10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Organisation (if applicable):

Your local board: Hibiscus and Bays

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Happy to have slightly less investment in some areas; but need good transport and water supplies (fixes)

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. 10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There is a huge amount of wasted, or unnecessary, activity by the Council. Before increasing rates, cut staff, council run bodies and "nice to have" projects (such as many conducted by AT and Panuku) first. You've simply nibbled at the edges until now.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Needs to be done. Essential for our futures.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Cut your cloth to meet the budget already allocated.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Standard, sensible management practise, as used by major businesses.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Present environmental targetted rate is fully adequate. If it does not allow everything to be done, so be it - run the programme for longer

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why They're locals and they know what the locals want - and need.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Before building more suburbs, ensure the services required are provided for, including water, sewage, electricity and road or rail transport to where people will be working, ie from the north of the city to the city. Commuter traffic is a nightmare and is only getting worse.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: If you can afford to own a home, you can afford a 1.5% increase on rates for 1 year

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It is likely that many of the climate issues are occurring naturally anyway, but the way we are likely will be accelerating climate issues. I support any changes to make our environment healthier.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: These matters should have been considered when council supported applications related to urban growth (cross-leasing, denser living etc). Taking time to catch up is inevitable therefore.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: My interest is less in community facilities than it is in community engagement. Council needs to put more resources into family-centered community activities, that include activities not only for toddlers, but for older primary school age and teens too.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why Very 'high-level' goals with very little detail to sufficiently provide comment

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Free, community, family-centered activities

Affordable housing

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Not sure where the council thinks we get all this money from. I do not support the 5% rates increase. I have no faith in the council and do not trust this will be 1-off only.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Support electric vehicles. But developing hydrogen would be better.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Get the rich that live in that area to fund this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support parks, community houses etc. Time to close down the libraries and go full digital.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Reduce buses and stop taxpayers from paying for them.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Do not support any rates increases and certainly do not support any work to add more buses.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Value for money. We, as ratepayers do not get value for money. Council is bloated and wastes money and then has the cheek to ask us to pay more.

You need to think about where does the public get their money from and how rates increase negatively affect the ratepayers. Reduce salaries and modernise your workforce so we can see the value for money.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your local board: Hibiscus and Bays

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Like businesses every where, you will have to re-prioritise spending to meet your revenue. No-one else is increasing pricing

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Should be run as a central government initiative. Stick to your basics.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: You will need to re-prioritise spending based on current available income

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: As long as you aren't closing libraries. All for consolidation and cross use.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

If they are going to interfere, don't plant them in the first place and cut them down in the second.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Perhaps just those who will be affected by the rate, should be the ones to answer this.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Rates - you need to stop increasing them and work within the current expenditure you have. Every other business in NZ is having to do this. Hearing that our rates are going up to pay for dross (random art installations, festivals etc) is a real slap in the face.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Councils need to spend

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: So long as the investment has long lasting impact.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Feels like too little too late.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Building ownership is a liability.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I suspect that the cost of electricity will go up.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Reads like a bonkers idea.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland is too big to fail

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Earth is too big to fail

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It's terrible that this has dragged on so long. But we need to fix it to keep Auckland healthy

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Turn old assets into housing

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Please make it easier to deal with council when you are trying to build new housing. The costs involved in adding brand new quality housing is getting very expensive and takes a very long time to get through all of the council process, BC and Resource/Water Consents. Make things easier and cheaper, not harder and more expensive. It has nearly put us demolishing an old 1950's house to build a new modern house, along with another on our property.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I think the idea of increasing the rates for a 1 year period is a good one in particular as hopefully it will counteract the losses happening as a result of covid and I would hate the council to stop the upgrades of our sewerage and wastewater systems to stop. Our structure for too long has been put to one side and the result is unsafe beaches and streams and degradation of our environment. This 10 year plan means we have a long term vision rather than a

short term plan which means important stuff like infrastructure gets put on the back burner. Also Auckland is growing so fast, we need to invest in our future infrastructure.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Again, our environment as a priority has been ignored for too long - we have all the information we need to start putting in place measures to ensure we are ready for the environmental changes resulting from climate change.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I just think these are ideas whose time has come - we need this!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: The trend by many charities to share facilities/lease etc is happening and so I think this is a good idea also because there will be fewer buildings to maintain but the services will continue to be delivered. With the greater use of on-line communication, this needs to be taken with the elderly (I'm one of those) in mind. If you don't then a vulnerable section of the community will be left out.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Because people living in the Paremoremo area will probably use a public bus service at some point in their time living there.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why We need to keep Auckland structure up to date as the city grows

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: It is unacceptable for any organisation of public servants believing they can increase a tax by 3.5% every year. In these difficult times the council, like any business should be looking at how they can be more efficient.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Clean energy is definitely where we want to head but in an affordable way. Families on tight budgets cant afford to get a "Green" vehicle today or tomorrow. A gradual approach is best and one that will allow the council to live within its means without increasing rates.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: AS long as progress is occurring. Yes extend but do so within economic budgets without having to increase rates.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Sell off some assets but keep a well used facilities. Live within your means without any more rate increases. Leasing might be legitimate for short term projects but not for permanent facilities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Orewa esplanade has cost enough. No more. Arts etc are nice to have but not essential. Community support should only occur when we can see a report showing the true benefits of the community work. The current economy does not allow for additional nice to have services.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I again reiterate that local government needs to change their mind set. Year on year increases are not acceptable ..

This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I feel like we've got no choice but to support this - its not a great situation with Covid happening

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate Change is a huge problem for our future generations

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I agree

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Having land that increases in value makes sense to long term portfolio -

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

-

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council have a proven track record of waste and have consistently failed to trim expenditure on vanity projects, while not delivering core council services.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Use of the word investment to hide what is an expense does not make the expenditure any more palatable or sensible.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Year of under-investment in water infrastructure which over-paid executives did nothing needs to be addressed without additional pain to ratepayers.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I have no trust in Auckland Council to not use this as a covert strategy to close valued community facilities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You have not addressed your Councils own internal costs and over staffing which would save considerably and lead to no rates increases.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is a pipe dream and will do little to address climate change.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: AC and Watercare need to cut internal costs and staff numbers and reduce costs first.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Because you are not focusing on the overly costly internal Council issues of staff numbers and silly activities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Fists of all cut your staff and wastage costs internally.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Not necessary and will not return any cost benefit.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Again the AC is out of control with excess staff numbers and excessive costs without any controls.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Developers should contribute to infrastructure funding

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Because AC have not cut cost enough and are inefficient and simply passing that onto Auckland Ratepayers because you can.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: You are just throwing money at it when you could empower ratepayers to do more.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Auckland Council have failed here. You need to get people that know what they are doing to drive change. Why not help Auckland households to get large water tanks they can use instead of putting the water rates up?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: That means that Auckland ratepayers will get less community return.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

You are joking Right! Auckland Council that is shocking all you care about more ways to get money out of Aucklanders!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I would not use it so why should I pay for it.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

For Auckland Council do cut cost and stop making us pay for poor decision making. AC to stop funding Waikato projects. Auckland revenue is for Auckland.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: People have been hit hard by Covid. This excessive rates increase will have a knock on effect of harming our most vulnerable. Council needs to review its plans to make it work with increases only being in line with inflation.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Agree with investment in services but within current budgeting. Ie not increasing rates exempt with inflation

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why: Please don't get rid of Cape to Cairo event

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Those who do not have decent access to the service should not have to pay

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why More money needs to be invested in the Browns Bay centre in better streetscape, walking and cycling improvements to and from the centre. New higher density developments in Browns Bay should have to improve the immediate urban environment around their development (good eg is The Sands retirement village, with the upgraded planting, footpaths and speed tables/ pedestrian crossings which has made this area of Brown bay so much nicer ; keep Cape to Cairo event.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

High quality, RAPID Public transport to Warkworth, Kumeu and Hamilton

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Many of the projects listed have an urgency to them based on need and a simple business logic. Deferral is not a responsible option, so funding is needed.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I do not support the proposal for more street trees - but DO support additional planting in more strategic locations. The percentage success rate of street planting is unacceptably low, they are often damaged or require excess maintenance (watering etc) . It is clearly a no-brainer to support investment in response to climate change by street planting is a token and offers little by way of effective solution.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It is unacceptable that our water is of inadequate purity, our beaches and coastal areas are polluted - given that these problems are directly caused by infrastructural failings that we can remedy, we should do so as quickly as practicable.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Auckland's growing population results in an increased need to community facilities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Overhead power lines are vulnerable to naturally occurring incidents and failures- which cause sudden and dramatic inconvenience to residents and services. Preventative work is vital to ensure continuity and robustness of service.

Predator elimination and

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: This is a potentially important service which requires start up funding. It could become self funding in time, but will certainly impact on vehicle numbers meanwhile.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Clearly, the Orewa Esplanade project is financially significant, urgent and a priority - I totally approve of this priority .

However, the traffic on Whangaparaoa Road is appalling...every day...and the rising population in the Whangaparaoa / Gulf Harbour area due to increased housing is exacerbating this. Similarly, the deterioration in viable businesses within Whangaparaoa and Gulf Harbour itself continues to force more traffic onto the road all the way into Silverdale, Orewa and Albany. This needs urgent improvement in incentives for businesses to open up at this end of the peninsula. The area is served by a single road in and out, which cannot easily be widened or improved,. Ferry service improvement is the only realistic answer- yet I see no mention of constructive approaches to either issue. Why? 2. Improved funding for predator and pest elimination on the Whangaparaoa peninsula.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

1. Co-ordinated strategic improvements in public transport options. notably improved ferry services.
2. Improved funding for predator and pest elimination on the Whangaparaoa peninsula.
3. Improved policy (not for traffic management), but maintenance of law and order resourcing effective local police responses to crime and anti - social behaviourswhich are increasing problems.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: While your rate payers are hurting badly you are playing think big.. Robert muldoon wasnt right and this is not right. You are hiding the very people you claim to represent.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: New Zealand economy is in great peril and yet all you can think of is spending. Progress lives are being harmed down. The poor and working classes are being destroyed in the name of your 'nice ideas'. There are more pressing priorities

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Council have failed completely and miserably in this so far. A working plan should be made with real planets before more money is wasted.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This council is spending its ratepayers into the poor house, with many of these projects representing Tony minority groups and not the community at large. There are much higher priorities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

You are trying to charge people for possible future situations while at the same time limiting their land use through your planning. This is bordering on criminal. Farmers do not have the benefits of land value to pay these levels of rates because the cou

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: There are already a wide range of charges to support public transport. If it is to be locally paid, then why isn't all transport locally paid.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why People are hurting. Locals in this area and demographically dropping quite quickly, but without support. We cannot afford the spending proposed.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The council needs to get out of its ivory tower and try living the lives of some of its ratepayers. It claims to be trying to make a livable city but instead is working to drive up housing costs, transport costs, while ignoring essential infrastructure and spending on non essential items. Get back to basics!

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You wasted the rate money you already collect. And you face no consequences, WE have to continually fork out more and more and more to mop up your dysfunction and waste. NO more. use the money you already take, and cut your bloat and waste and vanity projects!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: By all means, increase investment in your "green" folly, but take it from somewhere else in your budget. DO NOT take more from us by force.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: You should stick to your bread and butter. Maintaining our infrastructure is exactly what you should be doing. Fund infrastructure investment with the rates you already take. Cut your frivolous vanity projects and NO MORE RATE INCREASES

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Once again, you have failed to do your job - which is providing and maintaining our infrastructure. And once again, instead of facing your consequences (as you would if you were a private company), you take more from us by force. And threaten to reduce services. You are criminals.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Stop using weasel words - instead of saying "changes to rates and fees" just say what you mean "increases to rates and fees". You are a wasteful bunch of out of control criminals. Taking from us by force.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Lower our tax/ rate burden

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Many people are struggling financially already following the disruptions in 2020. It is unfair to expect us to pay higher rates than previously agreed.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Whilst supporting this initiative I still do not agree to rate increases, rather make it a 12 year plan instead of a 10 year one

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This initiative only affects a small area/ population - focus should be on improvement for all or funds should be raised from localised areas for local projects.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Sharing of premises leading to savings in upkeep and repair costs sounds like a common sense option

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: People should not be penalised for living within certain metres of a bus stop that they have not chosen to be positioned within 500 metres of their dwelling

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I do not support the upgrading/ enhancing of the Orewa Boulevard, enough money has already been spent on that

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are already unaffordable to many, a 5% increase is too much and further cost savings must be found. Has a zero-based budgetting approach been used to justify every single cost? The 5% is not 'one-off' as future increases will compound on that 5% so that is misleading. Also, when property revaluations kick in this wealth tax will be based on a significantly higher capital value. The 'real' financial increase (next years \$ rates - this years \$ rates as % of this year \$ rates) for each household will be far higher than 5%. Give us the absolute \$ and % rate increases to make

better decisions i.e. Overall increase of \$X for each \$100k property value. If council cannot provide ratepayers with these figures more work needs to be done. Only defined essential services should be funded and all 'vanity' or 'pet' projects like the arts or 'nice to have' things must be shelved in these extreme economic times. Ratepayers can't be put on the breadline/bankrupted to pay for somebody else's library/arts use. A lot more projects can be shelved.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Delay this until we can afford it. Central, not local, gov needs to address climate change and fund it.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Move to user pays for fairness. Currently this, as with all rates, is a wealth tax and unfairly targeted. Many people paying for these facilities through their rates don't use them or wish to use them

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Many of these targeted rates result in a charge to the same ratepayers multiple times (double or triple dipping). Where some of these may be fairer (user pays) council should avoid multiple charging. I support user pays but new developments (develops) sho

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: User pays via bus fare, though I'm not affected by either choice

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Most are 'vanity' or 'pet' projects that are not essential services. Arts, shouldn't be funded. Only essential infrastructure etc.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Essential services only - infrastructure (water quality to/from homes, beaches and rivers) plus roads/transport. Target rates/user pays for things such as rail which does not benefit the North Shore so those ratepayers should not pay. Don't double/triple dip with general levy and targeted levy and petrol tax. Rates should not be a wealth tax. Per capita rates would be much fairer as service usage is inversely related to home value. Remove arts, climate change and any other vanity spend. Introduce cat register and license fees similar to dogs. Do a bottom up zero based budget and reduce CCOs/staffing costs.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Do not sell the assets!! especially the land, this is a short term fix, where they are being held for land banking for the future! You will never be able to buy them back. In addition they may go to foreign ownership, who may not have interests of the New Zealand people at heart.

Please keep the library late return fees, otherwise there will be no incentive to return the books on time for others to enjoy. Some may permanently go missing - a free book.

Please lower the fees for dog ownership - you want to incentivize legal ownership not disincentivize.

More prioritising please, does the Art gallery need a renovation over the focus of water quality of the people in Auckland?

We are all very angry about Watercare, how no maintenance seems to have been completed over the years, now when the Aucklanders are at a low, bearing the brunt of the COVID lockdowns and keeping the New Zealand economy running. We are told we will be having a 160% increase in rates in the next ten years.

While we all heard about how much the ex CEO was on.

In addition to a heavy increase in the Petrol tax only for Aucklanders.

As well as an increase in the residential rates.

Please consider a lesser petrol tax that is nationwide rather than Auckland specific.

Stop killing Aucklanders!!

We are the ones who are opening up our lives to the majority of immigrants and helping them through the teething parts of settling into their new environments.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Tell us why: Need to do more homework here, with conflicting stories of the mining involved in obtaining sufficient quantities.

Amnesty International says human rights abuses, including the use of child labour, in the extraction of minerals, like cobalt, used to make the batteries that power electric vehicles is undermining ethical claims about the cars.

"First, raw materials needed for batteries are extracted at a high human and environmental toll. This includes, for example, child labour, health and safety hazards in informal work, poverty and pollution. Second, a recycling challenge looms over the eleven million tonnes of spent lithium-ion batteries forecast to be discarded by 2030, with few systems in place to enable reuse and recycling in a circular economy for batteries."

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?**Tell us why:****4. Community investment**

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?**Tell us why:****5. Rating policy**

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Many rate payers have been significantly impacted by COVID 19 and have either lost their primary employment or taken significant pay cuts. Adding an additional 5% surcharge is unacceptable in the current economic climate.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Investment is support only through diversion of funding from existing non mission critical activities.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The "one off" 5% is unnecessary if the budget/expenditure is altered. This goes for the whole 10 years - unnecessary roading and footpath expenditure should be cut dramatically, Council staffing/salaries need drastic reductions, wasteful expenditure on such things as America's Cup and Eden Park should be not just cut but abandoned and frivolous "extras" should also be pared back. Focus on the basics!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Yes, climate change is vitally important for future life on the whole planet, not just Auckland. But a proposal for "light rail" down Dominion Road is nuts. Electric vehicles need much greater development. Batteries require finite resources from Western Sahara, still aren't efficient in terms of their life between charges and create a further waste when expended. Cutting down mature trees simply because they aren't natives is another nutty council tactic.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Cutting huge Watercare salaries is important as well as improving water quality and waste water treatment.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Everything in parks, libraries, arts centres and other community centres doesn't need to be new! Multi use venues are a sensible way to go.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: This budget is too much about spending which the council can't afford. They have to start at being realistic and realise that a rate increase is no option moreover the Council needs to look at a rates decrease as soon people can't afford to live in Auckland any longer. Its all very well to say "oh well lets increase the rates" when you want to get things done but that's not how it works in real life. Every business and household has to run on the funds that are available to them and so should the council. If you haven't got enough funding to do what you want to do then you will have to make

some changes to cut down on your costs. For a starter reduce the amount of people that are on absorbent salaries. There are plenty of people around that are happy to do their jobs for half the amount of money and can most likely make a better job of it. That alone will save a few million.

Then there is the running of the council. It is the most inefficient organisation around. The way they are being run with all the double handling, using contractors to engage other contractors to do a job that can easily be done by an employee from the council is not cost effective at all. Having Watercare, Auckland Transport, Auckland Unlimited, Panuka Development and Auckland Regional facilities all run separately with all its high raaky and highly paid chiefs of something is unnecessary. What sort of world are these councillors living in? Start living in the real world people. The rate payers just don't have the money to afford a further rates increase. You have to run this city with what you have available to you. As you state, Auckland City has been rapidly growing and with it, so has the growth of the funding.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: There is just not the funding available. We should be spending less instead but be spending it more wisely and efficiently like stopping AT spending money on putting in all those not needed speed bumps that create more air pollution and are a nuisance to cyclists who we should be encouraging to get out there on their bikes. Not discouraging.

Make use of the option to burn rubbish and use this as alternative fuel.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: We need to incorporate alternative options instead, like people using their own water tanks to reduce the demand on our water supply.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Funding for this should have already been incorporated in previous budgets so there should not be any need for this to be increased.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: This should not be charged to local households. The cost for this should come under the general public transport costs.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why It is too vague to be able to answer this question

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is important to me is to get this city running more efficiently. It is heartbreaking to see money being wasted on inefficiency and that needs to be addressed.

If only we could turn the clock back and have the running of the individual councils back again. That worked so much better.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Small increase for economic success

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support replacing assets with climate friendly ones but not purchasing before lifespan ends

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Because you should be closing down ATEEd instead. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I believe they need to continue to look at commuting into the city and the facilities to encourage family and children growing up in the Silverdale and Millwater areas.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing needs a massive focus. Quality of stock is poor and the focus on it as a key investment is problematic. While not all controls are in the power of the council it would be good to see any movements to remove family homes as an investment vehicle whether that be a land transfer tax or other mechanism. We want more neighbourhoods with owners who can have long term roots in the homes rather than short term rentals. While rental stock is part of the equation for some, there are many who want to own but are unable to. If we are not going to move forward with country level capital gains then I would like Auckland to lead the approach to housing to encourage balancing pricing and accessibility.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It's been a tough year, and I think the proposals recommended are well thought out and prudent while aiming for transformational change.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The climate emergency is one of the biggest issues facing our generation. It sucks having to put our money in now when things don't seem too bad, but it's the right thing for our future.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The charm of our city (in my opinion) is the access to water and the way we can easily swim at our beaches or walk along our coastlines and look at the wildlife in the water. Water quality must be a focus. With continued population growth and spread of the city, we mustn't lose focus of what happens to our waterways. By extending and increasing the targeted rate, there is more confidence in some of the trickier projects that will need to be completed.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: In general I support this, however please don't use a digital first mentality for all of these. Understand who is using them currently, and who will use them in the future and try to focus on multi-use facilities. Auckland is already such a disconnected city, don't further disconnect by removing any interaction by going totally digital. I do however LOVE the idea of multi-use facilities. You can do some really exciting things in those spaces, and save money.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I'm referring to extending the City Centre Targeted Rate. I think this heavy investment in the city centre is not right in realising that Auckland is no longer a "city centre" city. Keep focus on completing the projects you have not, and investing in local

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: In light of the impact of Covid-19 and carbon dioxide emissions, this seems a good move.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It is urgent for us to make that investment ASAP.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Support the increase but not the extension.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Our facilities are the minimum at present.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: One cuts their cloth accordingly so NO rates rise make more savings

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: As I advance in age towards my Long Sleep at least the cold ground will be warmer!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: The last targeted increase has not delivered any tangible evidence of improving water quality, look at the recent beach closures after a little rain. Make the polling suburbs like the inner city pay they have high property values so they must be able to pay to clean-up their own mess not spread it across city wide regardless of who pollutes!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

power lines and trees - property owner not me to pay!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: user pays! - simple1

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why

The local Board is a shotgun marriage of two totally different and distinct areas separated but some old no build thing protecting poor farmland & needs sorting ASAP , they need to be separated for better management

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I have little confidence in our Council to make the right decisions they spend like drunken sailors on a Run Ashore on a number of feel good useless projects. Roads, Water, Shit disposal and a bit of planning are what it's all about – time to get back to the basics of what local government is all about! Housing and growth, let the user pay not me i.e. the developer pays for all the downstream costs to upgrade, water, storm water, roading, public transport etc. we should only pay for the necessary maintenance of our existing facilities that service our area!

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: In this subdivision (Milldale) we are already paying an extra amount for infrastructure. With this proposed scheme it would just add to a very stretched financial situation which we are already experiencing.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: 10 years is too soon. This can be done over a longer period.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: We in this subdivision are already paying an exorbitantly large infrastructure fee.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Changes to the Urban Rating Area Which will affect my property will increase the annual amount by an exorbitant sum which I am against due to the fact that Milldale residents are already paying a large infrastructure fee.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Milldale residents are already paying an infrastructure fee. In this subdivision (Milldale) we are already paying an extra amount for infrastructure. With this proposed scheme it would just add to a very stretched financial situation which we are already experiencing. Our rates should remain the same.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates increase much too high - any rates increase should be fixed to inflation and definitely not more than average wage increases. The council should focus on core services. Social housing and similar non-core services should be government responsibility. Developers should not longer be subsidised and pay the full price of infrastructure to cope with population growth.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Should be government responsibility. If helping with fighting climate change then this should be done by limiting population growth and putting taxes on imports from high-emission countries.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: A large proportion of required water infrastructure is due to population growth and in-fill housing. Increase developer levy and put an "environment levy" on immigrants who want to settle in Auckland.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community assets are a core council function and make Auckland livable. Reducing such assets while at the same time population is increasing is unacceptable and will dramatically reduce life quality in Auckland and increase social problems.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Priority should be on maintaining lifestyle of people living here, i.e. keep rates down, keep community facilities (especially libraries), reduce traffic. Most parts of this area can not support any more population - traffic is chaotic and traffic jams dramatically increase transmissions, and parking is often impossible making it hard for parents with children to attend events.

New housing should focus on greenfield areas with appropriately planned traffic and public transport.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Keep community facilities, reduce traffic congestion, provide more parking or reserve parking for families with children or have a minimum occupation for cars who want to enter certain areas such as beaches.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There is no explanation as to how or why there is a projected loss of 1 Billion dollars due to Covid. Also there is no accounting for expenditure, with reports of a lot of unnecessary spending by Council on things like Americas Cup rather focusing on Priority infrastructure.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: There is more important basic infrastructure requirements that expenditure must focus on. Leave this to central government

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Watercare was set up to manage the water infrastructure. It has fail and now we face the current situation. Perhaps there needs to be a bigger contribution from the development contribution from developers as they are creating the additional demand.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The Northshore managed facilities well where as the Auckland Council has failed to invest in these assets and have let them deteriorate

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Happy to make networks pay there fair share of costs they incur

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: If the bus service is required why should the rate payers pay and additional levey for it. Many will never use it. Public transport is service provided by local govt.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why The focus should on much needed infrastructure such as Glenvar rd not be waste on community groups and environmental initiatives. Infrastructure in the are is not keeping up with the out of control development and there is insufficient contribution by the developers. The roading network is failing along with e water infrastructure. Council needs to focus on the core basics not the nice to have.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Improving the basic infrastructure of the city not wasting money on nice to have itenms such as boat races and community groups.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: 3.5 percent is sufficient

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is our future

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is vital

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Appears to be short term approach

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Seems reasonable

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why Well thought out

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing increase supply

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It is really important to keep up with infrastructure demands and also to put more money into the Auckland economy as long as the money is spent efficiently. and this is audited rigorously.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Auckland Council needs to be setting an example for the future - air pollution, greenhouse gas releases, transporting waste long distances to landfill etc.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I don't think that this goes far enough. Watercare wastewater infrastructure is generally in an appalling state of repair and conditions for operational staff are often not safe. Infrastructure delivery is inefficient and expensive. If there is not good management of Watercare's project delivery, ratepayers will not get value for money. Currently much needed investment is being funnelled into large infrastructure companies (e.g. Fulton Hogan) rather than into plant, and there seems to be no sensible oversight.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: it sounds sensible however it really depends on the detail.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Not sure that the accommodation targeted rate is sensible or what it really achieves. Having a range of accommodation types for visitors will encourage more people to visit Auckland and therefore discouraging Air BnB could be counter productive.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why Not sure that any of the projects will have an impact on me.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Again, CCOs need to be seen to be operating efficiently with some robust auditing around this. Proposal sounds good but please hold CCOs to account.

This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Council prioritises infrastructure before allowing more growth

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I strongly agree with the Council maintaining all capital & operating expenses associated with traditional council only activities. I strongly disagree with the council performing activities which are part of the central govt (e.g. housing & income support), with the council forsaking a billion dollars in interest savings following the abandonment of basic common sense (and covering their a.. by outsourcing to the supposed experts who got paid and suffered nothing), along with the investment losses (Auckland port and AIA inability to take u rights etc). I do not understand why some

incompetence is allowed to continue and if same had not occurred then there would be plenty of money for activities such as libraries, playing fields etc

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Strongly support electric buses which as well as improving the environment will actually result in both net long term cost savings & personal health savings.

Support cyclways and city pedestrianisation etc although have doubts about the way some of these have been designed * & implemented (designs approved appear to have cost excessive sums of money)

Do not support over the top financial costs such as the Devonport trial which do not require much common sense to understand why they would fail.

Do not support non cost effective recycling procedures which require levys to implement.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Needs continuous improvement but I am not certain that our money is being allocated in the areas where can initially get the "most bang for the buck". As such support the extension but not an increased rate - engineers need to be careful with their allocated funds.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Mostly support the increase as this is a key area of council responsibilities. Do not support council leasing facilities as results in a transfer of wealth from the council - council should own facilities and maybe improve income by leasing part of council owned facilities out. Do not support council maintaining age or social support services where this is a central govt function unless there is full cost recovery.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Zoning rural to urban land at present results in a massive capital gain by the land owner. If they benefit from same they should pay the urban rate. This would also assist in reducing the current excessive new housing land costs which are the biggest source

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Don't live in the area so not aware of the advantages

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why Local representatives appear to be close to the community and I trust their priorities.

I do however think the Hibiscus & Bays local board is a disjointed area and it should be split into two separate boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It is important that traditional council services are maintained whatever the cost of same.

However it is also important that in doing so it is done as best financially as possible - the utter financial incompetence of the council in effectively forsaking almost \$2billion of our money needs to be forcibly & permanently addressed.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: I don't really understand what is going on.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Well, firstly there are so many more trucks on the road and other vehicles that we are really poisoning the air. The trains should be used more instead of trucks going back and forth with wood and freight. So much more waste about. Speaking of transport, why are the council allowing so much more appartments being built, every house hold has probably 2 vehicles and public transport is not being improved.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Water is free from the sky, everyone in the old days had a tank. But then I guess the council don't want tanks on peoples houses as they get no revenue from it. We have just moved from a rural property where we had our own tank water and sewage disposal.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Some of these community services are best run with people coming together to meet, watching or joining in on a zoom session is not going to help. Maybe we need to get more people off benefits, and dishing out payments to people who could actively get a job. And we are paying out a lot still to Maori, I think we have paid our debt, and all of these people have pakeha blood in them so that must help in making them want to support our country as equals.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I have seen the bus that goes from Silverdale to Helensville on many occasions and I don't think many people take the bus, seems a waste of time. If this transport is needed for the odd person why not a little van.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Too much farm land being used to put wall to wall housing or large apartment blocks, puts so much more pressure on all resources. Why do we need all these buildings? Where are all the people coming from?

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Ratepayers are not an endless source of funds for councils to waste. Council need to make more effective use of funds and get rid of expensive bureaucrats who can't manage.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: While addressing climate change is important, this investment is not critical. The fleet can be replaced with clean energy vehicles as and when individual vehicles reach end of life.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: I would support this only if there is transparency over how this proposal would be managed to ensure it meets objectives within its original budget.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Support if this is done without increasing costs.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Other

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Other

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Other

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Other

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Will only support if there no increase in rates. Council salaries and pensions need to be reduced to free up funds.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Don't care really as will not be affected by this.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why I do not support any increase in rates. The reality is that we have not seen any value from the increase costs over the last 10 years.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: short term pain for long term gain

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Council need to lead the way in sustainability and environmental initiatives

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: NZ is seen as clean and green. The water quality at some of our beaches is disappointing, especially when we have high rainfall events.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: People closer to the bus stops are more likely to use them

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Arts and community support is important as is upgrading Glenvar / East Coast Bays Road. Not so sure about Orewa Esplanade needing upgrading.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Need to focus on actual priorities rather than perceived priorities.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council at this stage needs to concentrate on general maintenance of council facilities.

My income like so many others has been considerably reduced in last 12 months and I do not have funds available to continually pay for rate increases.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: refer issues to Central government for funding from tax take.

Not ratepayers for funding.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Water quality is important.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: How many extra staff would be required to administer this proposal?

No doubt more than required and like a lot of council proposals the admin cost would negate any savings on our community facilities .

Leave our facilities alone.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: example I see is bus that runs constantly empty from Westgate to Albany.

Great waste of ratepayer money are these marginal bus routes.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Not happy with the quality of some of these projects. Council needs to ensure that the contractors work is up to standard before signing off.

Example is the recently erected 30km signs around Orewa town centre. The kerbing is poor in places and filled with soil that is now growing weeds etc?

Should have been done so they are maintenance free. Poor council oversight has to be responsible.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I, like many ratepayers have had a considerable decrease in my income over the last 12 months or so. There is no appetite for any further increases in our rates. Council must tighten its own belt much more before it looks to ratepayers for further increases.

Important privacy information

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We have seen the results of inadequate spending

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is a fact

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I am disturbed by the deterioration in water quality I have experienced in my lifetime

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Leasing does not change the overall capital cost, it merely changes the impact over the lifetime of the object

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Upper Harbour Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I dont think enough thought has been given to inovative solutions to lessen the impact of Covid 19 on the community

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I think we are neglecting the infrastructure advances being made and concentrating on short term fixes

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Understand the need for a larger one-off rates rise of 5% but would prefer to see this balanced with reduced rises in the following years of, say, 2% for a couple of years thereafter to ease the burden on households.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Why is "planning for coastal change" under the emissions section? Does this include the planned purchase of land over the coming years for parks and recreation to mitigate the forecast rising seas? Would also prefer to see investment in light-rail to/from the airport than more buses.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: This feels very focused on inner city suburbs. Where and when does the planning come in for the upper North Shore and Hibiscus Coast water quality? A litter trap is good but does nothing to stem the systemic issues from developer run off and stormwater pushing mud into the seas. Would prefer to see more system level measures developed for this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: As long as the partnering is a transparent process and doesn't start the demise of our heritage buildings!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Keep building houses!

PLEASE get drainage and storm water infrastructure on list ASAP

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: It seems sensible if this can be done in cooperation with others, using shared or leased facilities, providing that groups are able to have the use of the buildings when they need them.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Re extending the urban rating area to land that hasn't been developed, does not seem a good idea.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I do not live in those areas, and have no idea how (or if) the residents will be much affected.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I support the spending but I will not support any further rate increases. It is time to live within your means and focus on CORE SERVICES only which do not include useless cycle ways, stupid speed limits on city streets or a host of other useless vanity projects

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Waste of time and money on vanity projects

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Waste of time and money on vanity projects

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Consolidated facilities a must as long as they are all of a similar standard. To date that has not happened

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council is not the only entity suffering. The ordinary man and businesses have been devastated financially by the Covid impact. How can those suffering financially be expected to pay more rates? Maybe Council should have not squandered so much of ratepayers money, then there would be more of a buffer?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Perhaps if Auckland had not been allowed to grow without ensuring adequate infrastructure first then this situation would have been better managed. More houses, more people, more pollution.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why Because I do not have faith in the Local Board to be proactive. They can talk but not do the walk.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing - current building load is leading to future slums. Human beings in such close knit environments always leads to issues.

Growth - this should be curtailed until current issues are sorted. Keep loading the dwellings and people, and something is going to give.

Tell us why: Too expensive

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Way to go

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Water quality is important

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Use volunteerism for the library to cut costs. I have volunteered and not been approached. Am qualified in this area and would donate my time free.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

No increase in rates

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I already pay for a train service when we do not have one so why pay for a free bus service

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why The council needs to consider the extra costs to struggling ratepayers

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Why haven't aging assets been addressed previously instead of lumping it all on next year. Council needs to improve spending plans much better than they have in the past. Forget action on Climate change, the council has no business in this area and nor will it have any affect, total waste for rate payers. Need to be far more specific as to how Covid has impacted on revenue. Council can't just say it without a full explanation, there is simply no control or accountability

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Have no idea what or who Te Taruke a Tawhiri is, so they do not speak for Aucklanders and nor should they, from my understanding they are not an elected group. From my discussions with fellow Aucklanders they do not want council involved in Climate change, that statement carries the same amount of weight as the so called Te Taruke a Tawhiri, again what ever that is. Come on act like adults

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: If council has indeed been running Water Quality Targeted Rate, scrap it immediately, there has been no quantitative improvement and the information you have provided is very skeptical

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council needs to provide maintenance on the above on a yearly basis. If this hasn't been done and the council now wants the rate payers to pay a one off payment shows the council is unreliable with current rates spend and were never in a position to budget maintenance costs. This show incompetence and I am afraid Aucklanders are going to just have to put up with decaying community assets until a responsible council can balance their budgets

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Council receives a very large sum of money from rate payers and over the last decade have shown they are incable of keeping costs down

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: You only have to look at the patronage of buses on the North Shore to come to the conclusion that we have spent a fortune on bus lanes (and cycle lanes) and hardly anybody uses them. The last straw will be the cycle lane over the bridge, what a total waste of money that is

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why It is simply not a priority

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I am a landlord and have several rental properties. I will pass the increased cost onto them which is likely to put them on the street. The train skypath and other large projects don't deliver value for the ordinary person who will catch a bus instead. Watercare should pay for central interceptor charge double for water which will help with shorateg of water as well. Central government should pay for bus lanes. No more trains they are too expensive and very unreliable.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Charge property owners more that are over their site coverage.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

What is your view on this proposal? Support the extension and the increase

Tell us why: Clean drinking water please.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Libraries and pools are critical in communities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Public transport. Get on with with light rail.

Introduce more bus routes serving new subdivisions such as Millwater.

Feeder buses to bus stations.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I agree with everything except the one off 5% rates increase. Cut tier 4/3 managers & their salaries first...reduce the CPO team (not required) and look at the need for EOs for the Dept heads (not required). Look for internal costs first, particularly at AT, Watercare and remaining CCOs. Stop screwing around with the IT systems and take a closure look at procurement processes.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Local Boards are very reluctant to close facilities - you will need to sell this to them when they are so against this.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I agree, but there should also be \$\$ to trim trees on the berm that have overgrown onto private properties and therefore become the householder's problem to fix

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Does this mean that their bus fares will be subsidised if paying \$238 per year to get what everyone else gets for free?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Funding emphasis seems to be on Hibiscus Coast and not the Bays - where is money to improve Browns Bay Business District? I would like to see event funding go to different event organisers and not the same ones doing the same events year after year (Cairo to Cape Town for example). They should be self sufficient by now and well aware of what they need to provide in terms of event permit documentation, H&S, waste, TMPs etc. Where are the upgrades to the Browns Bay beach boardwalk?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council are not the only organisation that have lost revenue during the pandemic, a large number of ratepayers have also suffered significant cuts to their income, if indeed they still have a job. Council have a significant number of projects that do not impact Auckland wide which should be 'mothballed' until the city can afford them.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Just about anything that can be done locally will be negated by overseas jurisdictions inaction. A 'no cost' solution needs to be found. Battery powered cars are not a viable answer, as yet we have no solution to what to do with the batteries at the end of their life and have to be decommissioned.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Stop Watercare from discharging sewage into the harbour would be a good start. They, Watercare, currently charge every new connection a hefty sum of money to connect to our network, it is called an 'infrastructure growth charge'

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council should have an asset management plan, this should identify each asset and when it will require maintenance in three broad bands; minor day to day repairs; major repairs to plant; major repairs to buildings. Money should be accumulating to cover these known expenditures over the life of the asset.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Generally we can't afford any of this work at this time. In particular Vector should look after their own overhead power lines, that is their means to sell their product.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: If the service cannot support its operation then it should not be considered.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

What is your view on this proposal? Support the extension and the increase

Tell us why: Water is a top priority.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Cut down on footprint, multi use facilities we have.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Accommodation provider rate should be reintroduced. If people make money from providing accommodation that income should be taxed.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: User pays.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: To keep up the good work

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Agree we need to take action to support a cleaner world to live in

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: This is much needed infrastructure development and otherwise we are never going to get a round to fixing it

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community facilities are a huge asset to our community and need constant provision

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: but, I would like to know more about how the council is going about cost savings, being a more cost efficient business in management and delivery - sometimes there seems to be too much talk and not enough doing

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: i think the climate plan needs to focus more back into the local community and the simple things - our recycling and general rubbish dumping is poor, i would like to see more money spent at community levels and schools and homes on the amount of waste and non recycling waste

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Wait until COVID has been dealt with and all of us are vaccinated. People, including myself are hurting. Please consider us.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Fully support once COVID is under control.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Accommodation Provider Targeted rate: I support OPTION 3 [Reinstate the APTR from July 2022]. This directly affects me as I own a unit in a hotel complex. My income has been reduced to one third of what I was receiving prior to COVID last year, until October 2022. [\$100 per week!] As I have no means of increasing this, my ability to pay any rates increase will be seriously compromised. At present paying the current rates, body corp fees, tax and GST are a stressful challenge. A decision to defer any rates increase until the borders re-open and things get back to 'normal' would be much appreciated. Thankyou.The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We already have a 10 cents/liter petrol tax which should have a 2 billion amount as we dont seem to use the money yet.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The petrol tax should be used for this. WE dont need more landfills but we need a Municipal Waste Power generation system similar to Sweden and Norway.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: We are allowing Too much in fill housing projects to be built in the City and Suburbs without the Developers paying for the water and sewerage infrastructure . Land that is at present used for food production should not be used for housing projects.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Online services do nothing for the elderly who rely on face to face help. They are the ones that put all the services in place. Sports grounds are on a user pay now but not all users pay. This needs to be better controlled.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

As part of power charges we have an amount that is called Maintenance. This amount should cover this work. Our water bill also has a maintenance part of the bill. but this is seldom done we only get work done when there is a failure. Big bonuses are paid to the Hierarchy if they can reduce spending. They are paid huge salaries as it is and they dont preform in there core tasks. The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Petrol Tax of 10 cents/liter was added to pay for this type of service. Again double dipping.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why Have not seen anything in writing of what they want.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Too many people in local body politics have there own agenda and not the thoughts of local people. Community Boards should be self funding and not actual jobs as at present. There is huge double up of people trying to do the same job and nothing gets done. We had the opportunity when Auckland was set up as Super City to get it right but we still have a Mayor and councilors who have no idea how to run a city and are not supported by the majority of rate payers.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: People need support now, with having to stay home infrastructure is less needed. However people who have been deprived of income do need the support. Logically, in view of all other policies, for council to be on the same page it needs to be offering rates reductions. It is weird and BIZARRE TO BE FLEECING PEOPLE UNNECESSARILY AT THIS TIME. IF COUNCIL RAN AUCKLAND AS I RUN MY BUSINESS, I.E. EFFICIENTLY

AND ECONOMICALLY WITH NO FRIVOLOUS CONSULTANTS AND UNNECESSARY BENEFITS TO STAFF AND RIDICULOUS WAGES FOR MANAGEMENT.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I PROMOTE ENVIRONMENT PROTECTION AND CHANGE BY US ALL. EVERYDAY I MAKE THE ENVIRONMENT BETTER. WE NEED MORE PROMOTION OF WHAT EACH PERSON CAN DO. COUNCIL POLICIES HAVE RESULTED IN THE MESS THE ENVIRONMENT IS IN NOW. GIVE PEOPLE REBATES FOR INSTALLING TANKS, WASTEWATER, PLANTING ORCHARDS AND LIMITING CHILDREN. THE ANSWER IS CHANGE IN HABITS NOT MONEY INTO AN ALREADY WASTEFUL MANAGEMENT STYLE.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: THESE THINGS WERE NOT DONE CORRECTLY FOR 40-50 YEARS - IT IS NOT THIS POPULATIONS BURDEN TO FIX COUNCILS CORRUPTION AND NEGLIGENCE. IF COUNCIL HAD FOLLOWED DOVE-MYER ROBINSONS PLANS ALL WOULD BE FLOWING CORRECTLY.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: NOT MUCH POINT AS WE ARE UNABLE TO USE COMMUNITY SERVICES OR FACILITIES MOST OF THE TIME NOW. PEOPLE ARE FINDING OTHER OPTIONS

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland is a world class city, but general infrastructure (public transport etc.) has a LOOONG way to go, we cannot fall further behind

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Government should create better incentives to drive this, fund through taxes of high emission vehicles etc. and funnel these funds to initiatives such as this

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Idiots in charge

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Idiots in charge

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Idiots in charge

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Idiots in charge

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Idiots in charge

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are too high as it is

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Allow small 1-2 bedroom houses (say 40-60m2 to be built on small lots/sites say 120m2, to give people more housing choice, especially as our population is aging.

Allow for areas/district plan to have ability to allow tiny/small house villages or different living choices.

Encourage high rise to get built asap in areas which don't shadow other houses, such as along Barry's Point Rd, once again for more housing choice and urban density.

This in with regard to articles discussing that our people per house has dropped from 3 in 1970 to 1 in 2020.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I generally agree with your proposal but feel there are cost savings to be made by closely auditing the provision of services. "Do it once and do it right" would eliminate the need to continually rectify poor structures.

Proposed sale of assets needs a risk assessment approach. eg: The sale of car parking may result in loss of custom and commercial collapse in some areas, especially as Public Transport is not a realistic option for everyone.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Are you aware that you can plant trees at 10 times the usual rate and for one fifth the cost by using drones?

Ref: Shorelines Magazine Feb/Mar 2021 Page 26

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

Do you have any comments on any of our proposed changes to rates and fees charges?

I would be dismayed if the proposed rate increases drove people off the land/ reduced the quantity of productive arable land and overall reduced the green zone around the city.

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I strongly support the Glenvar Road /East Coast Road improvement project to improve safety and reduce the current traffic hazard

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

With the increase in multi storey apartments as a means to overcome the housing crisis, where will the children play?

Younger children need to be within view at all times.

You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council should stop spending on all issues that are rightfully central government responsibility. Annual increases charged to rate payers on fixed incomes is unacceptable.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is the responsibility of central government to allocate tax payer funds as directed by the democratic voters of NZnot as a double wammy by ratepayers.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This should be paid for by the end users of all new developments. Not by the ratepayers who have already paid for their existing infrastructure.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Existing assets such as parks in particular need to be maintained properly for the pleasure and enjoyment of rate payers who have paid for the establishment of these assets over many years.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why I support all parks and reserves priorities, in particular coastal and beach. (just take a look at the use of such on a fine day from all local and non local visitors from all ethnic backgrounds).

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Boating and launching facilities are vastly underfunded in this area as compared to facilities at Westhaven and Half Moon Bay in particular. The on water activity in this area has no equal in any part of the greater city that we are now jointly funding.

Important privacy information

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Need to have a city that works

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It will cost more if we leave it to later

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: We pay enough rates of one sort or another.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Sharing ok selling assets bad idea!

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: This council continues to waste rate money on repairing roads that don't need it cycle ways that take road useage away and are unsafe. Putting money in there own pockets taking from so called middle class poor who struggle even today.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Never seen the money already taken being put to good honest use.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Rates and water are bills should be used correctly council should stop blaming and make correct charge in any new development with storm water usage included in those permits to cover cost....

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Again money wasted and not spent on promise's given. All I've witnessed is reports nothing done...

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support

Do you have any comments on any of our proposed changes to rates and fees charges?

Proposing other changes.. faceted council will just continue to reep off hard working honest home owners to please themselves instead off doing as the people off Auckland voted each off you in... Four year term is to long do something for us people make your council term 2 years that way council will keep to their promises or be voted out.The Upper Harbour Local Board are proposing a new bus service between Paremomore and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: These kids that can't catch school bus because off a law 1953 on rurul roads (brookland rd ect) which are just off main bus routes fix that first..

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Over paying

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Council terms should be every two years. Council needs to repair show improvement instead off continue using rates ect which by the 2031 none off them will be round to answer for... This has been worse council in 20 years

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates should be reduced not increased. Council needs to tighten its belt just like we have to. We dont get 3.5 or 5% pay increases.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We need more roads for cars . Hybrid and electric cars. Not buses and bikes.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Rates need to be reduced not increased.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council needs to focus on core activities only.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Council needs to reduce costs in all areas and focus on core activities

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: If they want a bus make those that use it pay for it. Council needs to reduce all costs and reduce ratepayers burden

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Council needs to reduce all costs.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Reduce rates as a major priority.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: At a time when many people are suffering from the effects of covid through the loss of income, increased cost of living, etc, increasing rates by 5%, is too steep, even if it is a one-off. There is no guarantee you would keep to this promise. I understand the need to increase the rates but recommend you consider doing this gradually. Make the increase 4% over the next 3 years. Any projects such as roading, repairs, new schools, etc that are on the to-do list, take

time to plan and complete, so there shouldn't be too much urgency to have the funds all in one financial year. Times to review and Prioritise, planned projects. Some projects are not urgent and can wait a little longer.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I don't know why you can't stick with the original plan for the new buses to be electric or hydrogen-powered by 2025. Yes, it would be nice to have them earlier, but aiming for this in 2021 is rather dramatic. Maybe aim for 2023 or even 2024, which is still earlier than planned and won't be such a huge financial commitment.

I think NZ does pretty well compared to other countries so sticking to the plan with no change is the better option this time. Maybe next year this can be reviewed.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: With each year that passes, our water supply (lack of it), water quality and water waste gets worse. We frequently have water droughts, and too frequently the water at our beaches are polluted. This creates an urgency to find a solution. One which we all will benefit from.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: I am sure there are ways you can work around consolidating some assets. For example, if there are two or more community halls / buildings in the same town, with empty rooms that are only used occasionally. Then removing the less used property from the portfolio and transferring any regular service to an alternative location within the same town, could be worth considering. Definitely, something to look at.

However, there will be some services such as libraries which need to stay.

And any buildings you decide to keep, may need investment to bring them up to a better standard

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Options 1 - As much as I would love to use public transport, until AT supply better and more frequent services from the feeder buses in Millwater/Silverdale area then I would see no reason why we need to pay more just to live near a bus stop. Make the services more desirable to use then I may be happy to use and pay extra for.

I don't really know about option 2??

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why They seem to have considered the whole community's needs. Let just hope it turns out that way.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Too much hardship in the community as a result of Covid so Council should be holding the increase to a lower level by deferring not essential works, particularly in the CBD.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Bus replacement should stick to the longer timeline. The expenditure should not be increasing in times of hardship.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This is a tax increase by stealth and the original timeframe should be maintained.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: There is increasing centralisation of facilities at the expense of local communities. This is a real negative of the Super City as the local communities are increasingly losing services yet being asked to fund more.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Sound good in principle but would need more detail to be definitive.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Growth should be funded through the development process.

Overall increases in rates should hold to CPI as the larger increases are a struggle for many superannuants and people living in poverty and on low wages.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I am keen to see proper investment in the infrastructure of the city, however I want to see progress and evidence of good management of money. I would also support lots of borrowing if ratepayers are struggling to meet the rising costs.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is basically the biggest area of challenge we are all facing.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Investment in local water quality would lead to much better quality of life for residents.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: While I understand the need for investment and maintenance, and I can accept that sometimes facilities may need to close, I am wary that such situations could become private-partnerships which I have never seen resulting in any good for the public side of the equation. Money seems to go into private business, but investment from public keeps being needed. I would want to see lots of consultation with local communities over any facilities that are considered for closing, especially marginalised groups that may need the facility; such as ethnic groups, age groups, religious groups, etc.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: As I am not in this area, I do not know how valuable this would be for residents in the area. As an outside observer, I think the lower rate on all households would be a reasonable way to target the rate, as a decent bus service would be of benefit to the entire community. However, I am not the most relevant voice.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: This is not the time to pass an additional increase in rates onto people who are having the same financial difficulties as the Council. The burden needs to be spread evenly, not rob Peter to pay Paul.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Seriously?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: One size does not fit all, concentrate on the basics assets like libraries and sports facilities. change green areas to be more self sustaining or lower maintenance. Grass and bush not annuals or things that need lots of water, trimming. Don't use support for libraries as a general caveat to fund less important fringe projects.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support

Do you have any comments on any of our proposed changes to rates and fees charges?

No

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: The new bus way benefits the whole area, people more than 500M from the route will still use the service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The Auckland Council is elected to manage the Auckland area. This whole questionnaire is saying you are not capable of doing that. You have a budget and a set of services to deliver. If you are not able to do that - and this questionnaire says you can not - do not pass the blame onto the rate payers. This is almost victim blaming. "We wanted to do it but the rate payers said no, don't blame us". We all have to manage our finances and balance the books. That is your job, how about you do that and not pass the buck onto the rate payers, again?

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I Support Option 3 for reinstating the APTR from July 1, 2022

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is your view on this proposal? Support the extension and the increase

Tell us why: Again it is very necessary and just needs doing once and properly

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Messy and uneconomical way of doing it. Can be done with much more care and consideration especially with maintaining the buildings in a good, regular and quality way - do things once but do them well !

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

No real comment except to do things well and with total care package and NO waste.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Too easy to spend and waste money and resources

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

re Housing developments they are tending to get too close together and crowded, it will not and does not work - slum areas develop much quicker.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I don't have any choice really

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Money best spent else where.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Clean water is essential

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: On this ... it must be user pays.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

It's time to return to the basics.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Stop charging us for stuff that gets used by other people.

User pays.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Keep to the basics.

We can't afford more.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing. Too much building on the North Shore.

Poor infrastructure that cannot cope.

Each home will have 1-4 cars too much

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Ratepayers have also suffered the financial impacts of Covid-19 and cannot afford the ever-increasing rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Stop wasting money on a bloated council workforce, with far too many people earning far too much. Then you'll have money for core services.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I believe that Council's spending is way out of control. You are dipping your fingers into things that are not core issues that need to be addressed in our communities and our it is getting beyond silly.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is what I was talking about. We all do our bit for climate change. We do not need you to be spending EXTRA money that is actually not yours to spend. It is our very hard earned \$\$\$. We need our water supply looked after, our parks our roads. Far out come on guys.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This should be covered with our rates. You are obviously not budgeting correctly. As an accountant I have some knowledge as to where you need to make cut backs and it's probably in management but you obviously will not look at that.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Once again you are dictating to all of those people in that area that they would be paying extra whether they use the bus service or not. That is not right.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why To be quite frank I don't know what you have done in our area.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Yes as our streets become clogged with more and more houses the streets are becoming difficult for emergency vehicles to even get access as so many cars are parked on the roads. We really do need to be thinking about infill housing and let Auckland grow if it needs to.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council and council organisation salaries are disgusting and the council is inefficient and doesn't even respond to queries.

The reduction in revenue is temporary but the rates increase would be permanent. The next year wouldn't be 2% to balance out. Learn to budget correctly instead of just taking more from us all the time.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Waste of money, Invest in functional public transport which will reduce emissions and benefit people.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Again learn to look after the city with the funds you have already.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Where does all the money go already? Stop paying inflated salaries and fund these things with existing intake.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: People shouldn't have to pay to get basic transport services. It's your job to fund these from the communal pot.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why This is just basic stuff, we aren't actually getting anything new or beneficial yet are being asked to pay more.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Long overdue

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Also long overdue

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Excellent approach

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Overdue investment comes at an unavoidable cost - let's do it.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Not affected by either outcome.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Let's address the long overdue strategic issues that have been avoided or procrastinated for so many years. The 10 year plan provides the minimum to be achieved.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We need to learn to live within our means, whatever the means are at the time. Our future is looking grimmer if we have more debt and it only adds to inflation. Increasing rates is already a sign of inflation...

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: As above, if every household has to live within their means, and our means have just recently been reduced, then the same should be in effect for the Council and any plans we may have had. If an economy looks dire, climate change can not be at the forefront of the debate. Where will all the electricity come from for all the electric buses and cars? Council is meant to serve us the people. We do not serve the Council!!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: It does not matter whether Council has to pay for it or the user in the end, who has to pay higher entry prices, higher rents etc. Also, it would not reduce the carbon footprint as a city, it would only reduce the Council's carbon footprint.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I object to having rates increase of 3.5% every year. This is more than inflation and salary increases! How are we to afford this ?!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: We already pay far too much for water in this country, compared to other countries. It's not fair!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: We pay more than enough taxes. This should be affordable with what we pay. Maybe spend less on military and weapons and more on ourselves ?

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Public transport as a whole needs a complete revamp before we consider any of such projects. Compared to other countries our public transport (busses especially) is terrible and badly managed.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We pay SO MUCH taxes and rates! Maybe we should be focussing more on reducing wasted money, corruption, theft, and spending on killing machines for the military, thus balancing the budget?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: If you levy a +5% rate in 2021/2022, then will the starting point for the 2022/2023 levy be reduced to the pre +5% levels before adding the +3.5% levy for 2022/2023 ?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: You say "Aucklanders want greater action on climate change" and you propose to spend an additional 150 mnz\$ on this. How many Aucklanders have requested this ? What do you plan to spend it on apart from a few buses ? Do you really think that buying some battery buses or hydrogen buses for that matter will make one iota of difference as to how our climate will change as we go forward ? To anyone who has studied the actual science around climate change and not the activist hysteria/religion

Get some factual advice on this issue before you become just another virtue signalling outfit who thinks that they have to conform to the left wing B.S. Take advantage of my advice and you have already saved 150 mill.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Live within your means, like I have to.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Many Aucklanders have been hugely affected by Covid19. Many have not recovered from job losses and using their savings. Raising the rates even further when would mean making it even more difficult for low income families. Many have also struggle getting their first home in Auckland, and now the Council is making it more difficult for everyone paying a huge mortgage. Not everyone in Auckland is rich, as the Council seems to think.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: There are more important issues, such as sorting out the water problem by building more reservoirs, and keep providing essential services, mostly for those in need. If buses are neither old nor broken, this is a luxury. In fact, we need more public transport, not keep replacing what is still in working order.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: There's money to keep improving these without resourcing to punish those who just bought a home by increasing their rates. A better reallocation of resources, such as reducing the council's bureaucracy would be a better solution.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I use many community facilities in several Auckland suburbs. While essential maintenance is good, there's nothing wrong with the facilities. I'd say invest money in people rather than things. There are wonderful librarians and community workers who are volunteering on many amazing projects that the council is not even interested to fund. It is sad that the Council is more interested in things than people.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: It is a shame that the council makes people pay for basic services, such as public transport, reaching their areas when other suburbs have many services.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

1. Use pre constructed housing (like flatpack houses. They were even brought out on immigrant ships of the 1800's. See cargo of the "Palmyra" immigrant ship which landed in 1856 in Dunedin!) It is much quicker and can produce quality builds.

2. I understand from Parks and Reserves dept that it is impossible to carry out the Regional Pest Management Plan which was published 6 November 2020 because there is not the money, and the only concern is moth plant. Also not the money for replanting with natives.

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: What guarantees do we have that after the initial rate increase of 5%, the remaining years would bear an increase of 3.5%? It's easy to say it now, but who knows what the future will bring? Are you willing to guarantee the rates increases shown, with no proviso? I'm also puzzled as to where we, as ratepayers, are magically supposed to find these increases from.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I have a water tank and am beyond angry that I already have to pay almost \$60 per month to Watercare. We do not have a bottomless pit of money to keep drawing from.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: It seems to me that local government should be run as a real business. Get quotes, make sure quality work is done - make people accountable and stop expecting the ratepayer to pick up the tab when the costs blow out.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I wonder why all this was not put in place long ago.

What is it with NZ councils - always playing catch-up. Don't you have planning committees?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Work within your existing budget - be frugal.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why The answer to everything seems to be "put the rates up". Not good enough. We have to work to a budget, so should you. If it over-runs, find out where and why and let them pay.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I am sick of the increased house building on Whangaparaoa Peninsula. In the 15+ years I've lived here the traffic has increased beyond belief. Stop building any more houses until we have Penlink.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council mergers should have reduced operating costs and rates. I would also like to see a review of the rates structure including a fairer portion of charging to cross-leased properties based on individual value. Full site single dwelling properties have an unfair contribution. Another alternative may be based on the number of people residing, or number of bedrooms perhaps.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Support, but could be deferred.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: More catchment of cleaner water preferred (e.g. Hunua) as opposed to cleaning more Waikato water polluted outside of Auckland.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community facilities is a core council function and owning the assets allows more control and quality at a known price. Outsourcing/leasing can be more expensive in the long run.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Re Vector - Vector spends \$0 on undergrounding power on the North Shore. They should distribute their undergrounding budget equally across their network which will improve resilience across all of Auckland.

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

Tell us why: If all charged, will encourage more usage.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Independent Review of Rates structure for fairer distribution of rates to households

Cutback on roading/infrastructure work where possible - e.g. road resurfacing

Vector to resume undergrounding overhead power in all areas

Noise Pollution/Air Safety - increasing number of small helicopters and planes over urban areas - consider moving Rosedale - ----- Heliport to Dairy Flat Airfield for increased safety and noise pollution reduction. Ban on all single engined aircraft/helicopters over an urban area so must be twin engined and/or better defined air corridors

Traffic Management - consider traffic light control (as is done overseas) to achieve better flow of traffic and reduce emissions on major urban routes outside of peak traffic e.g. "No Stop Speed to XXXXXXX intersection 50kph" and time the lights to achieve. Would also increase road safety as would reduce speeding.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Can't put off upkeep of assets eg pipes.

Should be ongoing work. I'm sure hydro dams are repaired as necessary and not waiting for a break. Same as power lines have a certain life.

I am concerned about rising sea water levels and property that one day will be washed away. The property owners need to know their flood plain levels and these put on the LIM reports. This would price in those properties future losses.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: See my answer above.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: I believe in Council owning capital assets. In the lounge term it costs more to lease.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I am hot on the rising sea water levels and effect on properties.

Local traffic is heavy. Eg Frowns Bay Rd. Apollo drive is so narrow. Why was it not double laned?

Important privacy information

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland Council has allowed over population by allowing multi storied apartments to flood our suburbs putting strain on all infrastructure. Ten years from now our rates not including water will be so expensive that we will be rated out of our homes. Every time there is a rates review it would seem that the public submissions are not considered and rate increase anyway. Council needs to curve the spending for a while and concentrate on the absolute necessities.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Its great to have a nice place to live but we have to be able to afford to live here to enjoy it. Council needs to curve the spending for a while and concentrate on the absolute necessities.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: How accurate are the projected numbers. My concern is budget blow outs then we have to pick up the tab.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council needs to curve the spending for a while and concentrate on the absolute necessities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I cant imagine there would be that much demand. Extend park and ride car parks so they can drive to meet the bus.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Auckland Council has allowed over population by allowing multi storied apartments to flood our suburbs putting strain on all infrastructure. Maybe the council should consider roads BEFORE developing huge new suburbs. Perhaps developers should pay more towards feeder roads.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. 10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Unexpected events such as Covid-19 impacts all of us and the projected \$1 billion impact on Auckland Council translates to the \$x impact on just about every other person's finances. None of us individuals plan to spend more when a significant hole is identified in our income so how is it that Auckland Council not only want to spend more but also expect every other person impacted by the same event to pay more for Auckland Council's extravagance in times like this?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: If I could trust Auckland Council to accurately not reflect any other response than "do not support" as a supportive response, I would have marked "other" based on: While the Jury is still out on climate change, we do have a responsibility and therefore "do nothing" is not an option however, increasing spend on this area under the current circumstances is also not an option so please ensure my response on this question counts towards anything but "support the proposed increased investment"

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Three years in you have delivered nothing in this space and already want to increase spend. How about you show some results and return on investment before you ask for more money?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Many community facilities are poorly used and cost a fortune to maintain, yet the Council can afford to spend obscene amounts of money on fireworks as an example. The principle is simple, if one cannot afford to maintain

your car, you downgrade or sell and use public transport. Sell the facilities to private sector and they can charge market rates to those who actually use it allowing for proper maintenance which is not done by the Council

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Is there an area you are not trying to squeeze more money from?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: How about you invest in more cycle lanes to no one uses instead?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Most of the priorities are either targeted at minorities e.g. cyclists or so high-level that it obviously sounds great but has little substance

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The Council needs to start running like a business with proper financial responsibility and accountability in the interest of all it's residents.

Important privacy information

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council rates at 5% and even 3.5% are outstripping inflation and wage increases. People can't afford these annual increases. Also there should be a separate Tarrif on the number of adults in each property ...why are single people living in a house rated the same as a working couple in a house next door? Where is the fairness?

I am paying nearly \$100 a week in rates just to live in my own house and I live over 40km from the centre of Auckland and I'm retired

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We can't afford it..ratepayers can't afford it.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

Tell us why: Decrease all council worker's wages especially top people first then I'll be more supportive

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Control council members wages and let them pay for it

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Unnecessary service. Expand the SH 1 from Oteha to Silverdale is more important.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Sort out HBC's traffic problems. Too many houses build but no improvement or amending for better road system

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Better transport and road system

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You need to slash the wastage first, including hundreds of people on six-figure salaries.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Although this is important, this should be funded through cuts to non-essential spending and wastage.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Increase water bills as the more you use the more you pay. This would encourage people to save water. Putting this on rates would give people no incentive to save water, and probably use more to 'get their money's worth'.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Reducing wastage in the council, which could comfortably operate with 30% less revenue if people did their jobs effectively and people were paid a reasonable salary. Cut back on the ridiculous amounts of money paid to consultants.

It would also help if you actually listened to feedback, as the last one you did people opposed any rate rise but you ignored this and did what you wanted. I have very little faith that anyone will read this and if they do they will just ignore it.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support the increase in rates to further the needed changes in the supercity but do not support how they intent to allocate.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: I would like to see where these projects are proposed. There seems to lots South of the bridge and not a lot North. Check out the Glenvar Road roundabout

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why: Again this is all South of the bridge

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Living out of the city is a choice, should these areas become fully builtup then that is different

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing - there needs to be more control on the number of houses that can be built on a property. The complexes which are being built are causing local infrastructure to be overused. It's shouldn't be about how many houses a developer can build to make money and the council get rates etc. There is plenty of land outside the city going North, this should be used rather than ruining neighbour hoods. The roading and infrastructure in the Bay is under pressure and yet you let more multi property complexes be built. There is room for apartments in the right area. Not 6-8 townhouses on a site where one house has been moved off, just because they fit and some developer was allowed to bypass the rules.

Also if we could get our walkways mowed on a regular basis that would be great. Except someone gave the contract to an Australia company.

That council prove itself to be fiscally responsible, only paying for necessary services and not changing more, delivering less, and spending money on wasteful items or accepting quotes for contractors that are higher than a commercial enterprise would accept.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: You're asking for opinion on the entire proposed budget, which is likely to contain both worthwhile and unnecessary spend. Why not ask people to vote on individual line items?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I think the climate change agenda is more ideological, than a serious and imminent threat. Auckland contributes a minuscule fraction of worldwide emissions, so any "investment" essentially delivers zero real return for ratepayers. It is NOT the council's job to support climate change initiatives, with ratepayer money.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Generally support any measures to keep our local environment clean and healthy, but every line item needs to stand up to scrutiny on its own merits.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: In general, this seems like an efficient use of resources.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I support the Ōrewa Beach Esplanade Enhancement Project.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I support aggressive cost cutting and focusing only on core council services i.e. rubbish, water, environment, parks, libraries and community centres (if well used).

I do NOT support the council spending ratepayer money on vanity, virtue signalling, ideological or many cultural projects. I strongly object to ratepayer money being spent to support projects like the Pride Parade, that "celebrate" the lifestyle choices of a tiny proportion of the community, and which are highly divisive.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Will make rates too high. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Waste of money/rates

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Waste of money/rates

4. Community investment

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Ratepayers don't need additional rates imposed on them. Council needs to eliminate all wastage and stop unnecessary and frivolous expenditure.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Ratepayers do not have endless money.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates must not be increased when ratepayers are struggling in an economic crisis. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: New Zealand is not a contributor country to climate change.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: You use climate change to increase the water rates.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The current Auckland Council is unable to invest rationally.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Targeting rate payers to support frivolous and insignificant projects is criminally negligent. Council should focus on reducing internal costs, restructuring to maximize efficiency and holding both themselves and staff to account for every penny taken from hard working Aucklanders

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Investing in infrastructure now will help Auckland recover from the short term effects of the Covid pandemic

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This should be the planet's number one priority, Auckland is no exception

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Targeting rate payers to support frivolous and insignificant projects is criminally negligent. Council should focus on reducing internal costs, restructuring to maximize efficiency and holding both themselves and staff to account for every penny taken from hard working Aucklanders. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Targeting rate payers to support frivolous and insignificant projects is criminally negligent. Council should focus on reducing internal costs, restructuring to maximize efficiency and holding both themselves and staff to account for every penny taken from hard working Aucklanders

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Why should properties and especially business owners that may not utilize or benefit from this service have to pay for it in this way?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why Where is penlink on the list? Is it included? If not, i do not approve

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Infrastructure- roads- Whangaparaoa peninsula needs more than one way in and out for daily traffic, accidents and disasters with the growing population.

Housing needs to be limited to what the existing infrastructure can handle! Wgp peninsula

Housing-everyone needs a break! Mortgages are ridiculous. We barely have money left after paying bills but because we live in Whangaparaoa it is assumed we have enough to sort it ourselves. Very few govt initiatives in our area for us.

Education- teachers in Auckland area need a subsidy as the prices are higher here as in a few other cities in NZ. Teachers get paid the same rate in tiny towns and have homes paid off and pay less for living than we do. Most countries accommodate this in different cities/states. We need to get with the times.

Gangs/hard drugs. Go hard on these

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Poor planning and project cost considerations for council projects has put you in this situation not the ratepayers. How about holding your management to account on spending, cut back projects and consolidate the cco's. There are too many silos and not enough collaboration and many council contractors over charge and under perform.

You need to rebuild trust with the ratepayers not penalise us for your mistakes and poor performance. Run a business not a hug factory.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Fund it from within,

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Although this problem has arisen by poor management by council I support this as a core infrastructure upgrade is needed.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Sell your assets, there are many empty and under-utilised buildings. You've closed many community services so make good on your promises.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The Auckland city council is so mismanaged there should be an external investigation. No money has gone into Auckland infrastructure and between that and watercare and the extra tax on petrol should be ashamed to ask for more money

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Auckland had major issues homeless poverty. Both the council and the government need to acknowledge this is more important than a tiny country in the middle of nowhere trying to say wow this will make a huge difference

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Do the job you have been paid to do for the last 30 years

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Priorities homeless poverty. Not the time. Look at New Lynn. Disgrace Penisville

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Shift your focus. A C C are so greedy and so mismanaged if they worked for me I would fire them

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Just greedy

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Not the priorities we need at the moment. Homelessness poverty and you want to increase when so many have lost jobs had to change careers insane

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I have made myself perfectly clear. Homeless poverty. People have had to change careers. Sort out your priorities

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

look inward at council costs especially for headcount and salaries that are excessive. Super city was supposed to save us Aucklanders not end up ballooning in both people and costs!!!!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Why not get Victor to be responsible for trimming any trees around their lines. Council could give them a set of guidelines to work to.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I think this is a question for the people in the area who are going to pay not for us and greater Auckland to decide on their behalf.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I think a greater priority needs to be given to global warming reduction initiatives and environmental issues. 288,000 doesn't seem very much when our world is almost at crisis point with our carbon footprint and Waste. Why do we need \$1 million for governance?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I agree with the housing and growth infrastructure plan

Important privacy information

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I can't afford an increase in rates. I can barely scrape enough together to pay the current rates. Drop the big redevelopment projects and concentrate on maintaining the basic infrastructure making it safer for people living in the area. Put investment on projects to attract tourist income on the back burner, we can't afford them.

Also, why are Vector still using overhead power lines in urban areas? It's like something out of the 1940s. In more affluent times they should have been putting these services underground which would have avoided the tree issue we have today.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: It will only be used by a small number of people. The cost is too high per user.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I want the council to scale back the rates going to redevelopment in areas like downtown Auckland and the wharf area. It's too expensive and it benefits only a minority of people who live in the council catchment area. Auckland has an over inflated perception of its value as a tourist destination. Pre COVID, visitors flew into Auckland to travel elsewhere in the country where is it cleaner, greener and safer. They don't want to hang around the CBD or visit Auckland's polluted beaches. In 2021 we still can't allow our children to swim at our local beaches after it has rained because of the sewage

overflow, yet the council still has deep pockets for vanity projects. We are paying high rates for third world water services and quality. Take care of the basics, instead of wasting money on things like a taxi service to a little used ferry from wealthy Stanley Point to the city. Chris Darby should be ashamed of himself for defending this. People are hurting financially. The city may be in a housing bubble of rising property values, but we have less j pan our pockets and are finding it difficult to pay our bills and rates are a big part of our outgoings. I support the local Bays board who do a good job but I do not support the mayor and his cronies and the ridiculous waste and mismanagement of funds. The Auckland super city has not been good for the north shore.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Cost savings should be made as most Aucklanders have had to do due to COVID. Reduce spending on non-core areas such as free movies in parks. Hi

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is totally unacceptable.

Reduce costs.

Reduce "nice to have" spending.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Do not replace diesel buses sooner, just replace as needed

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Cost savings across the council should be made rather than increases the rates burden

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Multi-use facilities are a good approach

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Why remove late fees on library books? Keep it.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: User pays should be the model - have a special fare for that service so that users of the service pay, not those who happen to live nearby

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why I support the community groups but the others I am not that supportive of, especially the Orewa esplanade changes

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I support option 2, no changes to funding

Important privacy information

Tell us why: Focuses on the wrong issues

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is real, but its not human induced, the whole C emissions argument is fundamentally flawed. Ask any credible scientist!

You have been captured by the Left!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Please rethink the whole potable water strategy and make it (water supply and waste reticulation a council lead issue)

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: as above

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Yes, get real about the need to properly control council costs

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Fix the bloated bureaucracy first

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why wrong focus

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Infrastructure = roads and sewerage treatment and disposal etc.

fix those things,

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: People are already struggling to pay their bills and it will be hard to justify increasing the rates for maintaining parks etc.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: People are already struggling to pay their bills due to the impact of Covid

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I don't believe that it's a good idea to close libraries, hall and community centres.

For a lot of people it's a place to meet, get out of isolation, a little 'outing' and if you go down on numbers of facilities, it might be hard for the more vulnerable people to get to the other facilities.

When it's no longer walking distance, older people might not be able to get to them.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support

Do you have any comments on any of our proposed changes to rates and fees charges?

we already pay enough money on our electricity bill that we shouldn't be paying rates for improving the network as well!

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: It's a lot of money, but I don't believe that houses that just happen to fall within the distance of a proposed bus stop have to pay for it all. They did not get to decide that the bus stop would go there so I believe that the wider community should all pay for it together.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why I think there should be other priorities

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Make Gulf Harbour more attractive for businesses. There are only 2 convenient stores and a handful of restaurants.

GH has so much more potential.

The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I largely support the focus on climate change and environmental impact mitigation as this should be the primary concern for all governmental budgets at this crucial point in national decision making now and going forward. The value of an equitable response with fair representation of those most disproportionately affected at the decision making table cannot be undervalued if we want effective, meaningful and efficient impact mitigation and waste management strategies.

The impacts of COVID-19 have disproportionately impacted some groups of already disenfranchised and marginalised communities. Rates should be proportionate to income (and particularly raised for those who have profited significantly from the pandemic) and definitely should not have the potential to further social inequity for low-income households and for those who are barely getting by. Likewise any investments made around Auckland should focus first on lifting up those communities most affected by climate change, marine plastic pollution, and degraded ecosystems. This likely means low-income communities, Māori and Pacific Island communities, and those who rely on subsistence lifestyles. There is also much overlap in each of these areas.

There also seems to be a significant lack of understanding in policy of the science around waste management practice in Auckland. As the most wasteful country in the developed world, we urgently need to focus more on this area. More research needs to be done (funded) particularly in relation to plastic pollution and it's associated social inequities - both as 80% of ocean plastic comes from land-based sources (which must be addressed) and because of the alarming potential health risks that plastics and microplastics pose for public health and ecosystem survivability. The council needs to be fully invested in better waste management strategies and infrastructure that not only better addresses consumer waste but effectively and decisively regulates corporate pollution, especially from the petrochemical industry and their invasion of Indigenous land and ocean territories, their lack of product stewardship over their products and inconsideration for the environmental costs of the plastics they produce, and of course the massive carbon emissions they produce through oil drilling and plastic manufacturing and distribution. This is relevant both in Auckland and nationally and as a large and influential authority in NZ, the Auckland council is well placed to lead in this area, if done correctly and appropriately.

To reiterate: focus needs to be on addressing inequity, climate change, environmental degradation, corporate regulation and movement towards a circular economy.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: It has to be done with an equitable approach

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Only spend our money on the core business of council, e.g. water/sewerage maintenance and upgrade, libraries, roading, parks/reserves, etc. Council organisations involved with funding and promoting events, tourism and similar such organisations, should be disbanded. Such things should be undertaken by the private sector and they should take the risk and reward, not council and ratepayers. For such events most, if not all, benefits go to local

businesses. Therefore they should be the ones to undertake the events. All water and wastewater should be under direct control of council and not run as a private sector that has to give a return to council.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Leave it to central government and forestry companies to plant any additional trees, not the ratepayers. Also increase the number of ferries and routes to make this mode of transport more available by transporting larger groups.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Bring water under direct control of council. As a priority urgently identify and repair the huge number of leaks within the network. Watercare lost more water through their piping network during the recent savings than all the savings made by the ratepayers. That is a disgrace.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support community facilities in principle, pools, leisure centres, hall's etc but not art centres and the like as these should funded by the private sector. Also do not support closing any facility unless there is not the patronage for

that particular facility. Arts and crafts, etc tuition can still be undertaken in community hall's. These hall's can also be hired out to the private sector to help with cost of upkeep.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Vector installed overhead lines in areas where there are trees. Therefore they should meet the cost of tree management around their lines, not ratepayers.

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I support core business of the council, e.g. roading, water, libraries and community facilities only. Do not support things like council funding events, planting trees, etc.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Stick to spending on core items like roading and infrastructure. Developers should be responsible for providing all new infrastructure within their developments and council should be responsible for ensure their network is capable of accommodating any new and future development.

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There is enormous wastage in the Council expenses. An enormous bureaucracy and very poor productivity. There is capacity for savings and reinvesting. The budget proposal is, in fact, an obscene waste of rate payers money.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: In theory it is good and essential but, again, there is enormous wastage with bureaucratic expenditure. It can be a lot more efficient and cheaper if done properly.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Trim the bureaucracy and avoid endless committees and cronyism

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: It is a more efficient approach. The measure of costs proposed is incorrect as the approach proposed will cost less, therefore reducing, not increasing, the budget.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Trim bureaucracy and wastage with personnel. The Council workforce is over inflated and overpaid in comparison with the private sector.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I would like to see the initial target being on efficiency rather than rates increase, then move on to using the available money from savings on the necessary projects. The rates increase policy is the equivalent of drug habituation without solving the dependence issue.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why There isn't enough focus on actual environmental protection and quality of life investment. Walkways are nice but the beaches and reserves have to be protected and maintained first

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

There is too much residential development without consideration for the environment and no infrastructure. Houses and apartments without parking facilities leading to clogged streets. There will be serious water waste issues. Probably flooding and contamination with multiple dwellings built in small sections. Auckland is becoming an ugly city.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Aging infrastructure will only become more expensive if not updated now. There is a need to keep the city growing and up to date.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It is a disgrace that we have beaches and waterways in Auckland that are unsafe for our population to use. There are some areas that are permanently unsafe and others that cannot be used after a period of rain - for example Orewa Beach. This must be addressed urgently.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Many groups are already sharing premises to help share the cost "load" - for example Surf Life Saving club rooms are being shared by the community for other events. Consolidating community facilities will mean greater use of premises, sale of under utilised buildings and lower the burden on the tax payer.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

nil

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Having a bus service will enhance the add value to the area, which property owners will benefit from. It will enable an easier commute via public transport, and hopefully lower the amount of traffic in the area.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why There have been changes on the Hibiscus Coast that I believe are not warranted - ie: removal of the water feature on the foreshore, that children loved to play in followed by installation of an expensive sculpture. In addition, "enhancement" of the Main Road through Orewa has made the area very dangerous for pedestrians. I do not support this type of initiative and feel is it a massive and inexcusable waste of tax payers funds.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The waterways must be clean and safe - the Orewa estuary has become silty as a result of the Millwater development, seemingly without any recourse on developers to work safely and cleanly. The council has commissioned reports on the damage being done (undoubtedly at huge expense), however there has been zero action as a result. The run-off

continues and the ecosystem is being further damaged every time it rains. This is devesting the ecosystem and changing the waterway potentially forever.

In addition, the waste water systems are completely inadequate, leading to pollution at our beaches, making the water unsafe to swim after a period of rain - how this can be allowed to continue? I say again - why do we have a statue on the foreshore of Orewa Beach when you often cannot even swim at the beach - who decided this was a good way to spend tax payer's money?

As the area is allowed to grow, the motorways have become heavily congested. They are insufficient and for the size of population and with each passing day, both North and South bound are moving closer to gridlock. Housing development is being allowed to continue with little regard to how the region will cope with the huge knock on effect this has on roading.

The local Surf Life Saving club rooms are inadequate to cater for a community that swells with visitors and holiday makers over long weekends and holiday periods. This is potentially a life threatening problem.

There are many "nice to haves", however, I believe the above are some of the "must haves" in a community of our size. It's time to take accountability for the ongoing damage being caused to the precious ecosystems and waterways, have a zero tolerance for water pollution, inadequate waste water systems, and life saving measures. Then and only then, should we be making beautification a priority.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: 10 Year Budget needs to include reference to a much longer vision for the City of Auckland. In terms of infrastructure development in particular, 10 years is far too short a timeframe. Without frequent reference to a longer term view, inappropriate "make do and mend" spending in the coming decade will leave us no further ahead in 10 years.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Global moves away from fossil fuels, for example, are encouraging. Strategies on waste, for example, need to be far more innovative and proactive.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Liveable Spaces mean everything for a vibrant city. Parks & open spaces in particular must exist side by side with intensive housing development

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Charging residential rates to farms & lifestyle properties in the urban rating area needs to be designed and applied with a lot of common sense. Lifestyle properties no problem, but for productive farm operations in the urban area, there may be some community benefit in having them there. Perhaps a long term transition to urban rates would be appropriate for these properties.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: A different funding method for marginal routes encourages wastage.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Don't just play catch up. Plan far ahead so that infrastructure is easily expandable to accommodate population growth.

In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Given the current markets and investment environment leveraging debt now will pay off dividends later. We also see parts of the system straining due to overuse so investment in some areas is sorely needed.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Our waterways are a big draw to the area and the quality of life. The ability to live in a city yet swim at a local beach is amazing.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Outsourcing rarely ends well and adds risk for our future options. Doing targeted investment does make sense, but in general keeping facilities owned and operated allow more flexibility in the future to respond to changes in needs.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why I didn't see any stretch goals in the plan, what cool new things can we do/offer?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: A one-off 5 % general rates increase is unacceptable at a time when a significant number of households continue to remain on a reduced income through work due to Covid-19. There is also continued uncertainty of future lockdowns that will impact household income throughout 2021 and possibly into 2022.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Although I agree with the proposals why not spend less money and stick to the original timeframe for this rather than insist on using money to initiate this faster. That way you could potentially avoid increasing rates in 2021/22.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Once again, why should we look to increase spend in speeding up projects when the uncertainty of Covid and the potential financial impact (both locally and globally) means we should be focusing on consolidating spend as opposed to increasing spending at this time especially when the funds need to come from individuals that have had household incomes affected.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: What is the likelihood of this service being taken up by a number of residents and making it worthwhile? Although an advocate for public transport more needs to be done to get people using current services than starting up new services that need support funding.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why There needs to be more focus on greater Auckland than smaller initiatives in each area. Auckland has some major problems such as water, housing, local transport, the Auckland bridge problems, and by collectively putting spend together we can tackle the bigger issues.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Hydrogen buses will pay for themselves through lower running costs and therefore there is only the initial outlay.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Maintenance of physical assets should already be incorporated in the budgets.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I believe there could be a more detailed look at where to get revenue from rather than increasing rates. High paid senior government employee salaries and bonuses perhaps?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The idea of consolidating community facilities sounds like a nice way of depriving the community of facilities they need, for example closing libraries and halls would mean people would have to travel further to reach the services they need which would exclude some people from using them and make it more difficult for others. It would increase vehicle usage to get from place to place which would be counter productive for the climate change issue, particularly given the appalling public transport options in New Zealand, particularly outside of major CBDs.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I think it should have a much more substantial emphasis on targeted measures to reduce climate change emissions such as increasing public transport coverage and usage, massively improving the cycling and walking infrastructure, and increasing disincentives for car use.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support increased investment, but I think it needs to be substantially more and faster than what is outlined in your proposal.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Improving water quality is vital for making Auckland a liveable city and for restoring balance to the natural world around us. Furthermore, we all need New Zealand's agriculture sector to make substantial changes to its polluting ways, but unless we are doing the same we cannot expect them to.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Councilors are paid extravagant salaries and yet they're useless. Why do we pay them so much only for them to turn around to hire even more expensive 'consultants' who charge us an arm and leg only to be told that their advice is faulty too? If anything, there should be a DRASTIC decrease in salary for all councilors and consultants.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: No point investing in buses when no one takes them. The infrastructure is poor so no point throwing more good money after bad.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

Hibiscus and Bays Local Board

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Should spend less. Also the 5% is not one-off, as all future rates will be 1.5% higher than otherwise, and it is willfully misleading to ignore that.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: With current and pending carbon ETS values, these changes are wasteful and inefficient (bad value for money)

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: A recovery budget should not fund improvements, just preserve current WQ levels (if possible/practical)

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Leasing and shared facilities often cost more in the long run. also, the local communities already funded local assets, and should not have them taken away. also new/bigger assets should be funded by growth (development contributions) not existing ratepayers

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Vector ENRTR should be tied to the costs they impose when they install new lines. Presumably most of the trees were added afterwards, and should be funded by council (or removed). Also new trees in new areas should be funded by development contributions (or don't plant them).

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: there should instead be a general council policy about funding all "core"/standard bus services, and one about funding all "extra" services that meet certain criteria. also, some people outside the targeted area will still use and/or benefit from it to some extent, but should have less say over it.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why Local boards actually blur the decisions about local spends/actions/service levels, because most of what happens locally is from centralised spends. then it becomes a pork barrel with "advocacy" rather than equitable priorities.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

less money on faith (ideology) based green and smart city projects with unquantified benefits.

Important privacy information

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You tax us because of the government forced lockdown that was too extreme! No, you stuffed up, we shouldn't have to pay, we are already taxed enough.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: You did not provide enough detail. The devil is in the detail.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Because your lease will be at the whim of landlords.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Considering we still have to pay for garbage collection tags, which in other countries is covered by rates, I'd say your rates are too high. We have crappy footpaths, poorly designed driveways and roads works that never cease.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Should be a uses pays system, not proximity to a bus stop.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Not just more housing, but better designed a housing developments.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

Tell us why Where do i find these initiatives ?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I support the building of thoughtful affordable housing - not just chucking up poorly designed and constructed houses because they are 'affordable'. The building of expensive housing and apartments in areas that are now zoned for more housing does not help those who want to live in the areas they are brought up in.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need infrastructure to grow,like the Harbour bridge,well past its use by date.

Underground infrastructure that everyone uses but no one sees,this is more important than cycle lanes that most people are to scared to use.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I support the need for green technology, but can we afford it.

I think we should use smaller buses, maybe hybrid.

Most busses seem to be half full, so large they cause a lot of damage to roads and roundabouts, not right for new subdivisions.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: We can't fix all the problems at once, fix existing infrastructure first, if intensive development is happening in an older area levy the developers, or refuse development until infrastructure is up to a standard.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: We need to do this a different way, when an apartment or a mall is built, as part of resource consent

Have public/private assets included like library's, day care, public gyms.

The council will hire staff, run asset, pay body corporate fees but will not foot whole maintenance bill.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Lucas heights and paremoreemo roads are difficult, I drive to paremoreemo frequently and sharing that rd with big buses is a scary prospect.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I support the intent, it's the implementation that's a problem.

Like putting a cycle lane on Browns Bay hill, making it more dangerous.

I wouldn't cycle up that hill if you paid me, I go along Beach rd with no cycle lane.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing and growth are important but you have to fix what's under the ground first.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: necessary to keep up with and improve Auckland's infrastructure

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Required for climate change reasons

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: They will have to do what they can within the existing budget

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Leasing and sharing facilities makes sense

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Do not support rates paying for CBD investment or the Rodney Drainage rate

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Support option 1

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to negate the negative affects that Covid-19 has caused to the economy as soon as possible.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It makes sense to gradually replace diesel powered buses with electric and hydrogen powered buses asap.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Stick with the initial planning and review again in 2028

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Makes sense

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Do not for a minute believe this statement: "The increases would return to 3.5 per cent each year thereafter." You'll find a way to penalise us for your shortcomings and poor decision-making.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why: Regardless of which type of energy your buses run on, you've been negligent in attracting Aucklanders to use the bus system in the first place. How are people expected to park at stations when you don't have the foresight to build multi-storey car parks. Sort the parks, get more people using public transport then go to hydrogen and electric. Less people driving will help with climate change.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why: I support improving water quality but there's far more people who would benefit from improved roading and transport first, not to mention a second harbour crossing.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I would support amalgamation in the correct environments. These services are essential, especially for elderly and they are a good resource for people to stay connected.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Albany station needs addressing first. I'd be pissed if I was charged extra money for a service I'd never use. People are spreading out more and choosing to live and work on the North Shore and you want to charge them for something only a small number of people would use.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why I don't trust you'll do what you say. End of.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Place a limit on consenting new commercial builds when there are so many empty premises already around the place. Work with commercial owners to incentivise them to get those empty buildings occupied.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Spending money to reduce climate change is not a responsible way to spend money. Rates and taxes are too high as it is.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We don't need more empty buses that cost tax payers money to greatly subsidise their inefficiency, more roads (more lanes/wider motorways) would better reduce congestion. (Less congestion would reduce fuel burn and improve climate impact) Increased speed limits would help reduce traffic. Allowing motorbikes into "bus only" lanes and expressways would save lives.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: So long as the "targeted rate" is only imposed on those in the immediate "targeted" area.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: "This will reduce our carbon footprint" = nonsense. Just because the "landlord" carries the can for the so called carbon footprint doesn't mean the carbon foot print of the council related activity doesn't exist. It's always cheaper to own the asset you use than to rent it. Selling capital to rent in the future only looks good on the books the year you sell the investment.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Stop sinking money into buses that can't support themselves financially. If they need a subsidy they aren't viable. Tax payers and rate payers are sick of paying for empty buses in empty bus lanes.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

Yes

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Please build Penlink, upgrade the water systems and improve traffic flow through Silverdale through to Auckland City by adding more lanes onto the existing motorway network.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: First I would like to see a reduction in council staff, and a reduction in the wage bill. All savings possible should happen, the council needs to be more efficient and must return to providing core services only. Until it has full and proper financial control.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Because the buses are running empty most of the time.ik

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Because we can not afford this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I think it is better value to maintain our existing facilities than build new ones. Because of increased high density housing it is really important we have a many parks as possible for families to enjoy in place of the gardens we used to have.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Don't know

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are already too high and costly.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Already too costly, I do not earn enough money to support this.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Already too costly, I do not earn enough money to support this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Money was already allocated for this and the cost is too high.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do NOT support "changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines".

I do NOT support increased rates or charges of ANY kind.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: I do not support increases in charges of ANY kind.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why I have low income. It is already difficult living in Auckland with such high expenses, I have no spare money for any of this.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

SAVING MONEY AT ALL AREAS. Do NOT charge me more money for this stuff!!!

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Less fossil fuels more electric it's cheaper. More native trees too

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Multipurpose facilities yes. Some of these building really require too much maintenance cost too great. Just get rid of them like what has happened to marae and urupa across Aotearoa!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Stop paying yourselves and you will have plenty of money to go around

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is NATURAL

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Stop pouring waste water into the sea

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Council own too many properties

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Generally councils need to tighten their belts-just like everyone else

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Tighten your belt

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Do not increase rates please.

Covid 19 is NOT a dangerous disease based on the well-established survival rates of in excess of 99%. END the lockdowns.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is a hoax. Global temperatures are not rising and the high-tide mark has not moved. Stop wasting money on these political scams which are not backed by science and are NOT an "Existential threat".

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: A new bus service (long overdue!) benefits mainly people visiting the prison population, often a (very) low income group of people. Having local residents pay for a service that has limited benefits for them doesn't make sense. This extra bus route benefits anybody with a family member / friend in Paremoremo prison, and as such should be paid for from 'general' transport funds.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

Auckland Council funds should go to maintaining and in some areas expanding infrastructure. Core activities are water, transport, electricity, waste management, sports, recreation & libraries.

Auckland Council should NOT be in the business of organising events / maintaining theatres etc. -> the public/private sector is perfectly capable of doing that.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?
