Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Better public transport network; pay as you go without many concessions... ok to have discounted rates for frequent travellers and senior citizens

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#3627

Rationalise bus routes; get rid of the ones which are hardly used by public. Improve connectivity by adding bus routes to and from new suburbs

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

2a. Is there anything you would spend more on?

improving public transport network

2b. Is there anything you would spend less on?

wasteful spending on unnecessary projects and admin staff

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

#3627

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

6a. What do you think of these proposals?

#3627

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	

#3627

Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year. Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#3642

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

#3668

Probably cut back on trying to implement a lot of new developments like housing and upgrading city centre. There is a need to repair and upgrade the existing infrastructure first such as pipes and repurposing industrial areas and just regenerate out of what we currently have - particularly in the suburbs further away from city centre because those communities need it most.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I love the idea of capped weekly public transport passes - where once you hit a number of uses of public transit in a week, it will become free. This incentivises people to use public transit more, particularly those that go on regular commutes, I for example a university student, use public transit a lot to get around because it saves fuel and parking money. So I use it a lot and it does cost me some money at the end of the day, therefore the capped pass would help.

The planned initiatives are good, however, in a way it is not that relevant now because there are more pressing issues - but some cycleways should be placed particularly in areas where people are seen cycling or areas identified that could get a lot of cycling usage - since it is a more sustainable mode of transport, it's important to have it pushed out so that at least moving forwards people have the option to cycle.

2a. Is there anything you would spend more on?

Public transport particularly making travel from South/East Auckland to Central City faster and easier (I live in East Auckland and it takes me 1.5hrs just to get to city and another 1.5 hrs back) It's quite ridiculously long. And even by car in peak traffic it takes over an hour to get into city.

2b. Is there anything you would spend less on?

Nothing really, transport is probably the area where most of the budget is spent towards.

3. Which options do you support for the North Harbour Stadium?

#3668

Consider redeveloping the stadium precinct

Tell us why:

I think selling some land away to private entities won't be bad, could generate some economic growth and provide new services. But I'm not too sure either, not too familiar with the North Harbour Stadium

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

I think the proposal seems to be justifiable - from my understanding, it is a pool of money that helps relieve things such as the Cyclone Gab incident and like a financial management method. Not too sure what the downsides of transferring away AIAL would be though.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

I think the lease would be a better financial option for the council. There's not really too much benefits with continuing council operation as the council needs money towards the Auckland Future Fund which may be a more future proof option. Particularly with the uncertainty of climate change impacts in Auckland.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

#3668

Tell us here:

Mentioned in answer above, for better future proofing.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

no

5a. What option do you prefer for Captain Cook and Marsden wharves?

I don't know

Tell us why:

I'm not too sure about having more waterfront residential on the wharf because of sea level rise and cost of living in Auckand. It will be ridiculously expensive residential that most people can't have the luxury to afford. Having a public space there could be nice but the waterfront is already quite nice as it is. If you were to repurpose it soon, it shouldnt be a high priority.

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

This terminal is a bigger area, so I guess something that provides public benefit could be nice? But again not a huge area of priority.

6a. What do you think of these proposals?

increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#3681

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Increase entry fees into public pools/gyms .. increase ground/court fees to local sport clubs during winter. Weekend traffic is horrendous in suburbs where parents are ferrying and watching their kids play multiple winter sports. - esp where there is no parking!

Speaking of which- increase car parking building fees and see if can introduce parking fees into shopping mall carparks. More people might use buses

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Scrap the food bins - overall usage across Auckland does not justify the cost of maintaining.

Cut out the waste of paper in brocherss and 2nd page of rates notices sent out quarterly.

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#3894

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Howick

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Pursue the Govt to change the revenue model from relying 100% on rates collected based on property values. Widen the source by changing to a flat amount for each household/property and a % on taxable incomes collected by IRD and paid to Councils on pro-rata basis. this would give a wider and more equitable income to councils

Support most of the proposal

Tell us why:

Public Transport is key

2a. Is there anything you would spend more on?

optimise the transport network and use of dynamic lanes to reduce congestion

2b. Is there anything you would spend less on?

- bus network in the city centre.
- investigate the feasibility of a low-cost bike ferry connecting Northcote and the city centre

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

Too many stadiums. Rather need more car parks to encourage people to use Public Transport (Bus).

I live in East Auckland and have been watching the very low standard of housing being built for the last few years.

These 2-3 story houses that now replace a single home are known as Hot Boxes (no trees for shade, no green to soak away flood water, only concrete boundary to boundary. These will become slums in a very short space of time as no thought or

planning has been given to ensuring there are shared communal spaces with room to grow, plant and play.

The council continues to call out its focus on minimising flooding, yet infill houses developments are going in a completely opposite direction. I understand that most of these homes have had no council inspections. Having viewed many of these builds, there is a high percentage that will flood in heavy rains.

Stop spending on local requests - speed bumps, raised pedestrian crossings - who walks??? Consider car free days!!! Force people try public transport on their car free day or pool with others.

2a. Is there anything you would spend more on?

More roundabouts to control traffic on very busy roads - Murphy's Bush Road/Redoubt Road - how a roundabout would ease the congestion.

2b. Is there anything you would spend less on?

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Put a train line in from East Auckland to panmure

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less Mail Drops and marketing.

#4254

Make new home builders cover a larger portion of the burden their housing creates on other networks (roading, water, waste etc)

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

I live in East Auckland and getting across or out of East Auckland at peak times is ridiculous. And the peak time window is widening.

2a. Is there anything you would spend more on?

Trains...but ones that actually work

2b. Is there anything you would spend less on?

Bus lanes. Speed cameras.

3. Which options do you support for the North Harbour Stadium?

Dividends. Its money for free, the airport is not going away and if you sell you'll never get it back

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Private partner ship will end up ripping off consumers. As long as the ports are generating profit and paying dividends the money is good. Just make sure we're not overpaying or wasting money there.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

The port makes money and serves a purpose. If we're going to take away from the port we should move the whole operation to somewhere near a train line.

#4254

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

No need for it. Sounds like a stupidly expensive way of making the ports less efficient and reducing capacity when we have a growing population who need to import more goods at better prices.

6a. What do you think of these proposals?

Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Remove speed humps on major roads, revert speeds back to normal. Vision Zero is completely ideology. The real chance of achieving zero deaths is zero. Redirect money being wasted on this into real benefits for the community.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#4361

Real effective monitoring of costs and progress on works for services through out the area, both with budgets and with work in progress. The city is a mess, you have projects occuring with workmen sitting around doing nothing. Cones and signs everywhere with nothing happening. "Safety" vehicles often multiple, "protecting" workers who are actually not working on the roads - just waste, waste, waste.

Public transport - if you are going to keep building bus only lanes that are hardly used at least allow heavy trucks to share the lanes and reduce the chaos that is our transport system.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Public transport will never work well unless it is very cheap, reliable and widespread. You achieve none of these bur especially on reliability.

Raised pedestrian crossings - yes please, good bye.

Cycleways - unless you have solid evidence that they pay their way and are beneficial to the majority not minority then stop immediately.

2a. Is there anything you would spend more on?

Stream lining council operations.

2b. Is there anything you would spend less on?

Anything that doesnt benefit the majority of people in the city or visiting.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Start shaving staff. Stop wasting money on glossy reports. Stop bleating about climate change when you have not provided any evidence to back your (incorrect) assertions.

#4372

2. What do you think of the transport proposal?

Don't support any of the proposal

Tell us why:

Only provide transport that is not supported by the rate payer. Just because we own homes, we shouldn't have to subsidise other peoples rides.

2a. Is there anything you would spend more on?

Other

Tell us why:

Sort of proceed. Again, your options steer responders in certain directions. For instance, you claim the floods were the effect of climate change when there is zero evidence of this being so. For instance, Council allowing building of state housing in a

flood plain (the maps are on your site). Then it floods when it rains. Surprise, surprise. No one ever could have predicted that. Don't undertake major projects unless users actually pay for the project (from beginning to end). What is to stop Councillors from continuing their "you vote for my pet project, I'll vote for yours" in this fund? Just seems like a giant slush fund for Councillors to waste more rate payer money.

4b. Which option do you prefer for the future of Port of Auckland?

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Council needs to do more with less funding and live within its budgets, just like any other enterprise. Concentrate on fixing roads properly and efficiently, not 19 people standing around while one works.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#4389

Pushing more money into public transport that doesn't connect is pointless and that's why very few people use the system. All I see is empty buses and the raised crossing strategy is counter productive, cancel it immediately.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Empty busses, non-connecting services, ferry's that don't run, no warning, no communications, despite the systems and opportunities to do just that.

2a. Is there anything you would spend more on?

Yes, rubbish collection and recycling at commercial properties. Getting our roads working properly, while reducing the number of workers doing nothing. There is simply too much inefficiency and all Council can think of is to increase rates. I'm fine with council staff having a well paying and safe job, but for God sake do something constructive while you're there. Head in the game, not in the clouds.

2b. Is there anything you would spend less on?

Spend less of Libraries, who the ***** using them anymore. Raised crossings at ridiculous costs, High Council staff payments, inefficient systems,

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Tell us why:

Well the current management is clearly not working. Get it sorted and make us proud.!

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

#4389

Proceed with the proposal

Tell us why:

Low hanging investments like airport shares should be used for emergencies, like we are facing now. Poor management by the previous administration during Covid have taken out many options. We need business like responses, based on sound engineering practices that work. Get it done.!

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

The Port under Council control has proved problematic historically. Lease the land, but let the port operators manage the assets and allow Council to distance itself from the embarrassment and dangerous activities currently happening.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

Historically we have under invested in our future. Its time to set sensible goals, not unrealistic foolishness.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

I'm a fan of self insurance, but first make sure all Council assets are compliant with regulations, thereby reducing any potential issues.

#4389

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Council would then have 35 years to plan and prepare for making this area the envy of other cities and allow Auckland to develop positively.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

As above.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to	Do not support

the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	Support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Council needs to be business like and efficient in its operations. Less talk - more action

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Focus should be entirely on public transportation and cycleways - that's the only way that will actually improve traffic. (Building bigger roads will just create more traffic and worse jams/bottlenecks, a concept the coalition can't seem to grasp.)

2a. Is there anything you would spend more on?

Public transport

We have such a potentially-great waterfront area, and other similar cities (Sydney, Vancouver, Singapore) have vibrant waterfront areas - ours is eaten up by a port.

2. What do you think of the transport proposal?

Support most of the proposal

I don't support raised traffic pedestrian crossing or anything else that reduces the flow of traffic from the advertised speed limit. They are the reason for congestion and nose to tail accidents.

Also raise all previous reduced speed limits back to their original speed limits.

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Some rejuvenation of local areas

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Remove the organic recycling program

#4420

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

There is rampant overspending in most transport projects and huge over engineering

2a. Is there anything you would spend more on?

Just get what we have operating reliably and efficiency before you do anything else

2b. Is there anything you would spend less on?

No more raised crossings or cycleways

Stop the disruptive works associated with the CRL as its destroyed the atmosphere of the city and ruined businesses.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

Tell us why:

North Shore needs some type of venue but needs be utilisation

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Transport	Do more
Water	As proposed
City and local development	Do more
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Come on Auckland we are shameful. An embarrassment. We have water water water everywhere. No Eastern Motorway. Why aren't we utilising the ferry service. Half Moon Bay, Mission Bay, Beachlands, Giff Harbour. There are so many spots that are very overpopulated and rely mostly on roads. Let's have a big investment in ferry docks and

#4574

ferries. This is far cheaper than roading and much faster. East Auckland Howick etc past Pakuranga is bottlenecked with more and more intensification and no new roads. We have access to the water. Let's utilise this. A ferry at Pakuranga as well so many ways to make this vast ocean surrounds the skinny strip that is Auckland let's use it more efficiently. Ferries can be hydrofoil so they are fast, there could be water taxis. I also think let's utilise our port! That should be our version of the opera house. Move the port and do one of these amazing proposals to make a world class tourist attraction.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Get better workers on projects. There are so many occasions we drive by and they seem to always be standing around. It's as if they make

The projects take longer so they get paid more. Perhaps pay them more for performance based outcomes. That will end up costing less.

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

As above we need to improve ALL of our transport. We need an Eastern motorway come on! We need more trains we need to utilise the ferry services we are an embarrassment to the citizens here who want it and to the world who looks and laughs.

2a. Is there anything you would spend more on?

Ferries, and Eastern Motorway that links out to Maratai to free up more land. A second harbour crossing. And get it done fast! We don't have 30 years by then we will need a third harbour crossing etc it must be prioritised.

2b. Is there anything you would spend less on?

Environmental, cultural

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Move the ***** port!!!! Make it more functional. Move it to so where that can generate a new city around it. Create a new hub. Get it out of Aucklands City eye line it's shameful.

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

Do it faster than 15 years. Port is not that profitable make it into a tourist destination and see a billion dollar return vs \$300m

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>

<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Support</p>
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	<p>Support</p>
<p>Re-introduce recycling charges for schools.</p>	<p>Support</p>

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off

8. Do you have any other comments?

Some options for a motorway system out east. Look at all that land that could be freed up to reduce housing crisis. This motorway could be prioritised. Could have a train system a park and ride and 5 lanes either side. Make it future proof. Make East Auckland a testing ground for how initiative effective roading actually works. When combined with multiple public transport options and also do the ferry watch this side of Auckland grow boom and flourish. See housing improve. Also, please consider offering an initiative it's being done overseas. Contribute to developers who offer affordable housing options. Perhaps they get 50% of their costs covered initially then it gets paid back out of profit. An infrastructure investment is required by developers who build large subdivisions. There is a lot more that could be done. For example, you could make a proposal that for every state house site you have. A developer can purchase the rights to develop the site to make 5-6 homes of which two are kept for state use and the others sold. The developer must sell them to a first home buyer or low income person. And the developer perhaps doesn't pay to purchase land they just get the profit to do the build etc. This takes cost away from council. And still increases the number of state homes. I mean this might not be it but, there is more that could be done in almost every area.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

Environment and regulation	As proposed
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More community funding in areas where there has been a significant increase in housing development

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#4594

Not necessarily to pay less, but I think council needs to take a different approach to housing and make developers include at least 1 garage and 1 off street parking in new developments as the streets are clogged with cars and in many areas of Auckland (especially East Auckland) there is not sufficient public transport options to use as an alternative to driving our cars. When building mass housing with minimal off street parking it needs to be in areas which have easy access to public transport, shopping and community facilities eg: the new BTR apartments in Sylvia Park are a good example of this.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Auckland needs to get moving and our public transport is unreliable and not accessible for many Aucklanders to use eg: if I were to use public transport to get to work (16km) I have to catch 2 buses (no trains in East Akld) and walk quite a distance which would take approx 2hrs each way - I can drive to work in 45min so no incentive for me personally.

2a. Is there anything you would spend more on?

Please get the Eastern Busway finished its been going on too long and it will make a significant difference to traffic flows for people that can use the buses (currently the buses are sitting in the same gridlock that the cars are stuck in)

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No, I would prefer that council focus on maintaining core infrastructure and services to keep the city running within what we are currently paying.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#4835

Special interest group projects and events that only benefit a small portion of the Auckland's population. If these sorts of things are valuable enough then they can financial support themselves through user pays or private funding.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I agree with reducing the self-imposed congestion caused by over the top traffic management, over priced pedestrian crossings and cycleways that reduce road capacity. Public transport fares should not be capped at the expense of the ratepayers.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Cycleways, speed limit reductions, judder bars and other things which reduce road capacity.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

Tell us why:

If we own an asset like this it should be used to its potential and adapted, if required such that it can be used effectively.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

#4835

Tell us why:

If it is ridiculous for so much money to be tied up in non-performing assets when the money can do so much more for use if wisely invested. I like the idea of diversify the investment out of Auckland so that a major disaster does not wipe out the investments right when they would be needed to support recovery.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

It seems likely that a private company will more efficiently be able to run the port.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

A split between both funding council & investing. We all put a bit of our money away into Kiwisaver for the future, even though we could use that money today.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

#4835

Tell us why:

I like the idea of making that area more accessible / enjoyable to the public

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

I do not like the idea of reducing port capacity (and hence increasing the number of trucks on the roads), however a private operator of the port may be able to increase or maintain capacity within the available remaining area, with the application of new technology or redevelopment of the area and/or reclaiming more land. Doing something to benefit to waterfront area with Bledisloe could change the whole outlook of that area of Auckland for the better.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support

reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	I don't know
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	I don't know

7c. What do you think of the Upper Harbour proposed priorities for the 10-year budget 2024-2034?

7d. We will prioritise investment in a Detailed Business Case for a new multi-purpose library facility in Albany, however given the financial constraints faced by Auckland Council we would like to explore alternate options to fund any budget shortfalls.

We want to hear your views regarding the local board investigating options to sell land or exploring the introduction of a targeted rate to enable investment in building a new multi-purpose library facility in Albany (noting that there will be a robust public consultation process on any sale of land or the introduction of a targeted rate following investigation of viable options).

Which of the following options do you support?

Do you have any other thoughts or ideas on potential options to fund budget shortfalls associated with building a new multi-purpose library facility in Albany?

City and local development	As proposed
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Speed bumps . these are often necessary but sometimes there are just too many on a short section of road.

#5008

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

2a. Is there anything you would spend more on?

Looking and flow patterns at busy times and allowing more lanes at these points.
Could be around about or lights. One area at I think it is Sparton Road Takanini under the rail subway entering Great South Road A bottle neck because the is only on lane at the lights and if that was doubled for just 3 car lengths(plenty of room to do this) it would allowing twice as many cars to get through

2b. Is there anything you would spend less on?

Raised crossings

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

This is an important investment for the city and it allows the council to have a say. If it is sold then just another important asset would be owned by overseas investors . More

dividends going off shore. This has been a wonderful investment for the " COUNCILS" Pity North Shore Papakura and Auckland Councils sold earlier stakes in the Airport .It was Manukau City under Barry Curtis who had the vision to not sell but increase their stake to over the important 10 %. Mayor Brown has the idea to put it into a fund so they would easily be sold. Clearly dividends have been in short supply recently but the airport cam to a grinding holt because of Covid Brown used the idea that the airport was generating no returns but the interest on debt was still there.. The Airport was closed !!! Little money being made and no dividend . I note they are are about to pay their first dividend since Covid in a few weeks

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Continue to operate the Port which is very important. Consider a listing (as before)on the NZX. Sell 20% of the holding to the public giving Aucklanders an option to buy them. Then get some excellent directors and a CEO etc and run it as Tauranga Port is.

Then when things look up and returns improve sell another 10 %. If returns improve the next 10% could be worth another 20/50 % more per share than the earlier sale. always keeping the important 50 -70%. See Vector/ the Power companies for a good example

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#5008

Keep and operate the port . List it on the NZX and get it moving.

Papkura sold the rights to manage the council water years ago to an overseas investment group. They got \$14 million . Looked great at the time but \$14 million today! A nice return for them I would say.

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

In council ownership Wayne Brown would be first with the idea to sell it. The public benefit sounds ideal until the dollar signs light up and the thought of a smaller rate rise is suggested

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#5056

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Focus on core services. Stop/Reduce spending on needless projects/events that are outside of core services. Funding events whether they be sporting or culture should be curtailed in these difficulty financial times. Such events should be funded by Business sponsorship and/or Government (after all it is the latter who benefits from the GST intake not the Auckland Council).

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

The wasted millions spent to date by AT on virtually unused cycle highways and walkways is an indication how out of touch AT is. Barely a week goes by of news of another AT stuff up!

Priority needs to be given to raining in AT's apparent lack of empathy for vehicle drivers

2a. Is there anything you would spend more on?

N/A

2b. Is there anything you would spend less on?

Number of employees !

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

Vastly uneconomic stadiums need to be redeveloped for better community return.

Propping up such operations year after year is not an option in todays environment.

#5077

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

Support is on the basis that both the Auckland Airport shares and port lease form the initial base of the proposed fund.

Such a fund has much to offer as it spreads the risk rather than having ownership of only two assets.

Also as history has shown Councils/Governments have a poor record in having total ownership of business operations.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

See comments above.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

With the up front lease payment placed in the Future Fund and presumably the ongoing lease payments it would seem logically that part of the funds annual return would be directed towards Councils operating cots?

#5077

4d. Do you have any feedback on any other part of the proposal?

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

Support on the basis that Council also considers what financial return can be obtained with the overriding consideration the public benefit.

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Support local board having some control/input into Local Board/ Council funding in but specifically and in general in works in their area.

Have never supported the CCO concept which was a flawed model from the start. CCO operations to date have proved that original assessment and should be changed!

IMPORTANT:

As a ratepayer there is considerable frustration with the lack of action to obtain any relief from ongoing rate increases which are now above the rate of inflation, This cannot continue and Auckland Council must lobby Government for this ratepayer burden to be shared. Ideally with Government (as in Australia) sharing part of the GST intake with Councils (for a start the GST on rates to be paid to Councils').

Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Speed up existing transport project so they can complete more quickly and the public can benefit from the improvement and less disruption overall.

Improvement in traffic signals at dangerous intersections

#5119

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Do not start road resurfacing project unless it's directly affecting safety of road users. Do not start new cycle way project. Cycling is not a practical or affordable transport option most times. Cycle ways only benefit a very small portion of the population but most of the time has negative impact to road traffic. These are definitely not essential and we can't afford them right now.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Agree with focusing on completion of existing project and stopping some expensive yet non essential initiatives. Overall it's a good balance to ensure what needs to be done is getting done and not much more.

2a. Is there anything you would spend more on?

Speed up existing large transport project to get it done quicker, so less disruption overall, and before cost goes up and on going traffic management cost as the projects drag on.

2b. Is there anything you would spend less on?

Unnecessary road resurfacing project where nothing is broken. Transport improvement limited to just the special housing areas. I think we can barely afford the project that are essential to the majority.

3. Which options do you support for the North Harbour Stadium?

Investment and the returns of the fund would be a vital way to pay for project.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

I m not sure council group is the most suitable organization to run the port efficiently, should just focus on what we are good at and leave the port to private enterprise and we can just benefit from it financially.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Maintenance of existing reserve walkways and paths.

Build and/or refurbish decent toilets around popular beaches and reserves, AND maintain them. Stop building cheap options that are not coping with demand.

#5155

Pick up the rubbish on the side of motorways.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

1. Less raised pedestrian crossings, wasting money.
2. Less traffic control measures, manpower and less orange cones, particularly in quiet suburban streets where it's not necessary. Complete waste of good resources and money!
3. Less orange cones! Who ever is supplying cones to council are making a fortune!

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Public transport is necessary as the city grows, but do the basics first. Like current bus, ferry and rail services.

2a. Is there anything you would spend more on?

Yes, get more ferries going across the gulf.

Put in a congestion tax/cost.

2b. Is there anything you would spend less on?

Less consulting and more doing.

3. Which options do you support for the North Harbour Stadium?

Change the operational management

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Council is not an investment company or business. Homeowners need to get their own insurance and council must ensure their own insurance is adequate to cover future problems.

4b. Which option do you prefer for the future of Port of Auckland?

Other

Tell us here:

Lease the operation but, use the money to improve council services. Council is not a bank or investment fund!

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#5166

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do less
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

less land tax, the land and property tax increase sharply, making our daily costs more unaffordable. In the last several years, Auckland Council Water Care and AT haven't made any maintenance projects or new infrastructure to our community in East Tamaki, I have paid lots of time and money to fix my house or property without any council contribution, so the results are that I have to contribute more but own less. I

#5168

strongly recommend the council pay less for lots of not useful projects or new infrastructures.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

less pay in the public transport system, less money for infrastructures. more contributions for taxpayers and people's daily costs.

Cut at least 30% of the stuff in Auckland Council and AT and Watercare, Because I know the council does not need that much stuff, only take 2 hours work and get 8 hours pay..... return the money to all Aucklanders.

2. What do you think of the transport proposal?

Do not support most of the proposal

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I expect council to do what is good for the long term without impacting the natural and green environment around us which, due to many approved building consents, allow the destruction of our natural environment without replacing these with the same. This affects our environment and therefore climate.

#5285

Also, for new suburb developments, if you will continue to allow double parking or any form of parking on these roads, make sure that the developer or council will pave roads wide enough to allow continuous flow of traffic without one lane having to give way to the oncoming traffic.

Plus, if council continues to allow houses to be built with 4 or more bedrooms, councils require the appropriate parking spaces to be provided off street!

I don't see why the above recommendations will require extra payment from end users and extra cost to council.

Kindly be reminded, that your office is designed to be of service to the end users and not to the organisation therefore, to meet the financial requirements of these proposals, I strongly propose that you start with reviewing your pay scales and drastically reduce them!

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Listen to the concerns of the end users and not those parties with vested financial interests in council spending more and more money.

And when projects are proposed, allow the end user access to the proposed budget and bids from interested contractors, consultants, etc. this will allow us, the payers to directly be involved with the proper use of our hard earned rates money.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

All I read in the above proposal is - pay more. Not a very attractive solution to the issues at hand.

2a. Is there anything you would spend more on?

No. Use the amount. Of money you already charge rate payers and work within that frame work. When you take away all the bureaucratic red tapes, you will be surprised at the amount of money you will save.

#5285

2b. Is there anything you would spend less on?

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

All I read is spend - spend - spend. Work within your current money that you are able to collect and make it work. Start by making salary cuts and I'm sure you will be surprised at the amount you will save and be able to divert to better use.

7b. What do you think of our proposed priorities for Maungakiekie-Tāmaki in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support community groups and community-led activities by continuing to provide local community grants.	
Building the capacity and capability of local community and sporting groups towards long-term sustainable funding models and independence through our strategic partnerships programme.	

#5314

Empowering community groups and organisations to deliver community events through sustainable funding models.	
Collaborate with mana whenua and neighbouring local boards to protect and restore our waterways through Tāmaki Estuary Environmental Forum and Manukau Harbour Forum.	
Encourage our rangatahi / youth and community to be leaders in climate action. For example, through programmes like Tiakina te taiao and Ope (biodiversity and climate action education programme in schools), Love Your Neighbourhood (environmental volunteer grants) and Songbird programmes (community pest control and biodiversity initiative).	
Support business associations to continue supporting local businesses and ongoing growth, development and liveliness of town centres, including assisting Onehunga Business Associations proposed BID expansion.

Fairly Important

More specifically, what do you think of each priority we've listed above?

Complete the seismic strengthening of the Remuera Library	Fairly Important
Progress the Meadowbank Community Centre development.	Fairly Important
Assess the reactivation of facilities at Tagalad Reserve and work towards providing access for the community.	Fairly Important
Continue to work with our many community volunteers to eradicate plant and animal pests in our natural environment, including at Pourewa Valley and in our many beautiful parks and urban forests, and support other environmental activities, for example, the Environmental Forum.	Fairly Important
Continue local initiatives to enhance neighbourhood connections and increase safety.	Fairly Important
Fund and support local events to showcase our spaces and benefit local residents and businesses.	Fairly Important
Continue to engage and better support our diverse communities and organisations, such as Auckland East Community Network and Youth of Ōrākei.	Fairly Important

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Stop wasteful spending. Replace inefficient structures (unnecessary reporting hierarchies)causing ineffective spending with efficient stream lined efficiency. This would generate cash to do more.

Sort out Auckland Buses: - run small size bus for non peak times and non high use times. A one size fits all approach is out of date. Become agile in your thinking.

#5330

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop the spending on speed bump pedestrian crossing.

Stop infill housing if existing roads, parking, water, waste infrastructure not able to support this major influx of new households.

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Sort out Auckland Transport. The road safety mechanisms as a component cost of contracts are out of control, overly expensive and the safety process is over engineered. How many work related injuries occurred in the past? and what cost, how many today and what cost? What is a sensible balance? common sense approach.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

Tell us why:

We are a small city. How many stadiums are required? Decide which ones. Spend money on efficient transportation of people to and from stadiums of choice.

The Pink Concert people management was a disaster! Why does this keep happening?

#5330

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

Is central Auckland the best place to operate a large port? should it be a satellite port? What truck/container traffic could be diverted away from SH1 if Auckland's main port was elsewhere? Develop the waterfront and attract tourists to the city. More cruise ships.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

If I had confidence that the Council could operate efficiently (cost effective), I would go for the second option. Part of the Auckland Future Fund should include a new container port close to but outside of central city with freight rail links for efficient transport and removal of trucks from the road.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

We need to plan for tomorrow- not continuous focus on the short term.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#5330

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

where is the comprehensive and compelling plan to make the change? If the space is made available now, what will Auckland council do with it? Where is the 50 year plan? Where is the 100 year plan for the city (I have seen 100 year plans for a province in China - a minature to scale proposed development of cities, roads, rail, nuclear power, hospitals, schools, playing fields, etc)? These are strategic assets and need a much longer timeline to ensure future councils and elected members stick to an overall plan to improve the city.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

happy to consider this when we have a clear idea of what the Bledisloe would be used for and what the alternative options for the Port are.

6a. What do you think of these proposals?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Increase their speed when building buildings.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#5371

Building public parks or playgrounds.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Auckland is doing great with the transportation part and I mostly support every project it's done or planning to do.

2a. Is there anything you would spend more on?

Trains and build subways and stations

2b. Is there anything you would spend less on?

Maybe buses because Auckland's busses are already as convenient as it needs to be

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

#5371

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Do not support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Support</p>
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	<p>Do not support</p>
<p>Re-introduce recycling charges for schools.</p>	<p>Do not support</p>
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	<p>I don't know</p>
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and

7b. What do you think of our proposed priorities for Howick in 2024/2025?

Not Important

More specifically, what do you think of each priority we've listed above?

Review and refresh the Howick Heritage Plan.	Fairly Important
Review and refresh the Howick Tourism Plan.	Fairly Important
Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Fairly Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	Very Important

#5385

Develop a community-led climate action plan.	Very Important
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. 7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

#5394

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Howick Local Board Priorities

7b. What do you think of our proposed priorities for Howick in 2024/2025?

#5394

Fairly Important

More specifically, what do you think of each priority we've listed above?

Review and refresh the Howick Heritage Plan.	Fairly Important
Review and refresh the Howick Tourism Plan.	Very Important
Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Very Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	Very Important
Develop a community-led climate action plan.	Fairly Important
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. This work may lead to establishing a new business association and possible new Business Improvement District (BID) programme.	It is incredibly important that local governments take action on the current climate crisis.

Tell us why

They seem to benefit the community as a whole

residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	I don't know
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	I don't know
Re-introduce recycling charges for schools.	I don't know
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	I don't know
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	I don't know
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year. 7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and

Transport	Do more
Water	Do more
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Support more of events that have local and global impact. Support events that have the potential and ability to generate benefits(economically or socially) for Auckland Council. Make Auckland more of an attractive place to invest in.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#5464

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I would support most of the proposal as increased transport infrastructure leads to better connected networks and ease congestion. Our emissions will also be lowered in this process reducing congestion on roads.

2a. Is there anything you would spend more on?

making public transport free or a cap on spending on daily fares.

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

With the redevelopment of the stadium it would allow the public to have a greater impact based on current and future needs. Future proof the area to allow for growth.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and

other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

7c. What do you think of the Hibiscus and Bays proposed priorities for the 10-year budget 2024-2034?

I do not support most priorities

Howick Local Board Priorities

7b. What do you think of our proposed priorities for Howick in 2024/2025?

Not Important

More specifically, what do you think of each priority we've listed above?

Review and refresh the Howick Heritage Plan.	Not Important
Review and refresh the Howick Tourism Plan.	Fairly Important
Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Not Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	Not Important

#5633

Develop a community-led climate action plan.	Not Important
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. This work may lead to establishing a new business association and possible new Business Improvement District (BID) programme.

7c. What do you think of the Howick proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

There are no libraries, swimming pool available in flat bush area. There are public transport issues as lot of kids are going to City for tertiary education and it takes hours in public transport to get to the city (using two bus services and a train). There is no free parking in train stations for the children to park and go to city.

All the industrial land in this area (Flat Bush) is being consented by the council to develop as commercial. That is the reason Ormiston Town Centre is not fully utilised and empty most of the time.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#5715

Cultural events should not be funded by the Council, as should the Gay parades, movies and concerts in parks etc. Nice to have, but if you cant afford them cut. Councils should stick to core business, and not deviate.

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

Public transport is not reliable and punctual. A reliable service which should not be so heavily subsidized by the ratepayers.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Change the operational management,Other

Tell us why:

Change the Management, and change to a more commercial operation.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

Tell us why:

Sell AIAL shares and reduce debt. Climate change is not scientifically proven, and tends to be cyclical weather patterns. Council should be very wary of land they have

#5715

approved for building, and uninsured parties should not be reimbursed by other ratepayers. People should take responsibility for their own insurance exposure..

4b. Which option do you prefer for the future of Port of Auckland?

Other

Tell us here:

Retain underlying council ownership of port land and wharves, and lease th operation of the port for a period of about 35 years, Use the upfront payment to reduce council debt, and subsequent payments as well..

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

Reduce debt.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Future Fund is a nice to have, but with the state of Councils Debt, think the Council should focus on reducing its debt level first and foremost.

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Ports generate income which Auckland Council desperately needs. Container ships and cruise ships generate income.

#5715

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

As above.

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. 8. Do you have any other comments?

Local Board Members should be required to live in the areas they represent. Some try to represent their areas, but from my experience some do it purely for the remuneration, and not for the best interests of their community.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Costs are too great.

Raised pedestrian crossings are a waste of rate payers money.

Buses are not being used enough to warrant the costs

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I think that we pay enough. Auckland Council needs to look at why it is spending so much to get things done. There is clearly a lot of wastage that can be eradicated without putting up rates or cutting services.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#5782

Giving contracts to companies who then contract out to others - we need to do away with middle men.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Why can you not put a local levy on petrol to maintain the fuel tax?

2a. Is there anything you would spend more on?

Please refer to my previous answer. No rate increase and no cuts to services.

2b. Is there anything you would spend less on?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Please stop selling off public assets. Once we have sold everything, the money will run out again - what do we have to bargain with after that? Please cut out wastage in expenditure.

#5782

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Selling off the Ports of Auckland will see more of our city go in to, no doubt, foreign hands, resulting in more NZ money going overseas, just like with our banks.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

The council should be concerned with serving the people of the City, not making a fast buck for a tiny handful of investors or for shareholders only.

4d. Do you have any feedback on any other part of the proposal?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No, I don't like the council to do more in this financial crises situation for Aucklanders.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Yes, reduce the huge amount of wages that's been paid for by poor rate payers.

#5819

2. What do you think of the transport proposal?

Don't support any of the proposal

Tell us why:

NZ is one of the most countries in the world that people don't use it's public transport. Most of the time buses driven around almost empty. Take a look on the cars at most of our road were you'll notice its mainly occupied by only one person and 2 as maximum.

2a. Is there anything you would spend more on?

At this time were everyone is cadestrophicly suffers from unbelievable food, petrol· rates, mortgages, power & water bills, there is no reason whatsovere to spend more on any subject. Actually it should be vise versa.

2b. Is there anything you would spend less on?

Yes. Huge and unbeleivable city council wages, travel allowances, promotion and so many other things.

cheaper parking rate. Parking rate increase every year to encourage people to use public transport, however, the public transport in Auckland is really bad and unreliable - never on time, and stops randomly without notice. This does not encourage people to use more public transport. Especially from East/South to CBD takes so long on a rural route and time is precious. I would like to see more bus lanes implemented along with other any other measures to make public transport more efficient. Its time we had more cycle ways and priority measures to make walking and cycling more appealing and safer.

Cycleways and better footpaths.

Light rail down Dominion Road - surface delivered not tunneled.

Better transit from the west should also be a priority with better ferry services. At the moment there is very poor ferry service from Half Moon Bay.

2b. Is there anything you would spend less on?

We don't need more roads such as the East West link and Mill Road highway.

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide

no - we dont get value for money on the money that's given to Council so why would we want to give more?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#5998

I dont think we need flower gardens at intersections - just have grass and mow it.
We're not wealthy enough as a city at the moment to do the pretty stuff - just get the basics done.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Your language above is unclear as to what's actually planned. I would like to see less work on unnecessary things eg. raised pedestrian crossings. These are nice to have when we have enough money but are not appropriate at the moment.

I think we have cycle ways on the major routes so I would not spend more on this at the moment, again we dont have the funds.

We have spent huge amounts on public transport. I would continue with the projects that will improve options for main routes, not smaller routes. Again we dont have the money for changes which wont generate much of a return.

2a. Is there anything you would spend more on?

I support toll roads in public-private partnership and more user pays roading.

2b. Is there anything you would spend less on?

Its like being on a really tight household budget. You dont buy flash stuff, you stick with the basics where there is significant value for the spend.

I dont think we need to own the Ports. It would likely be better run under private ownership but the captial would need to be used for new captial projects and not swallowed up in opex.

We need funding to cover opex so if we retain the asset we can spend the income on opex.

Just horrified at the thought of 2 weekly rubbish collections for red bins. 4 to 5 people only in my street use those useless scrap bins. The stench on fridays is already awful, not to mention maggots and other microbes generating after 2 weeks. As a walker and a composter, I would say based on visual evidence, scrap the food bins and keep weekly collections.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

A total ban on the public sale of fireworks and introduce public displays only.

Improve front line staff services and remove all the deadwood that slows all council processes and services down.

#6196

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Reduce the top heavy staff levels. Introduce time in motion studies of all staff to meet daily KPI's. Introduce streamlined council services and processes to eliminate time wastage in all areas. Thin out the top levels of management and make the key executive staff earn their money by delivering on public available KPI's.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Get rid of the excessive road cones and reduce the requirements of the current use of excessive road management and cones to what is essential with a lower their of local contractors responsibility to identify works and provide both warning and safety management. Step back 20 years for a start.

Remove the severe road humps and introduce more passive road calming devices like chicanes to slow traffic.

Reduce spending on cycle ways and only install them in known pinch areas which are dangerous to cyclists.

The current use of large cycleways that are poorly used but causes a detrimental effects to traffic flow should be stopped. Open up Nielson street to improve traffic flow and redirect the cyclists to an alternative route

2a. Is there anything you would spend more on?

Yes removing debt.

2b. Is there anything you would spend less on?

Yes Cycleways and these hugely costly bus lanes.

3. Which options do you support for the North Harbour Stadium?

Change the operational management

#6196

Tell us why:

Once lost these type of facilities are gone. Change the operational management and open it up for a greater diversification of public use.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

You have already squander the first sale and the ratepayers who owned the shares like Manukau and Auckland central have not seen any benefit. Auckland has experienced its worse sewage blowout into the harbour and this is a disgrace and yet no monies from the last sale of AIAL shares were used to resolve this problem. Likewise Manukau has not seen any benefit from the part sale of its shareholding. Do not sell any more and they will like all blue chip shares give the council a return on investment that should be used to support the wards of Auckland central and Manukau and not squandered on Council debt caused by both inefficiencies and incompetence.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

When the was a public/Council ownership of the Port the POAL returned good dividend. Then the Council forcibly brought out the public shareholding and it has gone down hill ever since. The Council now has a huge investment in the port so hold the Port Company to acc out like any owner and demand a respectable return on investment and if the management and board cannot deliver change the ***** management and Board! As the owner exercise some ownership control by ensuring the best and most appropriate board members with a port knowledge are appointed

#6196

and hold them to account. Likewise when the CEO is appointed by the board maintain some oversight to ensure he or she is the best person for the job. Then hold them to account and if they can't deliver - remove them. Commercial reality!! While you are at it do the same with AT.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

I am of two minds. First it could go straight into council coffers and be spent. But with so much inefficiency in council at present I am not confident we can trust the current council management or council. So by investing it in the AFF we have a second tier of controls and potential earning capability with payments to well founded and explored council projects.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

If you keep taking land off the POAL you are effectively reducing its earning capacity so in effect are robbing peter to pay paul. If you want POAL to remain profitable leave the current land foot print alone. If anything do something useful and develop Captain Cook as a cruise terminal and remove Marsden and open up Bledesloe for larger trading ships.

5a. What option do you prefer for Captain Cook and Marsden wharves?

Other

Tell us why:

As stated in 4d. Or develop Captain Cook west as a Cruise terminal and east and Marsden redevelop for domestic shipping. or remove Marsden for a large deep water berth for bulk shipping, but the port must retain the ability to look after both the domestic feet and island traders.

#6196

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

If you keep taking land off the port you are effectively reducing its capacity to earn and therefore the Council as the owner would be incompetent. You don't bite the hand that feeds you. Instead hold the POAL management and Board to account to deliver.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	I don't know
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Do not support

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Having public facilities is important for everyone so they can go outside and enjoy Auckland.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#6411

Development should be focused on suburbs rather than inner city where it will be of more practical use.

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

Investment into public transportation is important so that people will be more likely to use it. It currently is too expensive and takes too much time so driving is more cost effective.

2a. Is there anything you would spend more on?

Tolling on high use roads which would require a higher budget for maintenance.

2b. Is there anything you would spend less on?

Public transportation fares.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

The area has become more residential or more park areas would be better than a stadium.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

#6411

Tell us why:

AIAL shares should be kept by the council as Auckland Airport is an important facility in the city. This give some voice if something were to happen to it.

The fund is an interesting idea but it should have input from Aucklanders as to how it should be managed.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Leasing comes with risk particularly if it is leased to someone who has different visions. It could end up costing money in the long run.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

The bulk should be used to fund services but a portion should be used for the fund.

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and

Review and refresh the Howick Heritage Plan.	Fairly Important
Review and refresh the Howick Tourism Plan.	Very Important
Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Fairly Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Better efficiency around infrastructure construction and traffic management

#6457

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

I support the prioritisation of public transport and more reliable roads. Moving more people around the city more efficiently is crucial to the productivity of Auckland

2a. Is there anything you would spend more on?

Ferries and relevant infrastructure. The water is the quickest and most reliable form of transport that we have got, and massively under-utilised

2b. Is there anything you would spend less on?

Traffic management. The number of cones and hired personnel to unnecessarily manage small amounts of traffic is ridiculous

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

Auckland has too many stadia for the population, and the land is better used for something else

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

#6457

Under a fund manager shares are more likely to be invested wisely and therefore gain a better return

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

The amount of money this would generate is significant, and without selling off the asset

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

Future cost increases that can be covered

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

Prime land that should be used for better public use

#6457

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

The increased costs of having to transport goods into Auckland and the extra traffic on the roads

6a. What do you think of these proposals?

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

#6535

Keeping the ports of Auckland in council hands should be top priority.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

Makes sense to keep it as it is

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

If it is making money at a profit leave it as it is.

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

Makes sense if it is operated properly by good money making ideas.

A lot of resurfacing of minor roads is unnecessary. Our local roads (Clipper Place and John Gill road etc) were examples. The roundabout on Alexander St / Advene was a complete waste of money and very expensive.

2. What do you think of the transport proposal?

Support most of the proposal

We need to reduce traffic congestion at peak times.

2a. Is there anything you would spend more on?

We need an expert body to look at workable and effective incentives for Work from Home say 2 days per week.

8. Do you have any other comments?

Many new housing developments are really bad. There are no gardens, no trees, just detached houses very close to each other. No privacy. No play areas for children. This is really bad and puts massive pressure on local water infrastructure. There are much better ways to build new housing which allow for green spaces. And use semi-detached housing rather than waste the space between houses when they are all detached and only a very small distance between them.

The bigger picture is that NZ needs to develop other cities not just massively grow Auckland in an largely uncontrolled manner! Otherwise there will always be massive traffic congestion, it will never be solved.

Also - can we please have accountability and a proper cost benefit analysis for major projects? For example the City Rail Loop is massively over budget (by Billions!) but really how much benefit will it bring? There should be a cost benefit analysis done and the results shared in a clear and transparent way.

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

No

#6612

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Cycleways should go ahead

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

I think AC must keep shareholding of AIAL as the short term benefit of sale would not last forever

4b. Which option do you prefer for the future of Port of Auckland?

#6612

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Review and refresh the Howick Heritage Plan.	I don't know
Review and refresh the Howick Tourism Plan.	Very Important

#6612

Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Very Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	Fairly Important
Develop a community-led climate action plan.	Fairly Important
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	Do less
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do more
Economic and cultural development	Do less
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Skatepark and wheeled play areas as well as activations

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#6739

environmental *****, maori outcomes

2. What do you think of the transport proposal?

I don't know

Tell us why:

So much money is spent on cycleways but not on skate spots and areas. kids get bored cycling round, why not incorporate pump bumps into the side

2a. Is there anything you would spend more on?

Community Engagement: Skateboarding is a popular activity among youth and young adults. By providing skate facilities, councils can engage with this demographic and provide them with a recreational outlet that aligns with their interests. This can foster a sense of community and belonging among skaters.

Physical Activity and Health: Skateboarding is a physically demanding activity that promotes cardiovascular health, balance, coordination, and muscle strength. By investing in skate facilities, councils can encourage physical activity among residents, contributing to overall public health and well-being.

Crime Reduction and Social Cohesion: Skate parks provide a designated space for skaters to practice their sport safely. By offering such spaces, councils can reduce instances of skateboarding in prohibited areas, which can lead to conflicts with property owners or law enforcement. Additionally, skate facilities can serve as hubs for social interaction, fostering positive relationships among skaters and other community members.

Economic Benefits: Well-designed skate facilities can attract visitors from neighboring areas, contributing to local economies through spending on food, transportation, and other goods and services. Additionally, skateboarding events and competitions hosted at these facilities can generate revenue for the community.

Urban Revitalization: Skate parks and facilities can serve as catalysts for urban revitalization efforts. By transforming underutilized or neglected spaces into vibrant skate destinations, councils can enhance the aesthetic appeal of neighborhoods and attract investment in surrounding areas.

Youth Development: Skateboarding promotes skills such as perseverance, creativity, and problem-solving. By providing dedicated facilities, councils can support youth

#6739

development initiatives and offer opportunities for personal growth and skill-building among young people.

Tourism and Cultural Exchange: Skateboarding is a global phenomenon with its own subculture and community. By investing in skate facilities, councils can tap into this cultural movement and attract visitors from different regions, fostering cultural exchange and tourism.

Environmental Sustainability: Skateboarding is a relatively low-impact activity that does not rely on fossil fuels or produce significant emissions. By encouraging skateboarding and providing facilities for it, councils can promote environmentally friendly forms of recreation and transportation.

Overall, investing in skate facilities can yield numerous social, economic, and health-related benefits for communities, making it a worthwhile consideration for councils looking to enhance the quality of life for their residents.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More green space / shared space development.

Move the Port and redevelop the whole area into a world-class waterfront to match our incredible harbours.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#6740

Less fringe stuff - concentrate on stuff that helps more people

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

We don't need to waste money on raised crossings and similar.

Maximise public transport at peak times but don't waste money on near empty buses etc at other times.

Don't allow developers to build stuff without off-street parking.

2a. Is there anything you would spend more on?

More efficient smart traffic lights.

Increasing the range of bike lanes, so they connect better, especially out East which is poor compared with other parts. Do these efficiently though, not wasteful.

The ability to use a credit card to pay on a train or bus makes sense.

2b. Is there anything you would spend less on?

Spend where it is practical, not ideological eg. redoing speeds everywhere where it will make little impact but slow down the city.

Fringe stuff.

Too much beauracracy.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

Auckland has an amazing harbour resource and waterfront but it is very underutilized. We could do so much more with it that would enhance Auckland a lot.

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

Make the waterfront vibrant and something we can be so proud of. Think darling Harbour or even when we visited Stonetown, Zanzibar - so alive and amazing.

Remove the organic waste collection, it's a waste of resources.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Stopping some previously planned initiatives, such as some raised pedestrian crossings and cycleways - there should be an impact evaluation, of how many percentages of the population are needed for this facility vs other projects.

2a. Is there anything you would spend more on?

Concern mega projects like networking the national system like Germany or Singapore with train and subway

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Logical decision making regarding road works planning. Impact of short sighted application of Roundabouts and traffic lights and workers stopping traffic during peak hour flows defies belief.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#6902

Infill Housing. The infrastructure is not set up for Multiple dwellings where there used to be 1 or 3 properties. Additionally the complete use of the land for housing forces more cars to be parked on the streets making roads more dangerous for pedestrians and far worse congestion than there ever has been. Most households with people in their late teens and over will have multiple vehicles associated with the accommodation site. this MUST be taken in to account and less focus put on maximising smaller dwellings on smaller pieces of land with no Parking. We all know how poor public transport is, particularly in East Auckland.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

It does not take a genius to figure out how poorly implemented roundabout and traffic light planning has led to further congestion and frustration. Actually get out there and don't be afraid to remove previous poor decisions. STOP roadwork interfering at peak hour flows as well

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

DO NOT SELL AUCKLAND ASSETS - it is NZ's shame that we have allowed corporate raiders to come in and steal our assets only to turn around and charge consumers more for the privilege of using what we should have never sold. Auckland Airport and Port of Auckland should remain assets for the AUckland Rate payers.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

DO NOT SELL THE PORT OR RIGHTS TO OPERATE IT. This will lead to significant cost increases that will take the returns off shore. Increase port use fees and keep the asset and increased returns for the Auckland Rate payer.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

We need to improve the city and the way she functions. We need the return to be spent RESPONSIBLY.

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

No need to have cost of third party managing Council investments. With good management Port (and airport) can provide income directly for the Council

Lease would risk external party, probably an overseas entity charging extortionate fees and all profit going offshore which mean higher costs for NZ residents and making our international trade balance even more negative.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

This is good move providing multiple benefits.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

#7048

Need to improve port efficiency to support economic growth by using a private operator with scale of economies and avoid duplicating resources. Ports is an international business. Also to improve return on investments.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

The investment fund provides multiple benefits.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

These wharves no longer suitable for cargo operations and can be better used for other purposes.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

Need this area for future expansion and to sustain current cargo operations.

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Do not support</p>
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	<p>Support</p>

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through

Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

I am in favour of extending the train transport but not the eastern busway.

#7080

I have lived in East all my life and the buses seem to be mostly unused, the routes are difficult requiring a change at Panmure and are not helpful for an aging population. Even when buses are specific e.g. school buses, most of the high school pupils drive cars to school or are driven thereby parents.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

The bus routes need to be considered more carefully if they want all sectors of the population to use bus transport. Come and live in Howick West and you can watch empty buses driving around all day. Get smaller buses and make the routes more serviceable for the elderly and people without cars.

You have mentioned investing in a different type of ferry that is environmentally friendly but hardly any ferry services run because there are no drivers so I am not sure that that is a good investment.

2a. Is there anything you would spend more on?

Road surface upgrades to repair potholes and create quieter roads.

2b. Is there anything you would spend less on?

Eastern busway

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

#7080

Proceed with the proposal

Tell us why:

Only 11%, if shares are owned. The Auckland Future Fund seems a viable proposal.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

This seems the best option all round as it is a source of revenue for the council and doesn't affect rates so much.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

I don't know

Tell us here:

Both options have funding needs that benefit Auckland.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

#7080

Tell us why:

This is a vibrant area of the city and could be used more attractively than as part of the port.

The port operations would not be affected.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

Because increased rail or road shipments as a result of the transfer. Auckland is already congested, the southern motorway is particularly bad and if Port of Tauranga became the major port the southern motorway would be a nightmare.

This option will be more attractive when we have better intercity rail transport.

The beaches and waterways definitely need cleaning up as it is tragic that they are unsafe for swimming and that much of the cool marine life that I used to explore when I was a child has disappeared.

I do not support the idea of stopping the construction of raised pedestrian crossings. This is a stupid idea generate by the current Government and supported by the mayor. Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

no, who can afford extra at the moment

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#7147

Men and women leaning on shovels at the road side, less health and safety cones, also no more \$500,000 spends on useless speed bumps which just make everyone angry

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Yes, stop the raised crossings, make roads flow more for the people who don't work on bus routes

2a. Is there anything you would spend more on?

Walkways and cycle tracks are fantastic but they need to be in places people can cycle to work. Under ground power and water pipe replacement

2b. Is there anything you would spend less on?

Culture, the arts and anything that doesn't benefit the majority

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

#7147

The airport has always been a good investment

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

why sell your sole when you don't half to.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

Services are important to the community

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Sack all you AT people and re-employ the ones with common sence, stop paying huge wages to people with no practical experence.

(possibly, move the port of Auckland out of Auckland city, set up rail to ship from the new port to major hubs)

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

#7147

don't these areas need to be used for visiting passenger ships?

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

More specifically, what do you think of each priority we've listed above?

#7147

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

7b. What do you think of our proposed priorities for Howick in 2024/2025?

#7147

Not Important

More specifically, what do you think of each priority we've listed above?

Review and refresh the Howick Heritage Plan.	Fairly Important
Review and refresh the Howick Tourism Plan.	Fairly Important
Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Very Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	Fairly Important
Develop a community-led climate action plan.	I don't know
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. This work may lead to establishing a new business association and possible new Business Improvement District (BID) programme.	Why is it that when we paid our rates to the Howick council we could afford them, grass was mowed, rubbish collected and we lived in harmony. Since we joined Manukau then Auckland, rates have risen and work that used to be done without anyone complaining to make it happen always happened. Since being swallowed up by the monster things have gotten worse for our community. Rubbish bins removed, berms not being mowed, and general waste being changed to a two week cycle. Thanks Auckland Council for letting us down

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#7154

Literally everything outside of core services and responsibilities - infrastructure, waste management. It is simply absurd for your "pay less" proposal to be an INCREASE in rates for a DECREASE in services!!! If you cannot afford the niceties, you drop those. You don't cry poor and gouge ratepayers to fund the likes of unused cycleways and pointless art installations.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Great call on stopping building cycleways and RAISED CROSSINGS WITH TRAFFIC LIGHTS on any spare patch of road. These have their place, but that place is not "on all roads".

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

Yes - cycleways, new ferries, raised crossings (spend \$0), and reducing speed limits (spend money only to put them back where they were!)

3. Which options do you support for the North Harbour Stadium?

Other

Tell us why:

If no one uses it, is that because it is far enough out of the main centre of Auckland as to be unattractive as a major venue? If it is not financially viable, why pour more money in?

#7154

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

There is no need for an obvious "climate change" slush fund. This will inevitably be used for everything EXCEPT generating return (and therefore future rates relief) for Aucklanders. This is a borderline deceptive proposal on top of being pointless.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

Lease it to someone with a genuine incentive to turn a profit. The council Port today knows it has the ratepayers as a slush fund. No such arrangement should exist for a leaseholder, and therefore ratepayers will not be milked.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

This should not be applicable, as it is a no-brainer to lease the port operation.

4d. Do you have any feedback on any other part of the proposal?

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	As proposed
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Realign and reconstruct what is an unlit 3rd world & dangerous section of Chapel Rd between Stancombe Rd and Ormiston Rd, that has no footpath on either side of the roadway for pedestrians to use, and so they have to walk on the roadway and share the road with motor vehicles of all shapes and sizes travelling at often unsafe speeds. Pedestrians are taking their lives in their hands on a road in our Country's largest and most populist City, in the 21st century with more and more traffic and more and more pedestrians using this section of Chapel Rd it's only a matter of time before a

#7171

pedestrian having to walk on the roadway due to their being no footpaths at all - this is absolutely absurd and must be addressed with urgency or members of Auckland Transport maybe attending a Coronial Enquiry should a pedestrian be killed on this section of Chapel Rd

The realignment of and the remedial works that must be done with urgency to ensure that 21st Century street lighting is included in these works and that like the rest of Chapel Rd, has been totally ignored by Auckland Council and its CCO Auckland Transport and the Howick Local Board since November 2010 when Auckland Council took over the responsibilities of the former Manukau City Council that on 1 Nov 2010 ceased to exist!

This section of Chapel Rd must be realigned, curbed and channeled to ensure the road surface can't flood and that it remains in sound condition, and that surface water goes via proper 21st-century drains into the creek adjacent to this section of Chapel Rd between Stancombe & Ormiston Roads

This third-world section of Chapel Road must be realigned and end up with a pedestrian walkway that is attached to a footpath and that is attached to the existing Bridge, or Potentially a new bridge just before the connection with Ormiston Rd.

Chapel Rd between Stancombe Rd. and Ormiston Road must have 21st century street lighting like the reast of Chapel Rd has had for many many years!

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less talking and more doing! Auckland Transport has simply ignored and failed to address the repairing, realignment & construction of a public footpath alongside the new roadway of Chapel Rd, between the intersection with Stancombe Rd through to Chapel Rd!

Auckland Transport is all talk and very little do.

If A.T. stopped acting as a publisher of information and telling everyone how good they are, we could all get our suburb's issues fixed without delay!

Making Auckland Council's CCO, Auckland Transport, Operate with less staff and cap consultants remuneration to no more than the median salary of AT Managers in the area of work they work in.

2b. Is there anything you would spend less on?

Ridiculous Pedestrian Crossings that cost multiple thousands to install, if you added them all up we could probably pay off Auckland Councils Debt.

Go back to the standard Pedestrian Crossing instead of the 23rd Century multi 10's of thousands of dollars spent on Pedestrian Crossings, that do nothing more than the simple basic crossings all they really need is the ramp cut into the footpath for wheel chairs!

Less emphasis on public transport please. Many people can't use a bus yet all the improvements are for use of a bus/busway. There is a lot of people who cannot use a bus for whom this is no benefit, and is actually a hinderance.

2. What do you think of the transport proposal?

Do not support most of the proposal

Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	Fairly Important
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	Not Important
Develop a community-led climate action plan.	Fairly Important
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. This work may lead to establishing a new business association and possible new Business Improvement District (BID) programme.

A bit of an over-emphasis on environmental preservation, when the environmental condition (at least at face value) is looking really good

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do less
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Sort out east Auckland roads it’s gridlock every morning making people late to work, kids late to school and simply killing the souls of people trying to make a living. Not only that fuel is expensive and we sit in traffic just burning it up which is not good for pollution either

#7348

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop wasting tax payers money on constant restructures at Auckland council - and look at how much you are paying some of your staff it's ridiculous and well above what market is paying

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

We spend so much money on this and quite frankly east Auckland is a mess. Everywhere else has great transport to the city. There seems to be no planning with road closures and cones everywhere and certainly no priority of which areas need it the most. Instead of work all across Auckland why not fix east Auckland first and then look at other areas as at least they can get to work and school on time

2a. Is there anything you would spend more on?

East Auckland transport

2b. Is there anything you would spend less on?

Western rail thing that's been going on for years . Their buses are fine it takes 50 mins in peak hour to get to the city. But from east Auckland which is much closer takes 2 hours

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

Why are we spending money on this seriously let's get the basics and the foundations set in Auckland like transport from east Auckland

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.

<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Do not support</p>

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#7435

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

The stadium in its current form fills a need in the auckland market. Positioned as a smaller alternative to Mt Smart or Eden Park while maintaining mostly covered seating in its normal state, with the option for non covered seating for larger events. This allows a cost effective solution for smaller fixtures who dont have the budget to operate in a larger stadium. The corporate hosting facilities (Lounges) are one of 3 available function spaces on the north shore and by far the best equipped to handle corporate events during the week and weekends when no game play is happening

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do more
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	Do more

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#7681

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Reducing cycle ways will put more people on the roads, increasing their wear and tear and increasing traffic. Surely cycle lanes would support the greater health and safety of the community

2a. Is there anything you would spend more on?

No, we're probably fucked

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

Is the north shore community in the greatest need in Auckland right now?

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

AIAL shareholding in long term is likely unsustainable with the climate development.

4b. Which option do you prefer for the future of Port of Auckland?

#7681

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Get a god ***** light rail in....

Have a look at what actual world leading cities are doing (Tokyo, Hong Kong, New York etc) god I'm sick of transportation in Auckland - i'm early 20s, have a degree, and would love to hang around here but transportation is forcing me out.

#7695

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less poorly thought out traffic lights (causing more congestion), e.g. in front of Pakuranga Plaza as of this year.

Should've put in a roundabout like cmon. I could put one in myself for 10% the cost lol

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Prioritize road works at night.

Cut the excess BS with traffic control, workers strolling around obviously not caring of the bigger impact.

Prioritize cycle highways (not replacing existing highways obviously) through out Akl, reduce congestion that way.

2a. Is there anything you would spend more on?

A plane ticket out of here.

In honesty, having actual traffic engineers take the role of Minister of Transport instead of some political lackey who cannot even comprehend the importance of their role.

LIKE ARE YOU ***** KIDDING ME WITH THE NEPOTISIM - the guy has a god ***** business degree..... PUT A QUALIFIED & EXPERIENCED ENGINEER IN THE ROLE MADE FOR THEM.

NEW ZEALAND IS SUCH A SLOW DEVELOPING COUNTRY. its become such a global backwater.

2b. Is there anything you would spend less on?

WOF, why oh why is this such an expensive useless nightmare.

3. Which options do you support for the North Harbour Stadium?

#7695

I don't know

Tell us why:

not informed enough from this context

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

Who wrote this? Like seriously?

Point 1. "protect the value of the council's major investments"

All the above bullet points are fluff and nonsense, theres no real meat here. What the ***** are the councils major investments, shouldve listed them.

I feel this entire poll is looking to confuse people submitting. Look how lack luster 4a is. How do you expect an accurate answer to an inaccurate question.

Essentially you ask, "Should Auckland Council continue spending money on Auckland Council things..." - nope. Give me back my tax dollars if this is all you have for me. You must be jesting

4b. Which option do you prefer for the future of Port of Auckland?

I don't know

Tell us here:

Who gets the other percentage - who is paying up front the 2.1 billion?

Tell us that and we'll do our own research on their motives and then you'll get a half honest answer from me.

#7695

These questions are one-sided and scummy. Do better please. Sick of living in AKI with this kind of Council and Leadership - thought yall supposed to be here for the people, not padding yourselves.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

I don't know

Tell us here:

As above

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Nope

5a. What option do you prefer for Captain Cook and Marsden wharves?

I don't know

Tell us why:

"However depending on the alternative use of the site, this could provide some significant future financial benefits for the council."

What are these god ***** benefits that you mention here. WHAT ARE THEY?

WHY DONT YOU PUT THEM ON THIS POLL??

ARE YOU TRYING THAT BLUNTLY TO PULL THE WOOL OVER PEOPLES EYES?

No more god ***** road traffic

5b. What option do you prefer for Bledisloe Terminal?

First point should hyperlink what the rate increases are being spent on, otherwise you are just attempting to guilt pollers. What a joke, cant believe i bothered to answer this poll. maybe someone who has half a moral compass will read my comments and get inspired to do something.

Cut the ***** consulting out.

Hunter S. Thompson would off him self again if he saw the state of the current world, let alone NZ's echo chamber of a council & various govts.

RE: Long Term diff strat. Why the ***** would money rich big businesses (rather than small homegrown ones) NOT pay general rates?

Are you blatantly asking me if I support big corpo having more free rides, and lumping the damage on the average joe? No sh7te, always make big corpo pay. God knows how much other things they get away with.

the state of morals in this world is shocking.

You should give me text boxes under each option, instead of one big one here. Now you have to manually read my rage and assign it to each point. And i have to waste more time typing out my honest rage.

This lack of thinking on AC's poll maker smacks of further incompetence in these governing bodies.

#7695

RE: Rodney Drainage - where tf is the context / hyperlink to this. AC is purposely not providing poller's context/sources on this (knowing we are likely to lazy) in order to get it's way. A sorry state for you lot really.

YOU SHOULD HYPERLINK EVERY REFERENCE ("see page 98") who tf has that consultation document open. CHRIST ALIVE what incompetency.

NA

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Park and community and environmental

#7703

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Doesn't impact me or my area at all or benefits me.

A few proposals are only things that should be nice to have and not priority (eg enabling apple pay or cycling lanes/areas).

Its better you focus on improving aspects like more efficient road repairs, safer roads to minimise speeding in residential areas and busy roads/junctions.

Enforcing stricter rules like accidentally driving through a bus lane without consideration of warnings sees no purpose to us. Charging for park and ride also devalues the purpose of using public transport. Expensive fares that always increase is already a struggle.

2a. Is there anything you would spend more on?

Speed bumps around schools and residential to stop boy racers on long roads.

Traffic lights on complex busy roads and junctions.

2b. Is there anything you would spend less on?

Nice to have items like paywave or google wave for payment. Eftpos or debit card or cash or online payment is adequate.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

Tell us why:

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No. Cut way more - as is Zero rates increases - just do the basics rubbish collection and roads (sack all the current AT managers to start with and stop all the speed bumps and cycle tracks that no one uses) and chop lots more.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#7752

Cut way more - stop rate payers having to pay for stuff users are not prepared to pay the full price for - libraries, pools, museums, and all the cultural stuff and special events. Plus stop spending on the all the extra transport stuff than can be stopped. Aim at reducing the Auckland population over time to fit the infrastructure we already have rather than building more.

2. What do you think of the transport proposal?

Don't support any of the proposal

Tell us why:

You need to stop spending money. Just don't do it. Put most of the 13.4 Billion in to rate reductions. Just spend whats needed to keep the current infrastructural ticking over and no more.

2a. Is there anything you would spend more on?

Absolutely not! Stop spending rate payer money or taking out more debt. Just stop!!!

2b. Is there anything you would spend less on?

Yes - Speed bumps, cycle ways, anything new. Plus stop subsidizing public transport and make it all user pays. Why should rate payers that don't use it subsidies those who do? The internet works just fine - you can get stuff delivered and work from home, so the focus on moving people around (very slowly) is misguided.

3. Which options do you support for the North Harbour Stadium?

Other

Tell us why:

Sell it. It is not able to pay its way so a money sink for ratepayers. cut our losses and get rid of it.

#7752

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

Tell us why:

Given the council debt, a better investment would be to pay down the debt. This should only be looked at once the debt has been cleared. The Auckland airport shares should be sold to pay down the debt. It make no sense to hold them due to the council debt.

4b. Which option do you prefer for the future of Port of Auckland?

Other

Tell us here:

The port and all the land should be sold at auction either together or separately to the highest bidder and all the funds raised used to pay down the council debt

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

Pay down the Council debt, or in the alternative distributed directly to ratepayers as income to them.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Please stop spending money on vanity projects and stuff minority groups say they want but don't want to fully pay for themselves (like swimming pools etc) and just focus on running Auckland. ie. taking out the trash etc.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	Do less
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Caring for the environment so that future generations have a beautiful city to live in. It shouldn't be about just building buildings on top of buildings. Auckland doesn't need more houses it needs fewer people.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#7816

Stop subsidising state houses with rates and water rates. These homes should pay their full share. The rates from central government and individuals should pay water rates.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

It's time that Auckland Council looked very closely at what some of the contractors are charging us - especially in relation to the 'cone' trucks.

2a. Is there anything you would spend more on?

Using quality materials on our roads so that there are less repairs and where there are repairs - they last longer.

2b. Is there anything you would spend less on?

I would seriously look at what some of the contractors are charging.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

Make the stadium as versatile as possible so that it can be used by many different groups. Don't charge groups so much that they can't use it.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

#7816

Tell us why:

Do not sell our shares in Auckland Airport. We have to retain some form of voting rights there. I just don't trust this new proposal.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

The ports belong to all Aucklanders, and we should retain full control of it - especially in times of crisis or emergency. We need to keep control of all strategic assets.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

Every bit of money earned should be ploughed back into services for Auckland ratepayer.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Auckland ratepayers should own all our strategic assets and that it how it should remain.

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

#7816

Tell us why:

"Used for something else that provides public benefit' is a statement too vague to be trusted. What does this mean - another stadium? I just don't trust any of this. We don't need any more cafes or restaurants in the city that go bust at the slightest hiccup in the economy.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

I just don't trust developers and I can see a stadium being pushed. Although developers may say they're going to pay for everything I can see ratepayers ending up footing the bill. There should be a moratorium on all new development until the present problems have been sorted.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support

Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Better public transport routes in east Auckland (Howick/Pakuranga/Botany). Bus lanes need to be extended the length of Pakuranga highway into Howick.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#7854

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

Anything that will make commuting to work easier and faster should be considered. More and more companies want employees back in the office. Commuting via public transport (particularly from Howick) needs to be easier and faster.

2a. Is there anything you would spend more on?

More dedicated bus lanes or rapid transit for east auckland (Howick/Pakuranga).

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

It's too far away for any major sporting teams to use. Better off being redevelopment.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Do not support

Save money, spend less & maybe go back to tendering jobs. Also your contractors need to work more efficiently, not a look good, watching two staff talk in a public carpark for an hour & half at 6.30am.

2. What do you think of the transport proposal?

Don't support any of the proposal

Tell us why:

As the busway at East Auckland, seems to have created more traffic congestion & still no grow with users. Maybe council needs to look at spending & try to reduce costs before given more money to spend.

2a. Is there anything you would spend more on?

Working smarter not harder, make staff & Contractors more efficient

2b. Is there anything you would spend less on?

Less money on the Eastern Busway, seems alot of waste of money & tax payers money.

3. Which options do you support for the North Harbour Stadium?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

Given a practical alternative to handling the current uses of these areas, provision of local and tourist- friendly facilities (restaurants, entertainment, shopping etc) would be hugely beneficial and possibly provide expansion for cruise ship arrivals/departures

5b. What option do you prefer for Bledisloe Terminal?

#7917

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

Given the alternative use of Captain Cook & Marsden Wharfe's, this would help maintain the operational integrity of the Port still needed. A working Port in itself can be an interest/attraction to tourists and residents alike, resulting in a better balance of land-use resources

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	

#7940

Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More public transport, facilities for cyclists and green spaces.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less roads, less events.

#7974

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I support increasing public transport and streamlining traffic requirements.

Raised pedestrian crossing and cycleways reduce the use of roads and therefore lighten traffic. Those projects should be continued.

2a. Is there anything you would spend more on?

Pedestrian and cycling facilities

2b. Is there anything you would spend less on?

No new roads, only maintaining existing ones.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

Tell us why:

Once redeveloped, the stadium will still require maintenance. Which is not a good way to spend additional money.

Also, public land should not be sold to the private sector, it is a resource that will be harder to come by in the future.

If operational management increases public use of the space, that is a good thing (not if it increases costs to the public for use).

While public entertainment is nice, essential areas (transport, waste management, etc) should have priority for funding.

#7974

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

The council should have some say in the operation of the airport. If entirely privatised, operations at the airport could become less functional to people in favour of profit.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

While upfront money may be tempting, whoever leases it will not do so without gaining a profit.

If the council continues to operate themselves, more money will be gained in the long term.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

The probably cannot handle another increase in rates or cuts to council services, so placing that money in the future fund will not be acceptable.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#7974

Maintain ownership and operation of all council assets, if we sell everything now, what are we going to do in the future when everything runs out?

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

The central auckland area needs more public spaces to attract people. Near the viaduct is an excellent place for this.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

The profits and dividends the council gains from the port must stay strong to help fund services and projects.

6a. What do you think of these proposals?

I don't know

Tell us why:

You are proposing a huge amount of budget go towards transport improvements, however it's hard to see what benefits you have made over the last few years so I'm opposed to trusting you to make good budget decisions. There have been times in the last year or two where east auckland have had public transport options majorly reduced (train, ferry). In the past, people would have made decisions about where to live based on transport options (eg ferry) that now have reduced operations. You have become an agency for public transport that doesn't offer public transport. Scrutiny needs to be increased at the same level as auckland council.

Bus options are ok but they don't work well for people with reduced mobility as there's often walking and waiting involved. Personally I'm unable to use the bus system.

2a. Is there anything you would spend more on?

Ferry services, our city is built on the water

There needs to be better scrutiny and decision making.

Environmental and climate change improvement should be prioritised and budgeted for as needed. Water quality can not be compromised. Either drinking water or beach water quality etc. The 2023 flooding events and subsequent mayhem have taught us we must be better prepared for this scenario of climate change. Children and school education around this must be funded so they know what the issues are and the urgency.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	As proposed
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

NO

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#8089

raise island of pedestrian cross, cycle lanes, food scrap bin, promoting Maori language use across council departments, communications and signs.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Example of the RFT that was collected since 2018 have been misused and allocated for something not intended for (i.e. change speed sign to deliberately cripple the traffic flow, build loads of cycle lanes when 90% of the time most of the cycle lanes aren't be used or and still need to be maintained for, raised pedestrian island would cause damages to vehicle's suspension etc...)

Furthermore, with more so-called "Bus lanes" dedicated for bus, but still during peak hours they still swerved out of their dedicated lane claiming the bus in the front stopped and they have no intention to stop because they want to get ahead of another bus. How is this going to help with traffic congestions?

Current traffic flow with existing lanes are already congested at all times, not just during early peak hours. Introducing dynamic lanes is building on new lanes or using existing lanes? if using existing lanes (i.e. and more than one), how is it going to improve and optimise traffic ? This is just another way AT try to confuse motorists that it will do good, but reality it is just another way of introducing more tax and revenue and no improvements what so ever like having cycle lanes in existing roading network.

Transport plans outlined by Council have over 80% of them cannot fund itself after it is built, for example all the train networks, bus network and not to mention inner city rail that keeps blow out budget with loads of excuses.

How is this acceptable that say you build something in millions and there is no consideration on future on-going revenue to pay for operational cost ? if that's the case it would be cheaper NOT to build it if those approve the project constantly having budget blow-out and high maintenance cost to operate after it is built ?

2a. Is there anything you would spend more on?

Spend more on creating large area for safe and affordable parking for those that wish to utilise public transport, but their area do not have immediate transit and have to drive a bit of distance to get to one.

#8089

2b. Is there anything you would spend less on?

Useless speed cameras, raised pedestrian crossing, cycle lanes and stop any new initiatives until existing one is complete

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Tell us why:

Any Stadium built should have its own plans to generate adequate revenue to operate it and make the capacity of "usage" close to 80 - 90% where possible, rate payers shouldn't be the one keep footing the bill on high value expensive infrastructure where it only looks good or use once every blue moon that cost \$33 million to maintain over 10 years. Furthermore, that \$33 million isn't the true figure as well, it is on current valuation and assumption calculated now, but by the time thru out the years it will be another budget blow-out again like many other Council assets.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Pay off debt that council is constantly accumulating

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

#8089

Tell us here:

Having better management of existing setup is better than having another Auckland Future Fund, reason being is that if council created RFT and cannot manage the fund for specific purpose, this would be same with AFF that will just get misused for something irrelevant such as more cycle lanes and food scrap bins activities.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

same as response in 4b.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

NO.

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Council don't even know what they are planning to do, instead of wasting huge amount of rate payer money it should be stay-as-is to ensure its overall value don't depreciated for some useless ideological wasteful spending build.

4b. Which option do you prefer for the future of Port of Auckland?

Other

Tell us here:

In the 35 years with a leasee would the costs of the port: upgrades etc needed and maintenance be the responsibility of the leasee?(Leaving the ports in a better condition than when they accepted the lease) Would the leasee always and as a necessity have to ensure the council accepted any proposed upgrades/expansion?

If these two conditions were met then lease on the proviso that the money at least \$2.1 billion go into better investment vehicles. If that's unlikely then why sell or lease? I'm assuming investment returns are rapid as we don't have a lot of time but a lot of planning to do in the next 5-10 years. Is that even a time investments could make the returns we would need.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

Because we have to improve climate resilience now and we need money to do this that is over and above current council needs

Support most of the proposal

Tell us why:

Public transport has been a nigh mare honestly, didn't Auckland Transport receive any funding previously? Road works are very slow, little improvement has been seen over the years. Was just because they are lack of funding or it is more about bureaucracy and low efficiency?

Also too many high density housing built without proper local supporting construction. The current housing policy needs to be reviewed.

This work may lead to establishing a new business association and possible new Business Improvement District (BID) programme.	I think the most important thing is to communicate local housing conditions with Auckland council, as there have been more and more high density housing in the area including state housing which has significant impact on local traffic and residents living conditions. Such as building 5/6 houses in a 600m2 land or 28 houses in a 3000 m2 land. There should be more details requirements consider the traffic, parking, local culture and environment etc.

Resume the **Water Quality Targeted Rate (WQTR)** and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.

Broaden the description of bus services funded by the **Climate Action Transport Targeted Rate (CATTR)** to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).

Discontinue the **Long Term Differential Strategy** which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.

Re-introduce **recycling charges for schools**.

Continue the planned roll out of **rates funded refuse collection** to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.

Introduce the **Franklin Local Board Paths Targeted Rate** of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.

Transport	As proposed

Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do more
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Build more industries that export technologies and food products, and also fund startups for software-based companies with good profit portfolios

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#8156

Benefits for specific ethnicities, so that you can equalise opportunities to more appropriate skill sets and not BASED ON ETHNICITY NOR SKIN COLOUR. Charities that have no benefits to economic growth.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Cycle lanes are important means of eco-friendly transportation that means fewer vehicles congesting the traffic, but we need better city planning so that expansion of roads is taken account when the population of major cities grow progressively. But we need to priorities public transportation first. This includes subways, buses and other transportation that can more more than 5 people at the same time, over cycle lanes. City planning is important so that land is reserved for road expansion instead or being sold to private owners, which means we need high density level areas and the approval to have higher density properties outside of the CBD. Examples of such is the multi-city structure within Tokyo and guangzhou.

2a. Is there anything you would spend more on?

Utility services such as water and electricity. More export based industries that drive economic growth. Fund startups that sell software as well as technological hardware, give them incentives as well as tax cuts for X number years to incentivise creation and the normal rate thereafter when it's profitable. Government must have a minor share in the startups, but also give equity to key researcher or IP holders to bind skilled experts to the company.

2b. Is there anything you would spend less on?

Preferential policies and benefits for specific ethnicities. These policies and benefits should either benefit everyone (majority) or do not exist. The city/country is made up of many people coming together to create value for society not to fatten the undeserving minority.

3. Which options do you support for the North Harbour Stadium?

#8156

Consider redeveloping the stadium precinct, Change the operational management

Tell us why:

The stadium is a good means to incorporate economic and cultural growth into the community and benefit the wider city. The reason why the stadium is not utilised well is due to its current defunct operational management. A public operating management team means that every dollar is not used as effectively as a private equity would. To get the best of both, it should be a private and public joint shareholding. The government should be the major shareholder and private companies should be the 2nd major shareholder and key knowledgeable community leaders should be the 3rd largest shareholders. The government would set the overall direction that aligns with citywide and national policies, the private companies will give insight into have to market and gain profit from it, whilst community leaders will have insight into the impacts on the community. If successful then this 3-way partnership should be a standard for other similar precincts.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Like utilities, we shouldn't allow the government to sell one of the major means to allow mass people movement, economic and cultural gateways to private funds or oversea bonds. We will lose control as Auckland airport is the only public air-based gateway (it's a monopoly) for all of Auckland. Without the government share as a means to counterbalance any actions that are detrimental to people of Auckland and the city as a whole. Auckland airport is a monopoly for all Air traffic and airlines in Auckland - the largest city in New Zealand. If it was sold to overseas funds, we would be very vulnerable to trade, taxation, logistic and pricing changes, example include trade embargos or depression or currency fluctuations, without the government stabilising the shareholding.

4b. Which option do you prefer for the future of Port of Auckland?

#8156

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

Like the airport, gateways to New Zealand and Auckland, that affect trade and population movement should always be controlled by the government, this means either by having the majority voting shares if it's a shareholding or full ownership, to prevent foreign hands to create issues within the community. To control fluctuations to foreign trades, currencies and circumstances. To direct the firm in the direction that would benefit the city and its people.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

Partially to maintain funding for services and Partially for the future fund. The ratio should be decided by economic experts from the government and key universities such as Auckland University, Otago, AUT, etc.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

I agree that the future fund sounds good as it will diversify our city risks and revenue streams, but it must be helmed, not only by a QUALIFIED fund manager, but jointly helmed with key economic experts from universities. Universities and it's researchers are the wealth of the city, we should actively welcome their participation to all decisions whether they are economic, cultural, travel, exports, city planning, infrastructure.

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

#8156

Tell us why:

Transferring the ports to Auckland council will allow the council to have more options when considering budget for the wharves or for other public services.

5b. What option do you prefer for Bledisloe Terminal?

Other

Tell us why:

Keep it to the port, but It's important to delegate an auckland council representative to port organisation to facilitate and align with the policies of the council and national direction.

6a. What do you think of these proposals?

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More large-scale infrastructure building like surface light rail.

Auckland needs to have more control of its infra and transport priorities.

#8166

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I support the proposals but they do not go far enough.

Without large scale infrastructure investment like light rail the proposals will not be enough, you can spend millions on making suburban buses faster and more reliable it won't matter if the city centre is suffering from bus congestion as it is now.

Alternatives like surface light rail need to be explored to properly address transport and congestion issues.

2a. Is there anything you would spend more on?

As above - surface light rail

Raised pedestrian crossings and pedestrian and cycling safety.

2b. Is there anything you would spend less on?

No new highways.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Do more to reduce private vehicle transport emissions and invest more in public transport projects and climate resilience, specifically delivering projects that promote transport equity (e.g. A more walkable city with rapid transit networks).

#8190

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I support Auckland Council in making public transport faster, more reliable, and more accessible for all users by investing in rapid transit and making it easier to pay.

I don't support stopping initiatives like raised pedestrian crossings and cycleways, as these are low-cost, relatively easy to implement and create immediate good impacts for communities and users. Stopping these initiatives would continue to allow our high road death toll; there is no comparing the cost of a few hundred dollars against a child's life.

2a. Is there anything you would spend more on?

Yes - public transport investment

2b. Is there anything you would spend less on?

Yes - initiatives that enable private car-convenient travel (e.g. new vehicle lanes)

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

#8190

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

DO NOT PRIVATISE PUBLIC ASSETS! Unsustainable and irresponsible for Auckland's future to do so; the airport is one of Auckland's only major assets and should not be sold off for short-term benefit.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Do not lease out the port or sell the port. Privatising the port leads to poor outcomes for workers at the port (working conditions) and poor environmental outcomes. Must remain a public asset to ensure people and planet is put before profit.

Hibiscus and Bays Local Board Priorities

7b. What do you think of our proposed priorities for Hibiscus and Bays in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support the development of community led resilience networks in our area, so our community and organisations will know who does what, where to get information and how to help, including in emergencies.	
Support and advocate for further protection of our sea, soil and fresh water from contamination and sedimentation through methods such as re-naturalisation, or daylighting.	
Engage with our community and key stakeholders, including mana whenua, on the future uses of our undeveloped reserves, and older established ones, including investigation of cost-effective options for other informal recreation and play in these areas.	
Continue to support activities that promote vibrancy, diversity and showcases creativity in our area, such as events, festivals, and other shared experiences in our public spaces for all.	
Continue to renew and enhance the paths network (greenways) to create a safer, off road, well-connected networks for active modes of transport.

7c. What do you think of the Hibiscus and Bays proposed priorities for the 10-year budget 2024-2034?

I support most priorities

8. Do you have any other comments?

1. Encourage environmental protection and waste reduction activities through community organizations and ongoing citizen awareness campaigns.
2. When heavy rain is expected, each household will remove trash in front of the neighborhood and in drains to ensure smooth rainwater drainage, which will reduce rain damage and reduce management costs.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I am in favor of investing or spending in preparation for natural disasters.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#8287

City Council support - Reduce support for cultural events, maintain the status quo for exercise and sports

I want to reduce city council costs by reducing waste at home and separating waste properly.

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

2a. Is there anything you would spend more on?

Building infrastructure for a rapid transportation network

2b. Is there anything you would spend less on?

Halts some previously planned plans, such as some pedestrian crosswalks and cycle lanes--Yes.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

A future fund will be created, but I hope that the city council will continue to own Auckland International Airport shares and cover them from other sources. If Auckland Airport is privatized in the future, I am concerned that Aucklanders will suffer the resulting disadvantages.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

It is important for the city council to maintain ownership of port land. I hope that national institutional industries will make investments, leases, and decisions appropriate for the public good of the people under the leadership of the government.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

1. Opposition: "If Bledisloe terminal is used, more cargo – trucks or rail – will have to be transported to Auckland, causing more traffic congestion than now."
2. As the scale of port operations decreases, there are concerns of a major hit to business. We will need to help the economy with smooth shipping and delivery of logistics.
3. Opposition to residential and commercial development in the port

8. Do you have any other comments?

Efforts to mitigate risks due to climate change and major environmental problems require each household to reduce waste, reduce the use of disposable products, and be conscious of and protect the environment in daily life. It is believed that when a continuous citizen enlightenment campaign is conducted with the city council, schools, society, and community groups, the expected cost is reduced and the effect is large.

19 March 2024

The Mayor, Mr Wayne Brown
C/O Office of the Mayor,
Auckland Council

Subject - FBRRA's response to the Council's Long-term Plan 2024-2034

Mr Mayor,

We are writing in response to the Council's long-term plan 2024-2034 consultation document.

Currently, the Flat Bush Township is included in the Botany Subdivision of Howick Local Board (HLB). The population of Flat Bush has increased exponentially over the recent past and appears to continue to be so in the future. Upon completion of its development, it will be home to over 40,000 people. Due to the fast growth of the population in Flat Bush, the Council/HLB are seeking public feedback for a fair and effective representation of Flat Bush that will bring a total of eleven elected members for HLB compared to nine members at present.

While the size of the township and community representation for Flat Bush is in the process of an upgrade due to the increasing population, this township lacks the Council's minimum service facilities such as a Community Centre or a Library through which local people could connect. We have raised this matter with HLB and councillors on various platforms. We appreciate that the Council's 10-year plan recognises HLB's priority to "continue to advocate to the governing body to start construction of the Flat Bush Community Centre and Library as soon as possible" and the HLB's 2023 three-year plan has identified the "Flat Bush Community Centre and Library as the most urgent need". However, we are concerned that the Council has not included "Flat Bush Community Centre and Library" in its delivery plan for 2024-2025 or in HLB's 2024-2025 budget indicating uncertainty about the commencement and delivery of this project. The Council's plan to deliver these facilities for Flat Bush has been delayed for over a decade. We feel that Flat Bush is not getting an equitable share of the Council's services despite its big population.

Auckland Council's "Community Facilities Network Plan" defines the Council's role to provide accessible services and deliver social and cultural infrastructure that are responsive in meeting people's evolving needs. People's needs in Flat Bush at this time are a Community Centre and a Library which will enable them to connect and empower.

Flat Bush has a vibrant and diverse community but it is new compared to the other established communities of Auckland, therefore it needs support from the Council to get them engaged, connected and integrated. A community Centre and a Library will be good platforms and means for this purpose.

Therefore, we request the Council to include a "Community Centre and a Library for Flat Bush" in its program for this year as well as in HLB's 2024-2025 annual delivery program and allocate the necessary budget to enable the progress of this project as soon as possible.

Our response is on behalf of the Flat Bush community, we would like to be heard in person regarding our letter.

Yours sincerely,

The FBRRRA Inc. Team:

Transport	As proposed

Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Because of the tight economy at present I believe caution is important on not increasing expenditure other than the Central Proposal. I do not agree with the proposal to sale of the lease for the Port Operation

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#8539

No

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

We need investment in transport infrastructure & I consider the Central Proposal to be the balanced approach and should be undertaken without delay

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

No

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

I do not live in the Albany area, but I believe it makes sense to investigate the potential redevelopment design and the realistic costs involved. With that information the the appropriate decision concluded, involving the community directed affected by these changes

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

#8539

Tell us why:

Developing a Future Fund is a wise move, but there must be controls designed before assets can be liquidated. The fund is of no long term value if Council can easily deplete it for operational expenditure.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

I believe it would be a strategic error to sell the lease of the Port Operations to an overseas entity. The Port Operation Profits & Dividends under the lease would leave NZ and increase the wealth of the overseas entity, which in turn is to the detriment of the NZ economy. Also Auckland would lose all realistic opportunity to control the "charges" that the new entity would impose on the NZ / Auckland import & export operators. There is a huge risk that the lease operator will gouge higher costs from New Zealanders. These overseas operators have absolutely no incentive / obligation to keep the charges low. You take money from the overseas entity for the sale of the lease, but that sum has to be viewed with caution because there would be the negative aspects listed above which actually down grade the true value of the sale and absolutely put a huge question mark over the proposed sale option being a so called Win for Auckland

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

Growing the Fund is the best use of the money from the Port Operations under Council ownership

4d. Do you have any feedback on any other part of the proposal?

#8539

Tell us here:

I feel that caution is required when investigating self insurance especially for an organisation like Council which potentially has huge liabilities. It's not an area of Council expertise to explore, too many risks to the financial viability of Council should a huge catastrophe occur. The recent "storm" event in Auckland should be warning enough to not consider self insurance.

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

It is important to release Port Land on the waterfront for "Public Use" where it is achievable without putting major restrictions on the Port Operations.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

I do not agree with the sale of the Port Operations lease and consequently I believe we must be sensible about the available area for the Port Operations. Bledisloe Terminal must remain as a Port of Auckland operational area.

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.
