Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I support:

Pumptracks, learn to ride tracks, bike skills courses, trails, and other recreational cycling facilities where people can safely grow their confidence on a bike

#11462

Eke Panuku's redevelopment of town centres, which often includes making safe walking and cycling connections, as well as improving access for disabled people.

Improvements aligned with the Central Rail Link like the Karanga-a-hape station improvements project, which includes a protected cycleway along part of Pitt street, a pedestrian mall in Mercury Lane, and could include improvements for Canada Street

The Making Space for Water programme's inclusion of "blue-green corridors". These are walking and cycling paths through greenspaces and alongside streams, adding to our walking, cycling network while also creating a natural drainage area.

Auckland Climate Grants and the Live Lightly Programme which can fund community-led programmes to empower people to ride bikes for transport

More investment for local boards: enabling them to better deliver on local climate action plans and local transport priorities

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less free parking!

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

More support is needed for cycling it is the best way to improve our city!

2a. Is there anything you would spend more on?

Cycleways!

2b. Is there anything you would spend less on?

Cars

#11462

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Keep your assets, especially the airport will be crucial in the future.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#11462

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to	Support

the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	Support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Raise revenue by increasing housing density.

Māngere-Ōtāhuhu Local Board Priorities

7b. What do you think of our proposed priorities for Māngere-Ōtāhuhu in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Strengthen partnerships with local mana whenua through project delivery, including Te Kete Rukuruku, completion of David Lange Park playground and improvements.	
Deliver community climate initiatives such as Low Carbon Lifestyles, and Māngere Bike Hub with our community partners.	
Deliver a community-driven safety action plan aimed at tackling anti-social behaviour and addressing local safety concerns enhancing the overall sense of safety within our local community.	
Improve employment and economic opportunities through our local economic broker programme.	
Support community-led activations at our parks and facilities through our community grants.

Manurewa Local Board Priorities

7b. What do you think of our proposed priorities for Manurewa in 2024/2025?

Very Important

More specifically, what do you think of each priority we've listed above?

Continue to support, deliver and fund initiatives that contribute to positive youth development.	Very Important
Invest in evidence-based projects that focus on crime prevention, safer communities and injury prevention.	Very Important
Fund and support activities that include older people and foster their community participation with a specific focus on reaching older migrants.	Very Important
Invest in community led projects and initiatives that respond to social connection and cohesion, build climate resilience and contribute to climate action.	Very Important
Develop a masterplan for Mountfort Park to ensure our open space and sports field network meets the demands of our diverse communities.	Very Important
Identify options for recreational activities to support people of all ages and abilities being casually active.	Very Important
Investigate community lease options to support Ngāti Tamaoho aspirations for a cultural hub at Te Pua/Keith Park.	Very Important
Investigate the feasibility of an arts broker programme to nurture creative expression with a focus on supporting Māori and Pacific creative arts.	Our suburb is falling behind on cycling infrastructure and that hurts our kids and our future.

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#11763

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Cut costs in unnecessary spending!!!!!! Like overpaid consultants and people in council who earn more than 3 times the average salary in Auckland. Follow through with your campaign promises Wayne Brown

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Fund overpaid consultants and positions in council that pay more than 3 times the average salary in Auckland.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Because most of the changes that Council have implemented have created congestion and poor traffic flow to force people on to public transport. This only works when you have a reliable, efficient public transport network. This is just creating a cascading system of failures that creates a larger problem.

2a. Is there anything you would spend more on?

Updating the rail network, ferry systems and the bus network needs a major overhaul with better bus driver training etc. Stop spending money on special cycleways that only a small majority of Aucklanders actually use.

2b. Is there anything you would spend less on?

Cycleways! And overpaid council employees and contractors

Invest in community led projects and initiatives that respond to social connection and cohesion, build climate resilience and contribute to climate action.	Not Important
Develop a masterplan for Mountfort Park to ensure our open space and sports field network meets the demands of our diverse communities.	Fairly Important
Identify options for recreational activities to support people of all ages and abilities being casually active.	Not Important
Investigate community lease options to support Ngāti Tamaoho aspirations for a cultural hub at Te Pua/Keith Park.	Not Important
Investigate the feasibility of an arts broker programme to nurture creative expression with a focus on supporting Māori and Pacific creative arts.

The council lacks oversight when it comes to private developers. High density housing is being produced cheaply and sold for astronomical prices. They are not properly planned and too many high density developments in one street leads to increases in crim

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	

#11834

<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Public Transport - Ensure public transport is affordable, accessible, and reliable, prioritising investment in public transport infrastructure over road spending.

#12017

Active Transport - Urgently transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Water Quality - Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.

Environment and Regulation - Ensure appropriate funding is allocated to increase monitoring activity of current/active and future resource consents to enable better environmental outcomes.

Protecting and working with communities by continuing to prioritise the funding and delivery of Making Space for Water in partnership with Central Government.

Ensuring adequate support for community and social services, including contestable grants (such as the Climate Action Grant), the Live Lightly programme, the Communities in Need programme, and supporting work on Council land and marae. This can be achieved by re-establishing pre-2023/2024 budget funding for these areas.

Supporting frontline, volunteer powered communities by ensuring local boards are adequately funded and grants are available. Grants and investment into community-led services provide great value to Aucklanders. For every dollar that Council invests we get back many more volunteer hours.

Supporting moves to a circular economy and zero waste, ensuring waste materials are seen as resources to be reused, repaired, repurposed and recycled, and are diverted from landfill.

Lowering emissions by becoming a leader in localised renewable energy generation by enabling local integrated energy solutions to support community owned energy groups.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

We want Auckland Council to spend more on safe, accessible, and attractive active transport infrastructure such as cycleways.

#12017

We want Auckland Council to spend more on ensuring public transport is affordable, accessible, and reliable.

We want Auckland Council to spend less on new roading projects that prioritise private vehicles as the primary transport mode.

Auckland Council's Transport Emissions Reduction Pathway sets out actions required to reduce the region's transport emissions by 64% by the year 2030. Transport is the biggest emitter contributing to over 40% of the region's total emissions. Within the transport emissions, 86% come from road transport. This sets a clear directive. We need to get people out of private cars, into buses, trains and ferries and onto cycleways. Failing to understand and action this will result in a continuation of over investment in roading projects and underinvestment in the public and active transport networks. The evidence is there and the evidence is clear.

Regarding the Mayoral proposal, I am encouraged to see initiatives to make public transport more accessible, such as the \$50 weekly cap and introduction of diverse payment options. Another positive is the work programmes which look to improve public transport services, such as network optimisation, expansion of the electric train fleet and completion of the City Rail Link. Unfortunately, alongside these positives, there are some concerns. A couple of examples are; the removal of 'low performing' bus services, and the several references to roading focused projects.

As well as continuing to invest and improve our public transport network, it is essential that the Council urgently supports the transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Cutting "low-value initiatives, including raised pedestrian crossings and expensive gold-plated cycleways" is an ideological move that fails to align with the Council's own Transport Emissions Reduction Pathway. In monetary terms, this means cutting funding for cycleways by \$141.5 million. This makes no sense as we know increasing funding for active transport infrastructure is a smart investment that can benefit the economy, the environment, and public health. Cycling is a low-cost, low-carbon and low-impact mode of transport that can reduce congestion, pollution, and greenhouse gas emissions. Cycling also promotes daily, incidental physical activity, mental wellbeing and social inclusion. By improving the safety, accessibility and attractiveness of walking and cycling, more people will be encouraged to choose it as a regular means of travel, creating a virtuous cycle of benefits. This approach also creates better use of existing roading assets by making space for those who cannot choose cycling, walking or public transport.

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Support all of the proposal

Tell us why:

With traffic most days at standstill and trains whoely unreliable there are no viable options to get to work in the city. Spending 10-15 hous a week in traffic is very expensive for Auckland in productivity losses.

2a. Is there anything you would spend more on?

No just spend the money better.

2b. Is there anything you would spend less on?

No, just spend the money wiser.

3. Which options do you support for the North Harbour Stadium?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Council should retain a representative voice in the Auckland airport given it is one of the citys most important assets.

#12130

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Ports of Auckland contributes significantly to the congestion plaguing Auckland CBD. It should be moved elsewhere with the land it occupies made available for Aucklanders to use through establishment of a beautiful permanent harbourfront (not another 'temporary' tent).

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

The council first should be focused on stopping these astronomical rates rises. If I want to invest my money I don't need the council to do it for me. Lower my rates then I can invest my own money.

#12373

Fewer upgrades to parks, just maintain the parks.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Need to maintain services that are being used, if they are not being used then services could be reduced or smaller vehicles used.

2a. Is there anything you would spend more on?

Need to work to eliminate road/ rail crossings.

2b. Is there anything you would spend less on?

Cycle lanes and bus services where there a very few passengers

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

Tell us why:

It is being under utilised, need to change the operations so that various groups are more willing to use the stadium.

There are not the funds to redevelop the site at the moment, other priorities on CAPEX spending are higher.

Tell us why:

The concept of creating the fund is very good, diversifying assets t outside of Auckland is also smart.

I have reservations about sellimng the shares in AIAL - will it benefit South Auckland as most of the shares came from Manukau City as the rest of the city had sold there shares previously. Also is the council able to place controls on the way AIAL operates without at least a 10% shareholding. I know there is minimal influence for shareholders but more than 10% means if another organisation bought the business -operating it a manner that gave residents problems (eg operating 24/7 continous flight arrival/ departures with noise in the night time) they could not force the council to sell and could possibly prevent these type of actions.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

The POA does not provide a good return. The land is what is essential. If the lease was for 35 years, would it still be possible to get the wharf operations to move to another site before then?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

To do both, a reasonable return used for council services with any extra going into the future fund.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Self insurance needs to be cost effective for it to be useful, a full cost/ benefit analysis should be prepared which outlines both the potential benefits (insurance premiums saved/ more council control) and the possible risks (potential costs od replacement with no insurance). Also the council could only use the funds created from self insurance to replace the assets destroyed in eventswhere previously insurance would have covered the costs, ie the council cannot use the funds because of a shortfall in operations revenue compared to operating spending.

5a. What option do you prefer for Captain Cook and Marsden wharves?

I don't know

Tell us why:

It depends on the relative cost effectiveness of transferring the the port operations elsewhere. Would this increase the cost of imports, making it more expensive for customers and potentially more pollution (trucks transporting goods). Would it increase

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

I honestly feel the council does nothing. We've been in our community for the past 6 years and we all pay our rates on time and do the right thing and I haven't seen the council do anything to improve me my community or my area of residence. I've been at my home for a long time and not once has the council come to trim the berm grass, we do it every time. Nothing is ever done, why is cost always increasing.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop charging for services that don't benefit us in anyway. We have a stunning country, we don't need fancy playgrounds or art in parks. Put that money to better use.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

We don't need raised pedestrian crossings and cycleways - We have enough and many don't even use it! Such a waste of money.

2a. Is there anything you would spend more on?

Stop increasing cost of public transport, it should be cheaper for more people to go to

2b. Is there anything you would spend less on?

Cycle lanes, increasing of more buses/trains when people use them less cause of the raising costs.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us here:

Do better with tax payers money. We all work very hard to collect the money to pay our rates and with living expenses increasing, it doesn't make sense that costs are so high when the council doesn't do much to the community.

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Totally opposed to CCO's which give no democratic control

#12785

'Investment fund' will be spent rapidly to fund Opex (as stated in LTP)

Claimed low return by AIAL and Ports of Akld are recent covid blips so are poor reason for sale/lease privatisation

Direct control of Airport and Ports give better control over use

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Lease locks port usage for long term

Lessee will have monopoly so can raise charges which get passed onto residents in higher products costs.

Lessee has perverse incentive to run down ports to maximise profits then hand back to Auckland residents after 35 years for us to pay to refurbish

Dubious human rights record of stated possible lessee (Saudi investors)

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

Don't want 'Future Fund' - it is a piggy bank that will just get robbed by next council

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Council should keep 100% ownership of AIAL and ports land, and operational control

Self insurance is possible for low costs claims (with conventional insurance for high excess events), but funds saved should be retained in liquid assets to cover such lower claims, not used as general council funding.

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Ports of Akld are short of space, so you want to give them less? Madness.

Cook and Marsden wharves can be used for expanded ferry services or cruise ships or NZ coastal shipping transfers from int'l ships.

Akld has plenty of beach and seafront space - we

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

As above.

Plus, LTP draft itself states that loss of Bledisloe wharf to recreation or apartments would hinder Ports of Akld operations, which would drive up cost of import/export of goods. This is just transfer of cost from council to residents for no gain.

7b. What do you think of our proposed priorities for Manurewa in 2024/2025?

Not Important

More specifically, what do you think of each priority we've listed above?

Continue to support, deliver and fund initiatives that contribute to positive youth development.	Very Important
Invest in evidence-based projects that focus on crime prevention, safer communities and injury prevention.	Fairly Important
Fund and support activities that include older people and foster their community participation with a specific focus on reaching older migrants.	Not Important

#12785

Invest in community led projects and initiatives that respond to social connection and cohesion, build climate resilience and contribute to climate action.	Fairly Important
Develop a masterplan for Mountfort Park to ensure our open space and sports field network meets the demands of our diverse communities.	Very Important
Identify options for recreational activities to support people of all ages and abilities being casually active.	Not Important
Investigate community lease options to support Ngāti Tamaoho aspirations for a cultural hub at Te Pua/Keith Park.	Not Important
Investigate the feasibility of an arts broker programme to nurture creative expression with a focus on supporting Māori and Pacific creative arts.	<p>Marae just around corner from Keith Park can be used for cultural hub space.</p> <p>Have existing well run arts/crafts centre at Nathan Homestead</p> <p>Youth projects have already been heavily funded for many years now, and are leaving little funding to address social</p>

Mostly good priorities, but stormwater clearance and street sweeping should be higher priority than more playing field upgrades

Also, more tree planting (and preserve existing trees) is good - try persuade Vector to underground power lines faster in stree

7c. What do you think of the Manurewa proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

CCO's are terrible - bring them back under direct council operational control

#12785

Strictly no PPP's - Public Private partnerships are the worst funding model ever and generally result in far higher cost to ratepayers over long term

Households having large number of cats and dogs is a growing problem - cats pooping all over their neighbours properties. Perhaps investigate a household limit on number of pets and require adequate toilet facilities at owners home.

To show leadership, council staff earning over \$100,000 and councillors/mayor to take 25% pay cut. Do not just cut lowest paid staff positions like pool lifeguards and lawnmowers.

Development costs need to be 100% cost recovery from developers immediately so existing residents don't just bleeding cash to subsidise developers (this is project like extra Watercare pipe and Redoubt Rd reservoir, which should have costs shared over the new developed properties they serve).

Council needs to urgently put pressure on government to stop mass immigration that is causing these unsustainable cost rises on council.

Long-term Plan 2024-2034

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#12837

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Better noise control and roaming dog control (start random 24-7 stray dog & noise patrols in problem areas rather than just responding to complaints, by which time dogs and loud noise source have often moved on).

#13009

Working with Vector power lines company to get existing overhead power lines undergrounded with top priority given to streets that have council trees in berms (which are currently being badly pruned to horrible V shape)

Improved ferry service - change point-to-point existing ferry services to multi-stop service (eg CBD-Northcote-Birkenhead-WestHarbour-Herald Island, or CBD-Devonport-Orakei-Half Moon Bay). high passenger numbers in peak times may require large ferries, but off peak with low pax numbers can surely be done now with existing small ferries. This gives far more flexible service - people can go West Harbour to Northcote or Howick-Devonport without having to go via CBD and back track.

More regular street and stormwater catchpit cleaning, as street dropped rubbish is increasing.

Investigate local suburb waste & recycle transfer stations to take e-waste and window glass to maximise recycling.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Abolish CCO's and bring them under direct council operational control (cuts cost of separate CCO boards and increases democratic control & oversight)

Strictly NO PPP's, as these are the most expensive form of financing projects possible, and (under BOOT PPP model) usually result in worn out assets dumped back into council ownership after 30-35 years requiring expensive refit by council.

Overhaul AT dreadful and expensive plans such as Drury & Paerate rail stations which cost nearly half a billion!! We just need basic platform, lights and shelter, not huge bus overbridges and plazas costing a fortune.

2. What do you think of the transport proposal?

Don't support any of the proposal

Tell us why:

The principle actions listed above sound good, but that is not what AT have been doing or plan to do!!! AT has lowered speed limits, built awful judder bars and narrowed T-junction roads so 1 right turning car blocks all left turning cars from getting out - I am opposed to all these bad ideas that have slowed transport so much for no benefit (serious injury & deaths dropped for 2 covid influenced years, but have now returned to same levels as pre changes, so the expensive changes failed).

#13009

2a. Is there anything you would spend more on?

Ferry & rail services, including:

- multi-stop ferry services as mentioned above (dirt cheap and fast to achieve)
- support Kiwirail/Ontrack to build heavy rail from Onehunga line to airport and looping it back to Wiri into the Manukau line, which can have route designated for future extension to FlatBush, Botany, Highland Park and Half Moon Bay ferry terminal. Designate it fast to Wiri to prevent Wiri quarry development blocking this route. No trams/light rail please- far too slow and expensive.

2b. Is there anything you would spend less on?

Judder bars, lower speed limits, cycle lanes on roads (separate cycle paths are fine), narrowing of roads especially at junctions.

Less grandiose builds on bus stations and rail stations - more practical & pretty Kiiwi builds, less concrete Stalinist award winners ;)

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

Tell us why:

Once adjacent land to stadium is sold it blocks future developments (see Ngati Whatua treaty settlement land at old Strand CBD rail station - developed into McDonalds and other junk low value business and now blocking port expansion)

PS - no downtown waterfront stadium please - we have sunk so much into existing stadiums, just use them.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

#13009

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Any 'investment future fund' will be sold like past such investments very rapidly and used to subsidise current council operations for a brief while, then we have sold the asset and used the cash and face higher rates in future with no asset.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

No evidence leased port is lower risk or better operated (if 3rd party port operator messes it up badly, will council really stand aside and ignore as it is not 'their risk'? hardly)

Lessee costs will result in higher charges passed on to end consumer by importers so residents pay for council cash grab anyway.

We want council ownership of land and operations so council can move quickly to respond to port operational needs.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

See above re_investment funds. Ports operation gives long term returns

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#13009

Self insurance savings must be ring fenced if done and built up into a highly liquid asset base to cover 'insured' needs.

No general diversified investment funds needed or wanted - cash cows like that never last long term (half of \$833m airport shares sold first time vanished to other purposes rather than debt pay down).

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Ports of Auckland desperately need all their wharves, especially with ferry and local shipping and cruise ship potential for growth. No apartment or retail or recreation on wharves please!!!

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

As above - draft LTP even states how badly loss of Bledisloe wharf would hurt Port operations.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. 6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Raise business rates on large businesses like supermarkets, mitre10 & bunnings, warehouse and briscoes, but not on small firms (ie raise business rates on large commercial premise zones but not on small shop clusters).

Full costs recovery for dog registration, stray & dangerous dog fines, and noise complaints etc

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#13311

Support most of the proposal

Tell us why:

Reliable public transport needs to be addressed. Rail network issues are a major concern. Traffic congestion impacts bus reliability. While council contract out bus services fares increase with no noticeable improvement to service quality or reliability. Cycle ways and raised pedestrian crossings are of minimal value given the low usage rate of cycle ways in South Auckland. Maintenance costs of raised crossing is not justified especially once the maintenance impact congestion/diversion of traffic.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Park installation (large costly structures) and reserve (open spaces) less frequently lawn maintenance. Glass installation for bus stops (especially for those repeatedly vandalised).

LTP Summary

Having an efficient and comprehensive public transport network is critical. for Aucklanders and contributes to the reduction of emissions. Completing the light rail project is a must. It to a positive contribution to an effective public transport network

#13487

and does not adversely affect the community at large but also avoids the waste of money that occurs if the project is cancelled..

Updating and building new water infrastructure is a must to improve the storm water and minimize the potential for future adverse weather events.

There needs to be a careful review of the major events that are run by Tataki and what the potential benefits could be by choosing those activities that will result in quality experiences for Aucklanders but also a high level of profits to offset delivery. Good examples were Te Matatini, Rugby World Cup and the Americas Cup.

We need to consider the value of focusing on our points of difference in Aotearoa NZ and leverage Auckland's advantage of being the gateway to the culture and heritage of NZ and promote our waterfrontages around the region as accessible and a great experience. Maintaining or increasing the amount of money that goes into our cultural and heritage assets like the Auckland Museum and the Art Gallery.

We do need to ensure residents and ratepayers are also happy and perhaps put money into subsidising access to the things we own like the zoo and other similar resources so that will offset the general communities desire to be okay with paying a little more. All other visitors outside of the region and internationally can pay a full fee to access these services. We need to do more with less.

I support the allocation of more than the proposed \$171m to achieve positive Maori Outcomes. There are definitely emerging opportunities for this to be positive with the ultimate goal of Iwi at least becoming more self-sufficient.

I support the Making Space for Water programme I would be prepared to pay for and in particular to ringfence a proportional budget to achieve Maori Outcomes in that space over and above the proposed \$171m for Maori Outcomes.

For example, there is a very small Mana Whenua Storm water Inspections pilot being run by Healthy Waters, that could align with the proposed Making Space for Water project and is potentially scalable depending on budget. This is a project that can be a partnership project with all Iwi across the region, promotes positive relationships and foster high trust between treaty partners and utilises their inherent skills and knowledge of their respective areas or rohe, increases employment and the ability for the team to practice kaitiakitanga of their lands and waterways. This project could also likely extend to other areas like compliance. Auckland Council currently employ compliance officers for a wide range of activities and there is generally a high turnover of staff. This is a revenue generating activity but could be an opportunity to ringfence some of that work to be delivered by Mana Whenua and with the right training and support as a partnership activity and also ensuring they greater Iwi independence and

#13487

self-sufficiency. There are so many areas across services we deliver that this could be considered with Parks, Panuku etc.

A review of how the money is spent is important.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Value capture from development. Development in central suburbs where facilities are most developed.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#13607

Free and subsidized parking. Consider divesting parking facilities on short to medium term leasehold whilst retaining freehold on land. Increase parking fees to catch up with increases in transit fares.

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Disappointed in the low priority offered to safety.

Skeptical of return on investment in sealing remote rural roads.

You can include cars as part of a transport system, whilst benefiting from developing other modes for their appropriate use cases.

2a. Is there anything you would spend more on?

Speed limit reductions have improved residential areas, but some users need physical prompts to help them comply. Continue trialling low cost tactical interventions and see out the terms fully. Look for win/win situations, like road diets that protect legal on-street parking *and* narrow excessive roadways to reduce median speeds and parking on berms and footpaths. Be courageous and inconvenience the jerks who race around our neighborhoods.

2b. Is there anything you would spend less on?

Free and subsidized parking. Raise parking fees in line with increases seen in transit over the last couple of decades. Consider divesting parking operations to profit taking companies on leasehold, retaining land on freehold.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

The facility is 30 years old, maybe its time to re-examine its utility.

#13607

The site has great motorway and transit connections, why is it struggling with under-use?

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

Tell us why:

AIAL is an opportunity for value capture in itself. Divesting entirely in such a significant part of the city seems hasty, especially as the city will be expected to continue accommodating the airport on behalf of the nation, long into the future. Diversification of the future fund could come from other asset sales, reinvestment of growth and future surpluses.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

This option helps launch the future fund and creates a commercial opportunity for port operations. It also reduces the pressure to divest in AIAL, which seems unwise given our ongoing commitments to the facility.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

#13607

Investment at scale is a decent use of ratepayer funds. Together we can benefit from opportunities that would never be available to most individuals. Sovereign wealth funds elsewhere have brought significant benefit.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

Opportunities for value capture from CRL and Britomart. Retention of port operations in Auckland as the lowest energy/carbon bulk transport option.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

Retain contiguous port area for the time being. NZ is at the end of a long supply chain, rather than a hub. We rely on import substitution for so many essential manufactured goods and lack domestic capacity to replace imports. If economic developments in 35 years' time require change, so be it.

6a. What do you think of these proposals?

Support all of the proposal

Tell us why:

The city is growing. I think that we need to prioritise getting around without a car because of the environmental cost. I also think that investing more in renewable modes and active transport is a security issue as well. relying on fuel from overseas creates dependency, thus risks that can have immediate consequences on our economy and lives. More investment in public is not a nice to have, it is a necessity for a growing, bustling city. Finally, getting more value from investments, like having light rail above ground as opposed to underground unless we build light metro/metro rail around the city.

2a. Is there anything you would spend more on?

This is a key time to show support for more funding towards safer streets, and a completed network for walking, cycling, and wheeling. I think council needs to resurrect light rail and commit to it to add resiliency to the city. The status quo has not worked for many decades and I would think young people are sick of generations not thinking about the interests of the future. past generations have been shortsighted and negligent, particularly infrastructure the city needs

8. Do you have any other comments?

Auckland Transport needs to better listen to the needs of the people on the ground. And Auckland Council elected councillors and the like need to make sure they know what their role is. Enabling people have somewhere to live and how they get around would tick off some of the issues people have in this city.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We endorse retaining the Sport and Recreation Facilities Investment Fund, supporting an additional \$35m investment, and propose the additional funding be non-contestable and used to fund a range of community sport and recreation facilities including, but not limited to indoor sports facilities. This will be vital to developing the sports and recreation facilities Aucklanders want and need now and into the future.

#14209

We need fit-for-purpose facilities and if we don't continue to invest it is likely there will be negative impacts on participation and volunteers engaging.

Sport and recreation plays a large part in social connection and contributes to physical and mental well-being as well as economic and educational benefits. For every dollar spent on sport and physical activity it yields at \$2.12 social return.

We support reviewing costs and contracts for playing platforms maintenance. Inconsistent quality and accountability need addressing to improve the usability of our existing facilities and to preserve these assets for as long as possible.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

It is important that we keep progressing transport initiatives. Netball Manurewa does not support charging at park and rides.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Tell us why:

Try changing the operational management to see if that optimises the facility. The Albany area is growing fast. Housing developments are intensive and have very little space for children to run around. Any green space is precious and should be retained.

#14209

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

Netball Manurewa has a concern, should the Auckland Future Fund be established, it would need to be protected to ensure future decision makers maintain the base funds and don't dip into or spend the fund.

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

Netball Manurewa has a concern about third party operators of the port. If this were to proceed there would need to be controls in place to ensure employment opportunities and access of New Zealanders, including skill development, and NZ legislation is complied with.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

Leasing the Port is essentially privatising the asset for 35 years.

#14209

If the Port were to be operated by a third party it is important that provision is made to ensure employment opportunities and skill development for New Zealanders.

Netball Manurewa has submitted in the past in opposition to the sale of the Airport shares due to concern about the sale of revenue earning assets.

The establishment of the Auckland Future Fund must have protections to ensure longevity to optimise any long-term benefits.

4d. Do you have any feedback on any other part of the proposal?

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Proposed change to the Long-term Differential Strategy – agree with the proposal to remove the policy of gradually lowering the share of general rates businesses pay.

Proposed change to the Water Quality Targeted Rate – agree with option 4, the proposal to set the rate to cover only annual programme operating and interest costs each year.

Proposed change to the Natural Environment Targeted Rate – support option 4, resume at previously planned level and increase at 3.5% per year.

Proposed changes to Waste Management targeted rates and charges – support:

1. adjusting the Waste Management Targeted Rate in 2024/2025 to maintain cost recovery levels.
2. applying the Recycling Targeted Rate to all schools.

Te Kete Rukuruku, completion of David Lange Park playground and improvements.	
Deliver community climate initiatives such as Low Carbon Lifestyles, and Māngere Bike Hub with our community partners.	
Deliver a community-driven safety action plan aimed at tackling anti-social behaviour and addressing local safety concerns enhancing the overall sense of safety within our local community.	
Improve employment and economic opportunities through our local economic broker programme.	
Support community-led activations at our parks and facilities through our community grants.	

Tell us why

7c. What do you think of the Māngere-Ōtāhuhu proposed priorities for the 10-year budget 2024-2034?

I support all priorities

Invest in evidence-based projects that focus on crime prevention, safer communities and injury prevention.	
Fund and support activities that include older people and foster their community participation with a specific focus on reaching older migrants.	
Invest in community led projects and initiatives that respond to social connection and cohesion, build climate resilience and contribute to climate action.	
Develop a masterplan for Mountfort Park to ensure our open space and sports field network meets the demands of our diverse communities.	
Identify options for recreational activities to support people of all ages and abilities being casually active.	
Investigate community lease options to support Ngāti Tamaoho aspirations for a cultural hub at Te Pua/Keith Park.	
Investigate the feasibility of an arts broker programme to nurture creative expression with a focus on supporting Māori and Pacific creative arts.	In particular, we support the priority to allocate \$1.7million to replace the Netball Manurewa stadium roof that leaks at our centre.

Tell us why

7c. What do you think of the Manurewa proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

Netball Manurewa is very grateful for the support it has received from Auckland Council and the local board.

#14209

As mentioned we support the Manurewa Local Board's priority to allocate \$1.7 million to replace the roof on the facility.

When the roof is replaced we would like to explore options to install solar panels to reduce the running costs of the facility.

One of our current facility projects is addressing the issues with the indoor wooden sprung floor (\$80,000 quoted).

There is a desperate need for a "Scheduled Maintenance Plan" for the facility. We trust the council will work with us to develop this.

Our future development master plan encompasses:

i. Stage 3b

- Canopy cover over courts 5 to 8
- A covered walkway that connects the building to the beginning boundary fence thereby creating a space for people to gather and shelter from the rain.
- New roof on pavilion – the current roof leaks every time there is a heavy downpour (estimated cost \$1.7 million)
- Solar panels to help with power costs (estimated cost \$500,000)
- Children's playground and adult exercise equipment
 - a playground on the court 1 location would be very much appreciated for the children to play on while the parents are either playing netball or utilising one of the other games on offer (estimated cost \$900,000).
 - adult exercise equipment would be utilised in training regimes (estimated cost \$700,000).

iii. Stage 4 of the master plan (long-term) includes (estimated cost \$7 million):

- adjustment to fencing
- Enclosing the verandah area to create meeting room/office space for community use (estimated cost \$4 million).
- New courts (no. 13-15).

We are working with Council staff to address the issues requiring repair:

The building is beginning to look tired. We want to keep the facility maintained to a good standard. It would be helpful to have a Scheduled Maintenance Plan for the facility.

Building Issues

i. Leaking Roof

The roof of the main stadium leaks under certain weather conditions – heavy driving rain.

ii. Design Fault – New Rib to Main Stadium Extension

The new rib where the stadium was extended has a metal beam adjacent to the wooden beam. When the weather is cold, condensation builds up on the metal beam. It drips onto the wooden sprung floor. All the other wooden beams have the ceiling tiles butt up to the wooden beam. We do not get issues with condensation dripping on to the floor from the other beams. It appears to be a design fault.

iii. Old squash court storage area

There is vein mould on the walls and the paint work inside the squash court area is sagging and bubbling on the wall. The outside paint work is cracking, bubbling and flaking.

The squash courts area is our main storage area. It is damp. Anything stored in this area becomes mouldy. Anything placed up against the block work walls get wet and develops mould.

This area never had any weathertightness issues prior to the redevelopment.

iv. Paint Bubbling and Lifting on the outside wall of the storage area

The paint is bubbling and lifting on the outside wall of the storage area where the chairs and tables are stored. We cannot see why it is lifting but fear there is moisture getting in somehow. This has gotten worse. Despite council painting over the area it is still lifting.

v. Crack Above the door frame in squash court area

There is also a significant crack that has appeared above the door between the two squash courts. This started as a hairline crack but has widened to at least 5mm or so.

vi. Rusting Pole supporting the verandah at the Browns Road entrance

Pole is rusting at base at the entrance to the control room/office – this was constructed during the Stage One build. It is concerning the pole is rusting, not only at the base but the entire length. Council was called out to fix one of the lights which appeared to have rusted water inside it. A more in-depth investigation is needed as it appears the pole's strength and integrity may be at risk.

See the following photographs that illustrate some of the problems.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1. Increase funding + resources to support Maori + Pasifika community services
2. Greater representation of Maori Rangatahi in decision making processes within the council.
3. Greater accessibility for holistic + traditional Maori Health + Wellbeing support + care

#14241

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

1. Allow more direct funding that will benefit community services & reduce/cut non essential expenses that do not contribute to the wellbeing or development of Maori.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Should be prioritizing affordable, accessible + safe public transport options in South Auckland,

2a. Is there anything you would spend more on?

Prioritizing safe transport options in South Auckland + road maintenance, accessible public transport.

2b. Is there anything you would spend less on?

Excessive infrastructure projects that do not benefit Maori.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

Tell us why:

Excessive amount of money spent on the stadium that is difficult to access for our hapori in South Auckland. Funding should be allocated to addressing local community support + resources in South Auckland. Maori of Rangatahi should be more actively involved in the decision making. Where is the \$33 million for South Auckland ?

#14241

5a. What option do you prefer for Captain Cook and Marsden wharves?

Other

Tell us why:

Change name of Captain Cook + Marsden- having Maori be apart of the consultation + decision making so that when you speak of "public benefit" Maori in South Auckland are a part of this.

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.

Resume the **Water Quality Targeted Rate (WQTR)** and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate

#14258

<p>from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	
<p>Re-introduce recycling charges for schools.</p>	
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#14462

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Manurewa Local Board Priorities

7b. What do you think of our proposed priorities for Manurewa in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Continue to support, deliver and fund initiatives that contribute to positive youth development.	
Invest in evidence-based projects that focus on crime prevention, safer communities and injury prevention.	
Fund and support activities that include older people and foster their community	

#14542

participation with a specific focus on reaching older migrants.	
Invest in community led projects and initiatives that respond to social connection and cohesion, build climate resilience and contribute to climate action.	
Develop a masterplan for Mountfort Park to ensure our open space and sports field network meets the demands of our diverse communities.	
Identify options for recreational activities to support people of all ages and abilities being casually active.	
Investigate community lease options to support Ngāti Tamaoho aspirations for a cultural hub at Te Pua/Keith Park.	
Investigate the feasibility of an arts broker programme to nurture creative expression with a focus on supporting Māori and Pacific creative arts.	Improvement and changes need to be made in most areas.

Don't use public transport

2a. Is there anything you would spend more on?

Fixing roads/motorway improvement

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Tell us why:

For 33 million the community should be able to use it.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

#14543

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Other</p>
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	<p>Other</p>
<p>Re-introduce recycling charges for schools.</p>	<p>Support</p>
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	<p>Do not support</p>

<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>

<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#14550

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Your feedback

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I cannot afford to pay more in this hard economic times.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

less regular buses and trains during the off-peak hours

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

I think the transport provision is adequate for the future.

2a. Is there anything you would spend more on?

Please put back rubbish bins in public areas. This will keep the environment clean and green.

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

This stadium supports only people of North Shore who should pay more to support it (as part of their Local Board plan)

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

This is a great plan forward - will help keep the rates down, I hope.

4b. Which option do you prefer for the future of Port of Auckland?

#14595

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

We don't want an overseas company to profit from our rates! We need to keep major utilities in our hands!

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

keep decision making in our own hands

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

see above

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to	

#14982

the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>

Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No, I don't want anything more than this

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

No, I don't see any reason to pay less for urban development

#15260

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

Transport is both important for large urban areas and the environment

2a. Is there anything you would spend more on?

around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support

To Auckland Council,

Re.: Submission on Parks & Community Component of Council's Long-Term Plan

This is a personal submission in support of the funding for sport and recreation facilities as

#15554

part of the Auckland Council's Long-Term Plan. I have recently retired from playing tennis,

but I played the sport for nearly 50 years and served on committees for many of those years.

As a resident of Auckland, and someone who is still involved in sport in a managerial role, I

appreciate the commitment and support that Auckland Council has made and continues to

make to the sport and recreation landscape of the city. I also am very aware of pressures

and challenges the Council is facing.

When I was an active tennis player and club member, I personally experienced a wide disparity in the quality of club and public tennis facilities across Auckland. A greater level of

investment to improve those facilities and protect them from the ever-increasing ravages of

weather extremes would be hugely beneficial to the sport and its participants.

I fully support the retention of the existing Sport & Recreation Facilities Investment Fund at

its current level, plus adding the proposed additional \$35m investment. This will be vital in

addressing the sport and recreation infrastructure deficit and upgrading the existing infrastructure.

I hope that the changes to the LTP in the sports and recreation sector are adopted, and the

Council can continue to assist in enhancing the infrastructure, to ensure the massive economic, societal, and health & well-being benefits of sport and recreation are maximised.

Yours sincerely,

Ross Jolly

reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. Develop fit for purpose facilities and respond to growth challenges through projects like the Clevedon Village Heart programme, 'Belmont' Sports Park development and the Unlock Pukekohe programme.

Fund three-year Strategic Community Partnerships with local organisations that are willing to and capable of delivering social, environmental, cultural and economic outcomes in line with the local

board plan and support to these organisations to deliver.	
Support environmental and cultural restoration programmes in partnership with Iwi including Te Kete Rukuruku (place naming) and Te Korowai Papatuuaanuku (environmental restoration).	
Develop “Franklin Community Occupancy Guidelines” to inform decisions on council-owned facility leases, including leasing charges.	
Find ways to reduce Franklin’s maintenance costs e.g. by replacing lawn with eco-sourced native trees and reducing or relocating public rubbish bins.	
Progress the development and delivery of the Franklin Paths Programme.	
Deliver a refreshed approach to enabling young people in Franklin to access services and participate in their communities.	
Progress a Pukekohe Cemetery memorial project that acknowledges the unmarked graves at the site.

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The three options (central, more, & less) proposed in the consultation are not the only options, the same goes for the corresponding rates rises. For example, we could get much-needed investment in transport services and climate resilience, as stated under the 'pay more get more' option, with a rate rise of less than 14% in year one. There are

#15853

other areas where savings could be made which are not interdependent. The 'overall direction' oversimplifies very complex decisions.

We must prioritise looking after our people and planet by investing in the things that provide us with life's essentials, such as fresh air, clean drinking water, hazard resilient landscapes and basic needs, like accessible transport and a sustainable waste network.

Where I'd like Auckland Council to do/spend more

- Public Transport - Ensure public transport is affordable, accessible, and reliable, prioritising investment in public transport infrastructure over road spending.
- Active Transport - Urgently transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.
- Water Quality - Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.
- Environment and Regulation - Ensure appropriate funding is allocated to increase monitoring activity of current/active and future resource consents to enable better environmental outcomes.

As well as the options provided in the structured consultation, I would also like the Council to do more of the following:

- Protecting and working with communities by continuing to prioritise the funding and delivery of Making Space for Water in partnership with Central Government.
- Ensuring adequate support for community and social services, including contestable grants (such as the Climate Action Grant), the Live Lightly programme, the Communities in Need programme, and supporting work on Council land and marae. This can be achieved by re-establishing pre-2023/2024 budget funding for these areas.
- Supporting frontline, volunteer powered communities by ensuring local boards are adequately funded and grants are available. Grants and investment into community-led services provide great value to Aucklanders. For every dollar that Council invests we get back many more volunteer hours.
- Supporting moves to a circular economy and zero waste, ensuring waste materials are seen as resources to be reused, repaired, repurposed and recycled, and are diverted from landfill.

#15853

- Lowering emissions by becoming a leader in localised renewable energy generation by enabling local integrated energy solutions to support community owned energy groups.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Auckland Council's Transport Emissions Reduction Pathway sets out actions required to reduce the region's transport emissions by 64% by the year 2030. Transport is the biggest emitter contributing to over 40% of the region's total emissions. Within the transport emissions, 86% come from road transport. This sets a clear directive. We need to get people out of private cars, into buses, trains and ferries and onto cycleways. Failing to understand and action this will result in a continuation of over investment in roading projects and underinvestment in the public and active transport networks. The evidence is there and the evidence is clear.

Regarding the Mayoral proposal, I am encouraged to see initiatives to make public transport more accessible, such as the \$50 weekly cap and introduction of diverse payment options. Another positive is the work programmes which look to improve public transport services, such as network optimisation, expansion of the electric train fleet and completion of the City Rail Link. Unfortunately, alongside these positives, there are some concerns. A couple of examples are; the removal of 'low performing' bus services, and the several references to roading focused projects.

As well as continuing to invest and improve our public transport network, it is essential that the Council urgently supports the transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Cutting "low-value initiatives, including raised pedestrian crossings and expensive gold-plated cycleways" is an ideological move that fails to align with the Council's own Transport Emissions Reduction Pathway. In monetary terms, this means cutting funding for cycleways by \$141.5 million. This makes no sense as we know increasing funding for active transport infrastructure is a smart investment that can benefit the

#15853

economy, the environment, and public health. Cycling is a low-cost, low-carbon and low-impact mode of transport that can reduce congestion, pollution, and greenhouse gas emissions. Cycling also promotes daily, incidental physical activity, mental wellbeing and social inclusion. By improving the safety, accessibility and attractiveness of walking and cycling, more people will be encouraged to choose it as a regular means of travel, creating a virtuous cycle of benefits. This approach also creates better use of existing roading assets by making space for those who cannot choose cycling, walking or public transport.

2a. Is there anything you would spend more on?

I want Auckland Council to spend more on safe, accessible, and attractive active transport infrastructure such as cycleways.

I want Auckland Council to spend more on ensuring public transport is affordable, accessible, and reliable.

2b. Is there anything you would spend less on?

I want Auckland Council to spend less on new roading projects that prioritise private vehicles as the primary transport mode.

Re-establish the full funding of the Natural Environment Targeted Rate (NETR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.

Revenue gained from NETR affects the delivery of essential projects to protect our biodiversity and taonga species. For example, the rate funds kauri dieback track upgrades, treatment support for landowners with kauri dieback, monitoring of the health of our forests and education for visitors to prevent further spread of the disease and predator control on our islands and the mainland. This work supports the health of our environment, which we need to be healthy to keep humans healthy, by filtering our water, catching and intercepting rainfall, holding our soils and slopes together and cleaning our air. Having spent years with large parts of the track network closed to protect kauri it is important to ensure this work continues as planned to enable safe access to our wild places, which are so important for our mental and physical health, and the health of our forests.

<p>the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	Do more
City and local development	Do less
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do less
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No capacity to pay more. Govt can generate more revenues & income from other sources such as investing in businesses & industries rather than deducting more taxes from common man incomes.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#16786

Stop investing in housing (state houses) Reduce tax and interest rates.

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Multiple bus lanes on each road. It's increasing traffic and confusing people while driving .

2a. Is there anything you would spend more on?

Education, industries, new businesses, universities.

2b. Is there anything you would spend less on?

Funding Non-deserving people & unemployed community.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	I don't know
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	

#18745

Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	I don't know
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year. 8. Do you have any other comments?

More community group support is needed. There is a lack of access to local communities and understanding of government policies due to language and cultural barriers, but community groups play a big role.

Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	I don't know
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	I don't know
Re-introduce recycling charges for schools.	I don't know
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.

Invest in community led projects and initiatives that respond to social connection and cohesion, build climate resilience and contribute to climate action.	
Develop a masterplan for Mountfort Park to ensure our open space and sports field network meets the demands of our diverse communities.	
Identify options for recreational activities to support people of all ages and abilities being casually active.	
Investigate community lease options to support Ngāti Tamaoho aspirations for a cultural hub at Te Pua/Keith Park.	
Investigate the feasibility of an arts broker programme to nurture creative expression with a focus on supporting Māori and Pacific creative arts.	I think the priority is just as important.

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. <p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#19362

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.
