Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Support Trees.

Do not support public transport in relation to climate change. Public transport is and will never be the preferred method of transport in Auckland. Do not need excessively wide pavements nor streetscaping.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cost cutting is good however needs to be reduction/static rates level with cutting of staff and services until expenditure matches income, not using rate payers as a cash cow each budget.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Support the prioritising of spending however at this time wider footpaths, streetscaping and significant changes to public transport should be put on hold till budget allows.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Support the change as long as the maximum anyone is auckland pays is the amount currently charged for largest size rate funded. This is critical.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Given the current situation of Covid-19, inflation, and increasing housing prices, it is difficult time for all Aucklanders. Council should take care of your people, instead of taking more money from your people.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The house rates should keep as it is. Why don't council reduce the number of your staff, and reduce your salary rates?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I could not see clearly what you want to reduce, stop or change.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Phil Goff is not a responsible mayor. He introduced different taxes over years, and he is pushing to add more burden on his people. Is tax the only way to solve all problems? Thinking of his salary, that's from our taxpayer as well. If you don't care the wellbeing of your people, leave this position.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Far too much is being made of low emission ferry services and new walking tracks when many of the present footpaths are in a dangerous state.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Sounds like an excuse for not doing necessary repairs

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The present paid employees need to be supervised and made to work instead of hanging around jobs.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Far too much rubbish being put in bins instead of being placed on composts etc

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Time and time again one sees workers standing around doing little work . more supervision is needed to see that the ratepayers are getting value for the pay out of wages for council and gov't workers.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Good as far as it goes, but more needs to be done to get petrol cars off the road. More buses that do not centre on the city centre but more cross country routes. I would use my car less an I know others would too.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I do not think local government should rely on national government for funding. Staffing numbers and salaries need to be looked at within Auckland City employees and contractors are not an economic alternative. I do not believe you can increase rates but reduce services - what needs to be looked into is the efficiency of all services, maybe even combining services rather than reducing them.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I think I have covered this in the above. Council needs to be about people; the residents of Auckland need services and you need to provide them! Look internally for some efficiencies not an easy drop this or that to the people.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It was trialled and really did not work; neither was it cost efficient.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: This is an active local board that is aware of its community. Doing an excellent job and open to local views and opinions on the future,

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Local Boards should be the ones to make all decisions about their community and community services. What is vital in one part of Auckland may not be so necessary in another. Locals know about locals!

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is something that wasn't on the radar 40 years ago and not taken seriously even 20 years ago. Its an additional activity and effective action requires additional funding over and above normal replacement programmes. Key for me is that almost every week we see climate effects that weren't there before - and the pace is accelerating. In my opinion, it has gone too far to stop - but we have to try.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: This gives stability in the rate of increase of charges, which is needed if additional specialised funding is to succeed. If service reductions are mooted, I would like to see more consideration as to whether a volunteer programme could fill the gaps that would create, rather than simply reduce or remove services. It may be the reductions happen anyway - but you would be able to say that you've looked at all the options.

One thing I didn't see (apart from regional generalities) was any specific action for the Auckland isthmus. Given this area will bear the brunt of densification (I can see six six-for-one developments within 300 metres of home, all started in the last year), I would like to have a better idea of how issues such as parking and utility strain will be addressed.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I would caution against spending too much on prioritisation. However, the city is a living organism and as such, things change. Removing the services that have gone past their use by date seems a reasonable course of action. See previous comment on the use of volunteers; it is difficult to get such information from the council's website at present. A prominent "How can I help?" section to highlight gaps that could be filled this way would be a cost-effective addition.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Everyone generates waste of some kind. Standardising means the collection fleet can be deployed more effectively. The use of bins can be seen as a challenge to reduce the size of what you put in them, and thus reduce the amount of waste. I would like to see a better summary of what can be recycled effectively, particularly around soft plastic; when last I looked, the information had a lot of ways of confusing people.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: Not sure - much of this is worthy but I'd like to see some "create" rather than all "support". I've been impressed by initiatives in past years, less so by this one. Granted, some of this may be COVID caution and I like the idea of helping people find their voice locally; but I wonder whether there will be progress this year or not. Nice vision - a Puketepapapa to be proud of. By the end of the year, I'd love to see a "here are the gaps" report as a basis for future action.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Great idea not to require resource consent for rainwater tanks - the more of those we can get in, the better. Same with standardising cemetery processes - a much needed idea that was always going to take a lot of time to get right. Reducing responsible owners licences asks the question "can we promote responsibility in other areas?". Perhaps start with takeaway rubbish?

I think the TMA plan needs more time to allow to work. I see that authority as restrictive at the moment and the changes they are making don't improve the landscape of the cones or the walking opportunities. However, I'd be willing to give them more time to develop their vision - if I knew what that vision was. So far, the only statement of that kind I've seen was at Big King; I'd like to see what they see for sites such as Maungakiekie.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: You need to be honest about rates increases, not hiding extras in targeted rates. If you want to spend money on climate change then get the money from normal rates.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: yes - stay within your budget.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: but why prioritise climate change over mitigation of key risks?

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: best option to ensure rubbish is not illegally dumped.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: plant trees, do programmes and talk about low carbon journeys, but do them for the single benefits - don't claim you are fixing climate change. what nonsense.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Improving transport choices has not worked so far and is not likely to work. Council has created bus lanes all over Auckland for faster bus service. These buses have extremely low occupancy. However there is less space for other vehicle users during peak hours. The bus lanes are creating more pollution than reducing it. Less said the better about rail projects which no one knows when it will complete

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Budget spending needs to be managed not fund collection

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Prioritisation is only on a paper with no details. Lot of funding must have been spent and more will be spent with little or no tangible plans

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Not likely to work. What happens if people do not pay for rubbish collection

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: General OK with the suggestions but believe council can do a lot more to save money and be more efficient.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: See above. Climate action should not be a spending priority for Auckland council.. Its needs global concerted action and needs to be support by all not just ratepayers

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I don't get many services for my rates dollars. Waste management is one of them and the current system works.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Supporting the community through these difficult times should be the main priority

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

1. Freezing or reducing rates through council efficiency and cutting spending where possible
2. Speeding complex and contorted planning rules

Important privacy information

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: First there are general rates increase, then a targeted transport rate that isn't being used properly and now a targeted climate rate, it's just more taxes because of inept fiscal management by council, so I don't support it. Tighten up spending elsewhere in the budget to use for climate change.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: But more needs to be done s bring down the cost of wages at council by stopping the bloated exec level salaries by the mayor and others!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: Each year Auckland Council finds new reasons and excuses to increase rates for rate payers with little or no change in services, absolutely shameful and disgusting, in the garb of consultation, feedback is sought, but the council does exactly how it pleases.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: The rate payers have been inversely impacted with the pandemic, people have lost jobs, salary cuts, Council has not socialised any cost cutting measure that it has implemented, it seems oblivious to the rate payers difficulties, the Council think tank has its head in the cloud, I wish they could wake up and smell the salts.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I am not confident with the prioritisation process that the council follows

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It will be another method for the council to gouge more money out of the rate payers pocket.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I see no tangible outcomes from any of these priorities, these just look good on paper.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: Simple solutions are good. Get people using public transport by giving users a compelling reason for using it. Make public transport free, get the car and road users to pay extra to cover this. Me being a car user would pay more, because less traffic would be on the road so would not mind paying extra. Electric buses. Forget light rail, too much cost that is only relieving a small finger of users. Carry heavy rail from Onehunga to airport and out to Puhinui.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Reduce wages of staff, Wage increases of some staff eg top council exec \$30,000 increase is disgusting..... Talk about greed...get someone to do the job for less.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Spend more money on mowing berms. Auckland is one scruffy city with overgrown berms everywhere, This should be core business. Leaving it to others is not working. Let people who want to mow their berms do it, but make sure all others who dont get mowed by the Council. Surely this should be core Council business.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Bus services are not improved. AT reduced services in our area meaning changing 3 buses to get to one destination that previously had 1 bus. Our suburb is missed on the loop of several routes that pass nearby. I could drive to where I need to go in less time than it would take me to walk to the nearest bus stop to use these routes.

TMA want to decimate trees on Aucklands maunga, many trees have been lost or wasted by council cutting down plantings. Your actions do date do not align with your climate action targeted rate.

Council is planning on allowing residential building to be built on prime arable land. Where do you propose we grow vegetables? Bring them in on trucks from other regions? More fuel burnt to do this. Not climate friendly.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Stop wasting money on vanity projects. The light rail project is never going to happen, most people don't even want it, and far too much money has been wasted on it already. Our existing roads need fixing first. Too many noses in the trough, I doubt the high end earners in council really need a 6% pay rise backdated to last September.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: The service prioritisation document essentially tells us nothing. Have any services been identified as needing prioritisation. Based on past efforts this council doesn't know how to prioritise and has wasted millions.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I DO NOT support PAYT, it will result in people off-loading rubbish in other peoples bins or an increase in illegal dumping.

The document is confusing though, it states:

To minimise household waste the current waste plan commits to:

the introduction of a region-wide "three-bin" collection system (rubbish, recycling and food scraps) over time to enable maximum diversion of waste from landfill

implementing a region-wide PAYT charging system for rubbish collections.

Are you implementing a PAYT system or getting rid of it? Because further down you say "Instead of PAYT, we are proposing a change of the waste plan to a region-wide rates-funded rubbish, collection service with a choice of three bin sizes to accommodate different household needs."

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I DO NOT support the light rail

I DO NOT support the TMA culling trees on Auckland Maunga

I DO NOT support the transfer of regional parks to another body

I DO NOT support the climate change tax

I DO NOT support Three Waters

I DO NOT support the massive infill housing without providing carparks.

I DO NOT support most of the lowering of speed limits in suburban areas - you can barely drive in Auckland at the proper speed these days

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's a good idea, but there has to be massive improvement to the public transport system to make it efficient and worth it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: We have all faced Covid related financial stresses, but the general public are not receiving any money to support with this, so how does the Council think we can afford an increase? My salary isn't increasing, yet inflation, petrol, rates, food etc are all increasing. How is the general public supposed to cope? From the projected savings from various schemes I don't think the rates need increasing.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: Is this going to make a difference to me? I assume I am already part of the rates-funded system, and I would be angry if a widened rates-funded system meant that I had to pay more. 3 different sized bins? ridiculous. Some weeks you need a bigger bin, some weeks a smaller one.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: All very touchy feely - no goals within these priorities, just very loose. What are the KPI's?

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to take action on climate change for the next generation. We are running out of time so 8 support this.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think a rates funded system will be more efficient.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: There is already a lot of money in the pool which has not been used. there are too many unspecific details on how the money will be spent.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Assets should not be sold.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: What a load of irrelevant waffle. There is nothing specific that one could comment on. Just spin.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: At last! Details! Personally do not need the waste food bin as we compost everything and hope we would not be charged for it if not using using it.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We will all benefit from the changes, so should be contributing to the cost.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Most of these proposals would be reasonable at any time. Covid has resulted in difficulties across the board. It is easy to justify one-off measures to recover from its impact, being mindful of not doing anything that can be avoided and later regretted.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: There will be factors and consequences that are beyond my experience to reasonably judge on

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Simpler to use. We are low rubbish generators, only putting out rubbish every few weeks. It would be nice to pay according to our landfill use, and to make it difficult for neighbours to fill our bin when we do put it out.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: This local board has for many years prioritised inspired community projects and principles. This is clearly still the case.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Not at this time

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I don't have an opinion on rates-based or PAYT particularly, but am pleased to see the city rolling out food scraps collection. Also, can we have better signalling of what can go in recycling bins and generally some public education around rubbish minimisation and recycling. In my neighbourhood I see a lot of random use of bins incorrectly.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I fully support the Tūpunga Maunga Authority. I am also pleased to see the proposal to not require building consent for rainwater tanks (unless to be linked up to the internal system). This removes a barrier to installing these, which can be a significant help with gardening in drought conditions and (I assume) also take the pressure off the stormwater system.

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I am advised that the rates come up for reassessment in the very near future so the need to get this email to you is imperative. I am dismayed that I will be charged for both a rentable dwelling and an additional rubbish bin, neither of which I have. Please refer to rates reassessment for the full story, send someone out here to have a look

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to do more to address climate change and fund renewables and public transport options.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: As a 25yr old privileged white guy from Kingsland who would be moderately comfortable for the rest of my life even if emissions continued at the current rate, I say we need urgent action now. Take away some of my creature comforts like easy parking and wide roads and use it to achieve progressive change that is sorely needed. Transport and climate inequality are severely entrenched in our system and we need to do everything we can to address them. I cycle everywhere and my role is to get more people doing that and ensure we're enabling it equitably, but I can't advocate for something that isn't safe in many areas. Many want to cycle and walk and the growth we've seen after cycleway construction shows us they will - we just have to give them the infrastructure they need. Take away car lanes and give them to walkers and cyclists.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Raise rates instead of cutting services or selling assets

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Yes, but in the things we won't do, I think you should include things that directly conflict with the others above (eg against climate goals)

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Standardisation is good. However I would like to see BOTH rubbish and recycling collected fortnightly, with weekly collections available for an increased charge. With food scraps collection and soft plastic recycling available, weekly collection is not needed.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Puketāpapa Local Board

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Charge more rates and do more social good with them. DO NOT CUT RATES - it's an admission that you've failed and are incapable of solving the massive social and environmental issues facing us. Keep raising them and keep communicating why it's needed. Be bold, be ambitious in your funding. Ensure the arts thrives along with the environment and that we stop the inequality gap from growing. Actively honour Te Tiriti and prioritise Māori voices as they have tino rangatiratanga. Maximise benefits to the poor and less well off areas of Auckland. Radically reallocate road space for walking and cycling, don't spend it all on huge infrastructure projects without touching the road space already available.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Cycling infrastructure saves lives, supports people cycling as a viable transport option and reduces emissions.

I frequently walk and cycle around our city. I am excited to see \$228 million towards building more cycleways and walkways.

I would rather pay a little now than pay a lot later for the consequences of climate inaction.

I want climate action that addresses the inequity of transport accessibility in Auckland.

I want more people to walk, cycle, and bus more for the benefit of the planet and their health. However, lack of infrastructure, and safety concerns, prevent this. I strongly support the targeted rate.

Use of the fund needs to be front-loaded so that the most gains can be seen before 2030.

I want Council to push Auckland Transport to optimise cycleway roll out so that the dedicated funding goes further (literally).

Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

I strongly support the approach to maximising benefits to under-served communities in Auckland.

I want a strong partnership between Auckland Transport, Auckland Council and central government so that funding can be used most effectively.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I prefer the rates funded option but to be able to opt out of the food scraps bins because a lot of people do not have food scraps and do our own composting

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Council needs to do more to disincentivise the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I think a slight increase in rates would benefit Auckland for the long term, as a more powerless Council especially in the face of the climate crisis would be completely counterproductive. An increase in rates would solve a lot of the council's budgetary issues and keep the council effective during this period of increasing inflation without having to borrow more.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support prioritising action on climate change and necessary infrastructure like public transport to get Aucklanders out of their cars. Council funds spent on wasteful contracting could be cut and be replaced by in-house services, like the Council legal team.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Need minibuses or ridesharing to feed into training in theory and main bus routes. Having large buses and narrow residential streets causes noise pollution and inefficiencies of empty buses. Levies should be directed at properties around the routes that would benefit, not as a regional fee for everyone.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Climate goals is in central govt domain, council should focus on its core services.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Please focus on something really important to residents, not something politically important to your positions. If you really want to protect our earth for young generations, please focus on the rubbish reduction.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: even I support this plan, I strongly suggest publishing all financial expense details in public. The council has wasted a lot of unnecessary money on roads. AT is just a joke.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: PAYT is far better than the rates-funded plan. People will reduce their rubbish if they have to pay for it. The whole Auckland should be on PAYT. The Council is the only benefactor of the rates-funded plan.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Henderson-Massey Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Please save money and solve the Lincoln road traffic issue.

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Don't waste our money. The local board should consider of how to support local workers to efficiently use public transports, for example, setting up local bus routes to local train stations.

Upper Harbour Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Please get the gills road project back.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Fire the CEO of Auckland Transport. He has wasted too much money on useless projects and make the Auckland transport worse.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Agree we need to something about the climate.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support the need to manage on-going budget pressures. I partially support this approach. Changing timing of capital spending is one way. Reducing capital spend is another. Prefer to see investment in people and services at this time.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Reasonable approach.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: System is easier to deal with.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They are all relevant to our area. Would also like to see more Maori artwork and presence around our neighbourhood.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I support the local boards having authority to make more decisions for the communities they serve.

Am also in favour of the Tupuna Maunga Authority Op plan.

Fees are fees. Always annoying. As long as they're for true cost, fine. Just don't implement them as a deterrent - that's a lazy approach to a problem.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We would like decent footpaths produced in Mt Roskill.

our local park is a joy and well used by locals. keep this and expand on others.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Sort out priorities e.g scrap light rail to the airport

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: vital to maintain and develop.

Please make collection of e-waste, paint, metal etc easier than it is. A central point for all would be easier and more convenient than present system which is so time consuming. Do people bother???

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: user pays

the concept of having food scraps that we are expected to make into compost is ridiculous. A large number of dwellings being built do not have room for a garden in order to use the compost.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: There is lack of consultation at present. Ask all people in the community what they want not just young, diverse cultures. Make better use of Fickling Centre for creative and community activities fo the public. Look at Uxbridge in Howick as an example.

High rise buildings jammed in on a section are ruining this suburb and will be slums in years to come.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Little opportunity given to contribute. Where do we access information?

Please look carefully at how this area is changing from suburbia to over crowding. Do we have the infastructure to support it ? Water restrictions are not appreciated.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This project will fail, it has no for thought. The best council can do is more worth petitioning govt and counter parts in China and America. This is a band aid over a compound fracture I.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: A PAYT system will lead to even more rubbish dumping. An issue that is already in the increase.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: That's all pretty generic.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to move to a sustainable life on the planet, and stop destroying our natural world.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Seems sensible.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: realistic

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: should be rates funded, fair for all.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Good balance of climate action and community support.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would really like to see the boardwalk along the Manukau shore from the Onehunga shoreline park to Hillsborough extend for another 50m or so to link up with the low tide walk along the Manukau foreshore (currently impassable at any time due to the stream and mud). However, I know that there are many calls on the Puketapapa local boards spending and that this may not be a priority at this time.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are living in a climate emergency and we need to act now. We cannot keep deferring action.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: It makes sense to stop and reduce those activities which don't align to values or that are not priorities.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate action is imperative. No threat to human life and well-being has been more dire and overwhelmingly existential than the threat of climate collapse. We are already well behind schedule, and thus every possible step must be taken to catch up and help reduce the harm of the catastrophe on the horizon. This is not a problem for our children, it is a problem for us right now. If we do not take drastic and effective steps immediately, we all will be responsible for the death of millions. We all must do our part and sacrifice some comfort for the benefit of all, and this rate is effective and results in minimal disruption to public comfort and financial stability. A climate action targeted rate is an unequivocal and undeniable good.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: PAYT is a poor tax for garbage collection, where the population who produces the most waste per-person (the lowest classes) will be forced to pay the most to responsibly dispose of waste, subsidizing the richest members of society and incentivizes the continued pollution of the poorest regions of the city. Rates-funded systems adequately ensure everyone pays their fair share to keep our community clean.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I mostly support these initiatives however there is a distinct lack infrastructure support for electric vehicles and ride hailing.

You can try all you want to remove cars but the reality of isthmus shape of Auckland city, vehicles will always be the main form of transport.

Recognising that motorcycles are fuel efficient and parking efficient mode of transport, more emphasis should be placed on these as well.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: The sale of non-strategic assets has me concerned. This can free up capital but must be carefully considered.

Thanks to 'New Labour' of the 70's, most of our strategic infrastructure has already been sold to the bloody Australians!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Makes sense for Op-ex over Cap-ex given the pressures

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: A tricky one. I struggle to see how rates funded outcompetes PAYT but I'll take your word that it does.

As both a tenant and a landlord, the PAYT puts the onus and decision making in the hands of the people living in the house. PAYT the tenants pay; with rates the landlord pays. It's fair the tenants pay otherwise the landlord gets yet another excuse to put the rent up

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Appreciate the work on Keith Hay Park and planned for Cameron Pools.

What this fails to cover is the planning of a giant slum in Mt Roskill with high density state housing and the extreme lack of parking. People will still own cars even if their apartment doesn't come with a park. WTF are they going to park? All over our side streets and on grass berms is where. This is only going to make cycling and walking to school more dangerous!

'Using local voices to enable decision making' - I call BS. How come the community feedback event at Waikowhai school was nothing about hearing negative feedback from concerned locals. It was a token nod to listening to the voice of the locals but really it was a family fun day to try and win support. I am deeply disappointed.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

As above, actually listen to the concerns of the local residents when you plan to turn half a suburb into a slum.

If you want to do state housing you must mix the state houses with owner occupiers and normal tenant. This creates neighbourhood pressures for positive behaviour for those state home occupiers. If it is all state homes, crime and distrust quickly takes root and spirals downwards and spills out to affect the surrounding community.

There is a building initiative in Bethlehem, Tauranga that is going to provide affordable housing to buyers, some Maori owned houses, and some state house tenants. This should be used as a model for the government and councils to follow.

Important privacy information

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Mitigating the effects of climate change is a must, \$1.12 increase per week seems like a manageable sum. Do it!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: there needs to be a better uptake by all socio-demographics for public transport. This will help.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: the Council is not unique to these pressures. We all need to make changes. The changes however should not impact negatively on any part of society.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Improving public transport infrastructure is the only way to get people out of their cars. I am also deeply saddened at the continuing loss of trees in Auckland, they are what make this city a beautiful place to live and need to be protected. I am sure that even though this rate represents an increase in rates in the short term, it will save our city and therefore ratepayers from more road congestion and climate change-related costs in the long run.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Support the criteria outlined, however when these criteria are used to assess service prioritisation, it would be good to have visibility of which services will be affected and how.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support a more streamlined service with costs spread out over more households to lower costs. I also strongly support the options for different bin sizes and like the incentive of having the small bins cost less. I am pleased to see the food scraps roll out occurring. I do wonder how services will be managed for collection with three bins instead of two, particularly in areas where there is significant infill development and curb space is already at a premium and there being areas where bins completely block walking access on footpaths on collection day.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: There is not much information on what the funding for these priorities will cover, but I support the priorities which have been identified.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: more action is urgently needed to reduce our emissions. rate is a great start - would be good to see even more action in future

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I would prefer to see Council accrue slightly more debt than cut services or delay capital works.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: hard to have a view at this time due to lack of detail

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: support a more consistent approach

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: strongly support boards focus on environmental issues and climate change, local inclusion in decision making and more inclusive resilient society

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: My partner Ian and I are huge advocates of this extra funding specifically to reduce the effects of climate change - more needs to be done in Tāmaki Makaurau Auckland on climate action and this seems the only way to ringfence, and ensure funding, for the required spends!

We are living in a climate emergency, and paying a little now means we'll hopefully get a better return from the actions what we put in place now. And this is precisely what this generation needs to do now to support our children, grandchildren and all future generations on the planet.

First and foremost we need to plant more trees - with the ability to now build infill housing without consents, more trees are being cut down around the city on a daily basis, and no consideration of the age / size of the tree - it is criminal ! So we need to reverse the trend, grow the canopy cover in an effort to break up the concrete landscape, and provide some nature in the city. Nature is also a proven positive environment from a mental health perspective, so we also need to ensure that all areas have access to parks with trees, particularly areas that have state housing and/or big apartment blocks.

We cannot delay this package so it should not be pushed off to 2024, we just keep delaying the investment and it is just going to get more expensive, and the catchup will be so much harder to achieve.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: To date there has been insufficient action to address the climate emergency. We need targeted and protected funding to help reduce transport related emissions and enable mode shift to cycling and walking, as well as increasing the amount of trees in our communities. This action needs to be equity driven so those that are most impacted by climate change and have the least resources benefit the most i.e. the most deprived areas of the region, not privileged suburbs like Remuera (for example)

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

What do you think of this proposal? Support

Tell us why:

- More needs to be done in Tāmaki Makaurau Auckland on climate action
- I want climate action now for the future of my children
- We are living in a climate emergency
- Paying a little now means we'll hopefully pay less in the future
- Not everyone has equitable access to public transport
- This is a good first step to tackle climate change
- Reducing transport emissions will go a long way
- I want to know my kids are safe when they cycle and walk
- Climate justice has to be a major focus because
- More frequent bus routes will make it easier for me to get around all of the city
- I want more options to get out of my car
- Decarbonising the ferry fleet is a really important step toward reaching climate goals

Council should have dedicated funding for tangata whenua-led initiatives

We cannot delay this package so it should not be pushed off to 2024

More buses need to be decarbonised and quickly

Front-load the fund so more gains can happen before 2030

More funding needs to go to the parts of the city that have low canopy cover and fewer green spaces

Take more incentives away from the use of private vehicles

Create more māra kai and plant even more native trees, and provide initiatives to build community

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This items in this rate are already covered in our general rates so do not support this additional charge

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: All businesses and the council is one of them, are suffering financial pressures. Concern is reduction of services and this is not ideal or wanted. The services the council provides are continually being pulled back and therefore it affects all already. Reasoned excuses should have no bearing on service reduction.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Farming out services with tight council driven budgets is a sore excuse to get away with not paying the living wage to staff as the tight budgets driven by Council do not put this into perspective when subcontracting out these works. Ratepayers want effective solutions and not ineffective excuses or a trail of who's role it is when one contacts the Council.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We have found this to be efficient and effective and support this to be all of Auckland Council region with same facilities from one end to the other end of the region.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: The priorities are loose, non committal and ineffective except for the facility upgrades.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Changing public consultation so Council can do things without consulting the public on specific items e.g. tree removal is not welcome and there should be public consultation for the Council to be able to change any bylaw in the Auckland region. Auckland Council is funded by its residents and therefore accountable to them in all areas.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The future that we and our future generations will live in is threatened in every way by climate change. We need an immediate reduction in fossil fuel emissions, and this is one of several avenues that must be pursued to achieve that. Prompt action is the only way to limit the severity of the currently-ensuing global climate disaster. I also—as someone who commuted to work using public transport for more than a year—feel that it's terrifically important for Aucklanders to have more and better public transport. Especially for disabled people who struggle with mobility, the long walks to many bus stops are prohibitive, and severely limit their ability to participate in public life and perform basic tasks.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I support walkways and cycle ways but NOT Auckland Light Rail. Do not approve tree canopy cover. This will threaten sewer/stormwater systems if native, not to mention being a hazard in high winds and a fire hazard in hot dry summers, especially if fireworks are not banned. Shrub planting I absolutely support. Low emission ferry services I do support.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Do not support cutting library services. Rates will need adjusting when the capital values of homes fall. Council needs to be aware that many people are considering leaving Auckland and moving to other regions/Australia. It is no longer in the "most livable city category".

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: We need to live within our means while inflation impacts household budgets. Things may NEVER return to pre Covid levels.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Three bins for each household plus green waste AND infill housing at an unprecedented level!!! Have you people done the Maths???? Where will we put the bins to be collected. Or will there be a different bin day for each type of waste? Our street struggles already on green waste days.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Do not support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Not keen on expanding the forest canopy cover. Native bush in my area is doing a great job of that all by itself!

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am a disabled 22-year-old living in Mt Roskill, creating a future for myself and the family I've built after the difficult youth all of us have been through. Though I try my hardest every day to stay hopeful, despair is a familiar face to me. The current state of the planet is a major component of my struggle to find that bright future my family needs. How I'm supposed to look ten years ahead when our entire country could be underwater by then is something I grapple with every day. Lowering fossil fuel emissions is an essential step towards securing a future for all of us. Better public transport is just as essential to it - no one in my family can drive at the moment, but if the bus was more accessible we would be able to take far fewer Uber rides, and if those buses were decarbonised it would be all the better for our air. The more incentive people have to use public transport, the better off we all will be, and the more certain I'll be able to be that there's a tomorrow waiting for me.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I'm okay with improving our ngāhere coverage but I'm just really unconvinced that PT will save us. Sadly the city has already been lost to sprawl making it impossible to do PT properly for the vast majority of residents.

I would like to see more investment in getting us ready for the impacts of climate change including upgrading infrastructure to deal with flood waters and incentivising gray water systems on urban properties.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Do what you can to reduce debt of the council while retaining essential services and maintenance of our natural and built environments

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: This has to be the most nebulous question with the most vague brief I've ever seen. I cannot imagine why you would even have this garbage question. Please ask me a question with some concrete figures and direction.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I would still prefer a pay as you go system for all of the city. However I hate tags and would much prefer scanning bins etc. We are a household of two and don't put out our bins very often compared to the general household. An 80L bin would probably be a fortnightly collection for us when food scraps are introduced.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Lynfield rec centre needs an upgrade to the changing facilities. The current rooms are pretty ganky.

I like the local boards environmental work, I participate from time to time outside of covid heavy periods.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support action to reduce Auckland's carbon emissions. It is essential that we move urgently to reduce emissions and improve low-emission transport options. Busses should be decarbonised asap!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are in climate change crisis at the moment

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: I support all of the above because we owe it to future Aucklanders to care for our planet and more locally our city's environment.

Wealthier landowners need to be charged at a higher rate. This would allow more to be achieved (such as moving towards lower emission buses, in addition to doing the above).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I think standardisation is a good idea, but it is also important to encourage people to minimise waste. Alternative ways to achieve this outcome should be considered.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: 'Climate change is the biggest threat we face globally. It is impacting us today and will worsen in the future if we do not take immediate action. It will also be the greatest challenge that the next generation will face. Addressing it NEEDS to be a top priority.

With regard to people having more voice in the decision making process this is crucial, however the following groups need to have a say.

- Homeless communities in the local area
- Disabled communities
- LGBTT+ communities
- Youth

Care needs to be taken to ensure that these groups are genuinely listened to and action is taken to meet their needs.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Tell us why: These a challenging times, my family are recovering from the effects of job losses since 2020. I am doing all I can to help my children and grand children.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Constructing a bike trail in the midst of a already heavily packed city centre only just adds to the number of constructions already occurring, not to mention with current COVID impacts and isolating the length of time in which it would take to complete this project would be several several years from today. We are living in a time where funds and services should not be wasted on areas that could use it much much more such as the education sector or housing sector or helping people find jobs. It is unnecessary for a bike trail to be constructed when people could just simply walk around the block and save government time and money.

2. Managing on-going budget pressures

What do you think of this proposal? Support

Tell us why: In a sense it is practical to have a bike track along Auckland city to reduce traffic on roads but it begs the fact that the amount of money being put in by the government is quite high. Instead of building a bike track \$574M can be put into expanding roads and adding extra lanes in order to reduce the packness of roads at times. And adding another construction site would only just increase the number of already occurring construction sites and make roads more packed.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: great move by Auckland Council

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Cost of living in increasing however this is good for the public transport & environment.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: for future generations to live a healthier environment

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

What do you think of this proposal? Do not support

Tell us why: Family comes first in our household, and we are trying to support each other through tough times.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Our household is recovering from the effects of Covid and assisting our families in Tonga

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Need the funds to support climate friendly infrastructure development and make Auckland a better connected and more liveable city

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Would want to know what capital spending is being deferred - hope we are not adopting a run to fail model on critical council assets. Please properly invest the depreciation cost.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Think there should be more focus on revitalising town / village centres - civic spaces, attractive main streets etc.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I completely support this as this creates a safer environment for not only us but generations to come

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I chose this answer as the budget pressures are creating better things in the community however it is also delaying plans on pre-existing facilities of the Auckland council

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support the rates ideas. However, would we need a larger infrastructure to cater to different bin sizes? If so would that exponentially increase the annual rates each household pays?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support all the priorities for Local Boards for this year and I am excited for it to begin

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I feel like we can do much more than that. We are a small country and we can take the chance to be a role model for other countries. We have done it once during the covid outbreak and we can do it again. We should find other ways to reduce carbon emission because time is running out and the environment is facing more damage day by day. It is unsure as to what will happen in the next 10 years, therefore we must act fast and find other ways to reduce carbon emission. If we come up with more efficient ideas and strategies, we will be able to reduce the carbon emission in less than 10 years time. I'm sure that there are people in the within communities of Auckland and the rest of New Zealand that have ideas and contribute to deal with this crisis.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? I don't know

Tell us why: Auckland hasn't been good at planning public transport; I think drastic changes need to be made to reduce carbon emissions effectively. I think charging users for using public transport makes it much less likely to be used. I think having any private element involved in these services is detrimental to the goals of public transportation.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I think the council does not spend money effectively and should maintain spending on infrastructure and should reconsider the changes in capital spending. I would find an increase in rates acceptable.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Makes it easier for everyone.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Spending on recreational assets may reduce other costs, such as healthcare. I think the council does a good job of providing these services.

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Development of city/town centres.

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I suggest that all the buses should be changed to electric cars, which would be really protecting the environment in the long-run.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Auckland Council should review on why there is a financial gap, instead of simply implementing another tax. If the current system is not efficient enough, Council should be more efficient and lean.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I would support decisions that Council makes; as long as there is no huge burdens put on Aucklanders.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).

- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would support whatever decisions Auckland Council makes, as long as these decisions are good for Aucklanders, and not wasting taxpayer's money.

Important privacy information

Or is there anything further you would like to give feedback on?

Auckland Council should implement more strict rules on people who live in government public housing. I know a lot of these people are wasting water, and some of them are fraud, and are not even qualified to be eligible to live in the public housing.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: '- Tree, I wold suggest to grow trees with fruits, which work both the ways.

- Transport should be short and efficient
- Solar or wind energy for efficiency

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: '- Sales on unused land to build aggregate housing is good.

- pushing unprioritised projects is a good point

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Good, don't need services which are not used by the majority of community.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: '- need system to make garbage regularly where it can be managed recycling and land dumping.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties I don't know

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: For better environment

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: For better economics and I can add one item: re-arrange the benefits given to people and encourage them to work (not to sleep)

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: As I said before I think benefits services should be reduced.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I think this service should be free as any additional cost for the waste may lead people to throw their waste in the general bins.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Other

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

No, most of the priorities align with my mindset and that is why I support most of the priorities that have been listed in the previous pages.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional \$1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for \$574 million of this over the next 10 years. We estimate the targeted rate to be about \$1.12 per week (about \$58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because it will reduce the emissions of transport and make Aotearoa a better place.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of \$85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: May need to be postponed for a year due to COVID

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I like the initiative

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Other

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Do not support

Standardise the opt-out rules for non-residential properties Support

Apply a minimum base charge to every separately used or inhabited part of a property Support

Tell us why:

5. Local Boards

Puketāpapa Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

- Local board decision-making over local community services (page 53 in the consultation document).
- Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).
- Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?
