Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: So long as the funds are used to promote climate initiatives that measurably reduce emissions it makes sense. Initiatives to promote mode shift and reduce vehicle kilometres travelled (VKT) are a key aspect of this.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think we need to do more to address climate change in Auckland. As transport is one of our biggest emitters, it is good to see the CATR aiming to reduce transport emissions. It is good to see the council taking initiative in this way.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I support the food scrap collection bin, as this is sorely needed to stop organic waste going to landfill and producing methane. I support the choice of bin sizes, so there is incentive for people to throw out less rubbish and pay less. I would support a "glass out" recycling system, which would reduce recycling contamination and create a higher quality recyclate.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support it but not for central city residents who have already structured their lives in a low carbon way. If we have a central city extra rate for other things we should have a sliding scale rate for decarbonising Transport depending how far out people live.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: This is a poorly designed question. There are many options in there some of which I might support while not supporting others. A simple button response is misleading and poor practice

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: To general a question to receive a simple answer

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We should disincentive waste. If we move to rates funded the council will need to collect rubbish from appartments too

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Democracy is important to me.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: All of these pithy initiatives will make zero difference to global climate change while the Chinese, Indians, Australians and others are burning billions of tons of coal each year to generate electricity! And here we are talking about yet another levy, $574 million over 10 years for low emission ferry's and increasing tree canopy cover... you are wasting your time and everyone else's I'm afraid with this ideological nonsense.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Trim some of the deadwood from the payroll, problem solved.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Everyone with limited resources has to prioritize what they spend their money on, Council is no different

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Easier to manage

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't support cycle ways, there are massively expensive waste of money.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland Transport, the total devastation of the CBD through poor management of roading projects, including the CRL and redevelopment of Quay St is a disgrace.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We will not make a difference to the temperature of Planet Earth here in our underpopulated well forested country.

Stop wasting our money and direct your energies into making the city flow, the services efficient.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: It's time to reduce your payroll, reduce the communications and PR Teams and look at being effective in core services.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Stop the racisim for a start. Be colour blind, do only core services.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It's a key service of the council and should be covered by rates

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: People are suffering because of Covid restrictions and high inflation. Wages aren't keeping up. Council shouldn't be adding to cost of living pressures.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: People are suffering because of Covid restrictions and high inflation. Wages aren't keeping up. Council shouldn't be adding to cost of living pressures.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Council should be focussing on delivering the services that residents need. It should defer spending on climate action and other "nice to have" things which aren't related to people's everyday needs.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: "User pays" will encourage people to be responsible for the waste they put out. If there's no direct charge, Council will just add to more to landfill, waste pollution and environmental damage from waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is spin. Do it from within your substantial existing budget. Times are tough out there and adding extra taxes to people is tone deaf and arrogant

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Cut your expenditure to meet your income. This is how the real world works.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I note you have an absurd amount of people earning $100k plus, what do they do? Cut this back. Are you squeezing every saving you can ? Of course not - you're not motivated too. Get with the real world and reduce expenses to match income.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I already pay for my bins, by making this move I expect to see a reduction in cost due to the better contracts available with economies of scale. If that's not the case feel free to call me for a lesson in procurement

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: The cycling investment is nice to have but given the proposed rates increase I'd prefer you saved the money and reduced rates. I'm also puzzled that Maori business is a priority - why? There are many ethnic groups in this ward and prioritizing one over the others is divisive and unnecessary

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Stop wasting our money and thinking rate payers are an endless funding option. Many of us have not had pay rises that have kept up with inflation. Many of us have had to adjust our budgets to match our income. About time you ignorant fools learnt to do the same

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Not the councils responsibility.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The council needs to cut waste and get back to its core activities. It's purpose is not to promote climate change, nor social welfare activities and the like. The council needs to cut all fringe non core activities and keep rate increases to zero.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I do not support wasting ratepayer funds on climate change issues, this is not a council core activity

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We are already paying for waste collection services in our rates. Separate bins for food waste etc simply attracts vermin and flies. That's certainly been the case in UK where this has been implemented, and with our climate it will be even worse.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I do not support ratepayer funds being spent on climate change or Māori issues. These should not be the concern of the council. I am not in favour of more money being spent of bicycle lanes, those already in existence are hardly used.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I am opposed to unelected Māori having any role in any council owned assets, nor Māori having any special rights, privileges or say over any asset.

Important privacy information

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I will never support it as I think it's ridiculous. The public transport is useless for me to go to and from work. The buses and ferries are slow.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The roads out west auckland are horrific. And the footpaths as well.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Sometimes our rubbish bin is half full fortnightly sometimes.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The roads are so dangerous to drive on. All you guys do is just put asphalt (poo) on the roads and call good which is a load of B.S. the footpaths are dangerous to people walking especially elderly with walking frame etc. I see people tripping over sometimes and injuring themselves, including me I rolled my ankle which I had to rest for 5 days. They need fixing URGENTLY. It's needs to be a great job not a **** job.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would love the roads and footpaths to be involved in this budget as it's very dangerous for the public. It's damaging cars on the roads and public walking is tripping over and hurting themselves. The roads and footpaths need URGENT CARE as I have heard from a lot of people complaining about the conditions and state of the roads and footpaths.

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Completely reject any more targeted rates, they are rates rises by stealth. Cut staff numbers if you want to fund extra things

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Completely opposed to asset sales. Strongly support cutting staff numbers. Strongly opposed to reducing any more services in parks and recreation areas

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: This proposal says nothing at all and is deliberately vague. No one should support this question until it is made very clear what is going to be cut. Cut staff numbers earning > $100k . Keep the lower paid workers that actually get the jobs done, and don't cut any existing services any more.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It would be unacceptable to pay more for the current waste management service we already receive

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Albert-Eden Local Board

Tell us why: The information provided gives no specific information, therefore it's impossible to support

Waiheke Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: Strongly opposed to walking, cycling and placemaking projects - road art, road furniture and expensive cycleways are a waste of money. Fine if they are basic painted lines on the road, but miiions of dollars are being wasted. NO MORE PLANTER BOXES anywhere please. And stop cutting down mature trees for cycleways

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Strongly apposed to local boards having any more decision making and funding responsibilities

Strongly opposed to TMA plans to chop down tress on the maungas

Strongly opposed to ALL "targeted" rates, these are rates rises by stealth.

The council should get back to basics, and cut staff earning > $100k, and stop paying exorbitant fees for "consultants'.

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Spend, spend, spend....and who pays for it all, while you sit in your office and dictate how we live.

Holding hands with the Labour govt. you are attempting to prevent people owning their own home, or risk losing it , as costs rise. .Is it your agenda is to be the landlord ?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: No comment. Doubt my feedback will be taken seriously

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My household do NOT have the need for refuse collection on a weekly basis. Therefore, it's more cost effective to have PAYT.

Shouldn't have to pay for a service, I don't use to the full extend it will be charged for.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Too much emphasis on minority issues. And whimsical ideals

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Lower ACC staff levels and work on priority matters... not plans to please a few

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Climate change is a central government and industry/business issue

Efficient and well planned transport options should be bread and butter council spend and not subject of additional levies

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: They is always room for efficiency and thinking about things differently to spend more wisely do go for it

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I pay the same rates in omaha as I do in central Auckland but I have to pay separately for a northland waste wheelie bin

That’s rubbish!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

What do you think of this proposal? Support

Tell us why: More trees is important for heat island effects I want developers to not only have to pkant street trees outside of their lots but also maintain & replace for 5 years

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Smail green soaces should not be sold as we can't see the future. Plant with trees instead to add to heat management and keep space - resilience!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Use consultant as required. Keep weed management and public open space maintained. Consider not having so much grass mowed in winter.keep tree management, reserve maintenance, community libraries maintained, keep buying electric buses

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Manages waste and assists education.needs to go ahead with education

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: 1: Climate is not optional. We need more funds for climate

2: This is too small

3: meeting climate obligations should be included in every budget, not put on top like some option

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Increase rates the same way that houses have increased in value. This is austerity - letting property-owners make more money while the public get reduced services.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: Do not support subsidisation of expensive suburban/regional pickup by downtown apartments. We live in a place that is intrinsically cheaper to serve, so should be rewarded. We don't get. for example, free street parking.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Other

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Don't trust that you will actually do what you've promised. The super city hasn't delivered on much of what was promised.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I think 3.5% is too much in the current environment meant of inflation, higher interest rates and COVID impacts on families.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Just now the public berms and keep our city beautiful. Core services are important to make us feel that we want to not leave Tāmaki Makaurau.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Hurry up with this. It’s taken a decade!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I think rates should be simplified. We should be levying them entirely against land values to encourage efficient and productive occupation of our city's land. Adding all these layers of complexity to bamboozle ratepayers and virtue signal is deceitful.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rates need to be levied against land values and increased enough to actually fund the continued running and growth of the city. Borrowing is unnecessary. It's clear that there's not enough responsibility being placed on the shoulders of landholders as shown by the massive valuation increases year on year.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Stop listening to the nimbys and greedy property hoarders, they need to pay to run this city, they've well and truly been beneficiaries for long enough. I do not agree with the "starve the beast" tactics being used by the privileged to reduce quality of life for city dwellers simply to line the pockets of the landholders.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Simplicity. The simpler the bureaucracy the more efficient it generally is. It should be funded by rates levied only against land values, we need to stop disincentivising capital improvements and actually incentivise them if we want to be more productive, and apply downwards pressure to rents by increasing tenancy space supply.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't think government bodies should be discriminating based on race or the colour of someone's skin. All races, colours and genders should be supported equally. Need based or universal support is the way to do it without implementing racism.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Landholders should be shouldering societal responsibility on their landholdings to at least match the privilege and benefits of those landholdings. Anyone who has advantage over a natural resource of our nation that others do not have should be compensating society for that privilege.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Auckland city needs safer walkways, better traffic management, more police presence NOT parks and Māori businesses

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland is becoming less and less safe, women are facing regular vulgar abuse and violence, police take too long to respond - safety of Auckland residents should be top priority!

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The role of Council is to provide essential services to ratepayers, not adopt woke attitudes and fashionable causes

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: 3.5% is outrageous in a time when the “true” cash economy is struggling. Debt for ratepayers is bad enough, let alone loading an excessive charge

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I co not support stopping essential services but cost cutting and efficiencies would be appreciated by all ratepayers

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: This is what Councils are for and is a core service

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Introducing race based policies is a backward step in a democracy. There is no political environment in the world where they have been successful

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please look at the real world, people are struggling and will continue to do so. Trendy pet projects should not override essential services

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Rates are high enough as it is without this vanity project. Whatever we do in regards to climate change will have zero impact. I don't see the need to harm us in order to achieve nothing expect have a few councilors ego stroked. It might not occur to the council but the city is doing it tough - we need to ease the pressure on businesses and households to get the economy going. More rates won't help at all.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: It's not enough. The council is far too bloated and inefficient. The council needs a line by line review of all finances and if the matter is a nice to have then cut it. There is no reason for rates to go up until this review is done. Like the rest of us we have to live within our means not just demand more and more money from the public.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The Council needs to stop providing certain services. For example, the Council should sell the consenting services. The council isn't very good at it and often gets it wrong. It costs us money and there is no benefit. Sell off anything that can be done better by the private i.e. pretty much everything.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Privatise it - it works better and provides real choice and competition. Councils do not need to be running businesses - something they are completely useless at.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Other

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: While the amounts are not a lot - added up over the whole city makes a lot. It's time to stop the "exploration" projects. We need to cut everything right now and not take on new projects.

Also "Maori Outcomes" - what does this even mean. It seems money spent on very little and just more "assistance". What people actually need is control over their own lives and money. Allow people to spend their own money how they think best rather than a know it all Council.

Community gardens is just another subsidy for middle class hobby. Let them pay for their own hobbies.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Whau Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: the burden on we ratepayers living in over valued region with high inflation too hard.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: you have to do more with less you cannot keep asking the ratepayers to pay more.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: core services must, non core defer, aspirations delay.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I don't support if I am TO AGAIN HAVE TO PAY FOR CORE RATE FUNDED SERVICE.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: qualified support as long as within budget

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Please don't sell off your 'non-strategic assessts' they may seem non- strategic at the moment but they will in a few years if you have sold them off you wont be able to get them back without paying through the nose for them. better to have them out on a long-term lease

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: while it does mean that some households will end up paying more then they should it will make refuse more equitable for all.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Make the cuts to the "governance" budget to pay for necessary capital spending.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The service prioritisation explanation you have provided is inadequate: it does not give any concrete sense of what services you will prioritise. I cannot support a proposal that is not transparent.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I live in the area and see how badly and wastefully you spend even on the things I support (parks). I am completely apposed to targeting spending at particular ethnic groups as such.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

As usual, you have structured your consultation process in a way to deflect significant discussion of the major cost areas of council. You have a set of demanding but limited functions to fulfill around waste, water, public transport, parks and other community facilities. The rest is red tape and funneling ratepayer money to vested interests in and outside of council.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We MUST get ready for this, at this rate humanity won't be able to curb the emissions on time and our country WILL be affected strongly by it.

Our city in also in the crosshairs, of course.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Not increasing rate in this situation is a good surprise, let's keep the current rates if we can.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: PAYT is just not convenient despite being fairer

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: It has already been proven that walkways and cycleways are a gross waste of funds as they are underutilised except for weekend recreational traffic. Auckland does not have the topography or climate to enable real workers the ability to utilise walking or cycling for their work-day needs

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The amount of waste inside Auckland Council is abhorrent. Since the formation of the "super city", then number of employees/contractors (i.e. people working for council) has ballooned to disproportional levels. The council needs people who want to work for the people, not work for the pay. The number of over-paid people (employees, contractors - call them what you may) is verging on immoral.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Services should not be reduced just to keep people employed/contracted. Council needs to start with a blank sheet, work out what it should be doing and resource appropriately.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Council needs to understand what it's true role in running a city is. Waste management is one critical part. Council should stop trying to "farm out" what it doesn't want to do and provide proper services and reasonable costs.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Council is not targeting the priority projects - it is paying lip-service at best and is promoting projects which are avoiding offense or disadvantaging members of particular groups in society. Council is not apply good governance and management.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Auckland Council is a bloated, politically motivated, politically correct organisation with very little "real world" experience. It has created an environment where employees/contractors are paid exorbitant and unrealistic amounts to underperform. Auckland Council is dysfunctional and has no understanding of good governance or management.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The environment is one of the single biggest crises NZ is facing today. Businesses should pay a lot more, and vehicles which are not used for business should also be targeted. NZ supermarkets (which are in effect an oligarchy) should pay an additional stamp duty on profits - they benefit from government protection and free reign to scalp consumers. There should be massive subsidies for electric cars, solar and wind power and any other renewable energy source.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Reducing services is not a measure anyone should support. It unnecessarily harms the most vulnerable, with no benefit for the wealthy. Governments exist precisely to support countries in times of struggling economies. There is nothing to prevent governments from borrowing more, indeed it is to be encouraged in such hard times. Because the borrowing will result in much better outcomes over the longer term, with absolutely no impact on ability to borrow more.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: This particular 'proposal' is a piece of incomprehensible garbage and there are no specifics, nor indeed details of any description

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Of course this kind of standardization is better, it more-or-less goes without question. However, there should be blue bins for clean paper, yellow for all other recyclables, and regular garbage.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: There is currently a huge amount of budget pressure across local and national governments as well as household budgets. I think it is more important that any increase in rates, like this, is used to support getting the CBD and other business back on track, as if we dont we wont be able to meet future climate issues

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: There are major budget issues going on, the rates increase of the Climate rates should be used to address the above issues.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I agree with the direction it is commendable , we need to temper it back until the financials are in a better position and unload the population from the costs burden

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There are a lot of favourable directions in the budget, but it is too ambitious given the financials of the city. The financials are creating far too many mental health and poverty issues

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Arrogance would be the word in Auckland's governance - it is a we know better attitude. Listen but do not hear. There is not enough compelling and sustainable evidence to justify many of the decisions

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Trying not to use plastic bags, I need to wash out my bin which also costs. I remain confused as to how the size bins will be accomodated

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Henderson-Massey Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Do we audit use of space? Why is there not more interlinking with school facilities. Our city looks very untidy, berms should be mowed by council and charged to rates

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Our traffic light system needs an overhaul. There are far too many instances of poor road signage and foliage covering signs, but overall thank you

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Its's ridiculous and beyond joke of providing more cycle pathways without actually improving the existing roads. Existing infrastructure is lagging compared to the population growth and you want to invest in cycle pathways and low-e ferries. Already bus services reduced drastically.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Expenses are increasing drastically compared to revenue. Not impressed with extra fuel tax for Auckland. Extra revenue not being utilised for Auckland development.

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I cannot support this unless you introduce also a "no bin" option to opt out of waste collection for household that do not produce any rubbish (or close to that) like mine.If you implement this "rates-funded system" my household will end up spending hundreds of dollar for other people's rubbish and partially lose the benefits of achieving a zero waste household. Also, you are saying to everybody to fill up the bin every week as much as they want cause it's already been paid for. Please do no do this.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please do not move to a "region-wide rates-funded" system, it's a terrible idea. Rather than doing that it would be better to move to a "region-wide pay-as-you-throw" system. You could also increase the price of the tags regularly to motivate Aucklanders to produce less waste.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Climate change has been happening throughout the planet earth for millions of years and whatever Auckland Council does will not make even 0.00000001% of difference.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I support the Implementing cost reductions in the form of efficiency savings but nothing else

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Services should not be stopped. It is the other frivolous spending that should stop

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: How is waste management a climate friendly option. What a load of rubbish

PAYT system is too messy

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I support Local parks – improve and activate, including:

the results from the diversity review of our parks will be informing our planning

deliver improvements to Heard Park, Point Erin Park and support community gardens.

Continue to support response to homelessness, including:

support community groups and initiatives in this space.

Community Facilities, including:

detailed design for the Leys Institute restoration

activating Myers Park and Albert Park cottages.

The rest is a waste of Rate payers money

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The Council spending is out of control and needs to be reigned in. If it was a real business it would have gone broke years ago

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The Council thinks they can solve all problems by charging the ratepayers extra tax.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Some of these levers I support, but the Council needs to look within to deal with some of the massive overspending within and inefficiencies first.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I would have to see the actual proposals to judge. Core areas of service should be put first.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It is the preferred way to move forward - standardizing the whole system

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Many of the above do not seem like core business for a Council.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

This was too complicated and general to understand.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: We currently have the PAYT system. I have an 80l bin which I put out once a month at an annual cost of about $40 - $50. I have minimised my waste as far as possible. Under the new scheme I will have to pay $375. An INCREASE of $325. There is no incentive to reduce waste. If I have to pay to have my bin removed every week I might as well fill it. There will be no point in trying to reduce waste. I have absolutely no need of a food scraps bin either.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: "Continue work on the sale or long-term lease of non-strategic assets as required." sell to whom?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: the reasons given for it being more equitable are illogical

people who put their bin out less often when using tags PAY LESS by DEFINITION... a standard charge is EVERY WEEK regardless of how full the bin is.... so a truck may drive around picking up partly-filled bins POLLUTION

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Other
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Other

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: All excess spending should be cut. The road and footpath in our street have just been dug up and redone. I can't comment on the road but the footpaths and driveways had decades before they need to be done, if they where privately owned they no money would have been spent on them. The council should provide roads and parks and thats it.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Auckland City is not going to stop climate change, Maori outcomes don't concern me all targeted support should be based on financial need (which is mainly a concern for central government), local parks are fine, just mow the grass. I support helping the homeless in terms of providing them somewhere to sleep but Auckland Council should build this facility in Wellington and pay for airfares of people that need it so central government are aware of the issues. Leys Institute and Myers & Albert Park cottages should be funded by private fundraising contributed by those that are interested.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

keep rates as low as possible. Defer all local capital projects until voted on by the street and a targeted rate raised.

Waiheke Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: expensive cycle ways, road art nonsense, hit sticks are a waste of rates money and do nothing for getting people on bikes.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Strongly apposed to local boards having any more decision making and funding responsibilities Strongly opposed to TMA plans to chop down tress on the maungas Strongly opposed to ALL "targeted" rates, these are rates rises by stealth. The council should get back to basics, and cut staff earning > $100k, and stop paying exorbitant fees for "consultants'.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think that having this set apart from general rates provides a better incentive for action on this important work.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: These all seem to be prudent measures in response to budget limitations.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The criteria are pretty vague, but I agree with the general direction. "Nice to have" spending should always be cut first.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Support for the reasons given in the proposal.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I support all of the proposed projects and initiatives apart from those relating to Maori outcomes. All initiatives and businesses should be treated on an even footing when local board funding and support is being considered. I understand that Maori only comprise about 6% of the local board population (heavily outnumbered by the more than 30% who are of Asian ethnicities); the community as a whole should be front of mind for the local board, not just a small minority.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Because Auckland people have suffered enough financially through the last two years.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Support this but the increase in rates proposed is higher than I pay currently. $4.20 for a tag each week = $218. If it increases beyond this I would not support.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Other
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Other
Standardise the opt-out rules for non-residential properties	Other
Apply a minimum base charge to every separately used or inhabited part of a property	Other

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support improving public transport and walking/cycling/scooter lanes and paths. Please fix the footpaths that have been ruined by tree roots though (e.g ponsonby road, Howe street) and the trees for canopy coverage will be almost useless if the footpaths are unusable in 10 years.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I used the budget calculator and increasing the price of parking would help budget wise and might encourage people to walk/bus/train/bike/scooter more too.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Do not support Māori outcomes. Stop making a separation between Maori businesses / people and the common person. If we are to live in an equal opportunity society of all races (Tamaki Makaurau being highly multi-

cultural) then there is NO benefit to enforcing a society based around providing additional opportunities and benefits to specifically only Maori. Being Maori myself this is a complete embarrassment as it drives systemic separation rather than trying to simply explore and celebrate Maori culture as a part of Aotearoa's history. We need to stop looking at Maori as incapable without support. Every person or family who is struggling should be given the appropriate support they need as a society.

6. What is important to you?

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Prioritise street safety. It does not feel safe walking around at night in the Auckland CBD with the number of homeless people in the CBD. The streets also don't seem like they are cleaned regularly enough as there are commonly leaves all over the footpaths or rubbish lying around

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: These are great ideas. I support these actions, but I also believe there is more to be done.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The bin sizes are a great incentive to encourage waste reduction.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate action is an absolute imperative that I think has broad support, and the idea of separating it from rates helps people to understand where their money is going.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rates should increase above 3.5% to pay for most of thing. We know that delayed capital spending and asset sales simply create higher costs in the future, so this plan is shortsighted and simply passes a greater problem on to future years.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: The starting point for these measures is that we need to save money rather than raising rates slightly more to cover the costs of ensuring the council continues to deliver its services. We should instead raise rates further. The current proposed rates rise is well below even the inflation rate, so we are effectively seeing a rates reduction at a time when the council is facing a budget crisis.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: PAYT creates unecessary additional plastic waste. We need to be reducing waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: The priorities align with what's important to our community and the future of our community.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Spend on essentials until the economy returns to good health. You cant demand 3.5% increases in rates if people cant have 3.5% increases in their income. Or start getting more from business

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Action against climate change is a defining issue for us currently and needs to be addressed

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support the use of a range of levers but I do not agree with the deferral of some of the capital spending such as Wynyard Point Te Ara Tukutuku or the waterfront renewals. I do not agree with a reduction in services in the community and recreation spaces.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support the need to prioritise but who will be held to account in the decision making, community development is seen as a priority but recreation activities are classified as a "could have" service. It is unclear how the prioritisation is applied.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: My family of four with two young children live in the beautiful Wynyard Quarter. As more families take the opportunity to live and work in the CBD I would continue to advocate for the ongoing consideration of our children in our planning and development in the city. I also support the continued work with reducing emissions as my 2 year old son attends preschool on the corner of Customs and Albert St. The air pollution levels are concerning to me as a parent in particular the potential ongoing health effects. I also congratulate council on the many great initiatives that have been completed to date and look forward to the new additions such as the Wynyard Point - Te Ara Tukutuku, and the upgrades to the mid city.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I support the Tūpuna Maunga Authority Operational Plan. I support changes to financial policies for whenua Māori.

While I support the local board decision making over local community services I think that the council has too many local boards which makes the ability to efficiently and effectively support and service great decisions challenging. This leads to many council staff feeling overrun as they look to take into account all local board views and the local boards feeling under appreciated and overlooked as they try to make decisions. There needs to be a marriage between hearing the voice of the local but not creating 21 little councils and taking advantage of the economies of scale in the council without over-running the local voice and decision making.

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's a climate emergency and we need to act now, having ring fenced funding ensures there are not competing priority and decisive and necessary action can be taken.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support all of the measures apart from the changing of timing from capital spending and the previously agreed rates rises. I believe the current schedule for capital should be kept (apart from where it contrasts with our climate goals) given it has already been delayed, and rates risen to meet the costs.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: You can call it something different, but it is still a rates increase. Introducing this without reducing elsewhere is irresponsible and ignores how families and households are struggling, showing how disconnected the local body employees re from real life out here. While other countries and cities in the world are not making sacrifices why should New Zealanders do so, for our tiny 'rounding error' of emissions. Rather than introduced arbitrarily it should either be included as a referendum to the citizens at our up coming election, or every local body candidate needs to make clear their position on this. We are a democracy after all - not Russia. Lastly, if it is a true "Emergency" then like in all other emergencies, resources should be diverted from other nice-to-haves' to the emergency

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: More budget cuts need to be made to balance the books and a lower increase should be put in place due to the pending recession and high interest rates

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Evidence shows that PAYT creates unwanted dumping as those who cannot afford it find other options. We are in favour of not making changes to those already on rate-funded (ie new systems/bins etc is wasteful, costly and not environmentally friendly)

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: 'Do not support the following due to being one of unnecessarily wasteful, low benefit / ROI to community and/or being racist

Addressing Climate change and protect our natural environment, including:

-planting trees to ensure we have an urban ngahere (forest)

-walking, cycling and placemaking projects

-continuing work to restore our streams

-providing advice and making it easier to reduce emissions and waste.

Māori outcomes, including:

-explore opportunities to support Māori initiatives and businesses

-enhance staff resources to support the delivery of Māori outcomes.

Local parks – improve and activate, including:

the results from the diversity review of our parks will be informing our planning

deliver improvements to Heard Park, Point Erin Park and support community gardens.

We do support: Continue to support response to homelessness, including: support community groups and initiatives in this space. and

Community Facilities, including: detailed design for the Leys Institute restoration, activating Myers Park and Albert Park cottages.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Start spending money as if it was your own and not someone else's - if there's no benefit then stop wasting this and let families have warm homes with food on their plate, petrol in the car and kids with a good education. These vanity projects and the over-inflated number of council employees need to stop.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

What do you think of this proposal? Do not support

Tell us why: I really doubt council is really going to use this fund wisely to help this situation.

They really need someone to start from scratch and work on practical solution and look at broad aspect.

We have moved to North shore and its been more than 8 months, my two kids age 6 and 9 I encourage them to use public transport, but for 4 min of drive through car they catching 2 bus to reach school take them 45 min in total journey along with they have many time faced bus cancellation, bus driver have made kids get off early as actual bus never showed up and same number bus was turn into different route bus but with same bus number. Frankly speaking, at this young age kids are experiencing all this and telling me mom why can't u drop us to school we don't want to go in bus. We really not setting good example with kids. AT really need to come with better plan.

Second example, I work at Botany and if i think i should take bus to work but again i need to take at-least 3 bus and travel time is around 2hr or more (considering cancellation etc), so practically i still choose to go in car in-spite of 1 hr traffic. I really want someone should practically think on this issues and really create a better transport plan that is practical and feasible for all. Again creating cycle and walk pathway won't help, as NZ weather is so unpredictable and roads are so steapy/slopy even a young person like me often not able to cope up with walking steap road. most roads in northshore are steap

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: there is already so many potential reduction i am not sure what more can be reduced. You should really focus more on peak and school hours

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: public consultation should be taken on what service you plan to reduce, stop or change

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: yes as this applies to us, we have to go and buy tags which is quite inconvenience.

Anyways we paying so high in council rates this should always be part of rubbish collection as long as its reasonably priced and not too much.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: most important thing that council should divert funds in building better public transport. In North shore most road are very steapy so spending on creating better walking and cycling pathway considering this into mind. A suggestion would be , someone should take each primary and intermediate school zone and find their walking route from far area of zoning and come up with better plan to support this. Eg. We stay at start of Helvetia drive, kids go to Browns bay school and if you see walking route is quite steapy and long, no good walking route very narrow road) from browns bay road , bus they need to take 2 bus to reach there going all the way from browns bay shops (long way)

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

to be frankly most important to create a sustainable plan for everybody. With petrol price going up why would public not use public transport but problem is no one trust Auckland public transport and with so much inconvenience we have no choice but to go in car. We not setting a good example with kids and i won't be surprise when they grow up they will have as well end up in cars. Really need to think on better plan on this, just saying we going to use funds to create better transport won't help, use towards route that matters to all and will support all.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This is very unfare to those of us that try to keep our rubbish to a minimum, I only put my rubbish bin out every 3 - 4 weeks and the proposed new system would increase dramatically the amount I have to pay. This is a good way of seeing more rubbish sent to landfill, I would be putting out every bit of rubbish that I can find and can see many people doing the same, this will disadvantage those of us that are already finding it difficult to make ends meet.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need a more walking/cycling/alternative travel friendly city. We can't sustain cars on roads with how much the population is growing.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	
Standardise the opt-out rules for non-residential properties	
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think it's awesome that Auckland Council is creating a dedicated fund towards a zero carbon future. However this is a first step for Council walking the talk on climate action. We have a long way to go to reduce emissions in line with Te Tāruke-ā-Tāwhiri, Auckland's Climate Plan. I frequently walk and cycle around our city and I am excited to see $228 million towards building more cycleways and walkways. Climate justice is paramount. I strongly support the rate focusing on under-served areas. This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding. I want Council to push Auckland Transport to optimise cycleway roll out so that the dedicated funding goes further (literally). Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake. I want to ensure that the Council actively honours Te Tiriti, tino rangatiratanga, and mātauranga Māori.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: The council should increase rates more to better fund climate change action. As well as decreasing spending on roads.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Safety in the city center and some rough behavior needs to improve.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need a safe climate future and it's about Time we took action.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The tag system is awful and if you forget to buy some at the supermarket it's tough luck and your rubbish isn't collected. The tag system adds extra stress on homeowners. Also we need a green waste bin. Maybe a system like Christchurch with three bins one for rubbish one for recycling and one for garden/food waste. As I'm in a townhouse we have no place for composting so having a green bin would help immensely as most of our green waste goes in normal rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: However, I do not support more public tree cover in communities where they are pivately cutting down trees. I may be incorrect but read a few years ago that South Auckland is rapidly losing tree cover as private owners are removing trees, I don't want to support this behaviour by compensating for it with public paid for trees.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support the cutting of service that are not being well utilised, council seems to always just add more and never seems to trade off new services with existing, e.g. do we need all the libraries we have and do they need to as many staff.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Bit it is difficult to agree when their are specific example or a list of low priority services to be cut or slimmed down. What is it council sees as non-core, low priority?

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support this as I understand the PAYT trial was not sucessful, although that is not clear in the documentation provided. I would like to know the issue PAYT faced and why council is proposing a different option.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Note - I do not see local government as being primarily responsible for homelessness or achieving broader Māori outcomes - although I support thse initiatives. NB I have never heard of Albert Park Cottages - who benefits from these, does council make money from them?

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: In a rates funded system, low waste producing households are subsidising high waste producing households.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

There is no place to provide written feedback on the standardisation of charging for multi-unit developments. I selected 'don't support'. Body corps should be able to choose to opt out of the targeted rate so that they can get the best service for the residents of multi-unit properties. If it's up to council to decide whether council 'could' provide a service, nobody is going to be able to opt out and council will be getting rates revenue for not providing a service. Keep the current criteria for opting out that is in Auckland Central i.e. you can opt out if you can demonstrate that the properties are getting an alternative rubbish and recycling service. Make it easy and customer friendly.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Some parts I am supporting of: effective efficiency savings are always a good idea. However, decisions to defer capital need to be well considered otherwise the long term risk profile and future capital requirements will get increasingly worse.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: the new bin proposals are so much easier than tags and bags. individual households will also be able to take responsibility over how much waste they are creating and disposing of. I also think there should be penalties (fines or refusal to pick up) for those who are not recycling properly i.e treating it like a normal bin

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I would like to see a renewed focus on city food gardens that could be worked on and supported by local communities and could provide food for those who need it. I know the city communal fridge and gardens were dismantled because of development but they were important and are missed. It will also help to soften and re-humanise the current bleakness of the city

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is the single most significant threat to our children's future.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Seems prudent. In general, I think Auckland Council needs to exert greater oversight of capital spending Auckland Transport. Too much of the latter organisation is set-up to deliver business-as-usual policies that don't address strategic objectives. AT consistently underperform (and underspend) on capital improvements for public transport and walking/cycling, for example.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I think Auckland Council needs to exert greater oversight of operational spending Auckland Transport. Too much of the latter organisation is set-up to deliver business-as-usual policies that don't address strategic objectives.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Seems like a logical extension of the system that encourages households to reduce waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Great projects

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I would like to suggest that Auckland Council place greater oversight of Auckland Transport's parking management. Too often, AT allow private vehicles to park willy-nilly around Auckland, especially in the city centre. I fully support upgrades to streets in Waitematā, although do not want to see our newly beautified civic spaces taken over by private vehicles.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This is a reasonable expense to pay to help mitigate a problem with serious long-term environmental and financial implications.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Covid-related budget pressures should be addressed over the longer-term, and not immediately passed on to rates payers, most of whom have also been deeply affected by Covid.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Prioritisation informed by transparent criteria will help address various budget issues across short, medium and longer terms.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: A PAYT system is inefficient, wasteful and overly complex compared to a rates-funded system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: The listed priorities seem to be of high value to the community and will deliver improvements across a number of areas.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

What do you think of this proposal? Support

Tell us why: I think it's awesome that Auckland Council is creating a dedicated fund towards a zero carbon future.

We are in a climate emergency, and I want urgent action now.

I would rather pay a little now than pay a lot later for the consequences of climate inaction.

I want climate action that addresses the inequity of transport accessibility in Auckland.

We are living in a critical window of time that could hugely influence the future. Let's do all we can to support Auckland being liveable for our children, their children, and their children after them. Carpe diem!

This is a first step for Council walking the talk on climate action. We have a long way to go to reduce emissions in line with Te Tāruke-ā-Tāwhiri, Auckland's Climate Plan.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I frequently walk and cycle around our city. I am excited to see $228 million towards building more cycleways and walkways.

Climate justice is paramount. I strongly support the rate focusing on under-served areas.

It will provide quick, low cost, transformational options for reducing emissions. Little to lose compared to huge potential gain!

I LOVE low-emission buses!!!

More, frequent, bus routes will make it easier for me to navigate the city.

I WANT to walk, cycle, and bus more for the benefit of the planet and my health. However, lack of infrastructure, and safety concerns, prevent this. I strongly support the increased options for active transport, which will help my ideals align with tangible, safe action.

The ferry contributes to a fifth of our public transport emissions, decarbonising the fleet is a simple, effective step towards our climate goals.

This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding.

Use of the fund needs to be front-loaded so that the most gains can be seen before 2030.

I want Council to push Auckland Transport to optimise cycleway roll out so that the dedicated funding goes further (literally).

The shift to low carbon buses should be a small step in wider actions to fully decarbonise the fleet.

Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

I want to ensure that the Council actively honours Te Tiriti, tino rangatiratanga, and mātauranga Māori.

I strongly support the approach to maximising benefits to under-served communities in Auckland.

I want a strong partnership between Auckland Transport, Auckland Council and central government so that funding can be used most effectively.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are in a climate emergency, and I want urgent action now.

Climate justice is paramount. I strongly support the rate focusing on under-served areas.

I frequently walk and cycle around our city. I am excited to see $228 million towards building more cycleways and walkways.

Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is not a priority. Priority is to get NZ back on track with the economy by removing MORE GOVERNMENT and introducing LESS GOVERNMENT attitude. I do not support because the studies done or followed by this government are following an agenda that should be avoided. They are almost unachievable unless it creates more harm than good since most changes by progressive parties are irrational and mostly emotional. And the politicians do not hold accountability for the consequences either.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I strongly believe that all the debt we are facing now could have been avoided if the government had taking a better approach, a balance of economy and health target approach instead of an emotional approach. The first lockdown and the first lot of benefits were great and needed. Any action after that was absolutely wrong to say the least. We are where we are now with the economy because the bad decisions by the politicians.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Remove the mandates, and let the economy work it's way out of this economy disaster. Stop borrowing money and let the private sector alone with our normal legislations and rules. Less government means better country.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: LESS GOVERNMENT means better country. I do not support standardising waste because we need to create competition to achieve better prices. In a monopoly market, the seller faces no competition, as he is the sole seller of goods with no close substitute.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I support: 1. NEW HOSPITAL. 2. Māori outcomes 3. Continue to support response to homelessness.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Auckland council have destroyed a once great city and made it basically unliveable. You had destroyed once thriving areas like Mt Roskill and tried to do the same in Henderson! Enough of the “improvements” that destroy this city, a child could do a better job so it is amazing the level of incompetence that gets rewarded.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year’s, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: This shows that you completely ignore the feedback provided and Auckland Council just do what they want. No one supported this increase. Maybe it would have been better to cut overpaid and incompetent staff to pay for this.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Not enough information provided and as usually provided in a messy and confusing way.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: No! PAYT is fairer, why should people who don't need to put the bin out every week pay more for a service they don't use? Put a chip in the bin or a stick on solution/ barcode etc that the truck registers and charges to a credit card so you don't need to buy tags than just create more rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: You are completely out of touch with things that are important to people and what people use or would like to see. Do things that matter like community events or spaces and beautification instead of things that only impact a few people.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The start of the 2-stage development of Ponsonby Park at 254 Ponsonby Road - this has already been delayed and it would be great if it can be prioritised. It will be of huge benefit to the community

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I don't see any alternative while covid is around.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I would like to see green (garden waste) included somewhere.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I'd like to see Khyber Pass and the Domain made more pedestrian friendly.

I'd like to see an alternative to private green waste collection services like a local walkable drop off point for green waste.

I'd like a more concerted effort to control rats.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why: But freaking way too low! We are in a climate emergency!! Happy to pay more if this helps us focus on more climate change initiatives especially we need to move away from Oil. Especially with the russian war. $58 per year is way too low !!!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Again rate increase should be way higher with this growing city and the demands it need!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Again, raise rates!! then we wouldnt have this question.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Great. More standards are great.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: For waste we need to have underground bins like in the netherlands especially in areas with appartments / town houses.

For local boards we need to focus on bike lanes, bus lanes and more / wider footpaths. We have enough roads. Please get rid of a few.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate is the single biggest issue we are facing in terms of long term viability of this city. I would entirely support a larger rates increase to accelerate this process.

Reducing and disincentivising single passenger vehicle transport, removing the Auckland Transport board with their pathetic status quo is the number one priority. We should be reallocating road space to people and plants as fast as we physically can.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Without knowledge of exactly what services you would be cutting back on, I cannot possibly comment on how my support for this falls.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Rates funded is entirely preferred. I would like to see the new food scraps system rolled out as fast as possible, as at least personally this is the majority of my household waste, and I hate to see it going to landfill (We do not have the space for home composting). This should include comercailly compostable plastics and plates etc.

For Opt out rules, I strongly believe that the level of service needs to match that offered by the council for opting out to even be an option. We need to force Apartment buildings and other multi-unit buildings to provide the same range of plastics recycling as the council service (Right now, most only support 1 and 5)

We also need to enforce the presence of composting services at properties which opt out.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I would especially like to see further efforts to make Hobson and Nelson Street liveable. These are the most densely populated streets in NZ and so should have some attention for things other than cars. Currently the footpaths are poorly maintained, blocked by roading services and otherwise entirely unpleasant. We need to focus on adding trees and plants, and reducing car throughput.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I only put my bin put once a month and do not want to have to pay for more than I use.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Property owners should not be the ones bearing the burden. The government should use its revenue from trade and investments to finance climate objectives. Inefficient use of rates revenue has resulted in ever increasing rates over time. The additional rates charged to rental properties practically doubled the rates when rents were not doubled. What did the government do with the money?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Send government officers to to Norway or Singapore to learn how the government generates value for its citizens and engage in sustainable spending in the long term. NZ' simplistic equation "more spending = 'more taxes/rates" does not require highly paid government officials, High school students can do this.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: It is well known that government workers are not business people who are always thinking about the bottom line. Bring in the private sector to improve efficiency and lower cost wherever possible. Government should just manage safeguard interest.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: User based charges are always fairer so there is no cross-subsidising.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Increasing provision for cycling and walking is a waste of money, far too few people are showing an inclination to make use of it, and Auckland is too wet and steep and dangerous to encourage it. The money would be better spent on extending a low emission ferry service to more Auckland suburbs.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Targeted rates are a red herring, and support poor public outcomes and questionable spending. Dollars are fungible, every spending decision made by the council should stand on its own feet and when tested against all other expenditure options available to council. The idea that certain funding is ring fenced from scrutiny can only lead to inferior public welfare outcomes.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support efforts to manage budget pressures, but efforts to reduce capital and operational expenditure do not go nearly far enough. The council should also go significantly further in terms of selling latent assets and should remove itself for all commercial activities and sell such assets (including the port and Auckland Airport shares).

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: I support efforts to prioritise spending but the options shown are incredibly narrow and do not go far enough. Tweaking around the edges is not enough a zero cost budgeting exercise to examine all areas of expenditure should be undertaking with the option of completely removing council involvement.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: A standardised model across the region makes sense to minimise the cost of delivering the service.

I do not support targeted rates to support a food scrap service. Targeted rates a poor framework that supports inefficient expenditure. All expenditure decisions should be tested against all other options available to council. To silo revenues and expenditure decisions can only reduce flexibility the welfare outcome for Auckland residents.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Priorities should simply be enhance the local environment and facilities, and deal with the local homelessness issues. Focus on a couple of specific (tangible) things and do it well. Broader objectives are a waste of time and money.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Significant concern as to the aggregate rates increase (above and beyond those deemed to be general rates) being imposed on a residents. The scope/mission creep within the council is costly and delivering poor value for money. A significant reduction in ambition and expenditure is required. Effort and expenditure should be focused on core council services and infrastructure.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Stop spending our money to achieve your idealistic goals. Central government should be the leaders of a climate change strategy not local council. The estimated $58 per year will not be this amount, estimations are always over and above what is claimed. We all know it will be more and we have no faith in councils ability to effectively manage funds.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: In particular we reject the Government Better Off support package, which openly appears to be a bribe in support of the Three waters Proposal.

The other items appear sensible. We must all cut costs.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: We need clarity around what constitutes high priority spending. If things like the Erebus memorial are considered a high priority then we seriously do not support. Limited council funds could be put to much better use than erecting a large, expensive memorial which is irrelevant to the site.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Scooters on footpaths are dangerous and should be regulated to ensure safety of pedestrians, particularly children, the elderly and people with disabilities.

The empty buses that continue to drive around the central city (particularly during lockdown) are a complete waste of money.

Bus lanes and cycleways have made roads far more confusing to traverse for both pedestrians, and cars (case in point my elderly stepmum who recently got hit by a cyclist who was riding the wrong way on a cycle lane). Also the rabid nature of fine collecting for bus lane infringements is ridiculously punitive. People are just trying to navigate through a confusing maze of green coloured paint and signage. We do not enjoy moving around Auckland any more , in any mode of transport.

The Erebus memorial is totally wrong for the site in Parnell and the fact that the council is involved in this is completely inappropriate.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: Unnecessary spending and some suggestions is racist

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Work for the people, realize that people allected you and its your duty to keep cost down. Times are hard, and keeping cost down will ive people time to recover and we can address groth issues and enhancements, once economy has recovered

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to prioritise action on climate change before it's too late

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Streamline processes to be more efficient to reduce need for extra staff running messy processes

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I support this change in principle, however the small bin size needs to reflect actual costs for disposal of a small bin (and perhaps an even smaller option should be available). I currently live in a 2 person one cat, typical household (no intense zero-waste efforts, and no space for composting so food scraps all in the bin - decent at recycling). We still only put the smallest size bin out once a fortnight so our current cost for tags is $110 a year. This rising to 3 times as much is a huge increase for the same service, with getting close to 4 times as much to also collect food scraps. If food scraps aren't included in my bin, we might put our bin out EVEN less than we currently do, so the extra charge for collecting the bin even when I don't need it is obscene for low-waste users. I would be thinking we want to strongly encourage smaller bin sizes so you need to collect less waste and have less in landfill - therefore considerable reduction in rates needs to be on the table for a small low waste household. The impact on people just throwing things away because it costs them the same needs to be considered.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: NZ has one of the best Emissions Trading Schemes in the world capturing most carbon emitters [albeit excluding agriculture, a glaring omission]. The ETS caps NZ emissions and provides a pathway to meeting NZ's emission targets enshrined in law. Cap and Trade ensures emissions are cut from the most affordable source. In other words it cuts emissions at the least cost. The Council raising rates and undertaking it's own "initiatives" will have no effect on emissions for the country because these activities only serve to free up ETS units for others meaning the emissions will be taken up elsewhere in the economy e.g. burning coal for energy. In other words rate payers will subsidise higher cost emitters.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Crutial to set up infrastructure to increase active modes of transport - in particular - walking.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: support the thinking but cannot ascertain the practice outcome.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Many grey areas. i.e. Things that we should do? (how will we prioritise) ... We will do these to the extent that we can afford to.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Makes sense. Bins are reusable, bags are hopefully a thing of the past. Response and treatment of recycling, rubbish, and food scraps will be understood.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Other

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They are inclusive. As I have said, Please start the 2-stage development of Ponsonby Park. This long term project - community design easily sits under each of the proposals in Waitemata Local Board. 1. Addressing Climate Change. Ponsonby Park is a place to meet and greet, a place to walk to with a bus stop. Maori outcomes - it is part of the local history and will become part of the eco-structure. Local Parks - Improve and activate. Along with other projects, Ponsonby Park sits within the business district, as an asset for the intensifying community. Homelessness - Initiatives supporting the City Mission. Increasing great facilities within the local environment. Community Facilities - of course - it is key for the Ponsonby and wider communities.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Start the 2-stage development of Ponsonby Park in FY 2022-2023. This is very much part of the set 'Key areas of spend' which includes Parks and Community and Centre and local development. It is a long-awaited key connector for both people and nature which will help the Ponsonby/Freemans Bay/Grey Lynn/St Marys Bay/Herne Bay, and central city inhabitants, and businesses. A place to meet and greet, and finally a space within the business district to enjoy the history of the area.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The benefit of the so called targeted rate produces no direct benefit to st marys bay residents and is illegal (same rule as illegal airbnb tax). Any obligation to contribute to this item in a general rate is already included in the general rate. St marys bay is elevated and close to the CBD. As a result our general rates are already very high because we have already paid to be elevated and in walking distance of key places of interest. I do not believe Auckland City can make any meaningful difference to so called man made climate change. If it could it would stop chopping trees down.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: you can save most of this money by removing all but 20 positions paying over $200k pa, and by making better use of the port assets

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: your salary costs are extraordinary and not justified in the environment you describe above

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: removes our admin cost

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support any priorities

Tell us why: leys institute is your main priority, get on with it, you are stalling, all the rest above it is bumf and the proper responsibility of central government

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I strongly support this targeted rate, and strongly support its use for climate action. However, absolutely all of the money spent by council should be for climate action. No money should be spent if it results in increased emissions.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I do not support asset sales or lease. Increase rates and pressure the govt for more revenue streams and support.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Your policy seems incredibly vague.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Strongly support action to reduce unnecessary waste, and provide an option to dispose of food scraps in a more sustainable way. Would also like to see better education and enforcement action in regards to people consistently putting incorrect items in bins, such as rubbish in recycling or recycling in the rubbish. Would also like measures to prevent rats and other pests getting into the food waste bins.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Devonport-Takapuna Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I'm absolutely appalled by your lack of action on delivering safe cycling in the Takapuna and Devonport areas. How many people need to be seriously injured or killed on Lake Road for you to do something? Lake Road is an absolute travesty and for as long as you refuse to do anything to make it safer for ALL USERS, you have blood on your hands. An absolute disgrace.

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: We need strong climate action everywhere. Can you please sort out Ponsonby Road? It's a key road for cyclists connecting to the NW pathway and other cycle lanes, but it's incredibly dangerous and off-putting. What's more important? Parking or preventing serious injury and death? Parking or enabling people to travel in environmentally friendly and healthy ways?

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I want climate action that addresses the inequity of transport accessibility in Auckland.

I WANT to walk, cycle, and bus more for the benefit of the planet and my health. However, lack of infrastructure, and safety concerns, prevent this. I strongly support the increased options for active transport, which will help my ideals align with tangible, safe action.

Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Very annoyed that the Rose Gardens is to be vandalised to satisfy one or two families, ignoring the majority of local residents.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need strong action on sustainability and climate change mitigation/adaptation NOW.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Not enough information on what the services are that are suggested as low priority

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Need a more streamlined system. We don't have PAYT but actually this should in theory reduce waste. For rates based, having fewer, larger bins for multi-unit properties would be good. We currently put out too many bins that are 3/4 empty. Looking forward to the composting system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't know about the value of Ley's institute or cottages in Meyers park/Albert park. What are they and why should I care?

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Poor use of funding by Auckland Transport. Massive work done on intersection of Curran and Sarsfield streets for no obvious benefit. Why not a roundabout? Traffic down Curran and onto bridge needs to be slowed

Important privacy information

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am concerned about spreading the funding over 10-years, we don't have 10 years until 2030. I use public transport, and I think the service needs to be improved for the wider Auckland region. Public transport commute times for many locations are far too long and too expensive, which results in people using private vehicles.

Simple changes like attaching bike racks to buses will be cost effective and facilitate time saving multi-modal low carbon trips.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I support increasing revenue with rates. It's difficult to comment on cost saving measures without knowing what services will be impacted and what assets will be sold.

However, I think consultation on these items could lend itself to disparate outcomes, so I trust that Auckland council will make equitable and fair decisions on service cuts and asset sales

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I agree with prioritisation of climate and environmental projects.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think incentivising waste minimisation with costs could unfairly impact lower income households where consumer decisions around packaging are not viable. It may lead itself to illegal dumping of waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I feel there are way too many cars and car trips in Auckland. I completely support all the climate change initiatives, including walking and cycling over the harbour bridge as a crucial step to linking the North Shore to the rest of the city. If we adopt some of these climate change policies we will not only be helping with the environment but we will be creating a much more enjoyable city to live in. P.S How can Richmond Rd in Ponsonby be recently resealed and still no cycling lanes - I find this astounding!!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: The council needs to borrow money and put more pressure on government to provide funding to get climate change/ public transport/walking and cycling initiatives to happen sooner.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: We need to prioritise climate change action no budgets.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Statutory and essential services first. Auckland Council's history in resolution of stormwater issues; and, historic infrastructure deficienies requiring urgent remedy - such as those associated with CRL, Auckland Transport and Watercare - need to be totally foused on and remedied to make a now intolerable and infuriating city functional for the 21st century. After hard real estate assets - venues, halls, parks and in/on ground sports facilities and their efficient managment and promotion - everything else in descending priority.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I support only the Board's material "hard" priorities: Climate Change (all points); Local Parks (all points); and, Community Facilities (all points). The remainder I believe to be outside the Board's mandate and beyond reality of their effective reach.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Refer to Q 1, 3 & 5 "why" text responses. These are my priorities.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It may already be too late - successive postponements and prolongations of inaction must stop and stop now.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: nothing to add

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Our action on climate is pathetically slow - we need to pull out all the stops, and while all current council spending should be viewed through a climate lens moving forward, we also need this extra funding to improve transport and green infrastructure as you have outlined. I support this measure 150%

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: In lieu of central government doing what needs to be done and supporting councils financially, I support this proposal in principle, however selling our assets (including non-strategic ones) should be a last priority.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: OMG this is overdue, this should've been sorted in the first few years after the councils were agglomerated. HOWEVER, much thought needs to be given to how we process waste for dense living situations - rows of bins outside townhouses and apartments is not a viable solution now (let alone in the mid-to-long term as the city grows more dense) and there is little info on what you propose to address this in the plan (I don't see enough info to be able to answer the next question, 4B)

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support these priorities, but they actually need to be implemented - we've been supporting the "priorities" of improved cycling infrastructure for years and years but there is bugger all to see still - just a few streets getting lovely cycleways as part of other projects, rather than the mass roll-out across all streets which is desperately needed. People are literally dying due to the slow action in this field despite the political aims and political support being in place.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Just because we can choose not to do it

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: A small cost now will make a huge difference in the future, if this is not supported now we will simply push an ever increasing cost onto future generations!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please stop mucking around and get the Ponsonby Park work done - any of it, some of it, preferable ALL of it

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: 1. The cost of living is too high. Petrol is up, food prices are up and rent and mortgages are. Please don't put up the rates any more .

2. I don't trust the council nor it's reputation. It's democratically unaccountable and frankly corrupt. I don't trust that the so called that the money ostensibly collected to prevent climate change will actually make any difference. Will you spend it on huis? Fancy lunches?

3. I think any such rate should be voluntary, people should be able to opt in or opt out of it, that way people who simply can't afford it or oppose it, is not forced to pay it

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Any cost savings should not penalise ratepayers. Any cost savings should be made from salaries of big wigs at Auckland council

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Before cutting any thing, minimise impact on poor ppl, ppl who socially isolated

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: The different bins are good

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Think of about migrant community such as indians, not just Maori and pakeha

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Think about people on low income and cash poor when making decisions

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: As a family of 4 we use the smallest bin available. I have a compost and recycle as much plastic as I can. I am mindful at what I put in my bin and would only put it out maybe once a month or every 6 weeks. I would much prefer to pay as I go as then I am paying for only what I use.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Generally support but the tree canopy policy is flawed by politicians who have imposed an all native policy. Having walked along Victoria Street west for decades observing the successive failure of mischosen natives on the south side whilst the planes on the norths have provided real shelter for 100 years can we drop policies based on feel good narratives that simply waste rate payer's money and focus on good design principles that will endure. I love native trees but they are simply not suitable for every situation and pigheadedly ignoring this is leading to a lot of wasted spending obvious to any good gardener.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Generally support but I can't give a yes to reductions in services or sale of non strategic assets without your articulating some criteria

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Simpler

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The Ponsonby Park site needs progress as consultation has been done and it is a real eyesore in its current neglected state.

Could you also action the long promised landscaping of the road closure in Wood street zoned as a reserve for this very purpose This was promised as part of a settlement of various planning issues decades ago and periodic reminders continue to fall on deaf ears.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Could I make a plea for better quality design that will endure and be not pulled up and redone every few decades which is very wasteful. The Cathedral precinct and Khartoum Place are two examples. The Piazza del Campidoglio has lasted 500 years in Rome could we modestly aim for 100 years?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Cheaper to deal with now rather than later, better for the health of the planet and for people, will assist with traffic congestion, reduce pollution and increase efficiency.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

Or is there anything further you would like to give feedback on?

I understand the need for improved public transport both as a mechanism to reduce climate change and as a method for reducing congestion. However, it feels like the cost keeps increasing with no additional improvement in service, while simultaneously the cost of parking also increases. The end result feels like rate payers pay more no matter what happens.

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Prioritizing the environment and community, te Tiriti (and legislated priorities) is worth supporting.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: Like the expansion of the food waste service and continuation of inorganic collections. Support options for households to chose size of bin. Want to ensure businesses are charged according to their disposal levels though - they need (dis)incentives to reduce waste overall.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why: I am particularly in support of initiatives to better address homelessness (and housing precariousness) in the city. This also needs to include measures to meaningfully deal with the complex issues that have occurred since hundreds of vulnerable people were swept up into emergency housing in the CBD during Covid - essentially hot-housing people with a wide range of mental health and addiction issues with e.g. 501 deportees, gang members and drug dealers. Māori solution providers need to be more actively supported in this space. And while those in emergency housing's needs are the obvious priority, the impact of businesses (with people defecating on their doorsteps, frequent petty theft) and residents (with violent,threatening and anti-social behaviour now common) has been enormous and needs urgent and joined-up attention from the Board, police and community organisations.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Should also progress Ponsonby Park proposal

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: Why not just incorporate it in the general rate? Surely it applies across all projects and expenditure

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Why are we selling "non strategic assets"? What is the definition of this? These should not be sold without public consultation.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: The current waste bin system works well. However a third green waste bin should be provided especially as intensification and apartment buildings don't have space for private composting.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Other

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? Other

Tell us why: Ponsonby Park at 254 Ponsonby Rd should be listed in the community facilities. This is funded and ready to go and the Board should continue to show its support of the community project.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Ponsonby Park at 254 Ponsonby Rd has been in the pipeline for 22 years. The land is purchased, the design is done, the community support is there, the $5.5 million to get started in the 22/23 financial year is available. This should be itemised to ensure that there are no further delays and our important community recreational resource is built.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Creates a tangible, visible, strong connection between climate crisis, related actions and Aucklanders

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Do not support Councils sale of pocket parks and small parcels of land in Auckland e.g. Freemans Bay. This land even if small is needed for biodiversity enhancement, climate sequestation, community wellbeing and amenity

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change action is very important.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Can't afford large rates increase

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: This rationale seems fairly obvious, it's the detail that counts.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Refuse collection is an essential service for health reasons

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to move toward a carbon zero future for our survival as an island nation.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I do not support yet another tax being placed upon the hard working people of Auckland especially in light of the destruction of the economy due to restrictions placed upon businesses in the name of the pandemic. Where is this new tax money going to go? What is it going to be spent on - more "education/propaganda/indoctrination"??? To address climate within the city STOP CUTTING DOWN TREES!!! There is scientific evidence that cities with trees are up to 4 degrees COOLER than cities without trees. So start with simple things like that rather than continuously demanding money.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: With regards to revenue being generated from Council facilities your imposing of the unvaccinated restrictions are contributing to this. There is evidence that the vaccinated are just as likely to catch and spread the virus as the unvaccinated therefore your restricting the unvaccinated access to Council-owned and rate-payer paid for facilities is counter productive and discriminatory and if it was a user pays system then you would be out of pocket even more because those who are being discriminated against would have the right not to pay anything towards Council owned facilities.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Your Service prioritisation section does not present what services you are expecting to reduce, stop or change. Therefore, I do not support this prioritising operating spending other than to reduce the number of those overpaid "executives".

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: How about reducing waste at source by telling manufacturers to stop over packaging their products

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Cycleways impact upon businesses just look at the debacle of Grey Lynn. I don't understand why Maori need special support in initiatives or business or to provide more staff to ensure Maori outcomes - I find this discriminatory and isn't that what people protested against? Apartheid?

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The Tupuna Maunga Authority Operational Plan is potentially very destructive if the plan to cut down all the exotic trees off Mt Albert is anything to go by.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This is urgently needed! The carbon emissions reduced by moving to low emission ferry services and expanding the choice of transport options are necessary for Auckland to hit its carbon reduction plan. In addition, the social benefits of making walking and cycling safer, as well as increasing green spaces and canopy cover, as well as reducing reliance on cars should not be underestimated.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I agree in general with the proposed approach. However, I feel that capital spending, especially across public transport cannot be further delayed in many instances. If necessary, I would support an rates increase over and above the 3.5 percent previously agreed upon.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support in principle the framework for reducing operating expenditure. I would like to see that climate action be prioritised highly, as the long term costs of not acting are far greater than short term cost reductions

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support the region-wide rated funded model, however would like to see greater efforts towards landfill diversion, and a greater form of incentive to reduce waste creation. Whilst PAYT is not an ideal system, it does have the built in incentive to reduce waste creation, whereas the new system will not

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I would like to see a greater acceleration of initiatives to help meet the climate action targets set by Auckland Council. In particular, we need to accelerate the uptake and capital spending on public transport, and maximise uptake

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: As residents of Auckland we all contribute to the carbon emmissions in some way. We all have to do our part to reduce climate change, on an individual level and as a community. For the latter, a climate action targeted rate is a great idea as long as the spending is ring-fenced specifically for that purpose. It would be great to see bigger incentives for people to use rainwater and greywater options given the now regular water shortages in Auckland.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Although I understand the need to prioritise and the criteria seem relatively okay overall - I am always concerned at anything that suggests public services can be done better or more efficiently by the private sector. We have seen that private/public partnerships in NZ do not always deliver value (Transmission Gully). The idea that the Council can partner with others for better value or that services can be provided just as well by others needs careful consideration. I worked for Westminster City Council in the 1990s when the political policy and strategic direction was to achieve similar aims by divesting almost all services to the supposedly more efficient private sector. I was part of the strategic team attempting to achieve this and observed a hugely disfunctional outcome that required significant larger logistical and professional oversight than expected.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Completely agree with the three bin-size idea. As a very low waste household this would provide some acknowledgement of that. For those with higher waste it may incentivise people to think a bit harder about what they throw out. Also agree with the food waste bins. We compost for our body corporate of six units, but it may be more efficient given our size if some of that is diverting into Council composting schemes.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: It would be good to see the Board considering how to handle the issues associated with the behaviour of some, not all, of the Australian deportees and other transient communities being housed in local communities such as Grafton, K Road, and many other local communities within Waitemata. These issues include anti-social behaviour, petty crime particularly theft, and drug and alcohol issues for example. Grafton had a huge issue with this over the past 18 months but is probably not alone. This is partially connected with the homelessness issue too. This is not a suggestion that these communities should be removed but rather is there a way we could work with Maori Wardens, the City Mission or other community representatives to address this in some way for everyones benefit including those transient communities.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rates should be rising to fund some of this. Set a range of minimum 3.5% increase or CPI if higher.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Do not reduce services

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: My waste bin is not particularly full each week. Given I'm paying for a collection eavery week I'm incentivised to just fill it up. Make it PAYT and let me put out every 2nd or 3rd week and I'll try to minimise.

And be smarter than tags - what about RFID on the bins so you know who has put theirs out.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Fix the disfunctional Auckland Transport. We need safer roads urgently. They are all talk and zero action, no sign of them actually doing anything about improving the transport network.

As an example - my street has just been resurfaced. It's wide enough for bike lanes, parking and traffic lanes. Yet the paint went down again identical to how it's been since the trams were removed in the 1950s. Where is the quick cheap fix?

Auckland Council are supposed to control Auckland Transport. Start doing it please.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I currently live in the city centre and view this targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding.

Use of the fund needs to be front-loaded so that the most gains can be seen before 2030. Council must push Auckland Transport to optimise cycleway roll out so that the dedicated funding goes further (literally). I'm sick and tired of AT not doing what they're told to do, if something needs to change to bring them under control change it, stop making excuses.

I WANT to walk, cycle, and bus more for the benefit of the planet and my health. However, lack of infrastructure, and safety concerns, prevent this. I strongly support the increased options for active transport, which will help my ideals align with tangible, safe action.

Ferries contributes to a fifth of our public transport emissions, decarbonising the fleet is a simple, effective step towards our climate goals.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is the single largest threat in our lifetime and we must do something urgently. If a targeted rate helps that, then I am very supportive

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: People need incentives to reduce their waste and pay as you go is a good lever for encouraging this

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It is super urgent plus all measures will improve the quality of life and health of all of us.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Don't paralyse communal improvements in order to keep rates down

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: No to Ponsonby Park and no to the proposed playground at pt Erin. Defer until budget and expenses are more firmly under control. Rates in our area have increased to the point they will be pushing long-standing residents that are part of the fabric of our community out of their family homes.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Rate increases are unsustainable

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I STRONGLY support this. We need to do more to transition Auckland toward a city where not driving is a viable and attractive option.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Please continue advocating for walking, cycling and placemaking projects.

Please also advocate for addressing increasing anti-social behaviour in the local board area. We have had BIG problems with people driving around at night blasting external speakers over the last 6-12 months near Victoria Park. It's a form of torture and is making us think about selling up and leaving the area.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This is inevitable; good to get in ahead / be an early adopter and leader in this space.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I would rather see a rate increase vs reducing services or selling off assets.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: As noted above, I think it is counterproductive to cut services, esp. with inflation and a possible recession on the horizon. I'd prefer increasing rates and keeping services constant (or indeed expanded; I think our social safety net is fraying a bit, as a walk through the CBD amply illustrates.)

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I live in an apartment; it's not clear how this would affect me.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Please cut expenditure as a priority people cannot afford the current rate increases

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Please defer non essential spending

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Prefer pay as you throw but should be cost/revenue neutral to ratepayers particularly low waste families

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Now is the time for being fiscally conservative with Council's spend and focussing on urgent priorities only, not the 'nice to have' things like the new Ponsonby Park (would actually prefer Council sold this prime land to private developers/a PPP, rather than continue to hold this valuable asset and spend money turning it into a new park/outdoor area). Ponsonby Park risks becoming a vanity project in a neighbourhood where so many long term residents will no longer afford their rates. There are already so many parks and reserves and outdoor recreation areas in the immediate vicinity (ie Tole St Reserve, Ponsonby Central, Western Park, etc) I agree the current building on that site is tired and it's not a good use of space, but do not think it's Council's place to prioritise spending $ on a new park right now. If Council were to sell the land to a third party developer the revenue generated from this could make a huge difference to all of the competing priorities that are experiencing service cuts etc

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Lower the petrol price

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: No more bin tags in west Auckland!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Bin tags cost too much!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support this primarily for the increased provision for walking and cycling, as well as the increased tree canopy cover in communities that need it most. I used to cycle much more frequently in my daily life living in Canada, prior to moving to New Zealand. Despite having a much more amicable climate for cycling year-round, I'm downright afraid to cycle many of Auckland's city streets simply for the lack of infrastructure and car-centric culture that currently exists. I think creating more flexibility and choice in transport options, away from cars is needed to make Auckland a more forward-focused city and to support better lifestyle options for Auckland residents. I also notice how tree-vacant many outer-lying suburban communities are (nevermind certain areas within the CBD as well!). The more trees and natural vegetation we can re-introduce back into communities, the better as part of our efforts to lower carbon emissions, better capture & control rainwater and runoff, as well as improve natural landscaping features.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I previously agreed to the general rates increase of 3.5 per cent and still strongly support that move. I think the demands of the time call for this kind of investment, as well as overall reductions in spending, such as looking for opportunities to sell or or lease non-strategic assets.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support the proposed decision-making framework and would also support an overall audit / review of any organisations or facilities that are not aligned with this sort of thinking. Honestly, Auckland Transport often seems more focused on delaying projects and avoiding commitments to improve cycling and walking alternatives rather than sticking to Council-endorsed plans and getting action in place quick. Their delays and lack of action seems to often COST us more money than save it. That's an institution that needs a serious audit of its senior level / executive board members to ensure it actually lives by the focus and mandate to support more diverse and sustainable methods of transport.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I don't feel eligible to comment on this as I currently live in a flat / apartment complex, so have no direct experience or need for kerbside refuse collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) I don't know

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units I don't know

Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support these priorities, particularly the implementation of more walking, cycling and placemaking projects. As noted earlier, I just hope that Auckland Transport doesn't create barriers or challenges to these projects actually getting completed.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Overall - the more Auckland can do as a city to take concrete and fast action to address and adapt to climate change, the better. It is one of the most bold and strategic investments we could make at this time, and would position us as a strong and progressive role model among other regions and councils across NZ.

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I totally disagree with this proposal. As a single mum with growing kids,pay as I go helps me budget. I don't use rubbish every week why should I pay for it. This is not equal as manukau and central won't be paying what we do. I live on the shore because my Whanau and my work is there but I should not be penalised because of this. I have no faith in the council spending my rates in the best interests of my kids. we should have option!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: It appears that initiatives are made by those who dont actually live just day by day, these seem focused on what is not useful in real life and just keep adding costs to us not those making the decisions …. Everyday is hard work and I do not feel supported or listened to. Your decisions are driving people out of Auckland.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Do not agree with virtue signalling

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

There is a dominant focus to reduce transportation emissions through public transport and supporting active transport.

It directly targets inequities through improving services in communities currently under-served.

The fund will be used to improve and make public transport more accessible and climate friendly through increasing services and frequency, and purchasing low-emission buses and ferries.

People who commute by public transport have less cardiovascular disease (high blood pressure, heart attacks, strokes), less diabetes, and overall lower mortality rates.

Funding to improve access to active transportation is needed in Auckland. This climate action package will be used to improve 35km of footpaths, including lighting to make walking safer and completing cycling links across the region.

Commuters who walk or cycle are healthier and live longer. Active transport is proven to reduce all-cause mortality and reduce morbidity from non-communicable diseases such as cardiovascular disease, respiratory diseases, diabetes, and mental health.

Planting of urban Ngahere (forests) will improve carbon sequestration and also promote human health and wellbeing. For example, through psychological benefits, and cooling the city by providing shade and transpiring water.

Planting will also be of cultural importance with kai gardens and rongoa (medicinal plants), further supporting food sovereignty and community autonomy.

Trees purify the air by removing particulate matter pollution reducing the risk of asthma, heart attacks, and stroke.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think it's important we start taking climate action. The changes in climate are already affecting other places in the world and are just getting more devastating every time. It's more expensive to repair the damage caused than to prevent it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Covid impact has been hard on everyone. It makes sense that the budgets are managed in a way that reflects that.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It can help better waste management region-wide.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I've been very disappointed that the new waterfront and Britomart renovations didn't add more tree canopy area. It feels like a dry concrete everywhere and it's made it a very hot place to walk around in summer.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We need way more trees and nature integration in the urban Auckland CBD and waterfront areas.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We all need to take action to achieve the needed climate change goals - whether we like it or not

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Difficult times require difficult measures. Postponing "nice-to-have" capital expenditure must be the first step, rather than cutting essential and important services.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Perfectly sensible measure

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: If something has to give, spending on cycling projects could be postponed as the area seems well-served now

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: You can do better than that. Improving bus services isn't gonna do anything when bussing is actually rather expensive and costs the same as, sometimes more than, driving. It takes longer than driving too since there are not many busses and only a few direct routes. Priorities should be on other things, such as reducing waste, better recycling processes since NZ hardly recycles, more composting initiatives, putting limits on and taxing large mass producing companies. The industrials contribute so much to climate change, it's a fact look it up. For both reasons of significant wastage and packaging, AND CO2 emissions. Change the priorities to something more effective instead of protecting and enhancing selfish capitalistic gains

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: That was poorly explained. If you want the general publics opinion, you need to be able to communicate it in a way people who have no governmental finance knowledge will understand

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

What do you think of this proposal? Support

Tell us why: I am from Auckland Central. It is amazing that a rate is proposed to help fund climate action and climate justice in Tāmaki Makaurau. As someone who would like to cycle to work, to buy groceries, to explore around, but can't do so because I don't feel safe as there aren't safe cycle lanes connecting all of Auckland, I would love for this climate action targeted rate to be passed so that we have a financial source to build safe cycleways. I want Council to push Auckland Transport to optimise cycleway roll out so that the dedicated funding goes further (literally).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Firstly, standardizing ACROSS THE BOARD is imperative. We all need to be doing the same thing to minimize confusion & therefore make everyone accountable for doing the right thing (no excuse to throw food scraps in the general rubbish because you've moved from a region where there was no recycling of food scraps, to a region that does, for example). Secondly, EVERYONE needs to be making a significant contribution to reducing emissions. A standardized system will mean that if changes to the process are introduced, it trickles down to every region.

As a side note, it's extremely frustrating not knowing what is 'permissable' for recycling due to mixed messages & opinions & not being able to find the information easily. One tainted item in a recycling bin deems the entire bin as 'non-recyclable'. There needs to be clear, concise signage on ALL bins to illustrate what you are allowed to put in a bin to ensure the entire contents of that bin can be recycled.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I know I won't benefit from any changes to this, public transport is already impossible to/from work and home unless I want to spend 2hours travelliing on an 20min route. All that will happen is you will invest more into central routes (if any) and leave the outskirts, yet we will continue to pay for it in our rates, albeit never benefit from it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I mean, the council doesn't seem to be worried about families already paying inflation on everything at the moment, let alone another rates increase. I know it's only the standard amout, but how about no increase for once! I don't seem to get an increase in any services and Im definitely not getting a comparable increase in my wages.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Would make life easier scrapping the tags (don't have to add them on the bin each week and don't have to buy them etc) also must save time for collection staff who won't have to check and remove them. Plus we have had a number of occasions were we have placed a tag on the bin and it's either been removed/stolen by a random member of public or improperly checked by the collection staff and it's meant our rubbish isn't collected so we have to go through the rigamarole of complaining to council and arranging an alternative collection date!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Tired of paying rates that get funnelled mostly to central city initiaves or priorities and minimal spent locally. Our roads are crap, roadworks takes years (not exaggerating - new Lynn, golf road etc), public transport sucks, west Auckland town centres are not nice places to be and certainly don't engage the community.

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We need to address the Hobson Bay walks, the deterioration is embarrassing.

And the city is progressively becoming a less enjoyable place to live, with more and more rules and less community. Rules for parking, rules for building, make-work rules for compliance, rules against innovation.

AT parking enforcement and communications is a terrible reflection on our council.

Want more public transport uptake? Make it attractive. The people we want to use it most (long distance) have to pay exorbitant amounts to use the system. Progressive cities recognise this with a flat charge for use of the network.

Also bring back communally funded mowing of berms, rather then each of the thousands of homes having to do their little individual section, what a waste of thousands of individual people's time, and our city is an embarrassment with locals and international visitors. I pay our lawn man to do the council path, our berm and neighbours but not everyone does this. As a collective, our city will be so much nicer.

And push for more undergrounding of cables.

We intend to be a world class city, but we are lagging.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think we often focus on what national Governments can do for climate change but it's crucial we recognise that action must also come at the local Government level.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I'm in favour of waste reduction no matter how it occurs. My gut feel was that PAYT would achieve this but in hearing the Council's reasoning I can see the value of rates-funded.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I would like to see investment in the Parnell Baths, with the changing rooms etc. clearly showing their age

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: Hi I'm Dion and I work in Parnell and live in Titirangi.

I would rather pay a little now than pay a lot later for the consequences of climate inaction.

Council needs to disincentivize the use of private vehicles. This rate needs to be a tiny slice of Council's climate action cake.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I live in Titirangi and have to use the PAYT system. I don't think it works as intended. I don't adjust my rubbish generating habits because I have to buy a few bin tags occasionally. The act of buying a bin tag and then the separate act of generating rubbish are two disconnected. I already reduce waste when I can. All a bin tag does is add stress to the times I forget to buy one and it also generates extra waste because the bin tags have to be created, collected, and then disposed off. Bin tags are in my opinion a net negative for the environment.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: While the initiatives are good, I am not sure if the cost/investment is worth the benefit. It would be good to see a comparison of the emissions saved per dollar vs the price of carbon credits in the final Annual Budget as well as all future climate related projects with an emission savings element. Given the recent spike in inflation and cost of living, would not support if these proposed initiatives are neither too effective nor value for money when compared to benchmarks (e.g. carbon credits). Would also be good to see if there are any other relevant benchmarks for climate adaptation.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: It stated that there is no plans to sell council owned airport shares in these supporting materials, but would be good understand why these assets are not being considered as part of these levers. There would be value in consulting with the public on these matters.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Support the items in "What we must do", but don't really support the items in "What we should do". These priorities were set in a pre-covid world and given the "new" circumstance we are in, perhaps it would be good to revisit what council's key and core priorities are. Also, within these key priorities, there are often examples of things that council do that are not really a priority (e.g. good to haves, free public transport, etc). Perhaps a more detailed criteria/principle than just key priorities is needed. Lastly, I would say "mitigate key risks" is a must do rather than a could do.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: A rates-funded system would give council a near-monopoly hold over the market. This may result in inefficiencies and lack of innovation compared to a "freer market". Furthermore council is already a very big organisation with lots of overheads (governance, processes, etc) that will flow into the cost of providing these services. While there may be size and scale benefits, given the size of council and the diversity of its other business services, it is too big to realise such benefits and will end up in higher costs compared to a leaner service provider whose core job is to provide waste collection services. That said, there may be value in council playing a coordination/best practice/policy setting role for the wider market players (i.e. influence and guidance, not control of market)

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Would be keen to see community and public security as a priority going forward.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: These issues appear consistent and reasonable to achieving the goals. I am especially fond of increasing the tree canopy in Auckland and am unsure what you mean by "communities that need it most" since I believe that all of the City likely needs it improved.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Covid-19 has changed our world so perhaps it is time to reevaluate all the capital asset expenditures. There likely needs to be a cost-benefit and re-forecasting performed for all of these based upon what we know now about the world and how we see it being in the 1, 5 and next 10 years. Rates are a very controversial issue right now so let's not change those. I do not believe that we should continue on the sale or long-term lease of assets since the decisions which made those "non-strategic" may no longer be applicable.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: I do not believe that it makes any sense to try to create a balanced budget. Our City is not a business and treating it like one is not practical. Besides, having a $30M deficit for a $2M budget is about 1.5% deficit and that is less than inflation will be next year. So let's stop stressing about the small things and focus upon getting it done!

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Clearly the existing system is not working so let's try something new and plan to reevaluate it in a few years. My inclination is that for this to be #4 on the list that we have done the best we can with the time allowed to develop a new solution. If it does not work then we can refine it as we go.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They all sound like wonderful initiatives! Let's get busy!

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The cost of living in Auckland is already not sustainable, so while it may seem nice to have a climate action goal it's not practical to be increasing a rate that can not assure any improvement especially when the population keeps going up (CO2x average person/ total population = net decrease but total increase of CO2 so all this rate increase would be a council fart sniff exercise

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Council needs to stop doing social policies and stop employing pointless HR roles (diversity and inclusion managers) as example

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: The strategy only seems to target a small population of Auckland and should prioritise those that pay the rates rather than allocation based on race

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Waste management is a standard and correct function for a council

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: All peoples pay rates so no group should be receiving targeted initiatives unless all groups are receiving targeted initiatives also peoples business ventures are not the business of council so it should definitely not be investing rate payer money in them

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Bring council to be a socially neutral entity

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I prefer a system where waste minimisation is a priority.

I support the introduction of greater separation of household waste and welcome the introduction of the Food Scraps kerbside collection. However, it seems that the proposal does nothing to encourage people to minimise their waste.

If this is achieved by a system where we pay less if we put out less waste, I support that.

However, if it merely encourages anti-social behaviour, eg. waste hoarding or dumping, I don't want that. But maybe this anti-social behaviour happens anyway and maybe most people are actually responsible citizens and dispose of their waste thoughtfully.

I expect the professionals in this field to come up with a workable waste minimisation strategy, without the expensive (rates based) option of paying for collections that I (and presumably many others) don't use. I only put my waste bin out once per fortnight, but I still want a weekly collection service.

Why is it allowed that one bit of contaminated rubbish in the recycling bin means the whole lot has to go to landfill? This problem needs an urgent solution.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This is mindless flag waving that will do nothing to prevent or slow climate change given NZ's emissions total less than 0.5% of global emissions. All this will be is an excuse to increase rates, which will do absolutely nothing towards its stated purpose.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: hard to know what you are asking. the key focus for the council should be on costs control. sack the thousands of useless bureaucrats at the council, stick to core council areas of operations eg libraries, rubbish collection, public facilities etc, rather than mindless "climate emergency" drivel or ruining queen street with concrete pillars and road closures everywhere.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Yes, prioritize core functions and stop wasteful spending, including on staff.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Another rate hike by stealth. Rubbish collection is a core service that the council ought to provide. Strongly oppose this proposal.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Climate priorities are complete nonsense as you will achieve nothing. Race based priorities are racist and inequitable for the non-favoured races. Please stick to core priorities!

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

My general feedback is that the Council needs to stop trying to ruin Queen Street and it needs to give ratepayers value for money, and not waste ratepayer funds on woke nonsense.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Too expensive. this should be a central govt tax, taken from the petrol levies.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: look at outsourcing or selling licenses for various services, such as swimming pool inspections, building warrant of fitness.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: allows me to manage my own waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: central govt should manage the homeless and climate change.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

keeping rates down by focusing on core services, not add ons and social services

What do you think of this proposal? Do not support

Tell us why: Where is the accountablitly for money that will be raised by this Targetted rate and the cost benefit?

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: In the past Council have not been able to deliver projects and promises to keep within budgets or to reduce spending.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: There needs to be clarity and transparency on the criteria for analyzing budgets and expenditure

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: This must be the third review and change of the waste disposal processes in Auckland in the past 10 years. So how much will this review and the consequential changes cost?

The government is announcing bringing in a national standard for waste disposal so this should be completed before Auckland reviews its own.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Certain of the priorities listed are more the domain of central government and some are yet to be approved by the population overall

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is the single biggest issue facing us today. We must do everything we can to address this. A small rate increase to fund the kinds of initiative you describe seems reasonable.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: This is a tricky one as I don't know the details of the strategies you suggest or if they represent the best approach. There's a level of trust in my support.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Again, I don't know the details and trust is involved. Prioritising climate issues sits well with me.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I'm in an apartment and so not sure how this change would affect me. But agree in principle. Definitely support food scraps collection.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Definitely support 1 and 3 as strategies for climate change and parks affect everyone equally. The others appear to be quite focused and I think cost-benefit needs to be considered more carefully.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Getting us out of cars for climate action and providing excellent parks and library services for well-being are priorities for me.

Important privacy information

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: There are clear links between climate action and good health. As a doctor, I strongly support climate action for benefits to the environment as well as human health.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I would like to see that the sale of non-strategic assets is carefully thought through. Privitisation may lead to short-term gain but it's a bad idea in the longer term.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Why spend $1bn when you say use of public transport is reducing. Do you honestly think that the world has not changed, the percentage of people working from home will remain high, if you believe we are going back to offices as per pre COVID you are wrong.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Stop wasting money on million dollar projects you complete then some 2 years later have to re build- Richmond Road is a prime example. Before you spend money pretend it is your money and consider how disappointed you might be if you did not get value for money.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: You do not actually say anything specific? I have no idea what you are proposing - yes you have to provide things required by law and provide essential services. All you are intermating is you will do your best and so you should.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I agree with your statement "Standardised services and charges across the region will mean everyone with the same sized bin pays the same rate no matter where you live, which is more equitable."

My question is if that is more equitable why are rates based on your assessment of value, everyone has the same services so why is it equitable that people with higher value property pay more? Is this another tax?

Your food scraps those people with compost collection already dispose of food scraps that way.

I note your expected cost saving of $70 per household - I very much doubt a single $1 will come back in a rate reduction.

How would you deal with dwellings that are only occupied for part of the year? Is it equitable to pay for 52 waste management collections when in fact you only require 16 or 20? I will help you out - no it is not equitable.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I genuinely do not see value for money from Council services, furthermore you enter into projects that are expensive and have little to no consultation and when there is consultation you still proceed with the initial plan.

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Key priorities for me:

1. Enhance security. Apartment locker and storage gets broken into almost weekly. Seems like most of the time the Police cannot identify thieves, maybe due to a lack of resources, or too much bureaucracy. Basically in my understanding, the cost for catching these thieves is too high. Should add more punishment to stop such activities.

2. Homeless in CBD needs more attention, sometimes unsafe on the street for pedestrians.

3. Vote against dedicated budget for Maori group. Auckland is a multi cultural city, money should be spent equally for different ethnicities.

4. Save money by not investing in parks/gardens. Spend more money on security

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

To re-iterate, highest priorities for me:

1. 2nd harbour bridge or equivalent (tunnel)

2. better security in AKL CBD

3. stop pay-as-you-throw rubbish system

4. stop spending money on vague community projects, and stop dedicated money for Maori ethnicity - all ethnicities should be considered.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's vital that we provide for the future wellbeing of the country and the planet

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I don't think the council can be trusted to determine which assets it's appropriate to sell. Otherwise th plan looks OK.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Difficult to wade through all the verbiage in your prioritisation list – a lot of that is open to interpretation. Depends on who you would 'partner with'...

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: However, I strongly object to paying for a food waste collection service unless we can opt out of this. I have a worm bin. Also, I would probably only fill my red bin once a year.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: They all look good but the devil may be in the details. E.g. I do not support removal of exotic trees...

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The rates are outrageous for older retired people. There should be a concession for those who are no longer earning money. It should not be that they are forced out of their homes because of high rates.

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: You have provided no detail on how this money will be spent just aspirational statements. The recent introduction of cycleways in Grey Lynn and K Riad have been poorly planned and executed and have made both these areas less pedestrian friendly. I do not believe that council has the expertise to spend ratepayers money in a way that will achieve meaningful effects on climate change

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There is no detail of what the so called non strategic assets are.

Council already fails to provide basic services such as park maintenance and street cleaning and I fear essential services will be cut while council does little to contain nonessential spending ie Posinby Park

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: No detail. You already fail to provide essential services which according to the document you must do.

If priorities are cycleways and the debacle around Grey Lynn school and these are deemed essential then you need to revise your priorities

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I generate almost no rubbish. Pay for what you use is a much fairer system and will hopefully make people generate less rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: The local board has destroyed a forest in Western Springs, wasted millions of dollars on a failed cycleway and about to waste millions more, created a dangerous and nonfunctional riadway outside Grey Lynn primary school, wasted millions developing the yet to be seen Ponsonby Road park, spent millions redoing gutters that were adequate. Our streets are unswept, pavements are hazardous to pedestrians, and parks are poorly maintained. There is no commitment to provision of essential services and the proposed projects will do little for the people living in the area apart from the few who have vested interests. Many if the proposed projects lack any detail and there is no budget included. I think our area has been very poorly served by the current board.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I do not support allowing local boards to have more control over essential services which will increase costs and in the case if the Waitamata board decrease delivery of these services

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The city should be doing a lot more to move away from cars and offering people public transport, cycling, walking options.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live and work in Tāmaki Makaurau Auckland. More needs to be done in Tāmaki Makaurau Auckland on climate action. To date I am very dissatisfied with Tāmaki Makaurau Auckland's progression with climate action. In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words. Climate justice has to be a major focus because our futures, our tamariki's futures and our mokopuna's futures depend on it.

First, the far majority of my transport in Auckland is by bike. The infrastructure has improved over the last few years but it is not yet close to being safe or good enough. I regularly have dangerous and scary close calls with cars and other vehicles. I refuse to drive a car because of the devastating climate, environmental and social impacts that the oil industry and car industry causes. During lockdown and over the summer period this year it was quite safe to ride around Auckland. I have many friends who refuse to ride bikes due to it being too dangerous on the roads of Auckland. For example 2 of my flatmates have bikes but refuse to ride them as it is too dangerous so they drive instead. Big steps need to be taken to reduce traffic and improve cycle infrastructure so that more people feel comfortable riding in Tāmaki Makaurau which will also reducing the climate impact and pollution of our city. The current cycle infrastructure is good, there just needs to be a lot more of it.

Second, not everyone has equitable access to public transport. I currently live close to a few bus lines but for some of last year was not. Greatly improving the frequency and coverage of buses will go a long way to solving this. Whilst big

ticket infrastructure like the CRL is important for a growing city, buses are as important, if not more. Additionally, more buses need to be decarbonised and quickly.

Overall, reducing transport emissions will go a long way with climate change. Taking more incentives away from the use of private vehicles will help this greatly. Having previously lived in European cities, there is almost no reason to own a car for most people as cycling, walking and public transport is so good. Auckland lags seriously behind Europe in cycle and public transport infrastructure already so we cannot delay this package and it should not be pushed off to 2024. The financial cost is worth it, it needs to happen now!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Not enough information in the link above

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I lived in west Auckland when PAYT was introduced. Dumping was rife as people tried to avoid paying. More thought also needs to go to collectively manage waste in inner city suburbs where multiple bins on the street worsen accessibility issues. Some streets in arch hill have footpaths that are unusable because they're covered in bins

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

AT is not enforcing parking laws. Vehicles are parked on footpaths all over inner city and inner suburbs and AT does nothing. To have a truly livable and accessible city we need to put people first, not cars

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Public transport in Auckland is in dire need of improvement and is crutial to reduce transport related emissions. I agree with the proposed steps mentioned above.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: More needs to be done to address climate change and local councils can take the lead.

It's like the Anti-Nuclear movement in the 80s which started with local councils declaring anti nuclear zones which encouraged the Lange govt to do so for the whole country. Critical mass is required to take a large step and getting Kiwis to pay for climate change minimisation has proven to be a large and difficult step so far. Mainly it is resisted by rural and elderly groups, who hold a disproportionate power in this country. This tax is a chance for AK Council to meet the needs of all its current and future citizens.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Previous savings were unnecessary as there were large areas of budget that were not spent! And still services have been cut such as community care services.

Future uncertainty will always exist but the current settings favour increased spending and investment - lower interest rates and lower existing debt. AK has suffered for decades from terrible under investment which is why a lot of our infrastructure is so poor. Credit to council for recently changing this with investment in water and some public transport improvements, but more needs to be done. The talk is about a liveable city and the budget needs to ensure that is the case. Liveable cities don't just happen. You have to make it happen with huge improvements to public transport in particular and other infrastructure.

So cutting the budget is exactly the worst thing to do.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Don't make these cuts. See above comment re the 'liveable city' rhetoric.

Liveable cities don't have homeless people sleeping rough, people sleeping in cars, shoddy public transport, and all the other impacts of budget cuts.

Economic uncertainty always exists but with interest rats and debts level comparatively low, now is the best time in generations to INVEST! Not to cut costs.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We live in Grey Lynn where there's no need for the bin tags. We used to live in Massey where the tags were a constant hassle. And it doesn't solve the problem as people just end up dumping their rubbish instead. These people, like most tbh are not the sort who will change their lifestyle to produce less rubbish. Generally people are too busy to prioritise waste minimisation so council needs to force the issue with improved waste options.

Can I also suggest introducing an organic waste collection as seen in Tauranga.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: On its limited resources Waitemata Local Board does a great job. I would like to see its budget increase as it actually caters to the needs of a population larger than most NZ towns on a much smaller budget.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Because it makes sense to save money by being more efficient

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Fairer and consistent

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Because all matter. Socially responsibility is important.SoOuth ack needs to get their fair share too...For parks, bike lanes too, not just wealthywaitemata

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Equity across ack. More spent in areas that have been missing out

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: For a better future for my children

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Ideally I would like to keep the infrastructure spending up but understand covid has caused problems.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It is vital that we move now to address the causes and effects of climate change.

We are working individually but it is equally important to work collectively through our local body structure

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

What do you think of this proposal? Support

Tell us why: I support this measure as I am someone intentionally trying to live without a car, having a car-free life. I do this particularly via being a pedestrian and using public transport, so having these options improved is of crucial importance to me. Further, I am considering whether or not to add an ebike to my transport options, and having dedicated cycling infrastructure is central to that decision. Being car-free is part of my commitment to living a less carbon-intensive life, as well as all the other related issues that car-dependency brings. Thank you.

2. Managing on-going budget pressures

What do you think of this proposal? Support

Tell us why: Tēnā koutou,

I live in central Auckland and work as an actor and entertainment industry professional.

I believe that much more needs to be done in Tāmaki Makaurau in regards to climate action.

Not just one thing is important for me in terms of climate action. We are living in a climate emergency and I want significant, strong and decisive actions to be made now to benefit people in the future, not just myself or those in my lifetime. In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

Amongst the many issues it has been clear to me within Aotearoa and particularly within our largest city of Tāmaki Makaurau that not everyone has equitable access to public transport and there is little incentive for people to choose public transport over their own private vehicles.

Reducing transport emissions will go a long way. More frequent bus routes and cheaper public transport rates would make public transport an attractive option over private vehicles.

Support of tangata whenua-led initiatives, creating more māra kai, planting more native trees and supporting more community based initiatives are all essential actions to help connect people and grow support, empathy and ideas in a city that is wide-spread and disparate.

I strongly believe that this package needs to happen earlier than 2024. We cannot wait any longer, we must take action.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: A commitment to sustainable energy use is vital for our future.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Seems a reasonable and well thought through approach.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm a young-ish professional living in central Auckland. I mostly ride my bike to get around, and I support climate action 150%! I'd support a CATR that's 10x the size. I'd make a personal donation to top it up if I could. We're in a climate emergency, and we need to do everything we can to prevent catastrophe that could put millions of lives at risk. I particularly support CATR funding going towards the roll out of fast, best-practice (but simple) cycling infrastructure, reallocating space on roads from cars to bikes whereever possible. Remove carparking from all arterials, create bike lanes and safe pedestrian crossings; reduces speeds on city roads to 30km/hr everywhere. All of those things are climate action - and they make Tāmaki Makaura safer and better for people living here too. The 18km of csafe cycle facilities proposed to be funded by the CATR is a great start, but you should go so much further if you really want to encourage mode shift. Here's an idea: congestion pricing/road pricing to disincentivise use of private vehicles, and add the revenue from that to your climate action fund.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are in a climate change emergency, and one of the most important things that can be done is to reduce CO2 emissions is to change the way we get around. Improving tree cover is also extremely important to reduce the temperature felt during our hot summers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I do not agree with reducing services, if those services are public transportation. Budget shortfall should be made up by selling car parks, and reducing spending on car infrastructure.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I do not agree with reducing services, if those services are public transportation. Budget shortfall should be made up by selling car parks, and reducing spending on car infrastructure.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I think the PAYT system would encourage people to buy less disposable packaging.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think it's a brilliant idea, and the direction we need to move in.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think it's great, and can we please have kerbside compost bin pickup across Auckland included.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Action desperately needed to combat climate change

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Budget needs to be managed using all available means

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Prioritising is important to managing the budget

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate action desperately needs to be taken.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Hi, I live, work and study in central Auckland and believe we need greater, greener transport for our city

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Improving public transport and transitioning away from a car based city is paramount to reducing emissions. It is also key in connecting low-income communities to the CBD and allows for better transport equity.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Without adequately investing in addressing climate change, ultimately money won't matter because we will not survive.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because we are a bloody embarrassment to the world that our biggest city doesn't have a decent and low emission public transport service, Its time for Auckland to join all the other awesome cities in the world!!

Also in a time where food costs are ridiculous especially fresh food, a "mara kai" is not a "nice to have" its a "must have", think of the long term gains when some of our poorest can access healthy food instead grease laden/ sugar laden cheap stuff from the supermarket, the obesity rates will drop by a mile!!

Auckland has the ability to become one of the "coolest" little big cities in the world that actually cares for its people and the planet we just have have to have the balls to go for it!! Its high time we stop looking at Papatuanuku with dollar signs in our eyes, we need to spent the money to work with nature because if we screw it up now we cant eat money later.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Maybe a pay freeze for all top dogs on the council as well for the next 2 years to help recoup some costs, if councillors really are "working for the people" they wouldn't mind this as being an option... as a teacher I wont be getting a pay rise in the next two years as my step salary dictates and I can make it work I'm sure councillors can too!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: You haven't explained which actual services this might affect just a run down of what you cant do, may do and wont do...

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Its good that households can choose a bin size and hopefully most will opt for the smallest to save money and then think more wisely about the waste they produce and cut down on waste in general. I do think there should be an option to opt out of the food waste bins as many households can compost their own at home, they shouldn't be penalised by "having to have" and food bin to if they can do it all at home...

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support

Apply a minimum base charge to every separately used or inhabited part of a property Do not support

Tell us why:

5. Local Boards

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The initiative is beneficial for all Aucklanders. Introducing rates (only a small increase) to fund the project via wealthy homeowners is a good idea.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Not enough information yet on the influence on services and where the cost reductions will take place.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: Auckland Council has implemented too many fees and taxes on the “so called” proposals. Except for expanding on its bureaucracy and its contractor companies with so many well-paid managers, Auckland Council is not doing any better on social services, environment, public security, and transportation. Instead, it is getting worse and worse. It is ironic that under such a tough situation for Auckland business and Auckland residents, Auckland Council continues to hire people and increase the salary of senior managers of Council. I often see the staff from subsidiaries of Auckland Council chatting and playing with their mobile phones during working hours. Other examples are that a library entrance has 2-3 people checking the vacuum pass; a small road project takes more than 2 years to complete. The companies who work on these road projects are not even transparent. There is no need to build so many bus lanes and bike lanes, as they are not even being used that frequently. Did AT even review this? I would doubt. In summary, Council should review and utilize the current resources that already exists, instead of simply increasing taxes and rates!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year’s, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I agree for Council to increase by 3.5% on the general rates, but disagree on Council inventing new taxes all the time to gather revenue. I suggest that Auckland Council should immediately stop the unnecessary projects, and cut the unnecessary expenditures. What is more, Council should build a review, reward and punishment system which would enable Council to review the proejcts and be more efficient and transparent.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I disagree with this. This policy will be unfair to families who create less rubbish, as they will be ending up paying more!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Science has spoken. All these moves are necessary, especially transforming urban living spaces to less reliance on personal cars, especially as high density living increases.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support urgently addressing the climate crisis, and I support maori issues, after learning about it at Uni. Impossible to be the best version of NZ without these.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because we are killing our planet

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: because as you keep increasing our rates you are forcing older people out of their homes as we can't keep up with them on fixed incomes.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: You spend our money in the inner city and the burbs are dismally lacking. We do not need more expensive art works that nobody likes. Rates should be spent on essentials not filling the pockets of your mates.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Big households along with the throw away everything will profit. Those with small bins that only go out every few weeks will definitely not. If you are going to charge us for putting out no rubbish why are we bothering to compost, keep waste to a minimum when we can just throw everything out.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Rates for essentials only at this already difficult and expensive time

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

For the Good of Auckland keep the rates down

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm a researcher in Nature-based solutions, I live in Ponsonby and work in Britomart. I work on climate solutions for our clients and Aotearoa New Zealand needs to step up in emissions reductions to avoid the worst of climate change. This is a crisis. I support decisions that may mean we suffer now but ultimately will be better off, as will future generations.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Agreed, there are projects which are more 'nice to haves' and the priority should be on functionality and services that people actually use.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: I'd prefer a collection system that is included in rates, adding extra day-to-day costs to households who are already struggling isn't the most equitable choice. In addition, I would love to see auckland council introduce a compost/food waste option or look into swedish and scandinavian waste management systems as an option for Auckland.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: These are good, I would like to see more concrete actions on climate change, rather than just 'proving advice and planting trees'. Those are nice, but we need far more investment in climate change mitigation and adaptation. I would like to see Auckland council commit to offsetting their emissions and getting to net zero on their greehouse gas emissions, instead of just aiming to reduce them. The timeframe for action is so small, and we need to be taking more action.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Climate change adaptation and mitigation. Where is the plan? Can Auckland council please push the government to finalise a plan and start implementing strong action to address climate change?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: The world is is a repression and possibly going in to a depression, common sense, Only do the necessary, keep to your budget.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The world is is a repression and possibly going in to a depression, common sense, Only do the necessary, keep to your budget.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This creates a monopoly within the waste removal industry, it will potentially put people out of work like tag removal runners and other rubbish collecting companies. Other companies give better value for money with bin emptying, there needs to be competition in the market to protect consumers from over charging, something the council loves to do for their own benefit. Having the rubbish charge on your rates as opposed to pay as you throw does not encourage environmental protection, because if you have to pay for a service regardless you may as well make the most of it and throw away as much as you want. Adding extra charges to rates will also increase the prices for renters who are already under strain. A lot of people have compost bins so the food bucket will be rendered useless. In this difficult financial time this is most certainly not the right decision for most families. I'm not sure where you pulled those cost numbers from because you have completely ignored the cheaper collection companies prices. Council greed rearing it's ugly head as per usual.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The world is is a repression and possibly going in to a depression, common sense, Only do the necessary, keep to your budget.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think de-emphasising the importance of private vehicles is critical, and improvements to our public transit and cycling infrastructure plays a role in that. Tree canopy is known to have both psychological benefits to residents, and helps with heat dissipation. This is a no-brainer, and I am more than willing to pay the rates needed for it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I am not informed enough to give a meaningful opinion on this, but in general I trust that an appropriate decision will be made.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: I haven't read enough to decide between these two options yet, but in general, I feel PAYT makes sense to some degree as it encourages households to think more about how much they are sending to landfill. Apologies if this is already addressed in the proposals, but I think it would be good to have recycling be rates-funded, so we are encouraged to recycle as much as possible.

When I needed to use them, I was not a fan of the orange bags used for general waste. However, if households can have a bin regardless and pay for tags, I think that's a much better experience for the home.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We're in a climate emergency and we must proceed at pace before the window to do so closes.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Projects need to be prioritised through the lens of climate change and deprivation.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Do it once - do it right. Use best practice - not most politically expedient.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: People should be encouraged to reduce their rubbish generation. PAYT will do this more than burying rubbish removal costs in general rates.

This is also a dreadfully worded question!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Other
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Other
Standardise the opt-out rules for non-residential properties	Other
Apply a minimum base charge to every separately used or inhabited part of a property	Other

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Ponsonby Park at 254 Ponsonby Road - the WLB 'OLI project' should have been listed. We are advised that design work will commence on 1 July 2022, but it is disappointing that No mention was made of it in the annual plan. The community has already waited for 22 YEARS for this amenity to be developed after the need was identified in 2000. An entire generation of children is now grown up without ever having this amenity being available to them. Build Ponsonby Park now.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Re Local board decision-making over local community services - We have repeatedly asked for reliable access to a community noticeboard key. We have written, emailed, phoned and LGOIMA'd for this information as to why our Community-Led Design group has been denied this. Our LGOIMA's have gone unanswered (currently complaint to the Ombudsman has been lodged) and NO other meaningful response has been given - let alone reliable access provided. These are Community Noticeboards and we are denied easy and reliable access to them despite being a Community Group of long-standing, funded, and instigated by the WLB, with a GREAT track record of engagement, feedback, and results. Yet we are treated with complete disrespect on this matter.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Countering climate change requires transport options beyond personal cars. This rate will make those transport goals more achievable.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Seems reasonable

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: A greener and more sustainable Auckland is where I want to live.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: People will recycle more

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: To create a healthier, safer and more enjoyable Auckland for ourselves and generations to come.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live in Auckland Central. I support the targeted rate because we urgently need to change the infrastructure of the city in order to enable more people to mode-shift.

The majority of people will embrace changes in their transport options if they can be assured that public transport will be reliable- that when they turn up to catch a bus it will show up, or their train to work isn't cancelled mysteriously. The institutions that have the power to make this happen are AT and Auckland Council, to demonstrate their commitment to significant changes, and supporting Aucklanders to do it.

The targeted rate sounds like it would enable our transport system to keep improving by guaranteeing money for a whole-system approach to mode shift, as well as support the bigger infrastructure developments like CRL and Light Rail by building a strong mandate in the population for more options.

A small, loud segment of Aucklanders who are dedicated to single occupancy vehicles shouldn't dictate the future of Auckland. Leadership of our institutions must be 100% committed to reshaping our transport system, because in fact most people are struggling with the way the city is structured in favour of cars.

The targeted rate will enable people to make the most of the city, by being able to see more of it by train, bike etc. and will acknowledge how much Aucklanders care about the sustainability of our city.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: I specifically do not support the sales of non-strategic assets. I am not clear on what these are, but believe in general that the sale of assets is myopic as it will reduce the councils ability to provide spaces or will cost us in the long term when we need to reacquire land.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Need:

free public transport

Expand cycleway network

Subsidized insulation of houses

Subsidized replacement of fireplaces and inefficient wood or coal burners with heat pumps

Provide facilities, marketing, coordination and catering for volunteers at repair cafes and second hand shops

Other initiatives

The latest news on climate change is alarming. Right at this moment, the Antartic is 40degrees hotter than normal and the Arctic is 30 degrees hotter.

We cannot wait another year for action. Our house is on fire and we are arguing about the arrangement of the furniture.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Increase rates. Land owners have all the wealth in Auckland. We need to fund social equity and environmental projects- let's do it in a way which reduces wealth inequality.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Prioritize according to Doughnut Economics principles. Meet the needs of the most vulnerable in society, whilst ensuring out environmental footprint decreases.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Ensure composting is available everywhere.

Fund repair cafes- facilitation, venues, catering for volunteers, marketing

Support op shops and second hand shops

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Council needs to make all decisions in line with Doughnut Economics principles as per image. (Google- only takes 5 min to understand concept but is best represented visually)

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Fully support this idea - it is so obvious in all aspects of life that we need to change in order to combat both climate change and our over-reliance on cars. The best way to do this is evidently to improve public transport services. A rate of $1.12 a week is not going to be the end-all for any families, especially those in wealthier areas. As a result, should this rate be adjusted per suburb/area, this idea would be a no-brainer.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: Although I am not fully qualified in the matter, I see no reason why we shouldn't be able to continue to adapt in order to manage the consequences of COVID and other pressures.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Yes, I support this idea. Aucklanders deserve a world-class waste management system, regardless of where they live, and standardising this waste management system would be a step in the right direction.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Climate-awareness is a majorly important aspect of our future, and I hope that this will be reflected in this year's annual budget. A delay of any climate change or public transport policy would only be making the situation worse for us, our kids, and the many generations to come.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: As a young person climate change is the most important issue for me when voting in local government. I want to live in Auckland long term, but only if it becomes a more sustainable city - especially in terms of transport. I would love to bike more in the city but the lack of cycle lanes makes me too scared to be on the road with cars. Last summer was so hot so I'd love more tree canopies!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Think about whether the people that services are being cut from can afford to replace them. For example, public transport in low income areas shouldn't be reduced as many people won't be able to run cars easily.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: If it's the most climate efficient then I support it even if it costs me slightly more in rates

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

What do you think of this proposal? Support

Tell us why: I've lived my entire adult life in Auckland Central and I intend the live the rest of my life here. I'm a pedestrian and I want the city to flourish with pedestrians so that as I age I can remain one of them.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is a massive issue for my generation. I would like to use my car a whole lot less, but as it currently stands the public transport infrastructure is not up to standard and doesn't make this possible. Public transport is also much too expensive in Auckland, compared to other main cities in the developed world. As a resident of the CBD, more development is needed to make walking/cycling a safe and easy option.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

More needs to be done on crime and homelessness. There's been a pretty big increase in the amount of vandalism, gang presence, and drug-related violence seen in the city in the last year or two and it needs a lot of help to fix.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Small payments now contributed by everyone can make a huge difference in giving tāmaki makaurau the funding it's needs to step up its climate action game.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I do not like councils selling off assets as they often have uses for the local communities - it is so much more costly to gain new assets than to hold onto existing ones.

Reductions in services often hit those most vulnerable in our communities by hits to public amenities such as libraries and other community spaces.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I am currently in a rates area (not tag) and would very happily reduce my rubbish bin size as my household generally produces 40L a fortnight of general rubbish. Paying less for our houses low rubbish production would be good - this could also be managed on a per collection basis but I'd suppose there would be challenges with logistically managing who puts out there bins and with managing dumping.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know

What do you think of this proposal? Support

Tell us why: Auckland City needs major long-term investment in a carbon-free future. It is vital for the survival of the city and its future residents. This means extensive cycleways, high frequency and coverage public transport, and improved green spaces across the city. Low carbon transport must be faster and easier than using a car, and it must be accessible for all residents. It will ease congestion, improve our shopping spaces, and allow our city to play its country-leading role in fighting the rapidly approaching climate crisis. Investment in this infrastructure must happen immediately - we can't wait any longer.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

What do you think of this proposal? Support

Tell us why: My wellbeing will be greatly improved by being able to access more places as a non driver with less risk to my life. It will indirectly lead to better wellbeing for young people if they can safely commute to school, activities independently under a canopy of trees and while keeping active. It will therefore benefit the future tremendously.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: It is more important to target climate change. A lot of NZers are locked out of the housing market right now anyway and with growing inequality it makes sense to do some of what is suggested but also add toll roads in affluent neighbourhoods and increase rates for those who own more than one property to cover the costs- proportional to increasing rates for those with only one property.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Leads to more equitable society if ratepayers are covering this cost rather than poor families that are renting. We don't want to disadvantage children further when they already live in poverty. But we absolutely should be requiring food scrap service to decrease needless waste.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Transport infrastructure, homelessness support and waste are key issues- in particular, composting for apartment dwellers and 24/7 bicycle parking for those who do not have space in apartments. Also access to community gardens.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's time to take serious action on climate change. We need more action than what is proposed with the CATR but it is a good start.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: It is not just an improvement for the climate (and long-term human survival as a species) but also on our population's health! The more people walk and cycle, the less medical interventions they need, on average; see data from Denmark and Netherlands. It is also very important to engage with tangata whenua to develop programmes to spend this money because it's their land we live on. The city is as happy as its least happy individual so we cannot leave anyone behind!

2. Managing on-going budget pressures

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please fund and start the 2-stage development of Ponsonby Park in FY 2022-23.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: More needs to be done in Tāmaki Makaurau Auckland on climate action. I want climate action now for the future of mine and future generations.

Paying a little now means we'll hopefully pay less in the future. Not everyone has equitable access to public transport and this should be a priority spend.

In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

Reducing transport emissions will go a long way to contributing to a greener, clean, leading sustainable city.

More frequent bus routes will make it easier for me to get around all of the city. I want to be more active and leave the car at home.

Council should have dedicated funding for tangata whenua-led initiatives, Auckland Central lies on Ngāti whatua land and it is the bare minimum to consult and honour mana whenua.

We cannot delay this package so it should not be pushed off to 2024.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Do not cut services. This often comes in the form of reducing community services. These are crucial.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know

Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are in a tragic & avoidable climate emergency - the best time to act was 20 years ago, the second best time to act is now! I try to use my car as little as possible, but often there is a lack of affordable alternatives. I think this is a good step towards a solution - if anything, this proposal doesn't go far enough. I would love to see Tāmaki Makaurau Auckland transformed into a greener place where cars aren't heavily subsidized and instead, walking, biking, and public transport is accessible to all, particularly underserved communities.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

What do you think of this proposal? Support

Tell us why: More needs to be done in Tāmaki Makaurau Auckland on climate action

I want climate action now for the future of my children

We are living in a climate emergency

Paying a little now means we'll hopefully pay less in the future

Not everyone has equitable access to public transport

This is a good first step to tackle climate change

In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The Auckland housing market does not work for ordinary people. It works great for property investors and landlords but not for those who do not already own land. The fact that there are more empty homes than there are homeless people in Tāmaki is morally outrageous. These empty homes that are being used for capital gains limit the supply of houses and thus push up the price of rentals and properties to buy, making living unaffordable for many. Housing is as human right and here in Tāmaki it should be treated as such. The Auckland Council has the means to address this. One measure that the Council could take would be to significantly increase rates on empty properties that are being used for capital gains to make it unprofitable to do so, increasing the supply of housing. This would also provide additional revenue to address the forecasted budget shortfall.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's not that much of an increase and it's for a good cause.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I doubt that efficiency savings and reduction in services would actually net that much money.

If it were that easy it would have been done already.Climate change initiatives requires investment and cutting services and spending is the opposite of that and just kicks issues further down the track.

Rates should increase with inflation as well. Perhaps 3.5 percent is not enough.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Moscow prioritization works well enough.

It is encouraging that climate and transport initiatives are in the "Should do" section.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Heard Park is tiny and is fine already.

I would prefer efforts be spent elsewhere

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

There are two things that are important to me: Addressing climate change.

Increasing the walkability of the CBD.Reducing the amount of cars in the CBD is a must and in particular Customs street/Beach road.

If you could make the streets there narrower and only allow buses or delivery vehicles I think it would lead to a really nice continuous bit of walkable area from the waterfront to the hill going up to the university.The housing in this area is quite dense too so would benefit a great many people.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We have to do this and we need the funds to make it happen - more cycling and local food. Seriously - as well as asking us for money...the Council could do a lot more themselves -reduce the regulations eg growing food on verges, and stop being so siloed and bureaucratic by being 'human' plus give Auckland Transport a serious serve to stop spending so much on cars and roads - invest in cycling and walking. Repair and maintain our walking tracks - they are crap! What about watering recently planted trees during a drought?

thanks

Jerome

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Do not be selling land and buildings that we need as asset base or for urban improvement works

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I'll take a very small bin please and be happy to pay less

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: More transport options are one of my main considerations as to whether I continue to live in the city. I also manage a small business in the city centre (Academy Cinemas), and improving transport choice would go a huge way to attract more customers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are in a climate emergency and need to take swift action, I strongly support this targeted rate

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support using the Better Off support package, but have some concerns around implementing cost reductions if these result in potential reduction in services and deferring capital investment which is necessary for the city to thrive

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: In general this seems sound

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I believe this is a more equitable system however think this needs to be coupled with other initiatives to reduce waste overall

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units Support

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm currently working towards a PhD in marine biology. As a child, I was always astonished by the amazing marine life that could be found right in Auckland's blue backyard, from tiny barnacles and sea snails to sharks, stingrays, dolphins and whales. Marine and freshwater species and ecosystems, such as kelp forests, corals, deepwater fish, and even our iconic whitebait, are among the most vulnerable to climate change. That's to say nothing of the massive impacts that climate change, and its associated changes in weather patterns, will have on human society - as exemplified by the superstorm that's just hit the North Island over the last few days. I believe that using the proposed climate action targeted rate to fund proven emission-reducing strategies, such as urban reforestation and more carbon-efficient public transport, is an important step towards protecting Auckland's people and wildlife from the worst impacts of climate change.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We have no choice but to adapt.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: A much higher cost benefit ratio would be achieved by implementing road infrastructure projects faster (multiple shifts) that cause significant traffic delays and emissions. In addition, reinforcing of exposed coastlines with seawalls and other mitigating strategies for a rise in sea-levels. Lastly, the AKL Council continues to allow or not enforce a very large number of existing mature trees to be cut down by Treescape and other vegetation companies across Rodney and AKL CBD. This goes beyond the clearance of power lines or other areas, and when raised with AKL Council with photographs, the reasons were not substantive. Preservation of existing mature trees have been shown to limit the effects of emissions, temperatures, calming effects on residents, etc.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: During Mayor Goff's terms in office, cost efficiencies were meant to have been implemented already. However the amount of regulation has gone up, the staff to ensure compliance has not significantly increased, and the costs keeping going up. The cost savings can be found in stopping cycle lanes and AKL CBD pedestrian areas, and rather doing everything possible to support businesses getting back onto solid financial footing.

With the high inflation and AKL Council revaluing properties higher and higher, affordability for businesses leasing property and residents affording the AKL council rates is a serious issue.

The spending cuts need to happen starting at the top of the organisational structure, and stop trying to centralise all services. Push responsibility and budgets out to the areas that are enforcing bylaws. Cut the costs and wait times for core services of a council, such as resource and building planning / consents.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: As a resident of the AKL CBD and Rodney that engages with the Council, I personally either experience or witness a significant amount of inefficiency of processes and poor delegations of authority. A saving of $30m out of $800m (excluding interest & depreciation) without cutting core services is doable if there is a will.

Importantly, all residents and businesses in AKL supercity should be treated equally, and the budget spend should only commit to the minimum for central government compliance regarding Maori spending, and everything else that is being spent on preferential Maori should be assessed for required or not-required. Whilst acknowledging the history of AKL, the reality is that prioritising spending for the benefit of one group over others when core services are not being delivered and council cost of debt is growing is unfair.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: The key priority of the Local Board should be core service delivery that the Council is responsible for, such as safety for residents, enforcing the bylaws on illegal parking on berms and noise, supporting businesses. Residents are scared to go out at night due to the safety issues, and this is increasingly proving true for the daytime. Businesses that are not forced to close due to the loss of customers that is partly attributable to the inhospitable environment that the Council has created (i.e. forcing cars out of the CBD, safety issues and ongoing construction) are now choosing to relocate outside the CBD. The CBD is turning into a very unpleasant place to live and work.

Focus on core service delivery.

6. What is important to you?

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are living in a critical window of time that could hugely influence the future. Let's do all we can to support Auckland being liveable for our children, their children, and their children after them. I frequently walk and cycle around our city. I am excited to see $228 million towards building more cycleways and walkways. This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding. I feel that I am currently doing all that I can for the climate, but my efforts will go to waste if the city is not also doing all that it can.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: The intention is good but the ability of already financially challenged citizens to absorb this cost along with all the other costs, (including no doubt a general rates increase), is currently not sustainable. There are far too many "working poor" who cannot even reliably put food on the table right now, and many of these people will find that extra $58 a year too much of an additional burden. Even if they are renting, their landlords are highly likely to pass on the cost.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: The overview sounds reasonable but feedback should be sought from citizens on all proposed cuts to specific services before implementing them, as it is the citizens who are ultimately paying the bills for them, whether through rates, rents or taxes.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Totally agree with the rates-funded system as it is fairer to low-income households, plus must be easier to manage for the council thereby creating less administration cost, plus less landfill than that which would inevitably occur from extra bags and tags etc. Plus households change size over time and as they get bigger or smaller their waste size and type will change too. Auckland has been a "super-city" for long enough now that it is past time our waste collections were standardised across the various suburbs, plus getting rid of plastic bags has got to be a win.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

1 - Would like to see some real options for recycling/inorganic waste collection in the CBD. There are thousands of permanent residents in this area, and it is incredibly difficult to dispose of larger items such as furniture or appliances, some of which may still be usable by others. Also as more apartments are built with little or no parking, there is no way for the carless residents to physically take their own items to a recycling or waste management area. We are being encouraged more and more to do without personal vehicles, and while most people can manage every day tasks and travel on foot or by public transport or ride-share services, disposing of unwanted items is not actually possible. Nor is there any space in an apartment to "save them up" for an annual cleanout and hire a professional to do it.

2 - Also on a similar subject, carless citizens who ordinarily manage quite well without a vehicle, will still on occasion need to be picked up or dropped off at their door. For example, going on holiday with heavy luggage, being disabled (either permanently or temporarily such as a broken leg), or just doing a large weekly shop that can't be carried home on the bus. More thought needs to be given to every apartment block having at least a 5 minute pickup/drop-off park right outside the front door while these places are being built. Futureproofing the city for minimal private car ownership requires consideration for the occasions when door-to-door transport is necessary. We shouldn't have

to make the choice of seeing an 80 year old on a walking frame hobbling down the road to the nearest legal (and unsheltered) temporary parking space, or asking a taxi/uber to risk fines by making an illegal pickup. (And yes, this is a real-life example of the building I live in).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: This targeted rate is unnecessary. It is just a way of raising rates by stealth.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Rather than reducing services, which we pay for, and selling assets, which we have paid for, just stop wasting money on things we don't need e.g. "promoting" anything. Staff should be cut before services: the council is overstaffed and its staff are overpaid.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: It is impossible to support anything which is just meaningless waffle. Council should stick to core services like rubbish, libraries etc.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our rates should cover rubbish collection. That is one of the most basic functions of a council.

This propsoal is very unclear but it seems to be just a long-winded way of introducing yet another charge on top of of our rates.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: Funding for local parks and community facilities is essential and what ratepayers have a right to demand. There should also be significan funding for heritage protection and support for groups working for heritage protection. The council should not be involved in the other items on the list and they should not receive any funding.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Property rates are an inequitable way of funding local government. Council should petition goverment to replace them with an income based levy on all inhabitants of a council area.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words. Reducing transport emissions will go a long way

and is a clear directive, and alongside this initiative, another clear strategy to Council obligations under Te Tiriti o Waitangi is strengthening the partnership with mana tangata through dedicated funding for tangata whenua-led initiatives.

We cannot delay this package so it should not be pushed off to 2024. Front-load the fund so more gains can happen before 2030, so that Auckland will be better equipped in dealing with a growing population and all that entails. Initiatives such as creating more māra kai and with the ongoing commitment to planting even more native trees the city will be seen as playing its vital part in addressing the effects of climate change, whilst building community and making Tamaki Makaurau a healthy and sustainable place for all to live and thrive in.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I support on the whole, but am against the sale of assets. This area needs very open and transparent communication.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because climate change is the most pressing issue facing us and we need to make changes now.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Again we need to tweak the budget to allow for this infrastructure to be accommodated.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It's easier.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They are all legitimate and I have a particular interest in restoring Leys Institute for its historical and architectural significance, plus its use as a community asset and library.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. 1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Action on improving public transport accessibility and quality will be a double win, both contributing to coping with the climate emergency, and making Auckland a more livable city.

Council should also consider road use charging and a low-pollution zone, with differential charging based on footprint and emissions of vehicles. Monster trucks and 4x4s carrying one person have no place on our roads (literally) and are profligate in emissions. Use the income for free public transport, which should enable council to take back control from NZ Bus

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Auckland has suffered for years from short termism.

I would have been opposed to sale of assets, but given the present governance imposed on the City by neo-liberal fanatics, Council is essentially powerless to control the actions of Council-owned organisations, so they might as well be private owned and subject to market discipline, rather than continuing as private baronies responsible to no one.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: In general, you can't do much else, but I would hope there is critical evaluation of VFM even in the essential category. For example, bikes are great: but at the moment there is no real evidence that the current programme of bike lanes is contributing much to climate change mitigation or transport decongestion. I'm too old to bike now, but to my eye, many of them look very unattractive as a biking proposition. I would suggest a temporary slow-down on the bike lane works, to see if the present ones actually develop more usage, and to consider why they have not yet had much success.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: It's not a very exciting list, and I don't think the order is right. At the moment, the most obviously pressing problem is homelessness. Of course, as a moral imperative, the homeless need assistance and support; but also, if it's not too bourgeois to mention, begging on the street is a detriment to the value of public spaces, and would not happen in a New Zealand that had anything like the commitment to social justice that characterised the country in the 20th century. BTW, what can a local board actually do? The whole council set up seems designed to limit democratic control (which, when the neo-liberals were designing all this, was called "political interference").

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's the barest minimum that could be done.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Greater efficiency is always welcome. Auckland is in infrastructure deficit. It will never be a good time to lift rates and borrowing but putting off the inevitable will only make the problem worse.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Should be a daily Council discipline that doesn't need to be consulted on

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Hopefully produces efficiency.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I have not owned a car for 30 years. As an older person I use public transport all the time as well as walking. Presently I live 800 metres from a busstop which is manageable. It makes a huge difference to walk under the shade of trees in a street. I love a natural canopy and the birds they attract. The toxic emissions from the nearby western motorway adds grime to our walls and lungs. It would be wonderful if the noisy motorway were closed to cars and instead heavy or light rail were to run from the central city stations all the way to join the main trunkline.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Not sure what all those levers do ... they go up and down? I would rather pay more rates and keep services such as parks and libraries Too much money is spent on plastic cones. More important to have cleared drains and no pollution entering our harbours.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Accept some 'depreiation' but don't t turn council communities into themeparks. For example bring the books out of the basement instead of adding computer games and cafes to libraries

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Want a small bin for our house as a sign that we compost and recycle. The council show hypocrisy about the percentage of blue lid bin materials apresently going to the tip instead of genuine recyling. More public education needed as well.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: A lot of thought has gone into preparing this document. But good intentions are one thing .. and genuine commitment to action another.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because each of the improvements the fund seeks to achieve are fundamentally good for creating a thriving, liveable, urban space. one reason Auckland sucks so hard is that the last half century of policy and infrastructure decisions were made for cars and commuters. A city of 1+ mil can't be a bedroom community so let's stop acting like one!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It is high time that Auckland City gives substance to the need for climate action in this emergency. A full grid of safe commuter cycle paths needs to be implemented immediately. They don't all need to be high tech current road surfaces are fine for cycling, but space needs to be allocated and barriers need to prevent cars from intruding on it. Crossroads and shopping streets need to be included in the provision of this infra structure. Public transport and space for pedestrian people separate from cycling and scooter ING people is also urgently needed. It will take money, but courage to make change is even more important.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to reduce emissions, especially diesel. At a local and global level.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Broadly in support, however it is unclear to me what might be classed as non-strategic.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Information provided did not concisely and adequately explain what service and when they might be cut.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We are paying enough in rates!! The council if they want to set this up need to find this tax in the current rates we pay

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Should be looking at relocation of he port, use the money from the sale of port land to fund some of the important projects on the drawing board

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Stop prioritising climate action. This should be something if we have to have it, comes from the government.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We should be charged for what we dispose off, a one size for all system does not seem fair

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I have a problem with some of the priorities listed Māori outcomes and homelessness

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Please get back down to running this city, you have to many priorities that do not concern the Auckland city council

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I live in Eden Terrace and cycle to work each day in Morningside. In 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture. Paying a little now means we'll pay less in the future. I doesn't own a car and cycle everywhere - which I love - but there havee been far to many times I have almost been almost hit due to dangerous roads that prioritise cars at the expense of everyone else. Improving cycling access accross the city is fundamental to improving the quality of life for so many people. I also belive climate justice must be an integral part of the councils response. There should be dedicated funding for tangata whenua-led initiatives. More funding needs to go to the parts of the city that have low canopy cover and fewer green spaces. We should also create more māra kai and plant even more native trees, and provide initiatives to build community. We cannot delay this package so it should not be pushed off to 2024. Thank you

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change affects everyone.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Libraries and public swimming pools are important for everyone.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: This is too wishy washy - a survey is supposed to be easy to follow and this one is horrendous. How is the average Aucklander supposed to understand this?

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: If you ask people to pay for their rubbish, it will be dumped all over the city. Rental tenants are not going to pay to have rubbish removed weekly, causing unsightly piles of rubbish on properties and encouraging rats.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I think each initiative is highly important for the Waitematā district.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The council needs to reduce its expenditure rather than increase rates.

Council should offer annually reduced rates to those living in an area for a long period of time as this encourages commitment to the area rather than quick sells to move on. Reduction of rates for each consecutive year living at the same property.

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Any civil society has a responsibility to look after its most vulnerable, which includes children, minority groups , homeless.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I was extremely disappointed to hingear the Mayor announce that they Council had a drop in revenue due to Covid restrictions, but then rather than reduce Council spending, and live within the means available, rates were announced to be going up by that amount. ie: If Council experiences a 10% deficit in income,, then Council should look to reduce its own expenditure by more than 10%. Council should not look towards ratepayers as a cash-cow.

I also feel strongly that Council should offer annually reduced rates for the longer a person owns a property, because this shows commitment to an area over the long-term, which not only benefits the immediate community, but it incentivises the reduction in speculation which in turn pushes up property prices. A possible proposition could be: 1-3 years no reduction, 3-5 years 2% reduction, 6 -10 years 5% reduction, etc.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I think it would be wonderful to see a stronger climate change focussed action plan, especially in Auckland, a thriving hub of forward thinking and a grand city we want to see continue for generations to come. Climate change may well be the biggest issue facing everyone on this planet and it's CRUCIAL that decisions like these are made with it's seriousness and levity in mind, for a thousand cities across the globe could be debating similar things as we speak; let's put Auckland in the right pile!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: It's a tricky one but raising rates would be. Given the widespread inequality within Auckland's bounds, surely make the rates higher still for the rich? just saying..

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I'm pretty tired I thought this would be a bit quicker

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: easier.. as for 4b, as long as landlords pay it and not tenants?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: If everyone feels looked after by their local bodies and has beautiful spaces around them in their everyday lives it makes for a happier, safer, more productive and ultimate more prosperous society! In the end it's what you're seeing and doing daily that dictates the quality of your life and a high quality of life for each individual leads to overwhelming benefits for the collective! The general improvement of spaces and amenities is too oft overlooked in this sense! I say, get more people swimming! Create some more wonderful and free spaces for it. It's a PERFECT way to get that natural goodness into the city dwellers' hearts. The happy cities over in Scandinavia do it WELL!

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

This climate change stuff is really a big priority in the long run in spite of current pressures!

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Support however selling of strategic assets is a short term gain not an advantage in the long term invariably leading to higher costs to the community , consider a Singapore approach of partnership between commercial entities and the council/government.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Support however the long term impact needs to be given as much thought as the short term gain.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Support provided advantage is given to recycling

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Long Term gain for the community

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Please do more to make the cbd greener, cleaner and more livable

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I like using central government funding, but not timing changes around capital spending, do not want service levels to drop, I'd rather pay more tax.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Please don't reduce spending and services, we need more services not less.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I like the idea of households who rheow more paying more, but support because i see the benefits in standardisation

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Support what you have here but really want to see more and faster progress around getting ICE vehicles out of the CBD to improve air quality and congestion as a climate deliverable.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: A targeted rate will allow the funding to be used specifically for tackling climate change rather than be subsumed into more general projects - in fact tackling climate change needs to be a focus in ALL projects, but this rate will ensure that at least some of the councils budget is earmarked for this purpose. We have only a couple of years to fundamentally change how we do a lot of things, so this is urgent!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Support some of the levers and not others - it all comes down to the detail. What does reduction in services mean for example? It is critical that services used by the people with less choice are retained -eg public transport, libraries, parks and reserves.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Apparently subtle levers like PAYT have a major impact on peoples behaviour. If the long term goal is, as it should be, to have less rubbish going to the tip then a daily or weekly reminder that rubbish costs is important. A benefit that is hard to include in a $$ based cost / benefit analysis as it is difficult to quantify. So even if it seems that rates funded costs the ratepayer less overall, in the end it may not. I have personally seen members of my family adjust their behaviour when the move was made to PAYT, all of a sudden sorting for recycling and using the compost bin wasn't so hard after all!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Because we have households that are both large and small it is necessary that large households aren't penalised when they already struggle for day to day costs. I do like the Whangarei rubbish collection system which leaves no household able to abuse recycling and the trucks are already segregated into their specialist areas so you feel reassured that recycling is genuinely being done and efficiently and providing a good amount of jobs.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: I'd be OK with targeted rates like this if the council didn't keep investing our general rates in activities that undermine what the targeted rates are trying to achieve.

For example, if the council/AT are still providing massive amounts of subsidised car parking across the region, funded out of general rates, which induces more car driving and higher levels of greenhouse gas emissions, there doesn't seem to be any logic that could justify a targeted rate to try an mitigate the effects of excessive car driving.

So, to be able to support a targeted rate of this type it would need to be part of a package of financing and investment changes that aligned spending across the council activities to achieve the action required to address the climate crisis.

For example, it would make sense to operate publicly owned/operated parking at a profit and then invest the profit in 'Climate Action', accounting for the capital cost of land for off-street car parking of course, and divesting any under-performing facilities, with any proceeds from divestment going into 'Climate Action' also.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: My support would depend on what services were being reduced, and what is defined as a 'non-strategic asset' that might be up for sale.

Services should be reduced in areas that promote private car travel above alternative travel modes of travel, to help with 'climate action'.

Also, if assets that promote high levels of car travel and car dependency are considered to be strategic and therefore are not up for sale, this is unsupportable.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: 'I support not doing things that:

- Don't align to key priorities.

- don't deliver value.

- Can be provided just as well by others.

So I support this provided it is done on the basis of good information about how activities do or do not align to key priorities (e.g. climate action), what value they provide, and clear acknowledgment that some activities can be provided by the private sector (e.g. car parking).

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I don't have enough information about the benefits and costs of each system.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: My wife and I live in Grey Lynn and our daughter goes to the local kura on Richmond Road. I have been a frequent user of public transport - busses and trains and the ferries occasionally since about 2006. A start has been made but we need to do so much more on climate action in Tāmaki Makaurau especially to ensure a decent future for our children, mine included. While my daughter can walk very safely to her kura currently it is a different proposition when she moves in a few years time to the local intermediate and even worse when she has to start going to high school - walking is probably less of an option but cycling is currently fraught with dangers, especially pinch points on places like Meola Drive. I want to know all children, and especially mine, are safe when they cycle or walk not only to school but to visit mates, go the library or to the shops.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Achieving this requires the allocation of funding to make not just increased active modes of transport available but making provision for better public transport and greener forms of public transport too. And that is just a start - in 2019, Auckland Council declared a climate emergency. The Auckland Climate Action Targeted Rate must be passed to show that this declaration is more than just an empty gesture/words.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I don't believe in a user pays model for the provision of public services. I believe it makes such services more expensive in the long run as the provision of these services is largely contracted out to private firms driven by a profit motive rather than a public service credo.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: We need to be pragmatic.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: I want to minimise the packaging people buy and the waste they create, to encourage them to recycle as much as possible, and to make fly tipping less attractive.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Māori outcomes should not be a separate consideration or expense. It's racist.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The TMA plan is contrary to public interest and the interests of nature. I want to retain the exotic trees, with the amenity and nature sustainability that they provide, but plant more natives too. I have been a regular nature conservation volunteer for 30 years, so I know what I am talking about. The TMA and Auckland Council's support have proved why co-governance is wrong and should be abandoned.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I don't have a car and much prefer walking and public transport, and I think investing in public transport, walking and cycling networks should be a big priority for the city. I would be happy to pay this rate knowing I'm contributing to a more connected and liveable city that doesn't rely as much on fossil fuels and cars.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your local board: Waitematā

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: No planet no life.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

What do you think of this proposal? Support

Tell us why: I live in Auckland Central and public transport is my main form of travel around our beautiful city. I want to see increased investment in this infrastructure, not only for the climate but because if we want to be a world class city we need world class transport options. This includes actively investing in transport to wider parts of the city like the North Shore - it's ridiculous that we are in the 2020's and there is still no rail to the shore!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: It is not much to pay of we all chip in to go towards improving all the climate change options /transport etc in Tāmaki Makaurau !

Mostly because it is urgent for the climate and FUTURE OF THE planet and generations to come and for us as a nation to our utmost to save it. There is no time left to go slowly. I have lived around the world in countries where public transport and bikes etc operates so much better and less focus is on the car. Tāmaki Makaurau seems to have modelled itself badly and sadly on a city like LA which is all wrong for progressive environmentally friendly urban spaces and suburbs.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Using a range of levers means it is doable and fair

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Promotes social environmental well being for communities and plans to get more public feedback as well.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I agree with it being fair and well thought out waste service. Definitely taking all areas of waste into account. eg food scraps for so many who are in inner urban areas and do not always have access to compost options. Environmentally and thorough service/systems in place.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I trust the Greens are working hard for smart community and environmentally friendly and fair options for all

6. important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The key actions CATR will fund are is a relatively smaller cost now, compared to the larger cost later for the consequences of climate inaction.

I support this being used for:

Bus improvements (both frequency improvements and new low-emission busess fleet),

Ferry decarbonisation,

Cycling and walking infrastructure and

Urban ngahere (urban forests).

This is because Transport comprises 40% of Tāmaki Makaurau emission profile which means encouraging a shift to accessible and low-emission transport is an effective way to slash emissions.

I also support CATR trying to address inequity by targeting actions towards under-served communities.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: We are living in a climate crisis. It is imperative right now that governments, from local to national to global, do everything possible to secure our future and safety. It would be much, much better to be over-zealous in our response to climate change than under-zealous. Overzealousness will simply lead to a surplus positive environmental gain. Underzealousness will mean the death and suffering of millions.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Action against climate change should take priority over other spending projects, as above.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: As above. Climate change action needs to be urgently put in place.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Stndardisation and expectation managed "across the board".

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units) Support

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I don't necessarily support "co-governance" if not representative of everyone's participation in election of board members,

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

At a later time thanks

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: As stated under the consultation topics, 43.4% of total emissions come from transport. While public transport currently contributes a portion of the total emissions, the rest, and sadly, increasing portion of total emissions comes from personal vehicle use. Auckland cannot aim to reduce these emissions without actively pursuing alternatives to get people out of their vehicles and using other forms of transport. The goals outlined under the Climate Action Targeted Rate are a good start, however, I would go further to include:

* a harbour crossing for non-vehicles, bicycles and pedestrians

* a targeted rate for vehicle use in the Auckland Isthmus, not just the CBD

* increasing access to EV stations

* increasing availability of public transport services for outside of business/trading hours so that people are less inclined to rely on a personal vehicle

* reduced/free fares for public transport, therefore providing further incentive for the public to use this resource

* incentivising schools towards public transport/walking for their students and severely limiting drop-offs and pickups in personal vehicles

* increasing the number of T3 lanes in order to curb single person vehicle use

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: In addition to these measures, a couple of other measures can be considered, and should be considered:* a targeted rate for vehicle use in the Auckland Isthmus, not just the CBD. This would generate revenue which could be used to pay for much-needed public transport infrastructure* repurposing office buildings in the CBD to create better-designed urban living spaces through legislation. As office workers are increasingly working from home in the suburbs, creating more opportunities for urban residents would have the flow-on effect on hospitality and events in the CBD, so that these industries become less reliant on office workers or tourism. This model can also be repeated in town centres and areas that were formerly industrial

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: In addition to the measures proposed, there should also be an active plan to eliminate the kinds of plastics and materials that cannot be recycled in New Zealand. A number of plastics, that aren't classified as 1 or 2, are still readily available and end up in landfill. This is also the case with building materials that cannot be repurposed or is comprised of materials that are hazardous. Additional measures that should be taken include: * a targeted rate for builds and renovations as these generate huge amounts of waste, all of which goes to landfill * increasing facilities for recycling, from small to large items, within Auckland

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I do NOT support your priorities to help our climate and reduce climate change. NO more unused cycle lanes destroying shopping villages and the ability of people being able to shop locally. The planting of urban ngahere and rongoā has been by sacrificing mature trees and general ‘tree racism’, instead ALL trees need to be protected not just some. The repair of footpaths should come from AT’s budget.

Basically, I don’t trust Auckland Council to make the right decisions. The worst one so far is to finance the TMA into killing half the bird habitat by cutting down ‘exotic’ trees from the volcanic cones by lying and sidelining public input, and the Appeal Court confirmed it was unlawful

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year’s, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Stop unnecessary and vanity projects.

Stop pretending there is no rates increase by sidelining to targeted rates.

STOP SELLING ASSETS, particularly Reserves.

Replace the Panuku Board with elected officers

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: You could save a considerable amount of spending by OPENING THE BOOKS transparency on spending and tendering, rather than 'preferred contractors' has proven to save at least 1/3 of spending.

Council is too risk averse and quick to use 'safety' as an excuse to spend and commit a multitude of sins. Look at the waste of money to unnecessarily kill Western Springs forest $2M whilst destroying 15,000 natives in the process and spitefully chipping the 200 pines causing an environmental disaster, when only 12 trees needed felling. And then to spend an additional $58,000 on an unnecessary 'loop track'

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Same funding from rates to all users for rubbish removal as exists in central Auckland with no charge

1. General rubbish to the inferno but not in the middle of native bush in Dome Valley. 2. Recycle 3. Organic to local compost schemes

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why: Addressing Climate change and protect our natural environment, including:

planting trees WITHOUT CUTTING DOWN ANY MATURE TREES to ensure we have an urban ngahere (forest) BRING BACK TREE PROTECTION FOR ALL MATURE TREES (NO tree racism)

walking, NOT cycling and NOT placemaking projects WHILE FUNDS ARE LOW

continuing work to restore our streams MAKING SURE TO CONSULT BEFORE IMPLIMENTING

Addressing Climate change and protect our natural environment, including:

planting trees WITHOUT CUTTING DOWN ANY MATURE TREES to ensure we have an urban ngahere (forest) BRING BACK TREE PROTECTION FOR ALL MATURE TREES (NO tree racism)

Continue to support response to homelessness, including:

support community groups and initiatives in this space.

Community Facilities, including: detailed design for the Leys Institute restoration DELAY activating Myers Park and Albert Park cottages UNTIL FUNDS PERMIT

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

LOCAL BOARD need to open up workshops to the public and video each meeting (not just on Teams) especially deputations and public forums, better engagement with public. New rule needed so that there are no political party affiliations of candidates to LB or Council.

TMA need to open up workshops to the public and be generally more transparent. Follow the Appeal Court directives for ALL Maunga - consult on real intentions, all Resource Consents to be withdrawn and resubmitted after genuine consultation as Notified Resource Consents. Plant native trees to restore the maunga to better than they were before humans arrived in Aotearoa by keeping all trees while the native trees grow. Make extreme measures (not glyphosate) to remove kikuyu grass, especially from historical and archeological areas (eg Mangere kumera mounds). I would like to speak further to this.

AUCKLAND TRANSPORT a huge chunk of rates go to AT who have the worst track record for consultation and bullying public. Their unsafe cycleways in West Lynn have taken 4 years to remedy and the remedies vary in their ‘improvement’ and safety issues have NOT been addressed. I would like to speak further to this.

CONSULTATION Auckland Council and CCOs are terrible at this.

Currently they make a decision, then ‘consult in a biased way to back the decision, then do what they decided in the first place.

Take heed of the Owairaka Appeal Cort decision. Its this bad with every consultation. I’ve had my say on Operational plans before and after all of the public input, the plans haven’t changed by a single word, so I feel like ‘why bother’. More public meeting are needed and consultation before engaging urban planners to determine what people like and use to have better informed briefing of experts. Better engagement on social media by Councillors and Board members instead of blocking people who have alternative view (as Pippa Coom has done) I would like to speak further to this.

ELECTED OFFICIALS there should be elected officials on the Boards of CCOs, especially Panuku who have all of the ‘family silver and gold’ our assets. It is particularly wrong that the current chair has ‘his fingers in so many pies’, that certainly leaves him open for a conflict of interest!!!! The CCOs need to be actually Council CONTROLLED, and answerable to the people.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

What do you think of this proposal? Support

Tell us why: Increased population density as Auckland's population grows through 2050, combined with the challenges and requirements of society driven by climate change, demand that we are responsible and forward looking.

Theres no more fiscally responsible choice than the one that we start today. I hope and expect our councillors, as key guardians of Auckland, Tāmaki Makaurau to act accordingly to invest in the future safety, vibrancy and continued well-being of the environment and region that is one of the worlds most liveable today.

May it be so for many generations more thanks to our foresight.

2. Managing on-going budget pressures

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's a small amount per household which can have a huge impact on the biggest issue facing our generation//entire planet. We must act now on climate crisis and create the funds to do so. The way that these funds can be spent will also increase the wellbeing of the communities in the city; reducing cars on the roads through increasing frequency, routes and availability (subsidised PT fares, yes please) of public transport, investing in 'micro public transport' like rentable bike schemes, increasing walking and biking infrastructure. Even things like decarbonising bus fleets, boat fleets, service fleets; all those things contribute to making the public realm alongside roads cleaner for breathing, quieter and generally more pleasurable for people to walk in, bike in, exist in!

Urban Ngahere is essential in this city that prioritises on road carparking, off road carparking and 'low maintenance' solutions such as, well, asphalt. ACC needs to be using this climate action targeted rate to create green corridors, with shade for pedestrians, pockets of ecosystem for birds and creating a more resilient city (mitigating heat sinks etc)

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I support this change if it means people being incentivised to think about their rubbish amounts/rates and if it means expanding composting services across the whole city. Expanding the food scraps collection should be frontloaded to be rolled out faster than anticipated; as it's ridiculous that we still are putting food waste into our landfill where it can't decompose into a useful substance.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support cycleways, urban ngahere restoration and prioritising māori outcomes wherever possible.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate Change is clearly happening and becoming more and more dramatic.

The sooner the Council acts the better, delays means greater costs financially and ecologically.

The council needs to actively support more cycle ways

EV Bus options and more buses

Introduce Congestion charging in the city to encourage people out of cars

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Don't sell the assets as this will lead to higher costs longer term for future generations

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Easier to manage and lower cost

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Need to include also EV buses and more buses

What do you think of this proposal? Support

Tell us why: This is our future. Without action now, climate related cost to people in the future is going to be higher. This is a no brainer. This also empowers people to be contributing in a way that many find difficult at the moment. The better futures report from sustainable business council and Kantar show that 86% of kiwis know we need to do more for the 1.5degree goal, but many feel that this takes more effort from their part, amongst other barriers. This is empowering people to contribute with minimal effort, lowering those barriers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We need to do more than this. Standardising is good but we need to have better waste management at all stages of managing it like in the waste plants and recycling centers. It seems like a no brainer but we' rather just send our rubbish offshore to be burnt than deal with it, NZ is disgusting. Get over the "clean and green" myth already we're just like every other nasty nation ruining the earth with unmanaged and neglected waste management ffs

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

CITY CENTRE RESIDENTS GROUP
2022/23 Annual Plan Submission

As the Mayor of Auckland noted on Councils 2022/23 Annual Plan commentary –

> "Auckland Council voted unanimously to declare a Climate Emergency in 2019, and we have already committed an extra $15 million a year to climate action through our Recovery Budget. We're not starting from scratch, but we also know that we are not doing enough. A recent progress report on our Climate Action Plan states that Auckland's emissions are not remotely tracking in line with our target to reduce emissions by 50 per cent by 2030.

Global warming is a change in the world environment created from greenhouse gas emissions. For the planet to survive the current level of emissions needs to be reduced dramatically and quickly. The most equitable means of achieving this is to focus on a simple cause and effect process, i.e. those producing the emissions pay for the share of emissions they produce.

In Auckland, CCRG understands that emissions are made up as below –

Transport - 43.6%
Transport makes up the single most significant portion of Auckland emissions with 86% of this from road use vehicles. Diesel vehicles are estimated to be responsible for 81% of all vehicle related air pollution health costs, estimated at $466 million annually. Therefore, the transport industry needs to be paying for 43.6% of emission reductions with 86% coming from road use vehicles.

Stationery Energy – 26.6%
This sector includes emissions from energy consumption in buildings, including electricity and natural gas, and energy use in manufacturing and construction.
Building owners, the manufacturing, construction and food production industries need to pay 26.6% of costs related to emissions reductions.

Industrial processes and product use – 20.2%
This sector consists mostly of non-energy related GHG from industrial processes, which in Auckland, are associated with steel production.
GHG emissions from industrial product use are mainly associated with the use of hydrofluorocarbons (HFC) and perfluorocarbons (PFC) which are used as refrigerants in air conditioning units and refrigerators.

Agriculture – 6.4%
Agriculture emissions include methane and nitrous oxide from livestock, animal wastes and fertiliser use. Agricultural energy use, such as for heating greenhouses, is classified differently and sits under the Stationary energy sector.

Waste – 3.1%
Emissions from landfilled waste and wastewater treatment are reported for this sector, with emissions from decomposing waste in landfills responsible for most reported emissions.
This sector generates about 3.1 per cent of Auckland's total emissions so there needs to be a charge on all waste to cover those costs.

Climate Action Targeted Rate

The Mayors current proposal for a Climate Action Targeted Rate (CATR) on all properties is neither appropriate, nor adequate ***to meet this clear and critical need*** for Auckland to make any measureable difference to its current greenhouse gas emissions.
Properties alone do not produce the most damaging of emissions – this comes from transport in both the private and public sectors.

The proposed CATR would raise just $57.4 million annually which is less than 10% of what is possible. As a comparison, Auckland Council could require Auckland Transport to implement a system where all vehicles needing to park on a public road purchase an annual parking permit. With 1.7m registered vehicles in Auckland, an annual parking permit of $500.00 ($1.37 per day) would raise $850,000,000 per annum. Perhaps only 50% of those vehicles would use on-street parking each year in which case the annual sum raised would be $425,000,000.

As an example, many people living in apartment buildings in Auckland do not have a carpark with the property. Renting a carpark costs approx. $300 per month so a total of $3,600 per annum – which is lot more than $500.00!!

If a café/restaurant wants to use the public footpath for dining purposes they have to pay an annual fee so doing the same for parking on a public road is not a new idea – it is only new for vehicles.

On top of these transport figures, Auckland also needs to add contributions from the other four sectors to raise their share of the remaining 57% of costs associated with their greenhouse gas emissions. Based on the 43% the transport industry should be paying, then Council has access to a very large Climate Change budget so can achieve a lot in a much shorter time frame.

Auckland Council could also reduce Auckland Transports budget by the annual amount they expect AT to raise themselves via instruments such as the parking fee referred to above, which would make existing ratepayer funds available for their own climate change initiatives that could incorporate free zero emissions public transport.

The outcome will be low greenhouse gas emissions, and a cleaner and more efficient public transport system that people can rely on to get them from A to B on time.

Critically, it would raise in one year, what the Mayors proposed Climate Action Targeted Rate would raise in ten years and provide both co-benefits and social equity.

In other words we are asking the greenhouse gas producers to meet the same share of climate damage that they cause and no other process could be more defendable than that.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Happy to pay this additional rate to support Auckland's climate change work. Have you considered also inviting additional optional $ support from ratepayers so that the fund could be higher? I'd be more than happy to contribute a bit extra.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

What do you think of this proposal? Support

Tell us why: I'm a Postdoctoral Research Fellow at the University of Auckland. The evidence from climate science is unequivocal: We are in a climate emergency, and I want urgent action now.

The current fossil fuel price crisis is a reminder that we need more affordable transport choices for everyone. Active transport and public transport are the most efficient options, meaning they can be the most affordable, use the least energy, and help the most on climate. But active and public transport are only possible with a collective investment, like Auckland Council is proposing.

I WANT to walk, cycle, and bus more for the benefit of the planet and my health. However, lack of infrastructure, and safety concerns, prevent this. I strongly support the increased options for active transport, which will help my ideals align with tangible, safe action.

This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Because without this nothing else is worthwhile. It is a do or die moment in our city, our country, our world's life.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I trust the Council will do what it can to keep our city functioning well and thriving as a lively city in difficult time.s

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Trust the Council to do its best.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Relying on people to dispose of their rubbish will probably lead to

rubbish left all over Auckland. Where I live, we have a stream running down to Hobson Bay and for decades people tossed everything down the bank and into that stream. Now in storms ovens, fridges, printers - just the visible rubbish - is exposed. What else has been thrown there over the years? I shudder to think. So best to collect people's rubbish and give them no say. That's the only way to keep our city clean and hygienic.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: I support the Board and what it does - knowing the board members do their best in very trying circumstances.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I particularly want the Tūpuna Maunga Authority not to cut down trees on any maunga. If the desire is to replace exotics, please

leave them growing while the natives take root and grow. It makes no sense to cut down the shelter that the exotics can give to growing trees, especially when droughts, a lack of sufficient rain, is a threat as it is in these times. Please, please, keep the exotics - by the time the natives are grown the exotics will often be ready to die anyway. This is a kinder way of managing the maunga. With thanks for the opportunity to provide feedback.

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Little point in not maintaining existing assets etc as there will be higher remedial costs in long run

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: Generally support but detail or PAYT needs careful intro to avoid dumping.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Strongly support planting ans active travel projects and hope they can be well integrated. Urban parks spending to be balanced with using community input and involvement on ground - including Tangata Whenua

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Major projects - replacement of Jubilee Bridge - must facilitate safe shared us with it being a major active link within the wider city.

Support on going development of Te Whau path and Avondale Community Centre (very important in area that is highly intensifying ans existing facility closed.

North - Would like to see Tuff crater paths improved to a standard that would allow low-key shared use as it provides a good alternative active community link while Waka Kotahi's Sea path is delayed. Just riding along motorway edges is not that attractive to all active travellers.

Eastern - similarly the possible active links tin Colin Maiden park should be optimised.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I strongly support the local boards' priority to seismic strengthen and upgrade the Leys Institute Library and Gymnasium. This has been closed for over 2 years and is very much missed by the community. The Little Leys libary is

totally inadequate, both for library services and the lack of any community services. We want our heritage library open again. Council governing body will need to provide funds for this important project.

I also support the establishment of the Ponsonby Park at 254 Ponsonby Rd. This land was purchased for a park over a decade ago and has community-led designs all ready to be implemented. This must also be a Local Board priority to at least start on Stage 1 of the park establishment.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Climate change is real and we need to do something about it

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: The impact on rates of house price increases is significant - this is largely artificial as we continue to live in our homes with existing services. This should have been taken into consideration when nominating a 3.5% general increase.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Makes sense

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: It makes it simple

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: I support cycle ways but not the way they are implemented by Auckland Transport who continually ignore the feedback from the local community

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I have concerns over Auckland Transport and the way they are ignoring communities input. It has impacts on business and community - our feedback has no impact on their decisions as despite asking for input, this has no effect.

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Please should consider what they throw out- otherwise no incentive to do resource recovery.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I feel strongly that the council is not allocating enough to waste- people need to be encouraged to throw out less, reuse more and compost. This is what clever cities do.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I want to feel safer riding my bike around the city with my baby on the back & Auckland needs more trees.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Tēnā koutou, Lo Katie tōku ingua, I have two kids at home and three step-children.

I grew up in the Bay of Plenty but now I live in Tāmaki Makaurau and I want my children to be able to enjoy clean water, swimable rivers seas, stable climate and the ability to forage for food and shelter under shade of native trees like I did when I was a child.

I also believe we are the caretakers of this place and we must nurture and protect the rest of the plants and animals that live here.

More action needs to be taken now to make sure future generations can live in a stable ecosystem.

The ways to mitigate climate disaster are clear and we need urgent action!

Please make transport options clean and affordable for everyone. Invest in local, regenerative economies and food sources. Plant so many native forests back to how they were and make sure we regenerate our wetlands and riparian margins so water and ecosystems can survive and thrive into the future.

Incentivise the use of clean energy and make it easy to use and affordable.

Invest in a culture of non essential travel, like working locally or remotely as much as possible to avoid excessive pollution.

Design nature into everything we do so reverse this terrifying climate catastrophe please!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: There are some overlapping efforts in the community that need to be supported but not council led or controlled.

Reach out to experts and creatives in the region for passionate and effective solutions that can be enhanced by local government support.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: I think people throw rubbish in places they shouldn't when they are given responsibility and if they know they have a bin they can use, they will be more responsible with their waste.

The best thing to do would be to stop people manufacturing waste in the beginning of the cycle. All products need a cyclic assessment for where their product ends up and must be accountable for the waste they create at the beginning of the products life.

Stop using plastics and single use products.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: As someone who walks locally and would like to enjoy my local environment I want more natural spaces for me and my children to explore. Wetlands, bush ocean and waterways.

Many of these spaces are polluted and full of weeds or plastic rubbish.

I would love to have more natural spaces to enjoy and forage for food as well as shared gardens and natural meeting spaces near waterways.

Less mowed grass and more wild spaces to explore means less need for maintenance of grass and more people who can weed native areas. This would provide shade for soil so we don't lose more ability to nurture the soil and assist ecosystems that look after the earth passively.

When weeding just drop the weeds to regenerate the soil and compost to return the nutrients back in a cycle. Our council garden keeps getting weeds and branches removed and nothing returned to the soil so it drys out in the sun.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I love the planting and rewilding initiatives that council has implemented at Western Springs | Waioria, I want to see more of these initiatives wherever we can.

Please clean the waterways and make them swimmable and safe to enjoy! Get the local schools, the zoo, community groups together to help own the cleanup.

Free or cheap clean public transport.

Plant native trees, shrubs and ground covers so insects, lizards and birds return to the rohe!

Coordinate pest control initiatives and fund them!

Stop cutting down native trees!

Support art events! Lots and lots of art and music for us to get together and be happy and celebrate life!

We need the arts more than ever right now!

Thanks for all the work you do, there's lots to manage and I know you all work hard and care for us.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We have been far too slow to introduce a healthier environment. We must act now

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Simplify the systems

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Other

Tell us why: We need a nationwide and a citywide Green education program. Show people why they should choose better forms of transport, and why this is beneficial for them, and that they will enjoy it and that life will be better. Education is the key, in cinemas, on TV , on radio, online, in schools, in workplaces! Without education people feel like they've been pushed into doing something, forcing change doesn't work very well at all!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: A number of us communication and business experts, gather that Auckland Council has 12 levels of management. This is far too many managers.

This muddle of managers means an organisation like the city council is open for corruption. So decisions are not made in a proper manner, while money, time, and expertise is wasted. Also checks and balances cannot be made easily, which we need desperately - to have proper checks and to make sure all the decisions are well balanced.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: Again, you need to reduce management at Auckland City Council so that all decisions are transparent, easy to understand, and that other involved and/or expert people can easily check on what is being done, and why.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why: So much that city council does is muddled, hard to understand, isn't implemented well, wastes money, etc., so I don't have much confidence in any decision you make.

The council needs to reduce their amount of management.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I don't know

Tell us why: Our rates are far too high, and we have had a pandemic, so most people in the city have lost income. I think anything unnecessary needs to not go ahead, and our rates need to come down, way down.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

The absolutely atrocious waste of money and stressing of businesses, and ruination of businesses which council and Auckland transport have created in places like West Lynn, wasting our rates on badly planned, or Not Planned Much At All, must stop, stop, stop.

We see horrible projects which then have to be completely undone five years later, after five years of damage and trouble to the local population, has to STOP.

Decimating huge amounts of trees, and bushland, like at Western Springs, also has to stop. Endlessly using concrete for any kind of recreational area, has to stop, we are in a climate emergency!

Hempcrete and other materials like rubber recycled from old tyres would be a huge improvement, research better materials!

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: There is a crisis and cars contribute to this we need done options and encouragement.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: There must be some flexibility in your operating budget to prioritize this...

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: This fits more with a user pays system. If I pay on rates it is to arbitrary and doesn't take into account the regularity of collection per household.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Makes sense

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The climate crisis is the biggest issue facing humanity, and urgent and radical action will be needed. Now, "business as usual" budgets simply do not have the capacity to support what needs to be done. I fully support the climate action targetted rate to rapidly shift the city into a more climate friendly one. NEw extensive (and preferably free or very cheap) public transport will make a difference, more and better cycling/walking infrastructure is urgently neeeded. All the actions are important, but we need action now. This targetted rate is one I support to shift us from being such a carbon-intensive car-dominated spread out city. However, these actions are only some of the wider actions that are needed. And it needs to happen urgently - not in 5 years or 10 years, but as soon as possible. Or else it's all irrelevant anyway.

I strongly support the approach to maximising benefits to under-served communities in Auckland and minimise the impacts of the rate increase on lower income households. I want to ensure that the Council actively honours Te Tiriti, tino rangatiratanga, and mātauranga Māori.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Please include organic waste collection separately!

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Ensuring that disability and accessibility are central in decision making.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Something needs to be done about climate action from a top-down approach and it needs to be done asap. I don't mind paying this amount, i would pay more

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I dont think selling off assets is ideal, as in the future this will create problems, long term lease yes, changing timing and efficiency i agree with

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Seems sensible

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Makes it easier for people, also decreases the need for bags which is extra plastic

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: They all sound positive I agree with them

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

What do you think of this proposal? Support

Tell us why: We cannot keep on relying on the current infrastructure with petrol and cars everywhere. Auckland CBD needs to revamp and redevelop to support green approaches - better managed and accessible public transport, e-scooters, walking, and cycling ways etc. it's the only way to move forward for a sustainable city for ourselves and tourists visiting.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: Proposing 18km of cycleways is not treating this issue like a climate emergency. Other cities around the world can roll out 100s of kilometers of cycleway in a single year . Please remove on-street parking from all arterial roads and replace with concrete tim-tams to quickly provide on street parking.

Also, please push for central government to allocated a lane on the harbour bridge for cycling. Working from home is the new normal, and travel volumes will not return to previous pre-COVID levels for a long time. This is an excellent opportunity to achieve significant mode-shift.

Please ensure that the new ferries have more space for bikes, and that the wharfs are friendly for longer bikes used for transporting families. For example, Pier 1 downtown (which I believe has just been recreated) has stairs and fences that make it unfriendly for families travelling to Bayswaters - and the gangplank on the ferry is very narrow.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I'm living with my mum here in Auckland.

We are living in a climate emergency and MUST make serious changes to the way we all live to have even a small hope for our future and those who follow us.

It's a privilege not a right to exist on this beautiful planet we call home. This climate action rate is a good first step, more needs to occur.

Thanks for encouraging this submission.

Ngā mihi,

Manu

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Increasing tree canopy will only be helpful if the trees are covenanted and cannot be removed. I support intensification of housing as it will enable people to live near where they work and reduce the region's commute footprint. Council must concentrate on their own footprint before trying to influence the ratepayers (else you are hypocrites!)

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: There should be a targeted rate to "catch up" on historical underspends. This rate should target "luxuries" and not be flat across the board (i.e. get the rich to pay a bigger share).

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Do not reduce spending, increase income (increase rates through a targeted rate on luxuries)

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Waste will be disposed of whether people pay for it or not, it just results in fly-dumping if it's not freely available.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?
Other

Tell us why: I support all the listed priorities but also please progress Ponsonby Park as quickly as possible.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I am frustrated by the unhelpful stance often taken by Council Staff. They behave as if they did not create their rules covering operation of services and have no option but to follow those unhelpful rules. This is bureaucracy for it's own sake and so painfully obvious it reduces public faith that Council is working on behalf of the ratepayers.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Increasing tree canopy will only be helpful if the trees are covenanted and cannot be removed. I support intensification of housing as it will enable people to live near where they work and reduce the region's commute footprint. Council must concentrate on their own footprint before trying to influence the ratepayers (else you are hypocrites!).

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: Selling the family silver is never a good plan. That is a short trem solution that leaves us poorer in the long run. Raise rates.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Raise rates

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: Please progress Ponsonby Park as quickly as possible. The money is available for stage 1, why delay it over 3 years?!

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Our group is focused on maintaining the Western Bays heritage character. Please continue to champion this aspect while managing intensification.

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I consider rapid investment in policies and actions that will reduce the emissions of our city to be essential, and a targeted rate seems to me to be a fair way of doing this. I am a 62 year old father of two adult children who really loves living in Tamaki Makaurau, and I feel the urgency for us as a city to make substantial and meaningful changes to reduce our emissions, or else this beautiful city of ours won't be worth living in. As an owner of both residential and commercial property in the city, I urge you to implement such policies with haste, and please don't stop at just these current proposals. I encourage you to go further and faster, because the quality of life of our descendants will very much be determined by our actions right now.

Although I am pleased to see that tree planting is one of the planks of this policy, this seems rather futile to plant a relatively few small grade trees - and primarily on the outer edges of the urban area - when at the same time the urban area of the city is losing a large number of the mature trees growing in private gardens - and at an alarming rate. This is death to the city by a thousand cuts.

Can I urge Council to actively lobby central government to change the current tree protection rules to bring back general tree protection in our urban areas so as to protect our mature trees. Planting 10,000 Manuka seedlings at 30cm high does in no way replace the removal of one 80 year old Totara, Pohutukawa or Oak tree in a residential property when consideration is given to all the different benefits that such a mature tree provides.

Additional measures to encourage cycling and walking need to be accelerated as there needs to be far more incentives to get people out of their cars. The better the cycling and walking network is, the more people will use it. Cycleways need

to be separated so as to make them safer and away from other vehicles. In conjunction with this additional secure cycle parking/lock up facilities need to be provided all across the city.

To conclude, we need to keep to the underlying premise that we are nothing more than caretakers of this city for those who will come after us.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Without more specific information re what operating spending would be cut, I find it too difficult to say whether I would or wouldn't support this proposal.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Seems like this provides a more equitable service and a fairer way to charge for these services.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: You need to lobby central government to re-institute general tree protection in Tamaki Makaurau. There is very little point in planting a few new small grade trees when our significant mature trees in private gardens are being cut down at an alarming rate as is currently the case.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I support the Tupuna Maunga Authority removing noxious weed species of trees and replacing them with native trees.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We are living in a CLIMATE EMERGENCY.

We need to ensure we have free, fast and frequent public transport for all. The pedestrian needs to be prioritised over cars to encourage people to walk over using their car to commute around the city, so we require safer footpaths, more safer crossings, slow traffic through shopping centres, around schools and other busy hubs. We need to implement large fines for people who drive at speed and who park on footpaths and berms to deter them to do so. We need better and safer cycling infrastructure to enable those who are keen to cycling but feel nervous to do so, to feel secure and safe to enable them to ditch their car for short commutes.

Decarbonising the ferry is a priority as is making it easy to take y0ur bicycle on the ferry, presently it is cumbersome and difficult.

Auckland Council need to have dedicated funding to ensure we have tangata whenua led initiatives to ensure the commitments to te tirirti are upheld.

AC need to lobby Central Governemnt to amend the tree protection (or lack of it) legislation. There is little point planting millions of trees if the existing mature/semi mature trees are not protected. It makes a mockery of the work past generations have done. Maybe rent relief could be offered to residents who have large trees on their property to incentivise them for retaining the trees. Planting on berms and reserves need to be cared for, watered and mulched.

More funds need to be put into planting trees/greening the areas in the city where there is little green canopy/parks and reserves.

We need more urban mara kai/composting hubs etc to increase community participation/reduce carbon/protect food security.

In 2019 AC declared a Climate Emergency - we now need action to ensure this wasn't an empty gesture or words. We cannot delay this package and it should not be delayed until 2024, we cannot afford to do so. Witnessing the flooding in the last year in Tairawhiti shows us that the climate is changing very quickly we cannot afford to wait - rather than not afford to do it now. Paying a bit extra now will save millions in the long run.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Auckland council need to retain the management of waste services - PAYT encouraged the use of private waste management companies to collect waste - these companies do not provide incentives or education to reduce waste to landfill or to compost.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Increase Ngahere - there is no point in doing this while there is no protection for existing trees. WLB need to actively lobby AC who in turn need to actively lobby central government to ensure there is protection of exisiting trees. explore opportunities to support Māori initiatives and businesses' maybe better to 'PARTNER with mana whēnua to support Māori initiatives'

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

I feel Tūpuna Maunga Authority should able to be autonomous in their planning for their land and should not be bullied by a small group of pākeha to undertake changes to their own land. E.g what happened regarding TMA plans for Ōwairaka.

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Improving the infrastructure with regard to public transport and safe cycling not only reduces our carbon expenditure but makes for a more enjoyable and easily livable city.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

What do you think of this proposal? Support

Tell us why: I think it's awesome that Auckland Council is creating a dedicated fund towards a zero-carbon future.

We are in a climate emergency, and I want urgent action now. IPCC report indicates we have only 8 years to keep warming under 1.5. It will cost us .16 c a day for a better future and having forest and community gardens will benefit us all.

The recent and ongoing rise in fuel prices also emphasises the need for alternative ways to move around the city. And there's nothing to lose - a better public transport network will also make Auckland more attractive to tourists!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: I don't believe the ratepayers should be paying a Climate change Targeted rate - We have to many targeted rates now -the tax payers should pay for it via the govt. Its not just Auckland. Basically you are pushing Elderly out of unavoidable city dwellings . So no to climate change action. Free Buses & trains would reduce traffic at peak traffic times and would also reduce carbon outputs at same time.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: Yes to keeping 3.5% even tho you promised this- add on targeted rates will soon add to Total % and more like 4-5%

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Stop spending $$ on roadside paving's that don't need doing - No more Cycle lanes, they are almost dragging the performance of traffic flow to a standstill in some city areas. Cyclists may feel safe on them but they are now used by electric scooters and bikes that travel faster and can creep up on you as quick as a wink (i myself have had close calls in village areas as they weave in & out from behind cars in quick time),walking and in own vehicle. Reduce the ridiculous amount of road cone'ing that actually makes the roads unsafe at times and has always not being a problem in the pass- i.e. Saw four roads in Mt Albert completely covered by Rd cones and the three man team was digging a hole on the berm 2mtrs in while 4 cone people with two trucks were causing the rd to narrow- This is waste of resource's and expense-This osh thing has gone OTT ..

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: This is another waste of Ratepayers funding- Education guidelines need to be pushed- i have not seen much in last four yrs. We used to get a mthly leaflet in our boxes(but i guess thats $$ lost to) but it was a good way to remind people what to do with recycle rubbish- There used to be drop off point scattered around areas once or twice a yr - these were good for locals to put recyclable pieces into. Now they have no option but Bins. No body i know can be bothered ringing up and booking a spot for inorganics, they would prefer inorganic street collections. No extra costs to burden ratepayers.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support

Standardise the opt-out rules for non-residential properties	Do not support
Apply a minimum base charge to every separately used or inhabited part of a property	Do not support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I do not support most priorities

Tell us why: I only support Local park improvements. I'm dead against Parks and Reserves changing managements- I wish to retain all as per Council managed, particularly the donated family owned parks-these parks were for Aucklanders in fact more properties should be brought for parks coinciding with the next generation of growing multi house developments . The Marine parks & reserves should also stay with local elected council management. This is critical !!

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Ok if all above stays the same.. No changes please.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I support this being payed through rates since landowners will benefit directly from having higher quality bus services and bikability in the form of land values so they should be expected to help pay for these. I also support rural properties contributing to the fund since urban ratepayers contribute heavily to funding rural infrastructure. I cycle around a lot so I think filling in gaps between cycling routes should be a top priority. I also support increasing bus frequencies city-wide, especially in weekends since I still want to be able to conveniently travel around the city then too.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services

- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: the order of the priorities looks good

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: pay as you throw could be more likely to encourage people to put their home rubbish into public bins, making them more likely to overflow since tenants would have to pay to throw out waste and may want to cut costs more

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: So disappointing! How does this help or encourage kiwi households to minimize waste and reduce landfills!?!?!

Your assuming we already full our bins weekly.

In our household we do not. A family of 3 (baby included!) We only fill our bin once a month, therefore you are actually feeling us more & effectly we are subsidizing those around us who are unaware and will fill their bins.

How can Auckland council go ahead with something that is directly apposed to our environmental goals as a country.

Hugely disappointed.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's absolutely essential we cut private car usage but to do that we need viable alternatives that people can afford to use.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: I supp0ort the sale of corporate buildings (but not green spaces), but think that cutting services needs more consultation.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: We don't have the luxury of time when it comes to addressing climate change. The short-term financial savings made by reducing expenditure on climate change initiatives are budget-driven (also a man-made problem) - the environment needs our attention, whatever it takes, even if it means introducing an alternative economic system. We need to look at the failing of neoliberal capitalism and think outside the box we seem to be confined to if it's lack of money stopping us saving the planet.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Changes to address climate impact must be addressed immediately and apply to those affected most. However, the outcomes of these goals should be applied universally to the city, not just the outliers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: The service prioritisation is alright in principle, however, Council has given no actual data on it's website on how it will be applied. By reducing services that are low-priority but only push costs to private out-of-pocket expenses is unsatisfactory. Without understanding what services or programs that will apply, this is only satisfactory in principal and discretionary to the Council.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Those who act responsibly with their waste management will should receive benefit from it. Those who don't should be charged appropriately.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Do not support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: The Sustainable Business Network strongly supports the Climate Action Targeted Rate. Ideally we would like the council to go further with climate action, but this is a very good start. It is essential that action is taken now, not pushed back even further. The proposed CATR supports projects that will begin to make a difference to Auckland's transport emissions. For $1.80 or so per week for the average business it should be affordable, despite the current economic challenges. But, given the scale of emissions from transport, this is really the bare minimum to credibly stay connected to the vision and goals within Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan. Auckland has made some progress in recent years, but the transport system is still dominated by private car use, often single occupancy. We need to be bolder. The business community can play a useful role in this by supporting their people to commute sustainably, encourage flexi-working where possible, and encourage the continued use of remote meetings. The Covid restrictions have been painful financially for many businesses in certain sectors, but that should not be a reason for not proceeding with this targeted rate this year. Overall, we urge the council to implement the CATR this year, and look to be more ambitious in the coming years.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: The Sustainable Business Network does not support the rates-funded proposal as we think it limits the incentive for people to dispose of their waste in a responsible manner. It removes the incentive to correctly place recyclable items in the recycling bin and also limits the incentive to correctly use the food waste bin. We are concerned that this change will lead to an increase in waste to landfill that could be diverted to recycling and composting. We note the arguments for the move to the rates-funded option (including equity, and the pricing limitations imposed by the 'side by side' competitive market regulation) but we think this is a retrograde step when we have an urgent need to move to a low carbon and circular economy. We support a user pays model.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

In light of the continued loss of our urban trees, Council should do all that they can to protect the remaining significant trees in our urban environment. They should be more proactive about where trees throughout the city and our parks can be planted rather than only planting trees that relate and have funding for a specific project.

With intensification, street tree planting is vital and this needs to prioritise appropriate planting that ensure all of the roles that trees provide to our city are met. Currently native trees are planted that don't thrive in an urban environment. This should not happen.

Funding should be set aside for the Rakino Hall. This is an important resource going into the future

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: This is such an important proposal. Climate change is not a political issue, and we need to act FAST (faster than we are). This is a relatively small amount of money per house hold, and gets us a very small step closer to our goal.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Do not support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am a student of environmental management, which is a degree that I chose after doing speech language therapy, due to my passion for the environment.

In saying that, I absolutely support the climate action targeted rate (CATR). I think the CATR is a defining moment in our fight against climate change. The councillors unanimously voted for declaring a climate emergency and the CATR is an opportunity for Auckland councillors to hold to their word. So I hope you all vote YES to this proposal, and hold to the promise you made back in 2019.

Why do I care about this issue? Recently, I've gotten a bike, to try to be the most sustainable I can, and it has not always been great. Sometimes on the road, it can feel a bit daunting, so it owuld be great to have the proposed increased cycling networks around the city. But 18km over 10 years is absolutely not enough. When we build cycling lanes, we want safe cycle lanes, not beautified cycle lanes. So I would encourage both Auckland Transport and Auckland council to build cycle lanes first and foremost, because right now, we need to get people on bikes. We can worry about beautifying later.

Furthermore, a lot of people raise the cost of the CATR as an issue. But when you look at the floods and the damage that happened in Gisborne, it tells all we need to know about why we need to act now. Delaying acting will mean that costs will only increase as we repair the damage caused instead of trying to prevent the damage in the first place by proposals like the CATR. It will cost a lot more in the future having ignored this, rather than deciding to act now.

I would also like to propose for denser housing developments in the Auckland area, because it would make public transport a lot more efficient. Furthermore, Auckland council spends a lot of time on consultations, when we are running out of time to deal with climate change. It would be great if there was a fast track process in regards to consultations regarding climate related projects.

The steps suggested as well as hopefully more, will keep our hope for a better future. I want for future generations to be able to see our forests and oceans and glaciers with their eyes, not through a documentary.

I would encourage all you councillors to hold to your word of declaring a climate emergency and vote YES. Make the CATR much more ambitious, because climate action spread out over 10 years is not enough. We have 8 years left to halve emissions according to the IPCC. So make these changes happen.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: When managing budget pressures, delivering on climate action and the environment need to be the category of "What are things we must do?". We cannot have a future where the environment and climate action come second, it needs to be just as important as a law. Delivering on climate action is for our own sake. It cannot be put aside. I would urge you to change your opinion on this and make climate action a priority, not a thing we "should" do. There are no more shoulds in climate action, only must. We are required by law (The Zero carbon Act) to be net zero by 2050. So we need to treat climate action as part of the law. We will not be here without the environment and we need to recognize that and treat it as such. It is not a secondary source.

No matter what happens, climate action and the environment are prioritized.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: We need all these things to be implemented at a rapid rate. A bottle drop off service for companies would also be great.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: As you guys show here, climate action always comes first, especially since this is the decade of action. I am excited to see more cycle lanes. They don't have to have concrete barriers or pretty trees on the side, even those metal barriers you can drop are great. Just make the rate of building faster.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Climate action is a must, not a should. Vote yes, and hold true to your declaration of the climate emergency. Lets be on the right side of history and be a city that future generations will talk about for decades to come.

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need to take urgent action on climate change. We need concrete action that significantly reduces carbon emissions NOW, and we also need to make climate action more visible to highlight the urgency of it.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? I don't know

Tell us why: I haven't looked into these proposals in detail.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: I haven't looked into these proposals in detail.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Literally all of the existing research evidence shows that PAYT is the most effective way to reduce waste. If you're serious about waste reduction then PAYT is the way to go. A rates-funded collection system hides the real cost of waste disposal and sustains current waste levels.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Currently, many Aucklanders rely on their cars to commute, socialise and go about their daily business. This increases not only our emissions, but also the traffic in our city. No one enjoys spending hours sitting in traffic or breathing in exhaust fumes. By investing in other methods of transportation, like walking, cycling, public transport and low-emission ferries, this proposal would reduce our reliance on cars by giving people more viable options to choose from when they move around the city. Combined with the rising price of fuel, the high death rate on our roads, concerns for the safety of pedestrians and cyclists, a push to increase the physical and mental health of the public and our ambitious goals to become carbon neutral by 2050, it would be unthinkable not to take this proposal forwards if we are serious about providing a better future for our Tamariki.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding

- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Tackling our reliance on cars is of primary importance for many reasons, so I support using these levers to alleviate the pressures on the current budget. Could a capital gains tax help boost the budget and pay for these changes? What about a targeted tax increase on high-emission vehicles like utes and luxury sports cars?

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: A concern with PAYT is waste dumping and littering; if people are unable or unwilling to pay for bin tags or bags, then they will find another way of getting rid of their waste, which could lead to an increase in littering. In a rates-funded system, those who produce less waste can opt for a smaller bin and pay less as a result. The expansion of food waste collection is a very positive move, as many people don't own a worm farm or a compost bin, so their food waste goes to landfill and create methane gases, which could be avoided with a food bin.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know

Apply a minimum base charge to every separately used or inhabited part of a property I don't know

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why: These priorities are all in line with my experience of living in Waitamatā. Homelessness is a particular issue in the area, so supporting organisations who help work in that space would be beneficial for all. There is a network of dedicated cycle paths in the area, but, once off the cycle path, it feels unsafe being on a bike. Better transitions and dedicated cycle routes on the roads would be helpful in bridging the gap.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Creating a more cycle friendly city is key to reaching our collective climate goals, however, an important blocker that is preventing people from getting on a bike is that it is perceived as being a dangerous way to travel. As a cyclist I can say it often feels unsafe to be on a bike, surrounded by big cars driving aggressively and erratically. Educating drivers so that they are more aware of cyclists, installing speed cameras and taking steps to curb the number of large, polluting cars like utility vehicles will helps make cyclists feel more safe on the roads and encourage more people to take up cycling.

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: The green spaces are super important and will really bring positive life back into the city. I am a young woman living in the CBD and I am genuinely afraid every single day to walk around because of the homelessness and unsociable people in the city. It is constantly terrifying and it only escalated since covid lockdowns. I get yelled at every single day, and it has really affected my mental health.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I am an engineering student that has lived in Auckland for the past four years. I have previously lived in Wellington and some smaller cities in Europe. The changes in the built environment I have experienced across different cities has really made me appreciate the influence that it has over our behaviours especially with regard to transport and our every day activities.

As the largest council in Oceania responsible for over one third of New Zealand's population, Auckland Council has an enormous responsibility to initiate the infrastructure changes that can help reduce emissions. A study which attempted to measure the emissions of 13,000 cities showed Auckland to be among the 400 most polluting (CO2) cities in the world. This shows that Auckland can really have a significant impact on global emissions if it decides to take concrete measures. Arguably actions taken by local governments could have a more significant effect than legislation introduced by central government. The council unanimously voted to declare a climate emergency in 2019 and should therefore show its willingness to act on its word via bipartisan support for this package.

As a city that for many decades has been designed around the car, making urgent changes to the built environment to accommodate greener modes of travel will take significant investment that cannot be made from existing budgetary constraints. I see the CATR as a starting point for this, however I also think that in the long term some areas of Auckland may need to be redesigned completely in order to fully accommodate denser living and greener modes of transport. As most trips taken by Aucklanders are short, investing in walking, cycling and tree canopies (which makes walking and cycling more attractive) I think could have a strong impact in reducing emissions. However, cycling projects to date have

been found to be very expensive due to the inclusion of landscaping projects within them. Landscaping and beautification should not be a priority over provision of active mode infrastructure while we face a climate emergency.

I think significantly more investment is needed in cycling and walking infrastructure coupled with courageous decision making which acknowledges the need to reallocate road space to active and public transport modes if we want to reduce Aucklanders' use of private vehicles. It is not possible to keep the existing roading infrastructure largely intact while reducing use of private vehicles and fully accommodating public and active transport. The allocation of road space shows a city's priorities and hence needs to show the prioritisation of active modes. To achieve this rapidly, council should be willing to experiment more with non permanent measures of road reallocation as we have seen in other cities like London, Manila, Paris, Toronto, New York and Bogota among others during the COVID-19 pandemic.

I think the purchases of additional electric busses are very much overdue. Personally, being subjected to inhale bus fumes while cycling behind a bus has at times discouraged me from cycling, so this change will have wider benefits beyond the direct emission reductions.

In addition to a change in infrastructure, widespread modeshift also requires behaviour change. I believe the council can play a significant role in this via innovative schemes (e.g shared neighbourhood cargobikes for grocery shopping) that can remove some of the barriers towards modeshift. In my opinion the council is already on the right track with ideas like bike skills workshops, but needs to continue with some more radical ideas.

In my opinion, the CATR investment is financially responsible as the cost of inaction is likely to be much greater than this targeted rate. Even if humans manage to keep warming to 1.5C, through actions like this investment, future generations will still face additional costs and likely reduced quality of living as a result of the temperature rise. Hence this critical to ensure that we minimise the burden that future generations will face as a result of climate change.

Below are some further ideas of small and large changes council could make to help with the climate emergency:

* development of fast track process for climate projects. This would reflect the time sensitive nature of the climate emergency

* Shared community electric cargobikes in residential areas which provide an easily accessible alternative to private vehicle trips for shopping trips

* Subsidised shopping trolleys to encourage walking to grocery shops

* Replacing grass/lawn with bush in unproductive areas (i.e. hillsides) to reduce lawn mowing emissions.

*discouraging unproductive, unnecessary or infrequently used lawns through zoning regulations.

* hyper local (i.e. for each street) council organised community events focused on helping neighbours forge relationships and share resources (car pooling, electronics, electric lawn mowers etc)

* More mixed use zoning to ensure more people are within walking distance of amenities

* Encourage more intensification and avoiding further sprawl by committing to not increasing residential zoning areas on the outskirts of the urban population areas.

* Council led program to help eliminate e-waste disposal in landfill. There are currently too many barriers to disposing e-waste responsibly so the council should help to make this easier. This could include a stronger partnership with existing recyclers and more direct involvement from the council to help with e-waste collection.

* discourage degrowth of the aviation sector through influence council has as largest shareholder of Auckland Airport and eventually divest from Auckland Airport by finding alternative funding sources.

*investigate whether it might be possible to reduce cargo emissions by incentivising production of highly imported products in Auckland

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year’s, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending

- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Climate change should be considered a must as an unmitigated climate crisis may well disrupt the ability of the council to provide services required by law in the future.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It is clear from what is happening with weather events here in Auckland (we are still in drought) and around NZ that we are feeling the effects of co2 emissions. I would be happy to pay $1.12 /week knowing it was going towards specifically climate-targeted actions.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: This is a very mixed bag of levers. It is difficult to support all of them which you ask me to do by allowing one response to the entire set of levers. I do not wish to see a reduction in the services provided by the council, neither do I wish to see further sales of land. I would like to see a push toward building design that mean consent is given to those building developments that maximise sunlight, thermal storage, water use minimisation and onsite storage, reduced energy use.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: Support climate action initiatives

4. Standardising waste management

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I applaud Council putting this targeted rate out for consultation and see this as a small step for Council to walk the talk on climate action. I would rather pay a little now than pay a lot later for the consequences of climate inaction. We all know we have a long way to go to reduce emissions in line with Te Tāruke-ā-Tāwhiri, Auckland's Climate Plan, and the transport sector plays a key part in this.

Rates increases are always difficult and raise concerns about further increasing an already very high cost of living in Auckland. But what we must realise is that climate inaction will only worsen this situation and current inequities. This makes the targeted rate all the more important.

I ask that Council actively honours te Tiriti, tino rangatiratanga and mātauranga Māori in the implementation of the rate. This includes working with mana whenua and marae to implement the chosen projects receiving funding.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: I ask that the management of on-going budget pressures does not negatively impact our commitments to climate action including those activities outside of the CATR that contribute to emissions reduction and climate resilience.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why: I support that climate action is considered a key priority in managing operational spending. I ask that the changes do not negatively impact our commitments to climate action including those activities outside of the CATR that contribute to emissions reduction and climate resilience.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why: Our property at Te Henga is 2 Km from the nearest road. There is nowhere to store bins other than to leave them on council property as there is no driveway and access is only via DOC land. Bags at least can be transported in a 4 wheel drive to a pickup location. Bags are also more pragmatic in allowing different volumes of rubbish to be collected. Sometimes there will be none but at others I will happily pay for additional bags to dispose of rubbish left by members of the general public on the beach or my property. Why take away that ability?

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: Like that government co-funding can be accessed. But I think council should commit regardless of a targeted rate, and to start joining the dots - planting trees is fine but so many are being lost to development. There should be incentives to development that retains established trees.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why: Difficult to really know, but the mix is appropriate. I think at least a small rates increase should be considered.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? I don't know

Tell us why: Obviously priorities have to be made, and those based on council's objectives and targets are appropriate. But each needs to be assessed, and impacts including climate change and environmental efficiencies included in the assessment.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: A PAYT system will make it more difficult for council to achieve its waste reduction objectives.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why: Waitemata is generally well off for parks compared to other areas, and needs should be looked at across the region to ensure fairness.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

If opting out of council waste services is to happen, licence provisions for private collection companies need to include similar service provision, and responsibility to reduce waste, in line with council services and objectives. Would be really good to see incentives for energy efficiency, passive solar, etc, in new developments.

Submission in respect of: AC ANNUAL BUDGET 2023- 2023

Date: 26 March 2022

Name of submitter: Wynyard Quarter Transport Management Association ('WQ TMA')

1. Wynyard Quarter Transport Management Association - background

1.1 Wynyard Quarter Transport Management Association (WQ TMA) is an independent group representing developers, landowners, employers, the marine and fishing industries, and the arts and hospitality sector which collectively have, and continue to develop an environment to work, live and play. The former industrial area is now booming with offices, housing, and a vibrant entertainment sector. The area is home to some major employers including Air New Zealand, ASB, Datacom, Fonterra, Genesis, Kiwibank, Sanford, Southern Cross and has a reputation as the innovation hub for Auckland. The area currently is home to approx. 15,000 employees, and this number is set to rise. The map below shows the TMA area boundary:

1.2 The TMA was established under Part 14.9.3.10 (Wynyard Quarter) of the Auckland District Plan 2004. It was made a condition of the Planning Consent and Environment Court Order 2012. Trip generation ceiling targets were specified in the District Plan (DP) and are linked to the extent and timing of development permitted in Wynyard Quarter. The Resource Consent for Wynyard Quarter set a target of a 30:70 mode split by 2020. With 70% of all journeys being by sustainable modes. However, this figure has been anecdotally revised to a 20:80 or even 10:90.

1.3 The objectives of the TMA as outlined in the Rules are as follows:

a to advocate to the Government, local authorities and/or persons, corporations or associations for the improvement of transport services and transport infrastructure to benefit the Wynyard Quarter community;
b to promote and share information with regard to access and transportation in and around Wynyard Quarter; and
c to do all things as are, or may be incidental to, or conducive to, the attainment of these objectives.

1.4 There are constraints on access to Wynyard Quarter. This has resulted in a heavy reliance on trip generation management, and restrictions have been placed on office activity under the

Auckland Unitary Plan[1] to ensure that vehicle traffic volumes entering and exiting the Wynyard Quarter are not increased. The mission of WQ TMA is to be the voice of the Wynyard Quarter: creating a thriving safe environment for business and community and fostering economic vitality by building partnerships, and delivering targeted transport initiatives.

1.5 WQ TMA recognise that the Wynyard Quarter area is being developed to become a unique waterfront location embracing a thriving economic hub, as well as playing host to major events (for example the America's Cup). WQ TMA understands that the regeneration and development of the area is ongoing. WQ TMA are keen to ensure that the area gets the very best transport infrastructure to support the ongoing economic growth of the area. This means well connected, reliable, and frequent sustainable transport options of high quality that ensures the safety and well-being of all users of the area.

2. Comments and observations

2.1 WQ TMA recognises that public transport has an important role to play in connecting more Aucklanders and in helping to reduce car dependency, both of which will help to reduce greenhouse gas emissions.

2.2 It would appear that Auckland Council are proposing to introduce a substantial new targeted rate through an Annual Plan, which has had limited time for public consultation. The proposed Climate Action Targeted Rate (CATR) was not mentioned in the Long-Term Plan which was consulted on only a year ago.

2.3 WQ TMA have concerns over the timing and impact on businesses (and residents) who are trying to recover from the negative impacts of Covid -19. Due to Covid Wynyard Quarter has already seen several hospitality businesses close and others are working on reduced opening hours.

2.4 Auckland Council needs to look at ways to prioritise services/projects and not just add more financial burden to residents and businesses through the new CATR.

2.5 WQ TMA accept that business should contribute towards climate action targets, but not through a differentiated targeted rate.

2.6 WQ TMA is keen to understand how the funds generated by the Regional Fuel Tax (RFT) have been spent. Increased transparency around that would increase business confidence and dispel some of the negativity surrounding the RFT expenditure, which has been swirling around in the media.

2.7 It is noted that 43.4% of Auckland total emissions come from transport. That leaves 56.6% coming from 'other sources'. It is unclear from the Auckland Council Annual Plan what these other sources are and what steps might be taken to reduce emissions from such sources.

2.8 No one yet knows what the post Covid working environment and commuting patterns will look like. Working from home is likely to increase from pre Covid levels. If that is the case then it may be that less public transport might be required in some areas, and at certain times. It is key that planning is not based on how we worked prior to Covid 19, and is agile enough to take into account the new norms, post Covid 19.

[1] Auckland Unitary Plan, 1214.8.2(2)(a)(ii) requires that restricted discretionary office activities in the Wynyard Quarter have to demonstrate that the activity, along with any other existing, permitted or consented activities do not exceed the following trip generation targets: 3650 vehicles per hour two way; 2500 vehicles per hour one way inbound or outbound during the weekday morning peak (7am to 9am); and 2500 vehicles per hour one way outbound or inbound during the weekday afternoon peak (4pm to 6pm).

2.9 Businesses in Wynyard Quarter are already paying a levy for being part of the local Business Improvement District. Businesses and commuters also contribute to the RFT. We want to encourage people back into the area and see businesses flourish again, not decrease disposable income and drive-up costs for businesses through a new CATR.

2.10 WQ TMA support the desire to increase the uptake of sustainable transport and reduce car dependency. We would support this being rolled out along the lines of the "Innovating Streets project'. Whereby trials/ pilots are undertaken before any final changes are made.

2.11 WQ TMA are keen to understand when the Congestion Charge for Auckland might be introduced. This would serve as a third additional transport levy for Aucklanders. Increasing the financial burden alongside the existing Regional Fuel Tax and the any new Climate Action targeted Rate.

3. Suggestions for consideration

3.1 Publish a detailed report on the Regional Fuel Tax, including what funds have been raised and how they have been spent.

32. Defer the introduction of any Climate Action Targeted rate until such time as the post Covid environment has settled back into the new normal, and business confidence has increased.

3.3 Before rushing into any large-scale capital expenditure detailed research into post Covid commuter behaviour in Auckland, should be undertaken. This should include looking internationally at the experiences of other cities. The research should identify gaps in service provision as well as the appetite for new services. Any new services need to meet the needs of commuters in terms of mode, timing, route and connections.

3.4 Customer safety perceptions around taking public transport could be addressed by an increase in services to allow for comfortable social distancing.

3.5 Target services where volume is greatest and when upgrades do take place ensure they are sustainable options, supported by the necessary infrastructure.

28.3.22

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: We need strong climate action now!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. What do you think of this proposal? Support

Tell us why: I would love to see increased transport services in conjunction with environmental considerations - and think boosting walking and cycling infrastructure is also badly needed. The climate action targeted rate seems like a great way to achieve this.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: I and 35 years old and I am a small business owner who lives in the City Centre and my main form of transport is Ebike. I support the climate change targeted rate because climate change is the most critical thing Auckland Council needs to address to ensure we have an equitable and functional city now and in the future. We need to invest to rapidly decarbonise our transport system by rolling out e buses, increasing train services, building safe cycling infrastructure (quickly) and enabling walkable neighbourhoods. We need to invest in fit for purpose green spaces that not only deliver on our recreation needs, but also enable urban farming as a way to build food security and regenerate our soils. I hope when I have children I can remain living in an apartment and my kids can safely bike to school or their local parks on safe cycle infrastructure. This targeted rate will contribute toward building this future.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why: It's crucial we take action to address climate change - additional spending is a small cost to pay to mitigate climate emergency. As a user of public transport from different parts of the city over the past decade it's clear that significant work is needed to improve the public transport options available across the city. This rate needs to just be a small part of the council's climate action.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023

- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

What do you think of this proposal? Support

Tell us why: I am a 22-year old woman working for an environmental charity. I live in Auckland Central, just off Queen St. We are in a climate crisis, and we need strong climate action now! I frequently walk and cycle around our city. I am excited to see $228 million towards building more cycleways and walkways. However, climate justice is paramount. I strongly support the rate focusing on under-served areas. This targeted rate is only the beginning, and I want the Council to be more ambitious than ever this year in its climate decision making and funding. Auckland can go further by looking at what leading cities in Europe have done to make sure there is great support for e-bikes, including safe bike lanes, priority crossing, useful bike routes, secure storage with charging facilities, and integration with public transport.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

What do you think of this proposal? Support

Tell us why: If we do not take urgent action we are passing to our children a future that will be defined by an unlivable environmental disaster. Please act now!

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not support

Tell us why: This includes ccits to w services that will unfairly impact the vulnerable members of the community that need those services they most. Raise rates!

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not support

Tell us why: Don't support any cutting of services.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why: Cuts waste and helps to address climate change issues. 'Pay as you go' will force those who cannot afford it to find other ways to get rid of their rubbish.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Would like to give local boards more decision-making power and more resources to spend in each of their areas.

To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: We are opposed, in principle, to the Council's proposal to introduce a substantial new targeted rate of 2.3% through an Annual Plan. This was not signalled through the Long Term Plan 2021/2031 and represents an unfair and destabilising approach to rates, especially at a time when businesses are facing tremendous uncertainty from the ongoing pandemic, world events and inflation. While we agree with the need to take climate action, in our view this must involve decisions by the Council to reduce, stop or reprioritise services, not simply add more. If further funding is absolutely necessary, we ask that funding mechanisms be employed that incentivise climate action and more appropriately spread the cost (eg such as a UAGC). Turning to the proposal for the Climate Action Targeted Rate (CATR), we do not accept that a business differential (even at 25.8%) should be applied to this targeted rate if introduced. We accept that business should contribute its share for climate action , but not through a differentiated targeted rate. Further, with an existing and increasing number of sustainably designed and constructed commercial buildings, we disagree there is always a relationship between high property values and higher generation of greenhouse emissions. As a

consequence, and also as a means of incentivising the action in Te Tāruke-ā- Tāwhiri: Auckland's Climate Plan to accelerate the uptake and sustainable design and construction of buildings, we ask that Council provide for remissions of any climate action funding requirements for these kinds of buildings. Finally, as the majority of businesses across the Auckland Region are small to medium sized, we welcome initiatives that support business to take climate action. Business education concerning sustainability and climate action is particularly

important to raise awareness and drive change.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: We have serious concerns expressed from our local business members that COVID- 19 is having a significant ongoing impact on their businesses. The impacts include direct financial impacts on businesses (especially hospitality businesses), supply chain and market disruption as well as effects on production and human resourcing. More particularly, COVID-19 has had major impacts on exporters to China and those relying on international visitors and students. For hospitality and events organisers, the ongoing disruptions have been devastating. Small and medium-sized businesses have had their business models turned upside down.

Businesses tied to travel, tourism and hospitality have experienced losses that will not be recoverable. We still do not know how long this will continue. We have lost many businesses already, with the outlook for some businesses now dire. We have also noticed a decline in the security of our town centres, likely due in part to COVID-19 measures by central government to address homelessness and reallocate police resources.

With very little direction from government, the vast majority of landlords have decided to share in some of their tenant's financial stress with proportional rent relief throughout the duration of the pandemic, but particularly during lockdowns and thei most recent Omicron outbreak. However, there has been no support from banking institutions and little from Auckland Council or Government to support these measures. While we do acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, we ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses. This might include, for example, extending the rates postponement policy and extending 'no fees' on outdoor dining licences to other hospitality-related licences (such as food safety licences) . We also ask for an overall review of the 'cost recovery' model used to fund many Council services in light of the ongoing impacts from the pandemic. Our overall feedback is that while we support the general direction taken in the Long Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised and any non-priority vestments or services be deferred or cancelled. We remain concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%. To reduce these impacts, we believe Council should first:

• keep rates and charges increases to a minimum (eg not introduce the CATR);

and

• make deeper cost savings and further prioritise services (including the

services of CCOs); and then

• prioritise capital investment and defer or cancel non-priority investments;

• sell more surplus property; and

• make additional use of borrowings (within financial prudence policy settings) On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to key priorities, don't deliver value or can be provided just as well by others should be cancelled or reduced in scope immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: We have serious concerns expressed from our local business members that COVID- 19 is having a significant ongoing impact on their businesses. The impacts include direct financial impacts on businesses (especially hospitality businesses), supply chain and market disruption as well as effects on production and human resourcing. More particularly, COVID-19 has had major impacts on exporters to China and those relying on international visitors and students. For hospitality and events organisers, the ongoing disruptions have been devastating. Small and medium-sized businesses have had their business models turned upside down.

Businesses tied to travel, tourism and hospitality have experienced losses that will not be recoverable. We still do not know how long this will continue. We have lost many businesses already, with the outlook for some businesses now dire. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Other

Tell us why: We share concerns about the high rates of waste generated per person in Auckland and agree that the Council can play a role in influencing waste reduction. We also support the goals of the Auckland Waste Management and Minimisation Plan 2018, including to minimise kerbside household waste. We support the proposal to allow certain business properties to opt-out of Council's waste management services and charges from 1 July 2023, because the council's kerbside service is more suitable for domestic waste than dealing with the wide range and nature of business waste. We agree that charging for a service that the council cannot deliver is inequitable and that the case for maximising council's ability to influence waste behaviour is also irrelevant when the service required cannot be delivered by the council, such as to certain business properties.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

5) Rating Policy Proposals

Our overall feedback is that what businesses need most from Council is a fair, transparent and stable approach to rates. As we said above, we are concerned about the un-signalled and compounding effect on businesses of increases in rates and charges.

Business differential

While we appreciate that the business differential is being reduced to 25.8% by 2037/2038, fundamentally, we do not accept that a business differential should be applied to rates especially for reasons that businesses are better able to manage additional costs than residential properties" or because "businesses can claim back GST and expense rates against tax." These reasons do not justify the business

differential, particularly for small businesses who make up most businesses in

Auckland.

Accommodation Provider Targeted Rate

As the border reopens, we strongly believe it is critical that Council fund ‘Brand Auckland’ visitor attraction and events to support local businesses recover from the COVID-19 crisis. Having no funding for this in the Annual Plan 2022/2023 is very short sighted. We also disagree with the position that a link must be made between the funding of visitor attraction/events and a specific funding mechanism (such as the Accommodation Provider Targeted Rate (‘APTR’)). We believe a more secure and sustainable source of funding needs to be found, though we do agree with the introduction of a levy at the border on international visitors.

Watercare’s increase in charges

To support an increase in capital investment, Watercare's board of directors resolved to increase water and wastewater tariffs by 7 per cent. This follows an increase of 7% for the current financial year. We are concerned about these substantial increases in water charges from Watercare and question whether they are a priority or reasonable.

(6) Regional Fuel Tax underspend

Our preference is to introduce initiatives that both manage demand and raise funding equitably as soon as possible, balanced with investment into affordable and more frequent public transport in order to effect sustainable behavioural change. We understand, for example, that technical work on the ‘Congestion Question’ project that has been examining the potential to apply congestion charging in Auckland is progressing. In the interim, while we have previously supported a regional fuel tax, we are very concerned about the ongoing underspend of the Regional Fuel Tax and in light of recent world events, we ask that Council advocate to central government fort the regional fuel tax to be suspended.

(7) Vacant Land

We note that in preparation for the Recovery Budget, the Council asked for advice on the mechanisms to address vacant land to encourage development and we asked for consideration to be given of mechanisms to address vacant tenancies in high street retail areas. As the border reopens, we again ask for this to be considered (such as use of vacant window treatments and activations).

Conclusions

As we enter another very uncertain year, especially for small and medium sized businesses, we ask the Council to consider carefully their needs in its approach to the Annual Budget 2022/2023 and provide more focus on growing the economy and supporting local businesses. PARNELL STATION AND TUNNEL CYCLING ROUTE

Parnell Station – Parnell Station opened in early 2017 to limited services. The WLB have stated that it wants to ensure the station is fully operational and accessible to all users at the earliest opportunity. This has still to be realised. In addition, accessible pedestrian and cycling connections need to be provided to Parnell Station and linking the station with the village and the Domain. ‘As noted in the Parnell Plan, we still need to collectively advocate to open the Greenways route from the Strand through the old Parnell tunnel to Newmarket as a cycleway. Despite the fact that this has previously been rejected as being too expensive by AT, we are now several years later and the project needs to be reevaluated, especially in light of an upcoming Revised Parking Strategy.

WAYFINDING

The desire for proper wayfinding to support destinations in Parnell such as the station and Auckland Museum, has also been on the agenda for several years with no positive outcome. We would really like to see some positive progress in this regard in the upcoming months, with some budget allocated from the WLB Transport

Capital Fund.

SUBMISSION TO AUCKLAND COUNCIL ANNUAL BUDGET 2022/2023, AND LOCAL BOARD FEEDBACK

28th March 2022

Introduction

The Parnell Business Association represents over 1,100 businesses with a capital value estimated at $1,8 billion. We are one of the 50 BIDs in Auckland, representing over 25,000 businesses with a combined capital value estimated at $24 billion. Through the BID programme, Auckland's BIDs work with the Auckland Council to improve the local business environment and grow the regional economy.

This Submission and our feedback will cover:

(1) Ongoing concerns regarding the impact of COVID-19
(2) Climate Action Targeted Rate
(3) Budget Pressures and Service Prioritisation
(4) Waste Service Standardisation
(5) Rating Policy Proposals
(6) Regional Fuel Tax underspend
(7) Vacant Land

(1) Ongoing concerns regarding the impact of the COVID-19

We have serious concerns expressed from our local business members that COVID-19 is having a significant ongoing impact on their businesses.

The impacts include direct financial impacts on businesses (especially hospitality businesses), supply chain and market disruption as well as effects on production and human resourcing. More particularly, COVID-19 has had major impacts on exporters to China and those relying on international visitors and students. For hospitality and events organisers, the ongoing disruptions have been devastating. Small and medium-sized businesses have had their business models turned upside down. Businesses tied to travel, tourism and hospitality have experienced losses that will not be recoverable. We still do not know how long this will continue. We have lost many businesses already, with the outlook for some businesses now dire. We have also noticed a decline in the security of our town centres, likely due in part to COVID-19 measures by central government to address homelessness and reallocate police resources.

With very little direction from government, the vast majority of landlords have decided to share in some of their tenant's financial stress with proportional rent relief throughout the duration of the pandemic, but particularly during lockdowns and the most recent Omicron outbreak. However, there has been no support from banking institutions and little from Auckland Council or Government to support these measures.

While we do acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, we ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses. This might include, for example, extending the rates postponement policy and extending 'no fees' on outdoor dining licences to other hospitality-related licences (such as food safety licences) . We also ask for an overall review of the 'cost recovery' model used to fund many Council services in light of the ongoing impacts from the pandemic.

(2) Climate Action Targeted Rate

We are opposed, in principle, to the Council's proposal to introduce a substantial new targeted rate of 2.3% through an Annual Plan. This was not signalled through the Long Term Plan 2021/2031 and represents an unfair and destabilising approach to rates, especially at a time when businesses are facing tremendous uncertainty from the ongoing pandemic, world events and inflation.

While we agree with the need to take climate action, in our view this must involve decisions by the Council to reduce, stop or reprioritise services, not simply add more.

If further funding is absolutely necessary, we ask that funding mechanisms be employed that incentivise climate action and more appropriately spread the cost (eg such as a UAGC).

Turning to the proposal for the Climate Action Targeted Rate (CATR), we do not accept that a business differential (even at 25.8%) should be applied to this targeted rate if introduced. We accept that business should contribute its share for climate action , but not through a differentiated targeted rate.

Further, with an existing and increasing number of sustainably designed and constructed commercial buildings, we disagree there is always a relationship between high property values and higher generation of greenhouse emissions. As a consequence, and also as a means of incentivising the action in *Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan* to accelerate the uptake and sustainable design and construction of buildings, we ask that Council provide for remissions of any climate action funding requirements for these kinds of buildings.

Finally, as the majority of businesses across the Auckland Region are small to medium sized, we welcome initiatives that support business to take climate action. Business education concerning sustainability and climate action is particularly important to raise awareness and drive change.

(3) Budget Pressures and Service Prioritisation

Our overall feedback is that while we support the general direction taken in the Long Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised and any non-priority investments or services be deferred or cancelled.

We remain concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%.

To reduce these impacts, we believe Council should first:

- keep rates and charges increases to a minimum (eg not introduce the CATR); and
- make deeper cost savings and further prioritise services (including the services of CCOs); and then
- prioritise capital investment and defer or cancel non-priority investments;
- sell more surplus property; and
- make additional use of borrowings (within financial prudence policy settings)

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to key priorities, don't deliver value or can be provided just as well by others should be cancelled or reduced in scope immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right.

(4) Waste Service Standardisation

We share concerns about the high rates of waste generated per person in Auckland and agree that the Council can play a role in influencing waste reduction. We also support the goals of the Auckland Waste Management and Minimisation Plan 2018, including to minimise kerbside household waste.

We support the proposal to allow certain business properties to opt-out of Council's waste management services and charges from 1 July 2023, because the council's kerbside service is more suitable for domestic waste than dealing with the wide range and nature of business waste. We agree that charging for a service that the council cannot deliver is inequitable and that the case for maximising council's ability to influence waste behaviour is also irrelevant when the service required cannot be delivered by the council, such as to certain business properties.

(5) Rating Policy Proposals

Our overall feedback is that what businesses need most from Council is a fair, transparent and stable approach to rates. As we said above, we are concerned about the un-signalled and compounding effect on businesses of increases in rates and charges.

Business differential

While we appreciate that the business differential is being reduced to 25.8% by 2037/2038, fundamentally, we do not accept that a business differential should be applied to rates especially for reasons that "businesses are better able to manage additional costs than residential properties" or because "businesses can claim back

GST and expense rates against tax." These reasons do not justify the business differential, particularly for small businesses who make up most businesses in Auckland.

Accommodation Provider Targeted Rate

As the border reopens, we strongly believe it is critical that Council fund 'Brand Auckland' visitor attraction and events to support local businesses recover from the COVID-19 crisis. Having no funding for this in the Annual Plan 2022/2023 is very short sighted.

We also disagree with the position that a link must be made between the funding of visitor attraction/events and a specific funding mechanism (such as the Accommodation Provider Targeted Rate ('APTR')). We believe a more secure and sustainable source of funding needs to be found, though we do agree with the introduction of a levy at the border on international visitors.

Watercare's increase in charges

To support an increase in capital investment, Watercare's board of directors resolved to increase water and wastewater tariffs by 7 per cent. This follows an increase of 7% for the current financial year. We are concerned about these substantial increases in water charges from Watercare and question whether they are a priority or reasonable.

(6) Regional Fuel Tax underspend

Our preference is to introduce initiatives that both manage demand and raise funding equitably as soon as possible, balanced with investment into affordable and more frequent public transport in order to effect sustainable behavioural change. We understand, for example, that technical work on the 'Congestion Question' project that has been examining the potential to apply congestion charging in Auckland is progressing.
In the interim, while we have previously supported a regional fuel tax, we are very concerned about the ongoing underspend of the Regional Fuel Tax and in light of recent world events, we ask that Council advocate to central government fort the regional fuel tax to be suspended.

(7) Vacant Land

We note that in preparation for the Recovery Budget, the Council asked for advice on the mechanisms to address vacant land to encourage development and we asked for consideration to be given of mechanisms to address vacant tenancies in high street retail areas. As the border reopens, we again ask for this to be considered (such as use of vacant window treatments and activations).

Conclusions

As we enter another very uncertain year, especially for small and medium sized businesses, we ask the Council to consider carefully their needs in its approach to the Annual Budget 2022/2023 and provide more focus on growing the economy and supporting local businesses.

LOCAL BOARD PRIORITIES

We note the Waitematā Local Board Priorities in the Annual Budget 2022/2023.

Quite frankly, Parnell has not been the recipient of anything major from the Waitematā Local Board for several years, despite our requests and advocacy.

In addition to the detrimental effects of COVID on our business community, and our responsibility to promote the area and support businesses where we can, the business association is under increased financial pressure to mitigate the effects of additional crime on our district, which is eating up our budget as well as staff resources. This also extends to the likes of tagging and the continued endeavour in that regard.

Efforts towards our streetscape enhancement and placemaking currently have no support from either council or the Waitematā Local Board. In fact just last week we were asked by Community Facilities if we could source an alternative source for the power for our fairy lights in Heard Park from Vector. Not to mention that our fairy lights have been tripping for the last 8 months since the Plunket upgrade and a simple request to correct this has still not been realised.

The only event in Parnell supported by the WLB is the Rose Festival, which does not benefit our business members.

HEARD PARK

We are grateful that Heard Park is finally being attended to, but it is way less than the proposed concept plan and the first phase amounts to not much more than maintenance on the pavers, as well as maintenance of seating - items that were first raised with the local board in 2016. The much needed improvement of power supply for events has been put into the second phase as 'requiring more work'.

ST GEORGES BAY RD

As you are well aware, we have advocated for the streetscape upgrade of St Georges Bay Rd and given substantive reasons over the past years with reference to added amenity and pedestrianisation. Several of our businesses and landowners also submitted in this regard. In the Local Board Plan 2021 it was itemised as a Priority Advocacy Project.

In the Ten Year Budget 2021-2031 we supported the reinstatement of the Local Board Discretionary Transport Capital fund, under which the WLB stated “This will allow us to improve road safety, and street scaping including the revitalisation of St Georges Bay Road”

While we understand that the WLB Transport Capital Fund cannot facilitate the actual upgrade, we ask that:-

- The Project is still highlighted as one of the priority advocacy projects
- The WLB fund the design of the project in the 2022-2023 budget.

PARNELL STATION AND TUNNEL CYCLING ROUTE
Parnell Station – Parnell Station opened in early 2017 to limited services. The WLB have stated that it wants to ensure the station is fully operational and accessible to all users at the earliest opportunity. This has still to be realised.

In addition, accessible pedestrian and cycling connections need to be provided to Parnell Station and linking the station with the village and the Domain. ‘

As noted in the Parnell Plan, we still need to collectively advocate to open the Greenways route from the Strand through the old Parnell tunnel to Newmarket as a cycleway. Despite the fact that this has previously been rejected as being too expensive by AT, we are now several years later and the project needs to be re-evaluated, especially in light of an upcoming Revised Parking Strategy.

WAYFINDING
The desire for proper wayfinding to support destinations in Parnell such as the station and Auckland Museum, has also been on the agenda for several years with no positive outcome. We would really like to see some positive progress in this regard in the upcoming months, with some budget allocated from the WLB Transport Capital Fund.

Kind Regards
Cheryl Adamson

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Do not support

Tell us why: While we agree with the need to take urgent climate action, in our view this must involve decisions by the Council to reduce, stop or reprioritise services, not simply add more.

We are opposed, in principle, to the Council's proposal to introduce a substantial new targeted rate of 2.3% through an Annual Plan. This was not signalled through the Long Term Plan 2021/2031 and represents an unfair and destabilising approach to rates, especially at a time when businesses are facing tremendous uncertainty from the ongoing pandemic, world events and inflation.

If further funding is absolutely necessary, we ask that funding mechanisms be employed that incentivise climate action and more appropriately spread the cost (eg such as a UAGC flat rate).

Turning to the proposal for the Climate Action Targeted Rate (CATR), we do not accept that a business differential (even at 25.8%) should be applied to this targeted rate if introduced. We accept that business should contribute its share for climate action , but not through a differentiated targeted rate.

Further, with an existing and increasing number of sustainably designed and constructed commercial buildings, we disagree there is always a relationship between high property values and higher generation of greenhouse emissions. As a consequence, and also as a means of incentivising the action in Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan to accelerate the uptake and sustainable design and construction of buildings, we ask that Council provide for remissions of any climate action funding requirements for these kinds of buildings.

Finally, as the majority of businesses across the Auckland Region are small to medium sized, we welcome initiatives that support business to take climate action. Business education concerning sust

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Other

Tell us why: We have serious concerns expressed from our local business members that COVID-19 continues to have a significant ongoing impact on their businesses. The impacts include direct financial impacts on businesses (especially hospitality and tourism related businesses), supply chain and market disruption as well as impacts on production and staff shortages. Recruitment challenges have been highlighted as one of the top issues, behind COVID. More particularly, COVID-19 has had major impacts on exporters to China and those relying on international visitors and students. For hospitality and event's organisers, the ongoing disruptions have been devastating. Small and medium-sized businesses have had their business models turned upside down. Businesses tied to travel, tourism and hospitality have experienced losses that will not be recoverable. We still do not know how long this will continue. We have lost many businesses already, with the outlook for some businesses now dire. We have also noticed a decline in the security of our town centres, likely due in part to COVID-19 measures by central government to address homelessness and reallocate police resources.

With very little direction from government, the vast majority of landlords have decided to share in some of their tenant's financial stress with proportional rent relief throughout the duration of the pandemic, but particularly during lockdowns and the most recent Omicron outbreak. However, there has been no support from banking institutions and little from Auckland Council or Government to support these measures.

While we do acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, we ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses. This might include, for example, extending the rates postponement policy and extending 'no fees' on outdoor dining licences to other hospitality-related licences (such as food safety licences) . We also ask for an overall review of the 'cost recovery' model used to fund many Council services in light of the ongoing impacts from the pandemic. Our overall feedback is that while we support the general direction taken in the Long Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised and any non-priority investments or services be deferred or cancelled.

We remain concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%.

To reduce these impacts, we believe Council should first:

▪ keep rates and charges increases to a minimum (eg not introduce the CATR); and

▪ make deeper cost savings and further prioritise services (including the services of CCOs); and then

▪ prioritise capital investment and defer or cancel non-priority investments;

▪ sell more surplus property, including the 2 sites in Newmarket's Station Square; and

▪ make additional use of borrowings (within financial prudence policy settings)

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to key priorities, don't deliver value or can be provided just as well by others should be cancelled or reduced in scope immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then

do it once and do it right. Further conduct a productivity review across the council group. We are daily end-users of services of council and its CCOs, and regularly experience inefficiencies, double handling, and unnecessary reworking that takes place.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Other

Tell us why: We have serious concerns expressed from our local business members that COVID-19 continues to have a significant ongoing impact on their businesses. The impacts include direct financial impacts on businesses (especially hospitality and tourism related businesses), supply chain and market disruption as well as impacts on production and staff shortages. Recruitment challenges have been highlighted as one of the top issues, behind COVID. More particularly, COVID-19 has had major impacts on exporters to China and those relying on international visitors and students. For hospitality and event's organisers, the ongoing disruptions have been devastating. Small and medium-sized businesses have had their business models turned upside down. Businesses tied to travel, tourism and hospitality have experienced losses that will not be recoverable. We still do not know how long this will continue. We have lost many businesses already, with the outlook for some businesses now dire. We have also noticed a decline in the security of our town centres, likely due in part to COVID-19 measures by central government to address homelessness and reallocate police resources.

With very little direction from government, the vast majority of landlords have decided to share in some of their tenant's financial stress with proportional rent relief throughout the duration of the pandemic, but particularly during lockdowns and the most recent Omicron outbreak. However, there has been no support from banking institutions and little from Auckland Council or Government to support these measures.

While we do acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, we ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses. This might include, for example, extending the rates postponement policy and extending 'no fees' on outdoor dining licences to other hospitality-related licences (such as food safety licences) . We also ask for an overall review of the 'cost recovery' model used to fund many Council services in light of the ongoing impacts from the pandemic. Our overall feedback is that while we support the general direction taken in the Long Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised and any non-priority investments or services be deferred or cancelled.

We remain concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%.

To reduce these impacts, we believe Council should first:

▪ keep rates and charges increases to a minimum (eg not introduce the CATR); and

▪ make deeper cost savings and further prioritise services (including the services of CCOs); and then

▪ prioritise capital investment and defer or cancel non-priority investments;

▪ sell more surplus property, including the 2 sites in Newmarket's Station Square; and

▪ make additional use of borrowings (within financial prudence policy settings)

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to key priorities, don't deliver value or can be provided just as well by others should be cancelled or reduced in scope immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right. Further conduct a productivity review across the council group. We are daily end-users of services of council and its CCOs, and regularly experience inefficiencies, double handling, and unnecessary reworking that takes place.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: We share concerns about the high rates of waste generated per person in Auckland and agree that the Council can play a role in influencing waste reduction. We also support the goals of the Auckland Waste Management and Minimisation Plan 2018, including to minimise kerbside household waste.

We support the proposal to allow certain business properties to opt-out of Council's waste management services and charges from 1 July 2023, because the council's kerbside service is more suitable for domestic waste than dealing with the wide range and nature of business waste. We agree that charging for a service that the council cannot deliver is inequitable and that the case for maximising council's ability to influence waste behaviour is also irrelevant when the service required cannot be delivered by the council, such as to certain business properties.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?
Other

Tell us why: We note the Waitematā Local Board (WLB) has determined their priorities for 2022-2023 as follows:

1. Addressing Climate change and protect our natural environment. Initiatives include

- planting trees to ensure we have an urban ngahere (forest)
- walking, cycling and placemaking projects
- continuing work to restore our streams
- providing advice and making it easier to reduce emissions and waste.

2. Māori outcomes

▪ explore opportunities to support Māori initiatives and businesses

▪ enhance staff resources to support the delivery of Māori outcomes.

3. Local parks – improve and activate

▪ the results from the diversity review of our parks will be informing our planning

▪ deliver improvements to Heard Park, Point Erin Park and support community gardens.

4. Continue to support response to homelessness

▪ support community groups and initiatives in this space.

5. Community Facilities

▪ detailed design for the Leys Institute restoration

▪ activating Myers Park and Albert Park cottages.

Although we largely support the direction of Waitematā Local Board's priorities we feel disappointed at the lack of any major focus on Newmarket, and the eastern part of the Waitematā Board area.

Our Priorities Requiring Council/ WLB Support

▪ KENT, YORK & BOURKE STREET UPGRADES: The streetscape upgrade of Kent, York & Bourke Streets as per the Newmarket Laneways Masterplan. There are increasing safety issues with the existing footpaths, roads, parking and crossing areas. We note that AT have assisted by installing wheel stops in a small area of Kent Street, at the very least we would like these installed in the whole area. Wheelchair and pram access is still limited. Bourke Street is being activated by private property owners and businesses and with a small CAPEX investment from WLB could become a Laneways quick win.

▪ YOUTH FACILITY: Despite several years of discussions there has been no progress for a dedicated youth space in Newmarket. The problem continues to be exacerbated by the increasing number of apartment developments being consented. We fully support the ongoing intensification of Newmarket as a metropolitan town centre, however as a double-grammar zoned area we attract many families, and they have continually been poorly served by council and the local board. We note, and welcome, the WLB's help in getting the Pop-Up Pump Track into Newmarket Park, but would appreciate more focus on a permanent facility being established.

▪ STATION SQUARE: In light of the economic climate, we support the sale of Council's two properties in Station Square (19&20/ 28 Remuera Road, aka Newmarket Station Studios 1 & 2). We would however like a portion of the proceeds of the sale of these properties to be hypothecated for the upgrade of the Square and would appreciate WLB's support in achieving this.

▪ TARGETED RATE: Your ongoing support and advocacy for our proposed targeted rate to complete the Newmarket Laneways Masterplan. This seems to have stalled, and we would like to re-engage efforts on this.

▪ TUNNEL CYCLING ROUTE: Parnell/ Newmarket and the WLB need to collectively advocate to have the greenways route from the Strand through the old Parnell tunnel to Newmarket realised. A significant safety advancement for cyclists and will create an accessible pedestrian and cycling connection to the Domain, The Strand and Parnell. We note that this has been deemed too expensive by AT previously, but with support from NZTA as part of their National Cycling Programme it could be realised.

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Rating Policy Proposals

Our overall feedback is that what businesses need most from Council is a fair, transparent and stable approach to rates. As we said above, we are concerned about the un-signalled and compounding effect on businesses of increases in rates and charges.

Business differential

While we appreciate that the business differential is being reduced to 25.8% by 2037/2038, fundamentally, we do not accept that a business differential should be applied to rates especially for reasons that “businesses are better able to manage additional costs than residential properties” or because “businesses can claim back GST and expense rates against tax.” These reasons do not justify the business differential, particularly for small businesses who make up most businesses in Auckland.

Accommodation Provider Targeted Rate

As the border reopens, we strongly believe it is critical that Council fund ‘Brand Auckland’ visitor attraction and events to support local businesses recover from the COVID-19 crisis. Having no funding for this in the Annual Plan 2022/2023 is very short-sighted, and frankly alarming.

We also disagree with the position that a link must be made between the funding of visitor attraction/events and a specific funding mechanism (such as the Accommodation Provider Targeted Rate (‘APTR’)). We believe a more secure and sustainable source of funding needs to be found, though we do agree with the introduction of a levy at the border on international visitors.

Regional Fuel Tax underspend

Our preference is to introduce initiatives that both manage demand and raise funding equitably as soon as possible, balanced with investment into affordable and more frequent public transport in order to effect sustainable behavioural change (The erratic delivery of public transport services by AT is undermining efforts to encourage modal shift). We understand, for example, that technical work on the ‘Congestion Question’ project that has been examining the potential to apply congestion charging in Auckland is progressing.

In the interim, while we have previously supported a regional fuel tax, we are very concerned about the ongoing underspend of the Regional Fuel Tax and in light of recent world events, we ask that Council advocate to central government for the Regional Fuel Tax to be suspended.

7. Vacant Land & Empty Retail Sites in Metropolitan Town Centres

We note that in preparation for the Recovery Budget, the Council asked for advice on the mechanisms to address vacant land to encourage development and we asked for consideration to be given of mechanisms to address vacant retail tenancies in main street areas. As the border reopens, we again ask for this to be considered (such as use of vacant window treatments and activations). We have some sites on our main street Broadway that have been vacant for several years, our repeated efforts to engage with the off-shore property owners have been fruitless. “Retail land banking” in metropolitan town centres could to be de-incentivised with rates penalties.

Conclusions

As we enter another very uncertain year, especially for small and medium sized businesses, we ask the Council to consider carefully their needs in its approach to the Annual Budget 2022/2023 and provide targeted focus on growing the economy and supporting local businesses.

SUBMISSION TO AUCKLAND COUNCIL - ANNUAL BUDGET 2022/2023
&
WAITEMATĀ LOCAL BOARD PRIORITIES

Introduction
The Newmarket Business Association (NBA) represents over 3,000 property owners and businesses, who between them employ around 20,000 employees within the Newmarket precinct. Through the Business Improvement District (BID) programme, we work in partnership with Auckland Council, its CCOs, the Waitematā Local Board and the private sector to improve the local business environment, foster economic development, and improve outcomes for Newmarket in general.

This Submission and our feedback will cover:

1. Ongoing concerns regarding the impact of COVID-19
2. Climate Action Targeted Rate
3. Budget Pressures and Service Prioritisation
4. Waste Service Standardisation
5. Rating Policy Proposals
6. Regional Fuel Tax underspend
7. Vacant Land & Empty Retail Sites in Metropolitan Town Centres
8. Local Board Feedback

1. Ongoing concerns regarding the impact of the COVID-19

We have serious concerns expressed from our local business members that COVID-19 continues to have a significant ongoing impact on their businesses.

The impacts include direct financial impacts on businesses (especially hospitality and tourism related businesses), supply chain and market disruption as well as impacts on production and staff shortages. Recruitment challenges have been highlighted as one of the top issues, behind COVID. More particularly, COVID-19 has had major impacts on exporters to China and those relying on international visitors and students. For hospitality and event's organisers, the ongoing disruptions have been devastating. Small and medium-sized businesses have had their business models turned upside down. Businesses tied to travel, tourism and hospitality have experienced losses that will not be recoverable. We still do not know how long this will continue. We have lost many businesses already, with the outlook for some businesses now dire. We have also noticed a decline in the security of our town centres, likely due in part to COVID-19 measures by central government to address homelessness and reallocate police resources.

With very little direction from government, the vast majority of landlords have decided to share in some of their tenant's financial stress with proportional rent relief throughout the duration of the pandemic, but particularly during lockdowns and the most recent Omicron outbreak. However, there has been no support from banking institutions and little from Auckland Council or Government to support these measures.

While we do acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, we ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses. This might include, for example, extending the rates postponement policy and extending 'no fees' on outdoor dining licences to other hospitality-related licences (such as food safety licences) . We also ask for an overall review of the 'cost recovery' model used to fund many Council services in light of the ongoing impacts from the pandemic.

2. Climate Action Targeted Rate

While we agree with the need to take urgent climate action, in our view this must involve decisions by the Council to reduce, stop or reprioritise services, not simply add more.

We are opposed, in principle, to the Council's proposal to introduce a substantial new targeted rate of 2.3% through an Annual Plan. This was not signalled through the Long Term Plan 2021/2031 and represents an unfair and destabilising approach to rates, especially at a time when businesses are facing tremendous uncertainty from the ongoing pandemic, world events and inflation.

If further funding is absolutely necessary, we ask that funding mechanisms be employed that incentivise climate action and more appropriately spread the cost (eg such as a UAGC flat rate).

Turning to the proposal for the Climate Action Targeted Rate (CATR), we do not accept that a business differential (even at 25.8%) should be applied to this targeted rate if introduced.

We accept that business should contribute its share for climate action , but not through a differentiated targeted rate.

Further, with an existing and increasing number of sustainably designed and constructed commercial buildings, we disagree there is always a relationship between high property values and higher generation of greenhouse emissions. As a consequence, and also as a means of incentivising the action in Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan to accelerate the uptake and sustainable design and construction of buildings, we ask that Council provide for remissions of any climate action funding requirements for these kinds of buildings.

Finally, as the majority of businesses across the Auckland Region are small to medium sized, we welcome initiatives that support business to take climate action. Business education concerning sustainability and climate action is particularly important to raise awareness and drive change.

3. Budget Pressures and Service Prioritisation

Our overall feedback is that while we support the general direction taken in the Long Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised and any non-priority investments or services be deferred or cancelled.

We remain concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%.

To reduce these impacts, we believe Council should first:

- keep rates and charges increases to a minimum (eg not introduce the CATR); and
- make deeper cost savings and further prioritise services (including the services of CCOs); and then
- prioritise capital investment and defer or cancel non-priority investments;
- sell more surplus property, including the 2 sites in Newmarket's Station Square; and
- make additional use of borrowings (within financial prudence policy settings)

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to key priorities, don't deliver value or can be provided just as well by others should be cancelled or reduced in scope immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right. Further conduct a productivity review across the council group. We are daily end-users of services of council and its CCOs, and regularly experience inefficiencies, double handling, and unnecessary reworking that takes place.

4. Waste Service Standardisation

We share concerns about the high rates of waste generated per person in Auckland and agree that the Council can play a role in influencing waste reduction. We also support the goals of the Auckland Waste Management and Minimisation Plan 2018, including to minimise kerbside household waste.

We support the proposal to allow certain business properties to opt-out of Council's waste management services and charges from 1 July 2023, because the council's kerbside service is more suitable for domestic waste than dealing with the wide range and nature of business waste. We agree that charging for a service that the council cannot deliver is inequitable and that the case for maximising council's ability to influence waste behaviour is also irrelevant when the service required cannot be delivered by the council, such as to certain business properties.

5. Rating Policy Proposals

Our overall feedback is that what businesses need most from Council is a fair, transparent and stable approach to rates. As we said above, we are concerned about the un-signalled and compounding effect on businesses of increases in rates and charges.

Business differential
While we appreciate that the business differential is being reduced to 25.8% by 2037/2038, fundamentally, we do not accept that a business differential should be applied to rates especially for reasons that "businesses are better able to manage additional costs than residential properties" or because "businesses can claim back GST and expense rates against tax." These reasons do not justify the business differential, particularly for small businesses who make up most businesses in Auckland.

Accommodation Provider Targeted Rate
As the border reopens, we strongly believe it is critical that Council fund 'Brand Auckland' visitor attraction and events to support local businesses recover from the COVID-19 crisis. Having no funding for this in the Annual Plan 2022/2023 is very short-sighted, and frankly alarming.

We also disagree with the position that a link must be made between the funding of visitor attraction/events and a specific funding mechanism (such as the Accommodation Provider Targeted Rate ('APTR')). We believe a more secure and sustainable source of funding needs to be found, though we do agree with the introduction of a levy at the border on international visitors.

6. Regional Fuel Tax underspend

Our preference is to introduce initiatives that both manage demand and raise funding equitably as soon as possible, balanced with investment into affordable and more frequent public transport in order to effect sustainable behavioural change (The erratic delivery of public transport services by AT is undermining efforts to encourage modal shift). We understand, for example, that technical work on the 'Congestion Question' project that has been examining the potential to apply congestion charging in Auckland is progressing.

In the interim, while we have previously supported a regional fuel tax, we are very concerned about the ongoing underspend of the Regional Fuel Tax and in light of recent world events, we ask that Council advocate to central government for the Regional Fuel Tax to be suspended.

7. Vacant Land & Empty Retail Sites in Metropolitan Town Centres

We note that in preparation for the Recovery Budget, the Council asked for advice on the mechanisms to address vacant land to encourage development and we asked for consideration to be given of mechanisms to address vacant retail tenancies in main street areas. As the border reopens, we again ask for this to be considered (such as use of vacant window treatments and activations). We have some sites on our main street Broadway that have been vacant for several years, our repeated efforts to engage with the off-shore property owners have been fruitless. "Retail land banking" in metropolitan town centres could to be de-incentivised with rates penalties.

8. Local Board Feedback

We note the Waitematā Local Board (WLB) has determined their priorities for 2022-2023 as follows:

1. Addressing Climate change and protect our natural environment. Initiatives include
    - planting trees to ensure we have an urban ngahere (forest)
    - walking, cycling and placemaking projects
    - continuing work to restore our streams
    - providing advice and making it easier to reduce emissions and waste.
2. Māori outcomes
    - explore opportunities to support Māori initiatives and businesses
    - enhance staff resources to support the delivery of Māori outcomes.
3. Local parks – improve and activate
    - the results from the diversity review of our parks will be informing our planning
    - deliver improvements to Heard Park, Point Erin Park and support community gardens.
4. Continue to support response to homelessness
    - support community groups and initiatives in this space.
5. Community Facilities

- detailed design for the Leys Institute restoration
- activating Myers Park and Albert Park cottages.

Although we largely support the direction of Waitematā Local Board's priorities we feel disappointed at the lack of any major focus on Newmarket, and the eastern part of the Waitematā Board area.

Our Priorities Requiring Council/ WLB Support

- KENT, YORK & BOURKE STREET UPGRADES: The streetscape upgrade of Kent, York & Bourke Streets as per the Newmarket Laneways Masterplan. There are increasing safety issues with the existing footpaths, roads, parking and crossing areas. We note that AT have assisted by installing wheel stops in a small area of Kent Street, at the very least we would like these installed in the whole area. Wheelchair and pram access is still limited. Bourke Street is being activated by private property owners and businesses and with a small CAPEX investment from WLB could become a Laneways quick win.

- YOUTH FACILITY: Despite several years of discussions there has been no progress for a dedicated youth space in Newmarket. The problem continues to be exacerbated by the increasing number of apartment developments being consented. We fully support the ongoing intensification of Newmarket as a metropolitan town centre, however as a double-grammar zoned area we attract many families, and they have continually been poorly served by council and the local board. We note, and welcome, the WLB's help in getting the Pop-Up Pump Track into Newmarket Park, but would appreciate more focus on a permanent facility being established.

- STATION SQUARE: In light of the economic climate, we support the sale of Council's two properties in Station Square (19&20/ 28 Remuera Road, aka Newmarket Station Studios 1 & 2). We would however like a portion of the proceeds of the sale of these properties to be hypothecated for the upgrade of the Square and would appreciate WLB's support in achieving this.

- TARGETED RATE: Your ongoing support and advocacy for our proposed targeted rate to complete the Newmarket Laneways Masterplan. This seems to have stalled, and we would like to re-engage efforts on this.

- TUNNEL CYCLING ROUTE: Parnell/ Newmarket and the WLB need to collectively advocate to have the greenways route from the Strand through the old Parnell tunnel to Newmarket realised. A significant safety advancement for cyclists and will create an accessible pedestrian and cycling connection to the Domain, The Strand and Parnell. We note that this has been deemed too expensive by AT previously, but with support from NZTA as part of their National Cycling Programme it could be realised.

NEWMARKET.
NEWMARKET BUSINESS ASSOCIATION

Conclusions
As we enter another very uncertain year, especially for small and medium sized businesses, we ask the Council to consider carefully their needs in its approach to the Annual Budget 2022/2023 and provide targeted focus on growing the economy and supporting local businesses.

Yours sincerely,

Mark Knoff-Thomas
Chief Executive

Annual budget 2022/2023

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why: It is critical that Auckland's public transport system in Auckland is well connected and efficient and that there is ongoing investment in electrification to reduce emissions. We believe there needs to be a focus on improving connections across the region to the city centre given it is a significant place of employment.

We are opposed to introduce a substantial new targeted rate of 2.3% through an Annual Plan. This was not signalled through the Long-Term Plan 2021/2031 especially at a time when businesses are facing tremendous uncertainty from the ongoing pandemic, world events and inflation.

We also have additional comments about the current proposed CATR:

• Council must work to reduce, stop or reprioritise services, not simply add more cost to business.

• We do not accept that a business differential (even at 25.8%) should be applied to this targeted rate if introduced. We accept that business should contribute its share for climate action, but not through a differentiated targeted rate.

• If there are unspent funds associated with the Regional Fuel Tax that are unallocated, we would be supportive of the Property Council of New Zealand's position that should this rate be introduced that Auckland Council pursue an Order in Council that would allocate the unspent funds associated with regional fuel tax to the proposed package, which would reduce the overall cost of the proposed targeted rate to ratepayers.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why: Our overall feedback is that while we support the general direction taken in the Long-Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised.

We are concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%. To reduce these impacts, we believe Council should focus on:

• keeping rates and charges increases to a minimum (e.g. not introduce the CATR); and

• making deeper cost savings and further prioritise services (including the services of CCOs); and then

• prioritising capital investment and defer non-priority investments;

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to agreed key priorities and don't deliver tangible value should be reviewed immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right. The city centre delivers nearly 20% of Auckland's GDP and employs 15% of its workforce (as of February 2020). It has been disproportionately and severely impacted by COVID-19, with many of our businesses now facing the worst situation in the period of the pandemic. Revenue has been severely down in comparison to the rest of the region for the duration of the pandemic. Whilst this should have improved by the time this Annual Budget is introduced, the significant economic scarring that has occurred will mean it will take some time for businesses and the city centre to recover. This presents a risk to the city centre and the benefits expected from the significant public and private sector investment at least in the short term if there is not adequate investment to support its recovery.

We are also facing significant challenges around antisocial behaviour and crime. And outside of COVID-19, access, ongoing construction and safety remain key barriers to visitation. It is also imperative that good cleaning standards are maintained.

We acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, that have supported businesses. We ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses to support recovery.

Whilst we do expect that the City Centre Targeted Rate will be able to support elements of this plan, we do not expect this will be able to cover the investment requirement to offset the significant impact that has occurred.

Melbourne, Brisbane and Sydney have all made significant investments (through Federal and State Governments) to stimulate demand and encourage visitation, now with an increasing focus towards the weekday. This includes dine and discover vouchers to large scale scavenger hunts, to transport incentives and outdoor dining initiatives. Wellington has also recently announced Pandemic Response Plan, and whilst not to the same scale that is needed in Auckland, the principle of supporting recovery is noted. This has included:

• $1 weekend parking

• free outdoor dining permits

• a significant reduction in licencing fees

The city centre needs tangible and immediate actions to support its recovery. We consider this could also be supported with the following measures.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why: Our overall feedback is that while we support the general direction taken in the Long-Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised.

We are concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%. To reduce these impacts, we believe Council should focus on:

• keeping rates and charges increases to a minimum (e.g. not introduce the CATR); and

• making deeper cost savings and further prioritise services (including the services of CCOs); and then

• prioritising capital investment and defer non-priority investments;

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to agreed key priorities and don't deliver tangible value should be reviewed immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right. The city centre delivers nearly 20% of Auckland's GDP and employs 15% of its workforce (as of February 2020). It has been disproportionately and severely impacted by COVID-19, with many of our businesses now facing the worst situation in the period of the pandemic. Revenue has been severely down in comparison to the rest of the region for the duration of the pandemic. Whilst this should have improved by the time this Annual Budget is introduced, the significant economic scarring that has occurred will mean it will take some time for businesses and the city centre to recover. This presents a risk to the city centre and the benefits expected from the significant public and private sector investment at least in the short term if there is not adequate investment to support its recovery.

We are also facing significant challenges around antisocial behaviour and crime. And outside of COVID-19, access, ongoing construction and safety remain key barriers to visitation. It is also imperative that good cleaning standards are maintained.

We acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, that have supported businesses. We ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses to support recovery.

Whilst we do expect that the City Centre Targeted Rate will be able to support elements of this plan, we do not expect this will be able to cover the investment requirement to offset the significant impact that has occurred.

Melbourne, Brisbane and Sydney have all made significant investments (through Federal and State Governments) to stimulate demand and encourage visitation, now with an increasing focus towards the weekday. This includes dine and discover vouchers to large scale scavenger hunts, to transport incentives and outdoor dining initiatives. Wellington has also recently announced Pandemic Response Plan, and whilst not to the same scale that is needed in Auckland, the principle of supporting recovery is noted. This has included:

• $1 weekend parking

• free outdoor dining permits

• a significant reduction in licencing fees

The city centre needs tangible and immediate actions to support its recovery. We consider this could also be supported with the following measures.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why: We share concerns about the high rates of waste generated per person in Auckland and agree that the Council can play a role in influencing waste reduction. We also support the goals of the Auckland Waste Management and Minimisation Plan 2018, including to minimise kerbside household waste.

We support the proposal to allow certain business properties to opt-out of Council's waste management services and charges from 1 July 2023, because the council's kerbside service is more suitable for domestic waste than dealing with the wide range and nature of business waste. We agree that charging for a service that the council cannot deliver is inequitable and that the case for maximising council's ability to influence waste behaviour is also irrelevant when the service required cannot be delivered by the council, such as to certain business properties.

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Fees and Licences and Charges

Outdoor Dining Licencing Costs.

Waive Outdoor dining licences costs for the coming year. This is currently in place until April 2022 and has been well received by businesses. Reducing the cost to business for the next 12 month period would provide benefits for their recovery and support the city centre's vibrancy.

At minimum, we ask that the cost for City Centre Outdoor Dining Licence is reduced to be more equitable with other parts of the city. City Centre businesses pay nearly 45% more for their outdoor dining licences than their counterparts in other parts of the city such as Takapuna and Newmarket.

Investing in Safety

Issues around crime and safety are seriously impacting the City Centre. There is a growing focus on a coordinated approach to supporting safety actions in the city centre through the Task Force on Alcohol and Safety but this has not moved as fast or effectively as required. Ongoing collaboration between Auckland Council and Heart of the City with the CityWatch programme is important and must also deliver strong results for the investment.

We would like to see more investment and resource dedicated to tangible outcomes for the city centre.

Events, Activations and Incentive Schemes

As other cities have done, we would like to see investment into spending and voucher schemes to encourage visitation and spending to help drive city centre recovery. We ask that consideration be given to supporting events to be put on easily in the city centre including waiving the cost or put in place a cost exemption scheme for city centre events permits for activity that will contribute positively to its recovery.

Transport incentives: Access remains a barrier to visitation and people are likely to be wary about returning to public transport. We would like to see transport incentives to support the return of workers, students and visitors and there is also an opportunity to leverage off major events and other occasions across the year. This could be an Auckland funded continuation of the government funded half price fares that will be place until 30 June 2022. We would also like to see weekend and evening parking offers to utilise parking capacity, along with a review of parking costs in line with AT's demand-responsive pricing strategy, which would mean parking charges are reduced when occupancy is lower than an 85% average. 5) Rating Policy Proposals

Our overall feedback is that what businesses need most from Council is a fair, transparent and stable approach to rates. As we said above, we are concerned about the un-signalled and compounding effect on businesses of increases in rates and charges.

Business differential

While we appreciate that the business differential is being reduced to 25.8% by 2037/2038, fundamentally, we do not accept that a business differential should be applied to rates especially for reasons that "businesses are better able to manage additional costs than residential properties" or because "businesses can claim back GST and expense rates against tax." These reasons do not justify the business differential, particularly for small businesses who make up most businesses in Auckland.

Accommodation Provider Targeted Rate

As the border reopens, we believe it is critical that Council fund 'visitor attraction and events to support local businesses recover from the COVID-19 crisis. Having no funding for this in the Annual Plan 2022/2023 is short-sighted. We also disagree with the position that a link must be made between the funding of visitor attraction/events and a specific funding mechanism (such as the Accommodation Provider Targeted Rate ('APTR')). We believe a more secure and sustainable source of funding needs to be found which takes account of views of the accommodation sector, for example through the return of GST to Auckland or a levy at the border on international visitors.

Watercare's increase in charges

To support an increase in capital investment, Watercare's board of directors resolved to increase water and wastewater tariffs by 7 per cent. This follows an increase of 7% for the current financial year. We are concerned about these substantial increases in water charges from Watercare and question whether they are a priority or reasonable. City Centre Targeted Rate (CCTR)

We are supportive of the ongoing collection of the CCTR and the benefits this delivers to the City Centre. It is essential that transformation projects consider the needs of both business and their customer and supplier needs. Given the ongoing impacts on the city centre due to the lack of customers, Auckland Council must take a leadership position by encouraging offices workers back to the city centre.

(6) Regional Fuel Tax underspend

Our preference is to introduce initiatives that both manage demand and raise funding equitably as soon as possible, balanced with investment into affordable and more frequent public transport in order to effect sustainable behavioural change. We understand, for example, that technical work on the 'Congestion Question' project that has been examining the potential to apply congestion charging in Auckland is progressing.

Conclusions

As we enter another very uncertain year, especially for small and medium sized businesses, we ask the Council to consider carefully their needs in its approach to the Annual Budget 2022/2023 and provide more focus on growing the economy and supporting local businesses.

HEART OF THE CITY'S SUBMISSION TO
AUCKLAND COUNCIL ANNUAL BUDGET 2022/2023

By email to:
akhaveyoursay@aucklandcouncil.govt.nz

Introduction

Heart of the City (HOTC) is the business association for Auckland's city centre, representing the interests of businesses and property owners. We are committed to the growth and success of the city centre as a vibrant, accessible, safe and welcoming urban community.

The focus for our submission includes a response to the key questions asked by Council as well a request to support initiatives to support city centre recovery.

This Submission will cover:

(1) The impact of COVID-19 and Supporting City Centre Recovery
(2) Climate Action Targeted Rate
(3) Budget Pressures and Service Prioritisation
(4) Waste Service Standardisation
(5) Rating Policy Proposals
(6) Regional Fuel Tax underspend
(7) Vacant Land

(1) The impact of the COVID-19 & Supporting City Centre Recovery

The city centre delivers nearly 20% of Auckland's GDP and employs 15% of its workforce (as of February 2020). It has been disproportionately and severely impacted by COVID-19, with many of our businesses now facing the worst situation in the period of the pandemic. Revenue has been severely down in comparison to the rest of the region for the duration of the pandemic. Whilst this should have improved by the time this Annual Budget is introduced, the significant economic scarring that has occurred will mean it will take some time for businesses and the city centre to recover.

This presents a risk to the city centre and the benefits expected from the significant public and private sector investment at least in the short term if there is not adequate investment to support its recovery.

We are also facing significant challenges around antisocial behaviour and crime. And outside

of COVID-19, access, ongoing construction and safety remain key barriers to visitation. It is also imperative that good cleaning standards are maintained.

We acknowledge there have been initiatives from Auckland Council, such as the dropping of fees on outdoor dining licences and the offer of rates postponements, that have supported businesses. We ask for more focus in the Annual Budget 2022/2023 on measures Council can take to assist businesses to support recovery.

Whilst we do expect that the City Centre Targeted Rate will be able to support elements of this plan, we do not expect this will be able to cover the investment requirement to offset the significant impact that has occurred.

Melbourne, Brisbane and Sydney have all made significant investments (through Federal and State Governments) to stimulate demand and encourage visitation, now with an increasing focus towards the weekday. This includes dine and discover vouchers to large scale scavenger hunts, to transport incentives and outdoor dining initiatives. Wellington has also recently announced Pandemic Response Plan, and whilst not to the same scale that is needed in Auckland, the principle of supporting recovery is noted. This has included:

- $1 weekend parking
- free outdoor dining permits
- a significant reduction in licencing fees

The city centre needs tangible and immediate actions to support its recovery. We consider this could also be supported with the following measures.

Fees and Licences and Charges

Outdoor Dining Licencing Costs.

Waive Outdoor dining licences costs for the coming year. This is currently in place until April 2022 and has been well received by businesses. Reducing the cost to business for the next 12 month period would provide benefits for their recovery and support the city centre's vibrancy.

At minimum, we ask that the cost for City Centre Outdoor Dining Licence is reduced to be more equitable with other parts of the city. City Centre businesses pay nearly 45% more for their outdoor dining licences than their counterparts in other parts of the city such as Takapuna and Newmarket.

Investing in Safety

Issues around crime and safety are seriously impacting the City Centre. There is a growing focus on a coordinated approach to supporting safety actions in the city centre through the Task Force on Alcohol and Safety but this has not moved as fast or effectively as required. Ongoing collaboration between Auckland Council and Heart of the City with the CityWatch programme is important and must also deliver strong results for the investment.

We would like to see more investment and resource dedicated to tangible outcomes for the city centre.

Events, Activations and Incentive Schemes

As other cities have done, we would like to see investment into spending and voucher schemes to encourage visitation and spending to help drive city centre recovery.

We ask that consideration be given to supporting events to be put on easily in the city centre including waiving the cost or put in place a cost exemption scheme for city centre events permits for activity that will contribute positively to its recovery.

Transport incentives: Access remains a barrier to visitation and people are likely to be wary about returning to public transport. We would like to see transport incentives to support the return of workers, students and visitors and there is also an opportunity to leverage off major events and other occasions across the year. This could be an Auckland funded continuation of the government funded half price fares that will be place until 30 June 2022. We would also like to see weekend and evening parking offers to utilise parking capacity, along with a review of parking costs in line with AT's demand-responsive pricing strategy, which would mean parking charges are reduced when occupancy is lower than an 85% average

(2) Climate Action Targeted Rate

It is critical that Auckland's public transport system in Auckland is well connected and efficient and that there is ongoing investment in electrification to reduce emissions. We believe there needs to be a focus on improving connections across the region to the city centre given it is a significant place of employment.

We are opposed to introduce a substantial new targeted rate of 2.3% through an Annual Plan. This was not signalled through the Long-Term Plan 2021/2031 especially at a time when businesses are facing tremendous uncertainty from the ongoing pandemic, world events and inflation.

We also have additional comments about the current proposed CATR:

- Council must work to reduce, stop or reprioritise services, not simply add more cost to business.

- We do not accept that a business differential (even at 25.8%) should be applied to this targeted rate if introduced. We accept that business should contribute its share for climate action, but not through a differentiated targeted rate.

- If there are unspent funds associated with the Regional Fuel Tax that are unallocated, we would be supportive of the Property Council of New Zealand's position that should this rate be introduced that Auckland Council pursue an Order in Council that would allocate the unspent funds associated with regional fuel tax to the proposed package, which would reduce the overall cost of the proposed targeted rate to ratepayers.

(3) Budget Pressures and Service Prioritisation

Our overall feedback is that while we support the general direction taken in the Long-Term Plan 2021/2031 for an investment of $31.8 billion over the next 10 years, we ask that this investment be further prioritised.

We are concerned about the compounding effect on businesses of an increase of 3.5% in general rates, an increase of 7% in Watercare's wastewater tariffs and the proposed additional Climate Action Targeted Rate of 2.3%.

To reduce these impacts, we believe Council should focus on:

- keeping rates and charges increases to a minimum (e.g. not introduce the CATR); and
- making deeper cost savings and further prioritise services (including the services of CCOs); and then
- prioritising capital investment and defer non-priority investments;

On the proposal for a set of criteria for supporting decisions to reduce, stop or change some services, we agree with that proposal and ask it be applied urgently. In our view, any current services that don't align to agreed key priorities and don't deliver tangible value should be reviewed immediately. We also suggest criteria asking whether an activity needs be done right now or can be deferred. If it does need to be done right now, then do it once and do it right.

(4) Waste Service Standardisation

We share concerns about the high rates of waste generated per person in Auckland and agree that the Council can play a role in influencing waste reduction. We also support the goals of the Auckland Waste Management and Minimisation Plan 2018, including to minimise kerbside household waste.

We support the proposal to allow certain business properties to opt-out of Council's waste management services and charges from 1 July 2023, because the council's kerbside service is more suitable for domestic waste than dealing with the wide range and nature of business waste. We agree that charging for a service that the council cannot deliver is inequitable and that the case for maximising council's ability to influence waste behaviour is also irrelevant when the service required cannot be delivered by the council, such as to certain business properties.

(5) Rating Policy Proposals

Our overall feedback is that what businesses need most from Council is a fair, transparent and stable approach to rates. As we said above, we are concerned about the un-signalled and compounding effect on businesses of increases in rates and charges.

Business differential

While we appreciate that the business differential is being reduced to 25.8% by 2037/2038, fundamentally, we do not accept that a business differential should be applied to rates especially for reasons that "businesses are better able to manage additional costs than residential properties" or because "businesses can claim back GST and expense rates against tax." These reasons do not justify the business differential, particularly for small businesses who make up most businesses in Auckland.

Accommodation Provider Targeted Rate

As the border reopens, we believe it is critical that Council fund 'visitor attraction and events to support local businesses recover from the COVID-19 crisis. Having no funding for this in the Annual Plan 2022/2023 is short-sighted.

We also disagree with the position that a link must be made between the funding of visitor attraction/events and a specific funding mechanism (such as the Accommodation Provider Targeted Rate ('APTR')). We believe a more secure and sustainable source of funding needs to be found which takes account of views of the accommodation sector, for example through the return of GST to Auckland or a levy at the border on international visitors.

Watercare's increase in charges

To support an increase in capital investment, Watercare's board of directors resolved to increase water and wastewater tariffs by 7 per cent. This follows an increase of 7% for the current financial year. We are concerned about these substantial increases in water charges from Watercare and question whether they are a priority or reasonable.

City Centre Targeted Rate (CCTR)

We are supportive of the ongoing collection of the CCTR and the benefits this delivers to the City Centre. It is essential that transformation projects consider the needs of both business and their customer and supplier needs. Given the ongoing impacts on the city centre due to the lack of customers, Auckland Council must take a leadership *position* by encouraging offices workers back to the city centre.

(6) Regional Fuel Tax underspend

Our preference is to introduce initiatives that both manage demand and raise funding equitably as soon as possible, balanced with investment into affordable and more frequent public transport in order to effect sustainable behavioural change. We understand, for example, that technical work on the 'Congestion Question' project that has been examining the potential to apply congestion charging in Auckland is progressing.

Conclusions

As we enter another very uncertain year, especially for small and medium sized businesses, we ask the Council to consider carefully their needs in its approach to the Annual Budget 2022/2023 and provide more focus on growing the economy and supporting local businesses.

SUPPORTING CITY CENTRE RECOVERY

#8729

1808

HEART OF THE CITY™ AUCKLAND

Heart of the City

2.30pm

Viv Beck and Tania Loveridge

- Today will focus on impact of covid on city centre and opportunities to support recovery through AB
- Shared graph outlining impact of covid outbreaks on geographic area spend.
- Remember city centre is about 19% of Auckland's GDP (and 7% of NZ).
- The overall environment has been challenged. We have about 3 million fewer people each moth. Over 130000 people still working from home. With omicron we are experiencing a lockdown in all but name. Also experiencing a growth in crime.
- Access, ongoing construction and safety remain key barriers to people visiting the city centre.
- Noted example of America's Cup in 2021 showing the importance of events in bringing visitors to the city.
- There is a coordinated recovery plan for the city centre underway (including Eke Panuku, Auckland Unlimited, HotC, council and private stakeholders).
- Vital that we attract our key segments back, students, tourists, workers, residents to ensure a vibrant city.
- Request is to support a plan for city centre recovery with initiatives funded by the annual budget.
- More suggestions for initiatives for a coordinated recovery plan include:
    - Extend waiving fees for outdoor dining licences
    - At minimum, reduce these costs to be equitable to other parts of the city
    - Events and activations – investment in
    - Reducing fees for events
    - Transport incentive fund
    - A review of parking costs – parking costs reduced went occupacy reaches a low point
    - Task force on alcohol safety
        - Request more investment on allocated resources to action the solutions
    - Ongoing collaboration with City Watch programme
    - Do not support a return of Accommodation TR
    - Must build a strong city narrative to support Auckland's tourism and advocate for central govt investment.
- We will be part of the BID submission and will be submitting a written submission which covers more areas.
- Question from Cr Pippa Coom (Waitematā and Gulf): In terms of the city centre recovery programme, potlically we haven't had any visibility of that plan yet, are you happy with that process as it is underway?
    - Viv: yes we are. We've been working with impacted businesses closely to identify needs. It's still being developed, but we wanted to signal that there is a collaborative effort happening.
- Question from Cr Sayers: are you able to elaborate on the city centre recovery plan?
    - Viv: we don't have figures to share right now. We will share as soon as possible.

- Question from Cr Hills: How much is it a bit of a 'wait and see' with behaviour in these analyses?
    - Viv: We certainly felt more optimism in early-mid January before Red. We're hearing different things. There definitely will be people keen to get back into the city centre after the peak. Sadly, I think we will see closures as the environment is seriously challenged. Equally, we are going full steam ahead in terms of programmes that we can drive to bring people back. Want to make sure that we can alleviate hindrances business are experiencing now as soon as possible.
- Second question from Cr Hills: What are HotC's ideas to raise income for council?
    - Viv: We need lateral thinking of what we can do that has revenue attached to it. E.g. HotC perfectly willing to sit down with AT to find a solution – encourage more use and generate revenue.

Annual budget 2022/2023

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details

Organisation (if applicable): St Mary's Bay Association

Your local board: Waitematā

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal?

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures?

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change?

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system?

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)

Standardise the opt-out rules for residential and lifestyle properties with between two and nine units

Standardise the opt-out rules for non-residential properties

Apply a minimum base charge to every separately used or inhabited part of a property

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right?

Tell us why: See attachment for more info

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information

The personal information that you provide in this form will be held and protected by Auckland Council in accordance with our privacy policy (available at **aucklandcouncil.govt.nz/privacy** and at our libraries and service centres) and with the Privacy Act 1993. The privacy policy explains how we can use and share your personal information in relation to any interaction you have with the council, and how you can access and correct that information. You should familiarise yourself with this policy before submitting this form.

SMBA presentation to Waitemata Local Board 22 March 2022

The consultation topics

- Focus on WLB's proposal's for 2022/2023 rather than Council's regional topics (separate submission to Council)

- Matters of interest for SMBA
  - Climate/environment
  - Local parks – Pt Erin pool
  - Community facilities - Leys

Climate/natural environment:

- Walking path on northern side of Pt Erin park
- Re-visiting tree planting in St Mary's Road

Improving local parks/facilities – Pt Erin pool

- Acknowledge that the playground is on the agenda but this is ‘tinkering’
- An important facility not only for the Western Bays but also for wider Auckland community
- Time to put major renewal on the agenda

Community facilities – Leys Institute

#8756

- Acknowledge and appreciate the Board's support for refurbishment
- SMBA is part of the Project support group
- SMBA keen to see earliest possible re-opening
- Although a Western Bays icon, it has heritage value for the whole of Auckland – and must be funded with that in mind
- Maintenance remains an imperative

What we are seeking from the Waitemata Local Board

1. Inclusion in the Board's plans for 2022/2023 (planning and budget) of such of these works as are within the Board's remit
2. Commitment to lobby Council for allocation of funding for works that are outside the board's remit.

Annual budget 2022/2023

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Support (prefer rates-funded system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support all priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Your feedback

1. Climate action targeted rate

To meet our climate ambitions, we must reduce transport emissions in Auckland by 64 per cent by 2030. To address the climate emergency and contribute to this climate goal, we are proposing spending an additional $1.045 billion (including government funding and other sources) over the next 10 years on a series of targeted actions to reduce emissions and support adaptation. This includes:

- improving transport choice for over one million Aucklanders who will be living within 500 meters of new or improved bus services
- moving to low-emission ferry services
- increasing provision for walking and cycling, and
- increasing tree canopy cover in communities that need it most.

We propose introducing a climate action targeted rate (separate from general rates) to pay for $574 million of this over the next 10 years. We estimate the targeted rate to be about $1.12 per week (about $58 a year) for the median value residential property.

What do you think of this proposal? Support

Tell us why:

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Support

Tell us why:

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Support

Tell us why:

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? Do not support (prefer PAYT system)

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	Support
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	Support
Standardise the opt-out rules for non-residential properties	Support
Apply a minimum base charge to every separately used or inhabited part of a property	Support

Tell us why:

5. Local Boards

Waitematā Local Board

Tell us your thoughts on our proposed priorities for the local board area in 2022/2023 – have we got it right? I support most priorities

Tell us why:

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

What do you think of this proposal? Support

Tell us why: Climate change has already become a global problem. Hopfully by implementing this new propoasl, Council can sovle this problem.

2. Managing on-going budget pressures

Due to on-going impacts of COVID-19 on our revenue, and growing inflationary pressure, we are forecasting a budget shortfall of $85 million for 2022/2023 compared to what was budgeted for in the 10-year Budget 2021-2031. Some of the budget pressures would be ongoing.

We plan to use a range of levers to manage next year's, and on-going, budget pressures, including:

- using the Government's Better Off support package funding
- changing the timing of some capital spending
- implementing cost reductions in the form of efficiency savings and potential reduction in some services
- keeping the previously agreed general rates increase of 3.5 per cent for 2022/2023
- considering the sale or long-term lease of additional non-strategic assets as required.

What do you think of our proposal to manage on-going budget pressures? Do not Support

Tell us why: This would only encourage more people not to work but getting the unemployment benefits.

3. Prioritising operating spending

We need to prioritise operating spending to help manage on-going budget pressures. We have proposed a set of criteria to be used when making decisions about cost reductions, including those that could reduce, stop or change some services.

What do you think about how we propose to choose which services to reduce, stop or change? Do not Support

Tell us why: I think it is very important for Auckland Council to improve its services.

4. Standardising waste management

Question A

Over the next three years we are moving to standardise waste services and charges across Auckland. Currently, some of Auckland pays for rubbish collections on their rates bill, and other parts of Auckland buy bin tags or bags to get their rubbish collected.

We are proposing a move to a region-wide rates funded refuse collection service with a choice of three bin sizes to accommodate different household needs, as this is the most cost-effective, equitable and climate friendly option to achieve waste minimisation outcomes.

This proposal is instead of the current Auckland Waste Management and Minimisation Plan approach to move to a region-wide pay-as-you-throw (PAYT) system (e.g. tags and bags).

What do you think about our proposal to move from a planned region-wide PAYT system to a region-wide rates-funded rubbish collection system? I don't know

Tell us why:

Question B

In addition to how we fund region-wide kerbside rubbish collection, we are also proposing to standardise waste management services and charges across Auckland.

This includes standardising which properties can opt out of council waste services and charges.

What do you think about these proposals?

Standardise the opt-out rules for residential multi-unit developments (10 or more units)	I don't know
Standardise the opt-out rules for residential and lifestyle properties with between two and nine units	I don't know
Standardise the opt-out rules for non-residential properties	I don't know
Apply a minimum base charge to every separately used or inhabited part of a property	I don't know

Tell us why:

5. Local Boards

6. What is important to you?

Do you have feedback on any other issues, including:

• Local board decision-making over local community services (page 53 in the consultation document).

• Tūpuna Maunga Authority Operational Plan 2022/2023 (page 53 in the consultation document).

• Changes to fees and charges (page 53 in the consultation document).

Or is there anything further you would like to give feedback on?

Important privacy information
