects that benefit the most people instead of spending money on flashy non functioning projects. E.g sculptures and similar rubbish.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** I would only support the investment if it meant that the investment made financial sense. For example just replacing diesels with battery vehicles just because you want to appear to be doing the right thing. Batteries cost more on the environment than diesel ever will. Now I would support it if hydrogen was a financially viable also, I have yet to see hydrogen charging stations yet.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Why should one generation be paying for the councils year on year neglected sewer network for as long as I can remember there were warning not to go near beaches around Auckland after heavy rain. Come on sort it out.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** If it is cheaper then I'm all for it these services seem hardly essential in my opinion anyway.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

A targeted network resilience rate should fall on property owner with the trees that are causing problems any other trees on council land should be included in the standard yearly budget. Simple

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Because why do we even need another bus service that is financially backwards

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** The only priorities I support for Massey henderson area are the upgrade to park cycleways and a reduced carbon footprint in these areas. The rest of the proposals are rubbish.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Key infrastructure that benefit most and not just a few. The amount of irresponsible spending is outrageous and needs to be addressed by people that have experience out in the field on job rather than a graduate that can barely butter their own toast in the morning.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Please...Just concentrate on the fundamentals that we elect you for. Water..rubbish..sewerage and parks.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Don't support electric buses. Full stop. Hydrogen are preferable. What the feck do we do with the non recyclable batteries...how do we charge electric buses without massive central govt infrastructure in new electricity plants. Let central govt provide this first. The last thing I want as a ratepayer is Grandiose schemes that lead to even more rates increases. We are trying to dig out of a Covid 19 while. Not create more debt. TIGHTEN YOUR BELTS LIKE OTHER BUSINESS' and ratepayers have had to do uncle Phil!!!!

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** Cut back in the airy fairy crap to allow re targeting of rates funding for this. Thanks.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Other

**Tell us why:** Sell the non performing assets off to private enterprise to allow you to keep strategic assets. Thanks.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

Nope.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Do not support either option

**Tell us why:** There's not much between Albany and Paremoremo. Other than the prison. Maybe Work and Income could look to subsidise.

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

Yes

## 6. Local Boards

**Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I support only basic services and getting them right. Once all us ok with the basics then look to expand.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Housing growth...please invest some of the baby millions of dollars you charge in terms of RMA approvals into ensuring all the underlying infrastructure improvements are made including roading in and out. Point of case Kumeu. Massive development and still pretty much only a single lane each way. Please do not sting rate payers for non performing assets through covid. The Airport and Port are long term investments Roll out the debt.

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Don't know

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

The housing developments can not continue at the rate they are unless there are more train lines, over ground, underground or both! Roads are so backward. I have lived in West Auckland for 20 years and I am seriously at the point where I just can not deal with the traffic any longer. It's getting ridiculous. It's embarrassing wconsidering we're supposed to be a progressive country.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Our city needs a boost and positive investments

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Environmental issues are very important

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** It shouldn't cost more as pandemic has already burdened us so much

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Very important and beneficial

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Necessary evil as they say

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** Most comprehensive option

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why** Very beneficial and of great importance

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Clean environment, beautiful green spaces, national parks, recreational facilities

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

**Tell us why:** I have not seen much that puts my faith in the council over the 7 years I've lived where I am. I understand a larger increase in rates means more money for projects, but I haven't seen much done with around my area.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** It's Auckland and it's getting too crowded, I think places sharing one venue is absolutely awesome. And will make it more convenient for a lot of people too

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Keeping our community safe and clean is important to me.

Older parks with no sun shade, and no bins near the playgrounds are a huge thing

### Important privacy information

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The rates are high enough so I don't support any more increase

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** That can be done later after economy recovers from covid impact

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Recovery has to come from somewhere so I guess that works but I can see how not all rate payers would be happy about that especially when I am only a renter but in saying so does that mean landlords will put rents up?

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Action needs to happen now, all the evidence is available to say we cannot wait any longer. This subject is imperative we act upon it NOW!!

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** I doubt I will ever support having to pay for water whilst you allow BIG companies eg. Coke/ Pump, H2O etc to bottle and sell water making a huge profit which helps empty our precious water commodity and lead us to drought and empty water reservoirs... no the one!

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** What the heck! So things are progressing or there is need for progress and now you want to take something away?! OUR communities need resources and our communities need individual acknowledgement where there needs and culture is prevalent so to put us in one category or user pays system is a huge step backwards. I do not support this so called initiative!

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** Option 2 seems fairer for all.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** You cannot please everyone so my opinion is mindfulness.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Allow growth from within, look after those already in need, acknowledge there is a crisis still within substandard landlords whom allow the substandard living conditions. Put a 'license to rent out' on landlords meaning have them too meet a standard just as you expect that of the tenant!!

This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Don't know

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I prefer to focus more on climate change and environmental issues, as opposed to facilities for Waka Ama

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** We already pay high rates for very little service where we are. Its becoming unaffordable. Especially when you are NOT transparent with the books. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at [http://www.ratepayers.org.nz/2021\\_ltp\\_submission](http://www.ratepayers.org.nz/2021_ltp_submission).

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** If you managed the money you already received better you would not need this. Perhaps if you stopped hiring over priced consultants you could do better with your budget

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** We are all recovering from the effects of Covid so why are you hitting us with so many increases. Perhaps some pay cuts there would help

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Our local community centre is well used but would probably be sold off under your proposal. We get very little out here as it is

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** not enough investment

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** I would prefer to see more money put into countering climate change and improving water quality

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

More investment in environmental improvements, public transport and walking/cycling

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** The earth is a pretty much closed ecosystem, therefore it is irrational to spend NZ money while rest of the world (China, USA, Russia, EU) do not put relatively similar efforts. Doing this we just waste them. We should wait until diesel busses become more expensive or have similar price then electric/hydrogen busses. Lets bigger/reacher countries invest in raw technology first make them mature and then we should buy good busses for reasonable price.

About planting trees - very expensive and inefficient way of wasting my money. For a more polite and reasonable explanation see <https://pursuit.unimelb.edu.au/articles/planting-trees-is-no-substitute-for-natural-forests>

<https://www.nature.com/news/tree-growth-never-slows-1.14536>

<https://www.bbc.com/future/article/20200521-planting-trees-doesnt-always-help-with-climate-change>

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Let's see first how much do nothing will affect water quality. I am not convinced that what was done is really helped with water quality, as usual in science we need to compare with placebo (do nothing).

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** This is a reasonable approach to save money with little or even no impact on service.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### **Which option do you support?**

Do not support either option

**Tell us why:** Natural Environment Targeted Rate is an example of the worst possible way to waste my money. There are 0 results after wasting billions.

### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why** The language chosen to describe priorities doesn't good enough. I don't understand what exactly they want to prioritize, and how this important to me. The language is so broad that I treat it as - we are against all of the bad things and support all of the good things - don't make any sense to me. If the local board can't deliver clear words about what they want they must go and of course they won't get my support.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

It is important for me to keep rates as low as possible and definitely not increasing them. I see how movement waste my taxes and not going to support this, including similar approach in Auckland area. You should first work 10 times harder to find a way to save money and/or searching other sources. Rates increase must be the last resort. I don't believe we need any of the above rate increases.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** We cannot afford to delay investment in housing or transport.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Climate change requires a collective response. We must do our part.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** Not as pressing as housing or transport.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Facilities need to be fit for purpose.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

It should be Hector's responsibility to maintain their lines. We already pay them with our power bill. Don't let them add to our rates as well.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Do not support either option

**Tell us why:** Build a bike path instead.

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Transport and housing. Priority to pedestrians and cyclists.

### Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Your ratepayers have to live within their means and should the council!. Cut unnecessary expenditure on non essential services and reduce your costs like the rest of us have to!

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** a time of decreased income is not the time to increase expenditure in any area!

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** again a time of decreased income is not a time to increase expenditure

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Medium and high density works in hobsonville point as there are new parks schools walkways etc not so infill housing in older areas

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Good luck with changing human behaviour we Aucklanders love our cars and if there is not enough parking where people live they will park on the street

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Other

**Tell us why:** as long as the rates do go back I am ok for one year yet I see you going back on your word. and west auckland rates seem to be sucked up into the city centre when you talk infrastructure we are still without foot paths. decent drainage and over head power lines that impact the quality of our neighbourhood.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** electric buses sound good also why do you not have electric trams in the city centre in stead of buses

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** We are NZ clean and green ensure we still can enjoy a walk on our beaches

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** this would allow the funds for other things like fenced in dog parks

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

just bloody put them underground once and for all and stop that cost. when road works get done so should the power as you are digging anyway.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** get trains in there I live close by and we have no trains connecting us all.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Albert-Eden Local Board**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** I support powerlines underground, trains, better or more footpaths with bike paths, roads widened to accommodate the extra traffic due to explosion of population out west fenced dog parks.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I support powerlines underground, trains, better or more footpaths with bike paths, roads widened to accommodate the extra traffic due to explosion of population out west fenced dog parks.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** It's urgent the city deals with aging infrastructure now without compromising community and cultural services. We've had decades of putting 'it' off - and that can't continue.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** I'm not entirely convinced hydrogen is the best alternative fuel, however.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Urgently essential - this cannot be put off any longer.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Te Manawa is a very good model of a consolidated approach and Q Theatre of the partnership model.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

I support both these proposals.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** Bus services are essential to the community as a whole rather than individual neighborhoods. Auckland region's bus services should be developed as an integrated network.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why** I'm disappointed there are no priorities listed for the provision of arts & cultural amenities and services especially as these relate to the wellbeing of rangatahi/youth.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I'm disappointed by the standard of some new builds in various suburbs including Glendene. In a nutshell, they are 'cheap and nasty'. I would like to see changes to planning laws making it necessary for a minimum level of design to be applied to all new builds.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** With all the townhouse going up around Auckland and further afield no parking will be available to any resident a problem for the near future and the many car accident that will happen as vision of road access will be very limited as well developers have not thought these options through as more families have more cars.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** We havent received any increase in services or income to support any increased rates. You still havent provided on the orginal 10 year plan. Council needs to look at long term and Government to provide the short fall. Local social issues were not created by Auckland council but by government.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Again Climate change is a NZ initiative and should be handled as a collective. Moving diesel buses to Hydo is fine as a replacement option. Investing in better public transport is a long term solution it took Singapore 20 years to make a return.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Do not support either change

**Tell us why:** I live out west if this is supposed to be a collective investment then again push to National not sure why West is paying for what should be collected from the areas requiring the upgrades

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Reduction of costs and the conversion of farmland including urban sprawl. Contain the city grow upwards and invest heavily on underground rail that is at least faster than a push bike. Leave social service to central government. Also I see no benefits in investment in North Shore or South Auckland including alot of council investment in the City as public transport is slow and inefficient and parking is cost prohibitive.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** I wish AK to grow instead of going backwards and a small increase of pain now will help the City grow. I would also like a few \$\$\$ put aside to allow Puhoi to get a museum permanent home somewhere in the village. Most likely on council land in the Puhoi Park.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Reduce the diesel use as I will have to do in the next 2 years.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** We need to ensure quality water is available for all in AK and not have problems like lead.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** To help Puhoi with their aims of having their own building on council land.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** It seems to be fair cost for the service

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I want the region to grow as well as having all the facilities to allow growth to happen.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Puhoi museum

### Important privacy information

The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

## In 1863 some Bohemians choose Puhoi in New Zealand

This pamphlet has been prepared to assist Puhoi descendants and family researchers with features about the voyage of a determined group who sailed half way around the world to find a new life in NZ. They were later joined by other Bohemian relatives and friend on the following dates.

## The present becomes the past, and the past becomes memories.

On 26<sup>th</sup> February 1863 a group of 81 German speaking Bohemians gathered at the Staab Railway Station, south of Pilsen to begin a four month trans-continental, cross Channel and sea voyage half way around the world before they finally arrived at Puhoi 29<sup>th</sup> June 1863. Included in that group were many readers forebears with the full list set out below. As many of these emigrants were then tenant farmers in the small Bohemian Egerland villages south and south west of Pilsen, they travelled in response to offers of **free land in New Zealand**.

**From 1858 Auckland** province encouraged immigration by granting new settlers 40 acres (16 Hectares) for those aged 18 plus and 20 acres (8 Hectares) for each child over the age of 5. Agents were established in Britain, Ireland, Canada and Cape Town. AK was alone in NZ offering land grants rather than subsidising fares. These agents were instructed to seek agricultural labourers, builders, bricklayers or masons Single women were preferred and were given free passage to even up the sex ratio as well as provide wives and domestic servants. The province also provided over 4,000 land grants to military settlers, usually retired soldiers and their families, who could protect the civilian population. [Auckland's immigrants: 1853 to 1870 – Te Ara Encyclopedia of New Zealand](#) (Please note right click on link then go to open hyperlink to view)

**The recognised promoters** of the scheme to attract the Bohemian group for this emigration to Puhoi were, Pynson Wilmot Longdill from London who came to live in Parnell Auckland in 1859 and Martin Krippner of Mantau (now called Mantov south west of Plzen) a former Austrian Army Captain who married Emily Longdill.

In 1863 Staab, (now called **Stod** in the Czech Republic) was part of the Bohemian province with its Capital in Prague and within the much bigger Habsburg controlled Austro-Hungarian Empire and ruled by the Habsburgs from 1526 until the end of WW1. In earlier years Bohemia was a kingdom in the Holy Roman Empire. Historically the country was bounded on the south by Austria, to the west by Bavaria, north by Saxony and Lusatia, north east by Silesia and Moravia on the east. Bohemia has an area of 20,058 square miles. It is enclosed on three sides by mountain ranges, namely: the Bohemian Forest (Böhmerwald), the Ore Mountains (Erzgebirge), and the Sudetic mountains. When Czechoslovakia was created in 1919 out of the former Austrian crown colonies of Bohemia, Moravia & Slovakia, the German speaking outer rim came to be known as the Sudetenland. It was named after the Sudetes or Sudeten mountain range that borders today Poland & the eastern region of Germany & the Czech Republic. <https://www.bing.com/maps?osid=d25cb832-993a-4b8d-9f9d-92bf9c0fdee8&cp=49.652346~10.954979&lvl=6&v=2&sV=2&form=S00027> right click then open hyper link to view map.

**Central Europe at this time** was rift with much economical political and social upheaval. Boundaries changed, wars were fought, and the demand for self-rule, political enfranchisement and democracy, and social justice were common rallying calls. Emigration to the United States of America, Canada, Australia, South Africa and even far-flung NZ cache the dreams of many. Most of the areas populated consisted of day labourers scratching out a marginal subsistence. Villages often built a **large pond** (see image below) used for geese, ducks and the water supply helped to put out fires, which could ravish not only the village but surrounding farm fields and the forests.

The Bohemians were artistic, special white clay in the western and southern areas led these people to specialise in kitchen pottery, colourfully decorated under glazed, flower motifs were prized. Clothes were made from wool and homespun linen (good for winter). During summer, Czechs wore lightweight fabrics such as silk. Men and women treasured handsomely embroidered clothes, often with hearts and flowers. Each village had its own style and colours of clothing, a woman would work on her embroidered linen and wool wedding dress for several years. Women wove tablecloths and during the warm months often had a bouquet of wild flowers on the table. They dried flowers to make wall decorations for the winter. Women in the city wore several layers of thin skirts, a distinguishing feature. The primary fabric was cotton decorated with ribbons and a **silk** scarf tied across the chest.

Traditional costume of the Czech.pdf

**NZ in the 18<sup>th</sup> & early 19<sup>th</sup> centuries**, was seen by Europeans as the most remote country on earth. Fifty years after Captain James Cook arrived in 1769, fewer than 200 people had settled there. In contrast there were 100,000 Maori, for most Europeans NZ was an unappealing prospect, a strange and lonely land reached after 100 days on dangerous seas. Its coasts were thought treacherous, its inhabitants considered bloodthirsty. Only exceptional reasons led assured people to venture off for such a distant corner of the globe.

**The 1863 immigration:** The roll of **Martin Krippner**; In 1859 Martin Krippner and his wife Emily along with their four children made the decision to emigrate to NZ. **Pynson Longdill** and his wife Harriet had already settled at 8 Avon Street Parnell AK and he had been appointed as the German Consul in NZ. Martin and his family travelled to Hamburg, took a packet steamer to London where they boarded the ship Lord Burleigh bound for Auckland. They arrived in AK 22<sup>nd</sup> March 1860 with Martin's brother Johannes (Hans) Krippner (his future wife, Elizabeth Turnwald) Joseph Pankratz & his wife Margarethe nee Stiller, Martin Scheidler & wife Dorothea nee Nath from Habsburg Bohemia. Martin Krippner was naturalised a British citizen on 10<sup>th</sup> April 1860, the family initially settled at Orewa, he was postmaster at Nukumeha Creek Post Office Orewa from August 1861 to Oct 1863 then at Wade Silverdale from Dec 1874 and then at Puhoi Aug 1875 to June 1884. <http://www.orewahouse.co.nz/about-orewa-house/history/> < Info He was very enthusiastic about NZ's future prospects and on good terms with the Governor-General of NZ Sir George Grey. (Copy of a letter to the GG see links) Mr Krippner of Orewa is appointed to make arrangements with the Auckland Provincial Government for suitable locations for numbers of his countrymen shortly expected to arrive. This gentleman has chosen and applied for a portion of the Puhoi block as a site for a special Bohemian settlement, although in official records it is called the 'German Settlement'. The AK provincial council led by Mr R Graham provided Mr Krippner with hilly bush land for settlement purposes under the Auckland Waste Lands Act 1858. <https://paperspast.natlib.govt.nz/newspapers/NZ18621129.2.8> Nov 1862 AK Provincial Govt, M Krippner appointed

**In June 1862** Pilsen received a direct telegraph connection to Prague via a line running along the railway line. **From** what little information which is available it appears that considerable correspondence must have gone between NZ and Bohemia to a member of the Krippner family as a result of the AK Land Grants. Martin Krippner enthused his brother Michael to enlist families in the villages of Staab (Stod) to emigrate to NZ. **Once the decision** had been taken to emigrate, the next question was how to go about this huge task for 81 people.

**THE FIRST GROUP OF BOHEMIAN EMIGRANTS;** (Passenger list source Puhoi 150<sup>th</sup> booklet)

**BAYER** from Chotieschau,,Wenzl (aged 27); **BECHER** from Auherzen, Thomas (30) Anna (25) Anna (5) Andreas (3); **BOTELSAK** (PODLESAK) from Mantau, Maria (23) Elizabeth (15); **DOBNER** from Salesel Anna; **FITZTHUM** (Monsal Litzhum) from Poppowa, Wenzl (25); **GLATZ** from Poppowa, Peter (55) Margarethe (45) Cecelia (15) Anna (5) Dorothea (3); **KAES** from Purschau, Wenzl (42) Maria (42) Martin (5) Maria (2) **Annie** born during the voyage; **KARL** from Auberzen Joseph (38) Anna (36) Johann (10) Joseph (8) Charles (7) Wenzl (4), Andrew (2) **Edward** born 17 March 1863 during the voyage; **KREIM** from Tuschkau Dorf, Johann (went to Waikato); **KRIPPNER** from Mantov, Michael (41) Barbara (33) Anna (11) Theresia (8) Johann (7); **KROHN** from Germany, Charles (26); **PAUL** from , Joseph (38) Margarethe (38) Anna (8) Katherina (3); **PITTNER** from Hochlibin, Pilsen, Johann (67) Elizabeth (52) Margarethe (11) Elizabeth (7); **RAUCH** from Possigkau, Johann (31) Anna Joseph, Johann (11) Charles (baby) **RAUNER** from Preheischen, Johann (50) Anna, Martin (24) Johann (19) Catherine(14); **REISIM** from Nurshan Wenzell (18) (went to Waikato); **REMIGER** from Kostelzen, Benedict (12) **RUSSEK** from Sitch, Anton (41) Margarethe (42) Barbara (16) Maria (12) Joseph (11) Anton (6); **SCHOBER** from Janny – Germany Prussia, Anna (32); **SCHISCHKA** from Pilsen, Martin (65), Anna (40) and Maria (31) Stefan (5); **SCHOLLUM** from Rothaugest, Johann (21) Elizabeth (24); **SCHUSTER** from Littitz, Theresia (23); **SOUKUP** from Hoslau, Johann (16); **STRAKA** from Honositz, Paul (33); **TOLHOPF** from Mantau, Martin (18) and Wenzl (17); **TURNWALD** from Chotieschau, Anton (25) Barbara (22); **TURNWALD** from Poppowa, Lorenz (37) (died on journey), Anna (37) Bartholomeus (13) Lorenz (12) Joseph (8) Katharina (5), Elizabeth (2); **VLACH** (Flachs) from Kozlovice, Joseph;

**Departure from Staab:** Late on Thursday evening of 26th February 1863, the Puhoi-bound Bohemian settler's long journey began when most likely they arrived at Staab Railway Station travelling by horse and cart with all of their luggage. In that part of Europe February is a

huge month for snow, and on 26<sup>th</sup> Feb it was bitterly cold.

No doubt for the travellers, their sense of adventure was strong and hopes were high, but even so there must have been some who would have held brief doubts as to their wisdom of leaving home, and not being able to see family, relations and friend again for ever. The train took the group to (Plzen) Pilsen 20km and then onto Prague a further 90km. Majority of the group had never seen Prague the centuries old capital of Bohemia and they looked with amazement at the fine buildings and the magnificent **Charles Bridge** over the city's Vltava River.

Many years later the descendants in Puhoi were often to hear stories of their memories of these fine buildings and the amazing bridge with its series of statues lining the sides of the promenade. Starting from 1965, all of the 30 statues and statuaries have been replaced by replicas and the originals are exhibited in Prague Lapidary the monument of stone Museum. Many Puhoi descendants will have visited the Charles Bridge in Prague and viewed the amazing statues along with the fine buildings in this city as the original pioneers did in 1863.

**Charles Bridge below Circa 1860 along with an image showing the bridge covered in snow ↓**

**Highlight of the Prague visit** was the group's audience with **Cardinal Schwarzenberg** the Archbishop of Prague. He blessed the group and gave them his fatherly advice, reminding them of their own choice they were taking. The huge move to a new country to build new lives for themselves and future **generations**. He called upon them to pledge their allegiance to New Zealand and to do it in full spirit. He had heard that NZ was already established in the catholic faith and prayed that they would one and all remain loyal to their faith.

**Profile of the Cardinal Schwarzenberg** and Prince-Archbishop of Prague, b.at Vienna, 6 April, 1809; d. there 27 March, 1885. Son of Prince Joseph John Schwarzenberg and his spouse Pauline (née Princess Arenberg), he was baptised in his father's palace in Vienna. When Napoleon advanced upon Vienna, the mother fled with her one-month-old child to Krummau in Bohemia. In the summer of the following year she accompanied her husband and eldest daughter to Paris to be present at the marriage festivities of Napoleon and Archduchess Marie-Louise. During the celebration she and her daughter were burned to death, a golden necklace on which were engraved the names of her ten children (including that of Friedrich) alone made it possible to identify the charred mass as her remains. Her sister-in-law Eleanora henceforth acted as mother to the children and was always called by Fritz his "Engelstante". When he was five years old Fritz was placed under the care of the learned and able Father Lorenz Greif. Having completed the secondary school course in the Schotten gymnasium, he applied himself to juridical studies with great success. Reluctantly he now revealed to his father his desire to consecrate his life to the service of God in the priesthood, as this was for him the surest way to heaven. The father gave his consent. **If not already arranged**, then in Prague, many attended to last minute administrative and travel arrangements. In 1863 Bohemia was part of the Habsburg monarchy. At that time, Imperial Regulation 31/1857 on the introduction of a passport system in the monarchy and related regulations were in force. According to these regulations every Austrian, Bohemian citizen travelling abroad were obliged to obtain a passport. The full official way was a long and complicated one and the newly created "District Offices" in Bohemia had taken over several of the administrative tasks that were until then maintained by individual parishes and manors. People who wanted to emigrate had to ask for passports in the new district office. They had to submit several documents including a copy of their birth record, marriage, evidence of residence. Applicants had to sign a waiver of their right to live in the village, if not the village could be held liable for paying for return costs if emigration was refused or people came back for other reasons.

An application for a passport was usually approved, only liability for military service or a legal prosecution could be a reason for rejection. The request for a passport was then sent to the district office of the applicant's village of residence. This would have been a huge task to arrange the passports for the group, then how to book travel to NZ from Staab. Imagine the difficulty they experienced with the mail taking months and without telephones as this system wasn't introduced in Europe until 1879. A family would travel on one passport documentation which covered their names, age and sex. (Copy of a passport image listed further on)

## FROM PRAGUE TO ALTONA

After their audience with the **cardinal** the group then travelled from Prague onto Hamburg-Altona some 642 Km by **train slowly** across Europe before sailing to Gravesend London. With rail in 1863 still being a relatively new mode of travel, majority of the group will have had plenty of time to reflect on leaving Bohemia. This period would have been exciting as they travelled across Europe. I guess each day brought a new surprise for them and they remained strong as a group. I have not been able to verify how many days it took from Prague to Altona nor if they stopped for food and drinks although the train would have required additional water and coal.

The current Hamburg Altona railway station is on a different site to the one which existed back then, Altona (the place) was not part of the city of Hamburg. The original Altona railway station was built by the Altona-Kiel Railway Company at the end of the line from Kiel, some **300 metres south of the current station**. It opened in 1844, at which time Altona was an independent city within the Duchy of Holstein. From 1640 to 1864 Altona was under the administration of the Danish monarchy. The original railway station is currently used as the present-day Altona borough's town hall. Images below of the train and the station which looks more like a castle and then an image of the shipping port.

Altona-Kiel Railway Company established under the law of Denmark in personal union with the Duchy of Holstein that built and operated a 105km railway between Altona and the Baltic Sea port city of Kiel. **Altona** was at that time the second largest city under Danish rule and the railway line was the first built in Danish-controlled territory. The company sought to improve the transport of their goods to markets by connecting the North and Baltic Seas. It was originally equipped with 10 locomotives, eight tenders, 37 carriages and 50 freight wagons. The speed limit was 45 km daylight and 30km by darkness.

Packet craft ships were used extensively in European coastal mail services since the 17th century & gradually added cramped passenger accommodation. Mail steamers were used to carry all mail across an **ocean** primarily during the 19th century and early 20th century, when the cost of sending a letter was declining to the point an ordinary person could afford the price of sending a letter across great distances, The Royal Mail Steam Packet Company was British, founded in London in 1839 by a Scotsman, James Mac Queen. The line's motto was Per Mare Ubique (**everywhere by sea**). After good and bad times it grew into the largest shipping group in the world in 1927 when it took over the White Star Line.

**Interesting** that, White Star Line were the owners of that famous passenger ship the **Titanic** which sank in the early morning hours of 15 April 1912 in the North Atlantic Ocean four days into her maiden voyage to New York City.

**The Bohemian group stayed in Hamburg-Altona** for approximately a week (not verified it was a week) most likely in one of the many emigrant lodging houses, waiting for the day of departure. Hamburg had created a large emigrant area where people could sleep, eat and wait for their departure. During that time **Johann Schollum** married **Elizabeth** Hartzeren on Thursday 5th March 1863. (See **photo** of this couple **50 years later 1913** under images to reflect on)

## FROM ALTONA TO GRAVESEND, ON RIVER THAMES

The group of Bohemians sailed from the port of Altona by Packet Steamer to Gravesend in London which would be their port of embarkation for boarding the **War Spirit**, their ship sailing to NZ. **It is not** known nor is it recorded in history records the date they departed Altona or how long it took them to sail from Altona to London a distance of some 370 nautical miles. (**Estimate 2-3 days**) Nor has anyone located the actual Packet Steamer which took them, although Stephen Schollum's family research suggests it's the Planet. A Hamburg owned packet Steamship which regularly sailed between Hamburg and Gravesend, and which London Shipping records record that it arrived into Gravesend on Saturday 7th March 1863. This voyage must have been unnerving for the Bohemians being their first time on a sailing ship particularly when they were out of sight from land with the **imposing vast ocean swells** often washing over the deck. I'm sure there would have been a few sideways glances with thoughts of what they might experience next or is it too late to turn back. **Images** below of a typical Steam Packet ship, passengers on board in very cramped conditions and an immigration departure hall in Hamburg.

**Gravesend** is an ancient town in northwest Kent, England situated 26 miles downstream from London Bridge. Gravesend Town Pier was built in 1834, it was originally open sided apart from two small pavilions at the end. The town pier is the oldest surviving cast iron pier in the world. Steamers were boarded from a series of steps and landings, a pontoon was added to allow more than one steamer to dock at a time. Goods and livestock also used the pier and between 1882-1886 Gravesend was the first port of entry for thousands of emigrants, as well as large numbers of troops, embarked from here.

## ARRIVAL IN GRAVESEND AND ARRIVAL OF THE DANISH ROYAL PARTY

Saturday 7<sup>th</sup> March 1863 is the date of the arrival of **Princess Alexandra** and her family from Demark on board the Royal Yacht prior to her wedding to Prince Albert 10<sup>th</sup> March at Windsor Castle. An image is reproduced below. Could the '**War Spirit**' have been amongst the ships in the photo? At the same time the city and Pier was in gala garb to mark the visit to the town of England's Prince of Wales to greet his bride to be Princess Alexandra. Although the decorations and the illuminations were for the royal couple, it seemed to be a good omen that such festivity should mark the departure of the Bohemians. The painting below shows the Princess arrival at Gravesend Pier, incorporates over 50 figures and shows Prince Albert beside Princess Alexandra along with small pointed banners of blue, pink & white roses festooning the Gravesend Pier. **The artist** has placed himself in the top right facing to the left, he has raised his right arm to wave his top hat high to salute the arrival of the Princess.

**It may not be possible** to identify precisely where the Bohemians stayed at Gravesend, or if the group stayed in more than one lodging. If ships were not ready to leave passengers had to wait often without enough money for decent lodging. Gravesend was the first point of call for Princess Alexandra into England so thousands of people were staying within the area to catch a glimpse of her as she stepped foot on UK land. So if the Puhoi group were looking to stay before they boarded their ship they probably would not have found lodgings in Gravesend. There was a train service from both London and Essex to Gravesend during 1863 but at this stage I haven't been able to obtain any details of where they would have stayed. The ship's cargo were usually loaded in London then the ship was towed to Gravesend by steam tug for passengers to board. On the day of sailing carpenters could still be putting up partitions and bunks and temporary fittings in space used for cargo on the return voyage. (**Info Gravesend Historical Society**)

### **BOARDING THE 'WAR SPIRIT'**

The 'War Spirit' was engaged by the Provincial Government' Auckland agents, Willis Gann & Co to bring emigrants out to New Zealand. From December 1862, numerous advertisements appear in various age city newspapers offering 'free land, 40 acres' to prospective emigrants. While **originally due to sail in February**, its departure kept being delayed, possibly to take on and accommodate the large group of Bohemians. The 'War Spirit' was built in Moncton, New Brunswick by Joseph Salter in 1854. She was 1234 tons. Her first role was to convey soldiers to the Crimea, then she sailed to Australia taking out emigrants and onto India, primarily bringing back **jute**. Her only trip to New Zealand was in 1863. No photo, image or plans of the 'War Spirit' have been located, although Stephen Schollum who has documented many of her trips is still looking for such an image. [TheShipsList: Passengers, Ships, Shipwrecks](#)

Emigrants Luggage Guide for ships 1851.pdf

Click on PDF to open file to read.

### **DEPARTURE AND VOYAGE TO AUCKLAND, NEW ZEALAND**

**The next part of the journey commenced** on Thursday evening 12<sup>th</sup> March 1863. The 'War Spirit' captained by John Richard Luckes who was only 37 years old, 5' 6" tall, blue eyes with light brown hair and the Surgeon Superintendent Dr John Field Deck, set sail from Gravesend for Auckland NZ. (Unknown how many crew members) The Bohemians would experience a great variety of conditions on-route to NZ, storms were followed by pleasant sailing in the trade winds. In the equatorial doldrums, awnings were often raised over the decks to provide shade from the incessant sun. Storms were encountered again in the Southern Ocean - Tasman Sea, sending the ship tumbling and rolling. Among the 222 passengers on departure were the 81 Bohemians, first and largest group destined for Puhoi. They reached AK on June 28<sup>th</sup>, her long passage being accounted for by experiencing gales and contrary winds. There were seven births and one death during the passage, the death being due to an accident.

The ship passed down the English Channel and along the southern coast to drop off the pilot at Dartmouth, this took six days, The Dartmouth Lighthouse is sited at the very end of the headland, has guided vessels in passage along the English Channel for over 160 years. On Wednesday 18<sup>th</sup> March the ship headed down the Atlantic. Crossing of the equator came on Tuesday 7<sup>th</sup> April, no record in detail has been passed down of the happenings of the voyage. On Monday 4<sup>th</sup> May they passed the Meridian of Greenwich at 44° south, continued to sail eastwards through the roaring forties towards Australia. Monday 15<sup>th</sup> June tragedy struck when the vessel was in latitude 30° south and longitude 157° east. This position was in the south Tasman Sea, a little east of Bass Strait separating Tasmania from Australia. On this particular day a sudden squall hit the War Spirit and she rose high on a turbulent sea whipped up by a strong gale, took a tremendous lurch to leeward, breaking away hen-coops and pig pens from their lashings which unfortunately fell on a passenger causing severe injuries. Lorenz Turnwald was struck heavily by a falling crate and

within two hours he died from the severe injuries. Anna his wife and their five children faced the sad prospect of arriving in a strange new country without the support of a husband and father. The next week on the ship must have been hard for the family especially on Monday the 22<sup>nd</sup> June when came the long awaited cry of **Land Ho** (Ahoy) which might well have been Cape Maria Van Diemen. *The joy on board* of the ship to see the long awaited NZ Coast can only be understood by those who had spent 100 long days sailing on the ocean.

This brought anticipation to the Bohemian pioneers, but to the Turnwald family it merely emphasised their great loss. Excitement rose as the ship rounded North Cape of NZ which had some people on deck before daybreak to watch for more signs of their new country even though they still had 5-6 days sailing before reaching AK. It was with huge relief for the Bohemian group to finally step onto dry land at Queen Street Wharf Auckland their new home in NZ after some 106 days at sea. **Ship Manifest 'War Spirit' Sailed from Gravesend England 12 March 1863 arrived in Auckland NZ 28 June 1863** National Archives NZ

Upon arrival, they did have time to publicly acknowledge the Ship's Captain and Medical Officer. **The Southern Cross newspaper** July 1863 records their Testimonial to the captain and doctor of the War Spirit. The passengers have presented a very flattering testimonial to the captain and doctor of the 'War Spirit'. "As we are now approaching our destination, we desire to express our thanks for your uniform kindness and courtesy to us during this voyage." Want of wharf space compels the Captain to hold passengers over until tomorrow. [Life on board – Te Ara Encyclopedia of New Zealand page 4](#) << What passengers ate, how much water allowed each day, although this article isn't about the 'War Spirit' it still relates to life on board these emigrant ships to NZ.

**QUEEN STREET WHARF AUCKLAND** ↓ source Alamy ↓

Also, upon arrival in Auckland many received notification of allocation of land grants in Puhoi. In due course a detailed map and record of actual land grants will form part of the Puhoi Historical Society records. It is not believed that they had time for any sightseeing or purchasing goods, supplies etc. **On Monday 29<sup>th</sup> June 1863** the Bohemians were taken by **cutter** (sailing craft) from Auckland City to the mouth of the Puhoi River at Wenderholm. Arrangements must have already been set in place as chief Te Hemara Tauhia and his tribe had canoes ready to convey the settlers up the river to the landing site approx. 7 Km that was to become central Puhoi

**The culture shock**, for the Bohemian settler's since settling off from Staab 124 days previously, to their arrival in **Puhoi** was enormous. Here in Puhoi they were confronted with the native inhabitants of the country for the first time and found the primitive state of the land entirely undeveloped and thick with native bush. Land Plots were allocated and the pioneers started clearing the bush. The land was difficult to cultivate, they came here to live in a sense as they did in Bohemia and if they were left alone they might imagine they were back home. But they are not let alone as they spent most of their time clearing the forest, breaking the land, planting and harvesting. They only survived the early years with the generous support of the local Māori chief Te Hemara Tauhia of the Ngāti Rongo tribe who gifted fruit and vegetables and showed the settlers how to fish and to recognise native edible plants for food.

### FROM THIS BEGINNING

As identified, the Puhoi founders were citizens of the Austro-Hungarian Monarchy. They spoke an Egerland German dialect, which forms the north western edge of the Czech Republic and belongs to the North Bavarian dialect family. A few people in Puhoi 2021 can speak a few words of this dialect. Useful link <http://www.puhoi dialect.net.nz/research.html>. The initial Puhoi settlers were initially unable to communicate effectively in English and Martin Krippner served as translator for the community for a long time and as such exercised quite a lot of influence. The Puhoi settlers felled 16.500 cubic metres of Kauri, developed dairy then sheep farms on the cleared land. Planting of numerous fruit trees, huge variety of vegetables and beautiful flower gardens became the pride and joy of each family. Puhoi museum might have some old photos to view.

**The first colonial settlers of Puhoi, NZ.** Circa 1863 1001 Martin Krippner Puhoi 1 (source Alamy)

**Above image of the first group of settlers** from Staab in Bohemia who established a community in **Puhoi**. They were later joined by other Bohemian relatives and friend on the following dates.

“**Lord Burleigh**” departed 18th Nov 1859 arrived Auckland 22nd March 1860, “**War Spirit**” departed Gravesend London 12<sup>th</sup> March arrived AK 28<sup>th</sup> June 1863, “**Liverpool**” departed London 8<sup>th</sup> Nov 1865 arrived AK 5<sup>th</sup> March 1866, “**Queen Bee**” departed London 16<sup>th</sup> July arrived AK 26<sup>th</sup> October 1872. “**Friedeburg**” departed Hamburg 7th May arrived Napier 24<sup>th</sup> August 1875 with 12 Bohemians 105 days at sea. “**Shakespeare**” departed Hamburg 7<sup>th</sup> October 1875 arrived Wellington 23<sup>rd</sup> January 1876 with 30 Bohemians, 118 days passage “**Terpsichore**” departed Hamburg 15<sup>th</sup> Nov 1875 arrived Wellington 18<sup>th</sup> March 1876 went into quarantine on Somes Island until May 1876

**Two other significant group settlements** to NZ were established during the same period. From 1853 to 1860 some 800 people settled at **Waipu** Northland, they were followers of a strict Calvinist preacher, Norman McLeod. [www.kavalliersco.nz](http://www.kavalliersco.nz) [Genealogy - Waipu Museum](http://www.genealogy-waipu-museum.co.nz) Then another important religious group were the settlers of **Albertland** named after Queen Victoria's husband Prince Albert the community on the Kaipara Harbour founded in 1862. [The Promised Land New Zealand Geographic](http://www.thepromisedland.co.nz).

## An assortment of stories, links, videos and images to reminisce on:

The 29<sup>th</sup> June being the arrival date in Puhoi figures strongly in the memories of the pioneers. It was Puhoi and not Auckland that was of importance. To this day 29<sup>th</sup> June is still celebrated as the village anniversary with music and dancing held in the hall the pioneers built, a senior luncheon and celebrations continue at the Puhoi Hotel again with music. (Below in videos, YouTube of Fred Rauner playing the accordion) But for all their toil and semi starvation in the early years, those settlers never lost their **courage** nor their capacity for making the best of life. Their one great relaxation was dancing and Puhoi became famous throughout Auckland for its dances. <https://paperspast.natlib.govt.nz/newspapers/DSC18660307.2.6> 7 < **March 1866** another Bohemian group arrival details.

**Daily Southern Cross 11 Nov 1872**, Our Puhoi correspondent writes: For some weeks now the German settlers at Puhoi have been anxiously awaiting the arrival of the **ship Queen Bee** with friends and relatives from Europe. When the ship arrived in AK word was at once sent to the Puhoi, several of the settlers started for town. On Wednesday evening 13<sup>th</sup> Nov they arrived at the Puhoi settlement by ferry "**Four Sisters**" (Skipper George Ryan) all were welcomed heartily by the Bohemian settlers, who all crowded round eagerly asking questions relative to Fatherland, but soon, however talking ceased. A violin and an accordion was produced from one of the trunks, they were soon tripping the "light fantastic," and whirling round in the mazes of the giddy waltz.

**Some interesting facts;** "Stod" Czech pronunciation [Stot] German Staab, is a town in the Pilsen Region of Czech Republic. Stod lies 20 Kilometres south west from the region capital of Plzen upon the Radbuza River. By 1850 Staab/Stod had grown to approximately 1500 residents almost entirely German speaking and the town received civic rights (Stadtrechte). The town was the seat of a local District Court. At this time many local peasants could not afford to buy land so in 1863 a small group were encouraged by a former Austrian army officer named Captain Martin Kripner to emigrate to NZ. They left to settle in Puhoi which has given Puhoi the popular appellation of the "Bohemian Settlement"

**Daily Southern Cross 26 May 1863.** Tender for Ferry Service Superintendent's Office Auckland 12<sup>th</sup> May, 1863. Tenders will be received until noon of Saturday the 30<sup>th</sup> May, for the performance of the Ferry Service from 15<sup>th</sup> June till 31<sup>st</sup> December next. Puhoi and Mahurangi contractors will be required to provide and keep in repair, good and efficient boats, and to convey passengers across as often as required, at a charge of SIXPENCE each at Puhoi, and ONE SHILLING each at Mahurangi, between sunrise and sunset, and between sunset and sunrise double these rates may be charged. The contractors will also be subject to the general regulations made by the Superintendent, under the provisions of the "Regulations of Ferries Act." Tenders to be endorsed for Ferry at Puhoi C/- Robert Graham Superintendent.

Puhoi, River Mouth - Google My Maps.pdf

< click on the PDF <http://www.mahurangi.org.nz/2017/12/10/100-percent-river-powered>

**Newspaper NZ 29 June 1863.** The German Special Settlement. The settlement which has been derived from the Provincial Government Gazette of the 8<sup>th</sup> January 1863, which it notified that. "All that portion of the Komokoriki Block in the County of Marsden, containing 10,000 acres, and lying south of a line extending from the Puhoi Village Reserve, to the northern boundary of the said block, shall be set apart for certain immigrants expected to arrive from Germany. Signed Robert Graham, Superintendent. <https://paperspast.natlib.govt.nz/newspapers/NZH18880705.2.36>

About a year since, the attention of the late Provincial Government was drawn to the circumstance that an emigration movement might be initiated in South Germany with a view to the formation of a settlement in this Province under the forty acre free grant system. Captain Krippner an old and successful colonist at Mahurangi who was the promoter of the movement, placed himself in communication with the Superintendent, in order to arrange preliminaries, and determine on a site for the settlement. Of the several large blocks of land, recently acquired by the General Government, the Komokoriki was considered the most fitting for the German settlement. This block lies rather south of the Mahurangi, being bounded by the Kaipara Flats and Ahuroa on the north by the Flat-topped Mountain and Wade district on the south, and extending east and west, like a saddle from the Hot Springs and Puhoi rivers, over to the Kaipara. The whole block contains 35,000 acres and with AK being 30 miles plus of bush track to reach, Puhoi has a convenient safe harbour which small decked craft and cargo boats may reach the Eastern end of the block, and land settlers and their equipment's at once upon it. The land, though hilly has an abundance of timber close to an anchorage at the landing-place about 4 miles up the Puhoi River. We hear that surveys have been pushed, both at the Puhoi side and in the heart of the block, near the Flat-topped Mountain, and that **several whare** have been built by the surveyors at **the landing-place**, intended eventually for a survey station, but available in the first instance to receive a part, at least, of the immigrants. This latter is a step in the right direction for which we are glad to give the Superintendent credit; but much has yet to be done by the Provincial Government to make this special settlement a success. We would suggest that some money, say a portion of the loan should be expended in **forming the North Road**. Opening branch roads near the Puhoi at once giving temporary occupation to the Germans, opening to them their district, and ensuring their permanent location on the land. End of article.

**From 1850s** new settler numbers to NZ grew and their reliance upon Maori lessened at the same time demand for Maori land increased. Lurking Victorian assumptions of racial superiority over native peoples began to come to the fore. Great Rangatira complained of being racially abused whenever they visited Pakeha townships like AK. In contrast to the hospitality that even lowly Europeans continued to receive from Maori. In 1858 Europeans in NZ outnumbered Maori for the first time and while Pakeha were happy for the Maori to feed & defend them they were not prepared to share the governance of the colony with the Chiefs. In 1852 a new constitution for the colony established a parliament & provincial assemblies from which Maori were effectively excluded because the right to vote was based on European forms of land tenure.

**Maori Messenger** Te Karere Maori, Vol III, 30 August 1863, Mahurangi. A Native meeting which the settlers attended, by invitation, was held at Puhoi Mahurangi, on the 3rd. of August 1863. Several Chiefs addressed the audience and it was decided that the Europeans should remain at their respective homes, as assurances were given that they would be protected. The good feeling which exists between the settlers and Natives of the Mahurangi district, is both honourable to themselves, to the European settlers and it is sincerely to be hoped, that this interchange of friendly relations will be continued hereafter. We publish the letter of the Mahurangi settlers, on this subject, addressed to His Excellency Sir George Grey Puhoi Mahurangi 3rd. August 1863. To His Excellency Sir George Grey, K.C.B. Sir,

We, the undersigned, have to report for your Excellency's information, that a general meeting took place here to-day to which Old Native Chiefs, and to which all the European settlers were invited. One and all of the Native Chiefs expressed their loyalty and their full determination to remain quiet at their homes, and to have nothing to do with the Waikato people or their wars. They also requested that the Europeans would all remain at their homes, engaging that they would protect them from any insult whatever, from Natives -of any place whatever. We further have to state for your Excellency's information, that the Natives of this district are very peaceable and loyal. We have the honour to be, Your Excellency's humble obedient Servants, John Carrell & 27 others. To His Excellency Sir George Grey, K.C.B. AK

The following letter same subject is from Te Hemara, Native Assessor of Puhoi Mahurangi, 3rd August 1863. **“Friend,** the Governor, Salutations. This is my word to you. We have had a meeting at Puhoi the Pakehas and all the Maoris. I have heard the good talk of the Chiefs of Ngatirango. They have told the Pakehas of Mahurangi to stay quietly at their place and to give themselves no anxiety whatever but to grow food for the Pakehas as they were doing for themselves. The Pakehas expressed themselves as satisfied with these words. I have advised the Pakehas to stay fast at Mahurangi, and not go to the town, that I should protect them, and they me, but that if the men chose to go, it would be well. I would protect the women and children, and if the men liked to come back it would be well. These were my words at the meeting of Pakeha and Maori. This is my word to you, Write and let me know your thoughts, that I and the whole tribe may be acquainted with them, enough. From your loving friend, **Te Hemara Tauhia.”**

**The Native Land Court** was established in 1865 to assign individual titles to Maori land. Before a certificate of title could be issued, land was surveyed and the owners held responsible for paying survey costs. The certificate of title plan had to be produced by a surveyor licensed to the Land Court. Waste land info; The Auckland Province introduced the homestead system in 1870. Selectors made no payment for the land, the only cost being that of survey. They were required to reside on their holdings for five years, to erect a house for this purpose, and to cultivate a certain proportion of their land. They were then issued with a Crown grant for the land.

**July 1885 article** Waiwera & Puhoi. **Tenders** for cutting and clearing a part of the Great North road, between the German settlement at the Puhoi and lot four on the Ahuroa block, will be received at the Superintendent's office until noon of Saturday the 4th Feb 1885. The following tenders have been accepted 23 March 1885: **Cutting and clearing** a part of Great North Road between the German Settlement on the Puhoi to lot No.4 of the Ahuroa block to R J Brinston @ **12s.3d. Per chain** which is equivalent to 66 feet or 20.11 metres. (How wide was the road they had to clear?)

The property at State Highway One Puhoi, now part of the motorway was originally the 2408 acre Okahu Block 117 N (later corrected to No. 86) A Crown Grant for the land was awarded to Te Hemara Tauhia and Henare Te Rawhiti on 23 February 1866 under the Native Lands Act 1865. **In Dec 1866** a 26 acre portion of the block was conveyed to **George Ryan** for the sum of £48. The land was bounded to the east, south and west by the 'Ikauwai' [Hikauae] Creek and Puhoi River, and included 4 acres of swamp. Ryan worked as a shipwright, and transported loads of firewood, shingles and palings between Puhoi and AK in his **cutter Four Sisters** and also operated a ferry service from Puhoi.  Puhoi road enquiry 2nd August 2019.pdf

< Useful back ground information on **Puhoi Road** 1870.

**In 1869** the NZ Government authorised work to begin on roads and bridges in the Puhoi district. For the settlers this work was an important source of revenue, the roads also led to better contact with the wider districts. Prior to that time, transportation was either by boat along the Puhoi River to Waiwera and other Hibiscus Coast ports, or via a rugged bridle trail that followed along the south bank of the river to the same destinations. That road between Puhoi & Waiwera became known as Puhoi Road, although it is difficult to tell exactly where it original was located since the SH 1 motorway & the Hibiscus Coast Highway now occupy roughly the same route.

**Beer in Pilsen**, the home of Pilsen Urquell was the first **"Pilsner" type beer in the world**. In 1842, a brewery in Plzen employed Josef Groll a Bavarian brewer experienced in the Bavarian larger method of making beer. Beer in Pilsen at the time was not of very good quality and they needed to compete. Groll developed a golden Pilsner beer, the first light coloured lager beer ever brewed. It became an immediate success, exported all over the Austrian Empire, Paris and the USA. The demand grew for this brew which required a special train of beer to travel from Plzeň to Vienna daily.

**The original** Bohemian settlers in Puhoi at one time had **three** drinking establishments. Clark's Baby Saloon, Schollum's German Hotel and Schischka's Puhoi Hotel, Store & Boarding House. In 2015 the Puhoi Hotel had Pilsner Urquell on tap, I'm not sure if they have continued with this style of beer as it is an acquired taste. In 2020 the Puhoi Beer team released their own Puhoi Pilsner beer which is called Puhoi Pils, a kiwi version of the classic Czech pilsner.

**Do you want to know more about your ancestors?** If your ancestors came from what is now the Czech Republic, or if you go back far enough, Bohemia, you will find that your ancestors are Bohemian, not to be confused with bohemian (with a small 'b'). At some time in their lives, most people get interested in their family history. Looking back several generations, for many of us that means learning something about those ancestor that left their old home country and emigrated. Mostly they came from a very feudal system where they virtually had no rights at all. From the local nobility and priests up to the highest authorities, everybody could decide about these peasant. [Czech Archives & Genealogy Records](#) - [My Czech Roots Czech Republic Parishes: H • FamilySearch](#)

**With the new law of 1848**, resulting from a failed revolution, serfdom was abolished and peasants got the freedom of movement. Those folk took that freedom to get away from the old and help build something new. Looking back can help us understand that choice and appreciate it more fully. You will also find that frustratingly little has been written about this country's history or immigration compared with many other immigrant groups and countries. The history of Bohemia is incredibly rich and the country was at one time far more open-minded than all the rest of Europe in terms of higher education and religious freedoms. It was also known as the Breadbasket of Europe as a result of its farms and produce. Sadly the Thirty Years' War (1618 to 1648) and the failed revolt of 1848 when Bohemian nationalists called for autonomy from the Habsburg empire, put an end to that period. [Czech Genealogy for Beginners: Estates V - When it all ended? \(nase-korenny.cz\)](#)

When you search passenger lists, do not be surprised to see your ancestors listed or written in German. **Being** a land-locked country they mainly left Europe via Bremen or Hamburg Germany. First gather all of the documents and stories from relatives you are able to help locate a place where your ancestors were from. It is almost impossible to do any research if you don't have the correct place. Dates are not that important as they are often incorrect but **names and places are vital**. Historic records in the Czech Republic are fast becoming digitized. Please note the Puhoi Heritage Museum have a vast amount of material/photos which could help with your research, their contact details are: Email: [puhoiheritagemuseum@gmail.com](mailto:puhoiheritagemuseum@gmail.com) [www.puhoiheritagemuseum.co.nz](http://www.puhoiheritagemuseum.co.nz). It is worth viewing the family charts Sheryll Titford and Des Peate produced in 2013 with the names of the Bohemian settlers and their descendants which are for sale at the museum. <https://bohemianassociation.wordpress.com/author/bohemianassociation/>

**Some back ground details;** Farming life in the 19<sup>th</sup> century was very similar to current life in rural areas, the only difference being changing of seasons. Life in the winter was much slower than in the spring and summer. The day began 6am during summer, animals prior to people. Feed all of the animals, milking cows, let the chickens, geese and ducks out to ensure they are ok then collect eggs. Breakfast usually mash or porridge, salty or sweet, sometimes bread with a piece of cheese, butter or plum jam, milk or watered beer, herbal tea. The breakfast was a basis for the whole day, they usually only had two meals per day. Men went to work in the fields after breakfast, it depended on the season but ploughing, sowing crops, taking care of the soil. They worked not only on their own field but also on estate fields often two or three days a week as "robota" mandatory labour for the estate owners. Women spent most of their time around the household, taking care of children, gardening, washing, sewing or repairing clothes,

cooking/baking. Some of these tasks were done once a week and they also helped with the harvest. Farm tools in the 1800's were simple, hand held and crafted from iron. Working with them was often slow, tedious and injuries were commonplace with hay being cut by hand with sickles and scythes. Evening were often very quiet, spent washing dishes, finishing house work then relaxing all together talking, telling family stories. There were weekly markets held in larger towns-villages selling or buying goods, families had to pack the goods they wanted to sell, eggs, grain, fruit and walk to the market. This was an all-day event providing people with a chance to catch up with relatives and neighbours.

**Market day in town****Staab Village****Harvest day rest period**

**Marriages;** November, January, February, what do these three months have in common? The simple answer was most weddings took place during these freezing months. Why? It's cold, it's dark, it's snowing and there was nothing to be done in the fields. People had free time which was also the time when the pig-stickling and carnival season took place. So there was meat available which was not common during the rest of the year. December was excluded as it was holy time of Advent. No celebrations were allowed in March as it was too late, field work started end of Feb. Age in the registries; you will find age shown in the parish records which were written after 1784 and the age may not be correct. (See village wedding image below)

The age written to the registries was told to the priest by the engaged couple and here is the large **BUT**. Age was not important back then as they didn't remember the year in which they were born, they just knew they are about 23 years. It could mean 21 as well as 26 years, usually when you get information about age from the marriage registry also search the birth registry plus or minus 5 years. The full age was set 24, 25 years in the Austrian Empire where the Bohemian belonged before 1918. The engaged couple needed agreement of their fathers or the authorities if the fathers were already deceased to get married if they were younger. You can sometimes find a father's signature in the marriage registry because of this regulation. It is a very valuable trophy to the family chronicles as it is not too common to have such old signature of an ancestor.

The marriage took place in the bride's home parish after 1784. The groom came there in the morning with the whole family and all companions including witnesses of the marriage. Both families and the whole village went to the church for a mass and the marriage was held during the mass. The celebration was then held in the groom's house where the whole company moved. Today the full age is 18 years when you can get married in the Czech Republic. The most popular dance at weddings was the Polka. (Image source ↓ Alamy)

**Immigrants** who sailed from Europe 1840-1870 in Steerage Class were required to have a contract ticket before boarding. **Images below L to R**, Contract ticket, M Krippner, letter, Puhoi family outing & Waiwera Post Office ↓

Martin Krippner and Sir George Grey clearly had some kind of ongoing contact as indicated in the letter above from Krippner to Grey sent in July 1872 thanking him for his hospitality. **Title:** **Passport issued** to Pynson Wilmot Longdill (British Subject) travelling on the Continent.

Foreign Office, London, 19.8.1850. Signed by Malmesbury and P.W. Longdill.

Bio Note: Pynson Wilmot Longdill was born in London in 1811. His father was a solicitor, whose clients included the poet Percy Shelley. In 1859 Longdill immigrated to New Zealand with his wife Harriet and their young family. He encouraged his sister Emily and her Bohemian husband Martin Krippner to join them. The Krippners became one of the founding families of the settlement at Puhoi. Longdill meanwhile established himself as a merchant with offices in Fort Street Auckland. He died of a heart attack at his **Parnell** residence 8 Avon Street on 16 May 1875. Longdill, Pynson Wilmot, 1811-1875 Great Britain.

The obituary for Pynson Longdill's wife, Harriet, in 1911, states that her late husband had acted as German Consul [NZH 28 Sept 1911](#) <https://paperspast.natlib.govt.nz/newspapers/NZH19110928.2.89>

**Bohemians** are known for their sense of humour & getting use to foreign accents sometimes caused amusing misunderstanding. Around early 1900s at a public meeting in the Puhoi hall for local farmers, a stranger asked, “**Who is the chairman here**”? He received a loud reply from many of the Bohemians in attendance, “*We are all Germans here*”.

**Disease** thrived in the squalid conditions of steerage travel, depending on the size of the ship a few hundred people could be crammed into tight quarters. Wooden beds known as berths are stacked 2 to 3 high with 2 people sharing single berths & 4 into a double.

**Why did immigrants remain in their berths?** The unattended vomit of the seasick, the odours of not too clean bodies, the reek of food and the awful stench from the toilet rooms make the atmosphere of the steerage such that it is a marvel that humans can endure it. Most immigrants stay in their berths for long periods of the voyage in a stupor caused by the foul air. Men were able to have a saltwater shower on the upper deck but women did not bathe during the whole journey due to lack of fresh water and dignity.

**European settlers** in the 1840s expected NZ to have an agricultural future and the first A&P Show was held in the Bay of Islands in 1842. A year later the Agricultural and Horticultural Society of AK was set up. It printed a pamphlet on farming prospects and held its first show at the Exchange Hotel in Shortland Street AK December 1843. However, shows were not held regularly in AK until the 1870s, and the AK Agricultural and Pastoral Association was established in 1877. Descendants might recall the annual **Feb ↓ Puhoi A&P Show** which included wood chopping, you may still have ribbons as a memento?

[Lesley's Genealogy - Bohemian Families \(lesleysfamilytree.co.nz\)](http://lesleysfamilytree.co.nz) many familiar Bohemian names in this link

Chief Te Hemara Tauhia was remembered in Puhoi as six feet tall, of fine features, and a noted orator, wearing a dark suit and bowler hat on all important occasions. He kept a firm hand on his people and never tired of lecturing them on the evils of drink. When he said a thing he meant it, and did it! (Source R H Locker Last rangatira of Mahurangi and his hapū) It is rumoured that Te Hemara obtained the bowler hat from Robert Graham who purchased Waiwera Hot Springs land off the Chief in 1845.

The name **Waiwera** is of **Maori origin** and means **"Hot Water"** (**Wai** = Water and **Wera** = **Hot**)

**Maori** had their own names for the land we know as **Wenderholm** ^ the flat sandy spit at the mouth of Puhoi River was called Te Akeake while the forest headland was called Maungatauhoro.

(PDF Mackintosh, 'Wenderholm Regional Park: Our History', Auckland Regional Council, 2005. | Lucy Mackintosh - Academia.edu

**A story that survives**, to send his adopted son Henry Wiappo to college in AK Chief Te Hemara Tauhia borrowed some hundreds of pounds from one of the Ryan family on mortgage against part of the Puhoi Block. The Ryan family had settled on the Orokaraka Block opposite the Puhoi spit. John Ryan was a timberman, A and G Ryan were shipbuilders in the early 1860s. The loan was not repaid and 400 acres were transferred to Ryan in 1879. This is almost certainly the **Wenzlick** and Ryan lot shown on the Greenwood poster (see below) measured today at 398 acres. The deed shows in fact the mortgage was taken out to Dufaur in 1875 and in 1879 some 400 acres were sold to Ryan to repay Dufaur.

[Last rangatira of Mahurangi and his hapū - Mahurangi Magazine](#) < R H Locker.

## Sunset on the Puhoi River, Wenderholm 1880

Alfred Sharpe watercolour on paper, **courtesy** of the Fletcher Trust Collection

The Puhoi Reserve was created by the Crown in 1853 and divided into ten blocks. Auckland tourism entrepreneur businessman and politician Robert Graham bought 70 acres of the land and built a modest homestead on it in 1857 **naming it Wenderholm**. The size of the house was doubled by second owners Major John and Harriet Whitney then the house was purchased by H.W. 'Tim' Couldrey then AK Regional Park. <https://www.aucklandcouncil.govt.nz/arts-culture-heritage/heritage-walks-places/Documents/wenderholm-regional-park-history-walk.pdf>

**At Waiwera in 1845** Robert Graham purchased 20 acres of land on the foreshore, including the hot springs, whose tourist potential he had recognised. He built a hotel and later increased his land holdings in the district. He was fluent in Maori and in 1848 purchased 500 acres at Ellerslie which in later year's part of this land, 90 acres was sold to become the Ellerslie Race Course in 1872. R Graham was elected superintendent of the AK Provincial Council in 1862 and held the post until 1865. <https://paperspast.natlib.govt.nz/newspapers/NZH18780101.2.20> <1878 Waiwera

By the 1870s, visitors to the Waiwera thermal resort were invited to visit Wenderholm and its surrounds. During the depression of the 1880s, Graham sold Wenderholm to a land agent called Robert Greenwood, who decided to subdivide the property in order to create a luxury holiday resort called the Greenwood Estate. The plan did not come to fruition, and he sold the property in two pieces in 1885. Today the area is known as Wenderholm Regional Park. **Images below** of the Waiwera Hotel, wharf and poster shows plan of land for sale with a view of the property area known as Wenderholm Regional Park.

**Chief Te Hemara**, a fine old type of Rangatira, was a noted character and often about the Waiwera Hotel. In later life he always contended that Graham did not pay him enough for the hot springs land. On the day after Graham's death in May 1885, old Te Hemara with his bell topper came into the hotel grounds. He went into the bath house, pulled out all the plugs and brought them into the hotel office and said to the manager, Graham is now dead; all this property comes back to me, and he held up his armful of plugs. (Source R H Locker)

[Part 5 A maritime community - Mahurangi Magazine](#) [Coastal path and the ferrymen - Mahurangi agazine](#) <http://www.mahurangi.org.nz/magazine/>

**NZ Herald 2 Aug 1865 article Te Hemara** has a small vessel employed in running between Puhoi and AK for which he receives from some Europeans who work her the sum of £16 per month. This in itself is a very nice little income, but he has it supplemented by the rents of the ground and bush from which the Europeans get their timber. Up the Puhoi River some few miles, it is a very fine stream but shallow when the tide is out. There are many settlers located up here, several punts of large size were on the banks for the purpose of conveying timber down the river to the vessels which cannot go up. The banks of the river are in most places very steep and densely timbered, a number of small stone wharves are built at various places with clearances made through which the firewood is tumbled into the punts below.

Photo of Puhoi Public School children 8 December 1899.pdf

< I wonder who the children are in the school photo?

The Portrait below (Thanks to AK Art Gallery granting approval to display this portrait) depicts Mrs Rosalia Schischka (nee Schindlerova) who, like Lindauer was an immigrant from Pilsen Bohemia. She arrived in NZ with her husband Lorenz and 7 children in March 1866 on board the ship Liverpool. Like many immigrants from Bohemia, settled in the Puhoi valley, where they farmed 220 acres. **She was 73 years old when Lindauer painted this portrait**, he was working as a journeyman painter travelling from town to town advertising his services as an oil painter in newspapers. He was based around Auckland from 1875-1877. The artworks from this early period share a close resemblance and evidence strong similarities to Lindauer's Bohemian portraits, which are based on the Bidermeier art tradition. As with his Bohemian portraits, Rosalia Schischka has been painted against a brown background, which the details of her clothing and jewellery are highlighted with small dabs of white paint.

**Interesting** that Joseph Schischka (Lorenz) born 1863 in Littitz Bohemia was the **5<sup>th</sup> son** of Lorenz & Rosalia Schischka. He was aged 2 on arrival in NZ in March 1866 with his family. Joseph married Margaret Wenzlick in 1896 in Puhoi. Margaret born 1875 in Puhoi, the 2<sup>nd</sup> daughter of Johaan Wenzlick & Anna Plescher.

Alma Schischka was gifted a Gottfried **Lindauer** book in 2016 from Roman Musil Curator of **The Gallery of West Bohemia Pilsen** Czech Republic, I collected this book in Pilsen and delivered it to Alma in Orewa Nov 2016 [teaomaori.news](http://teaomaori.news) [Pilsen prepares for Lindauer exhibition](http://PilsenpreparesforLindauerexhibition.com) | [Te Ao Māori News](http://TeAoMaoriNews.com)

[Gottfried Lindauer - Wikipedia](https://en.wikipedia.org/wiki/Gottfried_Lindauer)

Photo below courtesy of AK Libraries, view of the village 1899

**This article released May 2021** illustrates numerous snippets and images Puhoi families might not have been aware of and acknowledges previous material published of the Bohemian settlers. There are many superb publications on the history of Puhoi and more are still being penned.

Diving into my research I quickly realized that I was grossly uneducated when it came to the culture of my ancestors. I soon came to believe, perhaps most importantly of all, that I am fortunate to have their Bohemian blood running through my veins. Special thanks to Stephen Schollum for his guidance and reassurance in producing this article.

It is difficult to imagine the psychological pressures placed on the pioneers. I trust after reading along with viewing the various links in this article you can reflect on how exacting it was for those early settlers leaving Bohemia to never return and the journey they all experienced to reach Puhoi. A few stories and photos listed after they arrived hopefully provides an insight into their courage to succeed and establish this unique village which still flourishes today.

If you ever have an opportunity to attend the Puhoi 29<sup>th</sup> June anniversary **enjoy the occasion** and take time to visit the museum as well as the many other venues throughout this unique historic village. If you are a descendant make yourself known to the locals and at the museum.

Compiled by Adrian Anderson a descendant of great grandparents Johaan Nepomuk Wenzlick and Anna Plescher, grandparents Joseph Wenzlick and Sarah Dennis and my mother Edith Wenzlick. Errors and omissions excepted to the best of my knowledge the research information is correct.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I do not want a further rate increase. It is hitting hard those who do not have much to earn a living but own a property. Essentially, with house price very high plus high level of debt, and then you tax more rates to people who own property. Theb

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Utilise the existing buses until they are worn out before buying new ones, there are too many buses in the road that are not even utilized or not full at all. It is ridiculous to buy more when the fleet is not maximised its capacity at all.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** There are so many targetted rates now that if we add all of these through time it is still a significant amount. It is better that that everything is just I the general rate.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** These asset are the one directly benefitting community. But this are birthday maintained well. Council is good at building nice assets but after a few years, weeds grew, Bush and shrubs not maintained well. Better for council to fix broken assets. For instance a path was closed over 3 years ago due to slips but up to now still nothing has been done. Weeds have grown. It is unacceptable. Still council wants to increase rates and cannot even fix existing assets. Now Council want to charge some services. It is becoming more commercialized despite more rate increase. I propose Council keep services free and subsidized e.g libraries, pools and leisure facilities, public toilets, parks, community halls. Perhaps charge more rent for some community groups and clubs. Some clubs earn from using Council land or facilities

and yet paying only a few dollars. This is line subsidizing some wealthy club members, e.g. golf clubs, bowling clubs, tennis clubs etc.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Does not support more targeted rate the is regionwide. Otherwise just divide the general rate to targetted rate. The general rate should cover all council services from community Facilities, waste management, environment, transport, etc. There should be n

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Again, I do not support more targeted rate. This is ridiculous.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Don't know

**Tell us why** I do not know what are the priorities of the LB. If this is just like a lolly scramble where budget is allotted to the LB and then they think of what they can do to spend it, it can end of on anything not worthy. Living in this LB for a while, you can feel that Henderson town centre is dying little by little. Westpac closed. Dental clinics closed. Some shop closed. Not much excitement going on in town. Sincr AT and council left or reduced its operation in this area the town has suffered with less and less people and customers for businesses. It was better and vibrant during Waitakere Council days but now Henderson is left behind. So what is the point of rates increase?

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Opening more lands for subdivision at a fast pace similar to Christchurch rebuild.

### Important privacy information

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Organisation (if applicable):

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** During a time where people are struggling enough as it is you want people take an 8.5% increase on their rates? 3.5% is a bitter enough pill against the back drop of stagnant/decreased/lost wages and increasing expense. While I understand the logic, I do not support planned action.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Don't know

**Tell us why:** I would prefer more practical community based interactive projects eg starting a community garden - you are planting edible vegetation that can support those that need it, provide more jobs for people and offset some of your carbon footprint

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Don't know

**Tell us why:** On the fence as I rarely use any of these facilities

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** The pool in North West is a stupid idea. Westwave is not far - just drive or bus there in the electric buses the council will invest in. Especially with the water shortage and the type of boiler being used at Westgate which costs money to run and the issues outlined in the budget to do with establishing and maintaining such facilities.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Housing and health are very important. You see so many more homeless people than there were when I was a kid. There's also those struggling quietly - the ones that don't quite qualify for any govt assistance but need a bit of an extra hand. I would like to see more community based initiatives eg the community garden i mentioned, a small recycling centre would be good too - things that may have been sent to landfill but someone skilled might be able to salvage and give to help someone else. Those clothing bins - they should be council owned and operated. I saw a documentary that alot of the second hand clothes are shipped off overseas instead of providing it to someone here at home - I watched a couple on Police Ten Seven get told to leave those clothes cause it was private property and they thought the clothing was for struggling people like them. Little things like that.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Organisation (if applicable):

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I do not support increasing rates by 5%, surely 3.5% can be enough. My pension is not being increased by 5%, or by any amount, and I am expected to live within my pension allowance.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Presumably, the electric buses are around the same cost as diesel ones (taking fuel costs into account too)

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Good water quality is of prime importance

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Community facilities, especially LIBRARIES are of prime importance and the No1 central building and facility in any of our townships and must be supported and facilitated BEFORE ANYTHING ELSE.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

I do not think more money needs to be spent on swimming pools, the big Olympic pool in Henderson seem very adequate to me.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** Spreads the cost over a wider area, as the service will benefit all properties and businesses in the area, and increase their property valuations.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why** I support particularly the library in Te Atatu Peninsula, it is of prime importance to the area

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I do not support the huge increase in housing, and therefore the population increase in the area, there are too many people and therefore a too bigger drain on our fixed resources and particularly land on the Peninsula. Please stop the population increase!

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I do not support a 3.5% rates increase, let alone a "one off" 5% increase. We have all been hammered by covid and have also lost revenue, not just the council. Just like us, the council needs to make ends meet by living within their means, NOT passing the buck onto rate payers. Landlords will pass this cost increase onto renters.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** This is a joke. A.C. Declaring a climate emergency and expecting any sacrifices that Auckland makes to the WORLD climate would result in immeasurable outcomes. There are far more important priorities right now

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Again, live within your means and find savings by cutting funding for non-core council business.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** I support reducing cost by increased efficiency. What does this have to do with carbon footprints and diverse communities?

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Not every rate payer uses the bus. Why should they pay? The business model needs to be self funding by the passengers that use the service.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Don't know

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Auckland is one big traffic jam. Please stop building houses which fuels population growth until you fix the roads. The recently "upgraded" southern and north western motorways are already overwhelmed the day they were finished. There has been no reserve capacity to allow for future growth. Should have at least constructed 4-5 lanes each way. When will the East-West link that was scrapped by the Labour government be reinstated?

Same point for the storm water / sewage system. What a disgrace. No more houses until you can guarantee our turds dont end up on the beaches every time it rains.

## Important privacy information

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** There are many areas of Auckland (particularly West Auckland) that requires rejuvenation. The transport services require attention with the growing population.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** NZ prides itself on its Green image - however there is so much we need to improve on.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** No only does the water quality need to improve for our sakes, but more importantly for the marine life we are abusing in the Hauraki Gulf. Hopefully more marine protected areas are created - such as the waters surrounding Little Barrier Island and further protection for water around Tiri Tiri.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Don't know

**Tell us why:** It depends on where these areas are, what they are being used for, the potential for future uses, community projects ect.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** The Henderson-Massey area requires investment. There are many new houses being built but Henderson town centre still looks sad and dilapidated.

Greater focus on reducing carbon emissions is vital for the future, and given NZs green image, should be something that is at the forefront of any develop or rejuvenation plan.

Greater protection of trees which should be protected under law from developers. Increasing of marine reserves in the Hauraki Gulf.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Whilst building more homes in our city is vitally important we need to ensure the transport routes and options increase too.

## Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Infrastructure is core business for Council, to slow down maintenance, much needed upgrades and to delay addressing climate change projects would severely de-grade Auckland as a city.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** We need to do everything to slow down our emissions - it is essential.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** I believe our water quality is one of the most important assets to Auckland and we must protect and improve now.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

"In principle, given the uncertainty of when major international travel will return reinstating the APTR would significantly damage an industry already bearing the brunt of C-19 travel restrictions. It is clear that many sectors are suffering due to the I

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Got enough debts. Should pay off some first then reassess

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Electric buses are not ecological and use a lot of rare metal for batteries eg : lithium cobalt ..etc ..if you were serious about pollution you would remove speed bumps

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** To increase rates would mean more money out of the wage packet of the hard working men and woman that elected you lot, the same men and woman who have los thousands of dollars due to lost wages ( covid) and that have not had a cost of inflation pay raise in many years

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** .

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** To keep all beach's clean and clear is a must to keep the growth of shellfish and other organisms also the full use of these areas for our young

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** Using facilities to the full potential is a great idea

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

**Tell us why:** Won't affect me

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The increased expenditure on water (57%) increase, and "Parks and community" (20% increase) cannot be justified in circumstances where Auckland households would be required to accept the significant part of the burden of the extra expenditure right at the very time that they are under financial strain and uncertainty flowing from the pandemic. The rate of increase in rates is unreasonable. Any rates increase should be confined within rates of inflation (currently low) as that is what the ratepayers are experiencing with their incomes. Then the budget needs to work within that.

The parks and community expenditure seems particularly indulgent in difficult times - and as a ratepayer I object to being required to pay for some of these projects when I struggle to pay my power bill.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** I agree with moving the fleet to electric and hydrogen buses.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** I do not support increasing the targeted rate to enable water projects to commence earlier. It once again highlights the fiscally irresponsible approach of the Council and lack of awareness of the impact of those on non-guaranteed civil servant incomes of the covid pandemic. It also feels like more of a central government type of issue.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** Based on the little used Council community centre in my area it appears to me that millions are being poured into projects that do little to enhance the wellbeing of local areas. I have no problem at all with closing facilities and instead for the Council to focus on central tasks such as transport, rubbish and recycling and other core business.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Total waste of money. I don't live in this are, but have close family members who do.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why** The priorities are described in such esoteric manner and with broad sweeping terms that it is impossible really to understand what it means on a practical basis.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Council should focus on core business and things that affect the ratepayers as a whole (transport, rubbish, protection of the Auckland environment), and stop wasting ratepayers money on expensive projects that benefit only a handful of Aucklanders (free or heavily subsidized swimming pools, fitness classes, massive community centres in small towns - just some examples).

## Important privacy information

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Support, but want to see increased spending and more use of debt.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Support but it's totally inadequate. Everything Council does should be reviewed through the lens of climate change, i.e. does this help NZ meet or exceed its targets. This requires some radicalism and faster change than is proposed, it means abandoning funding for new roads, reigning in city sprawl, and multiplying spend on public transport, walking and cycling.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Cleaning up our waterways and harbour should be a core council focus.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Support consolidation and sharing costs, but key community assets such as libraries should be maintained.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** I think all of Auckland should be provided with great public transport, funded out of general rates and tax. I don't think some suburbs should be made to pay more. Having said that, this is one of the penalties for allowing Auckland to sprawl. We need a compact city for greater efficiency and environmental outcomes.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** My feedback to the board was that it lacks vision. Within Te Atatu Peninsula, there are multiple developments being built without off-street parking, causing local upset. Council and AT are not supporting this type of development with sufficient investment in public transport, walking and cycling. Te Atatu Peninsula is geared around cars, the town centre is a mass of angle parking. We have a revolution of sorts happening off-street, with no political investment to support communities changing the way they travel around.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

As stated earlier, everything Council does should be viewed through the prism of climate change and enabling Auckland communities to make the significant changes needed. Council has declared a climate emergency, but within Council and CCOs I don't see policies or project priorities that reflect that declaration.

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** I love the idea to have electric buses. I would also like the option to locate a bike rack in the front of the buses for people to finish their trip in a bike...in case the bus route did not took you to your final destination.

I will do some TV commercials to promote the using of this public transport and reduce the use of your car...

I think will be fantastic if the government promote the idea also to have your electric car as well...maybe doing some trade deals with electric car companies.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** I think is great the community centres and libraries but not many people are using. will be ok to share the spaces or have one library in a region...closing some of then...

The courses in the community centre could be also a little more expensive and you could take some money for building maintenance. At the moment the courses are very affordable with is great but I do understand your point...

I will also promote in the high schools, the option of doing learning courses for the teens, to allow them to have some work experience to start their WORK journey in their field they like more...cooking, mechanics...

The community centres need more promotion and more use...but I love them...

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Don't know

### Tell us why:

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Don't know

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Important for me is safety...

I also think we need more houses... young generation like more Eco -green communities... you could create programs to build small house maybe far away of the city and offer this houses to the young generation...and cheaper.

You could destinate some land outside Auckland for tiny house communities where people could get access to services as water and maybe you could sell the land to then...the idea is get and affordable way for people to live and support the climate change going GREEN.

We also need to promote people to live in other cities, no all in Auckland.

The route conditions are great...

Buses fares are a little expensive comparing with other countries.. you could create promotions for every day travels out of the peak hours...or if you have the buses full all the time you will not need to charge so much...so again is promotion...

Houses prices in Auckland is crazy expensive...because the demand, but we need to create more balance in the demand..promoting people to live in other cities as well.

Thank you for your time!

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** We cannot afford this especially given the increases in land value Auckland Council has created.. no one wants or can afford to live in Auckland anymore. Stop wasting our money on stupid non value add projects.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Non value add. This does not fix our broken infrastructure or get the homeless off the street. Stop the ideology. Can't even swim at the beach. Get real. Stop the waste.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

## **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Infrastructure not keeping up with growth. Poor council spending. Waste waste waste. Auckland Transport incompetent.

## **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. #### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** What is point of consultation when you never take any notice of our opinion ... I am sure council will implement this .. but in totally disagree with this proposal.. take money from the 10 cent you increased for petrol or tell us when council is going to stop itDear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at [http://www.ratepayers.org.nz/2021\\_ltp\\_submission](http://www.ratepayers.org.nz/2021_ltp_submission).

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Leave it for central GOVT

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Any rates increase I do not support

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Do not support either option

**Tell us why:** Let the users pay charges .. majority of the byes are running empty

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I do not support some priorities as it looks like lifting of a particular community .. council should be inclusive to all communities

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

PLEASE STOP INCREASING RATES.. YOUR RATES INCREASE IS HIGHER THAN INFLATION AND AN INDIVIDUALS PAY RISE THAT GENERALLY SITS AT 1.5%...

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** I don't live there, they should decide and wear the cost

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## 7. What is important to you?

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** It's already a hard time during the Covid 19. The salary did not get much grower, but tax, rate increase every year. 3.5% is enough! Did government think about the people life in Auckland?

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** It is good to do this. But the main thing is not change buses, it should make the tickets lower than driving fee. More people will choose public transport.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Don't know

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

**What is your opinion on this proposal?** Do not support

**Tell us why:** I guess already 30% going towards this from house rate?

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The city centre is too much congested need to invest outside (other suburbs ) so more jobs and more business can be created with the new investors.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Cut down on high pay and pay rise and bonuses

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

## **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Make the open third party survey rather than on your website to create more transparency as I don't trust if the survey results will be honest and clear or fake

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Rates are increased and not utilized properly

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### Important privacy information

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Auckland need to improve the transport services. Westgate and further NW is increasing considerably and fast and there is not proper public transport. If there was, environmentally more people would choose public transport, but instead everyone is driving their own car to work. Changing bus type will not help the environment by much. It is the amount and availability of transport that needs to change. I would supports this, if it was to happen. I don't want to pay for something I don't have access to.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

### Do you have any comments on any of our proposed changes to rates and fees charges?

We live in westgate over 6 months, we pay rates and in addition we pay our own garbage. We have not seen once Auckland council come by. The outside path area is full off wedd and torn bushes, the threes the council has planted are all dead. No one keeps a

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** It should be for those using the bus to pay more fore it, cost slightly higher for the ticket, so it is for the people using the service. And also for businesses profiting of the bus in the area.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Improve the newly built areas, all side walks and weeds are left growing. Walk path are full of rubbish left from builders and nails are left around, some signs and lights have been driven into and fallen. The areas just needs a clean.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Proper transport is very important, if not at least proper roads. Example out west, the highway ends in a roundabout and the cue is never ending. The area keep growing in kumeu/ Whenuapai/Huapai. We choose not to live out there because of too much congestion of traffic and no public transport.

### Important privacy information

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** We do need safe drinking water

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why** As westgate area has the biggest shopping center in nz, and more house start building here, the population will grow very fast, we do need a new school zone here

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

westgate area has the biggest shopping center, fast growing population, we do need new school here so i for not need worry about my kids school problem

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Organisation (if applicable):

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Rate increases are far too high

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** Once again you are asking people to pay what they might not have

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Money we don't have

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

People are not money trees, get rid of some of the dead wood on council first

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** I don't live on the shore

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Pick the most important issues and fix them we can't afford everything

### **Important privacy information**

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The Council is proposing to spend money rather than looking at what is a must do.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** The high density developments around Auckland are not very green basically no trees just weedy verges, take walk around Hobsonville Point wall to wall boxes.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Other

**Tell us why:** The water management was a shambles under the previous overpaid management.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Other

**Tell us why:** How about making sure whatever is upgraded or built is made to last by qualified people who guarantee the build quality with assurances to shoddy work as part of any contracts.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Vector need to get more cables underground so trimming trees is lessened.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** User pays.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

## **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

The Road planning in Hobsonville is a disgrace many are not wide enough for two cars. There is also a lot money wasted on amateurish resurfacing with chip still lifting off and being thrown across footpaths and grass verges 3 years later.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** It is more important to optimise the current use of revenue

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Further actions to climate changes should not be done at Auckland level, but nationwide

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. # 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Rates increases must be limited as much as possible. Because rates burden disproportionately falls upon Māori and Pacifica people. Raising rates is effectively racist.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Because rates increases must be limited as much as possible. Because rates burden disproportionately falls upon Māori and Pacifica people. Raising rates for any reason is effectively racist.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Do not support either change

**Tell us why:** Because rates increases must be limited as much as possible. Because rates burden disproportionately falls upon Māori and Pacifica people. Raising rates for any reason is effectively racist.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Don't know

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Rates increases must be limited to avoid increasing inequity!!!!

## **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** As always, Auckland needs to continue with maintenance as well as improvements.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Can we make all of our street lights solar panelled or use LEDs. Also ensure that the lights are not on in the middle of a fine sunny day. (I have seen this often on the NorWestern Motorway over the years).

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** Don't pay outrageous salaries to Watercare.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Don't know

**Tell us why:** I have read the proposals but there is not enough detail for me to make a decision.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### **Which option do you support?**

Don't know

### **Tell us why:**

### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

### **Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities**

**Tell us why** What does this mean: to retain funding in the 10-year budget to progress the work on aquatic provision in the northwest? Is that another Community Pool like West Wave?

Would this not be funded by the Government as they have publically said that they support this? Can we please ensure that the rowing clubs are also looked after. for funding in the 10-year budget to progress the proposed permanent facility for Waitākere Outrigger Canoe (Waka Ama) Club in Te Atatū South (consultation, detailed design, consenting and a detailed estimate) - this would help address the gap in regional support for Waka Ama, one of Aotearoa New Zealand's fastest growing sports

Yes, this definitely needs to be completed and will certainly be used and supported by the community. I think that this is very important: We will also advocate to central government and the Governing Body for funding in the 10-year budget for the remaining sections of Te Whau Pathway, not covered by the "shovel-ready" central government project funding, to be completed.

This is also something that needs to be continually maintained and improved: continue providing quality parks and playgrounds, libraries, community and recreation facilities, and events.

## **7. What is important to you?**

### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I hate the 4 (two/three stories) houses that are now being built. I think that this will change our culture and our sense of space and connection to the land. Do not build houses/apartments without car parks (at least two). This is just nuts. Do not turn us into London. For all new builds, give better consideration to the design of these houses. Make solar paneling compulsory as a source of electricity. Make compulsory for garages have a charging point for cars (as we move to

electric cars) as well as a battery for the solar power. Make water tanks compulsory so we are not in a panic when it doesn't rain in Auckland. Do reticulated water (make compulsory) from washing machines to then be used for flushing the toilet and watering the garden. Surely we have all the technology for this now.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Generate funds by reducing bloat of administrative costs by having less staff/less pay.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Fund infrastructure and technology, provide cheaper energy sources.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Been bleeding money, no penitentials for failing to perform job as public servants.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Land value has increased in value over the year, realise those potential gains by selling the lesser needed spaces.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

Yes

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Generate funds by reducing bloat of administrative costs by having less staff/less pay.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** You are increasing spending on initiatives that remove even more disabled families access to work, their cultural heritage and their communities. You are planning to ban more access of vehicles for persons with disabilities in the city streets and reduce access to council services for people with disabilities. Even your surveys are inaccessible to many with disabilities and your council planners are ableist and are actually increasing the severe physical harm disabled people risk and increasing the costs to low income families with disabilities. You have denied disabled access to

affordable public transport and still charge persons with disabilities who need aid more than twice the rate of others. Even your total mobility program can lead a disabled person on the benefit with no money for food charges of over \$80 a day just for medical transport and daily living. It is shameful to be a NZder with organisations like yours which abuse and threaten disabled lives, increase the harm on the city streets to disabled people and remove access to the CBD for mobility vans and petrol vehicles which can fit mobility devices and allow for physical impairments. You are directly breaching the rights of disabled NZders and ignoring the UN Convention on the Rights of Persons with Disabilities.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** You are increasing spending on initiatives that remove even more disabled families access to work, their cultural heritage and their communities. You are planning to ban more access of vehicles for persons with disabilities in the city streets and reduce access to council services for people with disabilities. Even your surveys are inaccessible to many with disabilities and your council planners are ableist and are actually increasing the severe physical harm disabled people risk and increasing the costs to low income families with disabilities. You have denied disabled access to affordable public transport and still charge persons with disabilities who need aid more than twice the rate of others. Even your total mobility program can lead a disabled person on the benefit with no money for food charges of over \$80 a day just for medical transport and daily living. It is shameful to be a NZder with organisations like yours which abuse and threaten disabled lives, increase the harm on the city streets to disabled people and remove access to the CBD for mobility vans and petrol vehicles which can fit mobility devices and allow for physical impairments. You are directly breaching the rights of disabled NZders and ignoring the UN Convention on the Rights of Persons with Disabilities.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Do not support either change

**Tell us why:** Disabled persons who do not have fine control over water use and are the poorest and most discriminated against in the nation with many receiving not enough income to cover basic costs, (median

annual gross income of \$19,864 compared to \$39,710 of non disabled people, Stats NZ). We cannot afford your largess as you water sports fields and golf courses, we do not even have access to most public parks as a group or family. Come back when you have cut non disabled water use and public service water use before punishing the poorest and most vulnerable in the community over something they have very little to no control over when they are often physically unable to have housing unaided.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Case Study

Family firework festival fun goes South fast

"He needs the chair, don't take it away or tell us to leave unless you can guarantee aid to lift from the ground, because we physically cannot."

Local businesses and community members benefit from events they can attend and gain custom from. This increases economic participation in the local area to those who can have access to these events. Although currently events are designed with limited and restricted access. In many cases this is represented in ticket prices and business contracts however some more hospitality based businesses can also benefit in an increase in local tourism. However though access is also restricted by disability barriers in place which can restrict access to community events, transport around the community and community spaces. Which can have significantly worsening wellness outcomes and social isolation is known to result in worsening medical outcomes as well, not just for the disabled person but the family and friends they connect to.

An example was a classic kiwi community event, a fireworks show. It started with a lack of transport access as event organizers closed off most park access, removing access to mobility parking for the entire park (not just the field of the fireworks show). The organizers also closed off roads towards the local hospital and residential neighborhood which also impeded emergency and home access for those with disability concerns. Were it not for an oversubscribed level of near illegal unsafe parking one disabled family might never have even been able to get near the park at all. Even the mobility accessible paths had also been barricaded off. Some falls, chair carrying, pushing, pulling later they arrived finally at the knoll where the fireworks viewers could sit and look at the skies.

All the more worn and fatigued, concerns grew already as they were pointed to a section furthest from event facilities but it would be worth the pain to have a night of wonderment. Until festival staff came up to them and told them to leave the middle space they were in and go to the furthest corner of the section. Dispirited and with more pain, through impairment they did. Hopefully now they could sit and watch the fireworks. Festival staff then came up and informed this disabled family that the chairs would need to go or they would need to leave the park grounds altogether and would not be able to attend the festival. But this family would not be able to stand up unaided from the ground, or even crawl. The wife cried out that unless event staff would guarantee aid to lift from the ground or exit the park they would not move. The event staff refused such aid and decided it would be more hassle to try to physically escort them out. So the family were able to stay only to fight their way back through injuries, the lack of event toilet access, the lack of accessible paths, the lack of safe transport and parking to go back home.

Even a park fireworks festival is a battle on many fronts. Obviously there are aspects that affect emotional wellness for the family but also future economic participation is threatened and the lack of being able to support more event businesses. Obviously this family of many were not able to gain the same benefit from what should have been a safe, non medically harmful, accessible park festival engagement. The injuries obtained affected their economic independence as work was lost and ACC often does not support people disabled by genetics who face injuries. In addition future events & parks have been made even more inaccessible especially those in the CBD, areas like Britomart, Quay St, Silo park are exceptionally inaccessible to most disabled people, especially during events.

"Many never know the importance of access until it is removed"

Event organizers could have informed using disability statistics that there should be a number of participants that would have safety and access concerns to a local park and residential area. That those who would benefit the most from such a community engagement event would include many who are socially isolated or disabled. In addition organizers would

have been able to better plan transport changes around the area and access to the event. Event staff might have been more accepting and knowledgeable of those with different abilities and mobility needs had they been educated in the number of populace with disabilities. There might even have been accessible facilities and businesses with access for disabled people. However the points at which these statistics are needed the most are the at the planning, design and staff training stages. For this the statistics need to be easy to access & communicate to those involved with planning, management and policy decisions. Also the expectations of economic participation of disabled people need to change when reducing disability barriers. Plans and policy changes need added monitoring and participation goals to measure success of certain methods. Often a mix of methods accommodating many different disabilities has the best results.

Some methods that would have helped this case include:

understanding disabled have equal rights to attend events and public places and by population percentages you should plan for more than 20% have a significant disability.

increasing transport access (i.e. do not remove disabled transport access simply because you think everyone can walk and cycle when that is ableist and obviously not the case,

adding facility access (i.e. do not redesign to remove disabled access because you want to force everyone to walk and cycle when you are discriminating and ostracizing those disabled breaching their human rights,

better site signage,

accessible ticketing sites with detailed disability access plans,

staff acceptance and training around people with disabilities,

medical assistance for injuries at an event,

business support for those with disabilities,

allow carer support do not punish and double charge disabled people because of your inaccessible designs so they require additional support etc.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Vector has been skirting on a weather resilient network for decades and has been forcing users to higher charges while not performing basic maintenance, instead paying more and more to benefit shareholders and upper management more than the entire maintena

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** You have denied disabled access to affordable public transport and still charge persons with disabilities who need aid more than twice the rate of others. Even your total mobility program can lead a disabled person on the benefit with no money for food charges of over \$80 a day just for medical transport and daily living. It is shameful to be a NZder with organisations like yours which abuse and threaten disabled lives, increase the harm on the city streets to disabled people and remove access to the CBD for mobility vans and petrol vehicles which can fit mobility devices and allow for physical impairments. You are directly breaching the rights of disabled NZders and ignoring the UN Convention on the Rights of Persons with Disabilities. Disabled persons who have not been provided access to public transport and are the poorest and most discriminated against in the nation with many receiving not enough income to cover basic housing, (median

annual gross income of \$19,864 compared to \$39,710 of non disabled people, Stats NZ). How can a person on less than minimum wage even afford the increase when they cannot afford food, or transport to begin with and rely on carers support vehicles which are large petrol powered only.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why** You are directly breaching the rights of disabled NZders and ignoring the UN Convention on the Rights of Persons with Disabilities.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

If your CCOs go much further to banning cars and vans from the CBD you will open up to direct legal challenges as you are ostracising the disabled from core cultural areas and medical services. You have already been denying them access to lower Queen St, Quay St, Britomart and the businesses (including medical specialists, work & events around there) Slow clap in one year you will be directly and physically harming the most vulnerable, poorest and disabled people. You have abused terms like accessibility and inclusiveness as you remove disabled access and then expect applause as if by storming a capitol building you expect to uphold the right to vote.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** My pay won't increase 5% over FY21/22, then 3.5% every year after that.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Helps the environment

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** I like water but not losing more of my own money

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Will cost rate payers more money

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I can't see people getting a 3.5% pay rise every year, yet you vote one for yourselves taking from them. I have never known a politician to voluntarily find less things to spend money on, so I'm sure that 5% would become permanent pretty quickly.

Stick to providing fundamental services, road, rail, sewage, etc, and stop wasting money on non-essentials. COVID has everyone tightening their belts. Do likewise.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Where to start? As I said, politicians will always find something to spend money on rather than return it to the people they took it from.

Hydrogen is a low density fuel, and potentially explosive. Hydrogen buses will require refueling more often, and the main source of hydrogen on an industrial scale is as a product of the fossil fuel industry so they're still going to have to extract natural gas to make it.

Just stick with diesel.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** This may actually be a good idea.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Sadly with the move to online resources physical libraries are becoming a thing of the past. As we see from history the maintenance of libraries required extremely wealthy patrons, and we're unlikely to find those in Auckland.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

You mean they're not already cutting back overhanging branches to prevent outages during storms?

I'd have thought that'd be a vital part of their business.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** If people are not using the bus why should they be charged for its operation?

That's theft.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Every year you invent new things to spend money on, then increase rates to match your desired spending. Try tightening your collective belt and only spending ratepayers' money on vital services.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

The Unitary Plan seems rational, as does the Strategic Assets policy.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** I support the 10 year budget in general. I find the programme is designed to address what Aucklanders and the city need over the next decade.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** This plan will improve the air quality in our city and this will benefit everyone who live and work in it.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension and the increase**

**Tell us why:** Continues improvement of our waterways is vital to our environment and critical to health and safety of everyone who frequent the surrounding beaches of the city.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Support**

**Tell us why:** This shows that the plan is keeping up with the times and adapting to the new way of approaching community service to the people of Auckland.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** The second option is easier on the pocket as the burden is spread to a wider section of the area who in turn will benefit from the added service.

### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Fast-track the expansion of the Western line rail system to allow more people in the West to have access to trains and leave their cars at home. Also, a railway system connecting the CBC to Upper Harbour then to Westgate/Swanson will complete the loop and will serve more people in the West and North Shore. This will free up the SH16 and SH1 North of traffic congestion.

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. # 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The increase is outrageous. We pay for many services (eg rubbish collection) and our tax payer money has gone toward events and services that we do not even use. The traffic continues to be a problem as well

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

It is interesting to see how all proposed changes to rates and fees are all increases which are fairly substantial which is not fair especially after last year's COVID pandemic and of course the ongoing crisis which puts A LOT of us in financial stress as

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

It is interesting to see how all proposed changes to rates and fees are all increases which are fairly substantial which is not fair especially after last year's COVID pandemic and of course the ongoing crisis which puts A LOT of us in financial stress as it is

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** silly to plan for future growth when there maybe none - I think its unlikely we will have international flight travel ans mass imigration again soon if ever

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** its the biggest issue facing mankind -although now it seems we have left it to late we must do what we can -the planned 2 billion in population reduction thru the use of the vaccine will help

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Other

**Tell us why:** start sending all the people back to where they came from ,those here less than 10 years

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** as long as the assets are not sold for housing developement ,especially those without car parks

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

reduce the congestion in henderson -repatriation of forieghners

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** In a time where everyone is already struggling, why put the "pinch" onto the community? There has to be other optimizations that can be done instead of taking the "easy" route and just making it the problem of the general population to fund. Where the population hasn't had a 5% inflation increase, nor wage increase, how is it a wise idea to push that onto the general populace? If the increase of 5% was not an option, what other methods would Council pursue?

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other**

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

It's important Council doesn't take the easy way out and make it someone else's problem by simply making the population foot the extra bill.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** your already making profit from homeowners due to your decision to make this a super city, why should we be impacted if you want to increase revenue? Increasing rates during this time does not make sense with less people working and life impacted by covid

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** no one is using the buses, look to alternatives, what happened to light rail? I live on a main road where buses travel every day, never seen more than 3 people on them. I couldn't catch a bus easily to get around auckland so why would I use them?

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** water already too expensive and not managed well by watercare, dont mind paying for a good service by we are way far away from that

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** you havent done much for existing parks so why would we expect to pay more? investment goes into new areas hobsonville point and older suburbs

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

not related to me at all, for instance how does Rodney drainage affect someone in Massey?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** again not related to me at all

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** I strongly suggest we fix the existing public transport before we go spending more money on hydrogen buses.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** In a city as large as Auckland, with the rainfall we get, WHY are we having water shortages, this is totally unacceptable.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Other

**Tell us why:** I would support this in some cases, but why do we need to lose more of our history, some of these building tell stories of what the pioneers did to build Auckland. Recently we lost a part of Corbans history out West, as a result of an accident, but that part of Henderson's history has now gone, it should have been moved years ago and protected.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Why should Vector pay to trim Council trees, they will then add this onto the consumer and again we will pay more. The public should be responsible for their trees and the Council should fine those home owners who do not maintain their trees, hence causi

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** The Council is allowing Urban sprawl, why isn't the transport extended to accommodate all these new Suburbs rising up around Albany, Riverhead, Coatesville, Westgate, etc, etc.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** As for the following, funding in the 10-year budget to progress the proposed permanent facility for Waitākere Outrigger Canoe (Waka Ama) Club in Te Atatū South (consultation, detailed design, consenting and a detailed estimate) - his would help address the gap in regional support for Waka Ama, one of Aotearoa New Zealand's fastest growing sports. Is this going to be a Club open to the Public, if so I support it and it should be advertised as such if Ratepayers money is being given to support the club.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I totally understand we need more housing in Waitakere City, but there needs to be more insight into the transport issues around our area. 40 mins to travel from Te Pai park to the bridge onto the North Western Motorway at 7.30am is just not acceptable. Also the toy train system we are running is an absolute embarrassment, I work at Auckland City hospital,

with many people from all over the world and they laugh at me in disbelief daily about our SUB STANDARD bus and train system.

They are so unreliable and in a city the size of Auckland to have no Trains running from the 18th of December until the end of January is just unacceptable, even then they were so unreliable. I understand work needs to be done, but we were told on national TV before Christmas that 500 men were coming to Auckland to work on these tracks for 4 weeks? what happened. I totally agree with progress, but to what disadvantage to the people who pay their rates. Since we came out of Lockdown last year there have been more and more vehicles on the road and I know for a fact that part of this is because people cannot rely on Auckland's Public Transport. Cycle lanes are not the answer, this is Auckland, for at least 7 months of the year our Weather is so unpredictable, how many people are going to cycle to work, most of my colleagues start work from 6am to 7am, they aren't going to hop on a bike in winter and ride to work from Papatoetoe, Howick, Henderson and the North Shore its impossible and the trains and buses are hopeless, they should be running from 5am Mon - Fri

ONE last suggestion, make public transport free for 1 month, have it running up to speed and you might see more people revert back to using it????

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The council must reduce its expenditure like every business has had to do. It is morally irresponsible to simply demand more from rate payers (5% instead of 3.5%) at a time when everyone else is struggling.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** This is the time to be frugal not spendthrift in light of uncertain times. The Auckland council seems to have too many people working there who are not business savvy.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** Again, when revenue drops in business you must pull in spending. It doesn't mean stop direction, it means reduce expenditure. So the focus can remain just over a little more time or with less funds.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** I would rather see much more clever delivery of contracts being tendered for this work. There is too much fat in the system and I am sure with contractors wanting/ needing work more now than ever it is possible.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Charging rural, farms or lifestyle properties urban rates is simply not fair and once again assumes these people are rich. The reality is they are further away from services or do not receive some services that city folk do. Many have septic tanks for sew

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### **Which option do you support?**

Do not support either option

**Tell us why:** What is the bus service for? Prisoners families? Have the people asked for this service? Isn't the area mostly well healed dwellings where they use a car and would be happy to keep doing so?

### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why**

## **7. What is important to you?**

### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I am disturbed at the poor quality of houses being built in some western suburbs, Mcleod rd Te Atatu has some future slums in the making which is very sad. Why cant quality prevail, pre-fab looking cheap houses are a scourge on the landscape and will only attract undesirable residents as proven time and time again when this short term approach is taken.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

**Tell us why:** I rent my home

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Diesel is a significant pollutant of the atmosphere, and needs overseas funds to purchase. The railways need to electrify rather than downgrade as is happening on the North Island Main Trunk, electricity is indigenous and is far cheaper and is non-polluting.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Too many pollutants are ending up in our harbours and waterways due to farms being over-stocked and badly positioned landfill sites.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Don't know

**Tell us why:** I have no opinions on this through being very handicapped physically, I can use very few of the facilities as many are inaccessible to mobility aids of the type I am forced to use. Lifts are too small, control buttons are not readily accessible and there are escalators instead of travelators and ramps for access to these facilities. The NZ standard lift size is too small for the larger size of mobility scooter and the standard needs to be changed to cater for these.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Cannot comment, I do not pay rates.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** I do not live in the area and do not pay rates.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

#### Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

**Tell us why** I don't know what the priorities are? Nothing seems to be happening around Henderson of late except large and expensive housing projects. We need more employment locally not projects that will bring more people into the area and clog up the roads and motorways even more as many of the elitist types buying homes here would not be seen dead on a bus or train!

## 7. What is important to you?

### Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need more low cost rental housing, rent-to-buy housing, More local employment, high rates, land costs and 'green' policies taken to extremes, wiped out the vineyards and orchards this areas was famous for in the past. The west, Henderson in particular suffers from a lack of local government investment in infrastructure and is, from my point of view, rapidly becoming second rate urban-only development while areas like Lincoln North, Glen Eden New Lynn and Westgate flourish. The roads are well looked after but the footpaths are shocking in places, Bruce McLaren Road, the Henderson end of Lincoln road and Henderson Valley road from the GULL service station towards Candia Road are cases in point. with many trip hazards and broken paving slabs. Roughly done patching with tar seal is not the answer.

Railside Avenue has a footpath on one side only as has Henderson valley Road from the GULL service station onwards. I have been hit a number of times by vehicles exiting commercial premises at speed without looking for pedestrian traffic on the footpath. There are many blind entrances along Railside Avenue that are difficult to see down because of high fences and buildings constructed close to the footpath with shrubbery to block the view. Could a foot path be laid on the railway side to eliminate the hazards of travel along Railside Avenue for myself and several other users of mobility aids?

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** I believe we as a society have a responsibility to help those who have suffered from the COVID pandemic. Especially if we have the means to do so.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** We already pay for use of the bus, should that fee not cover bus stop maintenance

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** We support this initiative with the proviso that the money is spent on infrastructure like roads, repairing our water supply, and ensuring we do not have sewage spilling onto our beaches.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Spend the money on the desperately needed infrastructure rather than responding to the results of some computer modelling designed by vested interests.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** Don't waste the money on ridiculously expensive and generally useless projects like bike lanes and "sculptures".

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** Generally supported but not at the expense of deferring yet again essential roading and other infrastructure projects.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The money used on supposedly preventing Kauri die back was wasted. We generally support initiatives to enhance our natural environment but this was nonsense.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** Initiatives to improve our natural environment are always supported but the waste of time and money in creating bike lanes is a great concern especially in West Auckland where roads are ridiculously congested due to the lack of investment in upgrading access roads and roads serving new subdivisions. This work should be done before constructing hundreds of dwellings, not after.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** You have done nothing with the rates rises over the last 10 years, except give yourselves pay increases and bonuses!

STOP INCREASING RATES AND STEALING OUR MONEY!

The only reason we have a housing crisis in Auckland is because the development "fees" are the equivalent of daylight robbery!

And the only reason Auckland roads are gridlocked is because of the sorry excuse of a public transportation system you've trotted out!

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Don't know

**Tell us why:** You dont need hundreds of millions of dollars to replace 5 buses.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** What has the money already gone towards? Aucklands beaches are still polluted full of fecal matter. I dont see how "spending more" of our money solves anything.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** You want to raise rates to repair assets that are going to be sold? Where does the need for more money come in when the asset will be sold, making you a profit anyway.

Stop trotting out stupid reasons to increase rates.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

### Tell us why:

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

## 7. What is important to you?

### Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

You are taking aucklanders hard earned money. It is your DUTY to spend it responsibly, efficiently and honestly.

Instead you treat it like an endless resource. You simply grab a bit more when it runs low. Our money is NOT an endless resource!

It is also a known fact that contractors inflate their prices when dealing with council projects. They get away with it because you allow this to happen.

You would not mismanage your own personal funds in this way, so why do you mismanage our funds?

## Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Instead of asking for more money, look at cutting the spending from within. An investigation needs to be done into the current projects across different hubs, is the project of priority or even necessary, and how are the budgets for each of those being justified against the actual costs. Is the spending across each project exorbitant? One thing we know for sure, is that certain departments and projects are wasting a massive amount of money. Another key area is the

spending that is going on with local iwi. A truly staggering amount of money seems to be disappearing from within Auckland Council each year.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Climate Change initiatives have again been based on modelling. If you look at the average changes in climate across the world over the last 50 years, we are seeing changes of less than 1 degree. We need to put this in context and apply some logic towards how much funding should go into this area. Or even if should be an area for funding at all.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Do not support either change

**Tell us why:** While some of these projects are necessary over time, there are more important areas to invest funding into for now.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** A lot of these are just not needed anymore. Libraries for example, almost everyone is able to afford a computer and internet connection. Partnering or even selling some of these assets is a good idea.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Targeted rate within 500m yes, but it should be lower.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why** The budget is almost entirely focused towards Maori issues. This is an absolute waste of money pandering to political correctness rather than the needs of those representing the larger segments of the population

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

People are at breaking point with Auckland Council now. It sucks in so much money and gives very little back. Projects take an absolutely laughable amounts of time to be completed if they are even completed properly or at all. There is very little attention paid towards obvious and key issues across the city like adding additional lanes to motorways and free carparking infrastructure to key bus stations. Instead of increasing lanes, often we find the projects involve modifying lanes which makes congestion even worse. Supply of housing, cost of housing and congestion are three main issues we have in Auckland. Auckland Council need to stop wasting money on ridiculous low-value projects, account for the money that is being spent on all projects and provide analysis and transparency to the public around the numbers being spent on projects and why, and the timelines and deadlines for those projects.

To summarize, the Auckland Council take in an absolutely obscene amount of money in rates alone, more than enough to cover the main areas of concern across the city right now. Yet there is no transparency about how that money is being spent and why, and there is no progress being made towards those key areas at the same time.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Your idea of key elements/projects for what is good for Auckland is based off a media standard rather than what Aucklanders actually want.

We're all in financial strain, and your idea is to hike rates to carry on pointless fluff projects noone except the worlds media and a very small group of people care about.

Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

And stopping all its fluff projects, focus on making Auckland work for Aucklanders, rather than trying to look good in the international eye, which helps noone.

I support the submissions made by the Auckland Ratepayers' Alliance, available at [http://www.ratepayers.org.nz/2021\\_ltp\\_submission](http://www.ratepayers.org.nz/2021_ltp_submission).

Stop trying to look cool with fluff projects, and focus on what's actually important to the people of Auckland.

Eg: easement of resources to allow rates payers to focus on their bubble, future proofing traffic with a decent roading plan, rather than a reduction for cycleways.

Stopping your wage increases for the next 3 years etc.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:** Fluff projects again.

This does nothing for Aucklanders except increases rates and makes the council look good to overseas media. It's not what we need currently.

Replace with the newer tech as the older technology expires. This is the most effective way of reducing economic harm as proved by many economics professors, as the additional spending to replace equipment that is already fine is wasteful and harms the environment more.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

## Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Basically by extending it, it costs more.

The longer things take to finish the greater the cost on ratepayers and the greater the economic expense.

Finish it quicker so less is spent on wages, happiness is increased quicker, and you can then use resources for other equally important projects.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** You've had these assets for decades and a budget for them.

Many provide income themselves for the use of the facilities, either in the form of a donation or for rental.

If you can't allocate a percentage of their income to upgrades or newer development.

Why should we pay more for your inadequacies at finance management.

Fire/replace accordingly, and get a team who know what they're doing with these projects so they fund themselves.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

Every project is about increasing council revenues, with no guarantee that the funds will be used for the area or projects. (Think: fuel tax for light rail).

Provide incentives for residents of the areas to figure out their own methods for targeted appro

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:** A one off fee seems fair, although increase the range to 1km of the stops so people who are "in the way" dont foot the bill, and the likelihood of the stations use will be from those houses and businesses.

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Albert-Eden Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why:** Majority are fluff projects.

Designed to make the council look good rather than actually provide benefits to its electorates

**What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?** Don't know

**Tell us why** Haven't heard of it.

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Mostly fluff projects, tryibg to make the council look good but instead reducing capacity for the majority of west Aucklanders, and creating more hassles for the average ratespayer

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Stop focusing on fluff projects, the entire of Auckland is suffering from government restrictions and your idea is to tax them more.

Rediculous. Focus on projects that matter instead of trying make yourselves look good to the outside media with all the crap that you "could've" before the economic strain.

Your rates payers will love you for it. And they are the only ones that matter if you want to be voted in again

(Think possible embarrassing loss to a Church leader)

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** For the good of all

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** It would literally be crazy not to support any climate change mitigation initiatives

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** NO. Please support our libraries as vital community hubs and preserve book buying budgets. To help support NZ writing, our library contracts should be awarded to NZ suppliers. This supports our local literary ecosystem and ensures authors receive full royalty on books used in their own country!

I use my local library twice weekly and it is a thriving community hub. Libraries need more investment, not less.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Don't know

### Tell us why:

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Libraries, climate change mitigation, healthy people communities and environment. Do not care about sport.

## Important privacy information

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The rates increase is unnecessary. There are other means to achieve this for example the salaries of council staff are one of the highest in the country.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Electric cars buses is the way to go forward.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Big corporates should be taxed more and fines for polluting the water bodies.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Support this

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Rate are already very high for properties and should not be increased

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Happy for a rates rise as long as public transport and climate change policies are not cut!! My only concern is the impact this will have on low income families

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Please continue to invest in lower socio economic areas and reduce the impact on such communities. The cuts should not be across the board but be equitable. That is, maintain services to poorer communities as richer communities are able to weather such changes easier and have greater access to resources anyway

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

## **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Do not sell any surplus properties or parks. While they are not being used now, they will be in the future. They can generate income now but will not be able to be replaced in the future. Invest in more green spaces. Fix waste water fully, not so it will only cope with 80% of current use. Future proof it so it doesn't need redoing. Stick to core functions not do things outside of that like events. Cut down on unnecessary and ridiculous contract staff. Ensure lower level staff are on at least a living wage and for those that have been there more than a year, over that. As staff a

replaced, bring the top paid staff down to a manageable and realistic salary - too many are currently well overpaid. Reduce rates instead of increasing them. They are currently higher than food costs for those who have retired. What is received for what is paid is not equitable

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Stop wasting this money, already collected/paid and actually start fixing the problem. Ensure it will cope with future increased use and not 80% of what we currently need. The council has ruined our waterways for future generations and it needs to stop now or those responsible should be held liable

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** There should be increased investment. Some facilities could be shared and building then leased to help cover repair costs for more facilities but do not sell any. Our population is growing, not shrinking, and more facilities will be needed in the future. Once these are gone, they cannot be easily replaced

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Why is Vector being charged when the Council planted the trees under their lines? Current contractors use cheap labour and do a really bad job. Cutting minimal amounts off so the job needs doing again very soon or chopping the middle out so still hitting

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Why should they pay an additional fee for a service they have every right to already receive?

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Please stop spending money that isn't necessary. We hear of people paying for taxi's to get to meetings in town, buildings being upgraded at excessive costs and then remaining empty and many other examples. Stop wasting money, stick to core functions and reduce rates so people can actually afford them and get value for their money. Waterways, waste water, public transport, public facilities and local parks and beaches are a joke. They have not been maintained and in the case of water ways and beaches have been destroyed by the council. Water rates have gone up 100% in the

last 10 years and are set to do so again because the council hasn't done their job. Making water too expensive cuts use but doesn't reduce need. People go without and it is the elderly and poor that are affected disproportionately

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Support**

**Tell us why:** Leaner makes sense.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Redistribute where tax is less but don't tax more.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Because this extra rate will fund the line but will become permanent and never rolled back like most tax. Extra burden for people around the line.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Environment and public transport are most important. Even more critical as new neighborhood or subdivision increase pressure on infra and we put the cart before the horses with no solution to transit. Roads are saturated, pollution increases and public transport is inexistent.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

Organisation (if applicable):

Your local board: Henderson-Massey

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I have lived in Auckland for over 50 years and it is disappointing to see how this city continues to decline compared to what it was. I see our roads being sabotaged in an effort to bully us out of our cars to try to get us to use a very poorly run public transport. I see signs going up at our beaches declaring them unsafe to swim in because the council can't control the sewage system. I see water shortages in a place that enjoys so much rainfall, yet the council hasn't been able to plan how to trap it and distribute it. So many arid countries in the world would love our rainfall, and

know how to harness it for the 'enjoyment' of it's people. Auckland is a diverse and multicultural city, yet there seem to be a lot of money being spent on race-based projects. Auckland Council has a 'treaty' to treat everyone equally, not just certain people. I see the council debt rising and rising and it's services extending to areas that are the Government's domain. I am one of the silent majority that feel our council is out of control. Put a cap on spending, stick to the core services which is what the rate payers want, and remember we do pay your wages. Cap the present debt and implement a debt reduction plan urgently.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Climate change is always with us, always has been. The planet will sort itself out and whatever Auckland council thinks it can achieve to 'save the planet', is rather foolhardy. Use common sense practices but no more spending in this area.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** No one can live without clean water, so we need to do whatever we can to guarantee it's supply. Watercare, and Auckland Council, have failed Aucklanders in this area, now the ratepayers, once again, will have to foot the bill.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

## What is your opinion on this proposal? Support

**Tell us why:** The less council services and the less council involvement in Auckland, can only be a benefit to the ratepayers and people of Auckland.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Don't support the APTR. If tourists are such a 'burden' to the ratepayers, don't encourage them to come. I support tourism for Auckland but not the APTR. You say you will charge Vector a Electricity Network Resilience Targeted Rate. Everyone knows this w

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Introduce a new bus service by all means, but I fail to see why ratepayers should be charged for a service they may well not use. The cost should be borne by the users, a standard practice used in most civilizations. You should catch up.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Most initiatives were written in such a way that the average rate payers wouldn't understand them, and yes I know that is the idea. I'm not sure why, but I can guess, at why a particular sport, namely waka ama, was singled out for special mention and funding. There are lots of sports in West Auckland that ratepayers could put in the category of 'one of New Zealand's fastest growing sports'. A large sum of money should not go into one sport, it should be spread out more evenly over numerous sports all struggling due to the government lock-down.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I would, but completing this is exhausting, and knowing my feedback will fall on deaf ears, prevents me commenting.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Climate change is not something Auckland council should be involved in. Pollution mitigation and reduction absolutely. But reducing our carbon is pointless and costly.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** Don't spend money on climate change. Spend money on pollution reduction. Don't go 100% electric for buses etc. NZ power generation cannot supply out increased needs already let alone requiring more from them. Get more efficient vehicle

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Water is life

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

**Tell us why:** Don't live in that area

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Don't worry about carbon worry about pollution

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Cant afford it

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** Somewhat but not entirely, there could be cheaper alternatives, have a community planting day of native trees to keep down costs, Support the phasing out of diesel

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** Other water initiatives are just as important if not more such as rainwater tanks for all new builds in Auckland and support for those people willing to pay for one on their existing property. If water infrastructure is to be targetted our drinking water should be filtered at the source so that we don't need to be slowly poisoned/health compromised by adding chlorine to our water. This is future proofing.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** Many older people rely on libraries and other community facilities in their area to access knowledge, books, education, classes, human contact. Many older people do not have computer access or a smart phone or even a mobile. School children rely on a library for information, books and the groups that are run for preschoolers and young children in the holidays and other times. A large section of our communities would die without the library providing that community hub. Some people would not have talked to a person all day if it wasn't for the librarian having a quick chat. Libraries are essential for maintaining mental health. People don't mind if a building is old, the age is not the important

part ~ focus on the people. Don't make people travel miles to access a library, some don't have cars, think of the carbon footprint.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Keep them all down low so that we dont starve to death,

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Some people may not use the bus ever so it should be user pays

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** They are prioritising sport and recreation instead of people and health. They should have a no-spray policy and use hot water to kill weeds.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Clean unchlorinated water is a priority as this impacts mostly on poor people who cannot afford to filter out the poisons from their water. This eventually impacts on their health which in turn impacts our health system and costs us millions. The bottom line is: FIX THE PROBLEM AT THE SOURCE.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?**

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Families are already struggling to meet mortgage payments and cost of living. Increasing rates seems to be the only way council intends to pay for infrastructure. Unrealistic

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Saving our environment is critical for the future so supportive.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Families are already struggling to meet mortgage payments and cost of living. Increasing rates seems to be the only way council intends to pay for infrastructure. Unrealistic

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Libraries in their current state are quite traditional and I personally stopped borrowing books because of the hefty fines when unable to return. Most learning has moved to electronic and ideal to keep up with the times.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Families are already struggling to meet mortgage payments and cost of living. Increasing rates seems to be the only way council intends to pay for infrastructure. Unrealistic

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Families are already struggling to meet mortgage payments and cost of living. Increasing rates seems to be the only way council intends to pay for infrastructure. Unrealistic

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

## **7. What is important to you?**

#### **Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Creating a safe community to live in. The standard of living continues to decrease but cost of living is increasing. Great if the council focuses on social challenges in our communities to create a better standard of living.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Other

**Tell us why:** We need library's, but should only over what ratepayers can afford, they are also feeling the impact of living within a budget.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** We can only support what ratepayers can afford.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Other

**Tell us why:** Ratepayers have been paying for a service which has not been delivered, council need to cut back, and get back to the basics.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** Again why have the maintenance not been kept up, there is plenty of unemployed people that could help voluntarily to support their community.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Trees should not be planted if they are going to effect power cables etc.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** There should be no increase, if council had done their job properly forward planning years ago this would not be an issue.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Council are just increasing rates, ratepayers can not afford increases , I am ratepayer an having yk sell.my property as I can not afford increases an rising cost of living.

## **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Increase it rates for ageing assets and infrastructure shouldn't come from rate increases, these issues are not new, should have been thought of before all the apartment building got consents to build 9 apartments where one house was.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** NZ can't get climate change under control while electric vehicles are unaffordable,

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Increase in population this is a known that water supply is insufficient in the Auckland area, hence the drought.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** When working full time, when do you get the opportunity to use these so called services"

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** why should it cost people that don't use these services, Most of the population in these areas don't catch buses, when they are running correctly and on time. Waste of money

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why** it is unclear which board is which, it never really well advertised anyway.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Keep the cost of living down, to support my family and keep a roof over our head. Not getting charged for upgrade that wont effect or help oneself.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Albert-Eden Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why:**

**What is your opinion on the Dominion Road Business Association boundary expansion of the Dominion Road BID programme?** Don't know

#### **Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Thank you for the proposal to increase spending on waste water, stormwater run off and natural waterways. As well as the environmental budget increase and parks.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Climate change needs to be one of our main issues that we tackle as a country along side with our current pandemic.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension and the increase**

**Tell us why:** Thank you for the proposal to increase spending on waste water, stormwater run off and natural waterways. As well as the environmental budget increase and parks.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Support**

**Tell us why:** Council should stop having expensive fresh flowers in every office daily!

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** This was meant to be about libraries. That's the email that was sent to me. You (!) the council should be absolutely ashamed at the waste of money, the manipulation of the petrol tax etc etc. that you seem to be so cavalier about. We've lived in this city for over 50 years and are incensed at the lack of coherent planning. The city is a mess. Absolutely disgusted.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** So the bridge can't take trucks and they're going to be rerouted through Highway 16 and of course anyone can see that consequently these roads will be irreparably damaged and they're already full of potholes. Railways are the only viable and logical answer. Get on to it. I know the truck lobby is powerful but stand up to them. For goodness sake be proactive instead of so pathetic.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** This city is stuffed. We have no absolutely NO faith in you. The city's a mess. If we agree to these rates increases we think you'll just waste the money as you've done for so many years.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** We've had three (3) libraries built in our area of Massey in the past few years. Such a huge waste of money. Do you even plan for the future?? The new library has hardly any books. You have to order everything on line and it's more like a community house. The people are lovely under very trying circumstances.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

### Tell us why:

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I like the idea of street tree planting. I want better protection for existing trees.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Growth infrastructure! Make the developers pay for infrastructure as in other countries not the existing ratepayers. The developers contribution should be ring fenced for this purpose only! There are n

Ev

Er enough garages built and cars are parked in the streets and the streets were never planned to be wide enough for car parking. Our stree is narrow and cars overflow onto the streets because each house now has several occupants.

So the bridge can't take trucks and they're going to be rerouted through Highway 16 and of course anyone can see that consequently these roads will be irreparably damaged and they're already full of potholes. Railways are the only viable and logical answer. Get on to it. I know the truck lobby is powerful but stand up to them.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** We already pay enough in rates and receive shockingly poor service and results for this payment.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** How will hybrid buses prevent increased landfill. The electrical costs and capital costs involved with creating and storing hydrogen wildly outweighs the climate benefits

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:** We need greater capacity to support new developments

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** Prune underused facilities. Develop and upgrade those with high use

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** Park and ride should be sufficient for the catchment of this area

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

We need a second harbor crossing. We need infrastructure around new developments.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Don't know

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why**

## 7. What is important to you?

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** People are really hurting with the constraints of Covid 19; they do not have the luxury of passing on their debts to hapless ratepayers as you propose to do.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Other

**Tell us why:** This could be delayed until we get out of the quagmire.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Other

**Tell us why:** This needs to be addressed now, but further consultation and other ideas need to be investigated first.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Other

**Tell us why:** With Covid placing restrictions on our movements (abroad) it is crucial to keep community facilities and activities available to residents even if only for mental health reasons.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

**Tell us why:** Doesn't apply to us, not living in the region.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** Mental health stability and the sense of community must be nurtured and maintained. Therefore, some of the proposed initiatives are necessary, some of them do not contribute to the wider good.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

The aquatic and library facilities in this area are so necessary and must be retained and serviced fully to meet the community's wellbeing.

### Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I have moved out of Auckland recently. Found the "SuperCity" was just too expensive in every which way to live, let alone being plagued by constant rate hikes, excuses for more hikes while the council wasted it's money on pet projects like the Americas cup boat race that the average person does not even care about. The Auckland Council is simply out of touch with the rate payer.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** It will be too much to increase the rate annually..

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Some facilities are redundant. Maintaining it will add more cost. Let's just focus on facilities that are widely used only

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I do not support the additional 5% increase in rates. I am on a fixed income, (superannuation,) and as this is not increasing(?) I cannot increase my rates without decreasing my financial requirements

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** I support replacing diesel buses with electri

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension only**

**Tell us why:** I support improving water quality in Ak, presumably this can be taken care of within the already increase of 3.5% in rates

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Do not support**

**Tell us why:** I support maintaining present existing facilities, not closing any that are being used, and not building new ones

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

I support lifestyle blocks paying the same rates as nearby urban rates, as they will be benefitting from them

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Don't know

**Tell us why:** Albany and Paremoremo citizens only should be voting on this, it only concerns them

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** I support the Te Whau Walkway project, all walkways are good and benefit many people. I do not support the Waitākere Outrigger Canoe, as this benefit a very small section of the community, of which the rest cannot participate.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I do not support the continuing cramming of houses, people and cars into Te Atatu Peninsula, it is already too overpopulated for the facilities.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** lower support for corporate properties is a good thing

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** as long as we're buying green technologies from nations of common values or domestically rather than from adversarial nations.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** Why is there a greater increase on residents rather than businesses?

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. # 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** because you have made no effort at all to reduce council size and spending. Your number of staff is obscene for the work they do and the dumping of the cost on to ratepayers is gross arrogance. you have been advised for many years to reduce the size, yet you only pay lip service to the idea. Ratepayers are not a cash cow, you need to stop treating us like that. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at [http://www.ratepayers.org.nz/2021\\_ltp\\_submission](http://www.ratepayers.org.nz/2021_ltp_submission).

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** Right now, if it costs us more money then no I don't support it. If you can do it without it costing us more then ok go ahead

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Do not support either change

**Tell us why:** You embarrassed yourselves with the revelation of how much the Water CEO was being paid, secondly how many council employees are being paid over \$100k pa, and now you advise we will be paying double our water bill within the next 10 years. Look at yourselves, reduce your own costs, use that money to then pay for these works. Ratepayers have lines your pockets for years and years, time has come for you to give some of that back.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** shared assets is a great idea, where others are involved in the ongoing costs, giving much-needed relief to ratepayers

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Do not support either option

**Tell us why:** forget the targeted rates, charge the fare paying passengers for a service that they use

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** As with council itself, and with regards to the pandemic effects for the next few years, significant consideration needs to be given to the people who are suffering most, not your grandiose schemes on how to get more money out of ratepayers

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

what is important to me is my family, my job and surviving the pandemic, nothing the council is currently proposing goes any way to helping with that at all

### Important privacy information

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Because you just burn money on your staff entertainment, not on people's lives.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** Humans cannot change the "climate change" because it is natural.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. #### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** The board proposals have been completed without proper community consultation.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Yes the rates need to be sorted. You cannot continue to rate property without looking at how many persons are resident on the property. I am a retired and live alone on my property yet pay the same rates as my neighbour's who have 3 families living in the one property/house all fully employed. We need to look at a citizens tax on property occupation.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. ## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I believe many people have been affected financially, and many have lost their jobs, so the further increase in rates would be a big burden in these times

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** I support climate change incentives

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:** Once again, in these hard times, monetary increases are not viable

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** I use e-services

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** The rates are expensive already. Making it 5% will affect a lot of people who are struggling to make ends meet.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** I love nature and any steps towards improving that are welcome.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Having shared properties is a great option. You can also start leasing or renting properties out temporarily to get some income which can be used for improving other properties

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** i think it is required

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** again i think it is required

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal?** Support the extension and the increase

**Tell us why:** same as 1&2

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal?** Support

**Tell us why:** must keep ahead

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** we must keep up and move on

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

we have been too slow in the past ,roading and transport

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Other

**Tell us why:** I support the idea of where investment should go i.e. infrastructure and population growth support. I do not support an increase in rates unless there is to be a lower percentage increase next year, take 5% instead of 3.5% now but take 2% next year to offset the short term increase in costs to households who are already struggling from the effects of covid19 themselves.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** In principle I support these initiatives however starting 6 years early funded by a rates hike seems like a stab in the back to those who support your efforts while still having a great PR front.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Usage of some of these facilities is dropping so closing and consolidating or replacing with multiple use facilities is a good idea.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The changes outlined in this survey seem fair. I still do not support an increase in rated beyond the usual amount as a short term cash flow boost at the expense of ratepayers who are also suffering from the effects of covid19.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:** Support for option 1 provided there is statistical data to back up that the majority of people affected will use this service. No one wants to pay for something they are never going to use.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why** Just moved here, haven't had a chance to research.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

The housing market can't crash, too much negative capital for people who bought in the current market.

Infrastructure and transportation need huge investment, Auckland in general always fixes issues as they arrive with short sighted solutions. Take the hit financially and provide ratepayers with what is expected of a city this size on a worldwide standard. We can't make plans for electrifying private vehicles or reducing the number of cars without providing a reasonable alternative. Things like regional fuel tax and commuter tolls are ridiculous when you haven't provided decent public transport. Get the solution right and then punish people for not using it, not the other way around.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Need to have long term strategic goals

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** Need to have renewable and sustainable energy

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Quality and reliable supply are critical for our wellbeing

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Community wellbeing and connectivity are essential

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Matter of all sharing the costs

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

**Tell us why:** Need to have a feasibility study on how viable are the options

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why** Need to increase green space, public walkways, cycle routes, revitalise Henderson town centre, community policing/wardens, twin stream projects etc

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Affordable and social housing, green spaces, Henderson town centre

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Continue and intensify our search for savings and value for money – we propose locking in at least \$90 million as permanent ongoing annual savings. This statement makes no sense at all, and Council wasted money on rich people yacht race. Demoralising.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Electric bus good idea, but the entire bus system should be cheaper

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** It's essentially the area you should focus on, we need to trust that you will put our rates where we need to

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Because you will get rid of the libraries and increase your wages. No, no, no. I do not support closing these facilities.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

You will put them up by 5% but we all know that the rates will not drop back the next year.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why** Seems reasonable

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Reduce the capital investment budget. Will we deliver?

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** We need to this to keep up with global trends

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Work has started in this area and it would be stupid to cut back or stop.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Other

**Tell us why:** Close some buildings and reduce the mowing on parks less used

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** No other suburbs have had to pay a targeted rate for bus service. Seems unfair.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Investment in "Parks and community" should not be increased to reduce the impact on the total costs.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** The Council is required to inform the public of its plan on how to manage batteries of the electric vehicles when they are end of their lifecycle, which is when they cannot be reserviced and reused anymore.

In addition, the Council is contradicting itself when one goal is to encourage people to change to using electric vehicle and on the other hand, new housing developments are not required to have any garage. How can the residences of these new houses swap to electric vehicles? Are ratepayers paying to build new charging stations and these residences are paying higher rates to recharge their electric vehicles?

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Don't know

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** Investment should remain the same when the funding is still impacted by the COVID effect.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

**Tell us why:**

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other**

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

1. New housing developments do not require building any garages is short-sighted and a bandage fixed strategy. It contradicting the policy of encouraging people to swap to electric vehicles.
2. When solving housing problems, there was no reason why Auckland is still keeping so many racecourses and golf courses, rather than developing these areas to build more houses?

**What is your opinion on this proposal?** Do not support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

Yes

## 6. Local Boards

### Henderson-Massey Local Board

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

Yes

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Basic infrastructure, regional parks.

People benefiting from capital gains should help fund infrastructure over the wider city.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Rather take the pain now than seeing services getting even worse than it is already.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** We have good working diesel buses use them for their whole life span. Build more and properly maintain existing cycle ways both in the CBD and from West to North Shore and North Shore to West to encourage less cars on the road.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** Watercare has been mismanaged for years under the council auspices. FIX THAT and improve the management of water.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Other

**Tell us why:** I can see some merit in the proposal but smaller communities and those in poorer social economic areas will get the short end of the stick again.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** Targeted rate for each separate dwelling within 350m walking distance of a proposed bus stop. Unlikely I will want to pay for a bus stop 500 m away.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why** PLEASE look at safer cycle options from Henderson to Albany!!!!

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Build more and properly maintain existing cycle ways both in the CBD and from West to North Shore and North Shore to West to encourage less cars on the road.

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** Other

**Tell us why** It is from utmost importance to get a good additional swimming pool in North West area, West Wave alone is not enough and west coast beaches are unsafe for families with children.

The pool is more important then events that run 1x year.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

growth and infrastructure, we need to get people out of cars for short distances like 5 km. We need to have suburban streets and connection streets safe for cyclist to go to the cycle paths. Cycling also is a good tool against poverty, if people don't need to own a car.

Set up of 'share a car parking' would also help with traffic reduction and poverty.

We need to have relevant shops close to home and not entice the population to travel far to do their shopping.

We need a bus link along the North-West motorway which would be quicker then getting everyone to drive and park in the city.

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Don't know

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Sometimes people just underestimate Climate Change. It may not seem like an urgent problem but it has potential to affect the world so it's important to focus on the problem.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension only

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Don't know

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

Yes

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### **Important privacy information**

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

**What is your opinion on the proposed 10-year budget?**

**Tell us why:**

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:**

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Rates are already very expensive

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** The buses we have are already good. It will waste resources replacing them and the climate will change anyway regardless.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** the increase is small and would benefit everyone as the beaches are free for all to use.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:** Not everyone will benefit from these facilities. I stopped using the library a few years ago when the overdue rates on magazines suddenly went up substantially.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Don't know

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** The concept appears rational although I have reservations about some of it.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Other

**Tell us why:** While climate change issues are important, I believe it should take a back seat to COVID-19 recovery. COVID-19 has caused a huge amount of pain in the community, which now needs council support that the community is not getting.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** Point blank - NO wastewater should be allowed to drain into our waterways / harbours without treatment. Same for storm water. More exhaustive testing right down to small streams / creeks to identify sources of pollutants. When a pollutant is found the persons doing it should be made to pay. No excuses.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** I am involved in a council owned community asset which is historic and slowly deteriorating due to lack of maintenance. Appropriate interaction with council is difficult and results of our inquiries / requests are wishy-washy. Our main request is relatively low cost and involves only one/two days work, yet we still cannot get it done. Council needs to lift it's act.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Natural Environment Targeted Rate needs careful consideration so as not to overspend in light of the damage done to our economy by COVID-19. Something has to give. Bonafide farms should not pay urban rates, period. Lifestyle blocks that are not based on i

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Don't know

**Tell us why:** I have no knowledge of that area of the city. If there has been large-scale subdivision taking place in the area, their bus service should be provided by AT as in the rest of the city. If Auckland council gave permission for the subdivision to take place then the council is liable for the infrastructure needed.

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Despite living in Henderson/Massey, I have never heard of any of these proposals. I read the Herald, Western leader and participate in Neighbourly. Henderson/Massey board is NOT communicating with it's people adequately.

The Whau walkway can wait until we have recovered from the economic effects of COVID-19.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Development of new housing is rushing ahead, yet 9 houses in Border Rd, Henderson have been fenced off, with nothing done to them for months. Get on with whatever is planned for them. Once again - no information has been given to local residents.

### **What is your opinion on this proposal? Support**

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

#### **Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

Tell us why:

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Would rather money be put towards other areas such as infrastructure at this time

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:**

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** All these areas need immediate addressing if we are to not go down the path of other nations in the world and create bigger equality, climate and social issues. We have a chance to do it better.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** This is a great start but we still need to be doing more and acting faster.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Don't know

**Tell us why:** Is this enough? Initiatives and instant changes need to made.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** People on fixed income can not afford more rates.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Do not support increased investment

**Tell us why:** Stop letting developers and Maori cut down existing trees ,just leave the trees that are here already.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension only**

**Tell us why:** encourage people to catch rainwater, subsidize the cost of the tanks .

make sections big to have a water tank.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Do not support**

**Tell us why:** For the next ten years do not upgrade any of the assets. Council is unable to run any project to budget, until you can keep to a budget like all your ratepayers have to just leave them alone, just to safety repairs. Do not sell off any assets ratepayers have paid for .Council has wasted millions replacing perfectly usable paving, planting and beautification that is not needed.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** I only support this if it is a 'one-off' - I understand the impact Covid has had on everyone

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** We need to protect the health of everyone as Climate Change is real

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Support the extension and the increase

**Tell us why:** I live in Waitakere and am tired of the water restrictions. Our household adheres to the restrictions ie we fill buckets when having a shower to add to the washing machine and we have a small water barrel. When we need hot water from tap we mostly fill a container of the cold running water first to use in the kettle.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** PLEASE do not close the Henderson library!

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Great idea to hit the networks but will this have a clause in it that they cannot increase their fees and charge the public more

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Don't know

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support most priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

We have a development starting on the corner of Edmonton Rd and Matuhi Rise and the residents are very concerned as to how many vehicles and trucks will be parked on Matuhi Rise and the effect it will have on the street. It is hard enough now to turn either left or right out of Matuhi Rise - are there lights being added to this intersection.

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Submitter details

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I believe that the council have allowed sand to be removed from from an island as part of Aotea-Great Barrier s part of

that particular iwi I am not happy about that. OR that we part rates and we have to pay for rubbish tags at \$4.00 each, etc.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

**What is your opinion on this proposal to invest more in responding to climate change?**

Don't know

**Tell us why:**

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal? Other**

**Tell us why:** We should be paying for the water from the Waitako River, as Auckland should have safeguards in place years ago.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal? Do not support**

**Tell us why:** The closing of the Te atatu south Library not happy about it, we now have to go to the Te Atatu North, or Henderson one.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Don't know

### Tell us why:

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** The longer you leave up dating infrastructure the great the cost long term. Fix it now save for the future.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### **What is your opinion on this proposal to invest more in responding to climate change?**

Support the proposed increased investment

**Tell us why:** It is the best for Auckland

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### **Extending the targeted rate**

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### **Increasing the targeted rate**

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### **What is your view on this proposal? Support the extension and the increase**

**Tell us why:** The sooner we start the better it is for all Aucklanders and the better it is to attract tourists , today domestic, tomorrow overseas.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### **What is your opinion on this proposal? Support**

**Tell us why:** Makes sense

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Its obvious that our infrastructure and environment needs more investment to prevent it getting as bad as Wellington's. Doing this as soon as possible will create less disruption to Aucklanders in the long run

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Desperately need more trees to replace the wholesale destruction of trees by property developers. Would be interested to see stats on the volume /% of waste to landfill that property developers are responsible for. Every 2nd property in Te Atatu is wiped bare, with heritage building materials and gardens going straight into skips to make room tacky new developments. Time the council grew a backbone and placed more requirements on developers.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Council has failed miserably at even maintaining water quality and should be ashamed of themselves.... We are rapidly declining into 3rd world living standards where swimming beaches are toxic, waste water and especially drinking water management has been appalling - where is the planning and accountability?

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Community facilities are important but lower priority than basics like water. leave the libraries and the Auckland art gallery alone!

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

Farm and lifestyle properties and any larger properties even within the urban zone don't have the same level of demand on services per m2 so it doesn't seem fair to charge them the same as smaller units nearby

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

### Tell us why:

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

### Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

**Tell us why** Unable to decipher how priorities will impact the key issues that are rapidly diminishing the livability of the area . destruction of trees /dessimation of native vegetation corridors to attract birds and wildlife to the area... West Auckland already has a low % of trees compared to other suburbs - Stop the scorched earth policy of property developers uncontrolled scattergun high density development without any urban planning thought or management; e.g.no improvement to public transport options, leading to increased street parking and increased pedestrian inconvenience and danger

## 7. What is important to you?

### Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Agree that Auckland needs to increase density of housing but council needs to step up with more inspired urban design or it will turn into a Property developers' ghetto. Come ... could/must do better.

### Important privacy information

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

**Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

**Which option do you support?**

Don't know

**Tell us why:** I am not directly impacted by this proposal, but it seems non-sensical to apply a blanket rate increase to houses that may not use the services provided.

**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

# 10-year budget 2021/2031

## Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

**Note:** *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** You have to work within your budget like other businesses, we are not your meal ticket.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Like the idea, helping our earth and the future population of NZ is important

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Don't like the idea of increasing rates to achieve the goal. Maybe you should take a pay cut to achieve the goal.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** Saves money, as it might mean lowering the fees, eg rates are paid.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

None at the moment

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

**Tell us why:** So, how much does it cost to build a cheap bus stop, one basic bus stop I am assuming????

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why** Too much money is asked for, especially when most people are in trouble.

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Need more affordable houses for the poor that we can own, that is reasonable in size etc.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** Council should look at cost savings as so much money is wasted in poor and ineffective processes.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** Without climate improvement, we're dead

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

### What is your view on this proposal? Other

**Tell us why:** Support increase only. Move faster to get the initiatives going.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Do not support

**Tell us why:**

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Do not support either option

#### **Tell us why:**

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other**

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Infrastructure, water, roads should grow with the number of houses being built

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Support

**Tell us why:** Critical infrastructure and services for the city must continue to be upgraded and provided. It will never be cheaper to do than now.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

**Tell us why:** climate change is critical and Auckland City must replace its diesel engine buses with electric as a priority

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Support the extension and the increase

**Tell us why:** Auckland is a city with wonderful beach assets. these must be safe for all citizens to use and enjoy

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Support

**Tell us why:** This makes economic sense

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

Vector should be locating power services underground to allow trees to grow and to reduce problems from overhead lines, storm and wind damage. Council should be working with Vector to hasten this work

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** It should be a balance between local users paying and the wider city rates covering costs

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I support all priorities

**Tell us why**

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

I strongly oppose extending urban limits and support the intensification of inner city housing. I strongly support expenditure on public transport, cycle ways and other strategies to reduce traffic congestion in the city.

## Your feedback

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** So the rates rise to 5% increase, and then - you're so kind to us - go back to 3.5% increase. You cannot keep on taking from rate payers to fix your money problems - check your salaries and benefits that you're taking plus all your other undertakings first and watch your spending there.

## 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

### What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

**Tell us why:** As long as action against climate change means no petrol/ diesel/ LPG but a vast destruction of nature (especially in Auckland) goes on in form of tree felling for another ugly lot of buildings or just for the sake of it you will not have my support. You're just paying lip service to action against climate change, dear council.

## 3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

### Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

### Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

**What is your view on this proposal?** Do not support either change

**Tell us why:** Get your money from punishing those industries who wreck the water quality without being punished. You can't melk the rate payer dry.

## 4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

**What is your opinion on this proposal?** Do not support

**Tell us why:** Cut the number of the council down first, that should free up a large sum for maintaining assets for the public.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

### Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

### Which option do you support?

Do not support either option

**Tell us why:** It is ridiculous to want to charge residents for installing a basic service. Especially in view of the government's proposal of stopping petrol car imports by 2030. Many people will not be able to afford their own cars anymore as e-cars are very expensive (and just as dirty in production as petrols might be in running) so get going government and council and increase public transport!

### Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

## 6. Local Boards

### Henderson-Massey Local Board

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support most priorities

**Tell us why**

## 7. What is important to you?

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

### Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

### What is your opinion on this proposal? Support

**Tell us why:** We need this for the mental health of our people.

## 5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

#### **Do you have any comments on any of our proposed changes to rates and fees charges?**

I'd suggest Vector not be charged any additional fees as they'll simply pass it down to the retailers which finds its way back to the users who by then will pay 10 times the fee imposed by Council on Vector.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

#### **Which option do you support?**

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

**Tell us why:** doesn't really effect me, but can help the Council's financial position.

#### **Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

## **6. Local Boards**

### **Henderson-Massey Local Board**

**Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right?** I do not support any priorities

**Tell us why** I don't see any value for local boards.

## **7. What is important to you?**

**Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?**

Water, sewerage, good quality housing and safe communities.

### **Important privacy information**

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at [aucklandcouncil.govt.nz/privacy](https://aucklandcouncil.govt.nz/privacy) and at our libraries and service centres) and with the Privacy Act 1993. As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

### 1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

#### What is your opinion on the proposed 10-year budget?

Do not support

**Tell us why:** I fail to see how council took that big of a financial hit when all services were closed down due to Covid. Libraries, parks, gyms, swim centres etc were all closed, they were not maintained or open meaning utilities were at the low end under closure. Rates continued to be paid with no discount for closures, townhouses are going up at a huge rate where one house/section paid say, \$2300pa, those sections now hold 10 townhouses at \$2300 EACH! On 4 sections within 1 km of us there are now 52 townhouses instead of 4 houses. Council has put it far too much on the

waterfront for a boat race that 70% of ratepayers do not agree with, the underground rail network has been a budget blow out that will not pay for itself.....gross overspending of ratepayers money in the wrong areas are to blame for any "covid loss". Employees wages were covered by the government so there wasnt even that cost to council.

## 2. Climate change
