Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The rate rise is minimal for me personally and I think it's worth it for the future of Auckland and the planet

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I cannot support rates being use to pay for private companies to upgrade their fleets. If the supplier is unable to conform to requirements find another supplier

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: You are literally removing competition and at the same time asking low waste producers to subsidize those who cannot be bothered. Currently my family use one orange tag a fortnight and I know at least 3 other families that only use one rubbish tag every three weeks to a month. And there appears to be no ways to opt out of either the rubbish collection or the food waste collection for those who compost. This is borderline illegal

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: These mostly appear to be 'Nice to haves' not 'Must haves', austerity people please

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: What climate emergency? I challenge anyone in Council to provide scientific evidence of man-made climate change. It cannot be done.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Trimming Council wastage and inefficiencies was promised by Mayor Goff and never delivered. Had he kept this promise the last rates increase might not have been necessary. Let's start there. The Climate Change Targeted Rate clearly shows Council is in the thrall of green activism and does not understand the financial pressures households already suffer.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Stop digging up perfectly good roads just to use up the budget. Stop the nonsense of cycle ways that are little used yet ruin local shopping streets and cause much more traffic congestion. The amount of extra pollution caused as vehicles having to stop/start and crawl along is outrageous. Auckland with all its' hills, valleys and climate, is not a city suitable for a cycleway network. Hence the lack of usage. An irresponsible waste of ratepayers money for green virtue signaling.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It will be yet another device Council will use to ratchet up costs to households.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Just stick to your core responsibilities and keep down costs to households. Initiatives for "sense of belonging" and "well being" can come when the average household can afford it.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Council has over many years strayed away from its core responsibilities and into areas that are either virtue signaling, Councilor pet projects or minority group interest projects. These are non essential and end up costing the ratepayers more each year while Council continues to waste enormous sums with excessive staffing on bloated salaries and manifold inefficiencies.

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Priorities should be focused on optimising infrastructure expenditure. Subsidise solar, help schools, get rid of bloody cameras on Onewa instead subsidise public transport. Great you are helping out pentioneers, but what about young families? Kids? Students? Learning? Efficiency? Who cares about a club of old people who have fun in spending time and resources on framing old degrading places with heritage signs? Spend that money on teaching kids/students useful skills, workshops, networking.

6. What is important to you?

Do you have feedback on any other issues, including:

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: If we do not start doing something to reduce our reliance on private vehicles or increase our tree cover, then our children will be the ones who face the consequences of our actions.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Please ensure they are non-strategic assets. I would hate to see council having to buy more parks and properties in growth areas in the future because it sold them off now before the growth arrived.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Why council would still be doing any of the things in the stop category anyway I cant quite understand. Absolutely supportive.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I live in an apartment and we have to pay for our own waste management already. So it would be a kick in the teeth to see it included in our rates also when we do not receive the service. Apartment and Body Corp living in Auckland is only going to increase moving forward, so either you will need to accommodate these situations into your standard rates funded service, or you will need to reimburse people who have been charged rates for a service they can not receive.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? |
support most priorities

Tell us why: Very supportive of anything to open up more Kauri tracks and ongoing development of Northcote. Only supportive of efforts at Little Shoal Bay if they are related to responding to climate change issues as opposed to ignoring, i.e. recognising the obvious fact that the sea wants some of this park back and that we ought to be designing around this fact.

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? |
support all priorities

Tell us why: Nice balance of environmental, social, and development projects.

Waitākere Ranges Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? |
support all priorities

Tell us why:

Whau Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? |
support all priorities

Tell us why: A good balance of growth, maori, environment and parks/cycleways

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

A bit surprising that the CEO can get such a significant pay rise (5% compared to 1% for other staff) when council is 85 million underfunded, services for Aucklanders are having to be cut or reduced and rates raised/targeted rates implemented, and council are absolutely bleeding staff to better paying organisations like Kainga Ora.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The council keeps on coming up with new taxes. Calling them by other names does not hide the fact that you want more money. While it might only be \$1.12 pw, it's another outgoing. I also think the council needs to look more at core business. What might need to be stopped or turned down, or other options? I have many things in life I would like/need/want to do- but I have to live within my means. Sometimes it means trading off other items.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I notice again here you are after more money. I understand inflation is 5.9% as of today. However, I see no offerings of what must go. Again I understand that as a community what I think is important may not be shared by others, and the other way around. I think the attitude needs to be more of reducing rather than seeking more money.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: What I dislike about the way the budget is framed you have made it clear what is important to you- and by in large I think the council has poor priorities and a lack of vision. For example- libraries only. During the lockdown the library system (only at the very end) came into the 21st century. What rebuild the city library? Why not sell the land and reduce debt or costs. The city could do a deal with the Universities in town, who use our space without paying rates. Why not rent out the local library out at night, as it sits unused for most of a 24 hour period. The online system means that all of the books can be accessed from anywhere (I use the app).

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Government, local or central, always seem to do a poor job. Currently, I rent a wheelie bin from a private business for our general waste. I have never had a problem, pick up is always on time, and nothing is ever left on the street. I cannot say the same for the council service. My observation is that the service is poor, because they know the council will not fire them. My company knows poor service and I will stop the contract. I note that this is not a uniform system, as bags/tags will still be in places. I also note that no matter what is said this will be pushed along because the council is placing a priority on zero waste. While this might be great, I doubt we can really afford the goal or what the glossy documents seem to point toward.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I think the council at any level should not give money to any event unless a business plan can show how it will make the city money. Events, special days, parades, etc are nice but we cannot afford them. Every time we give money to something that does not make money we are giving away money for things that others do not like.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I dislike the way in which the council adds fees/taxes/rates etc to my account and then says rates have not gone up much. What is also hard to deal with is the fact this survey which asks for input only asks for things the council wants to talk about. I get annoyed every time I see a new event, publishing, sign, hiring happening because it seems to me the council does not value our money and thinks the solution to everything is to get more- and I cannot really do much about it. The online tool for the budget had limited amounts that one could play with. Why was it some things could not just be dropped or stopped? Also while I am writing I know that no one with any ability will contact me or follow up. What will happen is the council will say it listed and then it will do as it likes- because really there is little actuality to the people of this city. This budget looks like a document made (and now many external people were hired to produce it) but people who have not accepted the impact that the covid response decisions will have on this city.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Something has to happen and we all need to pay for it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Understandable money needs to come from somewhere

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Sounds reasonable.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Less hassle.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Time for the hard stand at little shoal bay to go, replace with more recreational facilities / green space. Stop the pollution.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I really can't afford any more rates!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Am worried about rates increases

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I am worried about paying more rates!!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It's wasting money that could go in to improving poor core services.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: You have a captive market with zero competition. You cannot budget due to your own ineptness.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: Again, this is because of wasteful spending and an oversupply of staff and consultants. A mess the council has created.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It's much simpler and more environmentally friendly, not to mention cheaper. The bin tag idea was flawed with someone having to cut them off, then dispose of them.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I have no faith in delivery of these.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Pull your fingers out and stop the wasteful spending and virtue signalling.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Because my Super and still paymy mortgage \$ 1600 a month rate at over \$ 200 a month a plus water water rates and electricity and cost of living up as well

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Because whatever we say unfortunately we have a bunch of useless councilors thay give you the nood and any consultation and clarity by A.C C its very very shoddy and unfair

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: You are Punishing the Ratepayers with this system paying yearly a lot of ratepayers are not do not agree because the amount of rubbish they produce especially super annuitant of 2 people are penalise on tha basis

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: Because most road in the Glenfield are in a terrible state

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Yes that rid of the Tree at the corner of Eastern Park Parade an Mcquiod placeits dangerous when you attempt to go out the traffic from the left cannot be seen till you are halv way out cause road or bike or motobike accident plus addedto the car parked and the obstruction of the tree and the other there are trees on the kaipatiki road pass the Glenfield Collegeafter the roundabout next the bus stop those tree ar precariously leaning against other trees at more than 35% angle just almost ready to compromise becaus luck of rain or too much rain will compromise the stability of those tree maybe the A .C.C

will do something after someone is Killed

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Reducing emissions by 64% in NZ's biggest expanding city within 8 years is not going to happen. NZ are low contributors to pollution, needs to be a global agreement, not NZ & Auckland carrying an unproportionate amount of the burden.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Light rail to the airport (a massive expense with little benefit) is still been prioritised over critical infrastructure like a second harbour crossing. What happens if the Harbour bridge suddenly has to close to an extended period of time? Will a half built light rail to the airport save the day? Of course not. If light rail goes ahead, it will be almost \$30 billion dollars on rail projects within 10 years and still not a single train on the North Shore (even though North Shore residents are having to pay for a lot of the rail infrastructure and have done so for 50-100 years).

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Because the spending you do announce doesn't make sense to most - light rail, inner city rail loop, cycle bridge - they seem like vanity projects for someone's legacy rather than logical and priority decisions.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I currently have a 140L bin and only need to put it out once every 5 weeks at a cost of \$4.25, so 10 times a year with total cost of \$44 per year, so how do you come to current PAYT costs of \$329!!! So you are going to increase my costs by 750%! How can you possibly say 'Economical: the rates-based service is more economical than a pay-as-you-throw service'. Not only that, if forced to pay that amount, people wouldn't be so careful about what goes in it and use it to the capacity which would have the opposite intent of your 'Zero Waste Vision'. Food Scraps – extra \$71.28, I already have a in sink food disposal unit! Another unnecessary cost. You mention opt out but still have fixed rates added?! How do you possibly justify a 750% price increase for the same service?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: Haven't read up enough on it, however all groups/people should have equal say, no one minority group should have more say or privileged right in any decisions.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Any co-governance with Iwi (including regional parks and gulf marine) should not go ahead. As above, all groups/people should have equal say, no one minority group should have more say or privileged right in any decisions or funding. We live in a democracy - keep it that way.

Important privacy information

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I do not believe the money raised will be spent appropriately. Just look at the funds set aside for businesses affected by the ongoing CRL....very little of the funds have been spent.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rate increases have been higher than the rate of inflation for years. When will they stop?. Do not provide pay rises for highly paid staff, only those on low wages. The cost of living in Auckland is fast becoming unaffordable.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: However, please do not plan to spend a lot of money in the future. Try planning for a sustainable future. Stop the unnecessary growth of Auckland.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Auckland council has already had 11 years to do this. Was it planned for in the original scheme of things? If so, why the long time to implement?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't want to see any "empire building" take place, i.e. no unnecessary expenditure planned for.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Yes, please consider rates based on the size of the house you live in, not the value. Large houses in general may have more occupants compared to smaller houses. Also, Reduce rates for over 65's and super-annuitants. These older people may have paid rates for a large portion of their working careers, not necessarily to AC, and now they find rates an increasing burden especially if they still live in a house whose value has increased enormously. They have paid their share already and are not much of a drain on the services, etc. provided by the council. I don't want to see any "empire building" take place, i.e. no unnecessary expenditure planned for.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need more cycle lanes and bus routes. Aside from climate improvements, these forms of transport lead to healthier communities - people are more active, shop at their local shops more, and interact more with their neighbours.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I'm not sure which assets are involved... but I hope the management of them is suitable long term, and doesn't just provide short term gain to the economy.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This penalises people who are very low waste generators and de-incentivises people from becoming part of the zero waste movement.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Weed control in the area and supporting the growth of native forest.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Without the govt telling the council what the NZ population plan is how on earth can you plan? Is Auckland's population going to decline, remain unchanged, grow slowly or grow rapidly. You don't know and neither do I - depends on central govt.

Judging by NZs success at reducing greenhouse gas emissions ever since they became a popular issue (say 2nd IPCC report 1995) then we haven't a hope. Hitting your target with a rapidly growing population is impossible bar some totally unexpected technical break through (Nuclear Fusion???).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Inflationary pressure predicted by council wage rises.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We already get average services for our extortionate rates and taxes cut costs or up quality before imposing more arbitrary fees and unmeasurable idealist directives on us, not even taking into account how broke we'll be once this covid be turns the economy upside down and inflation really sets in

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There's plenty of Implementing cost reductions in the form of efficiency savings that should be enacted before selling assets and raping the tax payers more we are not a cash cow

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: There's no place for race based policies or priorities in politics. Beyond that essential services should take priority anything else should only ever come after the best value for money for the rate and tax payers has been achieved and on referendum or by agreeable from rate/tax payers

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:The local board has a good history of listening and delivering measurable results unlike the council

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: A step to far and will not change the world's climate by even a fraction of a degree. I supported the two previous targeted rates, but not this one. With inflation and increasing interest rates far outstripping income increases to put this through and effectively increasing rates by 6% is appalling. If it does go ahead, and I'm sure it will, then those who benefit should pay. For example the proposed street tree planting programme in South Auckland should be paid for through a targeted rate on South Aucklanders.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: 3.5% is fair, but saving money on unnecessary spending.

For example if Council staff get the outrageous 6% pay increase I read about, then cut staff numbers so it is fiscally neutral.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Generally supportive, but prioritising the “cultural needs” of Auckland communities should not be done at the expense of ratepayers. People should pay via “user pays” to indulge in the cultural interests.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We only put a rubbish bin out maybe a dozen times a year. Imposing a flat fee is appalling and punishes those of us who compost and take other steps to reduce waste.

I probably won't because I believe in protecting the environment, but a proposal like this tempts me to no longer separate rubbish and recycling and send it all to the landfill.

This appears to be a rates grab and is inequitable, not equitable as you try and portray it.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Birkenhead Heritage Trail seems a waste of money.

I would rather that money be used on weed clearance in the many native forests in Kaipātiki, which are being smothered by exotic weeds.

After all the council has declared a “Climate Emergency” and thriving native forests will do more than anything else to fight climate change and improve Auckland’s environment.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Re the Tupuna Maunga Authority Plan, I wish to voice my support for their decisions to ban general traffic from the Maunga and their ongoing plans continued to remove exotic plants and replace them with native plantings thereby creating enhanced environments for both people and native fauna.

I know there has been an outcry from some quarters re these issues, so I just want to record my support for them.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This fails to incentivise a reduction in waste reduction. It's hard to understand the evidence or rationale for a rates-funded system improving environmental outcomes

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is a disguised rate increase. Emissions are already covered by the ETS. This is not required.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Inflation, higher mortgage payments, downturns due to COVID are already putting pressure on family budgets. Auckland Council needs to realise it is spending other people's money and tighten the budget FAR MORE than proposed.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The criteria is just waffle. Stop employing more and more people - and paying them huge salaries for their cushy jobs (that were not affected by lockdowns). Reduce the number of spin doctors and other superfluous workers.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Pay less if you discard less frequently. That will encourage composting, and minimising waste collection. Allow residents to choose alternative waste collection services without paying twice.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I support assistance to residents who are removing noxious plants from properties and reserves. I support improvements and additions to walking and cycling trails.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It has already killed thriving businesses in Northcote and Birkenhead as in the cycle way and I never see anyone using them - what a waste and way to kill our businesses. This is just not on top for me right now. Its about number 10

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Most of the council goals are going to hit homeowners in the pocket. Absolutely rates should not change. Maybe spending less on some of the ridicule roading projects at the moment would save millions.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: However again more transparency on what exactly are the prioritises. People just want to eat, survive etc the ongoing cost factors are crippling to say the less

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Happy for this to happen as long as it is the same cost I pay now which is one orange sticker a week. If it costs more don't change the system

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Consistency through the councils eg: all council pools the same charges should apply etc

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Support moves to meaningfully mitigate emissions. These need to be assessed from a 'bang for buck' perspective. Building cycleways does not equal emissions reduction.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Neither support nor against. But rather advocate for Council to become a more effective organisation, less staff turnover, positive work culture, reduced bureaucracy.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: You should enable others/private sector/philanthropy to do things that are not core Council activities. Instead of directly competing with them.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Everyone needs their rubbish taken care of.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Seem fine

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: You have been increasing rates far too quickly for far too long. While I support lower emissions I believe that this can easily be funded by removal of wasteful spending by Auckland Council. A few examples; painting unsightly dots around Takapuna, advertising that it's summer, ugly graffiti around school speed bumps, wages & salary.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: General rates should be 0 and kept at that rate for the next 10 years. We pay the second most in rates in the country and most of that is wasted. You get an increase in take in rates by the highest number of homes being completed on record.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: You should be focusing on core competencies. At the moment that seems to be a struggle.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our household uses waste management for our general waste. By council charging for waste services this means I would be paying twice for waste services. You would be creating a monopoly and reducing competition and innovation in this area. I am STRONGLY opposed to this.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why: Not sure you will be able to meet these budget forecasts with Covid costs escalating each month

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: Need to look at ways to cut some costs as endless roadworks etc are costing ratepayers and takes months to ever get finished

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I live in a Retirement Village so these proposals do not affect me personally as it is a Village cost not passed onto residents.

Our streets seem to have a huge number of rubbish bins which often are just left out on footpaths making suburbs look untidy plus a hazard for pedestrians

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Visible action by Auckland Council will engage the average Aucklander to engage in climate action on a day to day level

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I agree with the introduction of food scraps, and offering different bin sizes, however the PAYT method encourages even further waste reductions and almost 'gamification' by encouraging households to minimise the number of tags used.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Prioritised funding to Pest Free Kaipatiki encouraged

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: You have shown not to be able to manage fund well in the past, see taxes applied to fuel in Auckland that haven't produced any benefit to the community in terms of infrastructure. Reduce instead your enormous administrative staff levels. Auckland has more staff than some nations.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Restructure, stop selling off assets that could generate revenue if well managed, if you were a real business you would be acting very differently as otherwise you would cease to exist, keep going back to borrowing more and increase rates is not the solution. Learn how to manage your existing funds.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland requires capable management with a vision into a sustainable future. Our expenses are way above what they should be as we carry too many costs that we could reduce. Improve efficiency, be accountable and have strong sense of social services. So far we only had rates increase since the super city without any benefit, still waiting on many projects to be completed or even started (pedestrian crossing on harbor bridge, light rail project is a failure and money wasted, storm water and water supplies still a major issue.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Please, be accountable. No under the table \$\$\$\$\$. Get our rates on to the actual needs.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Woolly spending on sports fields, parks, is nice. But are the footpaths being maintained? You could employ a person on basic wage, whose job is to pull back the twitch off concrete paths (very bad at Takapuna and Milford, covering 30cm along path Bowling Green). This person, on basic wage, could tell you when the white plastic drain pipes are eroding at gutter edge of footpaths, like in Mariposa Cres.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: As long as the service is working on windy days, when rubbish blows out of open bin, when truckie is lifting the bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This disadvantages those who create very little waste. Many people only put out waste once every 6 weeks/2 months, compost and recycle. This is a huge increase in cost for something not useful. People should PAYT otherwise how will they be accountable for the waste they create? Rate payers should not have to pay for waste removal for others. ie. renters. Don't do this! People need to be accountable for their own waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Another feel good expense which ratepayers cannot afford.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Needs more cost cutting than stated including staffing and remuneration levels.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Does not go far enough in cutting spending but this is a start.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Will add to costs for small users who do not generate much rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Get rid of the policies which are nice to have and concentrate on things that make a difference. Not willy woofers ones.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Get rid of the Tupuna Maunga authority. It is not a democratic organisation but one based on race.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Your covid reponse is crap - why waste ratepayers money to bolster this useless governments actions. Stop your useless spending. get back to the basics. Stop subsidising gyms and stadiums.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Cut all this white elephant climate change bullshit now. Government is looking after social needs - council should not be involved - cut that out now! Concentrate on the key areas of responsibility - sewage, roads and waste. Cut all the white collar empires you've built.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I truly suspect that your systems are growing white collar empires for the sake of looking PC. Does the recycling really work or are you dumping this stuff anyway? Are we subsidising a commercial "recycling" outlet by providing them with services at the ratepayers expense?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The smallest size 80L is still not small enough. It's not fair for people who are super green. Why should they pay more for doing the right thing and reducing waste?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support it but I am not happy to fund it. The costs just go on and on. Make it fit your budget without asking ratepayers to contribute yet again!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Like all of us, we have to live within our budgets.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support prioritising spending but the options are very vague. In tough times, our spending has to be reduced. It's common sense. I also think Council should look at how they spend on Council entertainment, travel and other related costs

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The system you propose is inequitable. I don't need three bins and I prefer a user pay system because I recycle diligently and I have compost bins. Single people should not have to pay the same as a family for example. I support the PAYT system and see no need to change it. Just more unnecessary spending.

If you must change it, Give people the choice and make it user pays.....not a standardised cost for everyone.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

no but I am adamant about the refuse/rubbish/compost collections. Totally against one charge for all.

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: there is no incentive to recycle, "free" bins are a disaster for landfill and recycling, on the North shore it is common for 4 person households to have only 30 to 60 litres of rubbish a month. You should use the ATHOP system and RFID tags via rates account to charge per lift. The ATHOP system could be converted, the card under the bin lid swipes and charges per lift, or offer a 30 litre bin as an option for customers but then still no incentive for some to recycle.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: slightly more priority to 11 to 70 year olds , pump tracks, skate parks , MTB jump trails especially which do not exist . No the birkenhead extreme jump track is not for mtb and Eskdale path is a shared path , not suitable for jumps and berms (but still a good asset)

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Rubbish bin pay as you throw or 30l and 60l rubbish bin options are my hope . or opt out 100% from rubbish collections while maintaining recycling, inorganic etc and a FAIR system that costs every Aucklanders the same money if they are in the same category e.g. urban , rural etc

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: A climate action targeted rate is airy-fairy pie in the sky politically correct rubbish talk. Why build more cycleways that hardly anyone uses now? Whoever is behind this policy has their head in the sand, or is more likely a woke privileged Ponsonby dweller driving their \$150,000 Tesla and drinking their \$7.50 almond milk lattes before going off to their \$150,000pa job at Auckland Transport! Get off your butt and spend some time in South Auckland and see how many poor, under-privileged communities want a cycleway. They want good and fast roads so they can drive to work to feed their families and keep a roof over their head not a cycleway for the \$3000 electric push bike they can never afford!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Also cut all council salaries over \$100,000 by 10%. Too many fat salaries being paid to council senior executives.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Again your focus on climate action is misguided and no doubt driven by the woke, overpaid greenies you employ at excessively high salaries that are driving this. Give priority to the poor of this city not the damn middle class greenies!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT is much fairer as low users will be subsidizing high users under a rates funded system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: North shore has been doing PYT and rubbish collection is a complete shamble. Every week we have competing collection companies going over the same streets, up to 5-6 trucks per week.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Connect footpath between Sunset road on route 26 to Greenhithe (Upper harbour drive)

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is one of the biggest issues NZ is facing. With Auckland Council managing the provision of the largest fleet of public transport the Council needs to take a leadership position on sustainability in the fleet, but also needs to provide for walking and cycling without 'overregging' on the cost.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Partially support. Ratepayers are not an endless source of revenue that can sustain increases year upon year. Assets should not be sold to fund shortfalls - this can be counter productive and shortsighted. For example, selling AKL shares in current depressed environment would be plain stupid, and forgoes significant dividend streams in future. Likewise selling off parking infrastructure - as much as the Council wishes that all Auckland will buy into the ideal of the overwhelming majority of trips being via public transport or active means, such aspirational goals will never be more than aspirational and selling off parking infrastructure (again in a depressed market due to residents working from home) would equally be shortsighted. Once an asset is gone, it is gone and the short term sugar hit of the sale price is quickly forgotten.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Strongly oppose. This will disincentivise waste reduction in Auckland. One fixed price and dump as much as you like, all year long. This will be even more so for households that would regard waste collection as effectively free, such as rental households who would no longer be directly paying for their waste services.

This proposal also penalises small households (such as our elderly) who would have comparatively less waste and particularly impacts those Aucklanders who are already on board with recycling and waste minimisation. In our household, we put out rubbish every 3 or 4 weeks, - where is the financial incentive to (for example) carry on collecting, cleaning and taking soft plastic recycling to designated collection stations if there is a lot of 'unused' but prepaid space in bins?

I also don't think Council have taken into account the needs of rental households - landlords will no doubt plump for the cheapest (ie smallest) option if this policy is implemented, which may not be the right option for their tenants. Rubbish from overflowing (undersized) bins would likely blow around our environment on collection days as a result.

Finally while the food waste is a good option for those that do not already compost at home, it will not be wanted by all residents. We compost our food waste and do not want yet another plastic bin being delivered which will not be used. This needs to be an 'opt in' service, not a compulsory service.

I am strongly against all aspects of this proposal. Retain the current system or develop the long promised 'pay as you throw' system, don't go for the quick and cheap option that will have environmental consequences.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support most of this, but don't support sale of Council assets.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support this in general, but I don't agree about Three Waters. Auckland Council and its past legacy Councils have badly failed to keep sewage out of streams and harbours.

We need the new Three Waters solution.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Because my family have worked hard at reducing waste. I don't want to pay for careless people who put out a full bin every week.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: NZ is a low contributor to pollution and NZ/Auckland should not carry an unproportionate amount of the burden. When globally large polluters are not, it needs global agreement.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Rail projects (up to \$30 billion) is not addressing critical infrastructure requirements ie Secondary Auckland Harbour crossing and/or extending rail to the North Shore.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Do not support is based on your first Must do being, legal obligations to Māori. What legal obligations to Maori do we have that is above every NZ'ers entitlement. Because if there is, it goes against the Treaty of Waitangi to treat everyone equally.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My annual rubbish tag cost per year is approx \$40 (4 person household) and that incentivises you to minimise waste to landfill and maximise recycling. Under the new system of including in council rates, once food scraps fee added it is approx \$400 per year - 10 times the cost (or 1000% increase)!

How is that possibly fair?

If I and others are going from putting the bin out for emptying once every 6 weeks (only when fill) to paying for a weekly empty, why would I not maximise the use of that capacity - firstly by not being so concerned about what goes in? How does that fit with the zero waste by 2040 initiative & incentives?!

Also the \$70 for food scrap waste does not recognise if you are already composting or have an in-sink food disposal unit.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Have read the Kaipatiki page though no further reading to understand all projects. All groups/people should have equal say, no one minority group should have more say or privileged right in any decisions.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Any co-governance with Iwi (including regional parks and gulf marine) should not go ahead. As above, all groups/people should have equal say, no one minority group should have more say or privileged right in any decisions or funding. Please keep the democracy we live in.

Important privacy information

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Believe in sustainability and protecting all of our futures. But also, the cost per year isn't that high and I could just as easily waste it on beer (I mean, I did tonight - but at least I rode my bike to get to the bottle shop :P)

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I'm a bit confused by what I'd be agreeing to in terms of if it'd result in more or less costs for rates payers

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: My biggest concern though is always what or who falls through the cracks, eg. who are the people who need help the most but by if they're deemed as providing "no value" as the Should Have priority says, this must not happen. Some things will cost because it's what we need to do for our fellow Kiwi - so value must mean value for the people, not profits. But otherwise, had a brief read through what's basically the MoSCoW framework and whilst some parts are a little vague in terms of the decisioning criteria, if there isn't anything like this in place today, then good to start somewhere at least.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This week is a perfect example of how due to a lot of packaging and other house work, I have a lot that needed to be thrown away so I took out the extra (old) bin I have and can go down to the supermarket to get a bin tag to have it picked up. Otherwise, I'm using a 3rd party waste service for my usual weekly pickups. If my only option was a non-flexible, auto-charged, only 1 bin per week no matter what option, this does not meet my needs. Plus, if we were to be away for a week on holiday, then we shouldn't be paying for pickup if we're not using it which I feel would be less possible with a rates-funded plan.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Kind of seems lackluster if I'm being honest. I don't mean that we need some shiny new park structure bc our parks are quite good in my opinion, but idk ... it just doesn't feel like anything super substantial that'll be helping people

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Would really like to see 2 things to restore Auckland back to the shining example I thought it was when I first visted seven years ago:

- 1) honestly, get people to walk up and down Queen St and the surrounding CBD with pressure washers once a year to clean off all the dirt and grime. When I first saw Auckland in 2014 I thought it was the cleanest city I've ever seen, but now walking from the CBD to Newmarket and it just feels a unkept and starting to be a bit depressing
- 2) More done to help the street roughers and battlers in the CBD; I don't want them just shuffled to somewhere else or violently moved, but I feel like they make up most of Queen St, Victoria St, etc these days and surely there has to be some sort of mental health support and/or housing initiatives that could better keep them off the streets in the first place.

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We are fastidious about waste minimisation and recycle everything we can, we recycle soft plastics, and we use all our food scraps for compost at home, so we put out an 80 litre rubbish bin only once every 8 weeks or so, costing us \$19.95 a year. Moving to a rates-funded system would increase our costs immensely. It's a huge disincentive for everyone to recycle and take care of our environment. It's very unfair on all the people who are trying to minimise their rubbish to protect the environment. I do NOT support a rates-funded system. I also do NOT support the food scraps service being funded by a fixed targeted rate that you are unable to opt out of. We will never use the food scraps service since we use all of our food scraps to build up and maintain our garden. So that is \$71.28 a year we would be paying for nothing. It is unfair to all the households who do their own composting if they are unable to opt out of the food scraps service.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We already pay enough for services that are not done well. Cut council running cost, do not just increase rates.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Stop selling assets and cutting services. Get rid of high salary middle and top management. Auckland council is inefficient and bloated.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I do not believe that Auckland council would make the correct priority choices.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: If the PAYT system is scrapped Auckland council will kill the competition, making a monopoly and leaving then open to increase costs and clients with no alternatives. PAYT is fair and costs reflect waste, people produce less waste when they have to pay more, there is no incentive to reduce if you pay the same regardless.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Kaipatiki board need to stop wasting money renaming reserves. This is not efficient spending, this is glory hunting

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would like a referendum on the introduction of Maori wards.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I can afford it but I think many would not be able to

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I went to the service prioritisation page and am none the wiser!! It's Doublespeak - someone has studied George Orwell

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: If you don't need to put bin out (e.g. on holiday) you're not being charged for it

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: The "proposal" is written in vague platitudes; it is impossible to have a rational opinion. My immediate suggestion is to have someone rewrite it in plain English, and save money by getting rid of most of your "communications" staff, who don't know how to communicate.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: "This table sets out proposed principles and criteria only. There are no actual proposals to make changes to any specific services at this time."

Therefore, it is impossible to comment meaningfully.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I don't see any determination here to eliminate unnecessary costs. (Like the salaries of the PR people who produced this essentially content-free "budget" document.) Why doesn't the "budget" contain the actual budget, with columns of M\$ amounts per area and per year? How does the Council plan to reduce its own internal costs? How many M\$ will each line item cost extra or less in future years? The on-line budget tool is a fun toy, but it doesn't go into enough detail. (For example: scrap the now useless "Our Auckland" newsletter. How many \$ saved? 10% salary cut for all staff on more than \$150k? How many \$ saved?) There is almost no meat in this document that one can comment on. Is that the intention?

Also, there seems to be no strategy to deal with the inflation that is going to be a feature for at least several years. There's just a shrugging of the shoulders, as in "adjust other fees by percentages slightly higher than council's cost inflation". In inflationary times, local councils can't just brush this off as though it doesn't concern them.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It would be helpful to understand the efficiency of this investment. eg. for every \$1 collected, how much of this is actually going onto physical improvements and how much is being spent on 'administrating' this change

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There has been a number of tax increases, discreet or indiscreet in the past year. The \$85m may sound like a large number but it is still very small when compared to the overall Auckland Council annual budget and can be easily achieved by looking at further internal operational efficiency savings.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: There is a fundamental flaw in current council operations where information on existing council owned assets are not known or being planned effectively, the solution chosen are often a quick fix but avoids the fundamental long term issue.

What the revenue fails to show is the split between what \$\$\$ is the base cost of the services/ improvements provided and what \$\$\$ is on the overhead/ administration portion.

The blanket figure of nearly \$250m just on council support to administer the delivery of services does not seem reasonable and suggest much improvements can be made on the efficiency of this administration task.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This does not support fairness or a push for environmental improvements.

The standardization of charges should be discussed with the waste management provider and the user at each location shall pay in accordance with how much is being used. The rates charged by the waste management provider should be scrutinized to the degree that there is a detailed breakdown of costs and the rates are checked and reviewed annually to ensure fairness.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Depreciation should not be in the budget as it is a very much blanket rule that does not necessarily show the same assets will be required in the future. Instead, it should be removed with a future budget plan of the assets we will require to maintain and identify new assets that will be required to meet future needs.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The importance to this particular tax payer is the funds are distributed and spent in a method that is efficient in the provision of outcomes. There should be minimal layer on layer of management or multi layer consultants. If this is the current case, internal capabilities should be reviewed from the top to drive the behaviors, culture and outcome we need going forward.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. - increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Preventing emissions from old vans and trucks

Increasing the flow for car traffic to reduce the time on the road and therefore pollution

Encouraging people to plant trees on their properties...

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: The Service prioritisation page doesn't bring me any clarity about what exactly you intend to reduce cost on or not...

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT is more equitable, as those with less refuse won't pay for those with more, AND it's encouraging people to consume and throw less, pay attention to packaging etc...(responsibilisation).

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I support the restoration of heritage and the native forest within the birkenhead area and those that are supporting the wider environment policies. Other priorities don't affect me personally so I have less of an opinion on them and I am new to the area. One thing I will say it is not obvious what local board I am apart of, obviously I can google it and find it, but I wonder how many other people had to google their local board?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at aucklandcouncil.govt.nz/privacy and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to act on the climate crisis

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: These factors targeted should already be part of or built into the current planning and budget of the council, not a new stealth rate on already overburdened ratepayers and a council that should have reined in its spending years ago, and moved to an austerity budget as soon as COVID hit.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The problem is that you ask a sweeping question across too many areas. These questions should be asked per bullet point proposal.

I do not and did not agree with the general increase in rates, the council should have gone onto an austerity budget as soon as COVID hit, in line with every other business and family that has struggled.

I do not agree with the sale of council assets, rather in their long term lease so they still have a revenue generating potential for council.

I do agree with these two points:

Changing the timing of some capital spending

Implementing cost reductions in the form of efficiency savings and potential reduction in some services

I Do not agree with the 3 Waters proposal when Auckland already owns its water infrastructure. 3 Waters should not have been forced on councils in its current form. I am not against reform but not in it's current form.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: This is what council should have done a long time ago. I support the action but the devil is in the detail. I would like more say on which particular services should be prioritised. My overwhelming feeling is that council will not cut enough. I want council to stop trying to entertain Aucklanders, we are more than capable of entertaining ourselves. And tourists will do just fine without the help of council.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Yet again the question is too broad. A agree with some of the proposal but not all. Every time there is a change to waste collection there seems to be a stealth rate included and a rise in cost. Primarily my objection is ratepayers should not have to fund everybody's refuse collection.

Therefore, I do not want a rates funded system. I would prefer the flexibility of PAYT :

easier to budget

we can minimise our own waste

not pay if we are away etc

I believe people are more careful if they have to pay upfront rather than the cost of waste being buried in a rates payment. why should

I agree with the three bin sizes and the three bin types. We already use composting so do not require food scraps bins. As a priority I think the council should be involved in the vermicast (worm) farming initiative already availed of by the Rotorua and Waikato councils as an extremely effective way to reduce waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I absolutely DO NOT support the budget for 'Events that bring our communities together, such as Movies in Parks'. I consider this to be well outside the brief of council/local board. WE DO NOT NEED TO BE ENTERTAINED by local government. This kind of service can be provided by private business if there is a desire. It should be user pays. Stop burdening ratepayers more and wasting council money with these frills. Council is in deficit, this is such a waste of money and unnecessary. Local Boards should be on an austerity budget like the rest of business and families that are struggling since COVID started. Furthermore, event such as Movies in Parks are potentially super spreader events.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

What do you think of this proposal? Support

Tell us why: Anything that helps to address the climate crisis is a good idea, I think that this issue is top priority.

Interesting that one of the actions is to 'increase tree canopy cover in communities that need it most' but the proposed amendments to the RMA looks to permanently abolish tree protection rules for those not already named on district plans, this could result in hardly any suburban trees.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: in particular I support maintaining the previously agreed 3.5% rates increase, it's important for the council to be able to continue providing important services. Cutting expenditure further to enable a slightly smaller rates increase would be a bad idea

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Although my experience with the PAYT system is that it rewards you when you throw out less, I think a more universal system is more appropriate. It removes the hassle of having to buy and use bin tags and the ability to choose an appropriate bin helps cater to different waste needs.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Important issue that needs to be addressed, especially moving forward/liking at long term effects and solutions.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Not loving rate increase but understand the pressures and shortfalls.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I do think public should be consulted when deciding on priorities in some matters.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: While I don't love our PAYT system I do think it helps manage rubbish disposal. I know we are more aware of rubbish as a result of using tags. Wish recycling was weekly though.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Transport choices are the most important here.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Sale of non strategic assets need public approval first.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Have to re pay debt somehow

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: As we only put out one 60L bag every two weeks our rubbish disposal only cost us about \$70PA.

This new rates based system would cost us 7 times our current refuse disposal cost.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:It keeps the North Shore up to standard,.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Those multiple cameras installed on Onewa Road are the most expensive and ridiculous way to sort traffic flow problems. Proper traffic light phasing of the three traffic lights at the bottom of Onewa Road would make a huge difference with a miles longer green flow for Onewa Road,

What do you think of this proposal? Support

Tell us why: We are rapidly running out of time to make improvements- this is a key priority

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Common business sense

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Overall common sense approach needs to prevail here, no politicking just what is best for Auckland

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Because we put out a small bin once a month and run a compost bin, recycle soft plastics etc. We are just paying for lazy users. You are also actively encouraging people NOT to recycle etc by promoting this stupid idea

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: The supporting of community sports/ arts etc is paramount- they are the backbone of this ward. About time Glenfield got something after all these years of playing second fiddle

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I know this is a difficult task to have a plan and follow it, esp as we have had a pandemic throwing a spanner in. But I implore level headedness, no pork-barrelling nonsense please

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It's obvious you are following the rhetoric and Not the Science. How are extra taxes going to stop the Sun from heating the Earth, Volcanic eruption, Natural pollution by the Earth. I suggest you stop listening to the IPPC and follow the data from real Climate Scientists, your views would be overturned. Read, for example 'Unsettled, What Climate Science tell us, what it doesn't, and why it matters' by Steven E Koonin. Former undersecretary for Science, US Dept of Energy under the Obama Administration, then read the rest of his Credentials.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The best way to recover is to Drop the mandates, let people get back to work, earn some money which will enable a lot of people to pay taxes instead of the Raping and pillaging that is going on at the moment by both the Govt. and Auckland City Council. Drop the useless projects going on at present and concentrate on maintenance. I see AT is spending huge amounts on unused Bike lanes, multiple alterations to the same Roundabouts at a huge cost, I see the Northcote/Lake road circle for example. Leave Parks and Open spaces alone, do not sell. Additionally, listen to the local residents before jumping in with the normal hair Brained scheme that seems to be the domain of our Bureaucrats.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I agree the City needs a carefully considered budget and what should be done is that all departments should submit their own budgets based on What projects they have planned for the forthcoming year and NOT based on the previous years budget. We see useless non beneficial jobs being taken on just so they can spend the leftovers not already spent. NO Koha to the Maori which I consider completely Racist.

Their Qualifications and advice is not warranted OR helpful.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I prefer to use the Yellow bag service for food and waste. At present, for us, one bag per 2 weeks and one partially filled Recycle Bin per month - AND the choice of answers above are positioned to support the rates funded system which I find is a dirty way to get opinions. Just relook at at the way those choices are worded.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: One example is the protection of the park areas in Little Shoal Bay and adjacent Dudding Park. There are forces within the council to do away with the park and facilities allowing the area to return to nature. If this were the case we would lose an area which is used prolifically by Families and will incur future high costs. i.e. relocation of the Main Sewer, allowing the poisons in the ground to leach and be swept into the Bay by tidal movements and also kill the Native vegetation and fresh water fish inhabiting the swamp in LeRoys Bush. The cost to repair the neglected pipe tidal gates is a far better, and cheaper option, something completely ignored by the ACC engineering Bureaucrats.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Get rid of the Maori co governance of our parks, gulf and recreation plans.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Whilst I appreciate Climate Change impacts to Auckland (and elsewhere) I do not accept the authority of the city of Auckland to be held responsible to address these at my expense, when the greatest polluters of the world are not addressing there actions for 40-50 years.

I am strongly against paying for severe climate actions when they will have little to no affect on Climate.

I am happy to present direct submission in person on this matter

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Ongoing prudence is required, especially when ratepayers are also under the same controls.

Any rate upward pressure CANNOT be met by ratepayers.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Prudent const management is to be applauded.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: A PAYT system is fair, however unlikely that all sectors of the community will follow these rules (dump rubbish elsewhere). What would be fair is a rates based system, that takes into account the fair usage by property type (in size or occupation) that also does not disadvantage those in the community that have large houses, with little rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I am totally and fully against any differentiation of service or representation based upon race, culture or citizenship.

I believe Auckland Council should distance itself from any breaches to the Human Rights Act 1993, which to be clear does NOT support the current central government intent to demonise non-Maori.

Not people are disadvantaged by the Electoral Act 1993, which allows for fair proportional representation for all peoples, views and backgrounds also supported by the Constitution Act 1986. Only then can the city elect representation without bias or apartheid.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT puts the decision-making power in the hands of the end user. As a renting family, we need two bins and want to be free to have this without our landlord having to sign off on it. It also incentivises waste minimisation. I would like to see the tag / bag system replaced with something more sustainable e.g. RFID chips or permanent tags linked to an account, for example. An account would be helpful as it would allow me to put my bin out even if I forgot to buy a tag - a current pain point for me as someone who lives in a PAYT area.

Question B

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: All these recommendation cost more than benefit the Auckland rate payers and are based on overseas studies that are not like Auckland at all.... i.e based on wrong studies

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: This "Continue work on the sale or long-term lease of non-strategic assets as required" don't agree with selling Assets that was purchased with rate payers money and now council will sell them to who they know!!! without any consideration to actual owners (the rate payers) this is became a norm now in council!!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The current situation is good as every one pay for their own waste, changing that means many people will pay for others waste!! in addition to that the waste management group will spend the money as they like not necessary what they should spend it on !! they have been doing this for years due to lake of auditing and accountability... Time to check where and how the moony is actually spend...

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need improvements to our public transport system to entice more people to use public transport over cars, particularly since it's more convenient and less time consuming to drive.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: COVID-19 has greatly impacted our community financially, I think these proposals will allow Auckland Council to continue to improve the city without putting too much pressure on residents.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: This will make our waste service a streamlined 3 bin service that will enable Auckland residents as a collective to reduce their waste rather than as individually holding residents accountable for their waste under PAYT.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I agree that better infrastructure for cycling and public transport is essential to reduce greenhouse gas emissions, and I am prepared to help pay for them

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Council should not be hamstrung by a tight borrowing limit to satisfy credit rating agencies. We should be willing to borrow for long- term investment and also in tough times.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I do not support reducing any important services for cost reasons

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Polluter-pays policies are an effective way, in principle, to reduce waste. If the current rubbish tag system hasn't worked due to private competition, it doesn't mean we should abandon it; instead we should look for ways to make it more effective, e.g. cash paybacks to households that throw out below-average amounts of rubbish for the size of their households, more education about how to buy less and throw out less, etc

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Council's top priority right now, after tackling climate change, should be eliminating homelessness by investing massively in social housing - both pensioner housing, as council has done historically, and general social housing. We have a desperate shortage of social housing. Low income families and individuals are either forced to use foodbanks and other charities because they can't afford to pay outrageous private rentals, or forced to wait for years in motels and transitional housing - in both cases because there just aren't enough social houses. Central government is doing some work, but it is building only 100 state houses as well as 200 private houses for every 100 state houses it demolishes. Local government needs to step up by both building and buying/leasing houses to eliminate the social housing waiting list in this city as soon as possible!

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I want the planet to be habitable for my children as they grow up and grow old. We are in a climate emergency, and I want urgent action now.

I would rather pay a little now than pay a lot later for the consequences of climate inaction.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Are there other options to generate revenue from assets held by the Council on behalf of the people of Auckland? Once an asset is sold you can no longer generate revenue from it...

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Using a PAYT scheme rewards people for not generating waste - less waste saves them money. Moving to a rates funded scheme does nothing to incentivise people to reduce waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

What do you think of this proposal? Support

Tell us why: We need to go hard and fast with climate mitigation efforts. As evidenced by the national plastic bag ban, there will be anger about things like bike and bus lanes, but adjustment will happen relatively quickly. Every day we delay significant changes, and bend to hostility by NIMBYs, will cost us more in the future.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We are a family of 4 (including two teenagers). We already compost, and have a worm farm, and we intentionally reduce our waste and consumption. Even with our reasonable family size, we put out rubbish for collection over every 4-5 weeks. Beyond the threat of climate change, the PAYT scheme is also a strong motivation for us.

I don't like the plastic tags, but the relative increase in rubbish volume from making people completely disconnected from the cost of their consumption will prove to be a far worse problem.

If you truly intend to reduce waste, you need to make it more painful to use and throw things away. I'm happy to see food waste collection, but otherwise this proposal is not the solution to reducing waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I do not want to have to buy tags (and is why i currently don't use council waste services for general rubbish).

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I love electric buses. I use buses when ever possible and am ev otherwise

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: No reduction in service or selling of assets use other levers. Getting both of those back later is just more expensive.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Putting services back is just more expensive later

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Well pay as you go kinda reduces waste but means shitty people just dump there stuff wherever. Better to just standardize collection in rates to force it to happen. Should offer green waste collection as well or subsidise worms bins to reduce the general waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:But not taking away riparian rights

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It is absolutely essential to meet these targets as it is beneficial in the long run. Allowing more modes of transportation (e.g. walking and cycling) will encourage more people to stay fit and off the road. This mitigates private car uses and decreases carbon emissions. Improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services will also incentivise Aucklanders to choose reliable and transformed public transport.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: LAND VALUE TAX, please!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Cut the cost of Councils. Active community members should do the planning in their localised suburb or suburb catchments. Weekly meetings should be planned. Community-based and sources solutions, bottoms-up approach instead of top-down.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Rates funded system is very good. Less problematic. Integrating paying the bins through rates removes the burden of going to the supermarket to buy bin bags. If it's good for the environment then it's good for everyone.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Anything good for the environment and the economy is good for everyone and everything. The plan is simple and I hope it's effective.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I beg the local government(s) for a Land Value Tax.

What I Say For Auckland

A good city requires solutions that keep up with the needs of the present without hindering the needs of the future and the continuance of operation for long time scales. Making Auckland sustainable, solutions must derive from social, political, economic, and cultural implementations.

An excellent social solution would develop obligatory grants that rehabilitate impoverished suburbs. Low-income households tend to concentrate in cheaper neighbourhoods of deprived spatial connectivity, impeded opportunities for employment, insufficient social services, and lack of safe public spaces. Impoverished suburbs, such as those in South Auckland, are deprived of living sustainable lives as they lack self-fulfilment, psychological, and basic needs. Developing grants through collective and individual donors, foundations, and tax revenues, would improve the suburbs' infrastructures; more cycle lanes, expanding pedestrian zones, and funding modes of transport that are energy renewable. As a result, schools, medical centres, libraries, and community centres would be more accessible. Enhancing spatial accessibility strengthens the community's resilience by accepting beneficial changes, utilising innovation, and engaging in diverse resources offered by these communal spaces. It will inspire the disadvantaged on becoming active agents of conceptualising sustainability and become effective stewards of the needs of the future generation. They have the potential to be influential motivators for environmental and social change by redistributing this knowledge to their family and peers. Diverting monetary capital to projects in these deprived suburbs creates an equitable condition that encourages the affected to live sustainably. Accessing these sites by granted infrastructure improvements will form a more resilient community that will sustain social capital and rehabilitate neglected suburbs.

A brilliant political and economical solution would be establishing policies that increase the taxes for land values and development that contribute to Auckland's urban sprawl and subsidising density development. Urban sprawl generates the permanent loss of agricultural land, the destruction of natural habitats already under-stressed, increased dependency on cars, and the segregation of the socio-economic makeup of neighbourhoods. Auckland's expansion is necessary to alleviate the city's housing crisis. However, setting policies that tax environmentally destructive developments and subsidising sustainable developments that build up is beneficial to solve the troubles. It incentivises developers to efficiently utilise the land for density housing, leases, and other purposes, while also preventing the environmental cost of local habitat destruction and travelling further distances through fossil-fuelled transport. Urban developers should create spaces that develop community cohesion and alternative ideas to foster. Building higher means raises the capacity for people to be in closer proximity to their desired places. Increasing housing density will provide affordable places to live, fulfilling Maslow's

'Hierarchy of Needs' and providing the housing supply with the contemporary market demands. Furthermore, these developments would allow more people to invest in residences, rentals, and leases that would lessen the wealth gap of Auckland. These developer tax and subsidy policies will improve city dwellers' necessities without permanently destructing the local environment from urban sprawl.

An admirable cultural solution would be the required integration for developments, restorations, and refurbishments of sites to implement sustainable values. Cities such as Auckland are becoming more disconnected from the natural world, making people unaware of how humans depend on the goods and services that the natural world provides. Examples of this connection would require locally grown lumber in buildings, rain or greywater collection systems, installing an energy-efficient central thermoregulation system, fitting renewable energy on the site, and applying vegetations that would complement the local ecology promote biodiversity. To lower costs, the required materials, and resources for constructing these sites could be exempted from taxes. Spaces that work with nature focuses on human beings creating ideas about their relationship with nature. Setting environmental areas will influence the emotions and values of how people live their lives that align with ecological limits. This obligation is aligned with the Māori values of mutualistic reciprocity and kaitiakitanga, living as part of the environment. Human nature adapts to normal behaviours by picking up contextual established rules upon society. Natural spaces should be integrated into Auckland's urban developments, restorations, and refurbishments to reconnect the city dwellers with nature in the long run.

An exceptional social and political solution would be revitalising the Auckland Council governing system, giving the people more power. Concentrating environmental responsibility on more minor scales may lead to the narrowing of dangerous perceptions that are not sustainable because this narrowing of minds undermines the capacity for society to act effectively. Decision making of neighbourhoods should be done through participatory democracy. The 149 Members of 21 Local Boards should be dismantled and replaced by the people willing to participate and who resides within those Local Boards. Successful systems require trial and error schemes or practice runs. This solution allows the engagement of interdisciplinary dialogue, community bonding, and active participation that fosters the system's longevity. Coordinating land activities and management within catchments can help people appreciate their surrounding environment, cooperate with others, and provide long-term solutions. This solution delivers the people more power. Diversity is needed for true democracy. Humans have strong tendencies to collaborate for positive payoffs and motivate other individuals to participate, joining intentions to pursue a collective goal. The collaboration of people within Auckland Local Boards will inspire many to actively participate in solutions that matter the most to the environment in which their homes are.

Good infrastructure improvements through sustainable grants will form a more resilient community through social and spatial connectivity. The proposed land value and developer tax and subsidy policies will improve the needs of city dwellers without impeding the local environment from urban sprawl. Integrating natural spaces and renewable functions should be mandatory for Auckland's urban developments, restorations, and refurbishments, to reconnect the city dwellers with nature in the long run. Local cooperation of people within Local Boards will encourage many to participate in long-term decision-making that includes the environment in which they reside without hampering future generations. These solutions ensure the city of Auckland is sustainably good in a social, political, economic, and cultural manner.

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: It is critical that KLB invest in permanent baseball infrastructure at Stafford Park in Northcote Point. For health and safety purposes, this should include a permanent backstop capable of more effectively preventing balls from

exiting the field of play and landing on or amongst spectators, parked cars, neighbouring properties, and other users of the park. The current netting based system is full of holes and extends insufficiently far down the baselines. In addition, the backstop should include home and away dugouts for both player safety and protection from the sun. Additionally, moveable outfield fencing should be provided to prevent balls from being hit onto nearby roadways. Although the health and safety need for this infrastructure is paramount, it should also be noted that all of these items will improved the recreational capacity of Stafford Park for baseball purposes. Baseball is a growing, diverse, and inclusive sport and Stafford Park is the only baseball facility for those aged 14 and over currently operational on the North Shore. Even as other facilities are developed it will continue to be put to more and more use for both training and competitive games across a range of ages and grades. In short, Stafford is one of the most heavily used baseball facilities in Auckland but is also the most run-down, dangerous, and unsuitable. It is critical that capital improvements be undertaken during winter 2022 for use in the 22/23 season from October 2022.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Dont support the rate increases. They will increase anyway because of the inflating house prices the last few years. Auckland rate payers cannot afford 3.5% on top of the fast increasing property market

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Do not use the proposed amount that the rates would cover (only put out rubbish and recycling once a month). Would be a lot more cost effective for our household to keep the current PAYT system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: It is critical that KLB invest in permanent baseball infrastructure at Stafford Park in Northcote Point. For health and safety purposes, this should include a permanent backstop capable of more effectively preventing balls from

exiting the field of play and landing on or amongst spectators, parked cars, neighbouring properties, and other users of the park. The current netting based system is full of holes and extends insufficiently far down the baselines. In addition, the backstop should include home and away dugouts for both player safety and protection from the sun. Additionally, moveable outfield fencing should be provided to prevent balls from being hit onto nearby roadways. Although the health and safety need for this infrastructure is paramount, it should also be noted that all of these items will improve the recreational capacity of Stafford Park for baseball purposes. Baseball is a growing, diverse, and inclusive sport and Stafford Park is the only baseball facility for those aged 14 and over currently operational on the North Shore. Even as other facilities are developed it will continue to be put to more and more use for both training and competitive games across a range of ages and grades. In short, Stafford is one of the most heavily used baseball facilities in Auckland but is also the most run-down, dangerous, and unsuitable. It is critical that capital improvements be undertaken during winter 2022 for use in the 22/23 season from October 2022. Any delay risks damage to property, injuries to participants and others, and a decline in recreational participation in the KLB community.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I submit that it is critical that KLB invest in permanent baseball infrastructure at Stafford Park in Northcote Point during the 2022/23 capital cycle. Specifically, during winter 2022 in support of the 22/23 season from October 2022.

For health and safety purposes, this investment must include a permanent backstop capable of more effectively preventing balls from exiting the field of play and landing on or amongst spectators, parked cars, neighbouring properties, and other users of the park. The current netting based system is full of holes (including from council mowing contractors) and should not have been used in the 21/22 season due to its poor condition. Furthermore, it extends insufficiently far down the baselines to prevent hard hit balls from exiting into spectator and benched player areas. This backstop should include built-in home and away dugouts for both player safety and protection from the sun. Stafford currently has no built shelter from the sun. Additionally, moveable outfield fencing should be provided to prevent balls from being hit onto nearby roadways.

Although the health and safety need for this infrastructure is paramount, it should also be noted that all of these items will improve the recreational capacity of Stafford Park for baseball purposes. Baseball is a growing, diverse, and inclusive sport and Stafford Park is the only baseball facility for those aged 14 and over currently operational on the North Shore. Even as other facilities are developed it will continue to be put to more and more use for both training and competitive games across a range of ages and grades.

In short, Stafford is one of the most heavily used baseball facilities in Auckland but is also the most run-down, dangerous, and unsuitable. It is critical that capital improvements be undertaken during winter 2022 for use in the next season. Any delay risks damage to property, injuries to participants and others, and a decline in recreational participation in our community.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The declaration of a "Climate Emergency" in 2019 and now the inevitable "targeted" rates rise are a two-step process of internationally competitive virtue signalling at the expense of the ratepayers. Zero effect on the climate, zero benefit to Auckland residents, maximum preening vanity for the Mayor, the Councillors and the bureaucrats. And no one on the Council has the integrity to challenge it. The only action worthy of support is the increase in the tree canopy, as long as it is natives. This could be done in the normal course of council work without any rates increase.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Auckland Council is a by-word for bloat and waste. In the 12 years since amalgamation, which was going to deliver greater efficiencies and cost savings (well that's what the Tui billboard said), our rates on the same property have gone up by 64% vs general inflation of 24%. The bureaucrats have no intention of shrinking their empire and the elected councilors are happy to go along for the ride.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The priorities are pretty much a statement of the obvious. A pity the council doesn't stick to them.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The present PAYT system on the North Shore works well. We are a two adult household and find the yellow bags much more convenient than a bin. We are quite conscientious with recycling so a rubbish bag lasts us about three weeks. Total annual cost about \$50.00, less if we go away on holiday, which is usual in non-Covid times. We have absolutely no requirement for the food scraps collection "service". The very word "service" is a calculated insult. A service is something which is optional and which one avails oneself of as required. We don't require it. Our vegetable scraps are disposed of on the property, meat scraps go in the freezer for fishing burley or into the yellow bag immediately before collection. We seriously object to paying \$71.00 for a compulsory "service" which we don't need and don't want, plus about an extra \$100.00 for normal rubbish collection. Yet another Council money grab, and the last thing we want on the property is two more bins in addition to the recycling bin. Needless clutter. The hypocrisy is truly breath taking - on the one hand the council virtue signals about "zero waste" while on the other hand it proposes removing the PAYT system which provides a real incentive to minimise waste. The present system on the North Shore offers choice, discourages waste and is cost effective. Leave it alone.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I have some confidence in the local board to act in the interests of the local residents.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Not sure what their priorities are...

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Action on Climate change. Upgrade northcote library. Protect the ecology of little shoal bay tidal flaps don't work.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Cost of living is already high enough in Auckland, adding more rates is counter intuitive. More needs to be looked at with the council's overspending on internal matters before adding more rates.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: As above, you would not be in deficit if you accurately used our money and salaries were not exorbitant in the public sector.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: As above, you would not be in deficit if you accurately used our money and salaries were not exorbitant in the public sector.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It works well pay as you need to, then if you need to adjust bin size dependent on need week to week you can.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: The above are just buzz word statements that don't actually state what the plan is, how it is to be achieved and how fiscal oversight will be maintained.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our household of 2 adults try to minimise our waste. We compost and recycle which means we only need to put out a rubbish bin every 5-6 weeks. The proposed change will do nothing to encourage people recycle and penalises those of us who only need to buy a rubbish tag a few times a year. Not a fair system at all.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Can only hope this improves the services offered by AT, as they are currently one of Auckland's biggest jokes. Busses just disappearing into the void, people left for extended periods of time deliberating over the cost of a private vehicle or ride sharing apps.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Functionally could be more useful, less chance for failure, can be more readily budgeted for tighter cost situation families.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I submit that it is critical that KLB invest in permanent baseball infrastructure at Stafford Park in Northcote Point during the 2022/23 capital cycle. Specifically, during winter 2022 in support of the 22/23 season from October 2022.

For health and safety purposes, this investment must include a permanent backstop capable of more effectively preventing balls from exiting the field of play and landing on or amongst spectators, parked cars, neighboring properties, and other users of the park. The current netting based system is full of holes (including from council mowing contractors) and should not have been used in the 21/22 season due to its poor condition. Furthermore, it extends insufficiently far down the baselines to prevent hard hit balls from exiting into spectator and benched player areas. This backstop should include built-in home and away dugouts for both player safety and protection from the sun. Stafford currently has no built shelter from the sun. Additionally, moveable outfield fencing should be provided to prevent balls from being hit onto nearby roadways.

Although the health and safety need for this infrastructure is paramount, it should also be noted that all of these items will improve the recreational capacity of Stafford Park for baseball purposes. Baseball is a growing, diverse, and inclusive sport and Stafford Park is the only baseball facility for those aged 14 and over currently operational on the North Shore. Even as other facilities are developed it will continue to be put to more and more use for both training and competitive games across a range of ages and grades.

In short, Stafford is one of the most heavily used baseball facilities in Auckland but is also the most run-down, dangerous, and unsuitable. It is critical that capital improvements be undertaken during winter 2022 for use in the next season. Any delay risks damage to property, injuries to participants and others, and a decline in recreational participation in our community.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The council has not so far reduced its spending on employees/pay rises/AT spending on unwanted projects Thus it needs to cut its spending before it seeks a rate rise second since ferry services are privately owned companies why should the rate payer pay for their infrastructure same would apply to bus and train services since the rate payer already pays to use thdd Ref m this they are making a profit already

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The council is a bloated organisation with wasteful expenditure on unproductive infrastructure spending like the cbd upgrade and experiments also in the pandemic every organisation had to curtail spending and salaries the council did not do this but increased salaries and expenditure

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Only critical services need to be undertaken with reducing workforce and optimal use of existing resources first

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Stick to pay as you throw no rate increases

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Because they do not carry the majority and no feed back id taken from the entire community on projects it's on the liking of the local board members and influence groups

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: I support the reduction in transport emissions, but I would like to see an increase in light rail solutions rather than buses as a way to future proof Tāmaki Makaurau and meet the needs of the expected population boost especially on the North Shore. I really like ferry services too. Increased provision for walking and cycling lanes is a must and these should be developed with women's and children's safety in mind, especially routes after dark. E.g. the Northcote (whale) bridge that goes from Onepoto Domain to Onewa Road is gorgeous in the day and connects residents to major bus routes, but is a dark and isolated track that presents a potential risk so is avoided by many.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I don't know about the Government's Better Off support package so I can't comment on this. Not sure about the other levers.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I think there are areas where Auckland Council need to invest more e.g., the area of family violence. I have concerns that reducing service delivery will further hamper essential services to the community and compromise safety and wellbeing for Aucklanders.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think waste management is an essential service and has benefits for all Aucklanders when people dispose of their waste regularly and thoughtfully. Not managing waste for weeks until the bin is full because of cost impediments could have issues for our most vulnerable residents. Everyone should be able to have their waste removed so that we can continue to keep pests (e.g., rodents, flies etc) to a minimum. Remembering and affixing bin tags can be challenging for some.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I'm unsure why Glenfield has been singled out for additional focus and think it would be good to ensure that needs are equitably met across the LB.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

More addressing of inequities. More support for women and safe spaces. More support for people experiencing family violence. More free/low cost activities close to home for families and residents e.g., movies and music in the parks is great, sporting facilities.

Better and more cycleways. Better and more light rail options for the North Shore.

We have great parks and walking tracks!

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It looks like this is going to be much more expensive for myself and many others who only put out rubbish every 4-6 weeks. Seems your calculations to charge for this service is based on a household putting their rubbish out every week. This also doesn't encourage people to reduce their waste which a lot of people now try to do so they don't need to put out their rubbish bin/buy tags/bags. I currently buy the orange tag and cost to me per annum is less than \$50. So unless the Waste Management cost in my rates only goes up by \$50 I do not support doing away with PAYT.

Question B

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It's totally unfair for people who use the garbage collection only every 2~3 weeks. I use 6L garbage bag every 2 to 3 weeks (around \$50 per year), why would I pay more (more than \$100) for other people who use garbage collection more often? In your proposal you're saying "Reduces your rubbish and may help you manage with a smaller rubbish bin for a reduced cost.". It doesn't make any sense. If I need to pay more rate to cover the garbage collection, I will definitely produce more garbage. I never see a country use the rate-funded system to reduce the waste. It's kind of joke. Collection for food scraps doesn't make any sense either. I don't have ANY leftover, why do I need to pay \$70 buck for this BS? Anyway, I know no one would listen to me...

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think that any measures Auckland Council can take towards a more secure future regarding our climate and environment, are measures well worth taking. The rates seem reasonable and equitable whilst not burdening any one group too much. I am a large supporter of electrifying our public transport fleets, so was very happy to see these initiatives mentioned in the budget once again.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Finances are definitely not my strong point, but I am overall happy with how this portion of the budget looks. Prioritising spending seems like a very smart idea, particularly when considering how much support local businesses will need in the recovery period from COVID economic pressures.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: This seems like a pretty straight forward and self explanatory approach to prioritisation

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Living in a PAYT area, I have seen the hassle that it is for my parents to have to go to the local shops to buy tickets to put on the rubbish bins. I think a standard rate would provide more regularity and certainty over rubbish collection whilst mitigating some of the logistical challenges that the PAYT system poses to homeowners.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Each of these seems like a reasonable priority, and I particularly like that both protection of natural environment and heritage are amongst the top priorities. I think that preserving the beautiful natural environment in the area is so vital to ensuring that quality of life remains top notch in the area.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would just like to see a continued emphasis on climate action in the work that Auckland Council does. It is reassuring to see some measures in place in this budget like the investments in hybrid and electric ferry services, but would like to see these policies progressively get more and more ambitious.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because we face an existential crisis if we don't

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My family of 4 have a small sized council bin that we empty at most once a fortnight. We do this to encourage reducing waste and cost. The proposed system defeats the purpose of this, increasing the cost and at the same time reducing the 'reward' for reducing your waste. It's nonsensical.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: In making a sweeping charge across the board you are unfairly prejudicing people who may already contribute in other ways, people on fixed incomes and pensioners

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The majority of auckland rate payers did not agree to the rates rise in the first place

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: No consultation

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Cost would increase hugely for my single person household. Those who already put out minimal waste and compost at home are disadvantaged.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Managing budget pressures should be a key item every year.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: To be honest it sounds like a lot of waffle. What matters is how it is actually applied. If applied well then the results will be great.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: The priority should be the elimination of waste! The best systems should be in place to eliminate waste, pollution and reduce the growing infrastructure required to manage waste. Paying for it might not be equitable. A greater investment should be made towards avoiding waste in the first place rather than disposal of waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I support all but heritage protection because I assume that it will be based on colonial heritage. I would greatly support advocacy of the stories of the mana whenua pre-colonial times.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I find the local board very good and active - thanks.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Transport models are still stuck in an old model that ignored the costs and realities of the climate emergency that Auckland Council has rightly recognised.

Having gone down to a one-car family, I still find it difficult to fully get around this city with active and public transport models (especially here on the North Shore, and ESPECIALLY with easy links from the North Shore into the city centre and other parts of Auckland). We need a high-impact, large-scale change and directly ringfenced funding for this is urgently required.

This is just a start and needs to move into implementation as rapidly as possible.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I am afraid rate funded system will not encourage people to reduce their rubbish and they will put the bin on the kerb regardless how full/empty it is creating more work during collection. With PAYT, we wait our medium bin is full to put in out for collection so we make the most of the bin tag. 120/140L every 3 weeks for an household of 5.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Auckland transport needs a change of management. Millions of dollars is being misspent due to lack of forward planning. Example, Northcote roundabout, Raleigh rd planned buslane (this road recently had a \$million makeover)

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Stop things like whales tails!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT is the only way to make people think about their rubbish.

Making the charge part of rates is not fair on low users. Rents will go up. Only PAYT is fair on all users.

Do we really need weekly pickups? Can you increase tag prices? In new housing areas can we have PAYT or even free street bins? As they have in the Netherlands? (I can translate if needed)

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to take action now. The plan should go further and faster to meet our climate goals and I believe the rate must be implemented this year - not delayed to 2023.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We need to take climate action now - this year - not wait till 2023.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: the poor are getting poorer... reduce our taxes

3. Prioritising operating spending

What do you think of this proposal? Do not support

Tell us why: The Council has already spent unwisely on- eradicating mature trees which support Flora and Fauna, due to Developers desires, or through the replacement of these trees with not yet mature native trees,(instead of doing so in a graduated way. Even the old pohutukawa above Judges Bay is not exempt. I remember a townhouse complex was going to mean the death if old mature trees in Owens Rd Epsom in the 90s and public lical pressure put a stop and the design incorporated thE huge trees and was a beautiful feature of the complex. If people protest in a less moneyied area they are are denigrated as treehugging whack jobs. Ridiculous. Plans are not fully appraised, AT's dangerous bus stop placements that then are removed once the public notifies are an example of utter wastage. Didn't Council learn from the 80s greed that saw the relegation of significant buildings to the scrapheap, the horror of leaky Chase Corp buildings and the loss of heritage. Council and Board members need to notify rate payers and constituents to pit in submissions in Due Time- Kaipatiki Board recently didn't and made the choice for thousands of people with no consult., which should have voided their input. Also get rid if the non-compostable Council flyer that no one reads, and is irrelevant to our family- and many other people. Gloss without substance, just like the " free" family vouchers that not many took up- reason- website lacked clarity and info could jot be corrected amd events were still too expensive for many families or events have no public transport to them.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We have composted, sorted our soft/ plastics and have little rubbish- all things Council pushed we did and now we are to be penalised for this- we put out our rubbish bin once a month at most, Recycling likewise and pay by tag- forced in us in a decision that just appeared to happen. Now there will be no incentive to do this- shall we just dump everything in the bin and think we did our bit for twenty years - bugged it? Give us an option. You are putting up valuations to properties, insurance goes up, so for some of us Especially the disabled we will again have to not eat so our kids do - or move to a more liveable area - away from our birth city, whanau, elderly who need our care and medical professionals. Throwing more money at vanity projects is not going to stack up.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Lack of operational forethought, stupidity over centre at Marlborough Park (no alarms) and desire for vanity projects, ignoring the crime in the neighbourhoods as if it doesn't feature with designs, premises allowed- (the proliferation of vape and liquor stores) does not make the neighbourhood as safe as could be, money is put into higher decile areas- you only have to look at the types of council kerbside plantings to see how this differs from high income to low income areas yet we pay Council and the boards wages too.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

More transparency and perhaps make the board members jobs no pay- like those for ratepayers who are involved in restoring Kaipatiki to predator free, work on planting days ect . That would save a few million dollars.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Because you are punishing those of who who actively do all we can to minimise our waste, buy our reckoning we will be paying twice as much as we do today on the new system. So from the change why should we bother reducing our waste if we can just put the bin out every week?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Just dont screw us over on waste when we do all we can to save the planet and money! you are punishing us with your ridiculous plans.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Something has to be done about climate change. Although I am on a restricted income I feel that it is worth stretching to this.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I have a compost and a worm farm and use the small rubbish bin (80 ltr). As I only have limited waste and it doesn't include smelly food scraps the bin is only put out about every 6 weeks. At a cost of about \$1.80 per coupon this is only about \$16/18 per annum. A fixed rate would disadvantage me and others of my ilk. It should be user pays. Should you move to fixed rate I will probably dispense with my green waste bin and put the garden waste into the rubbish bin. This would free up the garden collection money to be used for the general rubbish collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: You speak above about having to save money and cut back on some things. Looking at what is proposed for this Board area I wonder if everything is necessary. For example, the research project working with businesses in the Wairau Valley - what on earth is this about!!!

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It is great that food waste bins will be available for everyone going forward but i don't think standardising the whole waste disposal plan is the solution. Our household of 5 is currently running three different composting solutions which means we have no food waste that goes into the bin. We are also conscious of how much rubbish we produce and recycle wherever possible. We only put our small general waste rubbish bin out every 3-4 weeks. The proposed plan is actually costing us more money than what we currently pay for our bins. A lot more. And we are not the only family. Especially young families are trying to do their bit by doing as much for the planet as possible because it will ultimately impact our children and grand children. Adding more cost to that part of the population that is already struggling with high house prices, etc feels really unfair. i think people should still be given the option to opt out. This could be done with different coloured bins or lids to make it easier for truck drivers to identify who should be paying with labels. If everyone pays to put their bins out every week people will most likely produce more waste because what is the point in being waste conscious if you pay for rubbish anyway.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Key strategic issues facing Takapuna District Cricket Club and our Submission Points:

Due to the growth in our player numbers and participating teams (2015: 658 playing members to 2021: 1351 playing members), there is a major lack of training facilities for our members at our club grounds at Onewa Domain # 1 and #2. Therefore, we would like to request that new training lanes are to be installed on Onewa # 2 to cater to more training facilities for our players.

Currently, we have only one grass pitch at our club grounds at Onewa Domain # 1 and no grass pitch on Onewa # 2. As per the Auckland Cricket playing conditions, all Premier team games are to be played on grass pitches. Therefore, due to the non-availability of the second grass pitch, our Champion Premier women's cricket team are compelled to play all their home games away at Hobsonville War Memorial Park. We request that a two-strip grass block be built on Onewa # 2 and this will give our club the opportunity for our women's teams to play at our club grounds and this will give us the opportunity to promote more girls and women's cricket to our Community.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: It's really important to support local sporting facilities as a part of building a strong community. In relation to the Onewa Domain parks and due to a number of years of under-funding, Takapuna District Cricket Club facilities are

now so over-subscribed that the club can no longer provide access for all players in its community. There is a need to expand and improve training and playing facilities to help the club fulfil it's role in building a strong community.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Not a local government responsibility. Such spending has not been authorised or agreed by ratepayers, who are the Council owners. There should be a referendum.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The Council can reduce spending far more than is claimed or aimed at.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Only partly support. The Council can do far more to reduce spending. Cut climate spending altogether.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We cannot continue with the status quo, and expect the world to be fit for our children to grow up in. This will require some hard changes, and some that will cost money to implement. If we all pay a small portion through our rates that will help everyone to find it easier to embrace those hard changes.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: The impact of Covid on New Zealand and the world had meant that budgets are affected. Residents of Tamaki Makaurau expect a certain standard of service, and for this to be maintained when revenue has reduced means that the funding needs to come from another source. We have been privileged to only require around 50% top up from rates compared to all other councils in New Zealand, so while this may feel like an extra burden, we have in fact been paying less than many others for years. Some might argue that council should cut more costs. If you look at the evidence this has been done quite significantly already, and there is a false economy in cutting any business too close to the bone. Perhaps a better understanding of what council actually does, and what the money is spent on might help people understand the rationale for this strategy better.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The description of the methodology makes sense, as long as significant changes are well signaled and any consequential greater impacts considered and publicised.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The cost benefit is based on putting a bin out every week. I do not believe this will encourage a behaviour shift to achieve zero waste. When I paid for my rubbish in my rates, I had no regard for what went in the bin and put it out weekly. I am now on user pays and I put my bin out monthly or even six weekly therefore I will be significantly impacted by a rates increase if this happens. I am pretty sure most people don't put their bins out weekly based on what I see in my neighbourhood.

I also do my own composting and don't really want to pay for a service I will not use. However, I'd be happier at making this donation for the greater good to reduce waste than I would be to pay for a weekly bin service that does not reward me for good waste management.

My preference would be for all of Auckland to move to pay as you throw - this will push/encourage people to manage their waste better. It would be expensive - and this budget is about finding savings - but investing in new bins with inbuilt cost tags that can be read by the truck would be the ideal solution. The current bin stock is really old and keeps failing and needing repairs, so potentially there could also be a cost benefit in replacing them all.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

- Standardise the opt-out rules for residential multi-unit developments (10 or more units)** Support
- Standardise the opt-out rules for residential and lifestyle properties with between two and nine units** Support
- Standardise the opt-out rules for non-residential properties** Support
- Apply a minimum base charge to every separately used or inhabited part of a property** Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Investment to date in this area has really transformed our parks, reserves and local shopping areas, and I am fully supportive of this continuing in the same way. We are so lucky to have beautiful paths to walk through so many stands of local bush, which have also been designed to keep kauri safe. Maintaining and continuing this work is money well spent. With the last two years of lock downs and societal change we are all spending more time in our local neighbourhoods so enhancing them is a good thing.

6. What is important to you?

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Budget shortfall is due to govt imposed lockdown resulting in the taxpayer supporting people out of work, when lockdowns should not have been imposed when science dictated that covid isn't a pandemic.

Having dealt with government departments related to rates enquiries, the process has been inefficient at best, dreadful at worst. There is so much wastage at government level so cut staff costs at Auckland Council.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: public transport network needs to considerably increase to make it feasible to use for travel to and from work for people who work in multiple places. More trees are definitely required. I am concerned that the new trees planted need to be left and not later be removed (as recently happened at Sanders Reserve).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I think the focus should be on waste minimisation not standardisation. I think that PAYT has a better chance to reduce waste but I agree it should be only 1 provider for the PAYT not multiple providers driving the same route.

Rates funded also does not incentivise renters to reduce their waste as their rubbish cost will become part of their rent and therefore an 'unseen cost'.

I support food scraps collection but I feel it should be an "opt-in" scheme for those who need it.

Creating and supporting many local hubs where residents can recycle/rehome/compost much of their waste (such as those which are appearing at many community centres) may help divert further waste from landfills.

Education needs to be a big focus to help people know how to minimise waste, why it's important and what the alternative disposal options are.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This new tax is adding another \$150 per year to our already extremely expensive rates bill of \$6,601. Although it has good intentions I don't think it's justified.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I do not support this Government's Three Waters proposal so the \$127 million of "better off" funding from 1 July 2022 as part of central government's Three Waters Reform Programme doesn't seem quite right.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I think we should prioritise in the areas we need it the most i.e traffic congestion. Things like planting spiritual healing plants under the Climate Action Targeted Rate should not a priority.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I think the Food Scraps targeted rate should be optional. We already manage our own compost system so to me this is a double up and not keen on another additional charge for something we don't need.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

What do you think of this proposal? Support

Tell us why: I am 28 years old and am concerned about the state of our climate, and the massive implications of climate inaction on future generations. We need to urgently shift to a low carbon, circular economy - and we require significant change (and funding) to do so.

Transport / mobility efforts need to incentivize biking and cycling, make this more attractive and timely. This would result in a reduced need for private vehicles (with non-carbon intensive transport options being just as convenient as private transport).

Use of the fund needs to be front-loaded so that the most gains can be seen before 2030.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think it is essential that we make change for climate action. As a ratepayer, I understand that I will need to help fund this.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Without any detail into the services that you propose reducing or any indication of assets that may be sold off - it is impossible to provide support or not.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support the criteria but without a view of which areas you plan to make reductions in - please see feedback above.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The current schemes are confusing and it will be good to have one set of rules across all of Auckland.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:The plan continues on with the current plans which are delivering well for our community.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I just don't understand how you can continue to force additional costs onto rate payers when we're already battling with ridiculous CV increases this year and fuel taxes and prices through the roof.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I don't support rate increases at all - if anything they should be dropping. We are paying through the teeth for very few services. You consistently punish hard working New Zealanders

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I'm not really sure on this, I read the related material but don't really know what it relates to. I'm all for minimising costs and being efficient though. Do more with less.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I only support the rates funded system if we don't see an increase to our rates. On the shore we have been paying for our own rubbish removal separate to rates and it doesn't seem fair to hike our rates to then include a service the rest of Auckland have been enjoying this whole time. On the other side of the coin in an ideal world people would pay for their own waste separate to rates to encourage less rubbish overall - there would be the ones of course that ruin this system for the many and just dump their rubbish or steal other peoples tags or bins. I'm not sure what the solution is here. Perhaps some kind of incentive system would work better - a reimbursement or something to still encourage lower waste creation

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Affordable public transport of everyone, and clean water to swim in and enjoy for the future. Too many extra payments. So much wastage in processes and lack of communication with shareholders

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Lots of decisions have been far from cost saving as rate payers money is spent on unnecessary expenses. the amount of very highly paid council people that get "pay rises" when the are on \$200+ is a great example. Auckland should have an amazing city with the amount of high paid experts on hand. Pay should be done on results then maybe they would think about decisions more.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: No mention of over paid pubic servants and there ridiculous and unjustified "bonuses"

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Why would i support this as it doesnt encourage me to cut down waste. It punishes me the model says its costing is based on 52 collections a year at 6.15 for a 240 bin. We compost and recycle as much as we can and our bin goes our once or twice a month. the "new" system would cost use more and encourage us to "use" the bin every week. The spokesperson for the new system used the example of having to rush out and get tags for bin collection, if they cant remember to do that then how can they be in charge of a project this big. Spending other people money with little or no accountability is easy. Does not encourage less waste. More expensive about 3.5 times more for us. Not much faith in the head of dept that justifies the change when they can't remember to plan to buy rubbish tags.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: While immediate climate action is essential, council's slow spend this year on climate focused projects doesn't give confidence that it will deliver. The timing for this is terrible given the huge cost of living pressures. I would support this in 1-2 years.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It would reduce my grocery bill each week! Also well overdue to ensure all Aucklanders have access to council's waste service. It is ridiculous that after 12 years, waste services are still inconsistent with some areas (Whangaparaoa) still without council services.

Food waste in rates seems unequitable for people with home composting systems. Perhaps other incentives/discounts could be offered to those households to compensate?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Also support changes to use of Little Shoal Bay to adapt to coastal inundation and increase carbon sequestration through mangroves. The daggy boat yard needs a facelift and the cricket pitch is useless.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Thanks to every council staff member working through COVID!

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Not required as we pay for this in many other ways with petrol taxes etc.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The Auckland Council needs to cut costs and forget the fancy wants and just concentrate on the needs. Way to many staff and consultants (10000 plus) paid to much to run a small city by Worldwide numbers. Auckland needs a person with vision and clarity urgently that can steer the different arms of the council coherently

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: We need to stay with the core requirements of the council not cut services as in comment above.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This will increase rubbish with bins being filled and placed out every week if you are being charged for it in your rates.

Currently myself and numerous other people have said in the media that they only put their bin out every 2-3 weeks.

The end result will be more rubbish and less recycling which is crazy.

Also there is a number of private suppliers of bins and bags that will not be able to carry on there businesses with this Council

monopoly plan

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I have a high regard for Kaipatiki and what they are trying to achieve..

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I am saddened by the Tupuna Mauga Authority like most of Auckland with what has happened to our mountains.

Numerous ones have been stripped of tree's with promises beening made by this Authority that they will replace the tree's

This has not happened. There has been massive mature tree removals on one hand while as a council / Govt push for climate change and the need for tree preservation has been an abject failure for Auckland.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The city needs significant investment to both future-proof the city for climate change and to help mitigate these effects by moving away from high emission vehicle dependence. The proposed rate is not very much money and represents good value if the stated aims can be achieved.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Of the levers listed to alleviate the budget pressure it is hard to support one way or the other without more specificity. For instance, being in favour of selling council assets would depend on the asset and its current use (or under-use) for the community. I would not be in favour of a reduction in capital spending as there are a number of areas which require investment.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Pay as you throw suits low waste households well and encourages other ways to reduce waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: More cycling and walking connections in general should be prioritized over a heritage walk which would appeal to only a narrow demographic.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Investment in public transport and active mode transport is important to me and should be prioritised and invested in heavily to meet the cities climate change goals.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I also support putting in place infrastructure, especially rail in the early stages of 'new' areas being opened up for development or at the very least earmarking the land for that purpose for later use. This seems to be a MAJOR OMISSION across the entire Auckland region. and is a driver of projects being so expensive and disruptive to construct.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Partly support. "For ever' there have been alleged focus on on efficiency savings and similar - I was an internal auditor at the Council during the 10 years either side of the 1989 amalgamation and a resident for more than 50 years. Continuing to sell off the family silver is, in the long term a fraught approach especially as with increasing population density more will be required not less. A key is ensuring there are good quality assets of all types, with the long term in view. The long term is "7 generations" Getting rid of the business/commercial differential was a major strategic flaw as is the rating, planning, and land use issues pertaining to our 'food basket land'.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: If an assets can not be maintained once it is constructed then it should not be built in the first instance. To build and then not maintain is a travesty. Budget pressures, the current COVID related issues aside comes down to for too may years - going back at least 30 or 40 years have been too low and is a key reason for the council now being in dire straights. That in addition to the mantra of 'growth' - 'growth' pushes up the unit coast of going many types of work the council needs to do. In thinking about 'growth, why do we need it? Who benefits? Why do they benefit? It may be far better financially for Auckland to facilitate financially 'better' growth in regional towns and cities. There is NO imperative why Auckland has to "grow" - and grow with no end in sight.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: "User pay" has far more prospect of reducing waste than funded by the rates system. As an analogy this was found to be the case when water meters in old parts of the Auckland City e.g Grey Lynn, after laying dormant for many years were brought back in to service - water consumption decreased. This is no different.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties

Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Although not within the purview of the local board I would like to see (a) Grass berms properly maintained (b) Rubbish and recycling bins not dumped on our narrow footpaths by the waste collection trucks. Footpaths are 100% blocked in some places EVERY collection day; the present a safety hazard to various categories of footpath users.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Tūpuna Maunga Authority - restriction on vehicle access e.g to Mt Victoria hugely raise my heckles. As does the recent tree felling programmes.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The proposed Climate Action Targeted Rate, is another example of dishonesty. To say that rate rises will be limited to 3.5% (for example), but then add on a targeted rate, that just adds more cost, is possibly illegal in law.

The declaration of a climate emergency by the Council was a cheap political stunt. Climate issues are a responsibility of central government, not local government. The council does not have any ratepayer consent to get involved in that subject.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The Council should be reducing rates at a time of a public health emergency, rising inflation, rising cost of living. Look at the rising number of vacant shops in Auckland, a sure sign that things are not right. To continue raising rates shows both management and Councillors are seriously out of touch with the public. Councillors, if supporting this budget, are no longer representing the ratepayers, so there is a failure of democracy.

The existing debt of the Council is far too big. Ratepayers, as owners of the Council, have never consented to this huge debt.

The Council could easily reduce spending by cutting staff numbers and reducing salaries. For example, salaries could have reductions of 15% at the top, tapered down to no reduction for those below \$50,000 pa.

Given the large size of Auckland City (about 1.7 million persons) and the vast amount of annual rates tax, there should be many examples of large economies of scale in Council operations. But none are visible.

Clear examples of waste and inadequate management by Council are visible. For example, large numbers of buses run empty on Sundays, on many routes on Saturdays and for many routes Monday to Friday after 8pm.

Or is there anything further you would like to give feedback on?

We have lived in Birkenhead for 45 years, and over that time we have seen the development and enhancement of Little Shoal Bay, - with a shabby rundown motel , and very dubious camp ground, to what is now a beautiful bay, well used and loved by the community.

It is now being threatened with flooding, all because one person at the council wants the playing fields to be returned to mangroves, and refuses to allow the flap and gate on the pipe to be reinstated. The flap stopped sea water from coming in and flooding the playing fields, and the gate allowed rainwater to flow into the harbour.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Do not sell assets

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: climate action should be first supported at a national level

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I want to pay for what I use and not burden others

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: All current vehicles and ferries should be kept in service until they are no longer able to function or be repaired. Only then should the cost of introducing e forms of transport be met.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Why are you cutting back on some council services to save money when Goff goes ahead with more salary increases on top of the already exorbitant wage bill. Disestablish the destructive Tupuna Maunga Authority and all other non elected personnel collecting wages from ratepayers.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Forget about cultural and social expenditure. Agree on environmental expenditure. At this time of having a huge deficit you need to return to the simple necessities of council.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Its called fairness to the low use ratepayers.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Too much budget has been allocated to transport emissions. \$1.12 a week may seem like not very much for those well above the median income but for the other half of New Zealanders they are already struggling to keep up pace with the inflation, basic commodities like food and fuel prices. Not to mention housing prices. Please get a grip on the fact that New Zealand is becoming unliveable for many. You can try tax us out till we go dry but there wont be many people left living here.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: People don't all put there bin out every week, you will be punching people that are minimizing there rubbish already.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Using criteria can add an additional layer of approval which adds more administrative cost, rather than getting on and delivering things. It needs to be simple and fast.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: As a household (with a baby in (primarily reusable) nappies) who fill a small bin only every 6 weeks this is going to cost far more. It directly contradicts Councils climate change goals and will not encourage less waste, recycling or composting. Keep the user pays system and introduce elsewhere to equitably split costs and encourage people to reduce waste. Spend more effort targeting manufacturers to reduce creation of waste.

This solution also removes any costs for tenants so may push rents higher but also removes any incentive for renters to reduce waste produced.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Another way to make people with below average income miserable.

The money collected from the fuel tax hasn't been properly used.

Every time propose cycleways / new bridges, in the end still nothing were built. Just spent tax money in these proposals and plans, and DREAMING.

Now come with another idea to tax lower-income people, and think that you are doing something to save environment. I would support it if you have really done something. No, you only talk and tax people.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I will support it if you DO NOT increase the rate in next year. People already face the increasing inflation rate, and still need to face another 3.5% rate increase on top of that. Reduce unnecessary spending, including your council's office operations.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Yes, you need to prioritise operating spending. Like people with average income, we cannot spend our money in dining out as often as we like or in trips.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I STRONGLY disagree with your rate-funded refuse collection system. People need to pay for how much waste they produce, not in one rate system. The more waste they produce, the more money they need to pay. Better solution is to increase the cost for bigger bins. That way people can try to reduce the waste.

This is the most stupid proposal I heard that can save environment: with only THREE sizes of bins. Even the smallest bin is too big for us to use weekly. We only produce 60L of waste every 2-3 weeks.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:Need to put more focus on infrastructures and public safety. There are more and more steeling and damages on vehicles.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Too much money is spent to make driving unattractive (removing car parks, and replacing them with large pot plants, etc). This is unhelpful for Aucklanders, and makes Auckland less attractive to live in.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: We are in a cost of living crisis. We don't need a rates increase, you just need to do a better job of managing the money you have. Currently Auckland council wastes SO MUCH MONEY on stupid projects that are unhelpful to most Aucklanders.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Climate change is not the most important thing. Our city is falling apart and it's people are queuing up at the food banks. Stop wasting money and making it so hard to meet everyday cost of living.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I create very little waste and therefore spend very little on my bin tag (Far less than your estimated \$148.20). It would only cost me more if waste management was included in my rates. Also the rates-funded refuse system removes competition from the market.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I like the idea of bringing people together and improving our walking tracks. I don't support wasting money. For example, all those cameras down Onewa Rd, and all the stupid rubbish that's been painted on the roads around schools lately.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

So increasing the cost of living and making life so hard in Auckland. You've destroyed the Auckland CBD.

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: In setting this rate the Council is assuming that all properties pay rates. This is not true and the council wishes to levy only those that pay rates (and then charge GST no doubt). Therefore you are asking ratepayers to subsidise those who do not pay rates..... Not fair. How about a tax that all pay not just the Rate Payer.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Cut waste in Council Spending.

Example: (1) Roadworks have Cones on the road and no one working on the project. But 2 men in the Cone delivery truck sit in the truck all day and do nothing but watch the cones.

Example (2) Road reworks: The Northcote area has had a number of occasions where the road has been dug up and new services provided. Thats Ok but why within a short period (less than a year) is it dug up again and work done then reinstated. What was the recent cost of work in Lake Road Northcote? I guess hundreds of thousands of Dollars.

Cut waste and save money....

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our property is lucky to put out one Envirowaste rubbish bag a month as we compost and minimise waste. (cost approx \$12 per year) What the council is proposing would add to our rubbish costs and subsidise those who dont pay Rates or those that have excessive waste. I do not think this is fair as I believe the proposed cost to the Ratepayer is around \$300 per year. This is economically unfair. Make it User Pays.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support, but would like the council to go further with climate action. It is essential that action is taken now, not pushed back even further. The proposed CATR supports projects that will begin to make a difference to Auckland's transport emissions. For \$1 or so per week for the average household it should be affordable, despite the current economic challenges. But, given the scale of emissions from transport, this is really the bare minimum to credibly stay connected to the vision and goals within Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan. Auckland has made some progress in recent years, but the transport system is still dominated by private car use, often single occupancy. We need to be bolder. I urge the council to implement the CATR this year, and look to be more ambitious in the coming years.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I do not support the rates-funded proposal as it limits the incentive for people to dispose of their waste in a responsible manner. It removes the incentive to correctly place recyclable items in the recycling bin (and also limited the incentive to correctly use the food waste bin).

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We have been doing very well with waste, limited to only 1 collection per 6 weeks, with all the compost bins, worm farm, bokashi etc.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

What do you think of this proposal? Do not support

Tell us why: I feel that the improved bus services is a drop in the bucket. Besides kerosene used in bus caused air pollution, higher price and longer running time make it unaffordable. And, this plan seems one more tax increased, Aucklanders have paid petrol tax, I don't know where our petrol tax goes? Are they used effectively? And again, cycling not a good choice for most people who need commute, since too many vehicle and uneven road. If increasing provision for walking and cycling with highly cost, do you let your mountain in labour bring forth a mouse?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I did not get enough clearly explains, expect to more examples for showing equity after moving to standardise waste services and charges. I don't understand why PAYT is unfair, instead standardise waste services and charges will be more fair. For small household, there are not many rubbish. I live alone, and kitchen rubbish is dealt by Bokashi compost, it's no need to throw rubbish for long time. May I ask, after moving to standardise waste services and charges, if i should pay for those rubbish I never throw out? Could you explain that is this more flexible? or for you convenience? Is the standard always good ?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This is not a great idea. It encourages putting rubbish out every week, deterring people from trying to reduce their rubbish production.

Our household currently only puts our rubbish out once a month so have no interest in paying money for a weekly service. I can guarantee that we are not the only household in this position.

Please rethink this as your promise that it will save household money is only based on putting out rubbish once a week.

The pay as you go system sees us paying only \$51 a year. We shouldn't have to subsidise for those who make no effort to reduce their waste output.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Money needs to be spent on infrastructure.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I was part of the pay as you go online waste management trial on the North Shore in Auckland. It was a very convenient and user-friendly system, which allowed users to access the service when needed and I am disappointed it is not being considered for implementation across Auckland.

If Aucklanders are paying for a service in their rates, regardless of whether they use/need it, this promotes mindless waste, and means that citizens aren't rewarded for minimising unnecessary waste which is not conducive in reducing our impact on the environment.

You can do better, Auckland.

Question B

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: AKL Council should look to reduce the amount ratepayers are paying - this scheme, given the current financial climate, is not a must need and should be deferred to when Auckland is back on its feet and inflation has been reduced. People are having difficulty putting food on the table - AKL council needs to learn to read the room

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: Deliver on climate action is NOT a key priority.

Spend on what council SHOULD be doing and no more vanity projects (cycle lanes, painting blue circles on roads etc)

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I am a low user (1 yellow rubbish bag every 4 weeks) - and I use a private rubbish contractor - I DO NOT want to pay for rubbish removal in my rates as I do not use this council service. If Council decide to go down this rates grab path then there should be an option for those of us who do not use this service to opt out of payment - We are in a user pay world and if I am not a user I don't want to pay.

PAYT encourages households to look at their rubbish and reduce waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:AKL council have done blast all in my local area

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland Council need to stop wasting money - vanity projects need to stop. Read the room - Aucklanders are hurting financially and we are not a bank for Council to withdraw endless monies from in the form of rates, targeted rates or any other money grab.

People are having difficulty putting food on their tables.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Anything that requires a waste tag is a disruption for most working people. The current system works well and we should not have to purchase tags to get rid of recycling waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Family of 3, currently we put one bin out every couple of months, it cost us one (small) bin tag, we compost and recycle and try to reduce our waste as much as possible, changing to rates based will not only increase our ever increasing rates but will also encourage more people to throw out more rubbish which just seems to increase the rubbish problem. We try to reduce the waste, and hear a lot about the volume of waste Auckland has, rates based is only going to make people less responsible for their rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: These measures do not go far enough, expenditure - both Operational and Capital needs to be reduced. Auckland Residents already facing escalating costs and further financial burdens will make Auckland an unaffordable place to live.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Both Operational and Capital needs to be prioritised and reduced. Auckland Residents already facing escalating costs and further financial burdens will make Auckland an unaffordable place to live.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: To ensure Environmental impacts are reduced, we need to reduce waste, fixed waste disposal cost do incentivise reductions.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: People are going through hard times with Covid and financial hardship, it would not be appropriate to increase rates at this point in time.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support the cost reduction and spending delays. Do not support increasing rates, not good optics to charge more in these times.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: We use the smallest bin and put it out once every 3 weeks, we home compost and recycle monthly. Whilst I appreciate the efficiencies of a standardised collection service, it perversely incentivises me to throw more waste away.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The rates increase was not agreed upon by the rate payers but was determined on a flawed questionnaire with leading questions.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Unless there is an opt-out option this will be detrimental to everybody trying to minimise their waste. There is absolutely no incentive anymore to do that as even the smallest bin will be far too big for what a responsible household will produce. This will seriously jeopardise the zero waste goal.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: The council can't continue to deliver the same work as it always has with a reduced budget. We need to be considering other funding options and definitely government funding should be increased where possible

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I am currently on the PAYT system and rarely put out my household bin (which is already the smallest available). I compost - I used to also take other people's compost before our fruit fly and then covid outbreaks. I agree that it is a good thing to get rid of commercial waste vehicles off our road and maybe moving to a rates funded system will help with that. However, a lot of people in our area - us included - use a garden waste service which isn't offered by the council. It will impact us financially to move to this new model. So, I'm sort of supportive of the principles but am not convinced by all of the arguments and certainly feel that the incentive to reduce waste is being lost. The proposed changes also don't feel like they're going far enough. Why isn't the frequency of rubbish collections being reduced so we at least alternate between rubbish and recycling weeks. The number of bins on our streets - particularly as more and more houses are being crammed on sections - is quite overwhelming and makes it difficult to navigate the pavements at times.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: All of the climate infrastructure is vital to creating the kind of future which we need to look after future generations. I am a student who goes to school at Northcote College. I find it so important to improve public transport infrastructure because I recently got my restricted license and this was extremely important to me so that I could get myself to and from my work, which I couldn't get to using public transport. The climate action targeted rate is a small amount which will prevent us from having to pay more in the future to remedy damages and then put in this infrastructure. In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words. Expanding public transport will make a massive difference to Auckland's biggest source of emissions. Decarbonising public transport will let people go about their daily lives without the constant guilt of using a private vehicle.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is a big deal. Transport choices and land use can make a big difference. I support Auckland council using a targeted rate to spend on projects that help achieve net zero carbon goals.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I do not support reducing services. I don't think limiting rates increase to only 3.5% is as important. I'm ambivalent about council assets.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Ambivalent.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I support initiatives that reduce our carbon emissions and move away from car dependency.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We must make this crucial investment and commit now to address the climate crisis or our children's future will be paying for our inaction. This is a small contribution that will have significant impact. If there was better transport infrastructure I would be biking to work across the harbour bridge, my child would be able to bus to his kura from the north shore to the city. Currently the options available mean that taking a petrol vehicle from the north shore to the city is the most cost effective on money and time. ACC must prioritise setting up and fund this. I would happily see an increase in my rates to ensure that these was embedded into the fabric of our city.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I would like to see more places to drop off compostable matter, local and connected to creating gardens. The For the Love of Bees and OMG garden project and in general community grown food sustainability projects could be the centre of civic activity. I have lived with both rated rubbish collection and pay as you go, and I think people should be made aware of the costs associated with disposing of rubbish, make it visible and then it might help create a change around recycling and packaging.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The most important issue to me in this city is public transport and infrastructure. The city is way behind other international cities in providing good public transport system. The council need to work with Waka Kōtahi and find a way to make transport from the North Shore to the city accessible as a pedestrian or cyclist. The Auckland City Council needs to signal that it is taking the climate crisis seriously and support all Aucklanders to transition into public transport and low carbon emission modes of transport, as a very viable and preferable mode of transport. Bud fares and accessibility at the moment mean that for my household it's cheaper for us to take a car to the city, park on the outskirts and walk to our CBD locations.

Tūpuna Maunga Authority and the tino rangatira tanga of that authority in a Tiriti o Waitangi partnership. The authority has been undermined by the frameworks in Council.

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am a long time advocate for the environment starting in the late 60s. Any changes must be firstly for the environment I including the protection of flora and fauna. Secondly, within peoples reach useable and financially viable. So cars off the roads as much as possible, pedestrians/cyclists first and foremost where moving around is considered.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: You must stop planning and get on with it. We don't have time. Follow countries where it's working.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Do it!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: Can't decide, but whatever you choose make sure recycling is a big part of it.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Again anything to do with protecting, or changing for a cleaner healthier life with protecting the environment right now gets my vote.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Only to reiterate we don't have time to get a consensus on anything to do with saving our planet. On behalf of future generations I beg: get on now with the task needed to preserve all life.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Have no problem with that

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We believe this is a purely being introduced to make things easier for the council, more guaranteed income and not actually helping educate people to be environmentally conscious. We currently recycle most of our food waste on our property (live on the North Shore) This has been an eye opening experience. We used to get our general waste collected every 2 weeks but since composting food waste we put out our general waste every 4-6 weeks. That means we at MOST spend \$50 on PAYT per year. You are now telling us we will be paying \$181 per year!!!! Resources should be put into educating people to recycle where possible on their own property. Work on collective community waste disposal if you live in apartments, lets have more rooftop gardens!! This will also reduce CO2 gasses as "recycle food waste" will not have to be transport from eg. my home to some collection point. Investing in proper change in peoples way of handling their own waste is a better long term approach for a fast expanding city.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We can't keep postponing acting for our and our children's long-term future just because we don't want to spend a bit more money in the short term. Once it's too late, it's really too late! And even the financial cost (let alone the human and environmental cost) will then be far greater, and far less effective.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to be taking consistent action with climate change

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Sounds manageable and consistent

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Too vague. Potentially too many people involved eg. contractors

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: A number of different systems seem to work quite well at the curb side. The processing of that rubbish seems problematic

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: There has been excellent work in raising the standard of local bush walks and similar healthy recreational amenities. The town centre of Birkenhead is becoming a mismatch of services and shopping opportunities

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I think we should pay as we throw. I live alone and have a worm farm for most food scraps as well as actively recycle everything I can. My recycle bin still does not go out for 6 weeks as it is no where near full. Therefore my 'household rubbish is no more than a bread bag full every FORTNIGHT OR THREE WEEKS. Even your smallest bins are way to big for me and would end up stinking if I had to keep them round for too long, especially in the summer. As it is, I use yellow plastic rubbish bags and only put one out every TWO OR THREE WEEKS. (I fill the remaining space in the plastic bag with garden rubbish, which I know can be recycled as green waste, but otherwise my bag would never go out. I do not want (and cannot afford) to pay for rubbish collection cost to be in my rates. I get NO SERVICE out of that cost. Let people who carelessly throw 'everything' away (and perhaps do not recycle as well or as much as they could) pay for what they throw.... NOT ME.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is real and is happening now. I am almost 80, but my son and his children have to live through whatever is coming, and the picture of the future is not pretty. We must all do what we can, NOW, to keep climate warming to the minimum possible.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Put simply, modifying climate change costs money and it has to come from somewhere.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: There are economies of scale to be gained from having a unified system. The system of pay as you throw would not necessarily encourage people to recycle. Also if people have to pay each week to dispose of rubbish, they may well ask what their rates pay for. (They do anyway as they buy their tags.) The Council needs to take many more initiatives to HELP people recycle and dispose also of inorganic rubbish. (More collections of the latter not tied to an inefficient booking system.) When I was in Sweden 25 years ago, there was, in every neighbourhood, many bins in which people could dispose of different coloured bottles; cans; different kinds of paper and cardboard. This pre-sorting of recycled materials I'm sure saved lots of money. Bins were easily available and people didn't have to go miles to use them.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Or is there anything further you would like to give feedback on?

Key strategic issues facing Takapuna District Cricket Club and our Submission Points:

Due to the growth in our player numbers and participating teams (2015: 658 playing members to 2021: 1351 playing members), there is a major lack of training facilities for our members at our club grounds at Onewa Domain # 1 and #2. Therefore, we would like to request that new training lanes are to be installed on Onewa # 2 to cater more training facilities for our players.

Currently, we have only one grass pitch at our club grounds at Onewa Domain # 1 and no grass pitch on Onewa # 2. As per the Auckland Cricket playing conditions, all Premier team games are to be played on grass pitches. Therefore, due to the non-availability of the second grass pitch, our Champion Premier women's cricket team are compelled to play all their home games away at Hobsonville War Memorial Park. We request that a two strip grass block is built on Onewa # 2 and this will give our club the opportunity for our women's teams to play at our club grounds and this will give us the opportunity to promote more girls and women's cricket to our Community.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We used to have a rates funded system but the council in its wisdom moved to user pays. I support user pays as I am economic, compost my food scraps and have very little landfill rubbish. The current bins are too big so much smaller and cheaper bins would be preferable. I think a rates funded system discriminates against single people and people who are already recycling and composting.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

6. What is important to you?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Public transport in Auckland is only convenient for very few areas. It needs to be more accessible with less transfers needed to get across Auckland.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Stop selling assets. Long term lease only

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: Because I want climate action now for the future of my children. Cities are in a unique position to influence how fast the changes needed to reduce emissions happen. Central government moves slowly but cities can push through things quickly if there's the political will. I'd like to see pop-up cycle lanes all over the city. Trial things quickly, work out what works and get the mode shift happening. Look to the Netherlands and Denmark to see how it's done well or London and Paris to see how it's done fast.

I want strong climate action now! We can't wait any longer!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: We must reduce our carbon footprint immediately and tackle climate change immediately in order for there to be a future planet for all. Not enough is being done and it is disappointing that the cycle way across the Harbour bridge has not gone ahead. Public transport must be better and more achievable for people to give up their vehicles when travelling to work especially.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This will impact renters as landlords will only supply the smallest bin possible to reduce their rates amount - it will not reflect the needs of the actual household. This will increase illegal dumping of rubbish or cause households to also use plastic rubbish bags which is NOT environmentally friendly. This will also increase rents as landlords seek to recoup the rates from the tenants.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I strongly believe everybody should be composting when we started composting in our home we halved our weekly rubbish output. This is a massive difference in quantity of waste and also in the type of waste: food waste emits more gases. If everybody did it the results would be amazing. If rubbish collection was part of the rates the government could control composting throughout the city, and truly affect change.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live on the shore.

I am concerned for the children and the as yet , unborn.

I have not yet seen an estimate of the

cost to fight C.C. but I am sure it will be way more than we presently believe we can afford ,so I think the \$574 mil. is to little.

\$1 per week/household is a paltry sum .

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: All cut must be based on selecting those expenditures which contribute the least or not at all to dealing with C.C.

Newzealanders need to pay for Climate chande actions.

The total cost will be huge.

we need to be talking many billions.

\$150 million is rediculosly inadequate.

Revenue from the public must increase [rates?]

Poor people must be supported which means others pay moe

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: All cut must be based on selecting those expenditures which contribute the least or not at all to dealing with C.C.

we need to accept that we will have less of somethings so that 'what we can afford ' goes up dramatically

Mental health is a major issue .

Bold , agressive actions will help people to maintain hope that there is a future where children can live and maintain sort of enjoyment from life.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: When a service is paid for on the basis of how much use is made of it ,it has the effect of encouraging people to avoid the need , leading to the creation of less waste and the opposite happens

if the cost is built into general rates.

My great concern is that 'climate friendly' was not the first reason for the proposed change.

Equitable and cost effective are relatively less important

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Priorities should be chosen from the C.C perspective.

This is very wide ranging and not a narrow view point but quantitative assessment need to be made for each proposal

They all sound good , but must be driven by the condition that climate action is the priority

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I hope the Board can move more to educating the people about what is the best thing we should all be doing.

Waiting for the public to come up with , what they think is best or worse still, hold on to old out of date ideas is relying to , much on what will often be uninformed opinion

Tupna Maunga should be immediately stopped from felling trees.

This is a classic case of not putting the activity under the C.C. microscope

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm a 20-year-old living in Tamaki Makaurau Auckland on the North Shore. I live with my partner and we primarily use busses as our transport to and from our part time jobs. I want climate action now because we are currently in a climate emergency. More needs to be done by New Zealand as a whole to reduce our carbon emissions and promote options for the betterment of our futures. As someone who is vegan, I strongly believe that the climate change crisis is mainly animal agriculture based, but our emissions from vehicles also plays a large part in it. As I previously mentioned, my partner and I usually bus to work. We have a car and are working towards our licenses, due to the inconveniences of bus schedules and bus noises. My partner and I are neurodivergent, and he has difficulty using public transport, especially busses, due to overstimulation from the noise. If our busses were converted into electrical busses, he'd be encouraged to continue riding the bus instead due to less noise. Not only does this positively impact many neurodivergent people, but our planet, too. Our busses need to be decarbonised, and we need it to be done quickly. There's also the trouble of bus routes not being readily available at certain times of the day, meaning we cannot get to or from work at early/late hours and have to use a car/Uber. I'm sure these and many other issues affect average New Zealanders daily, therefore further pushing and ultimately worsening our climate change crisis. We cannot delay this package to 2024. Our children depend on it. Instead, we need to front-load the fund so more gains can happen before 2030 - before it's too late.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

What do you think of this proposal? Support

Tell us why: This is important but the plans to use the money raised is poor. It should be targeted better at increasing mod-shift to public transport and active modes. Low emission vehicles for public transport are expensive and a waste of money. The money would be much better spent on reducing the use of private vehicles which are by far the biggest contributors to emissions. Higher frequency public transport on more routes, much more extensive improvements to walking and cycling infrastructure is more useful than a few low emission busses or ferries.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The council should stick with the waste minimisation plan that they have already committed to. The PAYT system is the only one that properly incentivizes waste minimisation. The revision to do away with PAYT is cowardly and lazy. There are no real benefits to this bin size system at all. It is just a little easier for the council to implement. Our household will certainly be increasing the amount of waste that goes to landfill by more than fourfold if the PAYT system is removed.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Attempt to standardize all different aspects will not suit all, making some pay more than they actually have to, subsidizing others, and that's unfair. Our household only produces around 20 lts of general rubbish in 2 weeks. And we use compost bin, so we don't throw out food scraps. We would need a special opt-out mechanisms to make this system close to fair, and that would probably add management costs.

Also, having paid for the whole year for rubbish collection via rates, people will not be incentivized to reduce their waste as much. Instead, they'll be tempted to use this facility as much as possible, because "I paid for it".

Therefore I believe that PAYT is the fairest system that actually helps to reduce waste, even if it costs slightly more.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Here are key items that I believe need to be acted upon for addressing climate change challenge:

Incentivize individual rainwater collection, individual solar generation

Implement light-colour road surface (more use of white-ish cement concrete, change asphalt formula, and/or painting asphalt white) - this reduces need for air conditioning and reflects part of the energy to space.

Incentivize using of light colors for roof painting, or at least promote this.

Pedestrian/cycling harbour crossing is a must in such a city as Auckland

Collection of soft plastics with Recycling

Grateful for intention to move to electric ferries, both thumbs up!

Also, please address an issue with cars illegally parked on footpaths and on grass areas. In many cases it is safety issue due to restricted access and visibility, it causes damage to lawns and border stone. At very least, it causes inconvenience and annoyance. Reporting these incidents is very time-consuming with no guaranteed result.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is one of the most important issue humanity is tackling. Funding is needed to address it

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Seems a bit broad. What assets are non strategic

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because we will all die if we don't do everything in our power to address climate change. I'm afraid for my future. Money is just a man made construct but the fury of a changing climate will be very real. I felt it in the record rains today already. And I've dealt with it with the fallen trees from powerful cyclone dobi and the dead native trees 40 years old that died in the 2020 drought.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I don't like selling assets but i don't mind leasing.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We need better waste management. It should include organic waste also to reduce methane and recover nutrients instead of binning it

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live in Birkenhead and am the parent of two teenagers. We need climate action now for the future of our children, and the longer we put off making adjustments, the more we will pay in the end. Better, more climate friendly infrastructure is not only good for the environment it also creates a healthier, more equitable and more pleasant city.

I would like to see the new rate spent on expanding, decarbonizing and improving the public transport network, making it an attractive and practical option for people. I would also like to see a massive expansion of options for active transport with safe walking and biking networks throughout the city, including over the harbour bridge. Getting people out of their cars should be a top priority, and this will only happen when they have safe, practical and affordable alternatives.

As well as decarbonizing transport, I would like to see the rate spent on planting more native trees and enhancing green spaces, particularly in parts of the city where these are lacking .

Please do not delay these initiatives. Auckland Council declared a climate emergency in 2019 - if these were not simply empty words, it is time to act.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My concern with the rates-funded system is that people might not be encouraged to pay attention to recycling and/or composting options and a lot of things that could be recycled or composted will end up on the landfill. Also, people might be discouraged from reducing their packaging consumption altogether as they'll pay the same for rubbish collection no matter how much they throw away.

If the PAYT system is mandatory for all collection types (rubbish and recycling) I think people might be encouraged to reduce their consumption of packaged goods and opt for other options (assuming they are economically viable).

If the PAYT system is implemented for all collection types I think the current system should be improved to have some kind of "one-off sticker with a QR code" on the bins which you paste once and then you "buy" credits for it online. This would help minimise the current waste of bags and tags and make it easier for people to pay for this service online, rather than having to go to a store to buy tags or bags.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: The goals seem to not be very specific so it's hard to say whether I support them or not.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change will affect us all negatively so we need to start combating this urgently.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because climate change regulations are critical. We need to be addressing this now - it's terrifying how bad the next few decades could be without major change, immediately.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The tags are a nuisance and standardization across a city makes sense.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Some suburbs are often left off Kaipātiki's local plan. I encourage you to look at other suburbs where there has been little or no investment over consecutive years.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The tags are a nightmare. I moved here from Mt Eden where the system is far more simple.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:The boards ideas seem a bit airy fairy but sure.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The Climate crisis is very real and we must act.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Keeping rates down is crucial as the general cost of living has increased and we are seeing many communities impacted by the changes in the economy.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: This Prioritisation is very logical

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I don't support this as I think that PAYT is one of the few mechanisms whereby consumers are faced with any part of the environmental cost of consumerism - i.e. the cost of disposing of it. I believe PAYT is more likely to get residents to think about how they could recycle or reuse household items and make use of compost as an option to reduce their costs.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I support the proposals related to local board decision making; Tūpuna Maunga Authority Plan; Other rates and fees

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I don't see why action on climate needs to be funded by ratepayers, what about all the Aucklanders that are not ratepayers? They don't need to contribute? Then none of us should. Council should stick to it's core roles and leave this for central government.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Do not support further rates increases at a time when everybody is struggling.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I support but only if the rates increase is reasonable. Too often something like this is shifted to rates and the rates rise is way more than what would be considered reasonable for the service offered.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The general ideas seem reasonable but just don't want money thrown at projects at a time when it feels like spending should be restricted.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Different sized bins will mean that many people will opt for small bins that are too small as they're cheaper. Then, when they create too much waste for their bin, they will smuggle it into neighbours' bins, or let waste pile up (smell, rodents, visual pollution). Also, creating more bins is wasteful,.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I would support it if there will be bigger rebates and more options of electric/phev/hybrid cars are made available.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Don't want the rates increasing.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Seems like it will be more organised, cheaper and probably be better environmentally being controlled by one source.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think you could go further actually. \$1 per week is not much to the average home owner. But you will need to focus on delivery rather than just increasing rates and not delivering what was promised.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I would prefer to see higher rates increases and maintenance of current service level. Asset sales can be short sighted, and delaying capital projects just kicks the can down the road, resulting in higher costs later.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Prioritisation makes sense, but it is important that key services and projects are still progressed.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: This sounds sensible and I like the option of smaller bins. The food waste bins are a good idea as long as you can still home compost and opt out

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: These are all great, but some more work on transport would be welcome too. Specifically around Onewa Road.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because it's an emergency and the council is failing us, and we are failing ourselves. Make it more though. More urgent, more money, fewer cars.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: You will end up cutting environmental corners. Raise rates esp for the rich.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland's transport is a disgrace. The car continues to win at a huge cost.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because it is imperative we start doing substantive things to address climate change

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Extraordinary times need extraordinary responses

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Well I would hope the use of criteria would always be part of Council's decision-making

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Stickers are do inconvenient and like the choice of bin size

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is I believe the most important issue we need act on today and we need to act decisively, immediately. We are not yet doing enough or fast enough. It's everyone's responsibility to contribute to change and those with more assets (eg home owners) have more ability to do so.

I would like to see more effort and investment towards climate change and it will be my primary decision factor in upcoming voting.

I want my son to grow up in a healthy thriving equal city where we lead globally on sustainability, have high quality of life and a secure future.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: There isn't much other choice at this time. Sale of assets should be a last resort.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Looks practical.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I believe this would increase participation rates for proper disposal and like that there is incentive to produce less waste with lower rate for smaller bin size. I support green waste collection being implemented and a rate based system would help fund it. More convenient without having to buy tags too.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: The nature spaces in Kaipātiki are so special, and a huge asset to the area. Protecting them is crucial and involving community and mana whenua is too.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It is vital that we reduce the impact of climate change. I particularly support the planting of more native trees and food forests, e.g. fruit trees in public parks.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I do not support the sale of green spaces, Auckland needs to retain as many public green spaces as possible and where possible use them for planting of trees or as recreational spaces.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It does not encourage households to minimise the amount of rubbish they put in the waste bin. I only put my bin out every 4 to 6 weeks (North Shore) so the proposed system will be more expensive for me.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Way too late but better late than never. We need to do so much more for the environment, and we should have started decades ago.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our family works hard to create as little rubbish as possible (only put out our bin about once a month if that).

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

What do you think of this proposal? Support

Tell us why: I live on the North Shore and work as a professional in the planning industry. I am completely supportive of the CATR to address the climate impacts that are being made and to begin making genuine change which is so often traded off against other benefits. I believe that far more needs to be done in Tāmaki Makaurau in regards to climate action and reducing transport emissions will go a long way to achieving 'real' change. We need to be doing much more and much faster than we currently are. The ambition is there but it lacks urgency in a real sense, beyond just words. I know massive change such as that is required takes time, but we need far more urgency than is currently seen.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I favour PAYT for recycling, rubbish and food scraps. This will be an incentive for people to reduce waste since the less waste you produce the less you pay. This means those who are producing the waste are the ones who are funding the waste collection - that seems fair to me. If it is rates funded then people in rented accommodation are not paying for the collection of the waste they are producing. Currently recycling is rates funded. If it became PAYT then this would help offset the increased rates cost created by the climate action targeted rate - that seems a fair and sensible trade off to me.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate degeneration is the single most important issue facing humanity at present. It is imperative that good effective policies in this area be put in place. This is one such policy.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: The proposal is not specific enough to allow me to form an opinion, though I support effective budget management.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: This is a rational template for decisions.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is a huge issue. Public transport will help reduce carbon emissions. The lack of fast, accessible, and reliable transport in Auckland is a huge variety for people.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: We need to reduce carbon emissions but I'm not sure these are the ways to do it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There's so much wastage at the council, there should be greater efficiencies implemented rather than implementing higher rates

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Just do the things that must be done until the spending is under control

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Just another way for you to hike rates for more than what the actual cost is

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: This area needs a little extra support due to the socio-economic status of the community. Many people can't afford to take their kids to do fun things so community programs mean a lot here.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need viable alternatives for people who currently take their car. It needs to be cheaper and easier for people to take public transport and public transport needs to have as little impact on the environment as possible.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I believe that climate action and the environment should be a 'must' in terms of prioritisation, not a 'should'. Without these tackled as priorities the work to achieve better outcomes for other areas such as transport and community (and housing) will be harder to achieve and potentially not delivering the right outcomes.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: RE: Question 4B - my concern with the opt out is that it takes away the imperative and / or incentive for businesses to separate their waste effectively. Aside from Green Gorilla, most private waste companies are happy to charge a fee for a business to throw anything they like into a skip etc. It is faster for the business to not have to separate their waste streams. I agree there should be a mechanism for council not to collect if it is not viable but as part of opting out they should have to show how they will continue to divert from landfill with a private collection company.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Other

Standardise the opt-out rules for non-residential properties Other

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need values led governance. Climate change is the biggest threat to us at the moment.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Funding of infrastructure that does not meet our climate goals needs to be significantly reduced. I.e. local road maintenance (of the carriageway asphalt). All priority of local road maintenance should be primarily on active transport infrastructure only. Maintain footpaths and cycleways to a A+ standard, and road carriageway surfaces to a C+ standard. Not the other way round which it currently is. I frequently see perfectly functional local roads being re-surfaced due to 'routine maintenance schedules', yet at the same time my suburb has ZERO safe separated cycle lanes, and AT tell me there is apparently no funding available to upgrade and stall safe pedestrian crossings at key desire lines? Council need to remove the roading bias in their spending. It's not fair that roads are maintained to a high standard while cyclists have no infrastructure, and pedestrians have poor crossing facilities.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Funding of infrastructure that does not meet our climate goals needs to be significantly reduced. I.e. local road maintenance (of the carriageway asphalt). All priority of local road maintenance should be primarily on active transport infrastructure only. Maintain footpaths and cycleways to a A+ standard, and road carriageway surfaces to a C+ standard. Not the other way round which it currently is. I frequently see perfectly functional local roads being re-surfaced due to 'routine maintenance schedules', yet at the same time my suburb has ZERO safe separated cycle lanes, and AT tell me there is apparently no funding available to upgrade and stall safe pedestrian crossings at key desire lines? Council need to remove the roading bias in their spending. It's not fair that roads are maintained to a high standard while cyclists have no infrastructure, and pedestrians have poor crossing facilities.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My household has worked extremely hard to minimise our waste. We have gone from using one bin every two weeks, to now only 1 bin per 2months. We love the pay as you go system because it incentivises and rewards us for our hard work. I do not support any system that removes the incentive to reduce waste. Think about it, if a rates-funded system was so good then wouldn't you do this for water too? Well you wouldn't as it totally disincentivises care and management of the resource. Take a look at Central Wellington. They have terrible waste and water use issues as it's all built into their rates fee.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:All local board spending and governance decision-making needs to be overlaid with an environmental lens.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

As stated earlier, there needs to be serious look at the bias towards maintenance on road (for cars) spending in the council budget. Why are roads for cars being maintained to a higher quality level than active transport and micro-mobility infrastructure?

Funding of infrastructure that does not meet our climate goals needs to be significantly reduced. I.e. local road maintenance (of the carriageway asphalt). All priority of local road maintenance should be primarily on active transport infrastructure only. Maintain footpaths and cycleways to a A+ standard, and road carriageway surfaces to a C+ standard. Not the other way round which it currently is. I frequently see perfectly functional local roads being re-surfaced due to 'routine maintenance schedules', yet at the same time my suburb has ZERO safe separated cycle lanes, and AT tell me there is apparently no funding available to upgrade and stall safe pedestrian crossings at key desire lines? Council need to remove the roading bias in their spending. It's not fair that roads are maintained to a high standard while cyclists have no infrastructure, and pedestrians have poor crossing facilities.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This initiative is both practical and highly personal for me. I have recently become a homeowner and I want my hard won asset to have value long into the future. I have also wanted to have children my whole life - one of the rooms in our new house is already earmarked for a nursery - but in the last couple of years, I have questioned whether having children is the right thing to do if I'm just going to bring them into a world that's dying. Please implement the climate change action target rate so we can have targeted climate change action that secures both the future of my asset and the future of the child I will hopefully have.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support elements of this. I think looking at possibly wasteful spending within council is a positive but I would like to understand which services look to be cut as part of managing budget pressures. I also think changing the timing of capital spending is fine for some initiatives, but others like transport infrastructure (especially cycling, walking and public transport) need to be accelerated.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Overall I agree with this approach. Priorities like climate action, transport, the environment and community development are the most important activities council can undertake at the moment so I agree they should be the next strategic priority under the councils legal obligations.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think the current pay as you throw system is inequitable, however I am concerned that a rates funding system does not encourage households to reduce their household rubbish. Education and tools around this will be very important if there is a shift to a rates funded system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I fully support this proposal - it is long overdue and much needed. We have eight years left to meet our climate targets and we cannot afford to drag our heels - the consequences are too severe.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Please do not cut funding to or reduce the services that will reduce emissions, or make it harder for people (particularly those on low incomes) to access support services and public transport.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Generally agree with the framework for decision making.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Simpler and more convenient, as long as it doesn't negatively impact low-income households.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live in Kaipatiki and work as a civil and environmental Engineer .

In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

Council should have dedicated funding for tangata/manua-led initiatives as well as more funding for climate related initiatives. The use of indigenous knowledge will make sure we create sustainable outcomes for all. As an Engineer mainly working in the Water space it is important that we act quick and fast to tackle climate change as it will make problems for future generations

We cannot delay this package so it should not be pushed off to 2024

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I think more consideration is needed as we need to discourage the disposal of waste to landfill. Rates funded would be good to ensure equitable access to rubbish disposal. but this would not be fair to people who produce little to no waste, rates-funded would also not encourage low waste management. If the rates funded included comprehensive recycling and composting I would support that.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Its not meaning full enough to make any difference and the council in isolation doing something is going to have zero impact on a local or global scale.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Selling assets is a short term fix to a long term issue. If the council had retained all its airport shares for example, it would have an asset of huge value which in normal years generates a good return. Instead we took the sugar hit and now have only part of that benefit .

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This is the worst suggestion, we do not use anywhere near 52 pickups of waste a year. We are trying to minimize waste - this will only encourage more. It totally contracts you wanting to tax us more for climate change. Pay as you go is the right model. Its also an increased cost that will force up rents. At the very least you should be able to opt out and use a private on demand service.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why:What is actually tangible in this list, just a bunch of investigation - where are the big ideas for the area. A heritage trail is not it.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Alot of people are working from home more and do grocery shopping people do not like carrying all the food in a bus all the time Not much transport around places like pak and save glenfield

Ideally bus and train users should pay not everything for free Discounts for frequent users Where bused not being used we should not put lots of money into this I saw many empty buses going around empty especially doing the lockdowns and sometimes at unpopular times

Some economy and need should be assessed for the service

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Some Ok but do not support open space land parks etc we could

look at utilising our assess more and create income eg signage lease age etc rent etc Do not support selling but look at creating value and not just make a loss and then say we have to sale By creating income we can reduce costs to ratepayers

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Like the tag system and flexibility to put bin when needed eg weekly .

fortnightly option if on holiday leave no pressure less cost to ratepayer

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Kauri park closed and locked up now for many years like to see reopening of parks and opportunity for the public to use them

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Like council control for water storm water waste water to continue Like to say council create revenue with existing assets eg signage street corners etc some business activity that can create revenue and lower costs for ratepayers

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: For some years I have chosen to use a non Council rubbish collection company because they also collect garden waste together with household waste in one bin. This is a service that the Council does not provide. It is unfair that I should be faced with a rates increase to pay for a Council rubbish collection service that I do not use. As the owner of a single dwelling property, I should have the option to opt out of this additional rates increase. It seems from the current proposal and supporting information, that I will not be able to do this. As a retired person on a fixed income, this situation would be inequitable.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: You are focusing on the wrong things. Focus on reducing your staff levels, reimplementing proper streamlined processes instead of hiring staff for outdated and slow processes. Reduce your office/facilities space with lower staff numbers and implement hotdesking for staff as most will work from home as that is the future. You have significant savings on some pretty pricey realestate.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Reduce every unnecessary spending option. We dont need upgraded town centers, we dont need more facilities etc. Keep the lawns mown in parks and ditch the rest.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: You pay for what you use. Not a blanket 'tax'. I can put out a bin once a month and pay for it, not pay for effectively weekly collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Reduce your spend. You pay WAY to much in consultant/contractors fees. Jobs ALWAYS over run incurring costs, variations etc. Negotiate your contracts to fixed cost, work 24x7 hrs a day to reduce the startup/shutdown of crews get your work done quickly with minimal interruption, vs how you do it today, a 2 week job takes 4 months of pain and suffering for the neighbours going days without even seeing someone on site. You spend way too much on personnel, reduce your office space, implement remote work for staff so you dont need 90% of your offices, stop trying to copy overseas and implement slums (no matter how they are sold to the public, that is how they are going to end up as seen in several newspaper articles of late). If it doesn't work there, what makes you think its going to work here. It only takes 1 poor household in a street to affect the ENTIRE street. dont let that breed. Your transport solutions are so broken, they are beyond fixing, without ripping _everything_ out and starting again. stop dropping money into a bottomless pit

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We already, and have always, been charged, on our rates, for our rubbish collection, so this would be an extra charge, especially for those, who use the yellow bags. I prefer the tags, then you are paying, for what you are using. I use my old recycling bin, for my rubbish, which I only put out when it is full, which is usually, every 4 to 5 weeks, as I recycle, as much as possible, and have a compost bin, for peeling's etc. If i'm going to be charged, a weekly fee, on my rates, it is going to cost me more, per year. I'm 78 years old, I live on the pension (which I am very grateful for) but it's getting harder, and harder, trying to make ends meet, thank you for asking.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support anything, that is going to cut down, on the Council's spending, over the years, I have noticed, a lot of waste and costs.

I have seen Council gardens, trees and other things, being replaced, or upgraded, when a lot of the time, its unnecessary and wasteful, just a bit of weeding, would have been enough. I've also seen men sitting in their vehicles, playing on their phone's, when they have been sent to do mowing, or something, if the grass doesn't look long enough to mow, they use the time, for something else, like texting, Lawns don't always need mowing, fortnightly, as they grow slower, at different times of the year.

Thank you.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: There is far too much spending going on, and often nothing much to show for it.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I prefer to have a user pay system, the stickers are better, as some households, have a lot more rubbish than others. Its not fair on the lower income households, to be paying, for something they don't use often. I wouldn't want to be paying, for my rubbish to be removed, weekly on my rates, when I only put my bin out, every 3 or 4 weeks. Thank you.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties

Do not support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I think our Heritage is important. As long as open spaces, Parkes etc, are kept tidy and safe, I don't think that the most expensive way to go, is always the best. When spending time, in these areas, is what you make them. You don't have to have the most expensive plants around you, to enjoy nature.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I disagree with the selling off of what the council considers not strategic assets, which seems to often be green pockets of land and mini parks.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: As a household we aim for zero waste as much as possible. We clean and sort our recycling, compost our food waste and home compostable items, and use the soft plastic recycling scheme. We only put out a small 80l bin every 4 - 8 weeks. We will be paying considerably more with the proposed rate funded system, and I am wondering how this aligns with households aiming for a zero waste? And we look to compost our own food scraps! So I would like to understand the benefits for us and how this encourages others to reduce their waste. I believe the PAYT system works well. And we will be penalised by the system proposed, it will cost us a lot more, and also for pensioners etc who use the yellow bag system as they have even less rubbish and do not use a bin currently at all. It is reducing our choice and options. If it goes ahead in spite of opposition I believe we should, as rate payers, be able to select how many collections we would like in a year, and pay accordingly. eg we might choose 1 collection of a 80L bin per every 4 weeks instead of 52 weeks, so that would be 13 collections, I think we should also be able to opt out of the food scrap programme if we so chose, it should be voluntary as many people compost at home, or have worm bins etc, which I thought was a priority!

PS I am unclear on the question 4B, to standardise, I don't understand what it means, standardise so there is no deviation or opportunity to opt in or out? Again I think anyone should be able to opt out or reduce number of collections, including these kinds of dwellings and individual homes.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties

I don't know

Apply a minimum base charge to every separately used or inhabited part of a property

Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I would like to see the opportunity cost of selling those assets. While they may not currently providing any value, I think it needs to be justified as to whether that asset is likely to produce more value being sold, or if it is due to no assessment of its potential future value ever really been taking place.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I want this to be linked with a strong push towards commercial composting services. This needs to be linked to lobbying efforts to central government and industry to reduce the amount of packaging that cannot be composted.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I want a much greater focus on cycling and public transport links that go beyond just getting to/from the city centre. Dedicated cycle lanes, not shared paths that eventually just dump you into traffic. The Auckland Transport cycle guidelines are lacking and poorly thought out. It ends up spending most of the money on roading improvements, rather than actually making it safe to get around the local community by bike.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Stop pretending you are investing in cycling infrastructure, it's a rounding error, with most of the claimed spend just going to improve the roads next to the cycling lanes. Get better leadership, cycling infrastructure shouldn't be this hard, slow or expensive for what we are getting for the money.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to consider climate change affects in the budget as long as the cost is reasonable and not too large

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Must not sell strategic assets

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Use planned maintenance for services

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Smaller households do not generate a lot of waste therefore the PAYT system is better suited

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: With anthropogenic climate change driven by human-caused emissions to the atmosphere, it stands to reason that we face compromised air quality. This affects human health, especially our tamariki. Air pollution can lead to asthma, heart and lung disease. We need to ensure that we do better for our future generations.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Increasing rates is only going to cause more poverty. People are struggling. We need to find ways to reduce spending in areas that are nice to have, but not necessary.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: It's what needs to be done in the current climate.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm happy to pay extra rates to reduce emissions and have a more bike friendly city

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I do not support the sale of green spaces - such as Blomfield st in takapuna as these help us to reduce emissions, reduce stormwater run off and improve suburbs. I support the other levers

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: It is not clear what will be cut/reduced so I don't have an opinion

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: There isn't enough detail but I expect that as a household who only buy a tag every 3 months, this will be more costly. If it's weekly or fortnightly then people will put more rubbish in their bin as they feel they have paid for a collection so therefore have to put their bin out. This may do the opposite of getting us to reduce waste. I do support the kerbside composting component.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I do not support upgrading the beachhaven coastal walkway, it is great as it is, a natural bush track.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Don't put additional cost on me. Reduce your spending in other areas to cover this

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: When you have higher than expected bills that's what you have to do

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: If you don't have enough money you have to prioritize, that's simple budgeting

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I use payt at the moment. It has encouraged me to reduce waste in my household, considerably. It has enabled me to reduce my costs. A flat fee will not encourage me to reduce waste, quite to opposite, I will make sure I use it to the maximum each week. I would rather pay more for my bin tags. If you want to save money on rubbish collection change to fortnightly collection. I feel very strongly about this. Payt is the best way to encourage a reduction in refuse. Don't make us low users subsidize those who don't care. Your cost comparison assumes I put my 80l bin out each week. I don't, it goes out every 4 to 6 weeks. A flat fee will increase my costs by a factor of 3 to 4.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: This is a broad statement of priorities. Detail of specifics would be required for me to wholly support any initiative. Having said that I think the local board has made good decisions in the past, I like what they have achieved so do have a degree of confidence and trust

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Pay as you throw incentivises households to minimise waste. A region wide rates funded rubbish collection is a backward step and will increase rubbish households throw out, no incentive to recycle or compost, thereby increasing need for more landfill. How can a council even consider this retrograde step given the environmental issues the world is grappling with. It is beyond comprehension. If rubbish costs are added to rates I will be loading my bin up every week instead of once a month as we currently do.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: You can't not plan for it

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Council urgently needs to save the Rakino hall from destruction. This could be achieved simply by re-piling it, lifting it one meter. It is a historic building and the only council hall on a pest-free island.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our 140L rubbish bin only gets emptied about once every 8 weeks, and I'm not confident the alternative of a rates-funded system would be cheaper. I compost food scraps.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Waiheke Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: Whilst I support the initiatives for Waiheke, I note that Rakino Island has been overlooked again. Our community facilities are desperately in need of some care and attention. Our hall has once again taken a beating in a recent storm; this time the roof. Luckily we have clever and able locals that came to it's aid!

We use our facilities regularly; we have visiting musicians play in our Hall, most recently in February, and we had a presentation on the findings of the baseline marine survey from around Rakino that the community commissioned. It was well-attended on a weekend when the ferry stopped running because of a threatening storm. We use our upstairs facilities as an art gallery, and have re-instigated the holiday weekend arts events over the last few years.

Easter Weekend will be our next event. We are doing an installation we are calling 'Flotsam and Jetsam at Tiny Museum' in the art rooms about Rakino's marine environment, and geckos, which many of us would love to see reintroduced to Rakino, if only someone would pass some more stringent rules about cat control/exclusion. It's also an opportunity for Rakino artists to show off their work. There are some very accomplished artists associated with Rakino Island. It's always an excellent opportunity for a community get together, and a bit of a knees-up. There will be a kids art event as well.

Our facilities are used for community cultural and educational events, and our community would be much the worse off without them. Our library is in constant use also.

Please, please can we have some consideration for our ailing facilities? They are a much-loved part of our community, and visitors performing or presenting in the Hall always remark on it's special character.

We think Rakino is very special, a predator-free island which is inhabited by people. I'm not certain, but I think our facilities are the only Auckland council-owned facilities on a predator-free island? Surely that's a useful venue for information and education? Many thanks.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

See my above comments regarding Rakino Island facilities. :)

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Just another taxation

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Reign in AT- especially unimportant road works-use of expensive consultants and some too well paid AT staff

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: this logical approach should provide improvement

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: rate funded approach to rubbish other than normal recycling and inorganic collections is undemocratic as it penalizes those who have a reduced contribution to landfills.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Absolute waffle-actions speak louder than words- appears more investigations proposed than actions- can you beat the cost of the harbour cycle bridge "investigation"?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Why should rainwater tanks connected to internal services require building consent? Structural or health issues?

Increased costs of providing local boards with advice & decision making support. Token gesture with increased costs.

Auckland Council Annual Budget & Kaipatiki Local Board Priorities

Submission from Birkenhead Residents Association Inc. March 2022

The Birkenhead Residents Association (BRA) is proud to represent the community of Birkenhead, in the Kaipatiki Local Board area.

BRA represents approximately 1600 households of Birkenhead Point and surrounding environs.

Council's Annual Budget 2022 – 2023

Issue 1 - Climate	BRA Response
<p>Climate action targeted rate.</p> <p>We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years.</p> <p>We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.</p>	<p>We do not support the targeted rate.</p> <p>We agree with the intent of this rate to support emissions reduction; and increasing tree canopy cover. However, we do not support the targeted rate, as these things should simply be a substitution of spending in other areas - using the prioritisation framework you propose.</p> <p>We note that neither electric or hydrogen buses are viable at this time, as they would require an increase in power generation at Huntly Power station, which uses coal - hence defeating the intended environmental benefit.</p> <p>With regard to tree planting, we would like to see Council better manage the land, trees, and parks it already has as a priority ahead of new planting. In particular to prevent the proliferation of invasive pest plants.</p> <p>While cycling and e-scooters have become more popular as a mode of transport in many parts of the city and may increase markedly with the prices of petrol and the use of e-bikes, it is hard to predict the extent to which given the topography and rainfall will allow it to become a 'cycling city'. Safe cycle routes are valuable, but sharing will remain common.</p> <p>We support action to mitigate the impact of tidal inundation by providing generic solutions and planning approvals for coastal protection where viable.</p>

<p>Issue 2 - Budget Pressures</p> <p>We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:</p> <ul style="list-style-type: none"> • using the Government's Better Off support package funding • changing the timing of some capital spending • implementing cost reductions in the form of efficiency savings and potential reduction in some services • keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023 • considering the sale or long-term lease of additional non-strategic assets as required. 	<p>BRA Response</p> <p>We support the plans overall.</p> <p>We expect, however, that the decision on any service reduction or sale of assets must be agreed by the Local Board in that area.</p> <p>We would also like to see the Council focus more on its own internal efficiency. There are many areas where its processes and structures appear to support silo thinking, duplication of effort and ineffective delivery.</p> <p>There is a strong case for ensuring that Council is better able to interact collaboratively with contractors, citizens and community groups. Council's various CRM systems are inefficient and communicate poorly with contractors and stakeholders resulting in public frustration and highly inefficient and wasteful processes. Council's primary contractors eg Ventia and its subcontractors are unfortunately inefficient and poorly integrated with Council's request for service systems.</p> <p>Council has undergone a number of restructuring exercises - none of which have resolved its silo mentality and its ability to get work done efficiently and effectively. Council has many excellent staff - but Council's structures and processes impede their effectiveness. We suggest consideration of an independent review of the organisation's processes and structures to ensure it is run as efficiently and effectively as possible.</p>
<p>Issue 3 - Prioritising operating spending</p>	<p>BRA Response</p>
<p>Proposed criteria for prioritising operational spend</p>	<p>We support the prioritisation framework.</p>
<p>Issue 4 - Waste Service standardisation</p>	<p>BRA Response</p>
<p>Question A</p> <p>Instead of Pay As You Throw, we are proposing a change of the waste plan to a region-wide rates-funded rubbish, collection service with a choice of three bin sizes ...</p>	<p>We support the proposed standardization.</p> <ul style="list-style-type: none"> - We support rates-funded waste removal for recycling and rubbish, assuming it is cost-effective to provide different bin sizes. - We somewhat support rates-funded removal of food scraps, and would want it as an optional paid-for service. That is, only residents choosing to use it are charged the rates. <p>We support all efforts to ensure efficient waste minimisation and recycling.</p> <p>We note:</p> <ul style="list-style-type: none"> • Food scraps can be fed to a home worm farm, compost or put through an Insinkerator. The provision of food scrap bins

	<p>and separate trucks to pick them up will increase vehicle emissions, costs and carbon emissions. We also wonder about the hygiene and associated smells of leaving food scraps in bins for days at a time.</p> <ul style="list-style-type: none"> • We suggest the Council develops a more effective educational scheme for householders on how to minimize and dispose of waste. Noting that this is not a core or critical service at this time. • We also note that up to 86 per cent of all plastics in Sweden are being incinerated and used to generate electricity and heating. We hope Council will continue to look at such recycling opportunities. • We support efforts to ensure that no plastics enter the environment and to maximise reuse and recycling.
<p>Question B Standardise the opt-out rules for residential multi-unit developments (10 or more units) Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Standardise the opt-out rules for non-residential properties Apply a minimum base charge to every separately used or inhabited part of a property</p>	<p>We support the standardisation in all of these cases.</p>
<p>Other feedback</p>	
<p>Increasing Local Board decision-making over local community services</p>	<p>We fully support any increase in decision-making at Local Board level.</p> <p>The Local Board are our elected representatives; we would like to see them have greater decision-making power and for Council Officers to work more collaboratively with the Boards.</p> <p>Supporting this, we encourage Council to develop a culture that recognises Local Boards and the community as Council customers. We believe they are better placed to represent the best outcomes, than Council Officers and the governing body who have less direct connection to our community and in some cases implement decisions which are remote from community aspirations and needs.</p>
<p>Format of the consultation document</p>	<p>It was good to see the plan available in multiple languages, so it is more accessible and easy for people of different ethnicities to follow. We applaud this as we have a very diverse community.</p> <p>Given, however, that one of the language options is Te Reo, it is unclear why the English version has each section in both Te Reo and English.</p>

	This is an illogical duplication of content and makes the English version much longer than necessary.
Budget and general approach	We do not support preferential or discriminatory treatment or special rates for any sector of society based solely on ethnicity.

PART 6: KAIPATIKI LOCAL BOARD PRIORITIES

We support all of the Kaipatiki Local Board Priorities.

We are pleased to see their continued commitment to all areas of Kaipatiki, and the benefits of their work on the Birkenhead War Memorial Park, Little Shoal Bay, Hinemoa Park and other reserves in our area.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: As a superannuant rates are already crippling. Too old to ride a bike. Too poor to visit CBD and pay petrol and parking .already use bus ferry on few occasions we move from home

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Past history of claimed savings for future savings seldom if ever occur.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: no comment

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Unfair to low waste contributors like us. We compost food scraps already, use a private yellow bin bag only every 4 weeks on average.

Waste to landfill will increase. We have neighbours who already use a larger bin and as a result hardly ever bother with recycle bin.

Under proposed scheme this failure to recycle will increase massively as no real incentive to recycle remains.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Reasonably happy with past performance but need more cost benefit study for some rather grandiose schemes

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

As above mentioned a need for more rigorous cost benefit studies, especially on transport. eg very expensive cycleways that have few users and remove parking and kill local retailers. These seem to be driven by ideological almost cult member planners in council.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Should have been done years ago. Would be a good first step to stop the current wholesale destruction of urban trees ~ in addition to resorting to planting new trees . And ensure development areas plant suitable trees not like the exotic plane trees planted in Takapuna and Hobsonville point

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Start looking for simple savings ~ for example do islands that do not pose a traffic hazard have to be maintained / mowed as frequently as are currently ? Would be a cost saving and would aid the environment !

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: As above

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: For low rubbish households this is really unfair. Not at all economical for small households who have minimised their waste and only need rubbish collection once every 8 weeks . The food scrap collection is also a total waste of money for households who already efficiently use a compost bin ! I saw a council employee stating on TV a few weeks ago that the council would not roll out recycling bins in city centres / parks because people keep throwing landfill rubbish in these ~~ one can only think the same would occur with household foods crap collections ~ ie would get landfill in there !

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is going to have far-reaching effects on New Zealand's largest city, both in terms of environment and society. We need to plan for that. Already we are seeing more frequent flooding and drought events, and these are likely to get worse. I want my children to have the chance of a liveable city (and world, but starting with the city they live in is a step in the right direction).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Climate change needs to be a key priority

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: There is no incentive to reduce waste production with the removal of PAYT. Waste must be minimised so that Auckland doesn't have to use landfills such as the proposed Dome valley site (a site which I believe is inappropriate for a waste dump in any case). People who already do their best to minimise waste will be penalised under the proposed new scheme. This is a bad thing.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I believe that the Tūpuna Maunga operational plan needs to incorporate retention of habitat and large trees (rather than "returning areas to open space"), because the Maunga are key ecological stepping stones and the retention of biodiversity is important for tikanga.

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Money is needed to fix /mitigate this problem.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: You just keep spending more and more and burden us the rate and tax payers seemingly without clear ideas what is ahead. Otherwise there would be no gabs so somebody is not doing their job.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: It is your job!?

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT is straightforward and tackles the root cause of waste the more you produce the more you pay, simple.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Or is there anything further you would like to give feedback on?

Physical activity and the community connection that comes from team sports are extremely important for the physical and mental wellbeing of Aucklanders of all ages. This has become particularly apparent during Covid times, where connection and the simple act of getting outside and playing sports become so important.

As a Cricket Club, Birkenhead City Cricket Club greatly appreciates the continued investment by Auckland Council in facilities and fields that enable cricket to meet the needs of its diverse community. We feel that it is essential that this investment is protected and continues to increase as Auckland grows. As Auckland intensifies, people will need increasingly need community sporting facilities. Protecting and enhancing the current Cricket fields and facilities is therefore very important.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change needs to be a step change, and that costs money

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Council and CSO'S should be looking at their bloated management structures and non essential roles first.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Public have the right to input to these decisions

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I am a single person household and avid recycler. I only put my bin out every 2-3 months. This system penalises people like me, who do the right thing

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Buses must be BEV or hybrid/ hydrogen.

Smaller buses to ensure low volume runs are more economical, we see empty large buses very often in our area and down by Birkenhead wharf.

Ferry service low priority as volumes are much lower than buses.

Lower fees on public transport to encourage use.

Tree planting in parks and reserves, old poorly performing trees need to be culled and replanted.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Delay unnecessary capital works programs, e.g. nice to haves but not for the greater good (art projects in parks, delay for better times and when through Covid recovery).

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Fiscal responsibility, it is the ratepayers money and needs to be well spent, not on glory project. What a waste of money a waterfront stadium would have been. We have under-utilised facilities.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This is an extremely unfair policy, most people we know only put one bag out every four to five weeks. Elderly, responsible ratepayers and low income families/ single individuals will be unfairly targeted.

I thought the idea was to reduce the volume of rubbish not increase it, many are saying they will throw out more to ensure they 'get their monies worth'.

Be fair.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Too much is spent on over engineering projects, get the basics right and add the nice to haves if money is left over in the budget.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: All of the above will create more vibrant and stronger communities, by bringing people together in public transport, giving opportunities to exercise via cycling and beautifying the suburbs by bringing in native flora and then fauna. These communities will have done what they can to lower the pressure on Earth's changing climate and could be proud of that fact.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support the ability to have flexibility in acquisition of capital to fund the proposed projects, but my concern is the points made can be quite vague and may depend on what is meant by each e.g. what does it mean by 'some' capital spending and which spending? Implementing cost reductions sounds great, but where? Auckland Council is digitalizing more and more for optimization and cost reduction, can there be more done?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support the prioritization of services, but like the previous question, I'm concerned at what those choices will be. How will they be ultimately chosen. I'm a firm believer in optimization in governance, this allows for the more important aspects of life to flourish, but if services are reduced that would have enhance the latter, then it makes the reduction moot.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support standardization to give the sense of a united Auckland on these issue. As long as it remains firm in the idea that this is helping not enhancing waste from households.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They align with my values. Better built environments/communities means healthier happier people. It's a society I want to be a part of.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Council needs to be leading the way and when the government aren't doing enough, we need to start doing more as a region.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: As long as you don't cut more staff, when their workloads are already at capacity!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: As long as you don't cut more staff, when their workloads are already at capacity!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

With such a large sporting community, more focus needs to be put into the facilities available to support our local children playing sport. Takapuna Cricket Club is one in particular, we would like to see more support and funding given. Due to the growth in our player numbers and participating teams (2015: 658 playing members to 2021: 1351 playing members) , there is a major lack of training facilities for our members at our club grounds at Onewa Domain # 1 and #2. Therefore, we would like to request that new training lanes are to be installed on Onewa # 2 to cater more training facilities for our players. Currently, we have only one grass pitch at our club grounds at Onewa Domain # 1 and no grass pitch on Onewa # 2. As per the Auckland Cricket playing conditions, all Premier team games are to be played on grass pitches. Therefore, due to the non-availability of the second grass pitch, our Champion Premier women's cricket team are compelled to play all their home games away at Hobsonville War Memorial Park. We request that a two strip grass block is built on Onewa # 2 and this will give our club the opportunity for our women's teams to play at our club grounds and this will give us the opportunity to promote more girls and women's cricket to our Community.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is unnecessary spending.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Transparency here on the 85m figure and how this was calculated.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Again tell us what the plan is! I've looked at the attachment Service Prioritisation which tells me nothing.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We pay for this in our rates now we should not have to than buy tags for our rubbish. Standardisation is necessary here.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Priorities should be

- Closing down of vape and liquor stores
- Facilitating youth programs
- Ensuring the local police shops are staffed (beachhaven, glenfield) 24/7
- Maintaining regular drain inspections, road sweeping, tree/debri clearance

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland Council facilities SHOULD drop all Vaccine Passport requirements 4th April as per the government's advice. Should AC decide to continue to partake in this illegal and unlawful segregation of Auckland residents not only will rate rebates be entitled by those residents you are excluding but we hope you do not use public funds to defend yourselves should further action be taken against AC.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: These areas of action are vital to achieving any significant improvement in climate action. Current budget constraints require a balancing of funding that can erode climate action, A targeted rate should enable confidence that contributions will be well spent on these items.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Decisions must use lenses of well-being and climate response to skew impacts favourably.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Incentives are still needed to encourage waste minimisation. Tag system is clearly costing too much to run, but some other intelligent system may be needed.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is probably the biggest challenge to ever face humanity and we must do everything we can to counter it and try to halt it. This proposal would help.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

The key issue for me is the way in which I get around the city. I'd love to be able to cycle to work in Parnell from my home in Northcote Central. It seems absurd to me that polluting vehicles are given special treatment in access across the Harbour Bridge. I've lived in and visited a lot of cities and this situation in Auckland is an embarrassment. It shows we're not really taking the science of climate change seriously at all. If we were taking it seriously we'd prioritise non-carbon emitting means of transport over fossil fuel burning means.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Why is it targeted to Auckland residents only? This should really come from the government budget across whole country.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There is a lot of wastage. Funds are not used appropriately. Furthermore, timing is not right due to the 2 years pandemic which caused a lot of hardships to people.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT is more practical for small households.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The new system is unfair for those who do not put out their rubbish weekly, as they will end up paying the same amount as those who do, and likely more than they do currently. e.g. those who compost their waste/elderly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: People might think that by paying this fee, they have done their share.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I understand that the spending has to be cut but it is important to keep people connected, supporting any initiatives to promote harmony among our diverse population. While Covid is here, we need to reduce mega events and support worthwhile initiatives - where you won't necessarily see "value for money". Harmony in challenging times is more important than the focus on money.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: See answer to Question 2

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: It takes me months to fill the smallest rubbish bin available. I have a compost, cook myself and have very limited packaging material. I never have food scraps as I only cook what I eat. It also takes me months to fill the recycling rubbish.

I use resources consciously. This is something that should be promoted.

If you pay a standard rate instead of Pay-As-You-Go, you are giving the wrong message to people. They will think that they have paid for a service, so they will use it.

If you care for mitigating Climate Change, you don't start by "punishing" people who are avoiding waste in the first place.

Please do not change the current plan!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:I like the idea of a heritage trail.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I sent my feedback regarding the waste management to Auckland Council. Then I was told to give feedback on the whole Auckland Annual Budget.... I haven't had the time to read all details and responded as well as I could.

Please do not change the current Pay-As-You-Go. I strongly believe that this would send the wrong message to many people.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Our household income has reduced and can manage to cover our essential needs. Another increase in rates to cover the cost of the climate emergency plan will be confusing

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Our household have multiple families in our care.

We are supporting each other to recover financial losses in the past 3 years

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: There are too many bills to pay

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: I would rather pay a little now than pay a lot later for the consequences of climate inaction.

It will provide quick, low cost, transformational options for reducing emissions. Little to lose compared to huge potential gain! This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making.

Climate justice is paramount. I strongly support the rate focusing on under-served areas. Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

I want to ensure that the Council actively honours Te Tiriti, tino rangatiratanga, and mātauranga Māori.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Need to have an opt-out system for those that won't need some of the services e.g. people who compost or have worm farms may not need to use the food waste collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Some areas are already using rates funded system and with increase of food, petrol and day to day living costs and the effects on household incomes and covid pressures landlords are in a better financial situation to pay for rubbish removal from their properties. This will also reduce the risk of illegal dumping from those who are already struggling. Due to more extended family living situations if families are wanting to upgrade to a larger bin, perhaps then they can pay the extra costs.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Does local communities also include Sports Clubs and their facilities. They provide an essential service to the communities in the well being space and with covid have been impacted significantly especially Birkenhead City Cricket Club that have 3 clubs that use their premises due to the removal of the council grandstand which housed Rifle Range, Calliopes and Northcote Tigers changing sheds and storage. They are all now paying for their own storage and need councils financial assistance to improve their facilities for the public especially now the Birkenhead Memorial Park master plan is on hold

6. What is important to you?

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: As a ratepayer currently residing in North Shore City I wish to voice my disappointment at the councils proposal to scrap the Pay as you Throw system of rubbish removal in 2024/25. I do not believe this in any way addresses the present and future problem of domestic waste minimisation as it encourages ratepayers to use their rubbish bins on a weekly basis because the council are going to charge accordingly.

At present our household of three adults uses a 60 litre bag for rubbish disposal which we put out every three weeks meaning a yearly cost of \$45 versus the new proposed charge in 2024/25 of \$124 for an 80 litre bin. We are also going to incur a further rates increase for the proposed introduction of a food scraps bin which will be of little benefit as we currently have a composting system working in tandem with a Hungry Worm Bin to take care of any unwanted food scraps.

Auckland City Council have acknowledged that to now change those areas of Auckland (North Shore, West Auckland and Papakura) currently piloting the PAYT system to a weekly rubbish charge will financially penalise ratepayers who at present are practising the principles of waste minimisation.

Our own personal circumstances mean going forward in 2024/25 the council are prepared to charge us an extra \$150 for rubbish disposal.

My strong preference therefore is for the council to continue to roll out the PAYT system city-wide as common sense dictates this will lead to less rubbish going to refuse stations and those ratepayers willing to reduce their carbon footprint will be financially rewarded.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to prioritise climate action. What was the point of declaring a climate emergency otherwise?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I didn't have time to read this section, but in principle I agree with the first 4 levers proposed. I'm not sure what constitutes non strategic assets but I wouldn't want to lose any recreational spaces

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: Haven't had time to read this section

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Rates funded sounds more equitable.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't agree with your philosophy of having a higher percentage for rates for a property with higher CV.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

With the removal of the Takapuna Office at The Strand, I believe the ratepayers have lost an opportunity meet any council officers when required. Of course, I agree that this changed with Covid to Council's advantage.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Currently our household minimises waste and we only put our bin out every 6 weeks. We therefore only pay when we put our bin out. We are on the North Shore so are well used to the PAYT system.

If it is decided to move to a rates-funded system then we will fill our bin each week with recyclables & garden waste as there is no incentive to use to not fill it as no matter what we do we will be charged for it to be emptied weekly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Other

Tell us why: You need to spend money to upgrade the tracks and boardwalks in Kauri Glen with urgency. These are the best kauri in Auckland now and they need to be protected ASAP.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

ACTIVATE NORTH' SEEKS NEW PLANNING APPROACH FOR CO-ORDINATING DEVELOPMENT INTRODUCTION TO ACTIVATE NORTH Activate North" is a working group established to advocate for the transformation of the area from Devonport to Orewa and west to Hobsonville and Dairy Flat, into a connected community to live, learn, work and recreate, while reducing the need for residents to look for employment opportunities outside their locality. The working group consists of representatives from eight different organisations including Business North Harbour, Takapuna Beach Business Association, Benefitz and Brosnan Construction, full details of the working group members can be found at <https://activatenorth.co.nz/activate-north-details/> .

SUMMARY

Activate North's first initiative is to call on Auckland Council and the Government to deliver a collaborative strategic plan for the area, modelled on international best practice such as the Greater Sydney Commission's Collaboration Areas program.

We anticipate that this will be a long-term piece of work, but to start with Auckland Council should allocate at least 1 FTE and, say \$75,000 to allow the ground-work and research to take place to begin to set up the structures needed to create a collaborative strategic plan. As we explain below, the end result is not a zoning plan (though that may be an outcome). We would expect to see a list of identified priorities and actions which are then implemented by Auckland Council and other stakeholders.

North Auckland (Devonport to Orewa and west to Hobsonville and Dairy Flat) is growing rapidly. Even prior to the Government's changes to the RMA to enable housing supply, around 54% more people were expected to be living within the area by 2043. The Government's cost benefit analysis anticipates doubling this planned intensification with the result that Auckland's northern urban population could double in size within 20 years. That would create a community approaching a million people.

Against that population growth:

- North Auckland relies on the Auckland Harbour Bridge that has "exceptionally weak" ground conditions and which presents a critical threat to fragile transport links and Auckland's economy.
- Auckland's North Shore is the second highest area for ICT businesses and professional services and has New Zealand's highest growth rate for TIN200 companies.
- There is a critical shortage of new business land, with the only new area likely to come available is at Silverdale around the North Shore Airport. Albany and Takapuna are basically retail centric areas with office support.
- In order to achieve the government's new target of reducing emissions to 50% below 2005 levels within the next 9 years, people of the north of the harbour bridge are going to have to drastically reduce the distances that they travel to work and the carbon emissions they generate in doing so.
- The government's intensification has preceded any planning for new schools, playing fields, parks and business land.
- The education pathways for north Auckland kids to transition from school into jobs are already inadequate.
- The east coast bays area is likely to attract a greater share of future housing intensification than other parts of Auckland because of its attractive beaches, parks and schooling.

IMPACT OF CHANGES TO THE RMA

The RMA changes will bring a massive change to the urban form of North Auckland because the area is dominated by the Mixed Housing Suburban and Single House zones which will have the greatest intensification under the RMA changes: 3 dwellings of up to 3 stories on each current lot.

Planning for brownfield intensification is considerably more difficult than greenfield expansion and we haven't had much experience with it in New Zealand. The best examples are relatively confined residential areas such as the Tamaki Regeneration Plan. That project involved a lot of direct investment and planning by the government, and it is much, much smaller than the scale that northern Auckland is facing.

Prior to these changes Activate North was already working on an initiative in response to the "Shore Unity" report which identifies some major concerns facing the area. It also highlights some exciting opportunities including:

- nurturing a connected and innovative residential, education and business community, to attract investment and drive business and employment growth;

- creating transport certainty by providing a seamless system which includes improved roading, parking and public transport, which links residential, education and business areas.

We now face a critical crossroad; choosing to channel the huge disruption caused by Covid-19 and the major RMA amendments to make some structural changes to the sub-region's economy and to make sure that the next 500,000 people living north of the Harbour Bridge will enjoy it, or people will leave the Shore for the regions or, more likely, Australia."

"This is not simply a zoning issue and no single agency, or layer of government, can deliver great places alone. We need to bring together central government, Auckland Council, CCOs, local boards and key northern institutions to collectively create a great future for North Auckland.

WHAT IS A COLLABORATIVE STRATEGIC PLAN?

As we see it, a collaborative strategic plan is not a zoning plan under the RMA or the Unitary Plan. It may lead to further plan changes, but fundamentally it sits between the Auckland Plan (which is high-level and aspirational) and the Unitary Plan (which is only a zoning framework and does not identify or fund specific projects or initiatives).

There are a number of New Zealand examples of planning partnerships that have developed in New Zealand, well known examples include SmartGrowth (Tauranga) and Future Proof (Hamilton). However, these examples have largely been focussed on responding to the challenges of delivering efficient and cost-effective greenfield growth. Responding to the massive intensification directive on Auckland's north shore requires a modified response.

In this respect, while generally private sector companies are not partners to these strategies (particularly in NZ), the strategies do detail the intention and reliance upon collaboration and partnership with the private sector in order to achieve the objects of the strategies (more so in Australia, though this tended to be very large private players rather than business collectives).

These international plans involve capitalising on forging relationships with local businesses and large private sector companies to assist with and contribute to the future planning of urban areas and there is no reason that a slightly modified structure couldn't be used on the north shore to reflect the importance of small businesses and SME's on the north shore.

The international case studies show a mixture of local government-led programmes seeking to engage with the local community and private sector, as well as community-lead initiatives seeking to be more collaboratively involved in planning processes, which serve as a better guide to Auckland in that they recognise and respond to the challenges of brownfield redevelopment and they pick up on the important role which the private sector has to play in employment and creating a high quality urban environment.

As a result, we see that there would be substantial benefit in looking to the Greater Sydney Commission's Collaboration Areas, to respond to the challenges facing the north shore.

- This was a programme created as a new approach to help address complex city making issues through better coordination and collaboration.
- The Collaboration Areas comprise of the partnership of local councils, state government agencies and key organisations that work together to create change. This is analogous with the two New Zealand examples but with greater room for the private sector to be directly involved.
- Similar to the New Zealand programmes, the Collaboration Areas programme recognised that building genuine partnerships and working together was key.
- A NZ focussed approach would result in some differences, for example, we see that there would need to be direct involvement and participation by relevant iwi authorities.

In particular, the lessons from Camperdown-Ultimo seem to resonate for those on the north shore.

- The Vision for Camperdown-Ultimo is identified as being:

"In 2036, Camperdown-Ultimo Collaboration Area is Australia's innovation and technology capital. Industry, business, health, education and skills institutions work together and talent, creativity, research and partnerships thrive. Low carbon living, green spaces, places for people and easy connections support resilience, amenity, vitality and growth."

- Key findings include:
 - o Major urban renewal and redevelopment was planned;
 - o "This recognises the significance of health and education precincts in driving economic development, growing sustainable employment and promoting equity and social sustainability."

- o The Collaboration Area also has an identified stakeholder group, which includes a number of government departments, and other organisations including “Jobs for NSW”, “Sydney Business Chamber”, different tertiary institutions and health boards.
- o The Collaboration Area held meetings and workshops which saw significant input from the above identified stakeholders and many others, to identify challenges and opportunities facing the Collaboration Area.
- o The format of the Place Strategy was to propose 11 priorities and 39 actions, focused around five themes of connectivity, liveability, productivity, sustainability and governance.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: eg stop replacing perfectly good old wooden bus stops with glass ones that soon get smashed, and according to new stickers are now cleaned and checked every week 'for our safety'. How much does that cost us? Talk about out of touch... I know that's AT and Simon Wilson says council is pretending to be powerless, who knows.

eg stop spending crazy money on unnecessary stuff, eg Frank Larkin's boat in Beach Haven, the plastic pontoon in Torbay, ripping up perfectly good concrete paths in shopping centres all over Auckland and replacing with swanky new paving to gentrify the area. I'd rather pay less rates thanks, and not add to the throw away society by chucking concrete on the landfill (no doubt that's where it went?) that was still perfectly fine. And i'd rather have a stable climate than completely unnecessary new paving; council's priorities seem to be more about image and 'world-class city' keeping up with the Joneses than real commitment to environmentally and climate-friendly policies. Don't replace or renew anything until it's absolutely necessary, i hope that's what council will start doing. It hasn't been doing that in recent years.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I thought people are supposed to be more diligent about recycling and waste reduction etc when it's charged separately? (I grew up on the north shore and was at school when PAYT was introduced - that was what we were told at the time). My family started composting around that time and the separate charge for rubbish was a factor in that behavior change - I grew up composting and have never stopped. Campaigns around composting were also an important part of changing our family's behavior.

I think the opt-out should be available for anyone if you insist on a standard waste charge for all regardless of behavior or circumstances. It will be cheaper for many people to stay with PAYT or opt for that, than a 'chuck all you want, the council will take care of it and charge you heaps more for the privilege' model. To me you are penalising the people who 'do the right thing' (or would do so if they were incentivised to and better supported in that behavior change). Under the proposal these people will be charged much more for waste disposal they will never use, at a time of financial stress for many. It's essentially subsidising those who never think about it and throw out more than their fair share of household waste, while people who do all they can to minimise their household waste (or would do so in order to save money, be a responsible member of the community etc) will see their costs go up. It seems the opposite of transformational change to me.

At the moment doing the right thing actually costs you money and this will add to it. eg I was charged \$5 or something at a recycling centre for some batteries and dead energy saving lightbulbs i'd kept separate, I think it should be free. There is no mention in your report about reducing building waste which I heard was some crazy figure, half of Auckland's waste or something. Why is council apparently ignoring the building sector and this obvious low-hanging fruit? I understand huge reductions in landfill dumping by the building sector are achievable with the right incentives and systems etc; it's not

a technical problem. If so, the focus on households and what seems to be ignoring the building sector's huge contribution to the problem seems a glaring omission.

I support the implementation of food waste bins but think we should compost it locally instead of trucking it hundreds of kilometres to be burned in an anaerobic digester. To me this entire process is not 'green' at all, it's pure greenwashing. It's inefficient and encourages us to ship our problems elsewhere instead of dealing with them ourselves locally, which encourages not connection but active disconnection from our actions and their consequences. Local green jobs and microbially-rich compost as the output (the basis of 'regenerative farming'), produced as close to source as possible should be the goal in a transformational society. Getting a bit of electricity is not worth the energy cost of transporting all that food waste huge distances from its source, in addition to losing the potential income stream from the large amounts of compost that could be created. Commercial-scale worm farming operations are in operation right now turning food waste into a valuable resource (see www.mynoke.co.nz, it was on Country Life on RNZ a few weeks ago, well worth a listen).

Efficient compost production will apparently be an essential component of any serious attempt to make regenerative farming practices the norm instead of the exception. So to me council is kind of in the dark ages, or believing its own fake news, with its seeming belief that this anaerobic digestion non-solution that transports the green waste of one third of NZ's population far from its source, then burns it instead of returning it to the soil, is somehow 'green' and fit for purpose in the 21st century!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Don't cut down those exotic trees on the maunga, or any public land, unless they are invasive. We've lost too many trees already. Terrible use of rate payer money. I've spent time on the maunga where the trees have been destroyed, it's not a good feeling. Have also seen the native trees and shrubs growing happily in the shelter of mature exotics; they will replace them eventually without any need for expensive white man intervention involving lots of noise and fossil fuels (chainsaws, helicopters etc), all funded by us in a time of supposed 'budgetary constraint' and 'climate crisis'. Just seems the most crazy and laughable hypocrisy, at least it would be laughable if it wasn't so sad to see trees killed unnecessarily. No way do I want my rates used to kill these beautiful trees that do so much good and no harm at all. There are no birds without mature trees, no life at all, the maunga seem so lonely and ill where the trees have been destroyed.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are now in a climate emergency and I want action now. But this action needs to be socially and environmentally just for all people and other living things. Those who can least afford the necessary changes should not be the ones who are the most affected by the effects of the climate emergency. In other words, climate action needs to address inequities, not perpetuate them. Therefore I strongly support the rate focusing on under-served areas. In addition, the Council need to uphold the principles of Te Tiriti o Waitangi along with tino rangatiratanga, ensuring that all peoples are represented and have input into decision making and the use of funding. In order that funding be used effectively, an effective partnership between the Council, Auckland Transport and central government needs to be established.

We need to eliminate our dependence upon fossil fuels and this necessitates the provision of affordable transport choices for everyone. We need active and public transport options as they are the most affordable and use the least energy. I want climate action now as we have a narrow window of time to make change that could have a massive impact on our future, and for what I am most concerned about, on the future of my granddaughters. It is this next generation who will bear the brunt of the effects of the climate emergency, physically, mentally and financially.

The proposed strategy I like the most is protecting and expanding urban ngahere and food gardens. Not only are they efficient carbon sinks, they also nurture community connectedness and connect people with nature (excellent for physical and mental health), plus providing habitats for native animals and plants. Expanding urban ngahere will also address the

green inequities in our city as the wealthier suburbs are also the leafiest, bringing the benefits of improved air quality and lower temperatures offered by trees as they mature.

Another strategy I favour is the provision of a decarbonised ferry fleet plus increased walking and cycling. I would also like the ownership of private vehicles, especially those reliant on fossil fuels, needs to be disincentivised and road building minimised. The building of vibrant transport hubs needs to be a priority. These strategies will improve the air quality in Tamaki Mākaurau, which will lead to improved physical health for its peoples.

However, I want Auckland Council to go further. I want more ambitious climate related decision making and funding. We need to look at what cities leading the way in climate decision making are doing and emulate them so that Tamaki Mākaurau becomes a world leading city that is managing the effects of the climate emergency in a justice-oriented way.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Support, but keen for Council to not sell off too many assets

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

re: food waste collections - I am keen on overall standardisation, but there should still be standard different options for different types of housing, ie apartment complexes should be able to opt out of food waste collection by Council as in some cases it can be much more efficient to let apartments use private services

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: If investment is not made now on mitigation measures it will cost so much more in the near future on amelioration measures.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I think that these measures are good, deferring some capital spending is a necessary evil, and reducing operational spend needs to be done very carefully. However greater efforts could be paid to aggressively integrating services, - now that Customer services are in libraries, what else could be housed there? Can future renewals incorporate community houses? Local Board Services as well? It's all very well creating spokes everywhere, but utilising obvious drop in centres like libraries as the front face for enquiries and expert clinics such as planners makes more sense than building space in the Hubs of Albany, Waitakere and Manukau.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: On the service, this matrix seems ok, however the issues I have with the concept of stopping "things that can be provided well by others" is that any of the core services of council could be disestablished and then rehired as a consultant agency. For instance, if we were to pair the council down to elements that could not possibly be outsourced, we would probably only be left with elected members, and a tiny team that hired the rest of council. So maybe this isn't the best test of what can be stopped.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Removing PAYT provides a waste management solution that is the most equitable, the most cost effective, and has ability to reduce the instances of waste dumping.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I have strong support for the heritage trail from Birkenhead, I really like the idea of mana whenua being involved, and the fact that there is already the Chelsea Archives collection in Birkenhead library makes a great (if pakeha focused) start. Also There is a great opportunity to undertake a rethinking of the Glenfield, and Bentley Road area in the town centre palm. While tactical urbanism is not necessary the answer to this, it is easy to learn from the way shopping streets such as Birkenhead village work. Does Glenfield road need to be double laned each way? Does Bentley Ave need to prioritise vehicle movements over pedestrians - especially given the council and community assets on this street.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

It is vital that local communities have greater responsibility for local issues, appropriately and adequately resourced and advised local boards are essential for Auckland Council to work as it should. Currently many Councillors are stuck between looking after local issues that are not within their remit, and local boards are frustrated at the regional decisions made without adequate input. The differentiation between regional and local needs to be made clearer. This change in decision making over community services will enable the LOCAL in Auckland's Local Government.

Local impact

Ehara taku toa i te toa takitahi, engari he toa takitini.
My success is not my own, but from many others.

The challenge as we see it

- 'Business as usual' is inadequate
- Creating a future that is good for People and Planet
- We need urgent transformation/ a step change
- Bringing everyone along on the journey
- Empowering a Just Transition
- Ensuring Council and other resources are best used to achieve this

The critical step: Partner to deliver the plan

Council partnership with Auckland's EnviroHubs network to:

- Develop the climate, waste and ngahere components of the plan
- Embed community into leading delivery wherever possible

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

To further develop the public transport.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The bus isnot always follow the time schedule which cause very inconvenience.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not Support

Tell us why: I think this is simply another way to gather more tax revenue, as Auckland Council has been doing these things already!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Auckland Council should focus on increasing its revenue and cutting off unnecessary costs.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I would not comment on this, as I don't know about the details.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Firstly, our neighbours often put their rubbish in our bins. Secondly, for the PAYT system, a lot of times the rubbish bins are not being cleaned by the rubbish collection companies. Therefore I support the rates-funded system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I do not support on increasing the general rates. I am 70 years old, and most of my super annulations are will be used to pay the bills and the general rates. This means that at some stage I would not able to maintain my current living status, and I have to change to a smaller property.

What do you think of this proposal? I don't know

Tell us why: I am not very familiar with this proposal. Auckland Council should explain more in details.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not Support

Tell us why: The CV is too high! We cannot afford our living.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not Support

Tell us why: I disagree. This is another way of taxing on us!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Kaipātiki Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.
