10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Organisation (if applicable):

Your local board: Orakei

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Increasing rates will kill economic activity. We all know that. A much better approach would be for the council to get its' house in order. Reduce headcount, cut waste and become focused and effective. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We have heard it all before but nothing will change. But our money will still be spent.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Auckland Council needs to focus on how it can cut the cost of building and maintaining infrastructure first. And manage projects professionally. Otherwise it will just be another big blowout.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: It's only doing the obvious. Why has it taken so long for the council to realise all facilities need to be run as a cost centre (with publicly available accounts!). And they require revenue to pay for them. Private organisations run ring around the council in providing community services.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Let Vector cut the trees themselves and cover the cost. Don't just tax them!!

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Make the service attractive enough so people will use it if it works for them. Not every catches a bus to central Auckland for work

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Just money wasters as we have seen in the past.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Just more red tape and costs

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This seems like divestment from community facilities by stealth.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Constant rates rises hurt everyday citizens of Auckland. Salaries are NOT rising at all, so where does the council expect us to find more money to cover rates? Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is grossly unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: There are plenty of places that Auckland council could save to reinvest in better/greener transport options. I support the improvement of public transport to greener options, but do not agree that a rates rise is the only way to fund this.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Auckland Council cannot expect rate payers to continue to stump up extra cash to fund projects!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Consolidation of facilities is a better idea than increasing rates to fund more facilities that are not used by many rate payers

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are continually rising and it's the biggest single amount coming out of my sole household income. A 5% rise is significant for me.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Let the diesel buses come to the end of their productive life and replace them then. It's not going to make a huge actual difference to replace them sooner but monetarily it's a difficult time.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Give Aucklanders a bit of breathing space with rate rises...increasing the targeted rate annually can wait.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community facilities are hugely important for people's wellbeing and need to be maintained.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The tree management programme is vital

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Access to public transport shouldn't be a negative - and I don't use the bus so why should I pay extra

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Quite a different area with different needs

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The Council do not inspire confidence, and do not seem to grasp the concept of austerity in times of financial difficulty. When times are hard, expenditure should be cut to that which is absolutely essential and demonstrably of benefit. We are not in urgent need of things like "placemaking", for example. Every item of expenditure should be measured against a criterion of "will there be very bad consequences if we do not do this immediately?"

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Auckland contributes only a trivial amount to worldwide climate change. Moreover, even if our contribution could be limited to 10% of what it is now (an unlikely possibility) that would have almost no impact whatsoever on the planet. The measures cannot be regarded as urgent in times of austerity.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Again, this is not urgent. It is a vague proposal, and the impact of COVID may already affect water quality in some areas as a result of changes in work and recreation patterns. Most of this can wait.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Assuming that this is a "stitch in time" policy (it becomes increasingly hard to trust Council claims as the years go by) then it makes sense to spend a small amount now rather than a large amount later.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: \$238 is iniquitous if it means that a person located 501m away pays nothing when their neighbour pays such a substantial amount. Surely it's not beyond simple arithmetic to propose a graded rate varying according to distance?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Little of what's being proposed can truly be classed as "urgent" - rather they are pet projects of certain individuals or groups. I have seen no bottom-up support for a rush to "placemaking" despite this being a fundamental element in the concept. Most of the changes can wait until the economy improves.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why Why not?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: While I would prefer to see ALL Aucklanders paying and not just rate payers it is imperative that we invest today for our future. It will only become more expensive if we delay.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to be proactive

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: All Aucklanders need to contribute to water quality and not just ratepayers. How can our existing water rates be used more effectively?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: As long as we make sure the costs to use these facilities remains accessible to the larger community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: There is too much fat in the Council that needs to be cut before thinking about other projects. The Council should be able to meet the short fall from the trimming the fat and not raising the rates. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I oppose the proposed 5 percent rates hike. I am of the view that the rate payers are asked to front up for the mismanagement and wasteful spending by the Council and its subsidiaries.

While I generally support the overall approach of the proposed budget, it is glossing over the underlying mismanagement and bloated staffing issues. There are 86 who are getting paid more than 250k and over 2800 over 100k. I don't have a problem with paying market rate. However, there appears to be no accountability to ensure that they deliver what they are tasked to deliver. An example of this is the performance of former Watercare CEO. Total mismanagement and inaction led to the water crisis and conveniently blamed on the drought (forgetting that is what they are paid to do). If these people were in commercial organisation they would have been fired.

Anecdotally I have heard many examples of waste-full spend and mismanagement.

The Council should look at first cutting the fat and then ensuring that the spend is delivering the best bang for the buck. Before such programs are in place I oppose the rate rise.

It is shameful the Council reaches for rate payers pockets every time they need additional cash instead of looking inward to ensure that they are delivering the best for the rate payers.

Regards

A Sathyendran

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Support the increased investment but only from cutting cost and not from rate increases. So don't support the current proposal.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Support increased investment. But this can be met from the waste currently embedded in the Council bureaucracy.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Support increased investment. But this can be met from the waste currently embedded in the Council bureaucracy.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: To much being spent on non essential items, income for rates increasing to fast, not enough cost reduction

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: But the additional spend needs to be covered without increasing rates

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: This is business as usual infrastructure - should never be funded from increased rates

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: these are not a priority and should be invested in last - councils role is water, roads, waste - once that is sorted then invest in the rest

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Same rates for same services - council to operate within the current structure and not rely on increasing rates each year

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Either cover it under existing budget or dont do it

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Need to keep investing but also need to keep finding efficiencies

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Watercare should have managed the supply/planning better and need to work more efficiently and find cost savings

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: An aggressive plan is needed; my concern is that this plan may not get everything done that is needed.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The phasing-out of fossil fuels is gaining traction internationally and we need to helping strongly. But are we doing enough to prepare for the environmental changes that are already coming?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Why not simply add this rate to the general rates and concentrate on the tasks that need doing?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: We need smarter ways to deliver the services that develop our communities, particularly as demographics evolve.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Farm and lifestyle properties must be less costly to service than adjacent properties with more occupants, and we should not be pushing them to disappear.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I do not have local knowledge.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I do not have sufficient knowledge to make an assessment with confidence.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why I am not much familiar with Glen Innes and its needs.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

No comment.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates are already high due to Auckland house prices

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: There is a better way than direct tax - Get Council to support and promote the CommUnity programme recently launched - see www.comm-unity.kiwi. This provides potential for \$150 per household per year - more that increasing the rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Change will happen gradually - as will climate change

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

I constantly wonder why the Council keeps talking about increasing rates to cover spending, rather than the opposite of cutting costs. It would seem that the Council should be concentrating on core business. Things such as the free Summer programme are nice to have, but in reality why should these be paid for out of rates that some are struggling to pay. Additionally, I have a query about why kerbing is constantly being replaced around the City, when the kerbing being taken up is more than satisfactory. This programme of kerbing replacement has been going on for years, at enormous cost, but for what purpose.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: When I see the waste by council owned and operated organisations as well as the council itself I cannot see the need for the additional imposition on rate payers. tidy up your own operations before penalising your ratepayers.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Mitigating the risks from climate change are essential to the well being of the people of Auckland and New Zealand as a whole. These strategies should have been in place well before now.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: You have had plenty of funding to do this and you have wasted it as your organisations are not focused on efficient and effective work planning or delivery. Stop the wastage of spend and make it effective

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Like every business you need to understand the operating model that best serves the communities you are responsible for delivering services to. Stop funding one off grand ideas and focus on core services.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Instead of imposing more administrative burden around things like tree management why don't you work with Vector to deliver more underground services. Also think about the types of trees being planted around verges as many are too large for the space available

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Public transport should not require additional rating burdens. Develop the correct infrastructure at the time an area is opened for development to stop all the rework and wasted investment. Plan effectively and efficiently.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why The priorities are not well known and have not in my opinion had sufficient public input. Minority groups have a louder voice and get listened to above the general public.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Not necessary to change

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing and the standard being allowed to be built has destroyed the character of the area in which I live. I am not against intensification but the design of properties and related infrastructure including public transport need to be aligned. Auckland council and Auckland council organisations are in my view not aligned on many things. Work as a team to deliver better outcomes.

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

No increases for the regular consumer please.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Less cost.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why Great ideas.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why Glen Innes needs to be revamped.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Great ideas!

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to keep on top of the current issues we have not leave them to our grandchildren to pay for

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: If we don't do it now it will only get worse in the future

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: we are not a third world country we consider ourselves clean and green so we have to spend to achieve it

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Please consider those like us who CAN'T get fibre and where cell phone reception is not reliable. I do support sharing but going online needs more planning.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Option 2 - don't know Option 1 penalising people near bus routes - Why?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Maintenace of the basics like water, sewage, roads and community facilities in preference to building new assets

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: We need more savings. Less "events" paid for by rates & more "user pays". Cut the PR budget in half. Cut the all staff tied to "events" in half.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: It's a long term project and needs to be an on-going continuous improvement project.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Only support if there is a fixed annual budget. The share of which is allocated based on numbers involved in the community in that activity. This should not be run on a "by application" process. Too much noise & too much cost to rate payers to administer. An annual allocation spend.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You should look into what other budget to cut rather than coming out with more fancy project and feeding into the big HR bills. Auckland City Council becomes a big bulky organisation that feed lots of unnecessary people. Check the ratio of council worker to the population of Auckland compared to the other countries. We don't need lots of high paid people but people who really on the ground. How many of failed projects are planned by someone sitting in the office and not actually on the ground. Where is the value for money of tax payer money!!!

Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to move faster to deal with growing issues and adapt to climate change.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is a huge problem that has been avoided for a long time.it needs increased investment.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We don't want elevated levels of lead. Happy with this.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Happy with all of them

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: I hope there is a plan to eventually expand the bus network as the population grows in Paremoremo.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why More rates mean more money to improve Orakei.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

More housing is desperately needed. Current housing quality is generally low and landlords having a lot of power .
Densification needed in Central Auckland.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why It is important to focus on local priorities to maintain live-able suburbs. There is a huge 'rate' collect in this area and many of the beaches, cycleways, parks and amenities are used by people from all over the Auckland area. We need to stay on top of future plans. I hugely support all work on cycleways and walkways on the Orakei local board area... for all Aucklanders to enjoy.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why I don't know enough about this

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Get cars off the road. I fully support cycleways and the ongoing development of public transport options.

I want to see more money spent on enforcement e.g. inner city retailers complain that no one is visiting. But as a regular city visitor I cringe when my grandchildren must endure smokers taking over Takitimu Square when smoking is not permitted in these places. There are no signs and no enforcement. This is not a live-able city and discourages us from visiting the city that we have made such an investment in.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to invest as much as can for the future. Past budgets have been too low for too long!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is happening and we are already in trouble. Investment is needed now!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is poor and we should have invested more in the past. We need water for life it is critical!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: People need these community assets to live a full and happy life if services can be delivered differently at lower costs that is good. See some of the newer community facilities in Alberta as an example.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Some rate payers have lost jobs, others have had salaries reduced, most other people have had pay freezes - Council should look at what it can deliver within current parameters rather than simply squeezing rate payers further.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support taking action on climate change but items like buses should operate on a model where they are self funding.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Watercare is a profitable entity and Aucklanders pay handsomely for their water supplies. It is immoral to seek to tax rate payers to cover issues that have arisen as a consequence of a lack of foresight and investment in the water infrastructure by a profitable trading entity.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: In these difficult times Council should seek to cut its cloth - this initiative is doing just that.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I have no issue with existing initiatives being extended but do not support the introduction of any new charges - you can not just continue to increase taxes on rate payers to fund projects. IN these times they should be deferred or cancelled.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: This doesn't impact me - I would suggest this is something that is addressed at a local board level.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why The arts plan and other initiatives are 'nice to have' - given constraints on peoples' finances expenditure on such initiatives should be deferred and reconsidered.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I oppose leasing or sharing public facilities with private enterprises.

I oppose closing our existing public facilities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It is important to me to have dog free public land.

Some parks and reserves entirely dog free.

Others dog free at certain times eg before 8-30 am and after 5-30 pm

A charge on registered dog owners for the use they make of ratepayer supported parks and reserves.

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The rates increase is unacceptable. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I object to our rates increasing every year, always more than the rate of inflation.

With the economic hardship that applies to a large fraction of its ratepayers, there should not be any rates increase this year.

The council needs to trim its activities to match its income.

I support the submissions made by the Auckland Ratepayers' Alliance.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: If it results in a rates increase, it's too ambitious.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: A rates increase is unacceptable.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The council needs to concentrate on the basics. Rubbish collection, sewage, water, public transport. Stop spending money on the "pretty" stuff.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The environment is not a challenge that the council should be taking on. As per previous response please just stick to supplying basic services.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I support the increase BUT ONLY if there is a complete overhaul of the watercare organisation

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I think a lot of these assets could be sold off.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: This city has got to learn to live within its means. At present our rates are our largest single item of annual expenditure and as super-annuitants we have no means to increase our income to offset the council greed.. I am totally opposed to further inflationary increases.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We have left climate change too late, the 1.5 limit will be exceeded no matter what we or the world does probably by 2032. The 2 C limit is almost certainly to be exceeded between 2042 and 2053! Prof Schellnhuber suggests that once 2 deg is exceeded the world will very quickly exceed 4 deg C level as tipping points are triggered.

Our politicians have absolutely no clue about the science and seem wedded to a completely fruitless exercise of saving the economy when its clear that in the process the residents will be pushed into poverty at an ever increasing pace.

Auckland is ultimately in the coming centuries destined to become an underwater feature. The path from now will almost certainly bankrupt its residents and increasingly push many into poverty.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Water care has to face up to changing conditions and live within its means. It was extraordinary to hear the the CEO was being paid of the order of \$800,000p.a.!

This is immoral and indefensible. The current deficit in the water supply shows that these salaries have absolutely no justification.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The council is extracting exorbitant rates from the community as it stands, especially in our area..

Our sole income is from a rental property where the rates comprises 15% of the rental income... ! 20 years ago the rates amounted to 5% of the rental income...

Its clear that belt tightening is required both in the salary levels and staffing costs, and then also in the contracting out of services... these have turned out to be a recipe for rampant inflation of rates... which for us have gone up over a factor of 10 in twenty years... Nobody's income can keep pace with this excessive tax.

How can Phil Goff imagine COVID has improved peoples financial situations? This is complete madness on the part of the city and is following in the steps of the

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The trees should be left alone... Vector should be required at its cost to underground services that it feels are at risk. If it wants to run a business then let it be transparently responsible for its costs.

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Private bus companies should not be being supported by rates from the public .. "Socialism for the rich, capitalism for every one else"

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why degrowth is the key to the future

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why degrowth is the key to the future

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Growth is what is destroying the planet ... the city council has to start thinking about how to degrowth... for if it doesn't then Climate Change will do it for them but at colossal cost to residents trapped in this cities rates treadmill.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: For too long successive councils have focussed too much on the obvious stuff and not enough on the unseen stuff. You can cut your cloth a lot leaner than you have so far. You are not a charity, you are a business. Do not facilitate one more dwelling without first deciding how to provide potable water, grey water and black water. We are hoping against hope that the Waikato will keep providing and yet we've built a central interceptor which is already too small in its capacity to take it all away. Then we keep building roads to persuade more people to come and we keep on

allowing building consents almost up to the high tide mark. We don't insist on solar panels and water tanks on every new build. Stop posing and get started on some proper mahi.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Using Ports of Auckland to help you play around with an experimental hydrogen plant for one bus and a couple of trucks is a complete waste of time effort and money. Get on with writing rules that insist on solar panels for all new builds as well as water tanks. Also stop issuing any building consents within 250m of the high tide mark in every coastal area of Auckland.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Drawing from the Waikato is not a long term viable option. Get on with supporting regional self sufficiency.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: By your own words you have admitted that tax depreciation has not been spent where it should have, on the maintenance and upgrade of those assets against which the depreciation has been claimed. Successive councils

have done the same. That doesn't make it right or legal. It just leaves a pile of rubbish for somebody to clean up at some point. Go ahead and clean it up. Then don't let it happen again.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

You cannot in good conscience charge urban rates to areas simply because they have urban amenities "close by". Either they have those amenities on site and should be charged or they do not and should not be charged.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: No public transport in Auckland ever paid its way without a subsidy. Too much area and not enough people density. If the Paremoremo area needs a bus then put it out to tender and subsidise it just like all the others.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Too much low rise infill housing on unsuitable land is squeezing three town houses cheek by jowl on steep sided hills, destroying natural water courses and overloading narrow roads with second and even third car ownership. Houses must go upwards on smaller footprints and public transport must reach all areas more comprehensively.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why Business brings jobs. Jobs bring rates and tax.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We have talked about global warming and yet done nothing to strengthen our position for the future. Nero fiddles and Rome burns. Solar panels and water tanks as essential elements in all building consents. No building consents within 250m of the high tide mark. This is not impossible, just politically difficult. It is essential. Nero fiddles and Rome burns.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: People are all ready struggling, wage cuts & subsidies rates increase just drives rent up yet again

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Proposal makes sense

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: The money for this should not come from increased rates, it should be an ongoing initiative that is continually reviewed

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: What rubbish

Closing some facilities saves expenditure that savings can be redirected to R&M for the buildings that require them - no need to increase rates

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Increasing the rates area garners more revenue therefore no need to increase rates above CPI

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: User pays

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Supported where this value for money

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why Glen Innes is an up and coming area, where the local board has worked hard to improve their image

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Main Auckland topic has been left out - Auckland water/Watercare this is a crisis area that needs targeting urgently

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: We need to make progress. Our city is growing fast and a lot of people have moved back to NZ with COVID. We need to make investments now.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is real. We need to act.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We should be able to swim at all Auckland beaches.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Local libraries are very highly valued by the communities. They are invaluable to all age groups - both for borrowing books, as well as taking classes, and other events and activities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

No

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why I thought Felton Matthew Ave was part of Glen Innes anyway

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why I thought Felton Matthew Ave was part of Glen Innes anyway

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: By increasing the rates to 5% for one year will effectively mean that even if the rates return to 3.5% from then onwards our yearly rates will always be more than than if they remained at 3.5% . The council are not making this clear to the public . Imagine the Labour government wanting to increase tax rates just for one year because the tax revenue was down . There would be national outcry and I am sure many Auckland Councillors would be part of that voice .

But Auckland council are asking the same thing - a increase in rates for year which will then have an accumulative effect from then on and I do not believe that the majority of rate payers support this .

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I believe that savings can be made in other departments and less money being spent of unnecessary projects .

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: This money should be raised from new housing developments .

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: It makes sense to share facilities as they are there for the benefit of the community especially as if savings can be made .

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: I have not read it. I have to trust you.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The climate is important. We can not afford to ignore our impact on it.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: The overall budget proposals do not show clearly what the money in each section is spent on. For example community support. When we as a community group have asked for reasonable venue hire (since we as the community built the venue) we are told that this is not possible.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: The stated outcomes include combining facilities. This seems to mean removing facilities from some communities and making people go out of their local area to access similar facilities. I do not see how this improves the local community. As we get increasingly dense housing the feeling of a local community needs to be increased not diminished

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council must learn to make rates increases that are at or below inflation. The population of Auckland has grown and continues to grow with a consequent increase in the number of homes and businesses paying rates but still rates increases are well above inflation.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Investment in new technology should lead to lower costs over time. Investment should be paid for with more borrowing particularly when interest rates are so low. Some long term Auckland City bonds would probably be most welcome in the investment portfolio of funds

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: See answer to question 1. More saving needs to be targeted rather than continual rates increases

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Investment in things like libraries should be declining as more services go on line so physical premises should be sold off and leased to provide flexibility to react to changing technology capability

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Equity in how rates are charged is important but not a continual increase in rates. Make savings elsewhere to support new initiatives

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Rate payers in general will not use public transport so increase in fares is a better option

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Local boards are a waste of time and just increase the overall cost of running the city

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why there is no need to change the boundaries the suburb is still the same

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Council should not be in the business of providing housing council should ensure that land is available to support growth and therefore make consenting easier, That way land which is plentiful does not get priced as a scarcity product, The price of land is ridiculous and with it the price of housing

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The council needs to go back to just doing the basics. Just focus on core activities. Stop wasting money on trying to be everything to everybody.

Make developers pay and upgrade infrastructure as they develop or before they develop. Sort the roads as a condition of allowing greater density

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Great to trial and learn, too early to invest. Replace old buses with latest diesel ones which makes massive emission improvements. You do not have the money to spend double the cost to buy electric

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: As above the council needs to stick to the basics. Yes they must improve / focus on water quality, but not with more rates, but by saving money elsewhere

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Great, but just replace those strategic / rationalised assets with basic, plain buildings at lowest possible cost, forget all the nice to haves and fancy things

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Keep the increase to CPI / Inflation

People are not getting 5 % increases in their incomes to pay

If you say a 3.5% increase in rates, make sure it is, not an average or a range of 3% to 4% etc

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: User Pays

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Like all of Auckland needs to lower costs / live within a budget / do the basics not the flash things

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The city has to grow an needs housing and infrastructure, but build the roads and water assets as a condition of the growth and make those subdividing and developing pay 100% of the additional assets needed. Make everyone pay for maintenance and normal costs.

Make everyone have enough off street parking to cater for size of properties being developed

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council should go back to actual basics in respect to what they provide. IE Clean water, clean up sewerage system, rubbish collection libraries and parks. Leave the frills for later when Auckland can afford them. Make developers pay for the infrastructure required for property development.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Replace buses as required with electric. Have property developers plant extra trees and move on recycling NOW

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

Do you have any comments on any of our proposed changes to rates and fees charges?

The city has been ruined by constant work and nobody is interested in city centre now. No need to upgrade as nobody will go.

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremuremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: If people in area want facility they should pay.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The architecture is disgusting for all the infill housing in the city. No thought given to the social and cultural aspects of the areas. Auckland a total disaster with successive local bodies not doing their job. Long time residents now leaving the city in droves.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: the budget should concentrate on infra structure and core council responsibilities eg rubbish disposal, any spending outside these areas is NOT affordable at this time

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Auckland's contribution to climate must be seen in the larger global context, what we do in Auckland will have almost zero impact on the world's climate, therefore a complete waste of money. The Council has no spare cash for virtual signaling.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: this is a core responsibility of the Council, Council and Watercare have been negligent over the past 10 years (or longer) this is why we have the current water shortages

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Council should sell all non-core assets. The destruction of retail business in the CBD must be reversed - it is extremely difficult to visit the CBD to shop.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

All rates should be applied against core council responsibilities. for example no rate payer money should be spent on golf courses, arts, concerts, rainbow crossings, etc etc

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: this should be a user pays service - like all other council services

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Traffic management should be left alone - the ongoing roading on Tamaki Drive is a disgrace. There are 4 very narrow lanes - in fact 2 buses could not drive side by side in either direction. Cycle ways and foot paths have been given priority at the expense of all other road users. Auckland transport create log jams rather than reduce them. No Calming - creates just another hazard.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why as long as it is user pays - No rates to be used

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Why is the Watercare Board still allowed to operate after (another fiasco) another round of water shortages. Surely they are responsible - they fired their CEO but surely the Board are ultimately responsible - they are a disgrace!

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: It's unclear what the 'key services' are. Council has wasted SO much money over the past months and years - there needs to be more transparency and a load more competence.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I like this idea on the proviso that this does not inadvertently create more issues i.e. battery disposal etc

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: this is happening too slowly. there should be no more subdivision and infill housing in areas where there is a problem with wastewater and stormwater contamination and it ending up in our rivers, lakes and ocean.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: the community needs these facilities and these facilities belong to the people. The council needs to respond in a way to keep the community as a central part which is done by keeping these facilities. Throwing this in with a carbon footprint is a cop-out!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

There is no consistency - rates should reflect the level of services. for instance, why does one pay the same rates on Waiheke Island with terrible roads, no footpath as the city?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why if you are going to use headings like 'our proposed priorities' and 'what's happening in your area' it would be good to have those mentioned on the web pages. I found no relevant information for 2021.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Other

Tell us why too hard to find on the website

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

not to waste any money on employing supposed experts like for instance the man in charge of Auckland's water - he should have paid back what he was paid for his incompetence. There needs to be accountability with council employees and the salaries they are paid are ludicrous. It appears the environment at the council is toxic - it really needs to be sorted before any other decisions are to be made about the environment, infrastructure, upgrades etc.

Important privacy information

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I own 43 & 75 Retreat Drive, Mangere. We have been battling for 2 years now to get consent for a water line to be put in so that we can develop this area which has not been successful to date.

The letter given states "Properties in

these areas have similar levels of access to council services as nearby properties inside the

Urban Rating Area but are currently paying lower rates."

In our case, this is not true as there is no water line there for our wastewater to go to.

I am more than happy to support this if Auckland Councils put in the waterline at the top end of Retreat Drive, Mangere, and rezones the area to Mixed Urban Zoned to actually support urban development as currently, it is only for lifestyle blocks.

The main importance to me is if Auckland Council supports this, then together we can develop a lot of homes for those in need and try to help ease the housing crisis.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Not happy about the increase in rates which I can barely pay as it is, but it seems inevitable

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is the most important issue we face this century.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: A staggered approach is better.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Higher rates for much-needed infrastructure makes sense. Please don't be deterred by people whining about rates increases - we need to be able to finance our future.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Very good, but please do more. Auckland transport in particular needs to be made to deliver street environments that support walking and cycling. Their current delivery rate of ~6km of cycleway per annum is nowhere near good enough.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Better water quality sooner please - this is long overdue.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I would prefer to see greater funding and continuation of the prevailing system. "Innovative" funding for community facilities is often at odds with maintaining the best level of service.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Please keep library fines. They are a good incentive to prevent people from hoarding books. Libraries need to be certain that people will actually return the books.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Upper Harbour is currently very car-dependent. Better bus services are key to addressing this issue and providing inclusive transport.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why "Advocate to Auckland Transport for the links to the Glen Innes to Tamaki Drive Shared Path" - this is the most useful single component and it's a poor reflection on AT that some of the most obvious potential connections (e.g. to John Rhymer Place) have either not happened, or are caught up in stultifying business cases.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Please can we concentrate on using existing infrastructure? Sprawling southward into prime farmland, supported by \$billions of public money is not a sustainable option?.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The one off increase of 5% needs to be funded by reviewing non-essential services and making cuts to keep below 3%. The council needs to start running their operations like a business and ensuring prudent decisions are made. All businesses have made cuts in the last 12 months and the council needs to balance the books. There are also significant assets that should be realised to invest in the capital expenditure required for Auckland. The default should not be increasing rates higher than what inflation is and will be.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: This should ensure better facilities overall, increased utilisation and better return on maintenance and investment. The surplus facilities and land could be released to build housing and other services by private / public.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: There needs to be a business case that supports this. Not increasing rates to support.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

That the council funds the investment required by releasing assets and consolidating services. A new approach is needed to what is considered essential services and then some hard decisions made on services and roles and these removed. Rates increases should be in line with inflation each year. They should not be above inflation.

Important privacy information

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Why should existing residents have to pay for public transport infrastructure that benefits the whole city? Reduce investment in areas that the private sector can do more effectively such as ATEEED and use this funding to address the key areas that will make Auckland a city that will attract people and events

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why It would be more helpful to hear about these earlier rather than later.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Regarding strategic assets I believe that this area of investment should be reduced to free up funding. The stick of council buildings should also be evaluated to assess if the lease of space would be a better use of ratepayers funds

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I'm sick and tired of the Auckland Council's response to every issue, which is to increase rates.

All this money is spent on is projects that are not necessary, are never finished on time or within budget.

Add to this the vastly inflated number of staff that now work for the council administering these projects at exorbitant pay rates and you can see the issue.

Let's by all means do the things that we "NEED" to do and do them properly, at a reasonable cost and put any little pet projects and "nice to haves" on hold. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: I have no confidence in the Council's ability to manage these projects.

The 2000 M3 of grout is a prime example of this (160 trucks poured grout into the pipe instead of around it, how did this happen? Who was supervising the pour at Watercare? What steps have been taken to remove these incompetent people from their jobs?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council needs to sell assets like Ports of Auckland. It is not a strategic asset for the city but the land occupied by them is. If this was commercialised it would return approx \$200 million in extra rates revenue instead of the current poor dividend returns.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We cannot afford the luxury of such capital investment until we get the budget balance right. This is a nice to have not a need to have right now. Stop waste in other areas.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Auckland needs to continuously strive to be eco friendly and provide for its residents. I'm glad to see investment in waste water, I think auckland can learn from wellington in that respect to not let it go beyond fixing

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We dont need fossil fuels buses, we need eco friendly ones and we need them asap!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water if life and I fully support the improvement and continued improvement

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Multi use facilities will be more beneficial to the community and we need to move with technology and all the improvements that brings. We need to not forget that education is key in adoption as Auckland moves forward.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Cycleways and cycle friendly roads are important for safety and transport

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates increase of 5% too much for the people to afford given Covid-19.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Needs further investigation.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: The money for this infrastructure should have been allowed in previous budgets. Poor forward planning by Auckland council.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Absolutely need to invest in communities. The people of Auckland need access to libraries, parks etc more than ever given the poverty levels increasing at a high rate.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You are blaming Covid for everything, you still received your Rates, Water Money etc etc, this is basically some feeble excuse for your incompetence to run to budget. AC has laid off heaps of Contractors and still pays all those "Bosses" plenty for managing less people.

Do your job and stop jumping on the Covid Band Wagon.

You could save a fortune if you reigned in AT's Spend and actually managed them and carried out a cost analysis of all their Projects. Look at Tamaki Drive Shambles and the new cycle way that couldn't be more bumpy if they put judder bars in it.

An article in the paper said it cost \$18m, I'd be pretty sure it coast a lot more than this where was the rest of the money buried??

Dave Danby

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It's tough times you are telling us just reign it all back until you have the budget

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: You have to stop all the Infill housing an Apartments until you have the Infrastructure sorted. Really this basic sense. How can you let all this additional accommodation and we haven't sewage or water systems sorted

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Cut back your Spend. How do you guys work a budget AT Home!!! If you can't afford it don't do it. More common sense required. Treat Our Money as if it's yours and don't waste it and live within your budget.

When was the last election?? did we here rates were only going to go up by 3% or something. Politicians as usual can't be Trusted and look for anything to blame but themselves.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Why don't you get Vector to sort out the trees. There shouldn't be any trees under Power Lines if we want a reliable Electrical Service. Forget about the Greenies and tree huggers they're 1st to complain if their power goes off.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Have you asked the locals if they want a bus service?? if so they should pay. Out there I'd say there would be little use of the service. Have a look at how few people are on the every 15min service from the City to Glen Innes along Tamaki Drive, it is embarrassing that people in AC & AT actually think this Service has to run every 15mins and there is either no one on it or virtually no-one. Where is the cost analysis on this Service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Not enough savings, too much waste

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: There are ways to save more carbon if that's your goal rather than spending twice as much on buses with a life half as long. The electric buses will be powered by a huntly power plant burning coal.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Save money from at with cycleways that are barely used or some of the 12000 staff working at Auckland council

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Why does the council need so many buildings many of which are not used. Are all the libraries needed?

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Council has been funding education this can go, it is not a council core function.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why They want to spend money. Save money.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Saving money, bringing council back into its core responsibilities.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Makes sense considering the socially current issues such as covid . The money has to come from somewhere, and considering we have required so much for covid and it's been such a good response. Feels reasonable.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I live locally to a lot of waterways and so much improvement is desperately needed. Keep it going as long as necessary.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I think specific activities can require bespoke environments and am concerned that this would limit community connection and diversity of activities.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Standing still is moving backwards. Must maintain and improve existing services. Extreme caution on non core investments. Eg America Cup. Review spending on "consultants"

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Electric vehicles Next decade not this plan.

More trees as above, next ten year plan.

Improve waste management Yes.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Swimming in Auckland needs clean water, with increased population we need a place to breath.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Proceed with great caution, being sensitive to local.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I'd like to see higher investment in Environmental management and regulation.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to do more for the environment, we started composting years ago and have started to go packageless with our food purchases.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Our water quality is rubbish, equally we should be looking at storing water from people's roofs and using that, rather than upgrading stormwater to get it out to sea. We have low quality water even when there is no heavy rain.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: The council should be working more with local communities so they can work as teams. I manage a climbing crag in Auckland and we have a great partnership with the council to share maintenance costs, which also benefits other members of the community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

What is your opinion on this proposal? Do not support

Tell us why: Please do not consolidate or close library services, art gallery or museum services. Parks should never be closed

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support some aspects of it. I agree to the rate rises but feel that developers need to be contributing more towards infrastructure. If someone is knocking down a house and putting five new ones on the site, then the surrounding infrastructure needs to be evaluated to see if it can cope with the increase in demand. The developer should at least be partly responsible for upgrading the infrastructure. Also if central auckland needs more pipe renewals, then they should be contributing more towards those costs. Also in the water section you mention that 224 million was spent on improving

the resilience of the water supply. You don't explain what this means. More money needs to be invested in increasing Auckland's water supply.

Bring the targeted water quality rate increase in and start projects that will improve water quality.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I support alternative one. Invest more money in it.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We need to improve water quality now, not 10 years down the line when we have a bigger issue on our hand.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I support the Electricity Network Resilience Targeted Rate

I agree with option 2 for the Accommodation Provider Targeted Rate.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Unless the public transport system is good, people won't use it. They shouldn't be forced to subsidise it for others.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Please make water quality a priority as well as crime prevention.

I disagree with certain traffic calming measure, I don't think this should be a priority.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Water quality, public infrastructure, climate change, good, cheap and accessible public transport

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland Council has to get serious about cutting spending. Continuously increasing rates and borrowing is not a solution, in the short, medium or long term.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: It is not about increased investment, it is about investing more wisely. e.g. why do we not see smaller buses in use instead of large buses with a hand full of passengers on them continuously?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: As I understand it, there hasn't been an improvement, in fact the reverse has happened with more polluted beaches/waterways. Investment in improvement as able, needs to continue.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Finally a realisation that lack of maintenance over past years is now going to cost a lot more. And again your answer is to increase rates which is not acceptable. There are certainly savings that can be made through better use of the existing facilities and the hire/lease of them.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: The whole area being serviced should pay towards the cost.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Supporting Covid recovery is a Govt role and not council - taxes vs rates

Some work will be trimmed as the Council cuts its spending across all Boards

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why So that they are inclusive with their neighbour businesses in dealings with Council / Local Board initiatives/ planning, etc.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Why this constant focus on growth? Regions outside of Auckland need greater investment and job relocation from Auckland would attract people to these areas. Our rates (Orakei) are already too high. A large section in Titirangi with an architecturally designed house pays a third of what we pay.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Support electric buses but really annoyed with the mismanagement here. Auckland has a very modern (diesel) bus fleet. A huge investment in dated technology. Services are under-utilized -not helped by Covid as who wants to use public transport during a pandemic? Trees. All I see are trees being cut down - not being planted. Auckland viewed from the harbour is a concrete jungle. A lot of talk but no action taken .

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Willing to go with the extension but am not willing to fund ANOTHER increase.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Leave our libraries alone they are a real investment in our communities. Maintain current assets. There is no money to upgrade or provide new assets. Start living within your means as we all have to do.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

All this targeting of rates has one objective - to get more money from residents. We already pay very high rates and are not willing to pay anymore.

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: As per comments above.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Traffic calming, CCTV and CPTED (Crime Prevention Through Environmental Design) implementation. There are already enough cameras. No more cameras and no more speed bumps (traffic calming)

Finalise an Ōrākei Arts Plan to guide future enhancement of art, local heritage and culture at our public facilities and places. Not necessary and ratepayers can not afford this.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Why is this necessary?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need de-growth. Basic infrastructure which needs addressing should be addressed. Sell the Port and move it out of the city. It is an eyesore -other cities around the world have done this and improved their city's visual appeal.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The amount should not be based on the rated value of a home, but rather a set amount per dwelling, since we all use the amenities equally. Someone who has a house with a higher value than someone else, should not be penalised for it. This is what the proposed percentage increase amounts to. It is unfair and places the burden on those perceived to be better off. This is completely unfair and also untrue. I live in Remuera, but am a pensioner owning a one-bedroom home. This proposed budget will force me out of a home I have worked very hard for.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal?

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal?

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Council must learn to live within it's/our budget. Stop building the nice to haves. For example the millions being spent building the new Onehunga bridge to just fish from, just because that's what some people used to do. What's wrong with a wooden jetty out into the harbour. Councillors are not vetting these new projects strongly or rigorously enough.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Again you're not doing your homework. Aucklanders DO NOT want stronger action on climate change. Again what you're thinking is NOT the norm, it's what your personal beliefs are being shoved down everyone's throat. Look at history and nothing out of the norm is happening. Again being the first in the world I can see is what you think is something to be proud of, but building an electric tug is utter nonsense and again a waste of OUR MONEY. Spare me!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Again water quality is taken for granted, you should be encouraging Commercial businesses in new builds to use gray water for landscapes/gardens. Again because Water Care is a separate entity you think we won't complain about higher charges and which don't affect our rates. Remember when water was part of our rates bill.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: You think by leasing out OUR facilities is cheaper. Well in my reckoning the Lessors will want to make a profit for doing Councils work, so the Cost goes up again for Aucklanders.

This Council is driving people out of the area and if you keep this up Auckland will become a ghost town. Look at San Francisco, more people are moving out every month.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The gardens and trees around the city are a disgrace. Trees, especially palms, are not pruned regularly and there is no colour in gardens in the inner city making it a drab grey area. Beaches should be cleaned weekly to encourage people to use them more.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: User pays right? Well to encourage more bus patronage (pick a dollar figure) \$5, \$6 whatever, and you can travel as far as you like. Get rid of these "stage" fares. Use the KISS principle.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Just keep AT out of our area. Again AT is an uncontrolled enterprise answerable to no one, especially the Ratepayers.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Think I've said enough.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: necessary. I support a 5.9% one-off rates increase for 2021/2022 (rather than the proposed 5% increase) to ensure the \$320 million climate budget can be progressed. I also think Council should introduce parking levies (ring-fenced for public transport investment) and congestion charging to help fund our climate response.

I want Council to be aware that by not aligning the consultation periods of the Long Term Plan and Regional Land Transport Plan it has become challenging to gain a clear picture of our future trajectory to inform my submission. Regardless I support investing in the Urban Cycleways programme, improving Wellesley Street bus services, protecting airport-Botany rapid transit link and other active (walking and cycling) and public transport projects.

Beyond this, we need more transport action from Auckland Council and Auckland Transport. This means setting targets with AT for reaching emissions targets through proportion of trips taken by active and public transport and ensuring consequences for not reaching these targets. As a Council it also means looking at transport initiatives they can pilot such as tactical urbanism (e.g. pop up bike lanes) and low traffic neighbourhoods.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Must meet challenges of climate change. I support further funding beyond the proposed investment. I want "Option 2: More significantly accelerate Auckland Council's climate action". This will put \$320 million rather than \$150 million towards climate initiatives so that we can achieve a 100% zero emissions bus fleet by 2030 (rather than 50%), further investing in Māori-led climate change action, more than doubling our street tree planting programme to 29,000 in total, address coastal erosion faster and more.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: water problems must be solved

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Community facilities very important

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We have all been greatly effected by the pandemic and it is not a solution to take more money from already financially hurting families, Besides the infrastructure we tends to be to little too late.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It is ridiculously inefficient to replace a working fleet just for the sake of replacing it, better wait until each bus needs replacing and do it progressively, it does not matter about the time frame

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: not required, just stop pumping anything into them

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Much better to consolidate everything and have lower operating costs

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Well, You need to stop increasing rates for no apparent reason and find some way of creating a better infrastructure that works and is not designed to slow down traffic and does not annoy motorists. You need to stop worrying about stupid issues like changing buses and sort out the city

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: Need to do more to tackle climate change and radically transform the transport network. Rates raises should be higher to meet this demand.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Need to do more also in this space.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Need more money invested into community assets and events.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Investing in infrastructure, climate change, environmental sustainability is a waste of time at the council level, leave it to the Governmental level. Concentrate on the basics. Do not borrow any more money, the council is in debt enough.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Leave it at the government level, since the greens are taking care of that portfolio anyway.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Watercare must invest in the extension and the increase as a private entity rather than ensuring that a dividend is paid, that dividend must be put back into the above rather than been treated as a separated issue. The CEO gets paid an enormous amount for doing nothing! It is well overdue that he works for his money! All the while the pipes are leaking and we have to save water! We should not need to save water if the CEO fixed all the pipes rather than cost-cutting and the like. It should not be a council issue if water care did its job.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Maintain what you have, closed those ones that do not provide a service - less than 50%.

No new assets, consolidate what you have and run it efficiently.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Do not increase rates!

Why does waterfront property pay twice as much as everybody else for the same service?

Very unfair. A two million property in Devonport pay twice as much as a two million property elsewhere?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: It must come out of the rates and not pay extra as the council should provide such services anyway like else where in the city.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why Well thought out plan I must admit.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why did not know that was happening.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

It about cost-cutting and not increasing the rates. That means not spending money you don't have and give the councillors and CCO a pay cut (50%). They get paid so much it is ridiculous.

Important privacy information

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: The city cannot be allowed to run down - false economy

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is real. We all need to play our part. Auckland produces far too much landfill.

Plastic bags need to be banned and glass milk bottles reintroduced.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: All city beaches should be safe for swimming

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Save the trees. Aucklands has an appalling record of destroying trees. Put power lines underground. (yes, there is a cost)

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Will there be a refund for those who use e-bikes or electric cars ?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why I need to know what the OLB 's proposed priorities are.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why Why is it deemed necessary ?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Ease the housing situation by restricting the number of people entering N Z and Auckland especially. Its that simple. Yes, we more doctors / plumbers / etc but that in tern will result in needing more electricians etc

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: This investment package does not correspond to a vision with a plan of where we want Auckland to be in 5, 10 20 years. There is no overall clear vision, just a bunch of band-aids cobbled together. There is should a bold 5, 10 and 20 years plan show how diffrent investments and project will come together to make this great city a sustainable and quality example. Transport approach should show a global goal (for example, reducing road based transport, increasing train network and electric based transport, adressing second harbor crossing, moving Auckland Port out of

downtown, reducing carbon footprint , addressing climate change and so on) integrated with other strategies. Investing in yet more roads or their maintenance is a dead end (that includes bus corridors if this not for electrical vehicles) it needs to stop.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This investment is not increased enough and should really be combined with the transport and water vision and strategy.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: No global vision, we are just adding extension over extension without any global vision. Water supply is clearly an issue, increase water intake from rivers and dams is not a sustainable avenue, we should prioritize rain water collection and storage for every roof in Auckland and concentrate the investments on wastewater and stormwater management

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Consolidation and investment in facilities should be planned together with a transport network and vision

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Rate changes and increase should be following inflation.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: There is no planning for a train line instead, highways are happily built without any forward thinking whatsoever. Brisbane, for example, build a train line along any new highway that is being build, Auckland has failed to maximiser on the opportunity to build a railway reservation while building the upper harbor link.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why The shared-path initiative is a classic example of great idea poor planning. A shared path is great for community and leisure but is not a proper tool for commuting. If this shared path had been planned with a vision to integrate with a commuting by cycling strategy it would have been a better return on investment.

And let's not mention how late and over budget these simple projects have turned out. If we can't build shared paths on time on budget, we won't be able to do it for CRL.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why This not integrated with a transport, water and wastewater plan

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

We need first a 20 year plan of what we want this city to be like in 20 years and then build accordingly. Main objective is climate change adaptation with reduction fossil fuel based transport and management of water resources.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The council fee has been increasing every year, and I have not seen any improvement, increasing councils fee gives home owners a lot of pressure of living.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Most of the time when I see buses on the streets are almost empty, very small amount of people taking bus, why should we invest more?

And there are many ways do improve instead of investment on the buses

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. 10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Too costly for the current economic environment. Work in poverty first

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Only brings things 2 years forward. Buses only a tiny fraction of our emissions. Big cost, low outcome

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Luxury spending needs to be reduced such as Entertainment expenditure. When households are hurting and council debt levels are rising it's unfair to expect ratepayers to fund Entertainment activities. Leave the entertainment to the private sector and concentrate on key services.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Diesel fumes are highly toxic and I see more empty buses than full ones. Run the buses like private business and we would not see empty buses which are frivolous waste of ratepayers money when many ratepayers are struggling.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Hire the community buildings to churches and business to help fund the maintenance.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Simply charge users. Don't make non-using ratepayers subsidise the users.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Stop moving boundaries

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

TREE PROTECTION

CITY DESIGN - Beautifully designed cities, like Paris, reap rewards for hundreds of years. Auckland is on a path of cheap high-density architecture with no appreciation for green-spaces which will ultimately result in a slum-city more reminiscent of China or India than a beautiful city like Paris.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Do not increase borrowing, nor rates. How about cutting down compliance costs and funding of non core business eg parades, festivals. Stop AT wasting money on re doing roads that dont need redoing, do work properly eg Tamaki Dr bike way is a disgrace

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Do not support most of the traffic initiatives, especially those proposed for ST Heliers. NOt needed

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing- building potential slums- jammed side by side, no parking areas or minimal per house

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: This work has to be done

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We need to deal with climate change

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Clean water should be a priority

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: These facilities are needed

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Times are hard enough for everybody. It is already ridiculously high and house prices have skyrocketed, so revenue will already be much higher.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: How bout we work with what we have the way other organisations do.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Stick with the plan, otherwise we will be spending more money on consultants for changes sake.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Privatisation again, means increased costs over time anyway. So no.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Don't know

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: we need investment to keep up with growth

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: smelly busses ruin outdoor dining!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Hobson Bay is a disgrace

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: more people living in communities need more facilities

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

support the Vector rate

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Dont support what they have done with the reserve by OBC

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: You do not have the funds

Wait for the recovery

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Again whilst a nicety funds are needed elsewhere

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Cut the size of the Council staff by half, and deliver the savings promised a decade ago when the Super Council was formed. The Council is bloated with over paid bureaucrats and has consistently over promised and under delivered since its formation. It's now time for the Council to be held to account - call in an experienced Administrator and reset the structure and services is the only solution.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Green Hydrogen powered buses are a better solution- no range issues and batteries that will eventually fail and have to be disposed of.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: Why has this project gone horribly off target and who is being held to account ? Heads should roll and throwing more rate payers money at incompetence is not the solution.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Better utilisation of resources is always a good plan.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

With rates charged on property already at historic highs and being a long way from the pandemic being over, it is vital that rates be kept as low as possible for primary residents-owner occupiers. The social issues that will increase with unaffordable rates

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Users need to pay through bus fares - allocating yet another rate increase to property owners will cause more social dislocation and disadvantages to many residents who will not use the services. It must be user pays.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why See my comments previously. Water security is important but the obvious question is - why would anyone think the Council would deliver on these projects with these issues having been around for decades and the Council has failed spectacularly on so many measures already ?

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Other

Tell us why Cannot understand the benefits for Orakei. Ie what's in it for Orakei ?

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The roads in Downtown Auckland and around the QUay are a disgrace and the traffic flow issues not only during the build but long term a shambolic mess. This should never have happened and I totally agree with calls for the relevant

bodies to be sacked and the roads opened up to dual carriageway to get traffic moving and to help businesses that are either broke or about to . The woke nonsense that is shielded by the bureaucracy forcing this onto the public has to stop and common sense has to prevail. At best , it is a vanity project by faceless bureaucracy that needs rectifying.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Other

Tell us why: I support the increased investment, but there is no discussion about how the council can operate more efficiently. The default appears to be just increasing the rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The city has to do its part in reducing pollution and dependence on fossil fuels

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: We need to be smarter about the way the city uses its assets

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Again...what is the council doing to be more efficient?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I support the proposal because the city badly needs in structure attended to but this does not include more cycle lanes or reducing car parks around the city nor making Queen St and other areas walking only.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is a load of rubbish. The earth has experienced warmer temperatures 100's of years ago as well as draught. And will continue to go through these cycles for 1000's of years to come.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: It's the right of all Aucklanders to be able to enjoy our beaches and coastal areas without overflow from sewerage plants. Sort the out dated infrastructure

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Great idea to use shared spaces and reduce the need to repair and or rebuild which is a waste of ratepayer money.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

APTR - keep this suspended until such time as boarders reopen and tourism is back up and running

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Rate payers in this Upper Harbour area should all be paying for the newly proposed bus service should it go ahead. No other rate payers outside this area should be penalized by rates increases for this service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why Great initiatives

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why Good initiative that will assist many businesses.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Auckland city will continue to be a bottle neck if council continues to spend money on cycle lanes. And by the way I am a cyclist.

90% of Auckland's approximately want to use a car and that is our right to continue to have roads that service that need and allow us to move freely wherever and whenever we want to.

The only cycle path that should be built sooner rather than later is the Sky path over the harbour bridge. This would allow a massive number of Northshore commuters to cycle to and from work and likewise city to shore. This will assist reducing congestion on the Harbour bridge.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: More funds should be spent on roads for cars, not cyclists or buses, for health and safety reasons. The vast majority of persons in Auckland transport via cars but Auckland Transport only seems to care about cycles and buses. Tamaki drive and downtown Auckland have been significantly comprised by AT.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Do not increase rates, get rid of overpaid employees, consultants and spin doctors in Auckland Council instead

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I spend all day on the road driving and am sick and tired of road works in Auckland. In the eastern suburbs re-cubing is happening all over the place replacing footpath bricks that are perfectly ok. It can only be AT or AC spending money to consume the budget, there is no common sense, it makes me feel sick. Orakei to the city Tamaki drive has been going on for over a year and no work is currently being done on it. It is a disgrace and a complete waste of money, one of the footpaths that were previously there could have been converted to a cycle lane without reducing the width of the road so much that it compromises health so much I suspect many cyclists will die on this stretch of road in the coming years as dedicated cyclists refuse to use the new cycle lane.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You are already over spending, you need to trim your obscene senior management costs, actually listen to the people of Auckland and not just tick the box by running a survey and then doing whatever it was you wanted to do in the first place. You need to dramatically reduce the amount of consultants you endlessly contract who are simply milking the council funds that we the ratepayers are providing you with. Your tenuous grip on reality, when it comes to increasing the rates we pay, needs to be brought back into line with a common sense approach to managing a major city. You need

to stop the continuous rates increases to meet the needs of a management team that think they are immune from the consequences of unbridled spending. You are a not worthy of your positions and should all be replaced at the earliest opportunity.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The underlying infrastructure to support electrification of vehicles needs to be in place before you start replacing the public transport vehicles.

The use of Hydrogen buses is a much better solution and should be pursued as a matter of priority.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Once again your belief that you can continue to increase the rates ad nauseum is astounding. You have wasted tax payers money on executives who did not prepare for this scenario, instead you wait until the proverbial horse has bolted and then want to penalise the tax payer yet again to cover for the incompetence of your appointed and overpaid executive team

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Yet another example of bad planning, keeping up to date with regular maintenance avoids the large one off costs of repairs that you are now faced with. I suspect that you will sell off our assets to a "friendly" developer that will then recharge us, the ratepayer, at an even higher cost for the use of the facilities we already owned. Failure to do so will no doubt result in the library or whatever facility it is being demolished and yet more ugly town hoses built with no thought for parking or livable spaces.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Across all sectors of council you need to bring down your costs and manage the council like it was your own money you are spending.

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: The AT bus services are barely acceptable as it is, you need to sort out the current issues before spending on yet another service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why You are spending huge amounts of money building a walking and cycleway through this area that will be used by a small number of people. There are many existing pavements and roads that require repair, this would have benefited many people and should have been undertaken before you spent money on yet another feel good project that achieves very little overall benefit for the area or Auckland

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Whilst the improvement of business opportunities in all areas of Auckland will contribute to a better Auckland, I do not believe that any real thought has been put into developing centres of business, where local people can find worthwhile work within an easy commute of their homes, thus reducing the need to travel across town or out of area to work. This reduces the environmental impact and provides a better work-life balance for the people within the area.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is needed is a common sense approach to planning, focus on building places of work in existing business areas across the wider Auckland area with the goal of reducing commute times and costs for all Aucklanders.

I strongly believe that the Auckland Council are well versed in their approach to hiding rates increases in multiple ways, tagging one onto another but only ever mentioning one at a time, wordsmithing PR statements regarding rates increases to hide their true cost. These increases should not be burdened upon the ratepayer because of a lack of good planning and accountability on the part of the council. The council seem very good at avoiding any consequences of their errors, bad planning or overspending.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: There doesn't appear to be any trade off on what we should stop doing. We've spent years under investing in core infrastructure while tearing up curbs across the city, building bike lanes no one uses and shoddy roadworks like the abortive resealing of Tamaki drive. The contractor responsible for this abomination should never be hired again.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: A major issue facing Tamaki Makaurau. But it is in the future, and whilst we need to invest now, issues of water quality etc must take priority

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: This has to be done if we want to be a world class and sustainable city

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: There simply isn't enough money to go around. Hard choices need to be made. Need to reduce costs here.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Don't live there so I have no context

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why The madness around putting pedestrian crossings everywhere and reducing car parks and speed limits has to stop. There are much more important things for council to be focusing on. Don't get held hostage to anti car nazis. Focus on the stuff that counts.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Support housing for families that live in poverty.

Protect our environment

Build world class transport infrastructure.

Anything else is a nice to have

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Support so long as the money from increased rates truly is attributed to infrastructure. I.e. no more bike paths / car free zones until we can get Auckland out of this water crisis!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The sooner we can get on top of this, the better.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Absolutely critical in our city, especially if borders do not open and more people remain in Auckland for leisure.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Makes sense to consolidate where possible

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why: People in the wider area will use the service, it doesn't seem very fair to target those in the direct vicinity.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why So much money has been poured into this cycle way/shared path and it's a great concept but I think enough is enough, more money should be put in to increasing parking near our local train stations. Auckland weather is too finicky for the majority of CBD workers to consider cycling over train. It's now near impossible to get good, safe parking near Meadowbank and Orakei train stations.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why Some great businesses

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Please tell me why you would listen to our feedback here when you completely ignored our feedback with the latest rates rise?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Sort out the infrastructure, the water, the polluted beaches and the traffic nightmare with your obsessive focus on bus lanes and cycleways. Get the basics right first.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: You will slowly bankrupt the ratepayers with your ever increasing rates and levy charges. Save in other areas and redirect this money.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I see that you are further removing yourself from any responsibilities - and passing it off as reducing your carbon footprint.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

no do not know

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: rates are to high as it is

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The rates and fare rises are already beyond any reasonable numbers! Why doesn't Auckland Council hold responsible and accountable those entities who routinely underdeliver? Make AT and Watercare pay for all their failures.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: At the moment climate change is the least of our worries. Make the public transport efficient, reliable, and affordable - and people will abandon their cars.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Instead of increasing rates try to re-arrange the spending. Top manager do not DESERVE the level of salaries they're paid (out of my pocket!). Contractors rates have to be audited and challenged to make sure the city doesn't pay the double market price.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: I don't mind leasing some facilities, like halls and sports venues, but I don't trust Auckland Council to make a call which services should be closed or moved online or jammed together.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

It's Vector's responsibility to move power lines underground and maintain them. Why on earth should I be paying for them?!?!?!?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Climate change. We cannot afford to allow NZ's largest city falling behind on commitments (past and future) to reduce carbon emissions. U20

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: As previous answer.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Don't know

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: I would not wish to see the closure of a single community library. These places are extremely valuable to young and old - especially in providing balance in an otherwise ever increasingly online world.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Bus services should be funded by the people using the buses.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Most are sensible priorities. However, there should be a much greater emphasis on active modes of transport such as cycling and walking. The GI to Tamaki Drive cycleway is the only related project mentioned. What about the rest of Tamaki drive and all the other arterial roads in Orakei?

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The things most important to me are:

1. Improving the safety of our roads by reducing speed limits and creating cyclelanes and separated cycle lanes.
2. Addressing poverty n. Inequity in the wider city.
3. Addressing climate change.

Proposals in line with these priorities have my unequivocal support.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Live within your means. Invest what you can afford which is a lot less. Dont raise taxes to save yourselves from hard decisions. Cut harder. Do less.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Substitute investment. Invest less in something else lower priority like libraries and rail.. Dont just keep adding new stuff you want to do.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: Public transport - in Auckland - always loses money. By definition any public service should never make a profit.. so add a bus route if you want, but expect it to make a loss - or charge what it really costs for each trip. That is the nature of public services. Don't squeeze more money out of residents if they don't plan to catch the bus.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: If people in the area want the bus stop then they should pay for it! And I think that the whole area would use the bus stop, not just people within 500m

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: It's reasonable to expect some pain from covid. We've been luckier than most.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland Council budget is poorly plan and just benefiting those high pay (6 figures) post holders. Our last 10 years has not effectively accomplice with already billion cost over runs. Please stop doing this kind of surface work and save the resources and cost. Don't blame Covid-19 for cost over runs and put up so call a one off 5% bla bla bla. Put your team to compare against our neighbor country on the cost to build/repair a road/park and etc. Just the 10 major items will give the answer.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Existing funding is more than enough to address the climate change for the city. Allowing people freely to cut down trees is a failure. This policy must be reinstated. Trees cutting must be monitored. Sub-division of property must not be allowed so to keep the cover surface and encourage more trees planting in the vicinity. Buses should runs on Hybrid engine and gradually change to hydrogen powered engine when they are commercially usable.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Existing budget is already more than enough for the purpose. One of the main reason behind over flow is over population and allowing sub-division of property is the reason behind the whole issue. Sub-division of property must be disallowed immediately. Instead, open up more land for development outside the city. Investment should be pouring in the new housing areas.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Other
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The council should focus more on cutting costs. Also since interest rate is at an all time low it is a good time to take on more debt to tackle short term deficits. While long term the council should focus on efficiency and increasing investments.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Anecdotally half of the buses I see on the roads are "Not in service". Does anyone actually know the number and how much it's costing the council? Can we invest in technologies like machine learning to reduce the need to move around buses wastefully and make the process more efficient?

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Other

Tell us why: I might not fully understand the consequence of under investment in this area. But it's clear costs need to be cut and this could be a good candidate.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I do support closing under utilized facilities and moving services online.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Don't know
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

Tell us why: Privatize the local transport business. Market forces will fix it.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why There is a lack of focus on traffic and congestion which has been getting worse.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Important to act now. I demand a reduction in the salary of the CEO's like Watercare and Auckland Transport. That would help the cause.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate emergency! We need to take action immediately for our children and grandchildren

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water is an absolute NEED.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community is what built Orakei Marae and subsidised my education.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Based on the last have your say survey, it is just a complete waste of time/'virtue signalling' followed by completely ignoring what the people said in the survey. If you have already made your mind up what you intend to do, cut out the sham and don't hold a survey or tell them that you do not intend to take any notice of it. If you really want to know what people want - listen to what they say and don't just ignore them.

I would like to see the council and the organisation of the council actually start trying to look after the people in the city rather than just treat them as just being a source of funding. This means actually listening instead of trying to push through political agendas. the council organisation itself has become politicised - which is unacceptable. We have had a succession of mayors who have totally failed to control the council organisation who treat the council as a body to vote them funds. It is not good enough.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Councils along with Government departments have a proven history of costing anything more than it would cost a private individual. In the current situation it is best to keep as much money as possible in the community as this will provide the largest impact to the overall economy bouncing back. A large number of people are being hit by the impact of the corona virus and it is the general economy that needs to bounce back not the wasteful council and its pet projects.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: The climate issue, pollution, congestion, over priced housing are all linked to there being too many people on this planet and in recent years in NZ - with Auckland seeing the biggest increase. Any money spent chasing a proposed investments in climate change projects - just adds to this flooded concept of chasing content growth. We need a focus on sustainable improvement to a manageable population, not just the traditionally constant growth.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: It will not in the long term resolve water quality issues.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: If the facilities are owned by the people of Auckland, then this is the lowest cost model in the long term. Leasing and other fancy financing methods is just about lining the pockets of people linked to the council. I currently live in the UK and this approach is the reason the main streets in the UK are currently half empty and falling down. Do not go down this direction if the main streets of Auckland are not to be slowly destroyed. Walk down any main street in any town in the UK and see the result - poverty

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The council needs to work within it's budget. How many times does the council keep saying oh we need this "one-off" rates increase? Constantly! How about just focusing on the important things, prioritize and drop the nice to haves? It isn't hard and every household in this city has to do it!

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Any response to climate change should be a central government responsibility not the council. I am very disappointed in the council declaring a meaningless and virtue signalling "climate emergency"! There is no such thing and shows gross ignorance amongst councilors that supported the initiative.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Again! Auckland council need to prioritize! If water quality is an issue then take the money needed from elsewhere in the budget!!!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Support - just drop the "carbon footprint" BS!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I do not support any city centre targeted rate. The city centre is becoming irrelevant especially as a CBD. The Auckland council supports Queen Street landlords too much. The council should be responsible for tree management around power lines. The trees

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The things that are important to me:

* transport - being able to move around the city with minimal traffic. AT need to stop creating traffic congestion. AT need to stop taking road space for cycle lanes! Buses use the roads too and are effected by congestion created by AT.

* basic amenities such as libraries.

* zero rates increases

* the council actually learning to live within a budget and not keeping on going back to rates payers for yet another "one off" rates increase

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I support infrastructure expenditure that everyone benefits from such as waste, roads and water. I do not support funding of arts, cultural activities, cycleways, heritage sites. These are subjective and politically driven. They should be directly funded by the people who want them. It cannot be demonstrated that the majority of the population support these. Also look more at cutting the cost of Council itself.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I partly support this. Focus on removal of diesel buses, and freeing the flow of private traffic. Look at conserving natural environments by cutting urban spread. Avoid virtue signaling, and trying to change peoples opinions.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: The costs are too high. Choose the slower approach. Water shortages are actually infrequent. Last year is not representative.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: These things should not be supported uniformly by all tax payers. You do not have the right to spend someone else's money on non-vital projects. These are all special-interest items. They need to be funded by the people who use them.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

n/a

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: The cost is too high. It is impossible to demonstrate that the outcome will be valuable. Wait until future economic recovery occurs.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why I do not agree with public funds being used to support businesses or art/cultural activities. Businesses must survive based on providing a service people want. Arts/cultural activities must be funded only by the people to want them. You have no right to spend public money evenly on an activity that many people may not use or support. People should donate a percentage of their taxes to these activities if they choose.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why Do well enough explained. Could be meaningless.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Other

Tell us why Anything that gives a strong business voice to counter a spendthrift Council is an improvement

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

You have turned beautiful leafy streets into future slums with up one home replaced by numerous houses, flats and apartments and usually with insufficient parking. There has been no increase in infrastructure to cope, the traffic in my suburb is now choking the streets and many streets are impassable due to the intensified housing parking on the roadside. I did not vote for this.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: While Auckland City Council has to recoup revenue due to covid-19, so do the Auckland ratepayers. To increase spending is reckless. I do not agree at all. Plus your document makes it impossible to read the increase for the ratepayers! I am double degreed and I can't see it. You don't really want to consult?

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: As above. It is reckless of Auckland City Council to use ratepayers money when we are poor ourselves.

Plus I can't see what the increase in rates would be. Not a good consultative paper.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: I can see the increase in rates for this, unlike earlier topics. We need to drink clean water.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: No increase in rates.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

We have been hit by covid-19 so cannot afford a \$330 increase in rates. Unbelievable of Auckland City Council.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: As above. Cannot afford it.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Auckland City Council cannot take money from impoverished ratepayers hit by covid-19 to fill its coffers.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why An increase of \$250k doesn't warrant this change.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Clean water.

Maintain roads.

Use current rate levels for it. You take more than enough already in rates.

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Firstly the council need to take care of their in house management before inflicting rate increases on hard working rate payers. We can't be held accountable for self interest councilors poorly managing their current portfolio's. The salaries' for example are outrageous. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Again the council leave everything to the last minute why hasn't all this been taken care of over time. Everything is catchup, not could enough. This is not a way of justifying increase in rates.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: The water issue should have been dealt with over time, again left to the last minute. AKL has also ways had water issues. Most beaches are contaminated and unable to be swum in throughout the summer after rain.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or

rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: This should have never been a last minute kneejerk reaction, again should have been dealt with over time, they must have known these buildings need the care and attention required. Just another way of justifying rate increases.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Considering the city centre is an absolute disgrace and an embarrassment, no wonder no one goes in there. It's worse than some 3rd world countries. Thank goodness we don't have tourists coming through at the moment, would be a total embarrassment.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Is this encouraging people to take public transport, or just another excuse to justify rate increase's

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Repairs on improving water and other utilities essential

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why Don't no anything about it

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing a joke, infrastructure improvement is way to slow due to all the council bureaucracy and red tape

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The Council has been raping and pillaging Aucklanders for years and done nothing useful. Tossers like Phil Goff have promised big and delivered little.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: How about getting all those filthy NZ Bus run buses off the road. NZ Bus must have the worst bus fleet in the country.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Watercare. Ha. What a joke. Goff campaigned on holding people accountable. What BS that was. What does watercare actually do?

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Stop. Stop now. Stop with the cycle lanes.

Stop starting projects. Just finish the ones that have been going for years.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Stop robbing Aucklanders. It is already too expensive to live in Auckland and the Council is wanting to add taxes and increase rates. How about the council cut their own internal spending . Here's an idea, get rid of that vomit inducing git Phil Goff.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: So you want to tax a whole heap of households for half a dozen people to have a bus. Really. Why doesn't the bus company just put a service on.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Local boards are a waste of oxygen.

An idea, cut local boards and that will help the climate and reduce council costs.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Glen Innes is a failed housing experiment and a traffic congestion bottleneck. Why expand a failure.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Get rid of Phil Goff.

Half the number of council employees.

Sack and deport the Auckland Transport "planners".

Cancel NZ Bus contract.

Slash Watercare.

Hold the countless council/AT/Watercare contractors accountable to completing projects within time and budget.

Goff says he knows Auckland and what Aucklanders want. He says he speaks to Aucklanders and hears their concerns. I call BS to all that. He's never once spoken to me and I'm a born and bred Aucklander. Now seriously questioning why I stay in Auckland.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I believe in the investment in Auckland on some major items that need attention and not to waste money. The bridge is no longer fit for purpose and requires thinking ahead and not just 'now'. So I believe investment for the city should start with this and to have a tunnel instead which could see in the future Trains from the city being able to travel in the tunnel to the Shore. Like a modern city would be. You can have cars use the bridge on the way back but going

should use the tunnel. We are also need to do more on climate change and make this a cleaner city. However I do not agree with yet another rates hike just because Auckland Council do not manage money well.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Agree

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why I would like to see a breakdown of these estimate costs and where the funds are being placed. A better understanding as to how much each would cost and why.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing needs to be a priority and also being cost effective so its available to everyone and not the super rich. Also rates need to be affordable and they are not currently and a lot of people are finding it hard to survive. I used to work in Council and the amount of money it spends is ridiculous.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Auckland needs to live within its budget. Tough decisions need to be made to reduce costs. Be more prudent with expenditure and put off projects with little return on investment.

Reduce the cost of the introduction of bike lanes, reduce office space, sell off or rent assets not fully used. Like all households we are making sacrifices and making tough decisions. Just because it's not your own hard earned money it

doesn't mean that you keep spending beyond your own means. Grow a backbone and make tough calls. Or leave and Auckland will vote people in who can

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: It's really easy to say 'we want more action on climate change'....no kidding!! But it comes at a cost and at the moment we can't afford it. Again live within your means!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Have to increase rates because there is no other way to increase revenue to be able to fix the Harbour Bridge/transport problems, and the water shortages. Try to borrow as least as possible please

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Man made contribution to "climate change" is negligible vs natural changes. Please stop spending money on what you cant change, and spend it on infrasturcture such as roading network capacity improvements and water shortage issues

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Forget about fixing harbours until the water catchment and treatment and delivery issues are fixed please.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: User pays is a fair request for the public to use the facilities. Multi use facilities are also more efficient.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why: They want it, they should pay for it

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I do not support "traffic calming" proposals or any such thing that will hinder current motor vehicle access along Tamaki Drive, nor do I support removal of any current car parking spaces anywhere in the Orakei Ward. In fact there should be more. Council should tender out the contract to private enterprise to build more multi storey car parks

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Please start a genuine process to evaluate a second harbour crossing, there's been talk for decades and still nothing has been done. Please fix the water storage issue and build more dams or containment facilities. You know there is more population using water each year, but there doesn't seem to have been any increase in capacity. And PLEASE make road workers work 24 hrs per day to get projects completed. Quay St is a mess and has been for close to 2 years now, half the time there's nobody working there on weekends and at nights, if we were any other first world city we would have had it done by now, but instead there is constant delay and disruption to city workers, businesses, commuters, and

visitors. It looks like a war zone down there, its a blight on our beautiful harbour area that we hold so dear. And whos dumb idea was it to have works done right at Americas Cup time ?

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You have shown an inability to work within your budget and means and an ability to continue to overpay your staff (witness the increases for the Museum staff at a time of pandemic!!!!) Rate increases and borrowing seems to be the limit of your fiscal imagination.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The dome valley project is an appallingly easy option and our recycling of all waste needs considerable thought and investment. A simple suggestion is to sort at source and adapt the blue top bins to accept several different recyclable bags for the different materials ie glass, plastic and paper etc. Also builders need to be made to recycle their incredible wastage better

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: You should be able to do this within budget! Sack some middle managers!!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: In a time of pandemic its not the time to be planting new flower beds building prayer rooms and creating fancy unused cycle ways. Prioritise your top needs and stay within your budget - rate payers are not a cash cow.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

As above prioritise your needs and stay within your budget - rate payers are not a cash cow. I am against the urban spread that is happening and the gobbling of arable fertile land for housing estates. Auckland is under pressure because of decades of un

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Auckland buses are almost empty outside peak times. By spreading our population so geographically wide you make public transport only viable through city subsidies. Hence USE THE EXISTING LAND WITHIN THE CITY LIMITS WISELY. IGNORE THE NIMBIES AND SPREAD HIGHER RISE BUILDINGS THROUGHOUT THE CITY.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support any priorities

Tell us why Again your track record of mismanagement of public funds suggest that at a time of pandemic and shrinking income means you should be in a holding pattern and being more fiscally responsibility

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why Dont trust your plans GI is already full of shoddy flash social housing. At least the 'Mad Avenue' houses were well built

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Our recycling of all waste needs massive thought and investment for the future. We need local recycling centres that handle all our needs. Toxic landfills need to be a thing of the past. Sort at source for all materials ie glass, plastic and paper etc. Also builders and construction companies need to be made to recycle their incredible wastage. The dome valley project is an appallingly lazy solution to waste and AKLders lazy attitude to recycling needs to be reinvented and incentivized. The massive free 'kerbside collections' are a bad habit. Start a website for donated appliances, beds, bikes etc.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We pay exorbitant rates already, 5% increase is too much. It's becoming unaffordable to live in Auckland. Without any doubt when we retire we will not be able to afford to remain in our home. I feel we get bugger all for the massive amount of money we shell out in rates.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: You are spending money you don't have. How did you hear Aucklanders want greater action on climate change????? Who told you that?? You need to sort out our recycling. What is happening to all the plastic, glass, etc that we pain-stakingly recycle? I'm sure a lot of it's going into landfill hence that's why there's a problem with too much landfill waste. Put our money into initiatives to put this recyclable waste to good use - do something with it!!! Why isn't this being done? The problem's not going to solve itself. Bring back yearly inorganic collections so rubbish isn't dumped in parks, etc and then ending up in the landfill.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: There are signs at my local harbour inlet - Shore Road, Remuera, and Wilsons Beach saying that the water quality is so bad my dog shouldn't even swim. We bought kayaks specifically to launch off the kayak jetty that was specifically built down there and we the tax payer paid for. Haven't been able to use our kayaks for a year due to the poor water quality. It's like living in a third world country. And now you want us to pay even more!!! Belies belief! What are we paying for now????!!!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: OK some leased or shared facilities will be fine that makes sense. But please do not close things down to save money. I don't know how an online service could take the place of an art gallery or community centre? We need something in return for the rates we pay. Please do not close down any public libraries we need them, they are invaluable to the community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You need to review all your costs seriously and look to cut same and go back to focusing on core infrastructure business and ACC core business. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change is a myth you are wasting our hard earned money

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. 2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It is very much the direction in which we should be going

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: On the back of a global pandemic you're proposed start time that affects people who've been compromised by job losses and income is hardly prudent and intrinsically unfair. Wasteful spending should be your first lever instead of impacting ratepayers and other groups with yet more expense.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: New Zealand's emissions are not comparable with other countries who are massive polluters and until they comply this is a complete waste of time. Common sense approach to these sorts of issues should be applied. Nonsensical considering the global economy and uncertainty.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Water quality is extremely important and clean waterways should not be up for debate.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why: Assume you'll do an audit as to usage vs. value add for the community and realise savings that ultimately means your ratepayers aren't adversely affected with increased cost.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Shouldn't this be user pays? Many residents won't use the service. Put the levy (if there needs to be one) on the ticket price.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why You need to have a macro view and employ common sense. People have had their incomes cut, lost jobs, lives disrupted; our key community focus should be getting our people back on their feet. These increased costs for little gain particularly in the loosely coined and not defined 'Climate Change' initiative. There's added financial pressure for your community with very little evidence of an audit on wasteful spending and what you've done to optimise your existing revenue.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I'd like to see some more initiatives around environmental clean-up - beaches etc. Support community groups to form and do these things. There are a lot of people that would like to contribute (often voluntarily!) to be involved and help out. Look to empower your community by getting active as opposed to paying for everything at top market rates.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The increased costs are unwarranted. If the Council is hurting because of Covid, spare some thoughts for the Auckland ratepayers who do not have cash to spend on the Council's frivolities. The Council should stick to their core business, and cut back on all unnecessary expenditure. A complete review of all salaries and staffing levels, and an independent audit are required. NO increases are warranted, and NO increases can be afforded by the ratepayers.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: We have been paying extra money for these things already for years; where the hell has the money we've already paid gone? The ratepayers are not a bottomless pit and you can't keep sucking money from us to pay for things twice or more times over.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Libraries and community centres are core business of the Council - we have been paying rates for years for these to be maintained and upgraded and repaired as required - why has this not been done? Why on earth should we be paying more now for things we've already been paying for? We don't have the money, the Council can't keep taking it from us.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland’s recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: cut services instead-eg cut staff numbers and opening days of libraries-people dont borrow books as much and you have e bks too

cut money spent on festivals etc eg lantern festival can be every second year-its not much different every yr-same lanterns etc-could charge like \$5.00 to enter to offset costs

mangerial staff salarys are ridiculously high-reduce it or cull staff- get them to look after more divisions/services to reduce staff numbers

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: happy for electric buses etc but dont need to plant more trees etc-waste of money-use the land for more housing etc

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: the beaches like st heliers are ok most of the times so no need to invest so future costs can be reduced and monet spent elsewhere-most people go up north or to tauranga etc for pristine beaches and often own baches etc

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: too many community facilities that aren't being used - close them to reduce maintenance etc or lease fulltime to other businesses to generate income - kids do not go to parks and spend playing outside like the olden days as they prefer to be inside on a device - don't build new parks or else disassemble infrequently used ones

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why pourewa valley wks is not really necessary

reduce board size to reduce salary

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why no obvious disadvantages

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

give more consents for infill housing-do it quickly and not have any more large expensive houses -the next generation are not having big families who want a big garden-reasonably priced is what is needed for young people or those who have rented longterm

Tell us why: Require to plant forests of trees daily

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Go vegan will change climate change

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: People deserve a quality service without an increase in prices

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Build a few and more online services like books being delivered etc library books Online Netflix being offered for free by the library a choice of more online movie services etc

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Other

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Other

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Other

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Other

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Other

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

We should decrease rates and help all citizens

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Taxes should cover this

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Other

Tell us why Stop wasting time go vegan ban alcohol and create good karma

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Other

Tell us why Support only businesses that are vegan

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

sustainable housing

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. Constructive Programming for a Peaceful World

Supreme Master Ching Hai #2384 Speaks with the Press

December 18, 2010, Cancun, Mexico

HALLO, noble media members of Mexico and especially here in Quintana Roo Province. I'd really like to convey my appreciation and respect, first of all, for your courageous efforts and commitment to report all the truth and all the important news, to provide accurate information to the public.

WE are here today to talk about the dangerous situation of our planet. First of all, together we thank Heaven for protecting us thus far. We are still alive here in order to make such a discussion today. This is due to Heaven's grace, also of course the physical and spiritual efforts of Earthly beings and all the saints on Earth and above, that our world is still existing. We thank them all.

AND through the media's caring concern for this subject as well, we can speak together about the solution. I have come to lend my humble support to your great endeavor and in the hope that you can save our world, through your noble and powerful work, from further destructive causes that are threatening our world. All this is so that we will live to see our future generations, our children, thrive in better conditions than we do now.

THESE conditions, I'm sorry to say, are getting worse and extremely urgent. For example, we are losing the world's inland glaciers that provide water to over a billion and a half people. Drought-afflicted regions have more than doubled in the past three decades. And fires, floods, and category-5 hurricanes are more frequent and fiercer than ever. There are now about 25-40 million climate refugees, which could easily become a billion within the next few decades. Where will they go?

Methane heats the atmosphere 100 times more than CO₂ but disappears quickly, in 9 or 12 years.

MEANWHILE, potent methane gas once frozen beneath the earth has become a ticking time bomb due to rising temperatures in the Arctic and is now set to trigger runaway climate change. We are living the worst-case scenario and the scientists are crying out for us to hit the emergency brake now, and hard.

HOWEVER, the solution that we are proposing, like focusing on reducing fossil fuels, won't give fast enough results for us because carbon dioxide, once released into the atmosphere, stays for centuries or more. Scientists are now saying that we must take advantage of shorter-lived emissions like methane—which heats the atmosphere 100 times more than CO₂ but disappears quickly, in 9 or 12 years, and black carbon (or soot)—which generates 4,470 times more warming potential than CO₂ but disappears within a few weeks.

THESE are very, very dangerous heat trapping gases but they disappear quickly. If we eliminate them we will cool the planet in a few years. So it's the emergency brake that we need, and the place to start is the livestock industry. Because livestock industry, animal raising, generates the largest human-made source of methane; it is also a very large source of black carbon, or soot, and accounts for at least 51% of all greenhouse gas emissions that heat up our planet.

SO if we stop the livestock industry then we will stop global warming – fast and simple. Furthermore, if we use all the tillable land on the planet to plant organic vegetables, then we will absorb 40% carbon dioxide from the atmosphere.

BUT there are even more compelling reasons to stop the livestock industry and meat production, which I'm sure we all would welcome because it is a very inexpensive but major solution to many serious problems that we are facing right now on our planet. Livestock farming is like producing food in reverse. In fact, the "product" is hunger, war, death and destruction, and maybe even destroying the whole planet, the whole life on this planet. The way we are going looks that way. The many by-products are water shortages, food crisis, water, air, and soil pollution, deforestation, desertification, ocean dead zones, and biodiversity loss. We use almost half of the world's grain supply to pour into the meat and dairy industry; most of our water supply; almost half the global fish caught to feed chickens and pigs; and 30% of the planet's ice-free land. With two hectares of land, we can support either 1 meat eater or 80 healthy vegans.

THE good news is that if we all stop eating meat and dairy, we can regain our all protective ecosystems, stop over 60% of the biodiversity loss, save four-fifths of the economic cost to mitigate emissions within 50 years, and much, much, much more. Of course, we save lives, human lives, by stopping all the sickness due to animal consumption, and stop the global warming to save our planet.

AND we should stop eating fish also because the fish industry has caused the astounding loss of 90% of the large fish in our oceans. We have to stop it in order to revive marine life from its current brink of collapse. We could also enhance public health and stop all the deadly meat-related disease, chronic diseases, fatal diseases, all kinds of disease, from heart disease, cancer, to viral flu pandemics.

Animal raising accounts for at least 51% of all greenhouse gas emissions.

ANYTHING less than the vegan solution will not work for our situation right now. For example, improving fish farming, even with the best methods, still has failed to stop the large-scale polluting of the oceans. And when we say we raise the animals "organically" or capture methane from manure to reduce emissions—these methods also fall exceedingly short of expectation. Even in the case of capturing methane from animal manures, three times that amount is still being released from the livestock digestive process. Plus, this technique cannot be considered clean energy at all, when the same factory farm is destroying the environment in a dozen other ways.

With two hectares of land, we can support either 1 meat eater or 80 healthy vegans.

BUT all these things that I have reported to you, I think you know them all or you know some of them already. And we thank all the kind scientists and diligent researchers of the world. But now, it is the urgent time to bring these emergency facts that we know into constructive, life-sustaining actions. We must help to end all the mass killings of the tens of billions of animals a year, not only to stop catastrophic climate change consequence, but also to save the original goodness of our own humanity in our heart.

WE have to save our loving kindness, by live and let live, by protecting the weak and defenseless, because we are humane, we are the children of God. We should act like God: merciful, compassionate, protective, loving and kind. All the religions have taught us the same anyway, like non-violence, harmony with nature. The world needs not only food and money, but also spiritual infusion. In truth, positive spiritual energy is what has sustained our world up till now, helping us to progress and evolve in many ways.

THEREFORE, respected journalists, ladies and gentlemen, your noble mission is not only to save this planet but also to restore the benevolence of the humans' heart. Because after all, what is more worth saving than the best qualities that we have within ourselves? We must shape our future on virtue and compassion. Then, all generations hereafter shall thrive and flourish.

YOU have my heartfelt best wishes and full support. May Heaven bless you and protect you, especially while on duty.

THANK you for coming.

GRACIAS.

The GOOD NEWS is
WE can STILL SAVE our PLANET

Climate Change Facts

Atmospheric, Biodiversity, Land & Ice Cap, Human, Ocean and Other Impacts of Climate Change

1. ATMOSPHERIC IMPACTS

1. GREENHOUSE GAS LEVELS

- Currently, the IPCC's worst-case scenario forecasts are being realized or exceeded, leading to a catastrophic 1000 parts per million of CO₂ by end of century.^{1,2} To preserve the planet in a similar state as now, humankind must aim to reduce CO₂ levels from the current 385 parts per million to a stabilized target of 350 parts per million.³
- Carbon sinks are saturating and becoming carbon sources that add rather than absorb greenhouse gases:
 - Global plant growth is in a decade-long decline (2000-2009) due to climate change-induced stress from drought.⁴
 - The ocean has absorbed so much CO₂ that it is acidifying at an alarming rate.⁵
- With just a 2-degree Celsius average global rise, billions of tons of methane could be released from the Arctic, leading to mass extinctions of life.⁶

2. RISING TEMPERATURES

- Without drastic action now, a worst-case scenario rise of 4 degrees Celsius, which means spread of deserts, collapse of the Amazon, and massive release of methane and CO₂ gases from melted permafrost, will actually be reached as early as 2060, with a catastrophic warming of 5-7 degrees likely by century's end.^{7,8,9}
- Scientists report that the first eight months of 2010 have been the hottest on record globally.¹⁰
- 2010 was also the year when unprecedented heat and high temperatures were recorded in 16 countries, the highest number ever, including Kuwait, Iraq, Saudi Arabia, Chad, Niger, Russia, Myanmar, and Pakistan.¹¹
- In the past century alone, the temperature has climbed 0.7 degrees Celsius, at a rate 10 times faster than historic norms, due to human causes.¹²
- The past ten years have seen the hottest average annual temperatures ever recorded in our planet's history.¹³
- Without mitigation, much of the USA, for instance, by end of the century would have extreme temperatures of 122 degrees Fahrenheit (50 degrees Celsius).¹⁴
- Pledges made by governments in Copenhagen to reduce greenhouse gases are not enough to avert runaway climate change. They would still lead to a dangerous temperature increase of more than 3 degrees Celsius.¹⁵

2. BIODIVERSITY IMPACTS

- The rate of biodiversity loss is an astounding 1,000 to 10,000 times higher than a natural background extinction rate.^{16,17}
- The current rate of species extinction far exceeds anything in the fossil record.¹⁸
- Ecosystems may be headed towards permanent damage as countries fail to achieve goals to protect animal and plant life.¹⁹

SOME 2010 REPORTS ON SPECIES AFFECTED:

- Antarctic penguin populations declined more than 80% since 1975 due to loss of sea ice.²¹
- Arctic caribou are in steep decline due to climate change-caused starvation as early thaws and freezing over events make plant food inaccessible.²²
- Similar to 2007 and 2009, in September 2010, tens of thousands of walrus came ashore in an unusual behavior, due to lack of sea ice where they normally rest.²³
- Migratory birds are dying because of ill-timed travel that leaves them without adequate food supplies when they arrive at destinations and/or places like wetlands drying that no longer provide habitat.²⁴

- Up to 270 unique species are now being lost every day.²⁰
- The Earth is said by some experts to be undergoing her “sixth great extinction event” due to climate change as well as other mostly human-caused factors.²⁵
- As global average temperature increase exceeds about 3.5 degrees Celsius, there may be extinctions of up to 70% of species around the globe.²⁶

3. LAND & ICE CAP IMPACTS

1. DROUGHT & DESERTIFICATION

- Within 50 years, there could be irreversible drought (permanent desertification) in the southwestern US, Southeast Asia, Eastern South America, Western Australia, Southern Europe, Southern Africa, and northern Africa.²⁷
- The percentage of Earth’s land area gripped by severe drought more than doubled from the 1970s to the early 2000s.²⁸
- Examples of recent regional droughts:
 - China’s northern region, where 10-meter deep cracks began to appear in fields. Without drastic changes in water use, there could be tens of millions of environmental refugees from China appearing within the next ten years.²⁹
 - Having just faced historic floods in 2009 due to a record rise in Amazon River water levels, several communities in Brazil’s Amazonas state have been isolated by drought and can no longer be accessed by boat, only by foot through the forest.^{30, 31}
 - Iraq, China, Chad, Australia, Mongolia, Africa’s Sahel region, among others, have been suffering drought conditions in 2010.^{32, 33, 34, 35, 36, 37}

2. EXTREME WEATHER EVENTS

- Extreme weather events are becoming more intense and more frequent.^{38, 39}
- Some of 2010’s major disaster events:
 - Russian heat wave and fires. The summer 2010 heat wave as well as the polluted air from the forest fires caused fatalities in Moscow to double to a total of 700 people per day.^{40, 41} City officials of Moscow, Russia reported a 60% increase in the mortality rate this past summer, when nearly

11,000 of the city's inhabitants perished due to the effects of excessive smog and record high temperatures.⁴²

- Pakistani floods. Massive floods, the worst in the nation's history, resulted in about 2,000 fatalities, with more than 20 million injured or homeless. One-fifth of country was underwater.⁴³
- Chinese landslides. Nationwide floods and landslides left over 3,100 killed and over 1,000 missing in 2010 alone. Floods across China increased sevenfold since the 1950s.⁴⁴
- Brazil was struck by extreme heavy floods in April and June 2010 with hundreds of fatalities each time.⁴⁵
- Poland suffered her worst flooding in decades in May 2010.⁴⁶
- Forest fires raged in Portugal in summer 2010, spurred on by low humidity levels, strong winds, and temperatures reaching record highs of 40 degrees Celsius.⁴⁷
- In Chad and Nigeria in 2010, floods wiped out the small amounts of food crops left after the drought.⁴⁸
- Extreme cold and snow storms in 2010 in India, Northern Europe, North America, and South America.
- A lot of earthquakes and volcano activity in 2010 disrupted Indonesia, Iceland, Turkey, Chile, Haiti, etc.
- Global warming can cause ice-capped volcanoes like Iceland's Eyjafjallajökull to more easily erupt due to the ice loss causing a release of pressure on the hot rocks beneath the Earth's surface.⁴⁹
- Landslides and avalanches in high mountains have increased over the past decade due to global warming. Volcanoes are increasingly at risk of collapse with mega-landslides that could bury cities.⁵⁰
- Glacial lake outburst floods are increasing as lakes from glacial melt grow in number and size in Nepal.⁵¹

3. FOREST DECLINE

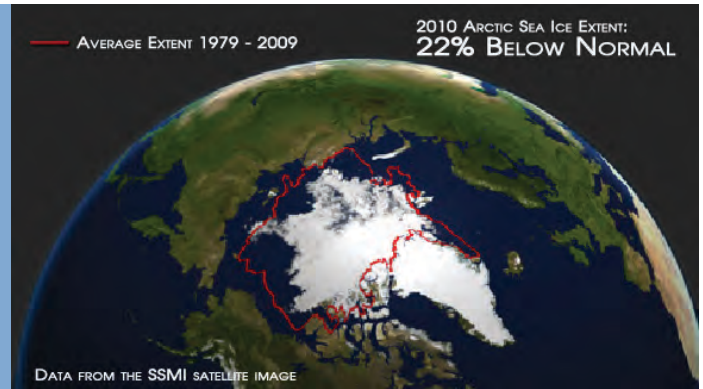

- Africa had the second highest net annual loss of forests in 2000-2010, with an alarming 3.4 million hectares that disappeared each year.⁵²
- Deforestation accounts for approximately 20% of all greenhouse gas emissions.^{53, 54}
- Trees absorb less carbon as climate warms.⁵⁵ Forests could even start to release huge amounts of CO₂ from trees and soil.^{56, 57, 58} They already do release CO₂ in huge amounts through forest fires.⁵⁹
- Bark beetle infestations in North American forests are spreading with global warming and turning forests into carbon emitters.⁶⁰

4. ICE: ARCTIC & ANTARCTIC WARMING

- Atmospheric methane in the Arctic has spiked sharply upward, increasing 33% in just 5 years.⁶¹
- Melting permafrost in Siberia is releasing five times the amount of methane than was previously thought.⁶²
- The East Siberian Arctic Shelf's shallow undersea permafrost is also showing instability and releasing significant amounts of methane.⁶³
- The Arctic tundra is already emitting significantly more methane and nitrous oxide than previously estimated.⁶⁴
- Some scientists are calling the thawing Arctic a "ticking time bomb."^{66, 67, 68}
- Current warming makes it unlikely that the Arctic will return to its previous conditions.⁶⁹

This year's summer Arctic sea ice (2010) was at its third **smallest** area on record, with all three most shrunken area events occurring within the **past four years**.

(US National Snow and Ice Data Center [NSIDC], 2010 annual report)⁶⁵

- In winter 2009-2010, Arctic warming brought severely cold winds and heavy snow to eastern North America and eastern Eurasia.^{70, 71, 72, 73}
- Overall warming has extended the annual melting period for Arctic sea ice to 20 days longer now than three decades ago, meaning more heat can be absorbed by the Arctic sea, and big impacts on marine ecosystems and North American climate.⁷⁴
- Due to disappearing ice, polar explorers were able for the first time to journey around the North Pole in a small fiberglass sailing boat, a feat that would have been impossible even 10 years ago without an ice-breaker ship because the passages were sealed with ice.⁷⁵
- The Arctic is warming at twice the rate of anywhere else on Earth.⁷⁶
- The Arctic sea ice cover in 2007 was the lowest ever recorded and the Northwest Passage was navigable for the first time.⁷⁷ Only 10% now is older and thick ice, while over 90% is newly formed and thin.⁷⁸ Scientists forecast a completely ice-free summer as soon as 2012 or 2013.^{79, 80}
- Without the protective ice to reflect sunlight, 90% of the sun's heat can enter the open water, thus accelerating global warming.⁸¹
- The world's two major ice sheets, **Greenland and Antarctica**, are now melting at accelerated rates, whereas before 2000, they were thought to be stable.⁸²
- Greenland is seeing its worst ice melt and glacial area loss in at least five decades.⁸³
- Glaciers have recently doubled or tripled their movements toward the sea.⁸⁴
- "Icequakes" caused by breaking icebergs have more than tripled since 1993.⁸⁵
- The possible, complete loss of the Greenland Ice Sheet would result in a 7-meter sea level rise.⁸⁶
- Melt water speeding the Greenland Ice Sheet melt could cause its disintegration over decades rather than centuries, as previously forecast.⁸⁷
- On August 5, 2010, one-quarter of Greenland's Petermann Glacier, four times the size of New York's Manhattan Island and the largest in nearly half a century, broke off. "The freshwater stored in this ice island could keep the Delaware or Hudson rivers flowing for more than two years," said Professor Andreas Muenchow of the University of Delaware.^{88, 89, 90}
- On the Antarctic Peninsula, 99% methane gas has been seen continuously bubbling up in certain areas of the water's surface.⁹¹
- A major review published in 2009 found that especially Antarctica's ice shelves on the Western Peninsula are retreating at an ever-accelerating rate, speeded by warming waters beneath the shelves.^{92, 93, 94}
- Over 2008, the Wilkins Ice Shelf on the Western Antarctic Peninsula disintegrated.⁹⁵ In 2002, the vast 12,000-year-old Larsen B Ice Shelf took only three weeks to disintegrate entirely.⁹⁶

5. ICE: GLACIER MELT

- More than 46,000 glaciers and permafrost expanses are thawing rapidly in “the Third Pole,” the Earth’s 3rd largest store of ice after the Arctic and Antarctic, located on the Tibetan plateau and Himalayas. Known as “Asia’s water tower,” the region’s glacial retreat could affect more than 1.5 billion people across 10 countries.⁹⁷
- With Bolivia’s 18,000-year-old Chacaltaya Glacier already gone, other South American Andean glaciers could disappear within a few decades.^{98,99}
- Kyrgyzstan’s glaciers are receding 3 times as fast as during the 1950s, or as much as 50 meters per year. 95% of the glaciers could be gone by the end of the century.¹⁰⁰
- Africa’s Mount Kilimanjaro has lost 85% of its glacier cover since 1912 and could be completely gone in 20 years.¹⁰¹
- The US Glacier National Park is set to be glacier-free by 2020, 10 years earlier than previously forecast.¹⁰²

4. HUMAN IMPACTS

1. CLIMATE REFUGEES

- There are an estimated 25-30 million climate refugees. Numbers may increase to 200 million, or up to 1 billion, by 2050.¹⁰³
- Nepal’s first “climate refugee village” of 150 people is being resettled due to climate change-induced water shortage. (July 2010 ^{104, 105})

2. CONFLICT

- The US intelligence community considers global warming as a serious security threat. Top US intelligence analyst Thomasingar indicated that floods and droughts will soon cause mass migrations and unrest in many parts of the world. (2010 ^{106, 107})
- Evidence points to global warming as a primary cause of the violence in Darfur. (2007 ^{108, 109})

3. DISEASE

- Warmer temperatures are causing the spread of malaria, Blue-tongue virus, West Nile virus, dengue fever, and other diseases to reach millions more people never before exposed to them, in higher latitudes or on new continents.^{110, 111}
- An additional 400 million people could be exposed to malaria by 2080 due to climate change.¹¹²
- More respiratory diseases like asthma and mental illnesses related to disasters are expected with global warming.^{113, 114}

4. MORTALITY

- Climate change disasters are already responsible for some 315,000 deaths a year, with another 325 million people severely affected.¹¹⁵

5. SHORTAGE: FOOD

- Half the world’s population will face serious food shortages within the century.¹¹⁶
- Harvests are already distressed by drought or floods in Russia, Germany, Canada, Argentina, Australia, Ukraine, Pakistan, etc. (Sept 2010 ¹¹⁷)

- Food prices rose 5% globally in August 2010. In Mozambique, food riots in response to raised bread prices led to 10 fatalities and 300 injuries. (Sept 2010 ^{118, 119, 120})
- High food prices that sparked deadly 2008 food riots worldwide were due to a combination of climate change and increased demand for animal feed from populations in India and China. ¹²¹
- The number of people suffering from hunger exceeded 1 billion for the first time in 2009. ¹²²
- Over 9 million people die worldwide each year because of hunger and malnutrition. Five million are children. ¹²³

6. SHORTAGE: WATER

- The world's rivers are in a "crisis state" on a global scale. Water supplies for nearly 80% of the world's populations are highly threatened. Nearly a third of sources studied are also highly jeopardized by biodiversity loss. ^{124, 125}
- Recent regional reports on water shortage:
 - The Middle East's water supply has shrunk to a quarter of its 1960 level. ¹²⁶
 - The Tigris and Euphrates rivers dropped to less than a third of their normal levels due to drought. ¹²⁷
 - UK's increasingly hotter, drier summers could cause extreme water shortages as river flows are reduced by 80%. ^{128, 129}
- Sources of groundwater for wells, which support half our world's population, are running dry. ¹³⁰
- 1.1 billion people lack access to safe drinking water. (2005 ¹³¹)

5. OCEAN IMPACTS

1. ACIDIFICATION

- Oceans are acidifying 10 times faster now than 55 million years ago when a mass extinction of marine species occurred. ¹³²
- If emissions aren't stopped, a mass marine extinction is possible by the end of the century with degraded coastal waters and outbreaks of toxic algae and jellyfish. ¹³³

2. DEAD ZONES

- Oxygen-depleted dead zones caused by global warming can remain for thousands of years. ¹³⁴
- Climate change, as well as agricultural run-off, is causing new and larger low-oxygen dead zones. Now well over 400 in number and usually along coasts, dead zones have been doubling every decade since the 1960s. (2008 ¹³⁵)
- Toxic algae growth could become a tipping point. In the Baltic Sea, record high temperatures in summer 2010 led to an immense patch of algae the size of Germany, and spreading. ^{136, 137} Toxic algae infestations are occurring with ever greater frequency in both inland and ocean waters worldwide. ¹³⁸

3. CORAL BLEACHING

- In Southeast Asia and the Indian Ocean, experts are reporting coral bleaching in 2010 as the worst since 1998, when a similar event caused 16% of the world's coral reefs to perish. ¹³⁹

4. OCEAN CIRCULATION

- Over the next century, the Atlantic Ocean circulation might slow to a stop or reverse due to large amounts of melted freshwater changing the ocean's salt concentration. Such an event could trigger an ice age in Europe and North America.^{140, 141}

5. OCEAN WARMING

- An estimated 90% of the heat from greenhouse gases over the past 50 years has been absorbed by the oceans, all the way to the deep ocean floor. If the heat currently being poured into the deep ocean were to stay in the atmosphere instead, our ambient temperature would rise at a rate of 3 degrees Celsius per decade. The Antarctic Ocean has the strongest deep warming, and is adding to sea level rise as well, both through expansion and the melt of land ice into the ocean.¹⁴²
- Frozen methane from beneath the ocean floor could be released in massive amounts if the oceans are warmed enough, thus leading to further catastrophic warming. Sudden explosive releases of methane could also trigger 15-meter tsunamis. At the current rate, sea temperatures could increase by as much as 5.8 degrees Celsius by 2100.¹⁴³
- The ocean temperature is rising 50% faster than previous 2007 estimates.^{144, 145}

6. PHYTOPLANKTON LOSS

- Warming oceans caused a 40% decline in phytoplankton populations since 1950, which will have serious consequences. Phytoplankton not only provides crucial support to the marine ecosystem, it produces half the world's oxygen and eliminates CO₂.¹⁴⁶

7. SEA LEVEL RISE

- Dr. John Holdren, president of American Association for the Advancement of Science, predicts a possible 4-meter sea level rise by end of the century,¹⁴⁷ and Dr. James Hansen, NASA's head of the Goddard Institute for Space Studies, has stated the likelihood of a 5-meter sea level rise by end of the century.¹⁴⁸
- A sea level rise of even 1 meter would result in over 100 million climate refugees and endanger major cities like London, Cairo, Bangkok, Venice, New York, and Shanghai.¹⁴⁹

EXAMPLES OF COUNTRIES AFFECTED BY SEA LEVEL RISE:

- **Âu Lạc (Vietnam):** At the nation's rice bowl region, the Mekong Delta, ocean salt water has encroached an unprecedented 60 kilometers up-river in 2010, threatening 100,000 hectares of rice.¹⁵⁰
- **Thailand:** Seawater is expected to reach Bangkok's ground level in 25 years.¹⁵¹
- **Egypt:** More than 58 meters of coastline have vanished every year since 1989 in Rasheed.¹⁵²

- Sea level rise caused at least 18 island nations to completely disappear while many more coastal areas are continually threatened.¹⁵³ More than 40 other island nations are at risk from rising sea levels.¹⁵⁴
- Sea level rise threatens half of the world's population living within 200 kilometers of a coastline. Already, low-lying coastal regions and deltas see effects: 17 million in Bangladesh have fled their homes, mainly because of coastal erosion. Groundwater sources are contaminated by saltwater in Israel and Thailand, small island states in the Pacific and Indian Oceans and the Caribbean Sea, and in some of the world's major deltas, such as the Yangtze Delta and Mekong Delta.¹⁵⁵

- Current global consumption patterns would require a second Earth. Natural resources are currently being consumed at 1.5 times the capacity that Earth can provide.¹⁵⁶
- Tipping points could arrive suddenly. Sudden shifts in the Earth's natural systems could arrive precipitously, without warning.¹⁵⁷

6. OTHER IMPACTS

FINANCIAL COSTS

- Damage from rising seas, floods and heat waves due to the loss of Arctic Sea ice will cost the sectors of agriculture, real estate and insurance up to US\$24 trillion by 2050. Heat waves, flooding and other factors are already resulting in hundreds of billions of dollars lost annually.^{158, 159}
- Global losses due to natural disasters could triple to US\$185 billion per year by 2100. Damage from climate change-related powerful cyclones could add to this up to US\$58 billion annually.¹⁶⁰
- In the 2009 Copenhagen climate change summit, nations approved a US\$30 billion fund to help vulnerable countries cope with climate change impacts, plus agreed to provide US\$100 billion per year from 2020.^{161, 162}

Livestock Industry's Environmental Impacts

#2384

Biodiversity Loss, Deforestation, Desertification, Disease, Greenhouse Gas Emissions, and More

1. BIODIVERSITY LOSS

- The damage caused by livestock production threatens flora and fauna across the globe.¹
 - Example: In Mongolia, 82% of the total land area is designated as permanent pasture for livestock grazing, which is the largest single threat to biodiversity loss in Mongolia and throughout Central Asia.^{2,3}

2. DEFORESTATION

- Livestock raising is one of the main drivers of deforestation.⁴
- Since the 1990s approximately 90% of Amazonian deforestation has been due to clearing land for grazing cattle or growing feed for livestock.⁵
- In Queensland, Australia, 91% of all tree clearing over a 20-year period has been done for livestock grazing.⁶

3. DESERTIFICATION

- Desertification is caused by overgrazing and expansion of livestock crop-growing areas.⁷
- Over 50% of US soil erosion is caused by livestock, which leads to desertification.⁸
- Some 75 billion tons of topsoil are being eroded annually due to agricultural mismanagement, climate change, and livestock grazing. In the United States alone, 54% of pasture land is overgrazed, with more than 100 tons of topsoil lost per hectare per year.⁹
- In 2010, Iraq, China, Chad, Australia, and Mongolia, among others, reported serious drought, with livestock grazing making conditions worse.

4. DISEASE

- Over 65% of human infectious diseases are known to be transmitted by animals.¹⁰

The filthy and inhumane conditions of factory farming harbor lethal bacteria and viruses such as avian and swine flu.¹¹
- Other diseases related to meat eating: tuberculosis, listeria, Crohn's disease, mad cow disease, Campylobacter infection, Staphylococcal illness, foot-and-mouth disease, HIV, pneumonic plague (as in 2009 deadly outbreak in China), etc.
- Antibiotics regularly administered to livestock on factory farms causes bacteria to mutate, leading to diseases that are medication-resistant.^{12,13,14}

5. GREENHOUSE GAS EMISSIONS

- Livestock and their byproducts are accountable for **at least 51%** of all greenhouse gas emissions.¹⁵
- **Aerosols**, or particles released along with CO₂ from burning fossil fuels, despite their detrimental health aspects, have a cooling effect that roughly cancels the warming effect of the CO₂. Therefore, livestock emissions have played an even larger role in global warming in the near term.¹⁶
- **Methane** is almost 100 times more potent than CO₂ over a 5-year period,¹⁷ but disappears from the atmosphere much more rapidly compared to centuries or millennia for CO₂. The number one source of human-caused methane is animal agriculture.¹⁸ Based on recalculations, US researchers from the University of Missouri have concluded that the amount of methane emitted from the waste on dairy and pig farms could be as much as 65% higher than previously estimated.^{19,20}
- **Ground-level (tropospheric) ozone** is the third most prevalent greenhouse gas after carbon dioxide and methane.²¹ Fermented animal feed generates harmful ozone gases, and at regional levels higher than those emitted by cars.^{22, 23, 24, 25}
- **Black carbon** (4,470 times more potent than CO₂), mainly produced from burning forests and savannahs for livestock, is responsible for 50% of total temperature increases in the Arctic and the acceleration of melting glaciers worldwide. Black carbon remains in the atmosphere for only days or weeks, so reducing emissions can be an effective rapid response to slow warming in the near term.²⁶
- **Nitrous oxide** is a greenhouse gas with approximately 300 times more warming potential than CO₂. Sixty-five percent of global nitrous oxide emissions originate from the livestock industry.²⁷

6. LAND USE

- Livestock production accounts for 70% of all agricultural land and 30% of the ice-free land surface on the planet.²⁸

7. OCEAN DECLINE

- The livestock sector is the largest source of nutrient pollution, which causes toxic algal blooms and oxygen depletion, leading to oceanic “dead zones” that are unable to support any aquatic life.²⁹
- 90% of all large fish have already disappeared from the oceans, largely as a result of overfishing.³⁰
- Aquaculture (fish farms), accounting for 50% of fish and shellfish consumed globally, is endangering wild fish.³¹
 - Example: It takes up to 5 pounds of wild fish to produce 1 pound of salmon.³²
- One-third to about half the global fish catch is fed to livestock (pigs and chickens).^{33, 34}

8. POLLUTION

- Of all sectors, the meat industry is the biggest source of water pollution. Excessive and unregulated animal waste, chemical fertilizers, pesticides, antibiotics, and other livestock-related contaminants choke waterways.³⁵
- The livestock industry emits 64% of all ammonia, which causes acid rain and hydrogen sulfide, a fatal gas.^{36, 37}
- One animal factory farm produces more waste and pollution than the whole city of Houston, Texas, USA.³⁸
- In 1996, the US cattle, pork, and poultry industries produced 1.4 billion tons of animal waste, or 130 times more than produced by the entire human population.³⁹

- Manure is already known to be a major cause of both groundwater pollution and atmospheric warming. Moreover, runoff from manure and other crop fertilizers accounts for some 230 oxygen-depleted dead zones along the US coast alone.^{40,41} Examples:
 - The dead zone in the Gulf of Mexico created by farm runoff is one of the world's largest at up to 8,000 square miles so far.⁴²
 - A February 2010 outbreak in Brazil's Rodrigo de Freitas Lagoon caused the suffocation and death of 80 tons of fish.^{43,44}
- Aquaculture pollutes the environment with toxic algae and chemicals such as pesticides and antibiotics.⁴⁵

9. RESOURCE OVERUSE

- **Fuel:** One 6-ounce beef steak requires 16 times as much fossil fuel energy as one vegan meal containing three kinds of vegetables and rice.⁴⁶
- One kilogram of beef is equivalent to driving 250 kilometers and burning a 100-watt light bulb for 20 days non-stop.⁴⁷
- **Emissions:** The meat-based diet's emissions is equivalent to driving a car 4,758 kilometers – that is 17 times the emissions of an organic vegan diet, which is equivalent to only 281 kilometers. In other words, an organic vegan diet produces 94% less emissions than a meat-based diet.^{48, 49}
- **Land:** One meat eater requires two hectares (four acres) of land to support him. But that same two hectares could support the healthy lifestyle of 80 vegans. (Supreme Master TV's interview with US law professor Gary Francione, Rutgers University, USA, 2008)
- **Food:** Currently, 80% of hungry children live in countries that export food crops typically to feed farmed animals.⁵⁰
- Two-thirds of US grain exports feed livestock rather than people.⁵¹
- Producing 1 kilogram of beef requires 7 kilograms of grain for feed that could go to direct human consumption,^{52,53} while yielding less than one-third the amount of protein.⁵⁴
- About 40% of the global grain supply is going to livestock,⁵⁵ and 85% of the world's protein-rich soy is being fed to cattle and other animals.⁵⁶
- **Water:** A person uses up to 15,000 liters of water per day for a meat-based diet, which is 15 times as much water as a vegan would use.^{57,58}

10. WATER SHORTAGE

- According to the Stockholm International Water Institute, agriculture accounts for 70% of all water use, most of which goes toward meat production.⁵⁹
- It takes up to 200,000 liters of water to produce 1 kilogram of beef, but only 2,000 liters to produce 1 kilogram of soybeans, 900 liters to grow 1 kilogram of wheat, and 650 liters for 1 kilogram of corn.⁶⁰

MEAT VS. VEG DIET

- **GHG emissions:** Meat diet generates 17 times more emissions than an organic vegan diet.⁶¹
- **Land:** Two hectares, or four acres of land, could support 1 meat eater or 80 vegans. (Supreme Master TV's interview with US law professor Gary Francione, Rutgers University, USA, 2008)
- **Water:** A meat eater uses 15 times as much water as a vegan would use.⁶²
 - 200,000 liters to produce 1 kilogram of beef
 - 2,000 liters = 1 kilogram of soybeans
 - 900 liters = 1 kilogram of wheat
 - 650 liters = 1 kilogram of corn
- **Fossil fuel:** Animal products require 11 times as much fossil fuel input—releasing 11 times as much carbon dioxide.⁶³
- **Food:** One kilogram of beef requires 7 kilograms of grain to be produced.⁶⁴

COST OF **ONE** HAMBURGER

- 5 sq. meters (55 sq. feet) of destroyed tropical rainforest.⁶⁵
- 23,000 liters (6,000 gallons) of clean water (14 months of daily showers).^{66, 67}
- 1.8 kilograms (4 pounds) of grain consumed by the cow (about 3 loaves of bread).⁶⁸
- 4 kilograms (8.75 pounds) of topsoil lost (topsoil = fertile layer of soil).⁶⁹
- 30 plant species, 100 insect species, and dozens of birds, mammals lost.⁷⁰

The Solution

Organic Vegan Diet and Farming, plus Other Considerations

1. ORGANIC VEGAN DIET

- According to a 2010 report from the United Nations Environment Program (UNEP), the two key sectors of energy and food must change dramatically in order to avoid the worst environmental impacts of climate change. With a growing population, this necessitates a shift away from an animal product-based diet.¹
- A projected doubling of meat and dairy consumption by 2050 would imperil the planet due to increased emissions related to livestock, increased consumption of the Earth's biomass (plant matter grown to feed livestock), and reactive nitrogen (manure and fertilizer chemicals causing multiple harms to the environment). A diet of 100% protein from soy sources would have only 1% of the impact in 2050 of a diet in which 100% of protein was from meat.²
- A person adopting a vegetarian diet for a year would reduce more emissions than someone swapping their car for a Toyota Prius.³
- The emissions from consuming a diet of 100% locally grown food was compared to one of 100% plant-based foods. A vegan diet led to a reduction of 7 times the emissions of a locally-grown diet.⁴
- In 2008, Germany's Foodwatch Institute estimated that shifting from a conventional diet including meat and dairy to a conventionally-raised vegan diet would reduce emissions 87%, while shifting to an organic diet including meat and dairy would only reduce emissions 8%. By contrast, a 100 % organic vegan diet would reduce emissions 94%.^{5,6}
- Switching to a diet that replaces all meat with soy by 2050 would reduce the protein-associated carbon footprint 96%.⁷
- Producing one kilogram of beef generates 19 kilograms of CO₂ emissions, while one kilogram of potatoes generates only 280 grams of CO₂.⁸
- Eating more of certain animal products such as chicken (instead of beef) will NOT help mitigate environmental impacts. Researchers have found that protein from chicken has an energy efficiency rating of just 5% compared to plant-based foods such as tomatoes, with 60%; oranges and potatoes at 170%, and 500% for oats.⁹
- Eating fish will not help either. Fish was found to be similarly inefficient, in part because of the energy required for long-distance voyages to hunt large fishes such as tuna. Also, even the so-called "best managed" fish farms generate widespread environmental damage.¹⁰

2. ORGANIC VEGAN FARMING

- Organic farming methods help rebuild and replace carbon in the soil.^{11,12}
- If all tillable land were turned into organic vegetable farmland, not only would people be fully fed, but up to 40% of all the greenhouse gases in the atmosphere could be absorbed. This is in addition to the elimination of over 50% of emissions caused by livestock raising.¹³
- Land used for meat production could also be returned to its natural state, which in turn helps quickly absorb vast quantities of CO₂ from the atmosphere.¹⁴

- Changes in farming practices, such as greater efficiency in livestock farming methods and better manure management, are not sufficient to meet the UK's 2030 goals for greenhouse-gas emissions. A reduction in meat and dairy production and consumption would more effectively mitigate global warming while improving public health and saving lives.¹⁵

METHANE CAPTURE for energy is an inadequate plan:

- The proposal to capture methane from livestock manure in factory farms is wholly insufficient, because:
 - Most of the methane is from enteric fermentation - over three times the amount from manure.¹⁶
 - The system is not often technically or cost- feasible.
 - Digester systems are implemented usually on farms that collect large amounts of liquid manure daily.¹⁷
 - The many serious environmental problems caused by factory farms are still unaddressed, and more than negate any benefit from methane capture:
 - Global warming / Greenhouse gas emissions
 - Biodiversity loss
 - Excessive water, food, antibiotic and fossil fuel use
 - Air, water, soil pollution
 - Unhygienic bacteria and virus breeding grounds
- Livestock emission reduction plans, such as providing different food sources for animals and using manure for fuel, have been found to reduce emissions only by a few percent and in fact could create more food quality and ethics problems.¹⁸ Meat and dairy consumption must be reduced to significantly minimize livestock emissions.¹⁹

3. OTHER CONSIDERATIONS

- **Health:** A study conducted by Harvard University with tens of thousands of men and women found that regular meat consumption increases colon cancer risk by 300%. In fact, meat consumption is linked to leading diseases, such as heart disease, diabetes, stroke, cancer, and obesity. A vegan diet significantly helps prevent and reverse these conditions.²⁰
- **World hunger:** If everyone ate a plant-based diet, there would be enough food to satisfy 10 billion people.²¹
- **Economics:** By shifting to a vegan diet, the world's governments would save US\$32 trillion by 2050, or a full 80% of total climate mitigation costs.²²
- If farmers in the American Midwest switched from raising livestock to growing fruits and vegetables, US\$882 million could be generated in regional sales, with 9,300 jobs created and labor income increased by US\$395 million.²³

- Producing veg alternatives to meat products is considered a smart and attractive opportunity for the food industry.²⁴
- A report issued by the United Nation's Food and Agriculture Organization (FAO) recommends levying fees for livestock as a way to reduce this sector's emission of greenhouse gases, currently estimated at 7,000 billion tons of CO₂ equivalent annually.^{25,26}
- The United Nations Environment Program (UNEP) and the European Commission jointly launched a major report calling for radical change in the way that economies use resources, emphasizing that a global drop in meat consumption is vital to avoid devastating impacts to the environment.²⁷
- **Biodiversity loss:** A worldwide no-meat lifestyle is calculated to prevent over 60% biodiversity loss.²⁸

We must shape our future on
virtue and compassion. Then,
all generations hereafter shall
thrive and flourish.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Rates increase (although short term) is too high.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: I believe we should be investing more in this area. Especially around coastal change and energy efficiency to really get the ball moving here. Less interested in the busses.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Really important initiative. Would be good to see this extended to include wider runoff to auckland's coast.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: In a COVID world the idea of community services and shared facilities sounds a little bit alarming. Realistically the buildings are going to be demolished and replaced, or repaired. Why should the council not be able to do this (or sell them and purchase an alternate location).

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Natural Environment Targeted Rate - why haven't we heard a significant amount of media about the effects of the Rahui/kauri dieback prevention programme which has been underway in Auckland for over a year? Does the results are not worth hearing?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why I don't support these plans - finalise an Ōrākei Arts Plan to guide future enhancement of art, local heritage and culture at our public facilities and places -investigate and plan for continued improvement of our fields at Thomas Bloodworth Park and Shore Road East.

However all the other ones sound great!

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I believe there are ways other than increase rates by so much. I don't trust that you will keep your promise to return to a lower % increase. You can reduce expenditure - e.g. reduce the council staff salaries, stop AT from wasting money with unnecessary speed and road changes, with all the associated signage and paint, stop the bike lanes.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: Preserve the historic buildings - e.g. libraries - they have charm which is lacking in Auckland. Do not close libraries as they are a hub for the community and provide valuable services to those who can't access online information etc. Libraries are a huge asset - preserve them

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Charge the privately owned golf courses in Te arai for all the water they are draining and the environmental effects they are causing by their developments.

If you are increasing frurakl rates - make sure they DO get the same services - like sealed roads

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Other areas get public transport without extra rates - why not this one?

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why Except CCTV and CPTED - what on earth is this? Surveillance?

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The suburbs are becoming uglier and uglier due to your unitary plan allowing high rise and multi infills that all look the same. Your high rises are obliterating our beautiful volcanic contoured landscape, the tiny dwellings that all look alike will be slums in 5 years, the character of the suburbs is being ruined by developers. The roads are becoming more congested due to the huge housing developments and the bike lanes taking over the car lanes- no infrastructure has been improved. I am so sad to see auckland deteriorating like this.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: NZ and Auckland ratepayers cannot afford to have rates increase. We have been hard hit by covid-19 too.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: NZ and Auckland ratepayers cannot afford to have rates increase. We have been hard hit by covid-19 too.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Aucklanders need to have clean water.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Auckland ratepayers cannot afford to have rates increase. We have been hard hit by covid-19 too.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Auckland ratepayers cannot afford to have rates increase. We have been hard hit by covid-19 too.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Auckland ratepayers cannot afford to have rates increase. We have been hard hit by covid-19 too.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Clean water. Clear egressways.

Important privacy information

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We already have inflated price everywhere. Can't afford to be squeezed more.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: We need to be focused on the wellbeing of NZer first. To make sure we have a strong economy and people are well fed and well housed! We are just a tiny sized country, even we all go to reduce carbon to zero, there won't be any change to the world, as long as China, US and India keep polluting. We need to ask them to do their part unless they cut back theirs. I don't see why we need to be a role model!

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Good choice, so we can cut back the cost. We can only utilize the online system to better service the community.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I can't afford the year on year increase.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: As Auckland's contributions to global climate change is so low, a deferral of this proposal will not have a material affect on climate change

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Council has proven they can't provide consistent and quality water anyway, no point in wasting rate payers money

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: We can't afford this, needs to revert fully to user pays

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control Do not support

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service Do not support

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service Do not support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Do not support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

If you didn't waste our money on continual road works that are not completed efficiently or need upgrading straight away you wouldn't need to increase our rates. Sack useless staff instead

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Should be fully user pays

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why The changes being proposed for St Heliers and Mission Bay are ridiculous and thought up by someone who is out of touch with reality

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why Haven't heard of it

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Concentrate on completing a couple of roading upgrades at a time, instead of having too many on the go and not completing anything. Ps you have ruined Queen street

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: A 5 per cent average general rates increase versus planned 3.5 per cent increase is not acceptable because there is too much waste and inefficiency in spending. There are numerous examples; a case in point is my neighbourhood property where gross incompetency and mismanagement is illustrated in the repair of a council retaining wall adjacent to a steep driveway servicing 4 houses including octogenarian tenants. The driveway which has been unusable for over 3 years. The miscommunication and engagement of incompetent contractors is a total embarrassment

to this city. There are so many more examples. The Council needs to demonstrate to ratepayers that it can deliver services and infrastructure with competence before being let loose to waste more rate payer funds.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: The city needs to move forward and it is clear that purchase of any more diesel buses as an example would be retrograde. The council can do a lot more to protect trees for example now not later and make sensible choices that promote a sustainable future.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Don't know

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: we can't wait until later to take action on climate change and failing infrastructure

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: because reduction of emissions is urgent and needs to be done immediately

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: our children deserve to be able to swim safely and there is a cost to covering the under-investment of previous councils

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Reading is my favourite relaxion and I could not do without the Remuera Library.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I am in favour of doing away with the diesel buses, but not sure about the climate change aspect.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: The quality of water if extremely important

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: I support shared facilities but it would entirely depend on who wanted to "borrow" the library and that would have to be left to the decision of the local library.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Other
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

It would depend on the use of the farm (farmlet) as to how much to charge. Also if they do not have a letter box and some of the other facilities which Aucklanders do have.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why I believe that the local board have " got it right"

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why I do not live there and have no real knowledge of the problems

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I think that the Auckland City Council is top heavy with personnel. Cut back the number on the council.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: If Council stuck to its real core services, then no increase would be necessary in any respects!

Stop taking on tasks that are the responsibility of interested community sector groups. who then go on to put their sticky paws into Council funds which should be sheeted home to the basic core services.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Again, so called climate change is and should be addressed by central government if there is a benefit, not funded by local communities.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Again, the tardiness of Council and its Councillors have led to this situation. Watercare is the Council's responsibility to not waste rate payers' monies as has been glaringly spotlighted since the so-called privatisation of the Council-owned entity!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Once again, core services have been long overlooked for this ongoing investment of maintenance so as to be able to fund what I call non-core services. Get back to your knitting!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Can you not think in any other terms than only increasing taxes on our community?

The Upper Harbour Local Board are proposing a new bus service between Paremuremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Bus services should only be introduced once there is sufficient people to move at a reasonable fare and at least at a zero cost to the wider community. Don't get the cart before the horse.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: You are not prioritising what is really important right now ie WATER! our beaches have faecal contamination. Your response is to fix this in many years and even then unlikely it will be fixed. The council doesn't currently prioritise ie put enough staff on to fix dry weather issues let alone wet weather overflows. And yet you are committed to climate change. Part of this is our environment.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Fix current issues first.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why Focus on what is important which is water quality and ensuring developers are developing nice properties that have space around them.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing. Ensure that the infrastructure ie roads/rail/bus/stormwater/sewerage is put in first and developers pay for it.

Ensure properties built are in keeping with the style of the area.

Ensure properties have any parking ie 4 bedroom homes with 1 car garage - ridiculous as they will just park on the roads as they are!

Too many issues of consents being granted with exemptions!

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: The savings outlined in the 10 year budget may or may not be achieved.

Why I do not support the budget is that far more has to be saved NOW by immediately ceasing projects such as:

- the mostly unnecessary rekerbing, re-concreting footpaths, and re-sowing grass berms. Fillmore must have made hundreds of millions for footpaths rarely used, and kerbing that mostly did not need fixing.

- wasteful bus lanes and cycle ways for a minute percentage of road users. By all means do this in 5 or 50 years when/if the demand warrants it. Don't try and change behaviour to what these woke bureaucrats think we should be doing.

- all at the expense of motorists, who DO occupy the vast percentage of the roads. That will not change for decades – if ever. Auckland topography is not friendly to cycles, and the bus service is still sub standard.

Right now most beaches in Auckland suffer from faecal contamination to some degree. That must be fixed NOW – not by 2028. And Desley Simpson's targeted rate will just tinker with the problem – not solve it. And if Watercare is a so called 'Council Controlled Organisation', Council should take responsibility for its failure to invest in Auckland's fresh water supply many years ago.

I am pleased to see some increase in the expenditure on Water, but don't expect support from ratepayers when so much is wasted on pet projects.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Climate change has been with the world for centuries. It is a natural phenomenon. To blame us, or diesel buses etc is blind acceptance of mis-truths

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: I founded and convened the Wilson's Beach Action Group which partnered with the Orakei Local Board of Auckland Council to re-sand Wilson's Beach in Hobson Bay in 2010. To now have Council install signs warning swimmers not to swim at Wilson's Beach is an insult to us all who volunteered thousands of hours time to contribute to this beach transformation.

All because of successive Council failures to adequately invest in wastewater infra-structure. Water ought be Council's Number 1 priority, not footpaths, cycleways, bus lanes, and so called global warming. Did you see all the snow that fell in Texas recently - yes, Texas.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: They all have some importance, but pale into insignificance when compared to solving the whole city wide immediate water problems.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

No specific comments here

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: No comment

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why All covered in previous questions

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why Not aware of it, or care

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Water - and it should be ranked first by everyone. Without it we die

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Wastage within council. Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: we pay enough rates now to cover this

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I'm not convinced that going into this much debt is the right thing to do. I think the recovery will have to be slower I'm afraid.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: You can't do all of these things - you can't afford it. Leave in the biggest carbon emitters to tackle and defer the other things. Also, enlist more public involvement for initiatives like tree planting - use it to build community

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Continued above inflation increases and "one-off" increases that seem to happy far more than once-off is hurting this city. Rents shoot up as landlords need to cover the additional costs. New money should entirely be found through savings from the overpaid and underworked workforce.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I support getting the dirty diesel buses off our streets; but for health rather than climate change reasons. New Zealand's carbon trading entirely covers the carbon cost of transport so if you need to spend more to avoid climate change then it is economically inefficient and further demonstrates why Auckland Council is not fit to spend our money.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Bigger all has happened already, apart from us not actually having access to water it seems. But extend it, why not. But perhaps lets actually have some targets on what the targetted rate is going to give us, other than the current beaches with warnings all over them and streams that stink of sewerage whenever it rains.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Totally agree - the Council has far too much property at the moment so consolidating facilities makes total sense.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

All land that is zoned residential should be charged the same rate; this will encourage the most efficient use of the land and, hopefully (if the Council planners ever actually do some work) will get much needed homes built.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: Don't know, don't care.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why The council and local board should not be getting involved in using public funds to support the arts. If people want more arts then let them fund it themselves, don't force people who aren't interested to subsidise those who are.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why Don't know, don't care. Another bureaucracy for us to pay for ... yippee!

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

The most important is for the council to disband. Short of this not pissing my money up the wall would be good.

Tell us why: We need to start on dealing with aging infrastructure now

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Other

Tell us why: Electric buses are not necessarily the answer. Battery longevity, disposal and electrical supply issues must be taken into consideration along with decentralisation of the city so people do not have to travel long distances to shop etc

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: On line services do not necessarily improve the quality of life. Human interaction is part of what makes a sense of community strong. A big NO to closing or centralising libraries.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why

7. What is important to you?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Huge budget for Council support, that is, all overpaid staff doing very little compared with their salaries.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Not justified enough.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Great proposals.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: We need to be saving money and cutting back on non essential services not borrowing more. The 5% rates increase is ridiculous in the current climate. My partner and I haven't had a wage increase for 3 year. The CPI is much lower than the proposed percentage increase in rates

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: This is not essential right now. More borrowing needed and increased rates. This should be deferred until the Council borrowing is reduced.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Water is an essential service. We should try and plan these improvements within the current fiscal envelope.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: We should take care of our assets. We should sell those not used frequently. We should explore shared facilities with schools and other businesses to ensure we are fit for the future.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoro and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoro and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: It' called living within your means. we do so should the council

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Don't know

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Too much money is being wasted on non essential projects including cycleways and electrifying public transport when both are severely under utilised in the case of the former and under supported in the case of the latter.

Add a bloated seriously overpaid bureaucracy and now the added costs of combating climate change which in itself is an exercise in futility as not a single action by Auckland City Council will make ANY CHANGE to CO2 in our atmosphere or

indeed anywhere else globally. Climate Change has been happening for a couple of billion years and will continue to happen irrespective of whatever actions NZ takes now and into the future so WHY ON EARTH is this council even including the issue in its 10 year budget. There is plenty of scientific evidence with an alternative view on the human effect on CC but anyone disputing the CC narrative is shut down - CAN SOMEONE ON THE COUNCIL SHOW SOME BALLS AND ACTUALLY LISTEN TO this alternative view then maybe common sense may prevail but I am not holding my breath.

Also I have noted more and more Maori words/terminology appear in Council publications which is fine and good except as evidenced below Maori is taking precedence over English (See Question 2) Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, Maori represent 13% of the NZ population but Councils such as yours are pushing their language ahead of English which has been the official language for ever. Stop pushing these racially divisive points down rate payers throats - what percentage of rate payers are Maori and how much do they pay in rates as compared with the remaining 77% who are non Maori? I guess this is a question that will not be answered. To summarize there are so many critical infrastructure issues facing Auckland but I do not see anything in this plan that will solve them but your glossy pictures look nice! Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: No action that could be taken by this Council will make a jot of difference to ongoing climate change. Over the last 60 years there have been many dire warnings issued by so called experts on CC as to where the world would be by the year 2020. Not a single one of the predictions have come to fruition in fact the world has prospered in every way possible during this period but some of these so called experts continue to hold senior positions at the UN in particular and continue to spew their lies which are then picked up by gullible countries such as NZ. But I certainly do support any/all initiatives to cut waste/recycle and get far smarter in the way we manage ALL waste to the benefit of everyone. Incidentally I would be interested to see how you formed your opinion that Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we as citizens of AKL want greater action on climate change. I do not know of anyone who was asked this question and I have canvassed widely.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Through absolute mismanagement this council has created the sad state of our water management that now exists and requires significant investment to solve. The trouble is no one in council is held responsible and the former CEO has resigned so we just have to suck up whatever council decides to do in terms of making US PAY FOR THEIR ABSOLUTELY SHAMBOLIC PERFORMANCE. But why worry about the water when we have nice pink cycleways to ride our bikes on. If you guys were in a private or public business you would not get past the 1st interview!

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: This sounds to be plain common sense why did it take a Pandemic to make you think this was a good idea. Private enterprise would have done this years ago

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre Do not support

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: You keep telling us that Public Transport is the best way to travel but Aucklanders are already paying through the nose subsidising PT and you now want more from these people in the affected areas who may never step on a bus or train. This is unfair!

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I do not support most priorities

Tell us why See my earlier comments which apply locally. We pay massive rates in our areas but do not get back anywhere near the value of these rates - example in our street we have been waiting over 25 years to have electricity lines put underground but this is not going to happen anytime soon. Also our footpaths are in dire need of renewal but again nothing is being done. In the meantime I see many renewals being done in Glenn Innes as an example which has a huge number of state houses so again we pay - they get. An over simplification I know but the principal still applies.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why I am unaware of this so difficult to comment.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Council will never please everybody on all of these issues and looking forward needs to toughen up and focus on sorting key infrastructure as their absolute priority and stop ALL SELF INTEREST groups from subverting the democratic processes so that Council decisions are clearly for the benefit of ALL AUCKLAND not the minority who shout the loudest. I will watch the next months with interest and hope someone may listed to my comments although I am not holding my breath.

You should familiarise yourself with this policy before submitting this form.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: User should pay

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Other big countries should show the way

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Why did previous labour councils not do more

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Again previous councillors did not do their job

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: North shore residents should pay

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support most priorities

Tell us why They generally are good in our area

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Do not support

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

A plan would be good instead of add hock road works and disruption

This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Libraries should be the building blocks of our communities. They contain books, which contain the answers to all of life's questions. They need more funding, not less.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: I have children. Anything that would make their future brighter should be supported.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: There's more than enough money to do this already; just reallocate funds from poor choices (like fossil fuel subsidies) to cleaning the water.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: Let the community sort out maintenance. Open up the doors to all and you'll see local solutions to local problems, mitigating the need for the government to step in. Libraries should be the building blocks of our communities. They contain books, which contain the answers to all of life's questions. They need more funding, not less.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why:

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why:

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Drop the green agenda and focus on people and infrastructure. The climate has been changing for billions of years and will continue to do so long after we're gone. Please stop using it as a political agenda to charge more rates and keep paying senior staff and consultants extortionate amounts of money.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: I would be interested to know the percentage of ratepayers that wanted greater action on climate change. If it was less than 'the majority' then these rates increases only serve a minority interest in Auckland.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Other

Tell us why: As an accountant I know that the intention of every past Council would have been to use a portion of rates to upkeep and upgrade assets. The fact that rates now 'need to increase' to do this would suggest mismanagement of past rates, in that they were collected but not enough of them used for these purposes.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

I'm not sure if it is the intent, but the Accommodation Provider Targeted Rate would be very harsh if it impacts people who provide accommodation from their personal home. The majority of short-term rental providers rely on overseas visitors to keep prices

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Tax those that use the service, not everyone.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

What is important to me is that the Council and all of its satellite operations find ways to reduce costs rather than increasing rates. Does your organisation recall the promises made when the Super City was formed? Have you kept any of those promises?

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Note: *this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.*

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I am an Aucklander that was lucky enough to not be significantly impacted financially by the lockdowns and business closures associated with COVID-19. Those that were able to continue working and those business that actually exceeded expected performance should now be willing to invest back in Auckland. However, I do think this should be means tested, so those that were financially impacted don't feel even more burden.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: We can't postpone tackling climate change any longer. We need to be thinking of the long term and postponing dealing with climate change until later is just not an option. It will cost more to deal with the consequences of climate change than to mitigate the impacts. It makes sound economic sense to invest in preventative measures to avoid future greater expense.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: We have a global social responsibility to ensure we aren't polluting our oceans and NZ should be setting example for other countries. There is already far too much plastic in the seas which is impacting ocean marine life. If we want to keep the waters of NZ rich of marine life for food, sport or tourism we need to protect it. Failure to do so will only result in impacting ourselves.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Community facilities are critical to a well functioning community and provide support for those that need it. However, I do think in some cases they could be managed better and fund their own repairs through better management

of revenue, promotion of facilities and fund raising. I have found it very difficult to find and book community facilities. Get them online, make them accessible, optimize their revenue generating ability. They can pay for some repairs themselves. This doesn't need to be an expensive exercise. There are market place space sharing websites in NZ that are free to list on such as Spacetoco.com

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Don't know
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Landlords of multiple properties should not pass the rates burden entirely on to tenants (through rent) when they own the land holds the rateable value. They should be charged more.

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Do not support either option

Tell us why: Public transport needs to be made cheaper and accessible or it won't be used. Use an increase in road tax to fund this service or a road toll. We need to get people out of cars and in to public transport or other means of economical travel.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why They are environmentally and community focused.

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Other

Tell us why Not sure I understand the benefits. If it benefits business investment in the community of Glenn Innes, then I support it.

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: I think instead of increasing rates, the council can tighten its budgets and reduce salaries of those who earn too much (read from the herald there are hundreds who earn six figures)

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Do not support increased investment

Tell us why: Like my earlier comment, due to covid and its impacts, instead of seeking to spend more, we should work within budgets and come up with better solutions other than increasing spending. Be more creative and not increase the financial burdens on families.

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Do not support either change

Tell us why: Just work within budget and reach the targets. No need to increase and extend if the projects are fulfilled. Efficiency is expected.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Great idea in making them multi use! I support this!

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Don't know

Tell us why: I don't know how many would need this service.

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

No

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why Don't know the proposed priorities of the local area

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I am concerned about the level of achievement by Auckland Council as a whole. We recently purchased a new house and the building consent and the title took ages to come out. Not very efficient and not fair because we pay our dues on time and correctly. Auckland council service in these areas is so lacking. It can be frustrating.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Other
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Don't know
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Do not support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Other
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 2 – targeted rate of \$153 for each separate dwelling or business on a property for properties located in the wider Paremoremo and Lucas Heights area of the Upper Harbour Local Board

Tell us why:

Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?

6. Local Boards

Ōrākei Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? Don't know

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Traffic congestion is the major Auckland problem. Widen our residential roads by reducing the excessively wide footpaths on many streets. Stop adding cycle lanes, which hardly get used. Install roundabouts not traffic lights at busy intersections.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Don't know

Tell us why: No indication of what was spent in the last 10 years

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why:

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: So much of library services can be provided online

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Do not support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Do not support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Do not support

Tell us why: Question lacks specific detail.

It has to be listed with a dollar amount stated Dear Councillors,

This is a submission on the Council's 10-Year Budget, Long Term Plan ("LTP").

I submit that the proposed 5 percent rates hike is unacceptable.

While Council faces revenue pressures, this is simply a result of the economic environment facing all Aucklanders. Ratepayers facing job losses, reduced hours, and the pressures of rolling lockdowns should not be burdened by higher rates hikes.

In addition, the proposed increases to water charges are significant, and could be avoided if capital from Council assets, such as Auckland International Airport and Ports of Auckland, was reinvested in improvements to water infrastructure. Reductions in operational spending, such as that spent on tourism and economic development, should be cut, particularly that which is duplicated by central government.

Both rates and water measures will hit my pocket, and the pockets of Aucklanders who can least afford it.

As a ratepayer, I submit that instead of coming up with ways to charge me more, the Council should focus on providing value for money, delivering core services and doing more with less, especially given the impacts of Covid-19.

I support the submissions made by the Auckland Ratepayers' Alliance, available at http://www.ratepayers.org.nz/2021_ltp_submission.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: It makes sense to use locally produced fuel and thereby save overseas funds by not importing petrol or diesel

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension only

Tell us why: Auckland already pays Watercare on a monthly basis for infrastructure improvements.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Spread the load by leasing to those who can keep the asset full used.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control

Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service

Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service

Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre

Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: I definitely support a rate increase as we need to increase more spending to help our environment and water quality. A small rate increase would not affect most homeowners as long as it is one-off. Those who are not fortunate enough to be a homeowner need more public spending to get through difficult times such as COVID-19.

In addition, I would love to see more spending in cultural development for Maori, Asian and Pacific communities in Auckland so they can also have their say and better understand what is happening in the public sector with Auckland.

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: Climate change is one of the most important issues for the young generation around the world. I definitely think moving towards electric vehicles for our transport is a step forward since ICE vehicles produce too much CO2 emissions. I would also love to see more support for implementing more solar panels to our roofs and reduce our reliance on coal and natural gas.

Personally, I prefer electric vehicles over hydrogen vehicles as they are much more efficient and will save costs.
<https://theconversation.com/hydrogen-cars-wont-overtake-electric-vehicles-because-theyre-hampered-by-the-laws-of-science-139899>

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why: Very keen to see our water quality improve as someone who lives quite close to St Heliers. I support the suggested changes both for the extension and the increase.

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Support

Tell us why: Investing in community is always important as it brings our different cultures together. Marginalised communities like Maori, Pacific, and Asian people need to have their cultures recognised by the local government as well.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Support

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

The Upper Harbour Local Board are proposing a new bus service between Paremoremo and Albany, funded by a targeted rate.

Which option do you support?

Support Option 1 – targeted rate of \$238 for each separate dwelling or business on a property for properties located within 500m walking distance of a proposed bus stop

Tell us why:**Do you live in the area affected by the proposed Upper Harbour Local Board transport targeted rate?**

No

6. Local Boards**Ōrākei Local Board**

Tell us your thoughts on our proposed priorities for the local board area in 2021/2022 and our key advocacy initiatives – have we got it right? I support all priorities

Tell us why

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Support

Tell us why**7. What is important to you?**

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

I would like to see better support for converting cross-lease properties to free hold from the local government. I believe this will also help developers build more densified housing which would improve the housing affordability for young people looking to live near the CBD.

10-year budget 2021/2031

Proposed Recovery Budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost saving and sell more surplus property.

Your feedback

1. Proposed 10-year budget

Our proposed 10-year budget would see capital investment of \$31 billion in Auckland over the next 10 years. This would allow us to deliver key services Aucklanders rely on, renew our aging assets, have a focused approach to building infrastructure to support population growth, and make progress on addressing the challenges of climate change and environmental sustainability.

As a result of COVID-19, it is projected that our revenue will be impacted by around \$1 billion. In light of this, and to provide the investment outlined above, we are proposing a one-off 5 per cent average general rates increase for 2021/2022, rather than the previously planned 3.5 per cent increase. The increases would return to 3.5 per cent each year thereafter. We are also proposing to increase our borrowing in the short term, continue to make cost savings and sell more surplus property.

Without this greater use of rates and debt, around \$900 million of much needed investment in Auckland would be delayed from the next three years to later in the decade. This would slow Auckland's recovery, put our services and assets at risk, lose hundreds of millions of dollars in matching government subsidies, and limit our response to our climate and environmental challenges.

What is your opinion on the proposed 10-year budget?

Support

Tell us why: Small increase for a great service in the community

2. Climate change

Through Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan, we heard Aucklanders want greater action on climate change. The proposed 10-year budget includes additional investment to respond to the challenges of climate change.

The proposed additional investment will mean we do not need to buy any more diesel buses and it will help us replace our diesel buses with electric and hydrogen buses sooner. It will also help us divert more waste from landfill, plant over 2 million more native trees and other initiatives.

What is your opinion on this proposal to invest more in responding to climate change?

Support the proposed increased investment

Tell us why: This is the most important issue in our generation, it needs to be addressed asap

3. Water quality

Since 2018 the Water Quality Targeted Rate has allowed us to fund initiatives to improve the water quality of our harbours, beaches and streams. This was initially intended to run from 2018 to 2028.

We are proposing to extend the Water Quality Targeted Rate until June 2031.

Extending the targeted rate

Extending this targeted rate to June 2031 will help continue to improve water quality in other areas of the city, including coastal water quality from Hobson Bay to St Heliers, as well as the Manukau Harbour. Extending this targeted rate would enable this additional work to begin in 2028/2029.

Increasing the targeted rate

To start construction on the above major new water quality projects six years earlier (in 2022/2023), and to increase our investment in regional water quality programmes across all of Auckland, we are also proposing to increase this targeted rate annually in line with proposed average increases in general rates.

What is your view on this proposal? Support the extension and the increase

Tell us why:

4. Community investment

We have hundreds of community assets like libraries, halls, community centres, community houses, arts venues and assets in our parks that are getting older and some are in urgent need of repair. The cost of operating, repairing or rebuilding these assets over the next 10 years could leave no money for anything new or upgraded. To maintain our current assets and upgrade or provide new assets, rates would likely need to be increased over time.

We propose a new approach for community services, such as leasing or shared facilities, that does not rely as much on us building and maintaining physical assets. This will reduce our carbon footprint and lower our costs by partnering with others to deliver services and deliver more community services online.

Over time, we propose to consolidate the number of our community facilities and services (which may result in some facilities being closed) and instead focus on multi-use facilities and online services to provide for our diverse communities.

What is your opinion on this proposal? Do not support

Tell us why: This feels like a short term solution, how can you guarantee that you will have the location in decades ahead? I think you should think about leasing your building to co-fund the refurbishment so the council will still own the properties.

5. Rating policy

The following are some of our proposed changes to the way we charge rates on properties. These changes affect each property differently. They may, or may not, affect your property.

Extending the Natural Environment Targeted Rate until June 2031 to invest further in measures such as addressing the spread of kauri dieback, and predator and weed control	Support
Extending the Urban Rating Area so land that has an operative urban zoning, or which has resource consent to be developed for urban use now (except for Warkworth), pays the same urban rates as nearby properties that have access to a similar level of service	Do not support
Charging farm and lifestyle properties in the Urban Rating Area residential rates so they pay the same urban rates as nearby properties have access to a similar level of service	Support
Extending the City Centre Targeted Rate until June 2031 to maintain our investment in upgrading the city centre	Support
Introducing the Rodney Drainage Targeted Rate on the land in Te Arai and Okahukura that benefits from the stormwater services	Don't know

We are proposing other changes to rates and fees, including the introduction of the Electricity Network Resilience Targeted Rate on Vector to fund council's tree management programme around the Vector overhead power lines and options to reinstate the Accommodation Provider Targeted Rate.

Do you have any comments on any of our proposed changes to rates and fees charges?

What is your opinion on the Glen Innes Business Association boundary expansion into our area? Don't know

Tell us why

7. What is important to you?

Do you have feedback on any other issues, including our proposals on housing and growth infrastructure or strategic assets?

Housing and growth infrastructure- as we build more houses in the area, the school resources have not increased causing the quality of the school to decrease. The planning needs to include consideration on the impact of education
