Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It's just another tax on people's income. \$57 on our already excess rate bill is too much. There is no exact measure for what will be achieved.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: 3.5%? Last increase was 5%, a one off and we were informed that this year the increase would be on 3%. You can not blame the ratepayers for losses (rather not losses, but getting) the expected income due to Covid

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Could stop giving AT more money than they know what to do with it. They are spending on measures that no one wants.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: With PAYT the household decides when to put out the rubbish, whether it's once a week, fortnightly or 3 weekly. Having a rates-funded system is just another tax when not everyone puts kerbside bins out each week

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: There is no mention of Co-governance in the Treaty of Waitangi

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Stick to your core function. You are a broken organisation operating well above its intended function

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Start with your own cutbacks first

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Your charges will be far in excess of what it currently costs now

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: With Covid I would not use public transport and I don't think our population can support your proposal. Light rail has failed in Australia why are you building something that will fail.

The Auckland to Hamilton is only carrying 25% of calculated traffic and is too slow.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I believe you can reduce community project for a time. Keep essential services and support local business

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: There is still a lot of waste in Council services too much bureau and delays

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: A standard costed service is better

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: If rates need to be raised, then that should be an option. The circumstances have changed since that promise was made.

Selling of assets never seems to be a long-term good plan, as we have seen multiple times on a national level.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: The fact that these:

"What are the things we should do?"

These are things which:

Deliver on key priorities like climate action, transport, the environment..." are not essential enough to guarantee is an absolute travesty. Cutting back for "efficiency" just means someone has to spend more later to bring back things that are needed for society. Get more money instead.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Please no more rates & taxes

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Efficiency savings can be hard, but they are achievable. Small amounts of savings across all areas of council will add up to a lot.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The prioritisation approach is sensible, However I don't support they way the criteria are worded. "Can we partner with someone else to get better outcomes?" seems like opening the door to sell off assets and services.

Secondly, there needs to be a clear plan & link between population growth and infrastructure spend. If infrastructure spend is to be deprioritised then what is the council going to do to limit population growth.

I also feel like there should be scope within the "Things we Should do" to include short term low-cost low hanging fruit initiatives that can cheaply deliver incremental improvements.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I'm guessing from the fact you dont disclose the targeted rates charge, that the rate-funded model will be more expensive for most people than pay as you throw.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Disappointed that the coastal environment is consistently neglected by this local Board in their initiatives.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

'I think the following would be a common opinion for most rate-payers and residents that included in the top priorities should be:

- Infrastructure to support population growth - this ties directly with liveable city
- improve our environment, reduce pollution going into the sea - this is the first step to tackle climate change.
- reduce red tape and bureaucracy tax - it feels like red tape is strangling the city, squeezing the little guy and giving the advantage to big businesses that can field an army of lawyers.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: At a time when there is huge cost pressure on household, this is a luxury that cannot be afforded.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Look inward. Your salary bill is absurd. Stop increasing rates.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: None of this should be done unless you can first offer no rates increases.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Do not waste valuable resource (money) on actions will not make a difference on the desired outcome!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I did not agree with the rates increase.

Cost reductions should ALWAYS be implemented!!!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Your only priority in spending is to spend responsibly and within your budget. Each council budget proposes rates increases because the council fails to keep to its budget. What is the point of having a budget if you don't keep to it??

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is just another excuse for increasing the rates of long suffering rate payers, as was the specific petrol tax.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Needs to also target over inflated staff numbers and salaries.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: This Council are great with promoting proposals to control expenditure but never achieve savings of any significance. A good example is the ever increasing staff numbers and over inflated salaries.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Providing this proposal does not cost an "arm and leg to implement" which is what usually happens when this Council implements any changes.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The work on the beach front at Orewa needs to be actioned without further delay.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

No additional rate increase for 2022/ 2023!!!!

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Get rid of ATEED one of the least useful quangos I've ever witnessed, a massive sinkhole for our money.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: ATEED should be top of the list.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: This has to be linked to an incentive programme for low waste households, and benefits for households that recycle most/all of their waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Other

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Parking in Orewa needs to be addressed as does the annual summertime abuse of reserves around the surf club.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Get rid of ATEED one of the least useful quangos I've ever witnessed, a massive sinkhole for our money.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I don't agree with almost everything Auckland Council is doing. You have completely lost the plot and I don't know anyone that thinks you are doing a good job. The sooner I can move out of the Auckland area the better.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I did not agree to previous rates increase. You need to learn to stay within your income.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Your priorities do not match those of anyone I know.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: It was part of our rates and still should be, end of story. However I like most people would not trust you at all.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: I don't agree with almost everything Auckland Council is doing. You have completely lost the plot and I don't know anyone that thinks you are doing a good job. The sooner I can move out of the Auckland area the better.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The most important thing to me is to stay within your income with zero increase and to revert to basic services.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The current plan seems to be spend spend rush rush. People heading off in different directions.

When a conscious understanding is required with common foundations as a solid base to then build up to better climate savings.

For example building bus routes that require to be illuminated, then building cycles ways that need illuminating the design should be joined for maximum costs savings, stop dabbling up on everything.

A secluded dark cycle way is unlikely to be used especially in the winter months. This mistake can be seen in other cities around the world.

Practicality is key for good design, the idea is it will be used all year round not just in the summer or day lights times. Personal safety is greater than climate change projects.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Rate payers shouldn't pick up the costs of the refuse collection, it should be spread across the community.

However the disposal of some items should be free.

For example, hardcore-bricks & rubble - car batteries - metals.

& these items then help towards other refuse costs.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Consistency is key, this has been lacking in many many projects.

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Although I support the desire, This is another area where costs could easily be saved.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Roading design or layout is so inconsistent & requires a sensible review. Especially access off & on the motorway.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Like the tree canopy suggested

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why: 3.5% suggested rate increase should be the absolute maximum

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Ensure spend on basic infrastructure has priority. Nice to have spend to be culled

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Would like more information before making a decision

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: More dog parks seem sensible

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We cannot afford another rates increase

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: We cannot support another rates increase

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Climate is not a priority for AC. Stick to the basics

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Council is rubbish at operating this service. Leave it to private sector

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Unless it has a demonstrable outcome don't do it

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Stop increasing rates. Live within your means and cut the stuff that isn't core council deliverable.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Bus transportation is still very much under utilised. Do not support any additional investment. Auckland council should study the root cause of why people are not using this mode of transport.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: do not support any more rate increase. Current funds are not well managed as there are a lot of unnecessary spending.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: There is no specific information on what are the areas that need prioritising. What is posted on the website is too vague.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This would mean much higher rates the public would have to pay which is unfair to those household that works towards minimising waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I agree with everything except the cycling. Most of our roads are TOO NARROW for cycling lanes. Perhaps I could add if you want people to bus, you have to have been bus connections. EG Busing from the HBC to the centre city is easy. Busing from HBC to anywhere other than the central city is terrible because of the connection. What would greatly help would be if ALL connecting buses left from Britomart.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: No benefits, focus on bug polluters such as China

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cut costs, especially head counts and non core services

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Cut non core services, find more cheaper ways to fulfill maori obligations

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Absolutely horrible suggestions ... will encourage people to not separate waste and fill bins with any rubbish rather than recycle or use inorganic collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Focus on improving living quality of residents, e.g. more car parks and priority car parks for locals, elderly and families with kids, more parks and playgrounds, restrict street parking where it makes roads unsafe, better policing and noise control, etc

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

If developments do not provide parking residents must be banned from owning a car or should pay for road side parking. Ratepayers should not subsidise developers and property buyers.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: where is support for electric cars ? have tax on cars in centre of auckland and encourage use of bus.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: tell us what capital spending is changing

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: general comments with no specific indications mean I don't know what is intended

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: need to tell us the size of the bins...as an elderly couple on a pension we use a tag once a month....so size of bins and cost important to know

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

priorities that clearly and affectively assist low income peopl/especial families.

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: i do not support increased bus services its absolutely a waste of money and infrastructure. people do not want to be squashed in with others in a grubby unpleasant environment -or cycling ways this will only ever be for a select range of people and is notoriously unsafe. i agree with the tree canopys so long as planted in the right place.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: so long as you dont increase rates and dont stop maintenance of road sides, as has been the case over the last 2 years

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: looks so long winded and bureaucratic its pretty obvious what needs to be done and what dose not. surely there are some intelligent people on the council committees to make these decisions with out ridiculously long processes

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: why why why...there are so many folk renting why would you give landlords another reason to increase rents! which is exactly what will happen- it removes all incentive to minimise waste. the person that came up with this idea should be sacked.

i want to pay my way and pay for my usage. id like the trial of scanned bins to be implemented- please listen and dont do this!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: these are all things that will be utilised by the community

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

please find wisdom or wise advisors and not be rash or reckless in your planning-

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Low emissions transport options need to be pursued, especially considering our pathetic state of diesel buses that are not maintained and pour visible fumes. Furthermore, transport options need to be upgraded as significant portions of the population cannot rely on the current system to replace private vehicles.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The city is operating using money it doesn't have and relies on every cent it can get its hand on. While the city should provide the best possible living, and this can be expensive, better options need to be sought. Wasting money on projects that are controversial or have large public backlash should be reconsidered if they are actually critical. The Americas cup viaduct was considered to be a waste of money by many and covid cemented that. Furthermore, with house prices sky rocketing and rates being based off a % rather than flat rate - the income the council earns from rates changes significantly as house prices ballon. Couple that with the annual % increase and you are carving even more off property owners. Similarly to watercare's disastrous do nothing approach with infrastructure, Auckland Council has not put enough funding aside for crises either. A viral outbreak can be considered a natural disaster and as such the council should have funding available to cushion against disastrous events without passing the costs on to the working and lower socio economic classes that are already struggling to live in this unaffordable city.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Note: This table sets out proposed principles and criteria only. There are no actual proposals to make changes to

any specific services at this time. Can't comment if there are no suggestions. If the service is deemed meaningless or adds little value for high cost, if the public dont want it, get rid of it.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Efficiency is better. Having one bill that covers more is greater. Also more options with cost differentiation is better for user choice and user waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Not interested in dog parks - plenty of reserves that are dog friendly as it is now, plus beach hours. Was never a problem while I owned a dog. Preferred walking my dog away from others due to bad owners. Some may want it though. Renewing the lighting and sports fields - rather the money be spent elsewhere in the communities. Freyburg as an example isn't that bad to warrant a makeover.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The sherwood reserve lake was 'upgraded' and was nice for all of one month. It became miserable pretty quickly, rubbish and left over construction facilities made the area look dreary. Then it became unsightly. Perhaps looking into preservation before beautifying areas as they are hard to maintain with specific plants and neglect from local populations.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cut your overheads

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Reduce your overheads to pay for the services

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Pay for the services and don't pay when you don't use . Fair approach

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: They are not necessary. Your focus through this tough time is to provide the essential to people with less cost .All above attract overhead and unnecessary cost

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Keep lifting the rare every year is unsustainable. You need to plan to be self sufficient and more efficient of how you do things and provide services

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Stop wasting so much money on consultants

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Should be the same for all. If you remove PAYT many people no longer care about recycling and waste reduction

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Business can look after themselves. Maori culture expense is an unreasonable use of money. There are a lot more cultures in nz now.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Stop wasting money on feel good hype. Make wise practical business decisions.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: As the average temp of the world has always, and always will, vary, mostly in response to sun cycles and not AGW ... and ...

Whatever we do will have no measurable effect on that variation whatever ... and ...

In any case NZ only contributes 0.17% of global carbon ... and ...

Carbon is vitally necessary for the well-being of our environment ...

All these proposed measures are an exercise in futility,

will cost NZ Christ knows how much and totally cripple our economy for evermore ...

Only cretinous fanatical control freaks would suggest we have anything to do with them.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: The best measure would be to abolish Auckland Council (bidding a hasty farewell to that idiot Goff WITHOUT ANY GOLDEN HANDSHAKE - HE DOES NOT MERIT HIS SALARY LET ALONE ANY BONUS.)

and revert to the previous more efficient (far less costly!) councils

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Revise ALL spending and stop getting involved in social issues - revert to looking the essential services and only consider other ideas when you get those operating properly and economically.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Waste management needs revising from the bottom up. Recycling could save a mint handled properly - PLUS CLEAN UP OUR ACT!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It cannot achieve anything. The problem is over population.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Should focus on what is achievable, not what you think makes you look good.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Anything that gets rid of plastic rubbish bags is good with me.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Man made carbon is only 3% of atmospheric carbon. Satellite data shows virtually no temperature change since 1989 just fluctuations up and down. Climate has always changed and we are naive to believe computer climate models that don't work . If they worked we could put historical data in and predict last years climate to check them . They don't work and taxing and destroying our economy to placate people is a foolish use of peoples resources. I have lived in Auckland for 40 years and rates have gone up far faster than inflation. We will end up, even if mortgage free paying more in rates than rent as a percentage of income as rates continue to increase faster than inflation. It used to be water and rubbish were included now we pay for that separately. When you add them up they are substantial if you have more than the average family. The dipsoal costs of electric cars will be a huge environmental disaster in years to come.

Focus on providing for the essentials. With an imploding population coming to the world over the next 100 years carbon emmissions will drop and they are only 3% of atmospheric carbon. Check out the data. Remember any science that is settled is not science, it is religion. Science always changes with the evidence.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: We need to cut our expenses to suit our cloth when things are tight.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I think we should switch to incinerating our waste in plasma furnaces producing energy. This could be done in industrial areas, produce no emissions and would save a huge amount of road transport to landfill emissions. This would be far more economical than the present landfill system. Landfill is not good for ecology.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support this measure in principle, but with the note that we need to be putting as much resource as humanly possible to improve our public transport infrastructure. That includes supporting the second harbour crossing and extending rail service to the north shore, as well as connecting it to passenger services for the whole north island.

No more roading projects. Enough is enough.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Stop selling assets. It's short sighted. We need to fund long term financial sustainability.

Raising rates is untenable and unnecessary, especially when councils are still receiving pay increases that exceed their practical value.

Efficiency savings almost always means cutting lower paid jobs or replacing roles with lower paid positions. If this is the idea it's unethical and self defeating, as low morale on the front line reduces efficiency. We cant afford to keep cutting services and paying bonuses to the top end. Services are already stretched. Stop being greedy.

Look at councillor and management pay, and tie it to the average auckland income. Payraises should be average wage increase % minus cost of living/CPI increase %. And if that means a paycut, it might at least encourage efficiency in management.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Stop cutting services. All we see are rates increases and service cuts, while there is no noticeable payoff for those rates increases.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: It depends on the costing of the system.

No point switching it and then telling us that we have to pay more, calling it "admin fees" or some such.

I'd rather see resources put towards creating a citywide composting system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

- Standardise the opt-out rules for residential and lifestyle properties with between two and nine units** Support
- Standardise the opt-out rules for non-residential properties** Support
- Apply a minimum base charge to every separately used or inhabited part of a property** Do not support
- Tell us why:**

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The impact of fuel fossils are important but not the only ones. I agree to tackle by planting trees, but what are the proposals for waste management? There is a huge amount of organic matter that could become biofuel. You should also consider this as well as reduce waste (packaging, production, waste).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Seems reasonable. A public consultation on certain actions would always support some decisions, too.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Some people generate way more waste than the others and don't care about environment or waste, so it is fair that they pay more than the others. Also, where is the organic collection project? What about charging less for easy recycled packages or organic and more for landfill?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Why don't you centralize the recycling collection in the supermarkets? Many supermarkets in Germany collect and separate glass, for example. They are already collecting soft packages, which I also believe that you should also promote the recycling of soft plastic by supporting the reduction of use of plastic and also supporting the supermarket who collect them and educating the population.

Or is there anything further you would like to give feedback on?

Councils and govts should look to reduce the charges and not increase as we progress forward. Inflation is already super high in NZ and cost of living is increasing not with the same scale of salaries. You are introducing more pressure on citizens. Carefully selected and managed spending is the key to reduce costs. Cost reductions should be the most important goals not increase.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The target is far too high and we are seeing a change in people working from home and with more T2 lanes and carpooling as well as the effect of petrol over \$3 per litre affecting behaviour there are easy methods without stinging people even more

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: 3.5 and 2.5 climate tax equals 6% and just like central govt you are hiding behind words to sting people large amounts

Ask govt for a share of gst as they are rolling in money particularly from inflation, new housing boom and spending booming in the last 2 years on major items

First cancel all nice to have eg funding for festivals as private people and sponsors can make them work

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: There are plenty of words but no specifics - cancel festivals and parades, money supporting business training, have 1 wide footpath per new suburban road for cycles and walkers

Auckland is a series of villages and townships so stop focussing on the inner city and promotions to bring people to the city

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We buy rubbish bags and there is a real incentive to reduce our volume of rubbish so make that city wide as where you have apartments there is little room on kerbs already for so many bins

Make retailers responsible for taking back packaging especially large cardboard boxes, styrofoam etc

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: What about more and better playgrounds for families and shade shelters, seats and bbqs to bring communities together, encourage exercise and stop people driving to better facilities

Dont spend over 1/2 a million on a traffic light pedestrian crossing at Orewa when white lines on the road would have worked just as well

Orewa Beach seawall and footpath completion?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Encourage carpooling, working from home and T2 lanes

If people have a composting/worm farm system save them a waste fee

If people have garden (flower or vegetable) above a certain size they get a reduction in water rates

Get GST off central govt

Return packaging to retailers

1 wide footpath per street for walking and cycling

Do not sell any more open space - we're going to need it

Sell some shares in Ports and Airports

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We use ALL our foodscraps in our VERY WELL maintained veggies garden boxes. We don't need it. Thanks.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Wasteful habits that destroy the environment need to change

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I do not support the sale of assets.

These assets should be used in and for the community.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Unfortunately public services should not be profit driven, but use driven.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: At present, cost limits waste, this would not happen in a rated system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I believe in the hibiscus bays intentions

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

In covid times dogs and pets have become popular tons and services should reflect this.

Seperate areas for dogs on the beach as well as family areas and teenage areas, well policed.

You have a community police service.

More support for volunteer services.

Prioritise needs/problems and space.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Not all areas of concern should be a priority at current

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Rate increase absolutely should be held

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: A lot of business are cutting back or making changes in the current climate so this should be no different.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I do not support this at all. We should be allowed to choose what providers we use and what services we require as we require them

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: These are not the priorities the areas need.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: I feel that if the additional rates are actually utilised for improvements then this would be OK. However in recent years there have been a lot of cases where money that was drawn for certain purposes, like the additional hike on gas in Auckland to help congestion, wasn't utilised for purpose. I feel that this is just likely to happen again. and charging everyone is not the answer IMO. I feel like a user pays system, like congestion charges for inner city would be more appropriate.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I don't think that a regionally paid via rates system is a good idea. People tend to change their behaviour if there is an incentive. If you have a PAYT system where if you throw out more you pay more then you are more likely to incentivise people to reduce waste as the amount of waste they throw out directly affects their wallet. If you include it in rate people will take less care with what they throw out as they will just consider it a cost that is covered. In our household we try to minimise waste by reducing the amount of high packaged goods we buy in the first place. However, in my opinion based on behaviour I have seen a lot of people don't care about waste yet so without an incentive to reduce waste that will get them in a way that everyone understands (money) I don't think you'll see a change. In addition why should I be paying as much for waste removal, we're in a household of 2 with only one bin every 4-5 weeks, as a household that puts out one bin per week?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Housing affordability and infrastructure issues that are not being addressed. House prices where the average house price is 8-10 time the household income (before tax) which means that technically it will be more like 12-15 time the household income.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Climate change is explicitly addressed within the various asset management plans (such as that produced by Auckland Transport). To then charge an additional levy for the same item is nothing short of double dipping. Moreover, by every definition of good practice, climate change needs to be integrated into the day-to-day management of the assets as that is not only the most cost effective way in which to address climate change, but it is the only way to understand the impacts and determine priorities. Having a separate budget, will be the least effective and most costly means of achieving the results desired.

If the respective asset owning entities (AT, Watercare etc) have not appropriately addressed climate change in their AMPs, then that is a significant shortcoming on their behalf and is nothing short of incompetence. It would be akin to AT producing an AMP that excludes traffic growth, or Watercare producing their AMP and ignoring population growth. That assets are to be managed within the best prediction of the climate that there is - there is no AMP excluding climate change.

So either one of two things is at play:

1. The various asset owners are incompetent/negligent and the respective boards and senior managers should be fire immediately for breach of duty of care; or
2. The various asset owners have done things correctly and Auckland Council is not endeavoring to double charge for the same impact, which is in effect fraudulent.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Stop all the vanity projects in the CBD that offer zero benefit to the wider Auckland community. A pretty Queen St, or rail upgrades offer no benefits to people of the Hibiscus Coast who travel to Albany for work, a sheep farmer from Taporā, a dairy farmer from Tomarata, a potatoe grower from Pukekohe, or indeed most people in the wider Auckland region who have zero interest or need to visit the CBD. At least 90% of all income from a local body area should go back to that area (including the respective portion of the regional fuel tax etc). If that then means various vanity projects in the CBD are delayed a decade or more, then so be it.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I agree with starting with the Must Dos. The Should Dos should be subject to the revenue coming from each local body area being reinvested back into that area. For instance the unsealed roads in the north eastern area of the city (Pakiri -> Tomarata -> Managawhai route) are an absolute disgrace, so much so that over summer 30km/h limits were placed on these roads. This despite the vast sums of rates, fuel tax and local additional transport level that area pays. The dust is an environmental, health and economic hazard - yet council and AT fundamentally ignore this in favour of planting some new trees on Queen St.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: If costs are no more than the current PAYT scheme then I am okay with the rates-funded scheme for refuse collection. I do not support the rates-funded food scrap service as like many others I have a compost bin in my garden and already avoid putting such in the bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I would like to see the Hibiscus Coast Highway through the middle of Orewa (say Florence Ave to Riverside) closed to traffic from 5pm Friday nights, to 2am Sunday morning throughout the year. This type of setup (with permanent 'pop-up' bollards) was in place in the village I lived at in the UK while I worked there, and it fundamentally changed the feel of the place. It would encourage the length of road to be reclaimed by the people whether that be for entertainment, dining or just creating a better connection of the town centre and the beach.

I would also like to see a pedestrian/cycle bridge built across Orewa Estuary to connect from Orewa College to Metropark. This would bring the entire area of Millwater and much of Milldale into a walking distance from college for students, and would also enable the greater use of the Metropark facilities during the day by the college (which will continue to come under pressure as population and roll growth occurs). Such an initiative would appear to align with AT goals of increasing active transport, reducing reliance on cars (or school buses), as well as increasing the usage of sport facilities during what is traditionally a very under-utilised period of the day.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Ultimately I believe that at least 90% of the total revenue from a local body area should go back into that area, with the remaining 10% available as some form of "regional pool" recognising that there are some projects that deliver regional benefits but for which they aren't located in the local area (e.g. many regional parks, zoo, motat etc). There is a fundamental need to stop the focus on the Auckland CBD as that vast majority of Aucklanders have zero interest or need to go there - for work or leisure.

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Dont need any more Rates or Taxes. Living is already too expensive

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Happy for this, as long as the cost is aligned with the current systems and not more expensive

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Travel/traffic/roading projects - No more useless cycle lanes no one uses. Subdivision constraints

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Adding extra rates to cater for climate change should be part of our current rates, cut costs/fat at council level and not have rates fund such initiatives

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support some of the above, but what we are sorely lacking is the streamlining of council and cutting out inflated salaries and unnecessary roles will be an huge cost saving.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Cut people cost not services, streamline business process, less meeting more decisions/actions

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Pay for what you throw away is just logical, will equal less waste

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Covid has negatively impacted my ability to earn and I am operating at less than 60% of annual revenue. I have had to do away with the "nice to haves" and pare my budget to suit my income. I cannot simply increase my fees as I would lose even more business. I suggest the Council does the same.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Why sell assets, it does not make sense. How about cutting back on your exorbitantly paid workforce. For a city of our size, as compared to Brisbane, Auckland has too many staff being paid too much money. As I told my children when growing up, it is too easy to spend other peoples money.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Yes cut the number of cars and staff and that will allow some projects to proceed. Orewa has many many cars with Auckland Council on the, just parked down the right of way to the Orewa Council Office. WOF yearly fee and servicing all costs so less cars. If other areas are like Orewa they need less cars too.

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I do not wish to pay even more for this rubbish. How about prioritizing important projects you are supposed to be doing..climate change is NOT one of them

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Reduce your workforce and management structure. In addition reduce spending on non relevant projects like promotion , parades etc. Get back to basics

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: As above Reduce your workforce and management structure. In addition reduce spending on non relevant projects like promotion , parades etc. Get back to basics

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I don't always put out rubbish

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: How about properly maintaining the existing parks instead of wasting time and money on these initiatives

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Doesn't matter what we say you guys will continue to waste our money on non relevant initiatives & bureaucracy. How about going back to basics on what a council should be doing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We all have to do our bit

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Please just stop wasting money

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I've had food scrap bin in the past, it was great. Needs to be weekly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Ratepayers are not a bottomless pit of money. Everyone is suffering financial pressure as a result of Covid and it is reckless and irresponsible for the council to be adding more burden on to already-suffering ratepayers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: You opposed the Government's three waters asset-grab - you shouldn't be planning on spending that money. How about reducing the ballooning staffing levels and wages that have increased year-on-year since the amalgamation?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Council waste collection is inefficient and costs more than what the private market provides. There needs to be choice and competition to achieve better value for ratepayers. As a single person living alone, I should not be subsidising the waste collection of large families when I take 5-6 weeks to fill a 60l rubbish bag. Your proposal would see me forced to pay for 4160l of rubbish per annum, when I currently produce around 600l.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Based on fear not on good science

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Slash spending.

Reverse the 5% once only increase by Mayor Goff.

The ratepayers are already suffering hugely from COVID. Stop justifying more pain.

Rates are not a tax on RICH PRICKS as the left would deem necessary.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Slash excessive council salaries. Council pay scales are not comparable to the commercial world as no one is held accountable for any decision that they make.

Reduce beaurocracy.

Make every Manganer accountable for a 10% reduction in overall spending including staff.

Create a new team of cost slashers. 5 proven commercial guys to run rampant through council, challenging all expenditure from first principals. First for the chopping block any senior executive that cant achieve a 10% reduction.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Increase free localised collection points for all types of recyclable waste. Council fund shortfall. All other waste PAYT separation of waste by household.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Drop the Moari conultation thing. This is a rewrite of the treaty and brings division.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My household contains six people yet we are able to restrict our rubbish so that we only need to put our bin out one every two months. Our neighbours' household contains two people yet they put out a bin 2/3 full every week. Their bin contains items like cardboard boxes and egg cartons that could be recycled but they are too lazy or uneducated to recycle. I think it is unfair that we would have to pay the same amount as them when we are very careful about what we put in our rubbish bin and the packaging of items that we buy.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: as long as local community that will be affected by the service change is consulted first.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: incentive to reduce waste

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: i think a lot of the parks n the north are being neglected (e.g. Long bay and browns bay have rubbish problems)

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I believe climate leadership should come from our national government, not from the city level. Auckland moved from up 11 places to the 27th spot on the most expensive city to live in world at the end of last year. There are already too many targeted taxes for Aucklanders - like the existing fuel tax. To use a colloquial phrase, Aucklanders are getting "knickle and dimed".

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support most of these measures. I have some concern with the established rates increases given the dramatic increases in property value, especially alongside inflationary adjustments (given the high inflation), and the 7% water care tariff. I am also suspicious of asset sales as a short term gain that may result in long term issues. My concern, as with my previous response, is the increasing cost of living in Auckland.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Ultimately, my interest is in reducing the expense of living in Auckland so I would like to see a reduction in local, and city, level spending - even if that means a reduction of services.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Do not agree with this. We have problems as it is with the planting of Deciduous trees that leave a Hugh mess every year. Not enough people Walk or Pedal in Auckland.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Pie in the sky like the cycle way across the harbour and the light Rail to the Airport will save millions of dollars of rate payers money to be spent on necessary projects .

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Unnecessary spending in times of hardship is a must and the council like its residents need to save money.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Just another stupid Geoff/ Labour Council idea where they think that Increasing the cost will make less rubbish. A proper investigation into Municipal Waste into Electricity will not only Save loads of money in making good land into Bradford Tips and generate Electricity for sale.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Why do we always have to support Iwi with money when they never spend any of the millions of dollars given by the government to IWI all around the country and no requirement to show what it has been used for..

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We have a beautiful Harbour that is used for the storage of second hand Cars and Containers when we could have areas for residents and local business to prosper and get rid of the Large Trucks clogging up the roads and polluting the air .Look to Europe to see what the large cities have done to make the city alive again.

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Improve efficiency rather than constantly asking for more money. Where are the savings from people working from home and reduced costs of office space and infrastructure? What happened to the promised cost reductions of the super city. We have way less staff yet it seems to be costing more.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: We are not going back to normal, so we need to ask new questions based on the changes in the way people live in the city.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I don't understand how multiple private rubbish companies can thrive in competition to Council. We have 3 different companies in our street. Either be competitive or leave it to them.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: There is no mention of investment to the Bays area. It all seems to be north

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I'd like to see one set of rates covering everything and one set of accounts showing clearly where it being invested.

I'd like to see a new plan based on the changes that are a consequence of COVID19. Let's have some real discussion about the purpose of the CBD and how Council is focused on delivering growth and meaningful change to the suburbs throughout Auckland.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Stop causing traffic congestion and you will get less pollution. Electric cars etc are not the answer as the batteries involved in these causes more dangers to the earth going forward. Cycle and walking does not help when community organisations are trying to support families in crisis with food, power, accommodation. Your improvements are causing more issues than helping citizens. Those that can afford changes are okay and the rest of us are on our own. Your staff are okay because they are on good wages and perks because our deep pockets will pay for it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Too much emphasis on woke issues. A lot of us do not earn enough to be able to prioritise as the council does. Start looking at wages, waste in council etc.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Less cycle and bus lanes. Four Lane Penlink with no tolls or a toll for building it but not maintaining. . Whangaparaoa requires a community hub. A place were NGO's can meet and also support clients rather than us having to use coffee bars and McDonalds. A place were residents of the peninsula can meet to connect. We all pay rates on the peninsula but seem to get little out of the council bar the leisure centre.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Investment now will bring large climate dividends.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Covid is a short term hurdle, we must not cost cut too much and worsen our future infrastructure and climate outcomes. Borrowing is still pretty cheap, lets leverage.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: While I like the idea of efficiency for services I think the incentive model is wrong. Our goal is zero waste, so forcing everyone to pay for a service they will naturally use it. Personally we only use a small yellow bag every month. Having a model that ties costs to usage is key. Equity is also important so perhaps a separate charge, independent of usage, can be used to balance services.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Other

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: We lack good bicycle access in the area, painted parts of roads don't count. I'd love to see some discussion of bicycles paths.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I very much welcome the idea to plant trees and create urban forests. But it is equally important and also more cost efficient to protect existing trees. Where ever land is developed for housing existing trees are felled mercilessly, no matter how iconic and healthy. The residential development of the former Red Beach golf course or the Gulf Harbour development in Pinecrest Drive are only two examples. Of course trees have to give way to new housing, but not on the current scale. Developers should be imposed with stricter rules to save at least a certain percentage of existing trees.

Also, trees being felled in Shakespeare Regional Park because they were not native trees. That appears rather decadent while we are in a climate crisis and the planting of new native trees instead seems another unnecessary spending of tax payers money.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This is a key initiative, however more emphasis needs to be placed in the different areas (e.g. north shore / Howick) rather than the CBD as we become more accustomed to working from home and begin anticipation of the impacts on climate change, such as increased pandemics and other situations requiring decentralisation of our CBD.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: The increase in rates and reprioritisation should be distributed to the various areas of Auckland rather than mostly central and south. As we move away from a central business district driving the region and become more adept to working remotely we have the opportunity to work on more sustainable satellite city approaches.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: We should look at completing the burying of overhead power and telco lines throughout Auckland. This generates work and also improves local environments, allowing for better areas of tree canopies and ability to plant native plants on sidewalks (where possible.) It will also save costs of trimming of trees as well as decrease the likelihood of power outages due to fallen trees and other above ground obstacles as climate change increases the magnitude of weather events.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: While I support a central process, there should be a more fair way to distributed a pay as you use model so that households with smaller numbers of people don't subsidise those with large number.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I think we should really be looking to remove the overhead power and telco as part of our area's priorities to avoid events that will result from climate change weather changes. This will save cost down the track and will also improve the various neighbourhood appeal. This will be compounded as we start to decentralise from the CBD working environment more after COVID.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I believe that the overhead power and telco lines are a key initiative that would save cost, future proof Auckland against worsening weather events and improve environmental appeal. Also not included in the above is the impact that higher density living is having on our roads where cars are often parked on both sides of the road effectively creating blind bends and one way streets, sometimes on busy road. Without a restriction on the number of cars per property I think we should think about a general rule of always having one side of roads a no parking area to allow for traffic flow. (this occurs in some areas but there may be a way to standardise this approach?)

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It is an absurd waste of money that can go for more important things. Climate change is debatable and several academics agree it does not exist, its a cycle natural to Earth.

On the other hand the gov. is making changes like closing Oil refineries only to import gas from Aussie. The footprint is bigger on the import than locally source it!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cut public servants salaries, reduce the spending on gov. propaganda and marketing bs and use that money for your budget pressure. Sanction the Labour gov. for abusing their power on money it was not theirs and returning it. They decided to give free money away, they should pay it back

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I do not support the iwi/Maori initiative, seems like a waste of money.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Hibiscous and the coast, and most of north shore is looking very trashy. It is not tidy. Why is it that areas like Remuera or Takapuna look so good with so much development but areas like Stanmore bay look like a white trash shit hole? Invest in tidier roads, curvesides, lighting, dog parks, etc.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: No forced/paid food waste system. We use compost, bokashi & chickens to deal with our (little) food waste. Happy to have Pay as you throw rubbish bins but NOT a forced weekly removal as this would just defeat the throw less mentality .. unsure if it would help with people that are currently dumping their household waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change needs to be acted on.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Cutting costs is not the solution. Councils need to look at ways of growing revenue to pay for costs. This could be through increased rates or taxes.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Cutting costs is not the solution. Councils need to look at ways of growing revenue to pay for costs. This could be through increased rates or taxes.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Waste is a huge problem and I am shocked by how far behind NZ is from other cities I've lived in overseas. We need to have consistent waste policies across NZ, have green waste collection, and do something with the waste in NZ not send it overseas. Multi-units should not be exempt, everyone has an obligation to recycle. Impose penalties on incorrect recycling behaviour and enforce.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

More action needs to be taken on housing - look at international examples for example Vancouver City Council brought in a municipal empty homes tax and money from the tax was put towards affordable housing. They also banned AirBnBs unless it was your principal residence - this stops people from taking long-term rentals off the market. Also make tiny houses more accessible and promote their use on land rather than building more and more houses. Tackle housing, climate change and landfill waste.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: There is no climate emergency tats why !

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Over paid senior management staff and waste of our rates money everywhere start there to find your shortfall

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: You should look at Brisbane

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Individual responsibility of waste - pay as you go not one size fits all - so unfair

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Because I live here

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The super city has been a massive failure - go back to regional councils asap

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Auckland has poor public transport infrastructure including capacity at park and rides. A move to low emission private vehicles and better roading e.g. second harbour crossing is more efficient use of money. Urban work hubs would also provide options to reduce travel

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Local government should focus on infrastructure and core services and keep rates increase in line with annual cost of living figures. Reduction in compliance and increases in efficiency are required so spending can be contained.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Local government should prioritise operating spending however realistic targets should be set in areas such as climate management

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The PAYT is more cost effective and puts the cost directly with the user. This encourages users to be more efficient in their waste management including composting and recycling. The current approach to recycling should separate the recyclable components - glass, metal and paper. The current use of mixed recycling is inefficient and not as effective as it could be.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Focus at this time must be on providing support for local business and ensuring local infrastructure is up to standard.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I am happy with my private paid service rubbish bin so don't need a council service. The recycling system is ok but if you have more yo dispose of local recycling places charge too much. We wouldn't need a food waste service and shouldn't have to pay for it. We have chickens and compost so only dispose of bones in the rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Say no to govt cascaded targets.

Encourage aucklanders to plant and grow more trees on their own land, discount seedlings for rate payers

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Reduce council office staff as its well published they are highly and well known they are inefficient and therefore ineffective

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Seems like a loose list and not enough detail to use as criteria

How is value to rate payers being measured?

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: User pays. Should encourage high waste households to be more careful what they buy and throw away

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: In order to reduce costs its prudent to just maintain what facilities and parks we have now and not to spend designing and creating new ones.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Status of the 3 waters fight with the govt to stop them taking water, we can assume costs will increase and the may privatise.

How the council is reducing its wage bill.

How the council measures value in their services back to ratepayers

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I am really battling to afford the rates as is. And if the new property evaluations come in, it will be even higher. i simply cannot afford to pay more.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Families in this area are under huge financial pressure. We need to keep the rates affordable or people wont be able to pay any of it

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

My husband and I are both working and earning middle incomes. We don't have children and we're not frugal with our money. Living costs have gone up and continue to, and we're really battling to make ends meet. Keeping our rates affordable is really important to us, and many other families in the Stanmore Bay area. We're nestled in-between developments where people build multi-million dollar homes, and it is easy to forget that the older smaller homes are occupied by families with huge financial pressures. Please consider us.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Starting with more accessible public transport is a good idea. A lot of our existing public transport is not fit for purpose if you do not work a 9-5 job, and a lot of people would use it if there were better services available. It seems incredibly ignorant and arrogant not to plan for the impacts of climate change on our city, given it is low lying and water adjacent.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: The blind belief that Aucklanders can suddenly not use their personal vehicles and will be expected to jump on a bus or other form of public transport if ludicrous. Auckland, and NZ for that matter is so spread out, and Kiwis by nature do road trips and travel, therefore we will always need personal vehicles.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Partially support. Auckland Council appears to be so poorly run and operated. There can be cuts made to unnecessary spending across the board. Don't make ratepayers suffer for the incompetence of your organisation.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: As it makes no difference and is waffle to be fair. The climate changes naturally I'd be more concerned about man man literal climate change through HARP etc.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Common sense really

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: As above

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: User pays.. more rubbish - pay more - again common sense

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

General spending on consultants is ridiculous. Need more common sense.. ex business people guiding versus hugely overpaid consultants.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Devonport-Takapuna Local Board

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Should only be a maximum of \$1 per week

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: You must consult widely before any asset is put up for sale. Once gone too late

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Open consulting for areas where services are to be reduced or stopped

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Many people only put rubbish out once a month and are working to reduce. Promote more places like Abilities where you can take unwanted items and polystyrene. Encourage less unrecyclable packaging composting and worm farms to reduce waste going to landfill.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: In light of the wasted funds and volunteer time at Paremoremo reserve land which was in theory planned expenditure it is difficult to trust and support many of your priorities.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Support low emission vehicle (electrification) items until such time as carbon neutral biofuels are available. Support improvements in cycling in areas where children go to schools only plus improvements in walking facilities everywhere. Do not support all other items which are excessively expensive and have a low rate of return or benefits in comparison with alternative options. Do not support additional bus subsidies.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Agree with most of these but disagree with some of the wastage generally seen in the budget, particularly in social areas which should be the duty of central govt, not local govt

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The general principles quoted are obvious, however the devil is always in the details. E.g. Council need higher enforcement officers for antisocial activities like camping in parks, rubbish dumping, and these could be paid for by increased penalties and court action. Road safety issues also need careful scrutiny to ensure effectiveness for reaching targets against cost.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This is just a revenue grabbing exercise for lesser and more complicated services which serves not real environment purpose. It is also monopolistic as it removes the ability of private contractors to keep the council honest & efficient.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Seem reasonable effective and hopefully low cost activities, with many voluntary aspects

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I am concerned about low enforcement resources - laws are not being enforced - e.g. camping on local beachfronts, parking, rubbish scattering, noise control - particularly outside of normal hours. Such items are having an adverse effect on normal living if not controlled.

I am also against free transport offers being extended in peak hours

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It does not incentivise people to reduce their waste, this does not align with reducing waste itself or emissions from waste.

A better solution is charge much

more for the bin tags, this will make people consider what they buy in what packaging and consider what they throw out.

Pay for what you use.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: There needs to be a smaller bin option for households that produce very little waste (such as single-person households). They should not have to pay for a 80l waste bin if they only produce a small portion of that amount.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Adding sun shades to all playgrounds should be a priority given our rate of skin cancer

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Adding sun shades to all playgrounds should be a priority given our rate of skin cancer

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Everyone is struggling, yet council chooses to constantly introduce new targeted rates, Stick to the basics !

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cut your spending, You waste so much money

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Climate change is not a priority. We have lots of other issues to worry about. Stop wasting money on bike lanes which a minority use (virtually no one)

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: People like myself who put out a rubbish bag every 2 weeks will be penalised with this Rated system.

Will mean people will ensure their bins are full as they paying for it anyway if its rated

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: In these times when budgets are severely constrained, only necessary spending should be done...not nice to have

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Stop putting our rates up !

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Need more community parks/ playgrounds which are all-ages friendly

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Review fuel taxes to combat inflation

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to future proof our country (and planet) for the next generations before it's too late.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I only put out 1 rubbish bag every 6 months to a year. I have composted my own food scraps for over 25 years. Going to a rates funded programme for both will hurt me financially and be totally unfair. As usual single people are always subsidising family households. How is this equitable for me? Someone who only puts out rubbish once a year to getting charged every week of the year? Also, if you insist on this new way am I going to be able to swap my unused 240L bin for your tiniest??

Rates funded system does not encourage people to minimise their rubbish.

I suspect you want to move to this new system to generate more revenue for yourselves while pretending it's not a rates increase. It's certainly going to effectively be a huge rates increase for me!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: People should be encouraged to recycle etc. Not have to pay higher rates for intangible benefits.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: The council should keep within restricted budget. Just as households do.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: You can't do everything so prioritisation is important.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It is more encouragement to recycle. If I am being charged anyway I will throw more in the waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: They are not impactful priorities.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are in a climate emergency, and require urgent action now.

I would rather pay a little now than pay a lot later for the consequences of climate inaction.

We are living in a critical window of time that could hugely influence the future. Let's do all we can to support Auckland being liveable for our children, their children, and their children after them.

This is a first step for Council walking the talk on climate action. We have a long way to go to reduce emissions in line with Auckland's Climate Plan.

I would like to more frequently walk and cycle around our city. I am excited to see \$228 million towards building more cycleways and walkways.

It will provide quick, low cost, transformational options for reducing emissions. Little to lose compared to huge potential gain!

I WANT to walk, cycle, and bus more for the benefit of the planet and my health. However, lack of infrastructure, and safety concerns, prevent this. I strongly support the increased options for active transport, which will help my ideals align with tangible, safe action.

The ferry contributes to a fifth of our public transport emissions, decarbonising the fleet is a simple, effective step towards our climate goals.

This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding.

Use of the fund needs to be front-loaded so that the most gains can be seen before 2030.

I want Council to push Auckland Transport to optimise cycleway roll out so that the dedicated funding goes further (literally).

The shift to low carbon buses should be a small step in wider actions to fully decarbonise the fleet.

Council needs to disincentivise the use of non-electric private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Pensioners have enough problems surviving on the pension as it is!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Can not afford to have any more rate increases

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Too complicated to understand!!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: For single person this would end up being way too expensive, on pay as you throw you only have to pay if you have anything to throw!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Most are needed

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We are all New Zealanders, stop differencing between us

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The proposed changes barely scratch the surface of the target. The geography and culture in Auckland is such that private cars will remain the preferred form of transport.

High efficiency roading to reduce time spent idling/going slow and support for EVs & compact cars will have a higher impact

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: there is more than enough existing provision for walking and cycling. Moving to low emission transport fleet entirely will be are far superior target to aim for.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Where are the proposals to reduce excessive salaries and staffing levels?

Selling off of assets is a backward step resulting in the sale of green spaces which adds further to negative climate outcomes.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The service prioritisation document is merely a non-specific list of further questions to be answered by some grossly overpaid bureaucrat who is answerable to no one and having their own personal agenda.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: There is no incentive in this new proposal for users to minimise their waste output.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We all need to do more to deal with climate change and this is a modest sum.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: If it is more efficient and equitable to collect as rates then this is a good however do wonder whether losing the cost signal will lead to more waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Would like to see Auckland Council keep pushing AT on cycle lanes especially over the harbour bridge and other mode shifts to public and active transport

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We have to address climate change urgently. Of course there's a price to pay.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Logical responsible approach

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: save the same amount of money by having fortnightly collections. I do support free Hazardous waste collection points so it doesn't end up costing more when it's illegally or unsafely dumped.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: This local board is spread over a two separate areas...East Coast Bays and Hibiscus. It's not a homogenous group in the same location. They're like 2 different towns.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Before any decisions, actions, new or 'traditional', please ask the question, 'What effect will this have on our Sustainability?' If it's a negative, we can't afford to do it.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I want my kids to have a normal lifespan

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: be careful with ratepayer money but don't sell the family silver

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: This should dovetail with climate spending - more bikes, less cars

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: the tags are a pain in the bum

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Targeted rates seem to be a opaque way of increasing overall rates at a higher level than the council had previously communicated.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Speed up the work on non-strategic assets and make decisions.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT encourages households to minimise their waste. Moving to a rates funded system eliminates that incentive, especially where the ratepayer is not the end user generating the waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Support on the condition that people can opt out of the food scrap bin. Also there needs to be a <80litre general waste bin or less frequent collection. We are a family of 5, we home compost and put our 120l bin out at most once a month. We need to incentivise households with a progressive waste rating system eg big bin = more waste = pay a lot more

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: #2 and #6 NOT a priority right now. #3 scrap until we can properly resource policing of existing dog bylaws at beaches and parks, this is an absolute shambles!

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Reading the proposed transport initiatives, they seem to largely support people living in the main city suburbs. For those living on the fringes and outer suburbs there seems very little to no planning to improve public transport options yet we also have to pay the extra for little to zero benefit. Cycling to work is not a practical reality in a city as spread out and geographically challenged and diverse as Auckland unless you live and work in the same neighbourhood - a very rare thing. Bus options and ferries still restrict your potential movements by timetable schedules and it is unavoidable on most days to use your own vehicle for travel. Walking tracks for leisure and health I do support fully and I also support the proposed increase tree canopy - anything initiative that will bring more rural to urban communities is a positive initiative, one that supports health and well-being, flora and fauna, and beautifies the city. A win, win, win situation.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: There seem to still be a lot of positions within Council that earn far too much for the output of the role and many positions that seem to do nothing useful in the overall Council operations. Perhaps a look at these mid to upper positions would be a good idea also. Frontline services can't afford to lose anymore staff but the other areas of council seem to be bucking the trend and growing?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Once again Orewa Library has been forgotten. This is an approx. 25 year old building that is small, dated, dusty, cramped, rusty and leaky. It serves a community that is undergoing rapid growth and is far too small for the community it now serves, especially given that it is consistently one of the busiest libraries in the entire Auckland library network.

There is a real opportunity here to build a new library/community hub to serve this growing population and weekend/holiday destination, an area of Auckland that is constantly used and utilised by locals, greater Auckland residents, and tourists alike. A position alongside the beach would be the ideal spot to develop a Library/Community/Arts Hub that will connect the sea to the land and be an enormous drawcard for many and a real asset to the local area.

The current state of Orewa Library is embarrassing and currently does nothing more than to show how little Council values one of its most popular assets and one of its most popular destinations.

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Without funding appropriate action to plan for climate change, Auckland ratepayers will be left with poorly planned and degraded services, when what we really need is better public transport and greater access to low carbon transport alternatives

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Sale of non strategic assets should be prioritized, like the sale of council office buildings, which are no longer needed now that most can work from home.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: North shore bin tags are a ridiculous user pays system that does not equitably spread the cost of waste. It creates massive service inefficiency from waste management trucks having to pull the tags off and from stores having to sell the tags. It's absolutely absurd and not an efficient approach! Get rid of bin tags!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: You would save a fortune if you weren't so wasteful.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: You should focus on essential services 100%. Quit with the ridiculous maori brown washing of the city.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: As soon as you say "cost-effective" we all know this means cost effective for You, not for the residents of Auckland.

And as soon as the cringe worthy cliques "equitable" and "climate friendly" are uttered from your lying mouths, we know this is a rort to extract ever more money from us.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Get the Maori stuff out of here

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Sensible waste free economic management. Low rates. End the maori washing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Got to look after our planet. We only get one shot at this.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Realistic budget required looking at essential services and maintenance first.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support in general however it depends on what the council deem essential and what us rate others deem essential and worth paying for. It would be nice to have a survey done on our priorities versus yours!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Limit excess rubbish to those that don't recycle.

I like to pay for what I'm using not pay for what the average household is using. Especially as we don't put out general waste every week. Think also about those companies that offer general waste collections with their garden waste. It will cause loss of income to those companies. I use rubbish bags. Would rather they be paper like they used to in the old days to help save the planet a little more.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: We need the Orewa sea wall built.

This is a priority. Just look at how many people use the beach and look at the deterioration of the bank. There should be a board walk right along the beach front. I say stuff those that live there that oppose it. It's the Queens chain and we have the right to access it.

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Yes we end most of these however it has to come down to prioritizing. Think of the council budget as a household income. Pay the essentials first and then prioritize with what's left over. We can't have everything but we do need to know what the realistic time frames are for the deferred projects.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Too many councilors getting paid far too much money. I thought the super city was meant to reduce overheads.

Also small towns like Orewa see most of our rates go out of our area. It's not fair. We pay rates based on our land values and yet don't get the full benefit of those rates.

Dissatisfied with current council with the exception of Watson and Walker up here in HBC.

What do you think of this proposal? Support

Tell us why: User pays! So if Aucklanders' activity is contributing to climate change then targeting this with levies is fair.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I think we need to reconsider increasing rates to help with budget shortfall.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Less money = less services. So prioritising services based on criteria with available funding is prudent.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Much easier and hopefully less costly due to 'buying power' to do this the same across Auckland as a whole. Dislike the hassle of buying tags or bags. Chose to pay Independant company for waste collection for convenience.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Hard to argue against without knowing how the Board budget compares to other Boards or what options are for priorities.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Mostly support but do not agree with sale of non strategic assets

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This will encourage many households to throw away more waste. I currently throw a bag a month out if that ...if I use the new proposed system there is not an option for monthly collection at a reduce fee there is no point recycling and trying to minimize the waste. This goes against the environmental end goal.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I would live the large specimens tree initiative to include fruit trees. Also I do not agree with investment into new dog parks. I think the dogs registration should cover this funding not my targeted rates.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Rates are generally really expensive. I have had a tough couple of years cutting costs myself to get through. I think council should also tighten the purse strings and stop the excess spending - we dont have any money to spend.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Necessity but not without rigorous review of internal salaries and contractors' cost/benefit

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Start at home with rigorous review of internal salaries and contractors' cost/benefit

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: No brainer

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why: Some of these are hardly priorities in current environment

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Why normal notification of significantly impacting private builds (even adjacent) or parks projects has got so minimal and nominal and 'consultation' often comes as part of a predetermined outcome - the rule of law is often absent in planning matters

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The government has not implemented a good public transportation system.

They just collect high taxes from the people, but they don't improve the status quo.

Changing the speed of climate change cannot be done by increasing taxes alone, the government needs to come up with practical governance measures and then come up with a budget.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: Depends on cost, we don't want to pay more than we currently do. Also recycling needs to be weekly, I fill a bin every week.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Is that it? No improvement on our over crowded housing and lack of roading improvements?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Because we don't need more money spent on yet ANOTHER rubbish system

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: aucklanders and NZ in general already pay enough rates, without you using another Govt support package that us tax payers still are ultimately funding.

It's like the never ending story and bull shit

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The rubbish system currently is working fine with a few rubbish collection options to choose from and competition is healthy. Plus it keeps more than one business in business other than just the council/govt

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Because this would be the third time the system has been changed, a whole new lot of bins that you still can't recycle, that's not very waste minimising is it? You are never going to reduce waste, everything you buy is in a packet and most of the packets no recyclable. what happens if you already compost do you knock that off the cost? There's truly no incentive to go for this plan

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: They're lame priorities, priorities with no substance. Nothing around the bays either.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What on earth is this Tūpuna Maunga? I have no idea what you are even talking about, how can one make an informed decision?

We need more street lamps, since the new bulbs were introduced you can barely see in the dark and it's unsafe.

Rather than changing our current household rubbish system, we actually need alot more bins around everywhere public especially bustops, which include a seperate bin for recycables, like down in Taupo. And spend some money on reintroducing and advertising "Be a Tidy Kiwi" that used to be everywhere in the 80s.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This matters to me because we are living in a critical window of time that could hugely influence the future. Let's do all we can to support Auckland being liveable for our children, their children, and their children after them. Carpe diem! What I like most is that more, frequent, bus routes will make it easier for me to navigate the city as well as being more sustainable than car travel. In addition I would like to see the council use of the fund being front-loaded so that the most gains can be seen before 2030.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We have reduced our waste significantly and only put out 1 bag every fortnight for a family of 4. We have a worm bin and recycle heavily. I feel that moving away from a PAYT system discourages reducing waste which in turn reduces household costs, same theory as water use. People tend not to minimise their use if they pay a flat rate

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: We are such a small country, and we have almost no impact on the climate, we are trying our best as it is. I agree with the low emission ferries, that should be a priority.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Not everyone can afford the rates increases, people are just struggling to live in their houses as it is.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: If it isn't viable and no one uses it, then why have it? It also comes down to how much it costs for people.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It's much easier due to the amount of recycling we have now.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They really need some upgrading and would do really well and benefit the community.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I support food scraps and standardisation across the region. You havent explained how bundling waste costs in rates results in less waste. Moving water services from within rates to metered changes behaviour. Putting cost into rates doesnt encourage a reduction in waste production. As a family of 4 it takes us 2-4 weeks to fill an 80l bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The bus network up north was vastly reduced when you went to a hub and spoke model. This has caused further vehicle usage to get to the hubs. You also have enough money in current rates, you don't need this just get your workers to actually work, get them out of meetings, don't pay them to be idle!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Do not cut back on ground works and maintenance, already the council mowing has reduced and is an absolute shit show.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I have no faith in this, for Christ sake you spent 1.5 million on a blue intersection and then removed it. No one was accountable for this spending! Perhaps fire bad decision makers then trim the budget plans

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Although the food scraps system is terrible, it causes flies to mingle and is a pain in the ass. Don't do it, it's a waste of money only to increase your feel good factor.. it's a waste of time and money!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Trim your spending and deadwood staff (before charging rate payers).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: While I support setting aside funding for climate change action, I am not convinced that spending money on cycling and walking has been properly thought through. Auckland is a hilly, spread out place and a large percentage of the population are not able to ride bikes, due to their age and cars will always be necessary for grocery and other shopping. Buses don't always cover the areas in which these people live and you can't take your weekly grocery shopping on a bus.

Council has made some real errors in taking parking spaces outside shops and creating cycle lanes. In many cases those lanes don't get the use that warrants the loss of business from those retailers. There doesn't seem to be a return on investment study completed during the feasibility stage and business owners concerns have been ignored.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: There are far too many people employed in Council at very high remuneration and services are slow and too bureaucratic. Operational spending should be examined from a business process reengineering perspective to reduce cost and improve efficiency. I'm reminded on business reinvention and management guru, Tom Peters comment:

"People in enterprise, in government.....are by and large well intentioned. They'd like to get things done. To be of service to others. But they're thwarted at every step of the way by absurd organisational barriers and by the egos of petty tyrants (be they corporate middle managers, or army colonels, or school superintendents)." Tom Peters, Re-Imagine! Business Excellence in a Disruptive Age.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: You need to forget about spending any money on legal obligations to Maori. Funding should never be race-based.

Opportunities to improve value for money can be achieved by:

1. Doing things differently and better
2. Engage with businesses better - you could learn lessons from them because those businesses are risking their own money, rather than ratepayers, and have learned how to mitigate risk.

My property looks over the Oval at Gulf Harbour which Wentworth College uses extensively as do walkers, cricket and soccer teams, and families. The grounds seem to get mowed two or three times a week during Summer when grass growth has slowed down. Those costs could be reduced if the Oval was mowed when it was needed, rather than routinely.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We compost and worm farm our kitchen waste and use Council's Recycling bin. We pay another waste removal company for waste that can't be composted or recycled. I wouldn't want to pay more than I am now.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Creating new dog parks isn't a priority under the existing circumstances, particularly since most dog owners take poop bags with them and are pretty conscientious about cleaning up after them.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The local board has a better idea of what's happening in our area and needs to be listened to.

I was astounded to hear that the votes of the councillors against the Hauraki Gulf Reform changes were over-ridden by non-elected people who should have never been included in that vote. That is an affront to democracy and I will be voting for councillors at the next election who are committed to democratic principals.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rates should not be going up. Council should be reducing spending in non-essential areas and focusing on it's three core areas - water, waste and transport. Everything else is superfluous and can/should be user pays.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Councils core services are water, waste and transport. This is where spending should be prioritised.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My waste is minimal, I put my bin out once every 3 to 4 weeks. rates funded system means I will be paying more.

In addition, I oppose the food scrap collection charges - all of my food scraps are used either in compost or animal feed.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: There are other ways to reduce emissions. Some people such as tradespeople need a vehicle to get from point a to point b and reducing their options by investing in areas that force them to adopt is not the solution.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Better management of what we have is the solution. The tax take is larger than it has ever been and we have never had these issues. Council has wasted and misspent money over decades and this is not the taxpayer's responsibility to bail them out. Stop the wastage of non-essential spending. Then come talk to ratepayers about paying more.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I know that this simply means pass the costs on to others. It's time the council was accountable for working with what they have like business owners do and households who all face the same challenges. We have paid our rates over decades for these services, the tax take is the largest it has ever been. The council should look to create more and encourage economic growth, then the funding will naturally be available, but a positive business environment is needed and the government is directly choosing to control this which is affecting the council and this is not the taxpayers' fault nor responsibility.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: we need other alternatives to create competition and choice for the consumer. If the rubbish is included in the rates we lose that choice. This is a monopoly then and a dictatorship. I disagree with this strongly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Let's help those who have lost jobs due to Covid first

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: It happy with selling non strategic assets that have been gifted to Auckland city by ratepayers

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Best way to reduce rubbish is to provide a financial incentive. Less rubbish = cheaper. Especially as some only put out rubbish every few weeks/ months.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am very much in support of providing funds for action that mitigates against the worst affects of climate change and funds adaptation of Auckland city in a fair and equitable way to all in society. I am in support of a higher rate for the highest earners and owners of largest properties and no contribution to be made by the less well off in society. I want the rate implemented this year, not delayed until 2023.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Definitely more green spaces, tree canopy cover and improved walking and cycling options. We are so lagging behind compared to Europe.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: No asset sale, that is just nonsensical - why not lend against future revenue from assets if the capital is needed now?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: No excessive lawn mowing of public spaces like in the past. You can start saving money right there.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: If you get rid of the PAYT system then go and collect some of the cost from those who introduce the waste. E.g. the companies selling goods that are packaged in plastic

Otherwise PAYT is the best possible option as it incentivises those that make an effort to produce less rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We want green spaces, room for kids to play and discover.

The coast is currently bombarded with new developments. Where are people supposed to spend their free time? Not enough green spaces, leisure centres etc.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I submit that it is critical that KLB invest in permanent baseball infrastructure at Stafford Park in Northcote Point during the 2022/23 capital cycle. Specifically, during winter 2022 in support of the 22/23 season from October 2022.

For health and safety purposes, this investment must include a permanent backstop capable of more effectively preventing balls from exiting the field of play and landing on or amongst spectators, parked cars, neighbouring properties, and other users of the park. The current netting based system is full of holes (including from council mowing contractors) and should not have been used in the 21/22 season due to its poor condition. Furthermore, it extends insufficiently far down the baselines to prevent hard hit balls from exiting into spectator and benched player areas. This backstop should include built-in home and away dugouts for both player safety and protection from the sun. Stafford currently has no built shelter from the sun. Additionally, moveable outfield fencing should be provided to prevent balls from being hit onto nearby roadways.

Although the health and safety need for this infrastructure is paramount, it should also be noted that all of these items will improve the recreational capacity of Stafford Park for baseball purposes. Baseball is a growing, diverse, and inclusive sport and Stafford Park is the only baseball facility for those aged 14 and over currently operational on the North Shore. Even as other facilities are developed it will continue to be put to more and more use for both training and competitive games across a range of ages and grades.

In short, Stafford is one of the most heavily used baseball facilities in Auckland but is also the most run-down, dangerous, and unsuitable. It is critical that capital improvements be undertaken during winter 2022 for use in the next season. Any delay risks damage to property, injuries to participants and others, and a decline in recreational participation in our community

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Or is there anything further you would like to give feedback on?

I am extremely unhappy that Auckland Council would support the wanton destruction of exotic trees on the Auckland volcanic cones. The evidence of the cones (Mangere Mountain and Pidgeon Mountain) already attacked by the TMA is shocking. I think if ratepayers were more aware that such a fate awaits other cones such as Mt Albert, Mt Eden etc they would be shocked. Especially since the enormous cost would be borne by them. The TMA have shown themselves as deceitful in their communications regarding what plants would be planted in lieu of the magnificent trees that exist on the high ground. Devastating. Auckland Council should be ashamed given the climate change emergency.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We have two people in our household and do not produce a lot of rubbish. We have the smallest bin available and do not put it out every week so we prefer the PAYT as we only pay for what we use.

We will not use the food scraps service as we compost at home so do not want to pay for a service we do not use. How will you manage that?

We would prefer the recycling to be PAYT also as we rarely half fill our recycling bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Strongly support electric ferries, and expanding the ferry network. Strongly support SkyPath harbour bridge cycle access, or bike racks on buses

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Don't support sale of car park assets, such as in Takapuna

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Don't support sale of car park assets, such as in Takapuna - these are NOT "done equally as well" by private operators

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I was part of the PAYT bin tag trial, and that worked very well. Do not like the tags, but I already compost much and throw very little. Even the small bin would be too big and too often for me. I support removing multiple bin collectors on the North Shore.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Would like to see more development of Long Bay-Oakura walkway (for cycling)

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: None of the proposals promote curbing spend or cutting back on services. This is just another targeted rate to add to all the other targeted rates in addition to the normal rates.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: keeping to previously agreed rates increase is good. Manage within existing budgets, if it can't be afford, then defer or look for savings. Don't expect households to cough up more money. They are also suffering the ongoing impacts of COVID

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Stick to just delivering the core services required by law. Scrap the things you could do or won't do if they are not essential local government services.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I live in a rural location and choose to use bags and a private waste management provider, and do not want another wheelie bin or a food scraps bin. The start of the paragraph states that you are moving to a rates system so this is not a true consultation. For those that do not want yet another wheelie bin, they needs to be an opt out for the system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Adding a target or goal and measuring against it mean spending is prioritised where it is deemed most effective.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our family is using a 80L bin and mostly we put it out only every two weeks. We compost our vegetable waste and so have only small amounts of rubbish accumulating.

I am guessing that tenants may not want to pay for waste so throw waste into their recycling bin which is not smart either.

You did trial a payment system last year using scanners on the truck to charge costs to credit cards. Using a system like that would save the additional cost of tag walkers picking off the tags and avoid users having to buy tags. It doesn't solve the tenant issue though and I accept that is a plus with the all inclusive service. I just don't know if it will reduce the amount we throw out. It will encourage me to throw more out possibly.

The other thing is that residents can currently choose a different service (non council) and that just seems an inefficient use of trucks and use of green house gases. That should be stopped.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I would like to know how this new system is more beneficial to EVERYONE?

It appears only to be beneficial to the Council and ANOTHER reason to add extra costs to rates for LESS services.

It is particularly unfair and not well thought out for people that are:

Retired and only put out rubbish occasionally.

People on a cheaper rubbish contract (have you considered how it will affect other businesses by taking away their customers)?

Single parents and those that budget and pay as they go, only to be penalised.

Those that don't have rubbish collected every week.

Eco friendly people that already have low rubbish.

Ratepayers should be given the OPTION- give people the choice to OPT IN or OUT.

You may find that this will result in increased roadside dumping of rubbish and your plan will backfire.

One plan does NOT fit all and forward thinking from the Council will surely see this.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would like to believe that having my say is actually taken into consideration but I suspect it is not.

It just appears to be another excuse for the Council to keep increasing rates and are trying to be seen to be doing the correct thing by asking our views when in fact, at the end of the day they will still continue with their plan, regardless of what is best for ratepayers.

Your spending is unfair and unreasonable to those already struggling to survive in this supposedly wonderful “Supercity”. No wonder so many are moving out of Auckland! Unfortunately, not everyone has that opportunity.

I look forward to a response that I have been heard and that I will be given the choice to decide on my rubbish collection preference.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: First and foremost,

New Zealand is one of the most highest taxed countries in the world and adding more will severely cripple a majority of the population; especially in Auckland where rents are horrendous.

Moving to low emission vehicles; once the batteries of electric vehicles are shorted out the vehicle becomes a raging inferno which will create a greater loss of lives.

The documentary by Guy martin on Electric cars shows the running costs are much higher than marketing publicity states. Also, it proves the only way to ensure any shorted battery is totally extinguished is by immersing the vehicle in a tank of water for 24 hours.

Research into hydrogen vehicles would be of greater benefit.

Increasing trees should be for all communities - who decides which ones need them?? In our community council gave permission for a group of trees, over 100 years old, to be destroyed to make way for a pile of apartments which, by seeing the construction, will not stand the test of time.

As it has frequently been stated: Trees are the lungs of the world. So planting trees everywhere is a positive move for climate change.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Auckland rates have already gone up and services have already been reduced. The council needs to look closer at it's spending e.g. the proposed rail link to the airport; there is already a rail link which just needs further extension to take it to the airport, this would save a lot of rate-payers' money. There are buses from the airport to the city as well as the ring road.

There are also too many new sub-divisions putting more pressure on the infrastructure which cannot cope.

Too many issues now-a-days are being blamed on Covid when, more often than not, it comes down to bad decisions.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: There was no option to show support for the PAYT system which is a far fairer system. In our household we put out a yellow bag only once every 4-5 weeks. Our household recycling goes out every 6 weeks and we pay, once a month, for our garden waste to be recycled. We also have 2 compost bins in which we put any organic matter, i.e. vegetable scraps etc. I try to make as many of our meals as possible thus cutting down on tins, plastic wrapping and boxes.

Every one is as capable as we are to do these basic money savers which also help the climate and landfill.

Why should people who are trying hard to do the right things have to pay for those who don't care or can't be bothered.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Not sure about the new Business improvement development when there are business areas being developed all over the area at the moment.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

There should be research into building a power station which runs on the waste that would otherwise go into landfill. Where there are humans there will always be waste so let's make good use of it.

In Denmark there are factories that run on the waste from other factories. An excellent recycling move.

Brazil also has an excellent recycling programme.

These should all be researched and developed for our community.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: more action is needed, and combined with the green bonds already available, should allow for more meaningful sustainable investments.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: i like that there are efficiencies in the rates funded system and makes the overall cost cheaper. However, i dont believe this will result in meaningful waste minimisation. I believe that people will be of the mindset that they already pay for it on a regular basis and wont bother to try and minimise their own waste generation.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: i think most of the priorities are ok for the general community, however the Local Board's town centre plans still remain unfunded. There should be ongoing yearly funding to try and improve town centres to be more pedestrian and cyclist friendly. A lot of money is focused on the city centre, however i believe that most people tend to use local centres than the city centre for every day/normal weekend events and activities. Additionally, by investing in active modes, more action can be done that is consistent with the climate change emergency.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Climate change is an emotoinal issue but we need to remember we are only part of the global issue. Before we get carried away we need to ensure the rest of the world are playing their part and not negating any theoretical reductions made by NZ. We need to direct our focus and having the worlds largest polluters reducing their impact by a small amount will be bigger than the impact any improvements NZ makes

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Need to revisit the whole budget and re-assess all spending and revenue. The whole economic structure of NZ and the world has undergone a major shift and using historic data may not be the best way forward. Suggest freeze all budgets as at last financial year until the full impact of the new order is understood

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Need to revisit the whole budget and re-assess all spending and revenue. The whole economic structure of NZ and the world has undergone a major shift and using historic data may not be the best way forward. Suggest freeze all budgets as at last financial year until the full impact of the new order is understood

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: in theory makes it equitable for every rate payer provided the same rate is applied to every user

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Reconsider all projects which require major expenditure, are there new ways of achieving the same outcome without being radical and green washing to maintain a look

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The council sets the CV values and the new rates. It then says it is only increasing the rate by 3 or 4% but this rate value is based on the CV and in the current case the CV value has increased by 12.82% and then on top we are getting a 3 - 4 % rate increase. Deliberate misleading information by the council.

Need to revisit the whole budget and reassess all spending and revenue. The whole economic structure of NZ and the world has undergone a major shift and using historic data may not be the best way forward. Suggest freeze all budgets as at last financial year until the full impact of the new order is understood

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: By keeping to core services such as roads, buses, parks, water, sewage & rubbish and dump libraries, cycle ways, welfare support and all the non essential services the council is intent on to spend out money. Most of the above items are user pay as it is. If you stopped wasting money on unsupervised contracts you would meet budget on the present tax take. Easily!!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Agree, this should have already been happening.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Social and cultural why are you spending my money on this. Stick to the councils core role. My culture doesn't need any help from the council and if it did user pay. There are still dirt roads one hour out of Auckland so called super city.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This is already in place. I pay for my rubbish bag. Once again this service is not adequately supervised but think its relatively efficient given its Council controlled

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: The sports fields are the only project I support., In the past I have been involved as a volunteer and we dont need council support. Just stop spending on wasteful projects. Eg dog registration should cover dog activities. I have had dogs all my life and haven't seen the benefit of a single dollar of the annual registration fee in about 50 yrs.

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: What about the gravel roads. Wilson Rd South Head is a disgrace. Access to the western beaches and lagoon now seems to be at the whim of whoever decides to lock the gate. Not good enough. Congratulations on the other parks well done

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why: Aucklanders are already being hammered with rates/taxes over and above the annual general rates take. As for increasing "tree canopy" - the destruction of existing trees needs to stop immediately to help address this issue.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Personally, I support the same sort of system city-wide. However, implementing this is the problem. Those of us who generate very little rubbish - whether its recyclables, general waste, or food waste - are going to be penalised. A "user pays" system is preferable in this instance. If a charge is going to be added on to the annual rates, people are going to make sure they get their money's worth - ultimately creating more waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: There are already so much money collected from people daily through the rates and the petrol levies - aren't these meant to also target climate change?! With rising cost of living and inflation out of control, it is unfair to add more to people's tide budgets

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I strongly disagree with this proposal! Our whānau has worked hard over the years to change waste management habits and to lead more sustainable way of life. We compost all food scraps. We separate recycling from landfill. We collect soft plastic and donate to participating super markets. We donate glass jars to various community organisations. We shop in bulk stores to minimise packaging etc etc... As a result, we take the general waste bin out (orange tag) no more than 4 times a year (\$11.40/year)! Introducing additional tax to our budget is completely unfair, given all the effort we do to look after Papatuanuku and to keep within budget. What is the motivation then for people to do the right thing? What is the acknowledgment for people that they are doing the right thing? I really think this proposal is unfair! With rising cost of living and inflation out of control, it is unfair to add more to family's tide budgets

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I feel that one of the priorities of the local board should be around safety as well. There are increasing number of residential burglaries and illegal camping. Feeling safe in the community is a fundamental basic right.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The 4 choices above are too vague. No mention of electric or Hydrogen powered vehicles or smaller more fuel efficient vehicles for off-peak use.

What is the current usage of ferry services as a contributor to pollution?

Why are we still allowing residents to cut down trees if we need more?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I fully support efficiency savings and would like to see better quality and planning control of projects to eliminate "re- do's"

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Your analysis unfairly targets superannuitants.

Most superannuitants use the 80L bin and only place it for collection every 2 to 3 weeks.

Assuming two weekly, bin tag cost- PAYT		\$74 p.a.
Proposed waste charge-		\$124 p.a.
	INCREASE	\$50 p.a.
If you now add the proposed Food Waste charge		\$61 p.a.
	TOTAL INCREASE	\$ 111 p.a.

What happened to the electronic chip you were proposing to install on all waste bins for automatic PAYT ?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: Need to see proposed spending on these projects

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Don't support some of the proposed levers as insufficient detail on what they might involve.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Need to continue with programs where a dollar spent today saves ten tomorrow. Eg stopping weeds before they spread. Purchasing assets before price increases.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: More equitable and essential to encourage minimising waste of planets resources

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Generally reasonable but would like to see more go into walkway/cycleway creation and weed control

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Maunga Authority needs to be more inclusive to general community concerns.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: A targeted rate will not solve the problem.

At the moment people do not want to sit in a bus due to covid.

This may change in the future depending on the next variant, but I wouldn't bet on it.

There are 3 ferry terminals on the shore, what good is a low emissions ferry if there is no departure terminals, why not concentrate on evs for public transport or councils.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I agree, but don't treat us like idiots, if you need to put rates up more than 3.5% don't hide it, just tell us why.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: You are supposed to support waste minimization.

I compost, I am careful what I buy, I barely use one 270 litre bin every four weeks.

With the new system I'll be charged weekly if I use the bin or not, that's not fair.

It's also anticompetitive, other bin company's charge less than the councils going to charge.

That's a monopoly, no good to anyone.

Looks a lot like the inorganic collection a 100% off people pay for in rates and 20% use.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Things are tough, I think some of these priorities are no longer priorities.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: 'I strongly support the funding and development of the Matakana Coast Trail Trust trail in the Rodney district, because:

- It will get cars off the road – commuters and school trips – less carbon emissions!
- Kids could safely bike to school, the current roads are dangerous!
- The rest of New Zealand has many trail options – Auckland has virtually none!
- Our community (the Auckland region / the Rodney district) is growing so rapidly but the infrastructure hasn't kept up, and we could all do with more outdoor options.
- Life style and healthy activity for our wider whanau from Tamariki to kaumatua. Especially where youth need more healthy activity.
- Increased income for local businesses through tourism, bike packers eg Tour Aotearoa, Fun run activities as with Orewa/Milwater walkway.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Salary caps on top salaries need to be a long term action as at present they are not sustainable with the small population of NZ and completely out of touch with general public. Golden hand shakes for jobs poorly done need to be removed. Penalty payments on contract over runs need to be enforced. Too much tax payer and rate payer money is being wasted in these areas. I totally disagree with reduction of services already cut to the bare minimum, so much so some things are now becoming a health and safety issue. We need more accountability and transparency to our services not cut backs. Services need to be done properly and timely .

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Mitigate key risks.... to both public and council staff. eg. footpaths are a safety shambles. Two people sitting in a car driving around socially chatting and briefly looking at the condition of footpaths is a waste of our money. These people have been through our local area and not work done to fix some 30 damaged and trip potential footpaths, with in a 2k zone. These were photographed and addresses given during the first covid lock down.

Get the staff out of the cars and onto scooters electric bikes etc riding the footpath. One on each side of the road. Do the job properly rather than wasting rate payer monies.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: Re The food scraps service.. will a house hold be billed for this service if they are making good use of composting systems with in their own home??? So pay-as-you-throw (PAYT). Should not happen if you are not throwing food scraps in the general waste bins.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: There are 2 of us both retired. At present we use a 60L rubbish bag a fortnight . This is approximately \$50 per year for our waste. Your new charge on our rates would be \$124, a 150% increase. We dont need the proposed food scrap levy because our scraps are composted . We pay \$78 to have our plastic, cans & paper collected per year.

Your new proposed charges are going to be another financial burden for us on top of a 6% Rates increase. The proposed bin system could create more waste going to land fill as we see it (Not Less) Please consider all us retirees & conservative people before introducing these new charges.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: Like many people in Auckland I live alone. The waste I produce is very small . I buy a packet of yellow bin bags once a year. The small amount of food scraps go into the freezer to go out with the yellow bag. The recycling is put out about once every two months and I already pay \$140.00 a year for the Waste Management Green bin for garden and vegetable waste.

Charging an extra nearly \$300 per year for something I don't use would be particularly hard and I speak for many others in the same position, and I definitely don't need a food scraps bin.

Perhaps this proposal should be re-considered

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is a waste of time - people find cars more flexible and affordable than public transport. Build more roads to lower car emissions due to congestion. The tree canopy thing is hilarious. Trees are being pulled down left right and centre around me because properties are being subdivided. Extend the city outwards to allow people to have nice living environments.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: It is essential to improve transport. However, this must be equitable across all of Auckland. There is presently too much emphasis on cycling which is used by very few and adds to traffic delays, and trains- that are only available in small parts of Auckland, and can only run on fixed routes.

It is essential that immediate action is taken to stop the destruction of trees and buildings in our suburbs. This is adding to unnecessary waste and destroying the environment. An urgent change must be made to the tax advantages in "New Builds" to allow for protection of existing environment. The Targeted Rate should be applied directly to developers, and NOT to the general rate payers

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Costs must be cut. Use Government funding, Get rid of all the Management Consultants and Contractors. Stop selling Parks and Reserves, and get back to supporting our City. Implementing better planning and controls, so things are done in logical sequence instead of piecemeal that requires multiple repeat visits and re-dos.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The present system of User Pays as used on the North Shore best to reduce waste. In my case, I put all garden and vegetable compostables in the compost, recycle as much as possible, and generally have very little other waste to dispose of. I have probably only put out a rubbish sack twice in the many years I have lived in Auckland. The system being suggested will add considerable cost to my rates for a service I will probably never use. It would also disadvantage smaller households and the elderly.

I consider the proposal will greatly increase the amount of waste going to landfill, because people will simply put everything in the waste because they are paying for the service. This will be counterproductive to the Zero Waste initiatives

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: More needs to be done to protect and improve the Bays area. Almost all the listed items refer to Hibiscus/Rodney area

People with dog should pay for the dog parks via dog licensing - not the general ratepayers - who will probably avoid these areas.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I live in Whale Cove, Red Beach, in a small col-de-sac street and we currently have rubbish trucks collecting rubbish on 3 different days of the week. When recycling bins were introduced, our recycling day was changed but not all the companies changed their rubbish collection days. A standardisation of rubbish collection would reduce the number of trucks.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: If waste management is “a critical issue for the health of our environment” and the intention is to “do our bit for the climate” then you are planning something which will do the exact opposite!!

Environmentally appalling. Pay as you throw encourages people to minimise their waste and incentivises alternatives such as recycling and composting. This was the plan when recycling was first introduced and a pay to throw system was introduced. It was incredibly effective in encouraging recycling. Removing the charge for waste is taking a step backward and will have exactly the opposite effect to that which is being claimed as the motivation for the plan. People will be less inclined to minimise waste which will result in more, not less, waste and will be environmentally detrimental.

Penalises small households. I am a one-person household. Most of my friends and family are also small households (single people, couples, pensioners). Currently the bulk of my waste is recycled and I use a waste disposal or compost. I use a rubbish bag only once every 6 weeks. Even if I estimated on a higher frequency I would, at most, put a bag out once a month and this would be true for my friends and family. This equates to at most \$34.20 pa (\$2.85 x 12), well below the proposed charge of \$124 pa. The only incentive here is to utilise the prepaid waste system MORE!

Area and bins vs bags. I live in Rodney (Orewa). We currently use rubbish bags with independent contractors - Auckland Council do not even provide a rubbish service to my area. I live down a shared double driveway. On recycle day there are 8 bins at the end of the driveway which barely gives room to get in and out. Adding an additional 8 bins for rubbish collection would result in chaos. It seems that the Council's intention is to finally introduce a rubbish service simply in order to be able to charge me!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: With all of the current events, sourcing sufficient funds will be difficult and should be monitored fairly.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: If each household is informed of how to throw away their rubbish appropriately, it makes a massive difference and gives the public a sense of responsibility.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: 'I support

- Continuing with Te Ao Māori and community-led conservation project which brings local iwi and volunteer ecology groups together to share practical knowledge of our area.
- Investigating and designing new dedicated dog parks within the local board area.
- Starting to plant large specimen trees as part of the Urban Ngahere (forest) programme in selected reserves.
- Supporting our Business Associations with an economic development fund and assisting Silverdale's intention to establish a new Business Improvement District.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I strongly support the reduction of transport emissions in order to provide a healthier climate and a better environment for our ever-growing community. I believe this is important as a warmer climate can lead to a great deal of public and environmental health challenges, and I believe that we, as a community, must all play a part in repelling this threat.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: In Hibiscus Coast we have been ignored for years asking for better prompt reliable Ferry Service which would at its peak take 1000 cars off the road and also money for 4 lane Penlink. Instead of wasting money by being politically correct how about actually spending money on new ferries for gulf harbour. Currently cancelling 4 services a day due to lack of staff because if mandates

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: The spending never seems to benefit the actual people

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: You reduce services in the wrong areas. Hibiscus Coast has grown massively and our services keep getting reduced. Last time it was buses and now even if you try to get a bus from army bay or gulf harbour the services do not connect and make it impossible for anyone even trying to use public transport as ferry's have been reduced as well

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It should be covered under our rates bill and we should have wheelie bins for all 3 regular waste , garden and it should be the same all over Auckland.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: Infrastructure and improvements in roads like Penlink and the ferry services should be top priority not all this other woke rubbish. Actual money spent to help the environment with better roads and alternative services. 1000 less cars on the road if ferry service is reliable and sustainable

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We are against anymore management being handed over to iwi such as the Hauraki Gulf as this land is for all people not just maori.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: If rubbish collection was on my rates I would feel that if I didn't use it to the max I would not be getting what I am paying for. As it is I only put out my bin once every 4 to 6 weeks. Not a fan

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to do everything we can to combat climate change, I hope this will mean that public transport costs are reduced to encourage more people to use PT more, rather than driving. At the current PT prices, I can see why people are still driving more often.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rates are already at an all time high. Rather than charging more and more each year, why not look at all of your departments and look at restructuring like a corporate company would if they have a downfall - there are a lot of unnecessary jobs in the council and people who don't achieve much. Especially during Covid... other companies would change their working model if they had a shortfall of \$85mill.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Even after reading the additional information, I have absolutely no idea what this question is about.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I very much prefer the PAYT system. Personally this encourages me, and my friends and whanau, to do our best to reduce waste as I know I'm only paying for what I throw out. The current system incentivises me for making an effort to reduce waste. We are a family of two and put our rubbish out once a month, we also compost at home, and are vegetarians, so the food waste that goes in our rubbish bin is very minimal (really only things that can't go in the compost such as onions and citrus, and the odd thing that doesn't get eaten).

By moving to a regular system, we would be paying 250% more than the current rubbish ticket we buy, but putting costs aside, I would rather do what is best for the environment and reducing waste. A regular bin collection service will not do this, it's counter-intuitive. Why would people bother using a compost/food waste bin when they now have a bin collection every week or two where they can just chuck it all in one bin, and not have to take the time or care to use a food waste bin? Those that will use the Food Waste will be the people who are already composting and doing their bit to reduce waste anyway, so all of us doing our bit will be paying for those to 'attempt' but won't due to a system which is set up to fail.

People will be far more likely to fill their bins up each week, making it so easy to get rid of household items that might be wearing a little, or things that are still usable/good quality because they can't be bothered driving to an op shop or listing it on trademe, out it goes in the bin since they have so much space and don't have to pay for it...

Why not introduce the small Food Waste bin collection, but keep the PAYT system for rubbish? Then you will see a huge uptake in people composting and utilising the food waste bin, because they will see the benefits and incentives by putting their PAYT rubbish out less often! Put the PAYT ticket prices up a little to cover the cost of the Food Waste pick-up.

For renters, this new cost in the rates bill will be passed on to the tenants by landlords, so it's another reason for landlords increasing rents.

At the moment there are other competitors in the market for collecting curbside rubbish (such as the yellow bags) - this will mean Council will have a monopoly on rubbish collection (thus potentially doubling their current profit margin). I do

sincerely hope the reasons behind this concept aren't due to the financial benefits for council acquiring 100% of curbside revenue.

I am disappointed as this really doesn't sound like an environmentally friendly option. In saying that, the Food Waste Bin idea is a great one! Just don't do it at the same time as making curbside waste not PAYT.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think that the goals are all viable and needed to help the community. Especially the ones centered around lower emissions. The tree canopy is also an idea that would be very nice to see more of.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: On one hand, changing the time of capital spending will help because not many decisions will be forced and decisions will be thought about more before finally being casted. But on the other hand, implementing cost reductions over and over again isn't going to help.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Understanding the priority of what is important is very important by itself. I just don't think the Auckland City Council or even the government does that properly yet.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: The council is a mess in waste management. My mothers house doesn't even have compost or rubbish bin yet and she only found out much later that she needed to call the council. Shouldn't all houses that are being rented come with all of the bins already? But for the the PAYT vs rates-funded system, I don't really care which way it goes.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We only put out our rubbish bin with tag every 3-4 weeks. Even with the proposed smaller bin we wouldn't need to put it out weekly. And we compost so would not use a food scraps bin so don't want to be paying for that in our rates either.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am a sustainability consultant helping business take action themselves. As an ex-council employee in the Chief Sustainability Office I know that this is long overdue. In fact, it is the lack of action that made me abandon Council to try and have a positive impact elsewhere. Auckland Council has done great at the talk but not such an awesome job at walking that talk. This targeted rate will certainly help address the budget issues required to deliver action now.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Public services benefit all citizens, and not too much tax, should be supported.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Everyone is involved in order to achieve the goal.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Only improving by adjusting

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Due to the severity of the epidemic and increasing prices, try to avoid to increase land tax.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: because most of them benefit to people's life.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

hope for controlling living cost and petrol prices, etc., or properly subsidised. In order to reducing the cost of living for the people, during Raging COVID-19.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to do our bit against global warming

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We need to minimise rubbish. PAYT incentives people how reduce their rubbish by better recycling and making purchasing decisions based on rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

6. What is important to you?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: While supporting the climate action, until this topic is considered in depth eg how alternatives to petrochemical energy are obtained. I cannot support a targeted rate. If we continue to import coal to produce electricity, we are having the opposite effect to the one we need. What volume of greenhouse gases is produced in the production of batteries for electric vehicles? What energy is used to produce hydrogen for hydrogen fueled cars? Are people going to use cycleways in our hilly, often wet city?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: There is plenty of room for cost savings. eg a set of 6 traffic lights by the Orewa South bridge for a pedestrian crossing which don't even have 4 pedestrian lights. Who wrote and oversaw this contract. Multiple signs on parks saying they can't be mown in the winter - fairly obvious. Save the pennies and the pounds usually look after themselves.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: As a household that puts out a bag of rubbish only 3 or 4 weeks, this would be more expensive for us. Could we opt out of the food scraps bin? We use a waste disposal unit and have a compost bin. A bin for food scraps would be a nightmare with the number of ants in the area.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The arts are not mentioned in the priorities even though they are recognised by the Council as being important

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

While supporting the local boards being able to make more decisions, it depends how the funding is provided by the Council. Currently the arts are supported by a specific fund which was based on legacy amounts. As Centrestage Theatre on the Hibiscus Coast received no funding when under Rodney District Council, under the Auckland Council it received leftovers. The amounts for other venues vary immensely, with some having building insurance paid as well as a cash grant. These amounts have not been reviewed since the formation of the Auckland Council. If they are used to calculate the amount allotted to Local Boards, the gross inequity will continue. Hibiscus and Bays have been very supportive in recent years but this is to the detriment of other spending in the area.

This is not good enough and shows inadequate performance by Council staff.

What do you think of this proposal? Support

Tell us why: What choice do we have really???? I would like to see it kept at \$1 max. per week.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Look at services, do lawns, bins, other infrastructure items have to be done as often, can we push it out a week longer between visits? Do we need 10 people doing that work, could a team of nine manage it with less visits each month? Take a critical look at what we are paying for a job and what we are getting for our money

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Time to get tougher.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We use PAYT and like the concept of user pays.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Make sure Te Ao Maori do some practical work as well as sharing (talking). Love dedicated dog parks. Why not some dedicated dog beaches? Then we can finally have some dedicated NON DOG parks and beaches. In all the reading I have done about budgets over many years I have yet to see ANYTHING significant done for boat owners and launching boats and boat trailer parking. There are many boat owners in Auckland.

!

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: 1. Would require three bins in kitchen instead of two.

2. Limited size of bins. At present we are not restrained by the number of rubbish bags you can put out each week.

3. Bins would become smelly if we only put out food scraps bin for collection every two/three weeks because of aiming to reduce collector effort and my effort in cleaning bin. Which also uses our precious tank water.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Single person households with little waste need to be supported and those who do the right thing by recycling, composting, etc and therefore generate little waste - PAYT is a fairer system. An opt-out system for the new rate is an option. Also, a lot of homes don't have room for all the rubbish bins (recycling, general waste, etc) and the PAYT system (rubbish bags) offers other options in this regard

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please continue to fully support libraries and community events like Movies and Music in Parks. Please do more enforcement checks for freedom campers, dogs on beaches in summer between 10am-5pm when they are not permitted between those hours

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Overstated and are we applying measures that will plunge earth into a climate cooling crisis. You want to make savings because of Covid put these measures on hold till later. We don't have to align ourselves with central government, labour, policies just because Mayor wants to look good with his Labour cohorts

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Need to look across all council spending including upper bracket salaries, stand alone entities, and contractors for more efficiencies. Paying big money for wages ie water services, with infrastructure collapsing and Wonder why central government wants to take assets away from us.

Road contractor doing own road survey for assessment of which roads need work done on. Some streets for no reason have been resealed in my area with no apparent reason more times than my own with broken kerbs.

Likes of developers and utility providers when doing paths etc are checked up on.

My front drive the concrete poured by chorus was obviously substandard as already breaking up. Partly because council and themselves don't realize that the rubbish trucks though they try not to end up driving onto it and not built for big trucks when turning around in our hammer head street

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: If you sell off assets what are we left

How are we going to have our say when council implement this as should not be left just to council what stays and what goes

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I do support idea especially as would like to see all bags go however there will be others like us who compost, keep an eye on wastage so my wheelie bin does not need to go out each week. This in itself must provide less carbon footprint from our household.

Can't see point of been charged for a smaller bin when it is unlikely to be filled more than once a month

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I fear more money is been spent in Hibiscus area than bays?Just a feeling I have

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I feel notifications from council is a bit weak , maybe my fault for not following enough but is there some way better for council to update the public better?

What do you think of this proposal? Support

Tell us why: HI

I live North of Auckland in Red Beach, as a regular commuter into the city I have watched over the years as more and more people choose to drive their cars into the city and clog up roads. Aside from the environmental impacts the cost to business and personal time is too much.

The bus services were well used where they exist (from my point of view anyway); but its clear that this wasnt an attractive option for many judging by the way traffic has continue to build. One of the issues is parking for those who have to drive to bus stations, these are often full very early on. Putting more people in reach of feeder bus services could help to reduce the issue of parking, reduce the amount of polution and stress, and free up roads.

Another issue with current feeder bus arrangements is that (in my experience) it can easilly add 20 minutes or more to travel times, particualy when coming home. For this reason i dont use feeder service if i can help it, I'd rather drive to bus station and fill up a parking space!

I also support any work to build and join up safe passages for smaller alternative modes of transport such as cyclists and small electric bikes/scooters as I think this would encourage more people out of their cars where practical.

thank you

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Essential

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I grew as it will stop rates increases but be careful selling off assets (like you did with the council building in Orewa). This is shortsighted and will cause even more costs down the track

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: But Orewa already gets nothing done here for ordinary people. I suggest you cut salaries at the council which are really high and stop using consultants and outside companies to do necessary work. Take them back in house and remove middlemen's profits

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Fine

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Because you never do anything for Orewa. The reserve in marine parade to arundel is appalling and hasn't been touched for 20 yrs.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I believe it is urgent that we set ambitious targets for climate change and begin action towards them. As a teacher, I see our young people struggling to have hope for the future. I have had teenagers tell me they don't plan to have children because there won't be a world for them to grow up in. What a concept to have to consider.

My childhood was idyllic. Swimming safely in rivers, having access to natural wonders that were preserved and inspiring. We need to move now to ensure future generations have hope for their own children.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Parks in new subdivisions should be funded by developers. Especially when areas like Riverhead are such wealthy areas.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

There are areas within Rodney that seem to get disproportionate focus. We have streets with wealthy residents that seem to get a lot of money spent on infrastructure whereas other areas are neglected. Those same streets seem to focus on minimising access to public areas and making the street less inviting to drive on. Judder bars, double yellow lines, bollards etc all in a tiny area. How does this inequity happen?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Reducing the impact of climate change is one of the most important issues for my generation - to be able to continue to live and live well in this world. Not only that but the state of transport in Auckland is abysmal right now, with public transport options (especially north of the harbor bridge) being by far less convenient than driving.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: We will never have enough budget to do everything important to us, so I see measures of managing this as useful.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Being able to set priorities and having defined criteria for this is important. It also allows accountability.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think this will make things easier to understand and more equitable across the board. I have always struggled to get my head around waste disposal.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Particularly support initiatives around te ao Māori, and conservation efforts/active transport.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We are supposed to reduce waste. I currently re-cycle, use worm farm, compost and save soft plastics. This means I only put out general rubbish every three weeks. Paying for rubbish in rates takes away all incentive to re-cycle and will be much more expensive for those of us who do the right thing and reduce our waste

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Charging for rubbish collection in rates would be a retrograde step and penalise those who recycle and cut down on rubbish and they would subsidise those who simply do not care..

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This plan is long overdue. Its implementation is urgent. Priority must be given to increasing public transport in areas where the increasing cost of petrol will hit the less well-off hardest.

Congestion charging should be part of the plan.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: These plans make no mention of the most important issue society is facing, that of the impending climate disaster. Most of people's emissions are caused by transport. Streets are perpetually congested on the peninsular. We need an "uber" type system of electric shuttle buses to run the length of the peninsular and also to take commuters to transport hubs in Silverdale and Orewa.

As a local board, it is your duty to recognise what the most important issues are and to act accordingly. Auckland Council's Climate Action Targeted Rate does just this and should be actively supported by every local board.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I much prefer the PAYT system. For our household of 4, we pay less than \$100 pa, and naturally because we are paying for every bag we throw out, we are conscientious of reducing waste and using bags wisely. I do not believe a council-run rubbish collection will be cheaper or more efficient, it will simply mean higher rates (again, Aucklanders are already under considerable strain with high living costs and overinflated housing prices which lead to higher rates) for an inferior service than what is currently being provided. In addition, we process the majority of our food scraps in our compost bin and do NOT want to pay higher rates for a service we do not need or want.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I currently use a private operator for rubbish collection and can change by choice if I wish - I don't wish to be told I have no choice in who I use or what I will have to pay. If this proposal goes ahead, there will be no control over costs - council will be able to charge whatever they like. The food scraps proposal is also about charging households for a service they may or may not use but will pay regardless. I strongly disagree with this waste management proposal - we should all have the ability to opt out if we wish - This is about bringing more control and funds to the council.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Recent traffic engineering approaches are creating more time stopping at lights. Removing free left turns on intersections just adds to congestion and climate change. Traffic engineering and climate change need to be aligned not one defeating the other.

What do you think of this proposal? Support

Tell us why: The climate crisis is inevitable and we are past the tipping point; it's our moral obligation to do what we can to improve the state of the planet for current and future generations. NZ has been a leader in many ways; Womens' Rights, our COVID 19 response, and for a country blessed with such beautiful land it makes sense for us to be a leader in our climate action too

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Cycle ways are not a practical proposition in most of Auckland due to the hills. They are used by many who do not pay for the benefit, cyclists are mostly non rate payers or motorists who pay rates and road user charges respectively.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We do not put rubbish out every week, nor do we generate food waste that would require a collection. So inbuilt charges in our rates would penalise us. A PAYT system as at present (yellow bag) is sufficient.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Better and more experienced management of council expenditure is required. An example is the construction of Murrays Bay wharf where the contract start was delayed by seven months. The contractor was paid for this delay, possibly in the order of at least \$400,000. A totally unwarranted delay and expense foisted onto the ratepayers due to council mismanagement.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Stop Three Waters. Stop Regional Parks amalgamation with the Gulf.

What do you think of this proposal? Support

Tell us why: I support the funding and development of the Matakana Coast Trail Trust trail in the Rodney district, because:

- It will get cars off the road – commuters and school trips – less carbon emissions!
- The rest of New Zealand has many trail options – Auckland has virtually none!! can't think of the better way invest in the region, with BCR of > 6x (ie \$860mio of value creation over 10yrs)..LOVE IT.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: If we've learned anything from COVID it's we have to listen to the science

In my view this funding is vital for our city.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I think pay as you go scheme makes people think about how much rubbish they are producing. If costs are in with rates then they may not be motivated to reduce their waste. I don't put my rubbish bin out for collection every week so by the cost being in rates then I would be paying more, I presume it would be calculated on a weekly collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I would rather the money be spent on improving and building new roads for road users as the majority of Aucklanders use private transport and so therefore that should be the main focus of our transport infrastructure and strategy.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The most important thing to me is to improve our road infrastructure through the development of new and expanded roads to reduce time spent in traffic and to make our roads more free flowing.

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Support reluctantly. I would strongly prefer that these initiatives were implemented out of existing rates by re-prioritizing activities that act against our climate targets or by better planning. e.g. use road renewals to improve active modes, lower scope of work for new cycle lanes (many more km delivered even if it less place making is involved). cut back on new road construction

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Reduce capital spend on projects that don't match climate goals. reallocate road space for active modes

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: rates funded removes incentive to minimise amount of waste generated

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Our current use of transport in auckland is unsustainable. Boosting public transport and cyclways is a step toward sustainability.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I dont mind paying higher rates or tax if it means we get a better city.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The bin tag system is annoying. Paying rates really isnt a big deal. The existential nightmair that is pollution and climate change is a big deal.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The priorities are narrow in focus yet the cost is high. I would like to see more detail around the \$13.1m of investment. How are the options evaluated? What is the funding model ie if this is important to the community is the involved community co-funding the investment? Overall this is a lazy budget which has been presented in a pretty document.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Financial accountability. Auckland was growing pre-COVID and once borders are re-opened is likely to grow again. The cost of growth should not be allocated solely to existing ratepayers. This budget appears lazy - more of the same and get ratepayers to pay more. Auckland Council should focus on its core responsibilities and how to deliver them more cost-effectively

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: More needs to be done about climate change in Tāmaki. I believe this is a small price to pay to help the greater good and earth.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change will not wait for us, all that can be done must be done now.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Many services have little to one on them, waste of resources, money and tax payers money.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: Will it create waste buy making everyone choose out three new bin sizes?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Resist going nuts for these bikers! eg... bridge crossing for \$750 million or whatever.... what a joke! often simple solutions suffice.

All that is needed is more ferries running more regularly with good provision for the bikes on board. Will also benefit the general public.

Tree canopy idea good ... as part of it, bring back a more resonable response to protecting existng trees.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: More responsible spending is required. AC continues to waste too much on admin buildings in prime central locations. With technology these days ... offices can be located in regional centres - helps O/H costs and reduces transport costs to staff.

Need better long term responsibility re financing..... must resist heaping more and more debt servicing onto future generations.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Residential waste is only 20% of the problem.... so all this outlay is questionable. Better to simplify & streamline but focus on the main culprits.

Start by upping the waste charges... <\$400 for a big bin just does not cut it. Reduce cost for recycled/reuse waste - make it just a nominal amount but with incentives for good policing. Inflict heavy fines for those who abuse ... i.e. throw waste into recycle containers.

After some reading I see what "funded through its own rate" means BUT why not just say what it is and say it simply ... "cost added to rates bill"

I am of the opinion that the PAYT system encourages people to throw out wisely. Presently we put out our bin about once a month ... for 2 households. It must be a viable business as other independents offer this service. Maybe AC needs to become the dedicated provider and maximise the return.

Ditch the bins in multiunit developments - a disaster. Instead, legislate for dedicated spot for front load bins shared and easily accessed by say +/- 4-6 units. I imagine, in most cases, it will end up cost neutral or even less.

Maybe the food scraps collection best limited to med/high density areas/districts. Like many in our neighbourhood, we have a compost bin ... also a worm farm so wont use this service. I appreciate we may end up helping fund that service. To cover compost bin costs and keep it "fair" and simple, standardise a "nominal" charge on all rates bills

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: please improve efficiency of tax dollars spent. cut unnecessary spending is the first and most important thing to be considered before raising rates

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: this is unfair for people who minimise their own wastes. i don't see how this encourages people to reduce waste at all.

i throw my rubbish out once monthly. this will affect individuals like me who pride them selves on waste reduction.

I feel it is unjust to implement this policy under the guise that it'll reduce waste

if there is one fixed rate then ppl can throw away as much waste as they like without needing to pay

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: That's an awful lot of money. I live rural without footpaths and these measures are very urban focused. Sure, enhance the public transport system, but currently people are avoiding buses like the Covid plague. Normal? What is that? Maybe think about public transport investment when this Covid thing goes away and usage gets back to "normal".

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Just be careful about divesting non-strategic assets. I think it was a bad decision to cash up some of Council-owned buildings to reduce debt. If you've been around council for long enough it is clear that there's a pattern of expansion and contraction. If you're a private property owner then you are probably advised not to sell off your property - it can be a great source of income.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Having clear principles it FANTASTIC.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: We are rural. The current system is hybrid. We have wheelie recycling bins (which were an expensive big plastic thing that meant that our square bins were redundant but we were satisfied with the former system). We have bags which we pay for ... and that has worked for years. And we have all sorts of composting systems which we use on our property. Seriously .. go to France and see how they deal with trash in their communities. Within the village or at the end of streets there are rubbish skips with lids. You can sort your glass, plastics, paper and general rubbish. Personal responsibility. Cheap solution and people buy into it. Actually, it's not a new thing, it's just the way works and has for some time.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Our local board is doing the best they can with the limited funding they have.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Take decision making and budget to a more local level so our community can deal with local issues. We need to have flexibility around budget based on our community needs and not have wide brush solutions.

Or is there anything further you would like to give feedback on?

Please get it right this time. For example, I remember when I first immigrated to New Zealand (Auckland) there were environmentally friendly electric buses downtown. Then we went to noisy, smelly high pollution diesel buses. Now, four generations later we are reverting to electric buses. Enough said!

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: 1.It works well for us - only paying for tags when needed. 2.If you know you have already paid for the bin - it would encourage extra waste to be put in - when that may be otherwise used or recycled. 3. Changing the system AGAIN will cost loads more waste money :(

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Not particularly relevant to me

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: If Ak Council is facing budget pressures, so are household expenses. Is this really the right time to add another tax?

Public transport plans assumes most people want to go to central city. If you work outside central city and need to link to another route, even on a Sunday would take 1 hour 15 minutes and a minimum of 3 buses. On a Monday 4 buses and 10 minutes walking. Thats 2 and a half hours a day just to travel to work and home. Where is the lifestyle in that? Yes, I would love to work closer to home but that hasn't been possible despite many attempts to look for work closer. moving house closer to work - totally unaffordable.

Electric vehicles (ferries, cars) cause their own damage and could be more harmful to the planet in sourcing the other components needed for batteries, their life cycle and disposal.

Cycling. I see very few people using cycle lanes despite the huge amount of money already spent on them. This appeals to a minority and is weather dependant.

Footpaths. My area recently had some footpath replacements. Why? There was nothing wrong with them. This seems a waste of money, no wonder there are budget problems.

Why targeted investment in Manurewa? No explanation given on why.

Trees. Fine in theory but planting needs to be thoughtful and considered for long term issues. eg planting by footpaths will cause longterm damage by treeroots. We have enough Pohutukawa already. Pretty for a small time of the year. Causes problems with leaf and flower fall the rest of the year. And as mentioned, tree roots.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The operational funding gap of \$85m needs to be reassessed and while deferral some capital projects is a good idea, overall operational expenses need to be reassessed. Professional consultants such as Mckinsey (to give an independent view) to assess waste spending in council should be considered. Borrowing to cover operational expenses should not be taken.

Totally and completely disagree with government three waters reform and Ak council should not allow this to happen. Aucklanders have paid for these assets and for these assets to be given away and control taken away is abhorrent.

Don't sell long term assets to try to solve short term problems.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I disagree with the separatism ideology that our obligations to Maori come before actual needs of all Aucklanders.

With this budget maybe we should be looking at reducing spending, not planning on any new big initiatives until income improves.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: This is the type of thing that should be put on hold when in a budget deficit.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I think we have become accustomed to expecting a lot from Council and the more we receive the more and better we expect. In these times some cost cutting and reassessment of priorities is needed but dont think enough cost cutting has been done.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I currently use one bag every 5 or 6 weeks, so new system will be much more expensive. I appreciate the security of a bin that cannot be attacked by seagulls, but this system does not suit those of us who have substantially reduced our waste. Better to buy tags for a bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We have very little waste and cost will be much higher with the rates-funded system. Also, with a rates-funded system, households will throw away a lot more rubbish if they feel they are 'already paying for it so might as well'.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because there should be safe cycle/pedestrian options for all roads, especially in Orewa/Silverdale.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Because Orewa does not have green waste options and bins are better than bags.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I support all but the Silverdale bid.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The council seems to think that the rate payer is a bottomless pit of money, regardless what you call it it is still an additional tax on the public when they are facing huge financial pressure

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The council is in financial stress due to past poor management, over spending on PR & consultants

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Your document uses lots of words not to say anything, an example of your PR spend. Spend on core services without all the PR & PC rubbish

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: Have you done a cost/benefit how much extra does your PAYT cost?

How can you expect sensible answers to your questions without providing the information to make a decision or comment?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Since you don't have costings how can anyone support or not support any of these plans?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The council spends far too much with consultants, PR & PC

The estimates I have read suggest that the rate payer gets about \$0.30 value for every \$1 in rates, even if that's not completely correct and the rate payer gets \$0.50 for every \$1. The council has no respect for the rate payer and spends our money with no regard for the rate payer.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is the biggest challenge we're facing, but as individuals we can't do much, so we need larger institutions like Auckland Council to take action as soon and as much as humanly possible.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

I want climate action now for the future of all children and for flourishing biodiversity. Paying a little now means we'll hopefully pay less in the future, this seems to be a sensible first step.

More bike lanes and cycle paths are needed as cyclist safety must be a priority; I want to know my kids and all cyclists are safe when they cycle and walk.

More frequent bus routes will make it easier for me to get around all of the city and is a good response to the rising cost of fuel, people will be looking for alternative travel options. I would love more practical options to get out of the car e.g. C40's, 15 minute city; <https://youtu.be/McGyONofhi4>

Ferries and buses need to be decarbonised quickly and the above climate action should not be pushed back to 2024.

Flexible working needs to continue, council does not need large corporate buildings going forward, local meeting rooms that can be used for team meetings should be made available, cafes could have rooms to host meetings and boost business selling healthy food! This would reduce traffic congestion. Large city buildings can be converted to affordable housing that would bring life into the city businesses.

Trees need protection again, so many large trees are being felled which is the opposite to what we need. Native trees require special recognition as taonga and we need to become a forest city. Trees are proven to increase hauora, reduce city temperatures, sequester carbon and importantly provide habitat for our struggling native species.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Needs to be equitable. Households that compost and take steps to reduce their landfill bin will end up paying more.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: The Local Board are doing a good job supporting initiatives that increase the wellbeing of the community and biodiversity.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I think Local Boards should have greater responsibilities for decisions over local community services having read the review findings below;

We are proposing to increase local board responsibilities for decisions over local community services.

Our review found that local boards having a greater role in service decisions would enable better representation of local views and priorities and allow stronger alignment of responsibilities with that intended by the legislation.

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't support providing business associations with an economic development fund if they are BIDs. If they require more funding they should either increase their rate charged or reprioritise their funding, they shouldn't be

relying on the local board as this is not sustainable. I would like to see the board commit funding to increase the service for the enforcement of bylaws, particularly enforcement of camping at Browns Bay and Rothesay Bay.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It was commercial & industrial buildings that contributed the most to this climate disaster, it should be them that are paying the money.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I believe there are more people who have low-use rubbish & food scraps, and a lot with their own composting systems, and all those people will be subsidizing large families.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I don't think we need as many sculptures or public art pieces. The funds can go to other proposals.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am very concerned about climate change and the current and future effects it will have, both for my young daughter (aged 2), and for marginalised communities. I believe we need to do all we can to address climate change, and improving public transport and the walking and cycling network is a critical part of this. I own a median urban residential property and the proposed increases in rates are negligible. I frequently make use of the walkways in my area, and infrequently use the bus. Improvements to the public transport offerings in my area would be meaningful to my family. Access to urban forests is also important, both for mitigating against climate change and for building community and helping people to connect with nature. Please be more ambitious with climate decision making and funding - this is our future.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We have to do something and this is better than nothing. You could also save money by forgetting the light rail project, which has limited use and will cause massive disruption

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The sale of what are deemed to be non strategic assets is robbing Aucklanders of open spaces or public areas. Where land is sold for residential development, it creates an increase in pressure on infrastructure, which is already stretched to the limit.

It is also restricting future roading improvements by , for example, selling properties purchased by Rodney Council to improve a very busy road junction (Whangaparaoa Rd/ Brightside Road) by selling the properties. The sale of the land means the road improvement will never be possible.

I have no opinion on the other parts of this proposal

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I support the idea of prioritisation BUT it must have local input from local board members and councillors. They have a better idea what is required in their area than someone in a central office

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I absolutely disagree with this. This will encourage people not to think about their waste management and it will increase Council expenditure on more bins, more vehicles having to make more journeys. It is very unlikely to result in any waste minimisation

It is also totally inappropriate for careful, single/couple occupant properties, who have a composter, spend only on essentials, do not have dozens of mail order or supermarket deliveries, and carefully separate rubbish , recycling whatever they can

We are one of many households who put out a rubbish bag for collection once a month at most. We rarely use the existing recycling service more than once every six weeks, and the only food waste might be a few bones as everything else is composted.

PAYT with FREE recycling facilities would result in considerable reductions in Council expenditure. People would try to reduce waste, would willingly take things to recycling centres and create a considerable reduction in the amount of rubbish to be collected. This saves on the cost to Councils of vehicles, fuel, staff, reduces road congestion and vehicle emissions

I have lived in a society where this works. Every house received a twice yearly handout of 26 free rubbish bags. Anything else they had to pay for, or take to the free recycling centres. Every large supermarket has recycling facilities within their parking area, so people drop off recycling when going shopping too.

We should try to create a responsible society, not one that relies on everything being done for them

Come on Auckland, be imaginative.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The proposed climate action plan doesn't seem to be worth investing an additional \$1.045 billion on. The proposed actions to reduce emissions seem to be costly but the changes made do not have much impact on reducing emissions and targeting climate issues. The improvements will only be useful for a small number of people as the majority of the population will still be using cars and this is the main problem, giving people other options such as improved public transport or walking/cycling will not mean they will choose to use them instead of driving a car. This seems like a wasteful investment of taxpayers' money.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I think this proposal is a good plan to help manage the budget pressures, financial impacts from Covid-19 and growing inflationary rates are all valid and will affect all Aucklanders.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I think service prioritisation is a viable option to help manage the budget pressures. However, I am unsure about what services might be affected due to prioritisation. This proposal would not be very useful if some important services are neglected completely.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: This system seems to be an optimal and beneficial system that is an improvement from the pay-as-you-throw system. It benefits the environment and is cost-effective, so I think this is a worthwhile change to make,

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I think most of these priorities are good causes and are valuable projects to priorities for 2022/2023. However, there are some issues such as the waterways, transport and pollution problems that affect the local board area that could also be prioritised.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Ive been living and working in Auckland for 8 years now.

We are living in a climate emergency and over the past 8 years Auckland has done very little to address the multitude of ongoing climate issues.

We cannot afford to delay this package so it should not be pushed to 2024. Create more māra kai and plant even more native trees

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We should not have to buy more specific items to tag a bin just for it to be collected

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: As climate action is a really main issue in this days, so we need to do something to protect our world. \$1.12 per week is not a big number for us but since everyone is providing \$1.12 per week the total amount of the invest will really help the government and citizens to build a lovely, clean and environmentally New Zealand. So I support this idea.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support and agree with the idea of changing the timing of some capital spending. It's not a good idea of spending too much on wider the company. We should spend this money on making change of climate change, or helping Covid-19 problems.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Priorities operating spending to help manage on-going budget pressure is a good decision but as the cost reduction happen some of the services might stop and some of people might lose jobs. And right now as the inflation rate going really high, it is horrible to lose a job.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: In my opinion, waste is a major factor that pollutes the environment. Now we can manage it in a unified way, which will reduce some unnecessary waste. Also I personally think the cost pays for rubbish collections on their rates bill will not increase much. So it's good to standardizing waste management.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I think plan to invest \$13.1 million to renew and develop assets and \$21.7 million to maintain and operate assets as well as provide local services, programmes and initiatives is a good and I support those decisions. Because renew and develop assets will help us to have a much lovely local board.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Improved climate outcomes can only be a good thing and as a parent of two teens, having a better public transport system is a must. NZ councils (not just Tāmaki Makaurau Auckland) must do as much as they can to improve the lives of the public, especially those who may not have access to well-planned, cheap, efficient and climate conscious cities and transport systems.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Good to get public feedback and educate public on where the money goes.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I don't think the world is taking the threat of climate change seriously enough. I am worried for the world my son will grow up in. Already, we are seeing the effects of it - dramatic weather events are wreaking havoc all over the world and they'll only increase. I think this suggested budget plan is a fantastic start, dealing with fairly easily implemented things that will make a difference. I think it's important that the general population sees visible change being made as well - it will be a constant reminder to continue to work hard to reduce emissions and take care of our planet. I support this wholeheartedly.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: This all sounds great. I look forward to seeing it all come to life!

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live on the North Shore.

We are facing a climate emergency. High energy weather events such as recent extreme rainfalls to the North Island East Coast and South Island West Coast are becoming regular events rather than happening once in a lifetime. We need to reduce CO2 and other greenhouse gases and we need to do it as fast as possible and the best way to do this is by reducing our combustion of fossil fuels. The science behind this is undeniable.

I travel into the city to work by bus and have done so for the past 12 years. The introduction of transport hubs and the dedicated bus lanes was a brilliant first step toward efficient public commuter transport. Reducing the emissions of the buses through electrification - as was done with the CityLink buses - would be the next logical step. This applies as much to the suburban feeder services as it does to the main routes in the dedicated transit lanes.

I would rather pay higher rates if this will lead to greener, cleaner and more efficient public transport. This is a far saner option than spending even more on petrol for private vehicles at ever inflating prices.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The choice of bin size should encourage raised awareness of the amount of refuse generated by householders. We currently use a small bin which is only filled over 2 to 3 weeks which is perfectly adequate for our needs. We should be rewarded for this.

A standardised citywide system should also lead to greater operational efficiencies.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please fix Glenvar Road between East Coast Road and Ian Sage Drive. This has to be one of the worst roads on the North Shore!

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm Bruce Robinson living in Whangaparaoa.

We are living in a climate emergency . Urgent action is needed.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: We can't afford to put off actions. I've I of Essence.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

This is a good first step to tackle climate change

We cannot delay this package so it should not be pushed off to 2024

Paying a little now means we'll hopefully pay less in the future

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: I am a parent and am very concerned about the life my child will have if nothing is done to help slow down climate change. This cant be left to future generations to deal with.

AT the moment it would be very difficult for me to use public transport - not enough buses with sensible routes. Air pollution is a major health hazard in all cities - auckland include and any incentives to discourage the use of private ICE cars should be encouraged.

If everyone does a little then big changes can happen.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to be moving towards this as a country. Also our public transport is not setup enough and incentivized to be a solid alternative to cars. Also tree canopy cover is a must. A lot of new developments don't feel kiwi as they are so bare and exposed with little to no trees being planted.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I want to see Auckland become a world leading city in climate change action.

2. Managing on-going budget pressures

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is one of the foremost issues affecting our country and city and I think that policies need to reflect that appropriately

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support all these priorities. I also think the council should seriously consider sorting out storm water drainage because it is modelled there will be more storms of the magnitude we saw in March will grow in frequency. If we can't swim in the water after a storm, then what is happening to the marine life in there?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Not sure if the council has much say with new subdivisions but there needs to be guidelines for new housing developments on the coast. It is not sustainable and is all about profit but there needs to be a way to safe proof the future of our communities while they are still being build.

I think water tanks should be put into new builds for 3 reasons. 1. It reduces pressure from our water sources if there are droughts. 2. less water going onto the streets with heavy rain. If all water from roofs can get stored when there is heavy rain there will be less pressure on storm water systems. 3. People have more ownership of this precious resource. People may learn to conserve and use sustainably because it reduces the tragedy of the commons scenario.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: A long-term focus on climate and sustainability is important for current and future generations.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support the concept but it does not go far enough. The council could be stronger on prioritising important (both short and long-term) spending on key infrastructure, reducing spending on less valuable issues, for example those that will benefit only a small number of Aucklanders. While realising the government budget is separate to the Auckland council budget, there seems opportunity for the government to cease spending on wasteful activities and contribute to the regional budget instead, for example Penlink budget could be better used on resolving failing water infrastructure systems.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: see answer to Q2

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Terrible idea that:

- a. encourages waste generation by households i.e. having somewhere to throw away lots of 'stuff' a week (or a fortnight) does not incentivise good waste practices by households.
- b. penalises those households that are implementing good waste minimisation practices already.
- c. appears based on the lowest common denominator of current practice rather being than a future-focused solution.

To provide more context, we are a two person household that generates one bag of rubbish every 6 weeks or so. We do this through:

- * recycling whatever we can (both through council and through soft plastics)
- * donating unused items to charity
- * composting
- * trying to avoid frivolous spending on throwaway items

We continue to try to minimise our waste further with a goal of no more than four bags of rubbish a year.

This proposal will have the unfortunate consequence of increasing rubbish going to landfill. This seems totally in contradiction to the proposed focus on climate and sustainability in the budget.

I recommend instead a system that incentivises households to better manage their waste, rather than providing un-needed services to throw things away. Perhaps this could be achieved through a (less costly) rates funded service that provides a small bin to all households with a monthly collection. Individual households could then pay extra if they need to have a more frequent collection.

On a personal note, this proposal would cost our household extra each year, rather than reducing outgoings. This seems the opposite of what the budget is trying to achieve.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Other

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: There does not seem to be enough focus on environmental issues within the 2022/23 plan. There are plenty of areas for dog-owners to take dogs for a walk already and new dedicated dog parks seem a short-term and specific focus that will only benefit a limited number of people. Surely it would be better to spend money on building and enhancing nature reserves that can be used for multiple reasons i.e. walking and cycling. This would not only add more value to a broader range of residents, but also have a long-term benefit for the climate and the environment.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to do more to tackle seriously climate change.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: For the future of our children, grandchildren, our country our planet. URGENT action required

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I live by myself and put out a rubbish bag once every 6/8 weeks. I recycle my food scraps and the recycling bin goes out every second collection. Another thing, is that there's no mention on the cost of supplying wheelie bins to the PAYT areas in the council's budget documents. I already have two redundant wheelie bins so the proposed system will add another bin and at what cost to the council for supplying it? Every house holder should have to right to opt out of the council rubbish collection except for recycling and penalties to those who abuse the recycling bins.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Dear Auckland Council,

Harbour Sport wants to ensure all Aucklanders regardless of age, ethnicity and ability level can participate in play, active recreation and sport in fit-for-purpose facilities and spaces to enable them to live active, healthy lives, with positive health, community and economic benefits.

Appreciating the various challenges of COVID-19, we need to retain the funding committed to sport and recreation through funds like the Sport and Recreation Facility Investment Fund, the Regional Facility Operating Fund and the Regional Sport and Recreation Grants Programme.

What we know:

- **Auckland Council is a major provider of our sports and recreation facilities** – we greatly appreciate this support and investment. Without it, much of what happens in our sector wouldn't be possible.
- **Auckland Council provides critical sector funding** through the Sport and Recreation Facility Investment Fund, the Regional Facility Operating Fund and the Regional Sport and Recreation Grants Programme – let's ensure this continues.
- **Sport and recreation connects people and communities, which is more important than ever given the challenges of COVID-19.** All Aucklanders deserve opportunities to participate.
- **A lack of inclusion and underinvestment in play, active recreation and sport** in Auckland, particularly around our spaces and facilities, will have a **negative effect on Auckland, our communities and the economy.**
- **It's critical that investment meets growth.** It's essential that growth in population both at the urban fringe and in the existing urban area is matched by investment in sufficient new facilities to meet the current demand and the new demand that will be generated.
- **The sport sector has aligned and collaborated in planning and prioritisation.** By ensuring new facilities are optimally designed and located **we are playing our part** in making sure every Auckland Council dollar is invested wisely for maximum return in benefits to the community.

We need to future proof community sport and physical activity facilities for the predicted population growth and demographic changes

Regards,

Harbour Sport

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Ratepayers already have to shoulder too much responsibility for funding for issues that should be addressed and funded by central government

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Council is over inflated in numbers of highly paid staff and consultants and should make serious efforts to reduce numbers, salaries and consultants on behalf of ratepayers. Ratepayers should not be treated as a bottomless source of funding

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Support for this if it will reduce costs and need for further ratepayer funding

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Support only if it reduces costs to ratepayers

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Other

Tell us why:

5. Local Boards

Albert-Eden Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: If possible cut costs and budgets. Ratepayers are not to be treated as bottomless funding pit for council expenditure

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Rodney Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: If possible cut costs and budgets. Ratepayers are not to be treated as bottomless funding pit for council expenditure

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

If possible cut costs and budgets. Where possible reduce staff and high salaries along with highly paid consultants. Ratepayers are not to be treated as bottomless funding pit for council expenditure

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: All 4 items listed are important and should be supported. I particularly support better provision for walking and cycling.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support removal of bin tags as it requires an extra person to remove tags from bins. I believe "opting out" should also not be permitted, as it leads to multiple trucks from competing companies travelling through suburbs which does not make sense from a climate change perspective.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I support planting specimen trees and establishing new tracks in Bushglen reserve. The remaining items are not important to me.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm a retired senior citizen from Campbells Bay. We are living in a critical window of time that could hugely influence the future. I would like us to do all we can to support Auckland being liveable for our children, their children, and their children after them.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I am uneasy about reduction in some services without knowing what they are. I am also uneasy about the sale of assets. Otherwise I support the proposal.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Stopping things that can be provided just as well by others should only be considered if they can be done better AND at less cost to the community.

You should only look to stop doing these if the short and long term outcome is more efficiency AND better service, i.e. not just moving financial advantage to private enterprise.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The collection process should be more efficient. However, I would like to see more precollection (by residents) sorting of recycling. e.g. separate glass recycling from other recycling. Optimise the use of recycled items to minimise waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They all make sense.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: Not specific enough i.e. how are you going to improve transport choice etc. How does increasing tree canopy help with emissions?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cost of food and petrol high at the moment . I don't want a rates increase on top of this.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Necessary

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: If you reduce your waste during the financial year (i.e. reduce your bin size) do you get a refund of the rates charged when using the larger bin? I'm a bit confused as to how the food scraps system works with the recycling and rubbish collection. Do you pay for a smaller bin for other waste and food scrap separate? Why is there no provision for soft plastics? We currently have to collect and take it to a collection point e.g. Countdown, The Warehouse. This is inconvenient. If we can separate food scraps why can't we target the recycling more?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support the planting of trees which cools the city, create mini-habitats for birds and insects, and give a general feel-good for people (it's been proven that lower-socio economic communities benefit through this and actually bring the crime rate down). I also support public transport choices: the only viable option is to make ferries, buses and trains fully electric (as it has been done in Scandinavian countries for a while now): we need to cut emissions, and above all, the exhaust pipes of cars are on the same level as babies and toddlers in strollers! Air quality in Auckland worsened over the years, and it's actually worse in the suburbs than the city centre (due to all the hybrids and electric taxis in the city, the air quality is better in the city centre!). Cities in France, Spain, Oslo and Singapore have introduced small electric transport pods which can service inner suburbs, which can link eventually to the larger bus network - neat, modern transport options will make it more attractive for people to use and leave their cars at home. I like the plan to increase walking and cycling for commuting: separate cycle lanes and safe access are paramount; also if long distance cycle lanes are used for commuting, there cannot be walkers on the same lanes which is far too dangerous for walkers and will only increase aggression from cyclists. There are plenty of examples of segregated walking and cycling in cities in the Netherlands and Denmark. But Auckland lacks the parking of bicycles when they start to arrive in greater numbers (which they will hopefully, when cycle networks improve), so secure bicycle (underground) parking would be great, again, such as in Copenhagen, Amsterdam and Utrecht.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support the actions, but feel more can be done: if we'd electrify our entire bus network in a matter of months (not even new buses needed: there are companies overseas in London, China etc that convert petrol and diesel buses, refuse removal trucks etc to electric. This will be a huge cost saving not to import petrol anymore (and keeping NZ \$ in the country, as people get trained here how to convert to electric transport); and a huge saving in not having to service buses as electric buses don't need servicing. I don't mind an increase in general rates, as long as there is a fair distribution of services throughout the city, and not just for the south of Auckland.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support the various plans: Auckland (and the whole of NZ) cannot wait another year before we seriously tackle our involvement of continuous pollution. We need to act somewhat faster, and stop the ongoing expensive consultations - we know what it's about, so let's get on with it. All government vehicles, police cars, public buses, rubbish removal trucks and delivery trucks need to be electric - this can be done in months, not years (the existing vehicle stock can be converted to electric, as is being done in Europe). There needs to be better education for adults of how to recycle properly, as immigrants coming from countries that don't recycle often don't know and don't care. I support the development of communities: with the overall greening of the city, more market gardens and community vegetable gardens can be established: this brings people together from various cultures, and it was proven in crime-ridden suburbs in cities like New York, Michigan, Boston etc that there was a drop in general offending in the youth when they see adults working together for a common goal (growing food, and making streets pretty through planting). We also need more markets, like in Europe, where people can buy veg cheaper.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Fully support the Rates Funded System: having competing rubbish removal companies' trucks trawling through the suburbs created not only unnecessary congestion, but horrendous pollution. One system that works for the entire Auckland is much more logical, fair and easily adaptable as the needs of the city changes. Also, a standard truck stock can (hopefully soon!) be converted to electric. I also support the various bin sizes: not only do they serve in households' actual needs, but it makes people think more carefully about their rubbish scenario and how to improve recycling etc to have less rubbish going to landfill. Why are there still areas using bags? Seagull, cats and dogs constantly rip those open, creating a huge smelly mess - surely such communities can be brought into the fold of choosing bin sizes too!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I support the planting of trees - not only in selected reserves, but more along roads, in parking areas and town centres (for instance, in Browns Bay, none of the trees that were felled due to storms, apartment building or tree death have been replaced). I do not support the setting aside of any more dog walking areas: for instance in Long Bay the reserve and forest are off-limits to dogs - one of only 2 areas (the other being Shakespeare Park) in the whole of Auckland where people can walk knowing there aren't any dogs. Many of us choose to walk in no-dogs areas because we're afraid of dogs, or have been attacked by dogs. Please respect our right to have this precious areas, which are also bird habitat areas. There are surely enough beaches (110) in Auckland where dogs are allowed.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I like decisions to be taken quicker, without the long consultations which seem to take years. Taking action immediately for climate change is paramount for me.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Focus more options to north Auckland. Especially Rodney / hibiscus coast area - these are the people who are forced to drive because there are no decent or viable options. Too expensive, time consuming, not direct, infrequent - especially during peak hours and peak hours stop too early.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Do not sell off public land. We need greenspace in suburbia otherwise it's just a depressing concrete jungle and that is not the NZ way

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Get rid of the virtue signalling Maori bulls**t which eats up significant resource either by religious prayers - karakia's, adding an extra 10 pages to a document about Maori "values" or writing in the language that less than 0.5% of the population (max) can read. Have a survey on this and whether the people think it adds value or not, because I can guarantee that majority of rate payers will disagree with this waste money and rather it go towards something that actually benefits the people and the majority.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Higher users should have to be financially responsible for their waste and conscious or waste free users should be recognised and rewarded for their minimal impact. The only way to reduce waste is not to normalise it, but to expose it and make people have to be fully aware and conscious if their decision making and the consequences.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Support everything, but there needs to be less focus on Maori. We are a MULTicultural country, not Bicultural

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I genuinely hate what the Munga authority are doing. They do not care for locals thoughts concerns or oppositions, do whatever they want, and are decaying iconic landmarks. Mt Victoria Devonport has this horrible dirt track up the mountain that neve used to be there and they claim that they are "protecting the mountain" or whatever. But the infrastructure was there. Everyone was happy. Now we have some hory mountain with a dirt trail, derelict infrastructure, and rebranded Maori name that no one asked for, and is not but if documented history. Very selfish and cherry picking history to reinvent the wheel. Again, the munga authority need to have their powers stripped back, they are not acting in the vested interests of the majority/local community. It's also, by definition, acting with racist intents. Prioritising one race (Maori) over all else.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Apart from the increased cycling provision which is a total waste of money, the other proposed changes especially improved bus services would be well used assisting to obtain the target

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I disagree with the proposed asset stripping disguised as non-strategic assets.

Putting projects that only benefit a small number of people should be put on ice until excess money is available for this type of wasteful spending.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: There is already an issue with household putting non-recyclable waste in the recycling bin, adding cost, even the perceived cost of the tag will increase this issue as households will end up putting more waste in the recycling bin which they don't need to buy a tag for.

Plus you'll be adding the additional cost in time and labour to check and remove tags before collecting the bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

What do you think of this proposal? Support

Tell us why: More needs to be done in Tāmaki Makaurau Auckland on climate action. I would like more options to get out of my car and more frequent bus routes will make it easier for me to get around all of the city. Decarbonising the ferry fleet is also a really important step toward reaching climate goals. Furthermore, more buses need to be decarbonised and quickly. However, I think the proposal will still go a long way to reduce carbon emissions and help tackling climate change.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: This question tells me nothing about what someone thinks the priorities are

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The proposed solutions to reduce emissions from transport frankly are not going to achieve anything like the 60 % reduction needed by 2030. People need to be incentivised to travel by bus. We live 10 metres from our nearest stop yet still generally choose to travel by car. If the council wants to change a climate related rate I'd be happy to support if the actions were remotely ambitious or actually likely to achieve the desired outcome. These proposals satisfy neither condition

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Whilst I don't disagree with any of these proposals, the pay of top execs in my opinion remains excessive. This needs to be part any budgeting solution. Based on 2020/21 revenues the targeted rate will achieve c.70mn increased revenue, which comes close to meeting the deficit. Staff pay could significantly help close this gap

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Seems like reasonable criteria for identifying ways to save money as well as crystallise key priorities.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: To suggest pay through rates is the most equitable system where households are in effect charged for a weekly collection when they don't need it is nonsense.

Different bin sizes does little to mitigate this. A pay via rates system provides no incentive for households to reduce how much they throw, and if anything actively encourages people to throw away more (especially long term) as people will perceive it to be a free collection. This proposal for rubbish collection is diametrically opposed to the climate goals it purports to support. This proposal is a fundamentally lazy one. Why not simply move to a bag system everywhere? Or, as commercial green collection services do, move to a booking system when you need a collection?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Issues with fixed annual waste fees included in rates (for normal residential properties)

1. Inconvenience and potentially high admin cost - Presumably each property owner has to decide the size of the rubbish bin they need before the beginning of a rating year. Not sure if one would be allowed to change the bin to a different size during the year due changes in their circumstances, and if yes how to adjust the rates accordingly and how many times such changes would be allowed.
2. Lack of flexibility. The cost comparison in the report was based on 52 weeks of rubbish collection. However under PAYT system, many users may not need to get rubbish collected weekly. This would become more common once kitchen waste collection is handled separately.
3. Lack of fairness. For properties which may not be occupied all the time, the owners would still need to pay for weekly rubbish collection even when no rubbish to be generated for collection. For example when the property is vacant for several weeks or even months when the whole family take a long holiday somewhere else or on a business trip or for any other reason.
4. Negative impact on rental properties. Landlords would have to pay for rubbish collection fees when the cost is included in rates. In reality this cost would be more or less transferred to tenants in the end, and the size of the bins provided by the landlords could cause disputes if not regulated in some way. Further more the dynamic nature of the rental property in terms number of tenants and vacant periods would not fit well into such fixed annual fee scheme.
5. The monopoly nature. For property owners, a rates based waste management system would mean the they no longer have the freedom to choose waster service providers from private sectors. Everyone knows that such monopoly by the council or anybody else would lead to less efficiency, higher cost, and lower service quality to consumers.
6. In terms of the presumed benefit of reducing general waste generated from households, I can't see how proposed rates based waste management by the council could achieve it. In the contrary I believe it would very likely generate much more waste than PAYT.

Please take more time to evaluate the options, don't rush to make an immature decision than later have to change it again!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: How is that being implemented-details matter?

Planting trees is always good however it does not align with infill housing that Council is approving and trees close to homes is not safe.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I am hoping the rates will not increase more than 3.5% as my property's value has more than doubled in the last 4 years and my home is worth nothing, it is a joke!

The current system not sustainable.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Reduce/ stop spraying weeds with Glyphosate in suburbs. Get the community more involved in taking care of their immediate surrounding.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

Feedback on Auckland Council Annual Budget 2022/2023

Waste Service Standardisation:

Waste Service Standardisation:

Reading the North Shore Times about Councils plan to eliminate the present PAYT model and introduce a standard "one size fits all" model, left me totally speechless and wondering how that would support creating less waste and for consumers to buy less packaged goods, reduce removal of waste??

This will affect households i.e., people living alone, elderly and all the people that are already very environmentally conscious, have reduced they waste enormously who may put their bin out monthly or even bi-monthly, hugely. Our household consists at present of two adults, and we buy roughly twice a year 4 tags for our 120l bin and that's it. That adds up to be \$34 a year, and our recycle bin goes out with our rubbish every 6/7 weeks. How can the general operating cost go down by \$70 for our household, it increases by over \$341 for us using our present 120l bin (if the annual charge will be set at \$375) and we and all the people that are waste mindful will be paying for all the other consumers that are ignorant to our environment!! Even if we change to a smaller 80l bin we will still be paying \$90 more, as council assumes everyone puts their bin out every week. And we would need a new bin which has to be made using resources and our old one has to be recycled which uses resources as well.

This proposal is wrong on so many levels and am thinking it would be a huge step backwards if one looks at it in the big picture wanting to reduce waste. Where is the incentive for consumers to buy groceries with less packaging, to compost and stimulate their waste awareness level??

What I can see happening with the new proposal is, most consumers carrying on as they have, possibly even creating more rubbish as they may care less due to the hefty charge council is planning to introduce, just because they now have to pay the generic high fee with their rates anyway. It may very well create thinking like, "might as well fill the rubbish bin and but it out every week, since I have to pay for it"! That is a lot of starting and stopping for the rubbish truck, time is money, and it certainly does not align with a more environmentally focused Council.

(I come from a country where we recycled in the 1980's and arrived in NZ with my own calico shopping bags which, after 34 years, are still in use today. I remember when I first got them out in the supermarket in 1988 to pack away my groceries. The shop assistant, we used to have to pack our groceries, would look at me with wide eyes and very reluctantly use them- as I did not want to use plastic bags that were handed out like there was no tomorrow.)

Going forward, a suggestion, why does Council not introduce a fortnightly rubbish collection? It may be the incentive to stimulate peoples thinking in how and where they may be able to reduce packaging. It would certainly be more in alignment with looking out for our environment and an incentive for consumers to be mindful about their buying habit?

Or why does Government not encourage companies, Importers, etc that package and sell food to Supermarkets use less packaging as consumers are not the overall evil. It is government regulations not in alignment with evolved Countries that are applying tools that work and not burdening consumers with all the cost!!

Who knows it might be worth while to look at that!? I certainly can not understand how a small household can fill a 120l bin in one week.

Something needs to be done but from my experience this proposal is not it!!

Thank you!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think it is necessary for immediate action against climate change. I love Auckland, and making the city walkable would be so cool!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's vital that we act to make a greener city, a critically important investment in the future for our children

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am from Red Beach. I frequently walk and cycle around our city (I went car free in February 2021). I am excited to see \$228 million towards building more cycleways and walkways. Urban ngahere and food gardens aren't only great in terms of climate action but also help build community and connect with nature. Climate justice is paramount. I strongly support the rate focusing on under-served areas. It will provide quick, low cost, transformational options for reducing emissions. Little to lose compared to huge potential gain!

I LOVE low-emission buses!!! This would be amazing for my car free lifestyle!

More, frequent, bus routes will make it easier for me to navigate the city. Currently it's really hard to get anywhere from Red Beach. A 35mn commute by car to the city sometimes takes me 2 hours on the bus.

Additionally, I want to cycle more places but it's really dangerous for me to bike many places that are actually only 5-10 minutes away by car.

We are living in a critical window of time that could hugely influence the future. Let's do all we can to support Auckland being liveable for our children, their children, and their children after them.

2. Managing on-going budget pressures

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm a University of Auckland student who was born & raised in Tāmaki Makaurau Auckland. Like most people, I find our present climate emergency extremely concerning and, quite frankly, terrifying. These concerns are impacting the daily choices I make, particularly as someone in their early 20's who has the rest of my life ahead of me. So, I really think it's encouraging that the Council is creating a dedicated fund for climate action.

Urban ngahere and food gardens are great with regard to climate action and also building and connecting communities. Since the COVID-19 pandemic has forced most of us to become relatively isolated, this can only be a positive thing.

As a Uni student, I frequently walk & take public transport around the city - but Auckland's current system makes it hard for me to do so. I WANT to walk and bus more. Moreover, I want to cycle around the city, but currently am unable to due to a lack of infrastructure. The CATR would help me and the hundreds of thousands of other Auckland residents - including students, commuters, our disabled community, our older residents, and more - do this.

Local and national government needs to start taking action on the climate crisis. With 43.4% of Auckland's regional emissions stemming from transport, the onus is on the Council to make public & active transport equitable and accessible. Ultimately, you are the ones with the power to make great, lasting change. To not take the drastic action that is so desperately needed is to deny the significance of this crisis, and is nothing short of negligent. I recognise the implementation of a CATR is only the beginning, but I think it's a fantastic start and should absolutely be introduced.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I prefer the rates-funded system due to the fact that it's more equitable, economical, and environmentally-friendly (particularly due to no more plastic bags). Also, I like the proposal to expand the food scraps collection system - food waste is a significant issue, and methane which is produced due to food waste going to landfill contributes to the greenhouse effect/global warming.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

What do you think of this proposal? Support

Tell us why: I believe this is a step in the right direction in terms of climate change and transportation. There needs to be more options to get around other than using a car which uses a lot of fuel and takes up space. There also needs to be more bus routes or a change as far too much of the Upper North Shore is dependent on only 1 bus. It would also be nice to be able to use a bicycle and not have to fight for space on the road with drivers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I cannot stress how completely I support this proposal! We are in a climate emergency - New Zealand is one of the countries to have declared it as such, and yet there has been an almost complete void of leadership on this matter as far as I can see. The measures that governments, including Auckland Council, have taken in response to the COVID-19 pandemic are what is done in an emergency; what has been done in regards to climate change is mostly just kicking the can down the road. We're at a critical moment. I want my child to live in a habitable world. I want him to walk through lush and green nature reserves, and point out caterpillars and ferns to his own children and grandchildren. I want him to be able to go to supermarkets and local markets and enjoy a diverse range of fruits and vegetables, not see empty shelves and preserved foods only.

I have become a property owner in the past year, and the interest rates increases, as well as inflation, have put a great deal of pressure on my household budget. However, I am more than happy to pay the climate action targeted rate. It is a privilege to be a homeowner and the population in NZ needs to start treating it as such. Paying rates is a part of that privilege, and it's a responsibility. Please do not shy away from a dedicated climate action fund because of a vocal, entitled minority.

This targeted rate is a first step but it is an important first step. In the coming years, I want to see Auckland Council be more ambitious and take bold and decisive action. I want it to endorse the Fossil Fuel Non-Proliferation Treaty (as Paris has just done). I want it to push Auckland Transport to expand cycleways and ensure integration with public transport. I

want climate action that takes an inclusive and equitable approach to reducing emissions, investing in public transport, and planting trees.

Once the rate is hopefully in place, please use the funds wisely but quickly. The use of the fund needs to be front-loaded to ensure that the most gains can be seen before 2030. Our friends in Australia are still mulling what they might or might not do by 2050, when action is needed in the next decade. Please be a leader. Be a leader for Aotearoa, for Australasia, and for the world. As the parent of a young child, I cannot allow myself to consider the possibility that it's too late. Anything that can be saved, I want to save. We've delayed action for far too long. Let's not let the situation deteriorate any further. Let's make sure that in 20 years, we can say we did everything we could. I am constantly thinking about this for myself on a personal level, and I hope the council will think about it at the local government level, all while actively honouring Te Tiriti, tino rangatiratanga, and mātauranga Māori.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Increase rates on unused or underused properties. If people want to keep a home empty year-round that could be housing individuals or a family so that they can sporadically enjoy a weekend at the beach, that is fine, but their rates should reflect the cost of the social impact of that house being unavailable on the rental and property market. This would increase revenue as well as helping to deal with the housing crisis in Aotearoa.

I support the stated levers.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: It is very concerning to me that climate action would be relegated to a category of "We will do these to the extent that we can afford to". I would hope that Auckland Council can prioritise action on climate (beyond the climate action targeted rate) because it's the critical thing to do to ensure today's children have a liveable environment and ecosystem, but if it's not possible to prioritise it for this reason, then at least prioritise it because the costs will only mount.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support all of the stated priorities. I would also like to see Hibiscus and Bays examine possibilities for alternative modes of transport. I am not an avid cyclist but I have happily replaced my vehicle with a bicycle when I have lived in other cities for commuting and running nearby errands. However, I will not cycle for any distance on the Hibiscus Coast because of the lack of cycleways, the blind spots, and the lack of measures to reduce the speeds at which people drive around Whangaparaoa. I do realise there's not a lot of appetite for bike lanes and wider footpaths around the Hibiscus Coast, but it is critical to reduce emissions and give people more options (particularly with the cost of petrol now). It would reduce congestion and benefit even those who want to keep using their private vehicle. We need bold action to ensure children and adults can bike safely around this beautiful area, and while I realise a lot of this may not be in the precise purview of the local board, I'd like to see them take some leadership and ownership.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support this because it will help us to become a greener city. However, I would not want to see the internal combustion car taxed as the infrastructure for EV transportation is poor/lacking at the moment. Moreover, I think that we should focus on being carbon neutral not carbon zero.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I think that there are other routes to achieve this solution such as rotating city employees' working days in order to cut down travel emissions and the need to create roadwork-- Runoff.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I have some concern over efficiency affecting sectors such as healthcare and education which traditionally get cut. These sectors have already been under immense strain due to COVID. I also hold concern for the long-term lease on non-strategic assets need to be more widely debated and understood -- E.g. ThreeWaters.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: some of the guidelines around service prioritisation are vague and unless it's clear what they are being set against it's very hard to say if it is the right approach.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Allows people who use more to pay more, and those committed to waste reduction in their households benefit from these actions as an incentive.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: they positively affect our community.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Central government needs to do less to build infrastructure to get people into cities and more to keep people in local communities for work, to ensure their spending goes on local businesses and incentivise buy local vs people shopping off-shore.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Bins collected weekly funded from rates does nothing to encourage waste reduction. At present we produce less than a bread bag of landfill rubbish a week, not a wheelie bin! People who realise they are paying for a wheelie bin every week would be inclined to fill it up - I've seen this in other cities. We must do everything we can to reduce the waste we send to landfill.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: This change will definitely improve our environment, but it can be quite of a change for families. There are both pro and con sides to this change, this is why I choose other.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I believe this plan will help New Zealand keep on budget.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I believe this will help New Zealand prioritise operating spending.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I believe the PAYT system would be easier for households, but the preferred rates-funded system is better for the environment. This is why I choose I don't know.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I believe this will impact the future generations and help develop a starting point for other organisations or a continuation from the nz government to take future action.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support this proposal because this will participate in helping so many families across the country in so many different ways.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support, hopefully, all the changes to the services will be effective and impact the way the country works. I support as I believe in beginning to bring about change even if its not immediately rewarded.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: It will provide more resources and equipment for young kids and I think that is a very important part of what we should aim to do.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

No more feedback, I believe these plans will definitely set New Zealand on the best path.

What do you think of this proposal? Do not support

Tell us why: Because no one is going to give up the comfort of their car to wait for a bus that is usually late (especially not in the cold months) and doesn't take you right where you need to go so, like the reconstruction of a perfectly fine Browns Bay Beach playground, it is a complete waste of money

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Dog parks - absolutely, there's way too much Dog crap on the beaches and reserves around the bays.
Planting large specimen trees - yes, full support on this

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Why has money been put into ripping down to rebuild Browns Bay Beach playground when it was absolutely fine to begin with? What an absolute waste of money. On Woodlands crescent in Browns Bay there is constant running water where something has burst, it ran for weeks then the council came and sealed it now it is running two meters further down. Why are we not fixing things like this?? The way money is allocated in Auckland is so absolutely ridiculous you would think children were doing it.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: For those of us that are already able to keep our refuse to a waste this cost is more of a 'un-incentive' - not everybody needs to dispose of a full bin every week. There should be some way of opting out of the usual curbside collection costs if this is the way things go.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: The implementation of greater number of routes for buses, could be problematic as larger quantities of buses does not necessarily encourage citizens to take public transport. They will most likely still resort to a mode of personal transport whether it be cars or motorbikes. Proving the reliability of public transport is probably the best convincer for people to hop onto public transport. Currently it takes 15-20 minutes to drive to a central bus station(constellation)

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: single household and dont fill a council bin for at least 4 months

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are living in a climate emergency and this is a good first step to tackle climate change. Paying a little now means we'll hopefully pay less in the future.

Reducing transport emissions will go a long way, more frequent bus routes will make it easier for me to get around all of the city. Decarbonising the ferry fleet is a really important step toward reaching climate goals

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I'm two minds. I think there are pros and cons for both. We are a household that are very conscious of our rubbish so don't fill a bin every week. We recycle and compost so have little waste so would be paying for collection when we don't actually use it. But then I see the benefits of having everyone on the one system. Easier to manage.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Demonstrate a public transport system that disrupts the heavy private car use in Auckland

Ensure it is fair and more equitable for all Auckland

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: But don't support the sale or long term lease with out being able to find what assets you are referring to in all the documents explaining the consolation process

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Yes prioritise but make sure it is consultation with the affected people.

Demonstrate good communication skills and understand their perspective.

Keep the process transparent

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: To reduce illegal dumping and plastic bag rubbish collection. It is such an outdated system.

Implement scheme

Deposit refund on bottle and cans - involve the people, to produce higher grade recycling materials.

More education and monitoring of recycling so it is done with care and pride.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Yes support the environmental initiatives.

Do not support dedicated dog parks

or - more playground on flood plain in this area which are inaccessible to use all year round.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I found the survey very hard to complete.

This is the 3rd time I have done it - lets hope it goes this time. - So sorry a bit ragged and frustrated at this stage.

1st time completed it but it wouldn't submit

2nd time a council help screen obscured the survey then all my answer were delete.

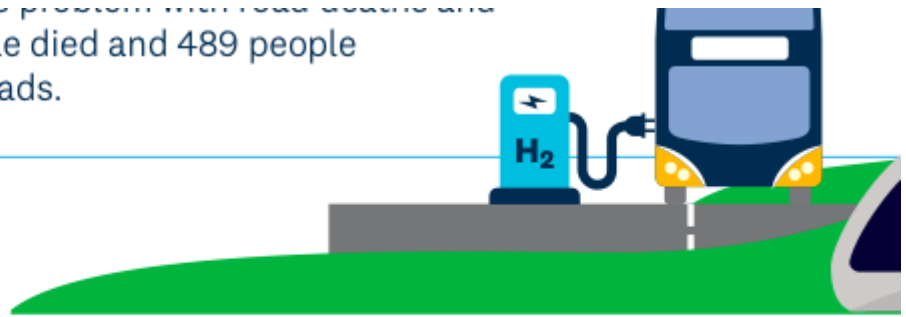

The constulation document did look good but didn't fit the screen.

I am an experience computer user - so I don't think the format of this survey would be accessible to many people who wanted to contribute.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I would rather pay a little now than pay a lot later for the consequences of climate inaction. We are living in a critical window of time that will hugely influence the future, perhaps even determine if there is a future for our children and grandchildren. We must act now.

Urban ngahere and food gardens aren't only great in terms of climate action but also help build community and connect with nature. they will also be essential in creating food security and resilience in face of climate related supply issues. Think of Victory gardens in WWII where 40% of food was grown by general population. Urban agriculture is incredibly efficient and abundant. We could be composting our food scraps, returning nutrients to the soil, growing food, all local and without huge costs and C emissions of transport, synthetic fertilizers etc. PLUS its so beneficial for peoples mental health coming out of lockdown. Get active, grow food. Its a no brainer!!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Auckland can go further by looking at what leading cities in Europe have done to make sure there is great support for e-bikes, including safe bike lanes, priority crossing, useful bike routes, secure storage with charging facilities, and integration with public transport.

Use of the fund needs to be front-loaded so that the most gains can be seen before 2030.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I want local community composting of food scraps to be given funding also. These sites are really efficient but must have paid managers. So could create local jobs and solutions to organic waste. It is imperative that the anaerobic digester and/or landfill is not the only option for urban households. I am concerned that all our rate money will be locked into these big contracts and community composting will be left to run on volunteers and community good will. It must be properly supported as it is a vital part of regeneration. Local community composting returns nutrients to land to build soil fertility and return Carbon to the soil. see above answer Q1.

I want to be able to opt out of my food scraps kerbside collection and be able to send my food scraps to local community composting, and for these hubs to get my portion of rates.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Priority should be on climate change resilience.

we need to focus on improving stream care water quality

we need focus on getting people to collect rainwater, more swales to prevent water run off and slow water in storm events.

putting in more local power solutions, solar grid etc. Without these things we are very vulnerable to price rises, disruptions.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Preparing for climate challenges should be top priority.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change will impact everyone in Auckland. Not enough action is presently being taken to address the causes or results. A targeted rate provides funding to change that. Improvements to walking and cycling infrastructure as well as public transport are, in my opinion, the best tool for achieving climate action. To really encourage people to use these options, the car dependent suburbs of Auckland need to evolve in to walkable and bikeable neighbourhoods with mixed use residential/commercial areas and higher density housing to make the establishment of the businesses required to support walkable communities a viable proposition for operators.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Placing climate action in the 'should do' basket is at odds with the targeted rate proposal. The use of a target rate should push this into the 'must do' basket

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: A rates funded system does not equitably distribute cost to those who generate excessive amounts of waste. It may inadvertently encourage the population to be less considered in purchasing habits with regards to waste generation.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: More focus is required on public transport and walking and cycling infrastructure.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This targeted rate becomes another rate on top of our current rates. This then becomes subject to inflation and upwards movement. We already have a petrol targeted rate for infrastructure a separate water rate and now a proposed annual refuse rate. It in my mind is just another way of hitting the rate payers. These rates never seem to be stopped later but continue infinitum. Council rates were initially in the main established to provide

- a) Management and planning of the town or city
- b) Management and construction of roads, refuse, water and its infrastructure,
- c) Governance of house and commercial building, rules and regulations
- d) Provision and administration of community parks and sport amenities.

Climate change is primarily about reducing emissions which is not a council issue per se. but rather a government issue. I accept that council can play a part in assisting the end goals. In your proposals you aim to focus on buses ferries and walking /cycling paths by way of spending in the name of "Climate emergency". I note the car has become the evil player and yet we all know many people if not most require this as their primary form of transport for a number of reasons including, inability to take public transport due to age and health (32% of the population is over 65 or under 14), convenience of movement outside of normal bus routes, lack of practicality of current routes when travelling over distances etc.

To make the car the bad player is deny what we all know, that the car is the preferred mode of transport by a large majority of rate payers. You already acknowledge that currently many people do not wish to travel on buses due to the Pandemic. This will not change for some time. We need to embrace the car (not shun it) by integrating it in a practical but smart way into the city transport system. Electric vehicles are fast becoming widely available with many options however it is the cost of the car and the infrastructure needed to support it which is holding widespread uptake back.

What we want is the government to take a lead in accelerating this change to the use electric vehicles? For example could they not look to negotiate a deal with say Teslar for supply of a reasonably priced vehicle for families and individuals? This combined with a congestion tax (city centre) for example could help in this acceleration. The council also need to consider looking more at the way people interact across the city in a social and work sense and look to facilitate reduced need for travel. This may be more effective and less costly than increasing the bus routes and frequency, increasing ferries and providing new and better walking routes.

In other words I think we should be looking at the whole ecosystem of the city and how people interact before we provide a solution to a problem that may not be the best answer in reducing emissions. For example sporting fixtures are a major focus for the population at the weekend whether kids sport or major events. Should we be designing large sporting hubs on key routes in various parts of the city to reduce the number of venues and thus reduce travel by individuals to numerous smaller more distant venues?

Any plan to reduce emissions must be led by major government initiatives around car transport. My feeling is that this plan is not going to achieve the emission reductions needed. It will be merely window dressing. Increased Infrastructure renewal needed to cope with the now regular major flooding events around Auckland will be the area council need to prioritise in terms of resource spend in the coming years.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: While I support the proposed intent of managing budget pressures it should not be at the expense of loss of control of key assets e.g. Watercare/ Three waters proposal. There is no such thing as co-governance as it is not part of any treaty settlement agreement. The council should not cash up assets unless the local community affected has had the opportunity to approve of the sale. If they do not approve then the process should be stopped all together and alternatives looked at.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: However the operational costs in particular individual council employees being paid in excess of \$150,000 should be reviewed and where possible salaries reduced or employment of alternative less costly individuals. Currently there has been a major explosion in the wage costs of the council which is unacceptable. Comparisons with Brisbane City in Australia have been made showing just how ridiculous the wage costs blowout has become.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: While I do support rates funded system as it seems practical and less costly I note there is no incentive to reduce costs for reduced refuse amounts. For example if you do not utilize the system for say 10 weeks of the 52 weeks due to good waste management there is no ability for rebate. Surely this could be done electronically by collectors and help to reduce waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Renewing and building new infrastructure to cope with climate change should be the focus of the local board.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

There should be online voting by local rate payers on the priorities of the local area. This should be conducted by local boards after they have allowed feedback and input to a list of proposed areas of focus prior to establishing the future priorities final list. Local boards should also ensure the ability of local ratepayers to be able to provide input and to put forward potential priorities in the lead up to providing a final list of potential priorities to be voted on.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The cost should be met within the current budget and should not be a factor in future budgets until the needs of struggling Aucklanders are met re housing, health, security etc

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: The Council needs to work within its current budget and without any additional increases. It needs to demonstrate and exercise efficiency in all it does.

The Council is totally inefficient. Projects are poorly managed (whether carried out by a Council department or contractor) and staff are inefficient as witnessed on East Coast Road, East Coast Bays; Seaview Road, Milford; Hobsonville Road, Hobsonville; Clonbern Road, Remuera; Quay Street, Auckland City; Albert Street, City; Great South Road etc

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The Council doesn't appear to have established clear objectives based on the needs of the people of Auckland City and instead appears to react to the political whims of the day.

Staffing is too high, productivity is low and outcomes are unacceptable.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: This appears to be a loaded question.

A rates-funded system may provide additional income for the council but is not in the best interests of all ratepayers.

User pays is the fairest option and most climate friendly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: I support the renewal of sports fields and connected facilities only along with the establishment of walking tracks in Bushglen Reserve.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The Council's prime goal is to meet the prime needs (safety, housing, etc) of its citizens efficiently and without ideological and political interference. It is currently struggling to achieve this.

It is important that freedom of speech is enabled by the Council in all it does and not in the superficial way currently exercised. Council facilities should be available to all to have their say.

Money is not the key to Auckland's future success, but a healthy community where debate is applauded not curbed.

The Council is inefficient, extravagant and poorly managed, giving only lip service to its constituents.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Hardly anyone cycles and uses transport because New Zealand is not a very populated country and has a really low population density. As well as this, I personally think that climate change is inevitable. I think it is unnecessary to increase pedestrian crossing because it would only create more congestion. As well as this, I don't want my tax to go to things that I don't want.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: there is less detail on what sectors and services the council plans to remove, or improve.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I think the council and the government needs to open up what they have on their agenda because honestly we cannot comment on whether they should reduce, stop, or change their spendings.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I personally think it is not eco-friendly, because in reality, more people use plastic bags, because no one puts rubbish directly into the bins. Hence, tags are not eco-friendly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: There are no provisions on the improvement of academics and anything that can help our children improve their ability and opportunity to learn. Aslo, needs to concentrate and appreciate Asian communities more.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Build more Science Museums or science-related events that children and people can easily access to improve our STEM performance and improve our quality of labour, which can improve our economy in the long term.

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: the development of public transport does not seem a valid action to counteract the increase in number of use of private transport. the reduction of gas waste will very likely to be very small. more consideration to counteract this problem is needed.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: tax rates have been one of the long-term problem of NZ as there has been lots of residents complain of this.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: However the consideration of order of priorities needs careful attention. and needs more time to be sorted out to fit majority's lifestyle and their needs.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: the payment of tax through the rubbish waste seems reasonable. there could be possible other ways to deal with this problem.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: feels as if this can increase the quality of life in the areas.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

the use of annual budget towards the medical ___ seems very reasonable. the budget can be spent on the increasing the number of medical centres in the urban area, also more technical tools for the medical industry, medical insurance. please take careful consideration.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We live at Red Beach and have a large vegetable garden and 3 compost bins. For more than 50 years we have had vegetable gardens and compost bins for food scraps, lawn cuttings, prunings etc, very rarely have we put food scraps in the general waste system and have 'recycled' same into compost. You have in fact encouraged composting by supporting 'The Compost Collective'.

We therefore do not want a food scraps bin nor do we wish to pay for something we will not use. As pointed out in a letter to the NZ Herald editor on 30 July 2019 the proposed annual fee in our case and others amounts to an unwanted 'tax' rather than a user pays charge.

We believe we have done 'the right thing' for 50+ years and now you want to 'penalise' us - the food scrap bin should be optional. We do not accept that it will compliment home composting systems.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our household produces less waste. We only put out an 80l bin every 4 weeks. A rated charge discourages us from reducing waste. Achieving zero waste should be the objective. A charge per collection encourages reduction in waste. The Rated charge will encourage many households to increase our waste not reduce it.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: While I support most of these priorities I would like to see more focus in Hibiscus Coast & Bays on developing cycling infrastructure to connect the bays and the coast - currently there is some infrastructure but it's not

connected i.e. cycleways just stop at some point along major roads. With all the growth out here it can take ages to get anywhere i.e. the bus station - having more safe cycling infrastructure along major roads would reduce some traffic pressure and enable more people to engage in active transport modes which are good for health and wellbeing and safe cycle routes should be available across the city - not just in the inner city suburbs.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: I am a 54-year old 'average' woman who lives and works in Auckland. I love it here. I commend Auckland Council in creating a dedicated fund towards a zero carbon future. I would love Auckland to grow (up instead of out) into a pleasant and resilient city of the future. A city that doesn't rely on motorised forms of transport. A city that provides walkable neighbourhoods. A city that encourages active modes of transport, with e-bikes, cycle lanes, electric buses and ferries. A city that is heat and flood resistant, with increased urban tree cover, green areas, and natural water management (rain gardens, swales). I think Auckland Council should be bold and ambitious, and dare-I-say-it world leading in effecting these changes.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support the policy in that it seeks to address private transportation and encourage public transport and walking to cut down on petrol emissions. I, however, think that centralised urban living in the city needs to be encouraged in order to truly reduce our individual carbon footprints. People need to be incentivised by policies that encourage, promote and enable urban living that reduces their carbon output, not only by reducing their commute times or by enabling walking, but by having people living in smaller homes that require less electricity to run. Perhaps more needs to be done to deregulate and encourage building apartments in the city to bring down housing costs and have more people living in the city. Thank you for reading.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I believe these are effective ways in reducing the strain that inflation will put on the council.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think that overall this is not a bad idea. But maybe you should include other things that could encourage Aucklanders to be more supportive of this idea. This could include maybe a reward every time an Aucklander takes a more green option of travel for example bus, cycling or walking. The reward could be a token, and when you get enough tokens you could get a coupon for a restaurant, something like that. This might encourage Aucklanders to be more supportive of this idea or be more encouraged to participate.

I think that it is important to control our carbon emissions. Since global warming has become a big issue, I believe that following this problem could help reduce a small percentage of the world's carbon emissions. Since not many countries are taking this approach to make their country net-zero in carbon emissions, I believe that we can set an example for other countries just like we did with the women's suffrage, encouraging them to take small steps and do the same.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I think that although we are facing budget restrictions, there are other ways to conquer this problem. Instead of making Aucklanders pay more rates, maybe we should hold an annual fundraiser of some sort to raise money. The government could also create more events which mean that many people could gather, buy things, which means that you could get more money. Of course, covid is another restriction, but like my previous suggestion, maybe we could have some sort of reward every time we attend an event. Since covid is a problem, we could have an event for 3 suburbs, and then have another event for another 3 or 5 suburbs, cutting down on the number of people attending.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I believe that it is important to manage our budgets so that we won't overspend.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I think that it is important to manage our waste and make sure that it is as easy and simple as possible. I support the choice of 3 bin sizes, but I think that if we were to have new bin sizes there should be a price range or different prices for each of them. This is a good idea but I think that there should still be the option of paying it through the rates bill. This is because, it may be easier for some households to pay through rates or tags, so we should keep this option for a wider variety.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

- Standardise the opt-out rules for residential and lifestyle properties with between two and nine units** Other
- Standardise the opt-out rules for non-residential properties** Support
- Apply a minimum base charge to every separately used or inhabited part of a property** Do not support
- Tell us why:**

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because I think that the environment should be protected.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Small increase in targeted rates acceptable.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: good not selling strategic assets -- ports and airport. do not support selling these key assets.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Priority schedule looks workable.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: - Simple system

- Applicable to whole region no matter where you live

- Cost effective

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: '- Nothing noted for Whangaparaoa

- Targeted rates to improve Silverdale Village
- Community facilities in Gulf Harbour aka need finance
- No budget for planning services, governance. Local board deserves more in its budget.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

It's getting very expensive to live in Auckland -- you have to both be working to sustain costs and COVID isn't helping. Wish council all the best in trying to do the best for ratepayers.

p. 53. support increased local board input on decisions

p. 53. support changes to fees and charges. Could also reduce charge to link up to council water supply -- currently too high to pay.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: pay enough in rates already

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: only do what must/should do

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: Depends on cost of 3 bin system especially if household is only 1 person who is elderly so rubbish is a small amount.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Need to think of cost to pensioners living on their own.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Reduce to the cost of bureaucracy ie. staff to help pay for cost of proposed increased. too many employed by council to sit in meetings!! wasted money on research for projects not done. expensive paper on publications.

rates are high enough in Auckland and increases not always justified especially if someone is living alone.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Reduce or completely avoid road construction on public holidays, which can reduce labor costs, increase the efficiency of road traffic, avoid large-scale traffic jams, and slow down emissions. In addition, I hope that more footpath can be added. Under the mental pressure of covid, everyone will stay far away. Hiking increases family bonding, and I hope to open up more trails.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I would be in favour of rates covering recycling and food scraps but not general, non-recyclable rubbish.

I put out virtually no rubbish so I don't want to pay for a service that I am not using. If the small bin started at the size of the veg scrap bin and charged on pick up I would be in favour.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would like to see more incentives for recycling and reduction of rubbish.

1. A user pays system with bins charged on pickup only for general rubbish.
2. Free pickup for recycle bins and food scrap bins.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: 1. Urgent action in planning for climate change impacts is needed now. 2030 is when we need to have created a major reduction in emissions by, so we need action asap. The importance of air quality has not been mentioned yet this is a significant issue for health and wellbeing for Aucklanders. Electric buses and ferries will have to be options rapidly brought into the picture.

2. Reducing transport emissions is critical, so public transport options must be affordable, reliable, and go where people are going.

Electric buses and ferries will have to be options rapidly brought into the picture.

Efficiencies and effectiveness aspects of planning need to be prioritised. e.g. Support for car pooling, (companies who subsidise public transport use by staff, could be incentivised with petrol voucher prizes for those car pooling) and more local mini buses to get people to bus stations at any time with ease, including when buses break down, drivers are off sick etc.

3. If we pay more, we expect better policy control, improved procurement planning, more accountability by AT,

Wastage, such as redesign costs after failed consultation of local urban up grades, should carry penalties, loss of bonuses for managers. It is too easy for AT to get it wrong the first time. Get it done timely, get it done right needs to be the motto here.

4. Ghent in Belgium has it right in terms of a planning model that discourages car use across the whole city, restricting cars to local loops. Very sensible with 25 % of our population heading to be over 65 in the next decade.
5. Tree planting costs carry high wastage, when planting in areas already denuded, tree protection needs greater incentivising, stricter controls, and higher fines for destruction.
6. Support grants for rongoa, but why not also for native species used extensively in Maori arts and crafts. Too often I find local people have flax cut from their own properties at night, just because there are high demands on the resource and few accessible options on local public land.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: 1. Support using Govt funding where possible and advocacy for increasing this regarding impact of climate change, emergency management support for community development, and support for the four wellbeings, which receive little focus in this document,

2. Limits on sales of heritage property and loss of community assets where older people and those with disabilities will be significantly disadvantaged. We are losing our history, stories and heritage at too fast a rate.
3. Tighter value for money focus on procurement strategies need to be seriously implemented and KPIs for managers adjusted.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Support the criteria as presented.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: 1. Principle of equity In payments across the region at the same rate is strongly supported.

2. More Incentivising of waste reduction for industry, for unit developments, and lifestyle properties are needed.

Opting out Is a cop out and allows rubbish to be plied up In some cases and the community suffers. Other means I support the concept but In practise we need an Incentivisation programme that Includes everybody, even though It may mean special rules and Incentives For special situations/groups.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why: Soundly based priorities: esp Urban Ngahere strategy, lwi conservation work, dog parks and Business Associations esp BID In Silverdale.

Would like to have seen more emphasis on leadership In communities for emergency management and connectedness between youth and elders.

General comment re support for Local Boards to have the funding capacity to support the community development Initiatives that promote the four wellbeing. Without such Funding support at the Local Board level, many social needs will go unmet and the negative fallout Impacts on everyone in those communities, increasing social and emotional harm.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Other matters for feedback link didn't work so I simply wish to state how the vision of Auckland as an age-friendly city needs to be highlighted as a series of significant overarching strategic policies, that guide decision making In the longer term,

ensuring our older folks' needs and capacities are considered, their opinions canvassed, and Included (not tacked on) by those in touch with our seniors, 50 plus, and especially the 80 plus more vulnerable members of our communities.

50% live only on NZ Super and only 11 % live In retirement villages.

Heritage, preserving our older and unique wooden buildings, our stories connected to places, our urban memories, celebrating those who invested their labour and vision in building our city and communities.

We are at a crossroads, in danger of losing what generations built and gifted to us, and there seems to be a complete lack of leadership, principles embodied in policy, or budget to stop the destruction of our heritage at this time.

Limited time to expand here on this theme, but the Character Coalition has traction and could tie up Council funds in court cases for a very long time. Proactive thinking, strategic focus and longer term vision is needed at the governance level.

Local communities focus is often lost because Local Boards have been forced into last minute late in the piece comments about Council led development and their control of the spending and priorities doesn't reflect their communities needs. Consultation on what affects local people is often inadequate, too late in the process and developments can slip through even soundly based policies, after a thrashed out Unitary Plan consultation process, e.g. Omana North in Milford.

The Tupunga Maunga Authority Operational Plan needs a rethink as the concept of the Authority overseeing marine parks and reserves is flawed as it lacks a quality governance framework. Righting wrongs of lack of Maori input through the back door is not a balanced, just or fair way to ensure inclusive collaborative meaningful progress on issues that affect all NZers.

What do you think of this proposal to introduce a climate action targeted rate?

- Support
- Do not support
- Other
- I don't know

Tell us why

Tell us why

1. Urgent action in planning for climate change impacts is needed now. 2030 is when we need to have created a major reduction in emissions by, so we need action asap. The importance of air quality has not been mentioned yet this is a significant issue for health and wellbeing for Aucklanders. Electric buses and ferries will have to be options rapidly brought into the picture.

2. Reducing transport emissions is critical, so public transport options must be affordable, reliable, and go where people are going.
Electric buses and ferries will have to be options rapidly brought into the picture.
Efficiency and effectiveness aspects of planning need to be prioritised. e.g. Support for car pooling, (companies who subsidise public transport use by staff, could be incentivised with petrol voucher prizes for those car pooling) and more local mini buses to get people to bus stations at any time with ease, including when buses break down, drivers are off sick etc.

3. If we pay more, we expect better policy control, improved procurement planning, more accountability by AT.
Wastage, such as redesign costs after failed consultation of local urban up grades, should carry penalties, loss of bonuses for managers. It is too easy for AT to get it wrong the first time. Get it done timely, get it done right needs to be the motto here.

4. Ghent in Belgium has it right in terms of a planning model that discourages car use across the whole city, restricting cars to local loops. Very sensible with 25% of our population heading to be over 65 in the next decade.

5. Tree planting costs carry high wastage, when planting in areas already denuded, tree protection needs greater incentivising, stricter controls, and higher fines for destruction.

6. Support grants for rongoa, but why not also for native species used extensively in Maori arts and crafts. Too often I find local people have flax cut from their own properties at night, just because there are high demands on the resource and few accessible options on local public land.

Question 2 - Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- Using the Government's Better Off support package funding
- Changing the timing of some capital spending
- Implementing cost reductions in the form of efficiency savings and potential reduction in some services
- Keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- Continue work on the sale or long-term lease of non-strategic assets as required.

For more information, see Key issue 2: Budget pressures.

What do you think of this proposal to manage our on-going budget pressures?

- Support
- Do not support
- Other
- I don't know

Tell us why

1. Support using Govt funding where possible and advocacy for increasing this regarding impact of climate change, emergency management support for community development, and support for the four wellbeings, which receive little focus in this document.
2. Limits on sales of heritage property and loss of community assets where older people and those with disabilities will be significantly disadvantaged. We are losing our history, stories and heritage at too fast a rate.
3. Tighter value for money focus on procurement strategies need to be seriously implemented and KPIs for managers adjusted.

Question 3 - Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

For more information, see Service prioritisation.

What do you think about how we propose to choose which services to reduce, stop or change?

- Support
- Do not support
- Other
- I don't know

Tell us why

Support the criteria as presented.

Question 4 - Standardising waste management**Question 4A**

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a **region-wide rates-funded** refuse collection service, with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide **pay-as-you-throw (PAYT)** system (e.g. tags and bags).

For more information, see Key issue 3: Waste service standardisation.

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded refuse collection system?

- Support (prefer rates-funded system)
- Do not support (prefer PAYT system)
- Other
- I don't know

Tell us why

1. Principle of equity in payments across the region at the same rate is strongly supported.
2. More Incentivising of waste reduction for industry, for unit developments, and lifestyle properties are needed.
Opting out is a cop out and allows rubbish to be piled up in some cases and the community suffers. Other means I support the concept but in practise we need an Incentivisation programme that includes everybody, even though it may mean special rules and incentives for special situations/groups.

Question 4B

In addition to how we fund region-wide kerbside refuse collection, we are also proposing to standardise waste management services and charges across Auckland. This includes standardising which properties can opt out of council waste services and charges.

For more information, see Key issue 3: Waste service standardisation.

What do you think about the proposals to standardise these waste services and charges?

	Support	Do not support	Other	I don't know
Standardise the opt-out rules for residential multi-unit developments (10 or more units)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Standardise the opt-out rules for non-residential properties	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Apply a minimum base charge to every separately used or inhabited part of a property	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Question 5 - Local board priorities

To answer this question please refer to the Local board priorities.

If you don't know your local board area, see Find your local board for more details.

Which local board area does your feedback relate to?

- Albert-Eden
- Aotea/Great Barrier
- Devonport-Takapuna
- Franklin
- Henderson-Massey
- Hibiscus and Bays
- Howick
- Kaipātiki
- Māngere-Ōtāhuhu
- Manurewa
- Maungakiekie-Tāmaki

Tell us why

Soundly based priorities: esp Urban Ngahere strategy, iwi conservation work, dog parks and Business Associations esp BID in Silverdale.

Would like to have seen more emphasis on leadership in communities for emergency management and connectedness between youth and elders.

General comment re support for Local Boards to have the funding capacity to support the community development initiatives that promote the four wellbeings. Without such funding support at the Local Board level, many social needs will go unmet and the negative fallout impacts on everyone in those communities, increasing social and emotional harm.

Question 6 - What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services
- Tūpuna Maunga Authority Operational Plan 2022/2023
- Other rates and fee changes.

For more information on these proposals, see Other matters for feedback.

Is there anything further you would like to give feedback on?

Question 6 - What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services
- Tūpuna Maunga Authority Operational Plan 2022/2023
- Other rates and fee changes.

For more information on these proposals, see Other matters for feedback.

Is there anything further you would like to give feedback on?

Other matters for feedback link didn't work so I simply wish to state how the vision of Auckland as an age-friendly city needs to be highlighted as a series of significant overarching strategic policies, that guide decision making in the longer term, ensuring our older folks' needs and capabilities are considered, their opinions canvassed, and included (not tacked on) by those in touch with our seniors, 50 plus, and especially the 80 plus more vulnerable members of our communities. 50% live only on NZ Super and only 11% live in retirement villages.

Heritage, preserving our older and unique wooden buildings, our stories connected to places, our urban memories, celebrating those who invested their labour and vision in building our city and communities.

We are at a crossroads, in danger of losing what generations built and gifted to us, and there seems to be a complete lack of leadership, principles embodied in policy, or budget to stop the destruction of our heritage at this time.

Limited time to expand here on this theme, but the Character Coalition has traction and could tie up Council funds in court cases for a very long time. Proactive thinking, strategic focus and longer term vision is needed at the governance level.

Local communities focus is often lost because Local Boards have forced into last minute late in the piece comments about Council led development and their control of the spending and priorities doesn't reflect their communities needs.

Consultation on what affects local people is often inadequate, too late in the process and developments can slip through even soundly based policies, after a thrashed out Unitary Plan consultation process, e.g. Omana North in Milford.

The Tūpuna Maunga Authority Operational Plan needs a rethink as the concept of the Authority overseeing marine parks and reserves is flawed as it lacks a quality governance framework. Righting wrongs of lack of Maori input through the back door is not a balanced, just or fair way to ensure inclusive collaborative meaningful progress on issues that affect all NZers.

Hibiscus and Bays Local Board

Each year we plan the projects and initiatives we will deliver in your local board area. These are based on our 2020 Local Board Plan, which sets our three-year direction.

What we propose in your local board area in 2022/2023:

What we propose in your local board area in 2022/2023:

- Renew sportsfields and connected facilities, such as lighting, around Freyberg, Stanmore Bay, Silverdale War Memorial and Victor Eaves Parks.
- Continue with Te Ao Māori and community-led conservation project which brings local iwi and volunteer ecology groups together to share practical knowledge of our area.
- Investigate and design new dedicated dog parks within the local board area.
- Start planting large specimen trees as part of the Urban Ngahere (forest) programme in selected reserves.
- Support our Business Associations with an economic development fund and assisting Silverdale's intention to establish a new Business Improvement District.
- Establishing new tracks in Bushglen Reserve in conjunction with expert advice from arborists.

For more information on what is being proposed in this area, see Hibiscus and Bays Local Board priorities.

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

- I support all priorities
- I support most priorities
- I do not support most priorities
- I do not support any priorities
- Other
- I don't know

- Local board decision-making over local community services
- Tūpuna Maunga Authority Operational Plan 2022/2023
- Other rates and fee changes.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Less people, more land, public transport is more wasteful of resources.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The bureaucratic government should be reformed, unnecessary position should be cut, particularly "consultants" position. 1.7 million people city has over 6,000 officers, it is unimaginable.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Economy, fairness, eco-friendly

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not Support

Tell us why: Auckland is already ahead of other cities in terms of environmental protection. Therefore Auckland Council should prioritize economic development rather than introducing another tax.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Auckland Council should cut off the unnecessary costs to save money and be more efficient.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support the policies and proposals that would result in Auckland Council improving its services to Aucklanders.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Auckland Council has been wasting a lot of money on projects or proposals which turned out to be unsuccessful such as the railway project from Auckland to Hamilton. I think Council should really review these projects and introduce the rewarding-punishing system, not just implementing a new project, gathering money from Aucklanders, then find the project is failed and stop and move onto implementing another project.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not Support

Tell us why: The reason for inflation is not only because of the international circumstances such as the war and COVID, but it is that government continuously raises the minimum wage, resulting in a dramatic increase in living costs. Government makes a mistake in taxing hard-working middle classes but paying the unemployment benefits to lazy people who do not even try to find a job. This is very unfair. The so-called “reform policies” are a waste of money.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: If Auckland Council intends to reduce some investment or cost, please cut off the unnecessary advertisement cost, as well as City Council office decoration cost. Please keep the services which will benefit the residents.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I do not support the rates-funded system. This is because it would demotivate those who make effort to reduce waste and protect the environment. Only when people pay as they throw, they would realize that they have to recycle or reduce the waste to save money. In this way, it would really protect the environment.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not Support

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I think Auckland Council should cut off the unnecessary cost. For example, Council has invested a lot in Browns Bay's public library as well as the playground. But I cannot see a huge difference after the renovation.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The government should reduce waste, increase accountability and management skills rather than bureaucracy. What is more, it is unfair that the government's public houses do not meet the rental standards but require individual landlords' rental properties to comply with all standards and regulations, and mandatorily require them to install heaters and air conditioners. In addition, the government requires the landlords not to ask tenants personal questions to protect their privacy, which results in the validation of landlords' rights. Also, the government should do strict eligibility checks on the tenants/people who apply to live in public houses.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I agree with the action but this is so crucial that this amount should be larger, even \$1.50 per week instead of \$1.12 would be better. We have to prioritize environmental issues.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: This is crucial but vague - needs to be clarified.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: In principal agree, but table is so vague; is there, for example, a hierarchy of key priorities?

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Really love food scrap collection. This would cut my rate to about 15l per week.

PATY I fantastic as if in rates, people will be less likely to consider how much they are throwing as cost is silenced/ out of mind.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Community sports facilities etc. and lighting is great.

Consultation in Maori and community conservation and tree planting is great.

Other priorities like new tracks in Bushglen or business development in Silverdale are of value, but the focus should be more on improving boarder areas and having stronger environmental framework.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why: Remember the elderly and disabled when making discussions on transport i.e. distance to travel, cost and availability times etc.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why: Spend money wisely (as though it was your own)

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: Don't waste money on useless projects eg cycleways, tram ways - Dominion Road - airport.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Remember that some people do not use the present system every week. Why should we pay a very big charge when we only use rubbish bag once a month?

The charge is going up - the service is going down - why?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

This is far too complicated for the ordinary person - why don't you ask straight forward questions? I would like an answer please. Thank you.

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Too much money has been spent researching useless projects - eg cycleway on the bridge.

DONT FUND RAPID RAIL UNDERGROUND TO THE AIRPORT.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: See # 1 and 2.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We recycle and compost. We spent \$20 a year on bags for rubbish.

Region - wide rates funded will not encourage being sensible with waste

There are too many bins on footpaths as is now.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Tell us why: Remember the elderly and disabled in all your decisions.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Moving the office to Orewa with none at Brown Bay has meant we don't have the contact with board members as we used to have. Maybe covid has meant communication has been online. As soon as possible can live seminars be held again? We can not do zoom meeting and we prefer communication to be face to face.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Can we put idle government assets into a rental service to increase revenue. The increase may be too high, because of the war the cost of gasoline mounting, ordinary people already feel that every day . You can't afford to run out of money and the daily necessities in the supermarket has grown in the past two years.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The government is already considering streamlining, reducing, fixing or changing certain services, it would be better. Yes because government agencies are bureaucrats.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I don't quite understand. It used to be rubbish collection service is undertaken by the (Central district), and will come later. Isn't this garbage bag option less money to pay? I don't understand why! Those private waste service companies like Waste management?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Hibiscus and Bays Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Exactly the same as the Hibiscus and Bays local board plan. The local board should have a long solution to protect the coast and sea from erosion.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Also consider as a stable community economy. Promoting community economic agility also should be the main point.
