6a. What do you think of these proposals?

<p>Resume the <b>Natural Environment Targeted Rate (NETR)</b> and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the <b>Water Quality Targeted Rate (WQTR)</b> and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the <b>Climate Action Transport Targeted Rate (CATTR)</b> to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the <b>Long Term Differential Strategy</b> which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>

Re-introduce <b>recycling charges for schools.</b>	
Continue the planned roll out <b>of rates funded refuse collection</b> to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the <b>Franklin Local Board Paths Targeted Rate</b> of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the <b>Rodney Drainage Districts Targeted Rate</b> to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the <b>Waitākere Rural Sewerage Targeted Rate</b> from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

## Howick Local Board Priorities

7b. What do you think of our proposed priorities for Howick in 2024/2025?

I don't know

More specifically, what do you think of each priority we've listed above?

Review and refresh the Howick Heritage Plan.	I don't know
Review and refresh the Howick Tourism Plan.	I don't know
Encourage community groups to adopt a reserve, park, or waterway etc, and provide for restoration and maintenance activities with council support.	I don't know
Rescope the Industrial Pollution Prevention Programme (which educates and informs industry about the impacts they may have on local waterways) to broaden its outreach and include all businesses.	I don't know
Develop a community-led climate action plan.	I don't know
Explore the development of a Howick Ward 'business collective', or other group, to provide support for small business owners outside of the established Business Improvement Districts. This work may lead to establishing a new business association	

and possible new Business Improvement District (BID) programme.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Not acceptable to pay more for Aucklanders in this current crisis and will be wasted on ideological endeavours rather than needs anyway

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

No cycleways, no raised traffic crossings less ideological endeavours trying to manipulate Aucklanders to live as Council wants not how we want to.

## 2. What do you think of the transport proposal?

Do not support most of the proposal

### Tell us why:

Just spend less, if there is less money available less can be done, thats business, public transport as numbers show isnt a priority for Auckland as PT is and always will be preferred

### 2a. Is there anything you would spend more on?

Definately not! Cut the purse strings and practice fiscal restraint

### 2b. Is there anything you would spend less on?

Cycleways, pedestrian crossings other than paint and lights, anything based on the ideology of making car use more difficult.

## 3. Which options do you support for the North Harbour Stadium?

Other

### Tell us why:

Sell the land and use towards balancing books

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

**Tell us why:**

Makes sense we dont need shares in the airport

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Leasing brings in revenue, reduces costs and helps Aucklanders

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Other

**Tell us here:**

Reduce rates

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

We are being told there is no money, available and rates need to rise, why take on development requirements at a time where the books need priorities made

**5b. What option do you prefer for Bledisloe Terminal?**

Other

**Tell us why:**

Have a clause that the land can be recalled by council with a 2 year notice so in the future if the possibility and financial situation improves then the land can be aquired

**6a. What do you think of these proposals?**

Puketāpapa

**Puketāpapa Local Board Priorities**

**7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?**

I do not support most priorities

#129

**More specifically, what do you think of each priority we've listed above?**

Invest in opportunities to support local community leadership.	Not Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Not Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Not Important
Support initiatives that improve and encourage walking and cycling opportunities.	Not Important
Help coordinate and support local business groups.	Not Important

**Tell us why**

There is limited funds, we do not need support for cycleways only several people use, we do not need funding for climate initiatives, we need Aucklanders who are already struggling to have good provision of basic services only at a cost they can afford

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

Not solid, most based on flawed ideology

**8. Do you have any other comments?**

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Maintain roads, Donovan road needs repairs

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Reduce AT spending on cycleways, hardly anyone uses them as an e.g. Tamaki drive I walk there everyday. Hardly see bikes a lot of bikes still use main road.

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

Cycle ways and raised Speed breakers are an utter waste. Council and AT has ballooned with a lot of projects are going ahead just to use the budget not justifying the expenses.

### 2a. Is there anything you would spend more on?

Maintaining existing Roads

### 2b. Is there anything you would spend less on?

AT expenditure on Crossing and raised speed breakers.

## 3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

### Tell us why:

Good for sports on Shore and a Great venue.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

Council shouldn't be investors, they do not have expertise in this field.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

Leasing port will generate profits for Private firm as these firms will increase cost which will impact rate payers and take profits offshore. Melbourne and Sydney where DP world operate is a prime example

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Reduces rates and keeps us happy.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

See Queens wharf as an example what a waste of having cloud there , Was it worth it ??

### 5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

#### Tell us why:

We still need new electric cars, imagine all new car coming on trucks from Marsden point. Log trucks are already a menace do not want Car carrying on trucks on Motorways.

Help coordinate and support local business groups.	Very Important

**Tell us why**

Business drive local economy. Cycle ways are waste. I believe Foot paths can be used.

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

Road need maintenance.

**8. Do you have any other comments?**

Council and AT expenditures need to scrutinized. Seems they do not value the hardship rate payers are facing with paying the rates,

## Waitematā Local Board Priorities

7b. What do you think of our proposed priorities for Waitematā in 2024/2025?

I support most priorities

More specifically, what do you think of each priority we've listed above?

Deliver a new civic space at 254 Ponsonby Road.	Fairly Important
Complete detailed design of Leys Institute remediation and seismic strengthening, and progress physical works.	Fairly Important
Phased delivery of improvements for Heard Park.	Fairly Important
Deliver services and programmes that support youth activation, leadership, and wellbeing, particularly in Newmarket.	Fairly Important
Develop programmes that improve perceptions of safety within the City Centre, and our town-centres.	Very Important
Support local communities to develop Emergency Planning & Readiness Response Plans.	Fairly Important

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	Do less
Environment and regulation	Do more
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Flooding protection, climate change prep

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Short term projects

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

For people to START to use PT they will HAVE to be incentivised. It has to be better than the alternative (most of which is private car). That should be the focus. Without people using PT, all of this is pointless

### 2a. Is there anything you would spend more on?

reduce cost for users to use PT, and reliability.

### 2b. Is there anything you would spend less on?

no. keep things simple

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

### Tell us why:

Stadiums sit unused 99% of the time. Reuse the land into an area that gets a better return vs use

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

### Tell us why:

Selling our shares in the airport would allow us the funds to make massive infrastructure changes that affect our long term city. Yes the 6m per year is good but we need large amounts of money now to kick off import changes.

**4b. Which option do you prefer for the future of Port of Auckland?**

This area of the city is actually pretty hard to get to for most aucklanders. I don't think it should be prioritised as something like a stadium etc. It could be sold and turned into extremely high profit housing etc

**6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?**

Flooding must be prioritised. People have been out of their homes or in danger for too long with NO CHANGE. This has to happen soon before the councils slow movement has something worse that damaged houses to answer for

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

take control of Auckland Transport, and have GST on Council Rates & Services passed back to council for Council use.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop Auckland Transport, spending money on Speed Humps, and fix existing Roads. Once in a better position, review effectiveness of "speed humps". eg What is the cost benefit when calculating more CO2/Petrol usage, Repairs on vehicles (eg Brakes)/roads (damaging roads either side of humps), extra time delay, all due to these speedhumps. Raised pedestrian crossing next to schools, are OK.

### Tell us why:

Self insurance is a good idea, but we may need to grow fund further for future growth. Perhaps a small levy in rates added to grow this. ie after Year3

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Improved dividends would be nice, but as usual, political moves may reduce these dividends, so back to square one.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No

I would like council to reduce overall council admin overheads, reduce high salary caps, reduce long term consultants, unnecessary overseas travels. This would be the first thing any business would look into is reducing its own internal expense which is not mentioned anyway above.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

**2. What do you think of the transport proposal?**

Do not support most of the proposal

**Tell us why:**

Too much of these cost is passed to rate payers only and we are all over burdened with rising cost. Find a better of user pay system and not just build infrastructure because it will nice to have and benefit a very small percentage of people.

**Tell us why:**

It is adequate. Rasie money from ticket sales for further development

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

This coalition government has cut funding to the Council by abolishing th fair fuel surcharge. We need to sell shares.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Good idea. Also, MOVE the ports, We need to make the whole of the CBD shore available to the public.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

Public benefit: we need a first-class waterfront, not one dominated by gantries.

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

The more open space and public-use space the better. Beautification, add far more plantings

I support the 10-year plan

**8. Do you have any other comments?**

I appreciate the tremendous work that the Council and Boards do to make Auckland a modern, livable city. I am appalled at the two initiatives by central government which have robbed Auckland of a fair system to raise revenue for transport ( fuel surcharge) and the abolition of the low emissions vehicle discount, which would have gradually allowed the fossil fuel fleet to be replaced by e-vehicles. This in turn would have reduce air pollution.

If there is anything at all that the Council could do to reduce greenhouse gases, reduce the number of vehicles on the road I would support it. We need a congestion tax. We need incentives for people to use public transport. We need to continue to improve public transport. We need an incentive to change from fossil fuel to renewables. How about double the peak hour congestion charge on high emission vehicles like big SUVs and utes, the standard charge for smaller lower emitters and half the charge for e-vehicles.

Gradually force the gold courses to move out of the city, to free up land for multi-use.

Rates increases are OK provided the money is not spent on expensive consultants and plans are made rationally. For example the cancellation of the light rail project is a very good step. Unfortunate that \$228 million was spent on consultants before the project was shelved.

own and maintain pocket parks

for the value of land, many of these could be sold for over \$1m with protections for the trees on them. this would maintain the green look, provide income and reduce maintenance costs for barely-used tiny parks.

this is the only asset sales I would actually support.

## 2. What do you think of the transport proposal?

Support most of the proposal

I would still like the cycleways.

### Tell us why:

I've never been to anything at North Harbour but it is close to a transport hub. If it can be better used without knocking it down that would be the best option.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### Tell us why:

this appears to be a continuation of asset sales under a different name.

I disagree with asset sales as they are only ever a temporary solution.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

I do not support asset sales.

Even leasing the operation of the Port would be a gateway to the sale of it when the lessees run it into the ground to maximize their profits on it.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

the aim of the Auckland Future Fund seems to be to complete the sale of AIAL shares which I disagree with.

**4d. Do you have any feedback on any other part of the proposal?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

for no impact to the value of the port, gaining public space on the waterfront seems like a good idea.

**5b. What option do you prefer for Bledisloe Terminal?**

I don't know

**Tell us why:**

this would depend greatly on the cost and other purpose the Bledisloe wharf area would be used for.

**6a. What do you think of these proposals?**

Resume the <b>Natural Environment Targeted Rate (NETR)</b> and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the <b>Water Quality Targeted Rate (WQTR)</b> and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the <b>Climate Action Transport Targeted Rate (CATTR)</b> to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the <b>Long Term Differential Strategy</b> which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.	Do not support

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.

Introduce the <b>Franklin Local Board Paths Targeted Rate</b> of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the <b>Rodney Drainage Districts Targeted Rate</b> to reflect public feedback and updated analysis of the benefits to properties and boundaries.	I don't know
Increase the <b>Waitākere Rural Sewerage Targeted Rate</b> from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year. **6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?**

I support all refuse collection standardisation - there should be one system for all Auckland.

I believe some level of pay-by-weight was proposed, which I would also support even though it might work like a regressive rubbish-tax.

More bus and cycle lanes, more of the time.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#1170**

Don't remove any more raised speed table pedestrian crossings. Less on-street parking on arterial roads.

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

I don't support stopping some previously-planned initiatives, such as some raised pedestrian crossings and cycleways.

### 2a. Is there anything you would spend more on?

Bus and cycle lanes

### 2b. Is there anything you would spend less on?

Traffic management around work sites. Consider leasing the work site to the contractor, on a per area basis, to provide an incentive to block out smaller areas and complete works more quickly.

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I think that the Auckland council needs to think long term. We need to be thinking about the kind of city that our children will want to live in. We can't keep expanding outwards, we need to be fiscally responsible and intensify the population in the area that we currently have. We need to design the new communities around engagement

**#1237**

and social life. Create space for people to thrive. We also need to plan for ocean rise. Let's not just blindly wait for that to happen.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Less mucking around. Work with other stakeholders. Don't just put in new footpaths in areas where they are getting redeveloped and torn up a year later. If you start a project, finish it. Don't half finish a project and then disassemble it half way through. That's wasting money.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

If we don't get our public transport right, then we are going to keep making our city more congested, worse to drive in and more expensive to run. A better public transport system makes it more attractive to use. Dynamic lanes are smart. It's an extra lane of road for very little cost.

**2a. Is there anything you would spend more on?**

Cycleways. If we want improved mental health, fitness, and congestion, we have to build a cycling culture. That's just a fact. We can't just grow the population and hope people catch a bus. We need to plan for the city we want.

**2b. Is there anything you would spend less on?**

Motorways. If the traffic is \*\*\*\*\* , then people will take a bus or cycle. We can't just keep catering for cars and building our city around cars.

**3. Which options do you support for the North Harbour Stadium?**

Keep the stadium precinct as it is

**Tell us why:**

**#1237**

I really couldn't care less about the north shore stadium. If the north shore want it, they can fund it.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Other

**Tell us why:**

I think that the fund needs to ensure that it is following ethical investment standards and isn't investing in fossil fuels, weapons, and other unethical investments. If it meets these standards, then I'm happy with it.

**4b. Which option do you prefer for the future of Port of Auckland?**

I don't know

**Tell us here:**

If we used the money to invest in a greener future now, then we are being wise. I can see the benefits of that. However, if we invest that money poorly, it does mean 30 years of income issues for the council. So there is that.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

We need to invest in Auckland now. We are way behind on a bunch of things we needed to get done years ago.

**4d. Do you have any feedback on any other part of the proposal?**

#1237

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Where are you planning to ship everything to? Tauranga? They don't have a good rail system yet, so we are just going to have a heap of trucks coming in. I don't know of many electric trucks yet, so we are just burning fossil fuels. It's valuable land, sur

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Same as my other answer. You can't just truck everything into Auckland. That's a \*\*\*\*\* plan.

I reckon that rates could be charged to residential properties at a population density rate. If you want to live in a sparse suburb and demand that council services extend to

definitely not required (where no one is working). Also, why on earth do they need to buffer trucks, one behind the other for safety. ACC is being ripped off by their contractors. Mr. Mayor please stop AT from creating more speed bumps as they are a waste of money (some streets have up to seven or more, what a load of rubbish as there are far cheaper means for safety. Mr. Mayor have a referendum on these subjects and you will find the majority think they are an eyesore and a pain for all drivers in Auckland. AT will also see that Aucklanders are sick and tired of their arrogance, and out of touch decisions..

## **2. What do you think of the transport proposal?**

Do not support most of the proposal

No

### **2b. Is there anything you would spend less on?**

Yes, no more stupid speed humps, no more cycle ways, stop reducing road lanes for motorists (increase them) as most Aucklanders have not seen (with all the money spent) any improvement with public transport. Under AT Aucklanders in general fell the benefits have gone backwards, not forwards.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do more
Environment and regulation	As proposed
Parks and Community	Do more
Economic and cultural development	Do more
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Continue the light rail project which connects to the airport.

A separated or bollard-protected bike lane down dominion road.

**#1640**

A lane across the harbour bridge converted to a bike/walking/jogging lane, with bike path connections on the North Shore.

Investigation into new train corridors. The Busways are a good intermediate solution, but a train line has more scope for growth and has lower operating costs over a lifetime.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Less road infrastructure - we have enough land dedicated to car and truck transport. Trucking can be more efficient if active and public transport modes are prioritised, and car congestion reduced.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

More should be done to build infrastructure for both active and public transport modes. This would be the best way to invest in the future of our city, enabling it to support expected population growth. It also pairs well with the Auckland Unitary plan.

**2a. Is there anything you would spend more on?**

Continue the light rail project which connects to the airport.

A separated or bollard-protected bike lane down dominion road.

A lane across the harbour bridge converted to a bike/walking/jogging lane, with bike path connections on the North Shore.

Investigation into new train corridors. The Busways are a good intermediate solution, but a train line has more scope for growth and has lower operating costs over a lifetime.

**2b. Is there anything you would spend less on?**

No roading expansions. Our current roads are at capacity, and adding more lanes is the least efficient way to increase the carrying capacity of the city. Congestion needs to

**#1640**

be diverted to more efficient modes of transport where it can be, so that trucking and other essential vehicles can get to where they need to go.

### **3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct, Change the operational management

#### **Tell us why:**

Keep the community playing fields, but the other land could be redeveloped into mixed use commercial and housing. This would increase revenue to fund better transportation options.

### **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

#### **Tell us why:**

Asset sale, even if it is to transfer the value into a diversified fund is probably not worth it in the long term.

### **4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

#### **Tell us here:**

As long as the terms are favourable to Auckland Council and the asset is still owned by Auckland Council, the city can use the funds to transition into a more profitable city via densification and transport initiatives.

#1640

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

We desperately need upfront investment in infrastructure that aligns with a transition to a modern, dense and low-car city.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

The upfront cost needed to free up the wharves can be utilised better elsewhere.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

**Tell us why:**

The upfront cost needed to free up the wharves can be utilised better elsewhere.

### Albert-Eden Local Board Priorities

7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?

I support all priorities

More specifically, what do you think of each priority we've listed above?

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Very Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Fairly Important

#1640

Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Very Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	Very Important
Working with the community on activations in the Mt Albert Civic Square.	Fairly Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Fairly Important

**Tell us why**

**7c. What do you think of the Albert-Eden proposed priorities for the 10-year budget 2024-2034?**

I'd like to see more initiatives around encouraging active modes of transport, as this area is so close to the city that most residents are a 20 minute e-bike away from town. Temporary cycle infrastructure could be set up along dominion road. This pilot project could be used to determine demand and gain feedback from the community.

**Tell us why**

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

Much of this board is easily within cycle distance of the CBD, if there was adequate safe and separated cycling infrastructure. The cycle path that goes along SH20 and meets with SH16 is not well utilised as it is not a direct path to the CBD. A temporary installation of protected bike lanes using planter boxes could be trialed on dominion road to make a more direct route,

Local small businesses help to shape a community and sense of place, and complement Auckland's densification goals. More independent food stores would be great.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#1951

Do not support most of the proposal

**Tell us why:**

I'm not convinced public transport will ever work in Auckland. The city is so spread out, there are so many bays and inlets that prevent efficient routes, was never designed so that people can live and work close by. I only use my car when I need to go somewhere, public transport has to run 24x7 just in case I might use it, I can't see how that is more efficient or environmentally better. The fact that even though massively subsidised, any PT trip costs more than the cost of running my car supports this theory.

**2a. Is there anything you would spend more on?**

Roads. People saying that building roads encourages more cars is bonkers, increased the population by 100k people per year, not spending anything on infrastructure, and then wondering why the roads are blocked is what is bonkers.

**2b. Is there anything you would spend less on?**

Raised pedestrian crossings on main routes. I appreciate they do reduce harm risk but too many on main routes where there is a high volume of cars where lights exist or would be fine. Must be a negative for the environment too as cars have to brake then accelerate.

Over-engineered cycle lanes e.g Taniwha St GI, Mission Bay, cost a fortune and make it worse/riskier to cycle on and worse for drivers. I've been a cyclist in AK for 25 years and cycle lanes like out to Westgate or South by Takanini are great but the two changes above for example are a waste of money. I feel perfect safe riding on a painted strip like Carrington Rd. Physical separation, unless completely separate road surface, really is a waste of space. The fatality out East where the drunk cop went over a separator to hit a cyclist shows they aren't really a protection.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

### 2. What do you think of the transport proposal?

**#2352**

Do not support most of the proposal

**Tell us why:**

The raised pedestrian crossings are an absolute nonsense for the cost of investment. They offer no tangible benefit to the pedestrians, slows down traffic and more wear and tear on vehicles.

Traffic speed should be managed through speed cameras with tougher fines (which is an additional funding to council)

**2a. Is there anything you would spend more on?**

There are vast areas of the roading network including motorways where the roads can be substantially widened. I can understand why the council is not interested in this as the cost is too high due to their own bearacratc costs they introduced themselves. However, this should be seriously considered before taking the cowardly option of limiting traffic. This is only going to add additional cost of living to rate payers as we are all in traffic because we have to be in traffic. An added cost doesn't mean we no longer have to be in traffic.

**2b. Is there anything you would spend less on?**

cycleways - which doesn't get used anyway

raised pedestrians crossings

new traffic lights (that are always getting installed in the most unnecessary places and the most unnecessary ways).

**3. Which options do you support for the North Harbour Stadium?**

Change the operational management

**Tell us why:**

This has no real benefit to a significant potion of Aucklanders. The entire thing should be scrapped.

**#2352**

Council should rather consider one major stadium that is of international quality rather than trying to maintain several delapidated stadiums, which benefits all Aucklanders.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

Clearly council isn't capable of handling this. At least an oversight by an external funds management should have some tangible benefits.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Leasing should provide more flexibility to manage the port operations freely. Council is not capable of properly managing the operations of the port.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

#2352

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

**6a. What do you think of these proposals?**

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Capital investment into public transport, roading maintenance, and also investment into further parks that promote environmental restoration.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#2583**

Decreasing bureaucratic processes - Building consent and resource consents take too long, There needs to be a focus on pragmatism and the overall goal of any job - as opposed to paying consultants or administrative staff to tick boxes.

## **2. What do you think of the transport proposal?**

Support most of the proposal

### **Tell us why:**

Ferry decarbonisation gives very limited benefits to all. The only real benefits from ferry investment are for those from Waiheke. In all other senses there should be further state highway connections - expanded below.

### **2a. Is there anything you would spend more on?**

Secondary crossing or at least the sky path. Whilst this is a crown issue, there is no reason why Auckland Council could not pick this up.

Further more a secondary crossing connecting Devonport to Mechanics bay would allow a huge number of motorists to bypass the spaghetti junction and connection further south if they are headed that way. There is also a need to expedite construction for rapid transit that connects from airport to the CBD.

### **2b. Is there anything you would spend less on?**

Pedestrian crossings. Spend less on those. Especially if they are raised tables - what is the actual point in raised tables at the pedestrian crossing? If a vehicle is travelling too fast its travelling too fast already once it hits the raised table. Why not just put a speed bump 20m ahead of painted lines.

## **3. Which options do you support for the North Harbour Stadium?**

Keep the stadium precinct as it is, Change the operational management

### **Tell us why:**

**#2583**

Why are no concerts ever held here? Someone needs to ask the questions on what the land would be redeveloped into, and/or what other purposes could the stadium serve other than for sporting. Redevelop it into Disneyland or a theme park, or a motorsports park.

**Tell us here:**

Realistically Auckland Port needs to move. The current location creates major bottlenecks within the transport network - Which city in the world has their largest port sitting in its CBD?

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

Where is the lobby for central Government funding? Ultimately Auckland generates 40% of New Zealand's GDP. Yet Central Government funding meets no where near that.

There needs to be major focus on capital infrastructure for Auckland along with major funding from Central Government - Whilst I support the large increase in rates from Auckland Council; Central Government also needs to come to the party - especially given Auckland is much more productive than any other region. We are the gateway

internationally to the rest of the world. Further more, do not be like the previous government promising rainbows and unicorns. Start with smaller bites of construction so that all residents can enjoy short term as well as long term benefits.

I support most priorities

### More specifically, what do you think of each priority we've listed above?

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Not Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important

Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Very Important

Working with the community on activations in the Mt Albert Civic Square.	Very Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Very Important

**Tell us why**

There needs to be a shift in what libraries can be used for as paper books become less and less popular - since we live in the 21st century now and 90% of information flow is through digital methods. Libraries can be used to shift to supporting the elderl

**7c. What do you think of the Albert-Eden proposed priorities for the 10-year budget 2024-2034?**

**7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?**

I support all priorities

**More specifically, what do you think of each priority we've listed above?**

Invest in opportunities to support local community leadership.	Very Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Fairly Important

#2583

Support initiatives that improve and encourage walking and cycling opportunities.	Fairly Important

Construction work from Watercare has been much less transparent than desirable. Also slow. Also need to fix the roads and the buses.

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

Better public transport planning and investment required to connect with Onehunga, Newmarket, and CBD.

**8. Do you have any other comments?**

Stop wasting money on pedestrian crossings. Get more aggressive and hold contractors to account for failures to deliver. Push central government for further funding. Stop wasting money on bureaucratic processes that bring no benefit to the residents other than the consultants who profit off them.

Lowering rates and taxes will enable people to spend more and encourage them to visit and holiday locally. People are struggling financially, especially since we have just come out of a pandemic. Everything has gone up in price utilities, rates, taxes, insurance, food, gas etc etc etc

The promise of not increasing rates was a shallow one. People are squeezed to the max trying to keep their heads above water after the pandemic. I was directly affected as a sole business owner. Now it seems like nobody cares a \*\*\*\*\* how people like me are going to live.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Reduce reliance on private consultancies. Bring these functions in house. Remove the comms team completely. It's not required. Send out a pamphlet. Stop branding and website upgrades etc unless critical.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Automate processes. Reduce staff.

**2. What do you think of the transport proposal?**

Support all of the proposal

**Tell us why:**

This is ridiculous. The council should be doing these things anyway. It shouldn't be a "new" plan. Just do what you are paid for.

**2a. Is there anything you would spend more on?**

No. Reduce all spending.

**2b. Is there anything you would spend less on?**

Staff, executives. Consultants! And I'm not talking contractors.

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

**Tell us why:**

Dont sell the land. Develop and rent. Future income trumps short term.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

This is an income stream. Stop selling income sources to realise short term gains.

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Again, we don't need 11,500 staff in council along with outsourcing / consultancy. Bring core functions in house. Remove admin staff and automate.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

This city has been poorly run for years. Executive and staff bonuses should be linked to streamlining process and reducing spend.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	Do less
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Put in basic roundabouts at intersections instead of traffic lights.

**#3184**

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

So much money has been spent already, it would be wasteful to stop now. However, you cannot keep taxing people who are struggling. You will end up with an ugly revolution.

### 2a. Is there anything you would spend more on?

No

### 2b. Is there anything you would spend less on?

Install less Traffic lights. Use roundabouts.

If there was a higher bar for getting your licence (competence, confidence, courtesy), then more people would use public transport and the roads would be safer and transport would flow better and the economy would be better off. The balance is right there. It's a no Brainer. Seriously - who is in charge?!?

## 3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

### Tell us why:

We're all having to tighten our belts... as should the council.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**#3184**

**Tell us why:**

No. Its an Auckland asset that can be retained by not wasting money elsewhere.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

We need an option to keep rates low. Lease it out short term, under our terms and conditions to generate some funds to keep rates low. Or you're going to end up with a revolution of disgruntled ratepayers which will be far more damaging to the economy.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

As above

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

I don't trust Auckland council to use the sites profitably... to reduce rates. It will be a fanciful wasteful spend of money.

#3184

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Auckland Council (since becoming one Council), has provided less with rates increases. The fact that one of the key drivers of one Council was one decision-making entity with lower overheads I.e one executive team and no duplication of corporate functions. However, this has not been the case! Poor decision-making throughout. What has been publicised around zebra crossing costs and building something one

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#3438**

The Council have done absolutely nothing for Three Kings in the 25 years I have lived here. Our street (Dornwell Road) has footpaths so old and overgrown with grass etc that everyone with pushchairs, wheelchairs, walkers etc have to walk on the road.

As I feel we pay rates for absolutely no services I'd rather see Auckland Council actually do things that they should be doing rather than pandering to minority groups with cultural events, gay parades etc.

## **2. What do you think of the transport proposal?**

Do not support most of the proposal

### **Tell us why:**

We don't need cycle ways - I see NO-ONE using the one in our area. Kids don't cycle anymore, adults don't cycle anymore. Get up to date Auckland Council!

Introducing car charges for certain areas - what about having to drive an 89 year old to hospital for regular checkups that are at 8am? She has no other form of transportation as buses are \*\*\*\*\*, taxis are way too expensive and unreliable, funnily enough she can't cycle (DOH).

You are greatly hindering, upsetting and prejudicing the elderly, handicapped, infirm and needy by your elitist, self-serving, rich people ideas. You are so out of touch with your population that it's unbelievable.

### **2a. Is there anything you would spend more on?**

**Tell us here:**

the Ports are ugly and Council is not interested in doing anything with them, so just make money from them instead.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**4d. Do you have any feedback on any other part of the proposal?**

## Puketāpapa Local Board Priorities

### 7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I do not support most priorities

#### More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	Not Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Not Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Fairly Important
Support initiatives that improve and encourage walking and cycling opportunities.	Not Important
Help coordinate and support local business groups.	Not Important

#### Tell us why

NO ONE uses the cycleways here!!!!

Leaderships don't need Council support if they are true leaders.

Businesses don't need help to coordinate support etc - they need Police support.

### 7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

Fix the footpaths so people can walk and stop wasting money on useless cycleways.

### 8. Do you have any other comments?

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We could afford more taxes, as we are not getting payrise more than 2.5% a year. We should get atleast a payrise of 15% to cop up with the higher rates etc.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#3504**

**2. What do you think of the transport proposal?**

Do not support most of the proposal

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Better public transport. Reduction of private vehicles in city.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#3581**

Build a huge sports stadium.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

I do not support reduction of cycle lanes nor do I support reducing raised pedestrian crossings.

**2a. Is there anything you would spend more on?**

Traffic cameras to deter abuse of bus lanes.

**2b. Is there anything you would spend less on?**

No. Auckland must stop missing opportunities.

**3. Which options do you support for the North Harbour Stadium?**

Keep the stadium precinct as it is

**Tell us why:**

Because I don't live on the North Shore & have little interest in sport.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

**#3581**

I am opposed to selling public assets, particularly to wealthy corporations or individuals. They have been built up over time by previous generations. Morally, they are not ours to sell for short term gain.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

As previously explained.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Because it may lead to an asset sale.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

For to many years, Auckland has lived like a camel on its hump. It is now time to pay rather than plunder future generations.

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

not applicable

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#3670**

No, parts of council such as Auckland Transport already do a poor job with what they have. Watercare is another example, with costly third party contractors making our roads clogged with works that last past their due date.

## **2. What do you think of the transport proposal?**

Support most of the proposal

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

You are anyway already sucking out more than enough money from ratepayers to cover up for your own shortcomings in council governance. Stop this approach and get on with making your own administration more robust, accountable and efficient. Currently you display none of these three essential qualities. Every year you say you will keep rates rise low for the next few years, but strangely come out with a new 10

**#4253**

year plan that provides new excuses for increasing rates way beyond the earlier promised cap in increase. This is called dubious approach and you should stop it forthwith.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Show "less inefficiency" within your council setup

**2. What do you think of the transport proposal?**

Do not support most of the proposal

**Tell us why:**

It is a known fact that Auckland Transport is a useless organisation that has kept pulling down the standard of public transport in Auckland every year since its inception. This is an organisation that stupidly spends more than half a million to build each of these illogical raised speed breakers (when Wellington does the same thing at less than 10% of that cost). It is because of such a white elephant within the council set up that ratepayers money is being flushed down the drain in a totally wrong way. Till the time you do not reign in this gigantic useless organisation nothing good can happen to the public transport system in Auckland. The network has kept going downhill for more than a decade now, and I do not see it improving in anyway under this current council and AT working relationship. AT needs to come totally under council governance to make it accountable. Currently AT is practically not accountable to anyone, not even council.

**2a. Is there anything you would spend more on?**

Nothing. You already are getting more than enough. Learn to use it efficiently.

**2b. Is there anything you would spend less on?**

Spend less on council and AT and Watercare mismanagement

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct, Change the operational management

**#4253**

**Tell us why:**

Selling part of its land while keeping the important playing areas intact along with changing the operational management is the most balanced and viable option available under current circumstances.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

Because I do not believe there is a good robust plan in place to manage this fund. Nor is this plan very thoughtfully planned. It appears to be a hasty plan with little practical details. This leads me to believe that this fund will be misused and not get the desired outcome.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Because it allows funds to be made available for the AFF

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

#4253

It is the most logical investment of the money

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

I do not still see a clear council plan in this regard

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

I don't know

**Tell us why:**

Not very clear about its viability - in any of the choices made available

**5b. What option do you prefer for Bledisloe Terminal?**

I don't know

**Tell us why:**

Same as above reason

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#4343**

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

Disagree with stopping planned cycleways and raised crossings, these are needed for safety and shouldn't be a political decision. Sweating assets through dynamic lanes etc makes sense over investing in road widening,

### 2a. Is there anything you would spend more on?

Cycleways and other safety improvements that have a proven track record of creating behaviour change and reducing the need for other expensive upgrades.

### 2b. Is there anything you would spend less on?

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

### Tell us why:

The stadium is hardly used and is expensive to maintain, this facility doesn't meet the needs of the community currently which is why it is underutilised.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### Tell us why:

## 4b. Which option do you prefer for the future of Port of Auckland?

**#4343**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Providing and maintaining community resources including sport and recreation facilities and regional parks and green space, addressing climate change and sustainability must be priorities

**#4414**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Nil

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

Efficient and sustainable public transport plus safe active modes should be top priorities

**2a. Is there anything you would spend more on?**

Efficient, reliable, affordable and sustainable public transport and safe cycle and walk ways

**2b. Is there anything you would spend less on?**

**3. Which options do you support for the North Harbour Stadium?**

Change the operational management

**Tell us why:**

Community input is a way of reducing costs but retaining a community resource

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

**#4414**

Provided that there is control as to ethical investments and there is a specified limit on management fees and admin costs and the fund is held subject to regular review by the council

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

I do not agree with a 3rd party as lessee being involved. There is more control and continuity with retaining underlying ownership

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

For the current period but could be reviewed in the future

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

#4414

Extra public space would be beneficial for the community. I am opposed to any extra trucking. Rail freight should be a priority

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

Public benefit is always desirable provided that there are no major negative impacts on the port operations such as extra trucking required

**7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?**

I support most priorities

**More specifically, what do you think of each priority we've listed above?**

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Not Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Fairly Important

#4565

Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Fairly Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	Fairly Important
Working with the community on activations in the Mt Albert Civic Square.	Fairly Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Not Important

**Whau Local Board Priorities**

**7b. What do you think of our proposed priorities for Whau in 2024/2025?**

**More specifically, what do you think of each priority we've listed above?**

We will work with our partners to build community capacity, from climate/emergency preparedness and community resilience to increased participation and community capability.	Not Important
We will encourage and support volunteerism and community participation, especially through environmental and ecological initiatives around the Manukau Harbour and foreshore, the Whau River and its tributaries, and our urban ngahere.	Very Important

#4768

We will continue to undertake governance-level engagement and collaboration with mana whenua and the other west Auckland local boards.	Fairly Important
We will work with the local BIDs where possible, to support local economy and to realise shared goals around climate action, community connection and belonging.	Very Important
We will consider accessibility and inclusion across our services, engagement, and other initiatives.	Very Important

**Tell us why**

I am in 2 social groups that the disability advocates and ethic minorities support.

**7c. What do you think of the Whau proposed priorities for the 10-year budget 2024-2034?**

pretty cool.

**8. Do you have any other comments?**

nope.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

Transport	Do more
Water	Do more
City and local development	As proposed
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I would like to see Auckland Council investing more in public transport. Projects such as the Auckland Light Rail should be brought back to increase the flow of public transport and reduce the public's requirement for a personal motor vehicle.

#5141

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

I would like to see the Auckland council investing less in police and prison initiatives. Instead, relocating that funding to public welfare, community outreach, creating more affordable housing and other initiatives that are directly linked with the improvement of well-being for all those residing within Tamaki Makaurau.

**2. What do you think of the transport proposal?**

Do not support most of the proposal

**Tell us why:**

I support the investment in public transport and creating a better system with capped weekly public transport costs, however the money that would be spent on creating the dynamic lanes and "network optimisation" could be used more effectively by diverting that income to further public transport costs. Such as, reducing the price of public transport, paying public transport employees a higher wage, increased number of public transport services. I can't say I support most of the proposal because of the lack of information about what "Network Optimisation" will look like and how they will be implemented. Stopping initiatives such as raised pedestrian crossings and cycleways will further the usage of cars by people and will discourage walking and cycling. If people are not walking or cycling on our roads who is meant to be walking to the bus stop? Creating raised pedestrian crossings will make it safer for those who want to use the increased and more effective public transport. Cycleways will also lead to a further use of public transport, if like many other cities in Aotearoa we design the public transport with cyclists in mind. Bike racks on the front of busses is the first thought that comes to mind.

**2a. Is there anything you would spend more on?**

I would spend more on public transport and pedestrian focused infrastructure.

**2b. Is there anything you would spend less on?**

Spend less on initiatives that incentivise car based infrastructure, such as widening of motorways and road designs that lead to unsafe speeds.

**#5141**

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

**Tell us why:**

North Harbour Stadium should be redesigned in a way that better makes use of the space it takes up. Redesigning the space to create a center of community activity could breathe new life in to it. Creating a community sports centre with public transport that links the university, nearby mall and nearby park and ride, could create a hub of activity for local sports groups or individuals who want a place to work out outside. The addition of increased public transport could lead to a reduction in the number of carparks required for both the stadium and the mall. An expansion of the nearby Albany Lakes Civil Park or Hooton Reserve could be an opportunity to plant native trees and reinvigorate a commitment to local conservation. Increased walkability and cyclability around the area could foster an environment of health and change.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

**Tell us why:**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	Do more
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Initiatives that deliver real value to Auckland today and tomorrow. Some regional councils are encouraging age-friendly housing design by removing resource consent contributions for new housing.

I'd also be willing to subsidize cheaper PT for the under 25's BUT I'd like better security from AT as current AT processes are open to abuse and +25's able to benefit.

**#5223**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Reduce number of local board representation as it delivers negligible value.

Ensure AT & Panuku deliver value based on business case not ideology. Both organizations are too loose in spending v value delivered.

**2. What do you think of the transport proposal?**

Support all of the proposal

**Tell us why:**

Costs need to be capped like other international cities. Living in the suburbs though HUGE disparity in the PT offer and seems unfair we pay toward a vastly inferior service.

Raised crossings are of value to the disabled community BUT fixation with speed humps beyond designated crossing currently is ridiculous. We have 8 speed humps up our under 300m of road!

**2a. Is there anything you would spend more on?**

Under 25's discounted PT

**2b. Is there anything you would spend less on?**

AT senior management & spin doctors.. AT needs to listen to communities rather than pushing ideology and this includes bike lanes. \$44million spent in K-Rd bike lanes with minimal benefit to the community beyond a few 40yr old European males. Auckland community is diverse & most can't afford an e-bike.

**3. Which options do you support for the North Harbour Stadium?**

Change the operational management

**Tell us why:**

It's not fit for purpose

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Other

**Tell us why:**

Support a partial sale only

**4b. Which option do you prefer for the future of Port of Auckland?**

Other

**Tell us here:**

They've been pretty underwhelming so maybe a private company would run it better and return money to Auckland.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

Can't imagine it would be a huge return given current performance

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

#5223

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do less
Environment and regulation	Do more
Parks and Community	Do less
Economic and cultural development	As proposed
Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Just keeping the community as safe as possible as no increase of income should substitute for that.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less committees that aren't super impactful to the community.

## 2. What do you think of the transport proposal?

Support all of the proposal

### Tell us why:

Public transport is extremely important and especially in the city where there's a lot of congestion.

### 2a. Is there anything you would spend more on?

Light Rail

### 2b. Is there anything you would spend less on?

Cycle ways

## 3. Which options do you support for the North Harbour Stadium?

I don't know

### Tell us why:

I don't know enough about this issue to comment

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

### Tell us why:

Because the Council is prioritising mainly good things for the future of our society. Also being able to raise money for the rest of the future plan seems like a good idea.

**#5390**

**4b. Which option do you prefer for the future of Port of Auckland?**

I don't know

**Tell us here:**

Not educated enough to comment.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

I don't know

**Tell us why:**

**5b. What option do you prefer for Bledisloe Terminal?**

I don't know

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Everything - these are all essential services, and it is an INVESTMENT in Auckland. Cutting costs in the short term is expensive in the long term!

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#5684**

Absolutely not. These are all essential services, and investing in them will help Auckland & Aucklanders to prosper, giving a better financial base for the future.

**2. What do you think of the transport proposal?**

Support most of the proposal

## Albert-Eden Local Board Priorities

**7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?**

**More specifically, what do you think of each priority we've listed above?**

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Very Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Very Important

#5684

Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Very Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	Very Important
Working with the community on activations in the Mt Albert Civic Square.	Very Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Not Important

Economic and cultural development	As proposed
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Basically tidy Auckland up, its becoming scruffy with all the cuts in budget

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#5724**

## 2. What do you think of the transport proposal?

Support all of the proposal

### Tell us why:

We need to fix our roads and also get more public transport, especially from more densely populated areas

### 2a. Is there anything you would spend more on?

Why can't we use our harbour more, have more ferries, from such places as Takapuna, St Heliers etc, this would also required shuttle buses as you can't build massive car parks. Car parks should NOT be knocked down until there is sufficient public transport to allow people to get out of there cars.

### 2b. Is there anything you would spend less on?

All these stupid road humps, why do we need road humps and traffic lights at the same point, what a waste of money

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

### Tell us why:

That stadium always seems under used, so we need to use it, or sell it

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

### Tell us why:

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

It appears that at the moment we need the money to help fund operations, maybe at some point in the future we can look at putting money into the Auckland future fund

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

At this stage maybe we should leave things alone, maybe this should be reviewed in 5 years

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

#5724

Tell us why:

We don't need any more trucks on the road, so unless the freight can be moved from the centre of the city by rail, we should leave this option alone at the moment

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More safe cycleways and public transport.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#5854**

Less greenfield development on the city fringe. It is expensive and causing transport and infrastructure issues. Would prefer more brownfields developments within the exiting town centers.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

I support these except the reduction in cycleways. They can be cheap and easy and help keep people safe.

**2a. Is there anything you would spend more on?**

Public transport and cycleways. Including more 24/7 busways.

**2b. Is there anything you would spend less on?**

Less new roading projects.

**3. Which options do you support for the North Harbour Stadium?**

I don't know

**Tell us why:**

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

**#5854**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

I disagree with a 35 year lease as we would lose control of a strategic asset and piece of land on the water front that could be developed into a better space.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

we should invest the dividends and profits so in the long terms we are less impacted by the yearly fluctuations of the port operations and allow the council to diversify its assets.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

I like the idea of the Auckland future investment fund as long as it is setup in a way that cannot be raided by future councils for uses it wasn't intended for.

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

Transfer to a council and develop it.

#5854

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

Great opportunity to develop the land into an asset that provides a great new space for people and can bring in more revenue for the council.

**6a. What do you think of these proposals?**

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

<b>Transport</b>	Do more
<b>Water</b>	As proposed
<b>City and local development</b>	Do less
<b>Environment and regulation</b>	Do more
<b>Parks and Community</b>	As proposed
<b>Economic and cultural development</b>	As proposed
<b>Council support</b>	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I support further investment into a surface light rail rapid transit network starting with a route from the City Centre to Mt Roskill, and then further expansion to Onehunga, Māngere and other transport corridors such as the North-Western and Northern corridor. Any busway development along the North-Western corridor should be future-proofed for surface light rail upgrades. Consistent work over the last decade, reflected

**#5885**

in Auckland Transports Auckland Rapid Transit Pathway 2023 report, has shown that to effectively address Auckland's congestion issues we cannot rely solely on a bus network. The busiest bus corridors in our city are already reaching capacity, and the long-term plan should reflect that reality.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

I think the surface light rail down Dominion Rd will be a successful public transport project that the previous government squandered

**2a. Is there anything you would spend more on?**

I want to see Auckland Council spending more to develop a surface light rail network, with a City Centre to Mt Roskill line constructed as a priority

**2b. Is there anything you would spend less on?**

**3. Which options do you support for the North Harbour Stadium?**

I don't know

**Tell us why:**

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**#5885**

**Tell us why:**

From an investment point of view it is a no-brainer to me that we would want to diversify the shareholding to reduce the risk

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

Want to keep the port directly under the council so environmental changes can be made more quickly and easily if needed

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

Reduce the burden of rates rises in the future

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

**7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?**

I support most priorities

**More specifically, what do you think of each priority we've listed above?**

#5885

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Fairly Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Very Important
Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Very Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	Fairly Important
Working with the community on activations in the Mt Albert Civic Square.	I don't know
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Not Important

**Tell us why**

I don't know what activations in Mt Albert Civic Square are, please use plain English

Feel like if you remove rubbish bins from parks people will still litter anyway, making it harder for good samaritans to clean up afterwards and making the environment

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I would like more investment in public transport, especially a SURFACE light rail to replace the heaving bus routes and transport links in and out of the city. I was extremely excited when I first heard about the plan to rebuild the light rail route to Mt Roskill after having lived in Melbourne for nearly 8 years and getting used to

**#5950**

something functional, regular and extremely beneficial to local businesses, bars and restaurants.

I support further investment into a surface light rail rapid transit network starting with a route from the City Centre to Mt Roskill, and then further expansion to Onehunga, Māngere and other transport corridors such as the North-Western and Northern corridor. Any busway development along the North-Western corridor should be future-proofed for surface light rail upgrades. Consistent work over the last decade, reflected in Auckland Transport's Auckland Rapid Transit Pathway 2023 report, has shown that to effectively address Auckland's congestion issues we cannot rely solely on a bus network. The busiest bus corridors in our city are already reaching capacity, and the long-term plan should reflect that reality.

Additionally, I support Auckland controlling its own transport priorities. An "Auckland Deal" provides the means for central government to support Auckland Council's priorities, rather than the other way around. A surface light rail network would provide opportunities for growth, development, and productivity in the city. I believe this should be included in the "Auckland Deal" with central government. I urge Auckland Council and the Mayor to make the development of a surface light rail network, starting with the City Centre to Mt Roskill line, a priority in such a deal.

Puketāpapa

## Puketāpapa Local Board Priorities

**7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?**

I support most priorities

**More specifically, what do you think of each priority we've listed above?**

Invest in opportunities to support local community leadership.	
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	

#6038

Consider our investment in facilities and services to see if there are opportunities to do better.	
Support initiatives that improve and encourage walking and cycling opportunities.	
Help coordinate and support local business groups.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More provision of public transport, including increased frequencies of routes, bus lanes and bus priority,

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

I am not willing to sacrifice anything in order to pay less in rates.

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

I do not support stopping some previously planned initiatives like raised crossings and cycleways. These are critical safety improvements that are necessary to save injuries and lives.

I support public transport improvements and network optimisation.

### 2a. Is there anything you would spend more on?

More bus network improvements to frequency, reliability and electrification.

### 2b. Is there anything you would spend less on?

New roads in greenfield areas.

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

### Tell us why:

Redevelopment will create an opportunity for the council to develop more sustainable revenue sources, increase housing provision and adapt the site to a wider range of uses that serve the community.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

**#6115**

**Tell us why:**

A fund will increase resilience and opportunity for growth of the council's assets, allowing for strong funding opportunities in the future. Rules around how the funds can be accessed and spent must be established to ensure they are not relied upon to reduce rates or increase risk to the council and instead be used to fund greater provision of services.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

I believe the port should not be in the city centre and eventually needs to be moved to another location or closed with reliance on other North Island ports with rail access to service Auckland's shipping needs. Any option must ensure the council have the flexibility to end the lease early and allow progressive development of the port lands into publicly accessible spaces. However, I recognise that the high upfront cash injection to the AFF is required to create a viable and valuable investment platform and it is best to get this off to a strong start to enable funding for this development in the future.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

Council services should move away from being funded by commercial ventures that are exposed to risk to ensure that a bad year of profits of the company will not need to result in cuts to services that the council offers.

**4d. Do you have any feedback on any other part of the proposal?**

#6115

Tell us here:

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

I believe that access to the waterfront is what makes Auckland great and so provisions to increase public access and develop the wharves into something that all Aucklanders can enjoy is critical.

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

I believe that access to the waterfront is what makes Auckland great and so provisions to increase public access and develop the wharves into something that all Aucklanders can enjoy is critical.

Albert-Eden, Puketāpapa, Waitemata

## Albert-Eden Local Board Priorities

7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?

I support all priorities

More specifically, what do you think of each priority we've listed above?

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Very Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Very Important
Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Very Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to	Very Important

investigate what the long-term library solution might be and how we will fund it.	
Working with the community on activations in the Mt Albert Civic Square.	Very Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Not Important

**Tell us why**

Removing rubbish bins in parks will increase waste in the area as people will simply dump it if there is not a place to put it.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Improved water infrastructure, fix potholes and footpaths

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#6311**

Less cycleways for recreational use (or defer some of the changes)

Less measures to slow traffic

Less funding of cultural events

## **2. What do you think of the transport proposal?**

Support most of the proposal

### **Tell us why:**

I'm not happy that 10% of the rates is going to be needed to operate the CRL.

### **2a. Is there anything you would spend more on?**

### **2b. Is there anything you would spend less on?**

While I see value in (and make use of) the cycleways for recreational use, I don't support spending more on them in the short term.

## **3. Which options do you support for the North Harbour Stadium?**

Keep the stadium precinct as it is

### **Tell us why:**

As the city grows, it will need this facility

## **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Other

**#6311**

**Tell us why:**

In principle, I am okay with this proposal.

I am overall concerned however with the council's inability to spend wisely and frugally. If past experience is anything to go by, any funds available in the "future fund" will be spent frivolously.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

I think we will get a better result if the council is constrained in what it can spend, as opposed to suddenly getting access to a whole lot of money for "investment".

Without clear vision of what the "returns" will be, I suggest maintaining the status quo.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

The council's role is to put the infrastructure and planning in place to allow residents and businesses to flourish. I ultimately don't believe the proposed "Future Fund" will improve anything.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

#6311

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

While the allure of having more public places on the waterfront is strong, the cost is too great. It doesn't make sense to hamstring Auckland's ability to economically import goods given the cost of living crisis.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

Dismantling bike and pedestrian infrastructure and blocking already improved infrastructure is asinine and it is ridiculous that it is in here. We need better public transit and more affordable housing over twenty years ago. We are lagging so far behind it's truly ridiculous. Also any sale of our council holdings is such short term ridiculous economic logic that it truly boggles the mind why it is being considered.

City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Lower our incredibly high rates that are driving people out of Auckand. Do this by FIRST slimming down the huge expenditure on staff, by cutting jobs and redeploying the work load onto remainig staff. Unpopular no doubt with staff, but then thats why we voted the new Mayor in!

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

Transport	Do more
Water	Do more

Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

in particular, I would pay more for a better public transport network. I think this would have the indirect effect of promoting city and local development and economic and cultural development as more people get out of their cars.

I live in mount roskill just off dominion road. I work in the city centre and catch the bus or cycle to work. Every day I am shocked how many people drive to the CBD along

#6578

dominion road in cars (usually one person per car). I think the council (and central government!!!) should be doing all it can to encourage people to take public transport options. For this reason I strongly support further investment into a surface light rapid rail network starting with the city centre to Mount Roskill. I recognise this will cause disruption to businesses and local communities, however the potential gains to the community would be immense.

I also support a max cost of \$50 per week on public transport. Cost is a factor that prevents some people from using public transport. However the negative health effects of an over-reliance on cars is clearly documented. congestion is also costly our city and people dearly.

I also strongly support Auckland controlling its own transport priorities. I have been very impressed with Wayne Brown's advocacy for Auckland city and the way he has stood up to central government. I am angry that the government will not allow Auckland to gather revenue through a RFT to fund its own projects, yet is happy to increase fuel taxes country wide for its own roading projects. this is completely hypocritical and idiotic. I urge the mayor and the council to continue advocating for Auckland and to prioritise surface light rail.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

no

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

I support most of the proposal but I think there needs to be investment and commitment to a surface light rail. Anything short of this will not adequately address Auckland's congestion or future proof it, given Auckland's projected growth in these areas.

**2a. Is there anything you would spend more on?**

I want to spend more on surface light rail development. the business case is there, it is much cheaper and more efficient than other options and work developing it has already been started pre 2019.

**#6578**

I catch the dominion road buses often, they are good but can only carry so many people. they are frequently held up by people parking in the bus lanes. they cannot be relied on along to address the transport needs of Auckland. particularly along this route where there is so much projected growth.

reducing congestion will benefit everyone.

I also support more cycle ways. they are safer and the health and economic benefits of people cycling are well established.

**2b. Is there anything you would spend less on?**

no

**3. Which options do you support for the North Harbour Stadium?**

Everything needs high investment in infrastructure and improving the environment and communities of Auckland. Charge international visitors and immigrants to visit and to relocate here to live so they pay for the infrastructure and lifestyle that they come here for. New Zealand cannot afford to pay for it. The NZ dollar is not worth as much as

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less involvement in traffic management and control.

**#6935**

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

Transportation effectiveness is critical to Auckland current and future economic development.

**2a. Is there anything you would spend more on?**

Better roads alignment to reduce traffic congestion

**2b. Is there anything you would spend less on?**

## Puketāpapa Local Board Priorities

### 7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I do not support any priorities

#### More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	Not Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Not Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Not Important
Support initiatives that improve and encourage walking and cycling opportunities.	Not Important
Help coordinate and support local business groups.	Not Important

#### Tell us why

If someone wants to cycle he will do If some one wants to run jog or exercise they will do so So stop wasting our tax payer money on these options

### 7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

Not acceptable

### 8. Do you have any other comments?

Auckland Council must come up with brainstorming sessions to earn revenue besides our tax payer money be accountable for every dollar spent

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

<b>Transport</b>	Do more
<b>Water</b>	As proposed
<b>City and local development</b>	Do more
<b>Environment and regulation</b>	Do more
<b>Parks and Community</b>	Do more
<b>Economic and cultural development</b>	As proposed
<b>Council support</b>	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I would like Council to fully invest in our public infrastructures, community services, and environmental resilience. I want to live in an Auckland that has strong public services and a high quality natural and built environment.

**#7192**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

No.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

I believe this is a good direction to start, however to make the most of our transport networks we need to invest more to make alternatives to driving easy, accessible and normalised. I want more investment in our public transport and cycling networks and programmes. I want my family to be able to get to school and work safely regardless of how they choose to travel.

**2a. Is there anything you would spend more on?**

I want to spend more on cycleways and programmes to increase bikes in Auckland. I want to spend more on public transport routes, decarbonisation and services. I would prefer to spend more as a collective (eg through rates) than through fees and charges (eg increasing public transport fares). I believe that transport is a public good and a well functioning transport network that serves our most vulnerable users is critical.

**2b. Is there anything you would spend less on?**

I would to spend less on road renewals and building new roads. I want to redistribute this space to cycleways and footpaths to reduce our spending on maintenance and upkeep and encourage more people to walk and cycle.

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

**Tell us why:**

**#7192**

I don't believe this stadium is good value for money, but believe that the space could instead be used for housing while the stadium is reconsidered for the value it brings to Aucklanders and how it could be best utilised.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

I support this idea and believe it is a strong financial mechanism to bring value to Auckland Council while retaining ownership of key public assets which is critical to long-term strategies.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Retaining the ownership is critical to our long term plans, while a long-term up front lease would provide significant benefits for investment. I would want to ensure a robust procurement process to make sure the group operating the port is committed to strong social and environmental principles and operates the port in a way to make Aucklanders proud.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

#7192

Investment in the Fund seems like a sensible solution to increasing return on investment while retaining control of key assets.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

Moving the port is difficult and would likely increase carbon emissions and a lot of externalities. However, maintaining port facilities in Auckland while reclaiming public space from these two wharves seems like a no-brainer.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

I am supportive of bringing the terminal to public land in a long term vision alongside investigations of the port's movement. This is not a short-term prospect given the reduced funding it provides and the lack of alternative port environments.

Yes investment on transport, particularly projects like Hill Street intersection are questionable as recently there has been Puhoi to Warkworth and Matakana Link Road opening that takes traffic away from the intersection. Also Glenvar East Coast Road has been renewed. The traffic at Lake Road is also limited as it is mostly the residents and school trips.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

It would be great if you brought back some of the public rubbish bins at parks that were taken away. Also what can be done about cleaning our creeks as I've seen a huge amount of rubbish starting to fill them and it's getting disgusting to walk around. Maybe this could be where some of the public buns could be directed?

**#7202**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

**2. What do you think of the transport proposal?**

Support all of the proposal

**Tell us why:**

Public transport is and has always been a mess. And now the western train line has delays during a school term? Which has never happened before. Line works has always been during school term breaks

**2a. Is there anything you would spend more on?**

**2b. Is there anything you would spend less on?**

**3. Which options do you support for the North Harbour Stadium?**

Keep the stadium precinct as it is

**Tell us why:**

It's one stadium where there is no straight forward public transport to access it. Why put more money into it when majority of auckland can't get there without it taking hours.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

I don't know

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

Selling of assets for a lump sum is dumb

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Transport	Do more

City and local development	As proposed
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More public transport, more efficient and more quickly repaired roads, and replace our rubbish bins in public spaces

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#7228**

Force further collaboration of agencies and create oversight to ensure it happens so that Council, Government, and CCO's are collaborating on projects such as roading, building, and transport plans.

## **2. What do you think of the transport proposal?**

Support all of the proposal

### **Tell us why:**

Public transport, working alongside roading and alternative transport MUST be a key focus and priority for AT LEAST the next decade to ensure people can get where they need to go safely and cost-effectively. Otherwise, people will leave Auckland or be struggling to get to work and study.

### **2a. Is there anything you would spend more on?**

Rail crossings and crossings as key congestion points such as North and West

### **2b. Is there anything you would spend less on?**

Reduce spend on eco-conversions until we are nailing the basics of public transport

## **3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct, Change the operational management

### **Tell us why:**

We should be sweating our assets or getting rid of them. If expert advice shows redevelopment can increase use/revenue/experience for AKL'ers - let's do that. However, we should consider transport to and from the venue from central/south/east Auckland IF it is to attract bigger crowds.

## **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

**#7228**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

AIAL is a key and unique part of Auckland. The value of this investment will only increase. I am against selling Council shares unless absolutely the last resort for raising funds. Council should maintain 5-10% ownership perpetually to ensure AKL'ers voices are reflected in matters at AIAL.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

The land is an asset - the Council is a landowner - we do not typically see CCO's operating as effectively as standard LTD's. With protections in place, POA could become a similar venture to AIAL.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

Invest the upfront upside of the lease to the Future Fund and continue this at each renewal. Ongoing revenues then continue to fund Council with potential rates increases as required

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?**

I support most priorities

**More specifically, what do you think of each priority we've listed above?**

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.

Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.

Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.

#7605

Supporting our community groups with funding, information, learning new skills and building their capability and networks.	
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	
Working with the community on activations in the Mt Albert Civic Square.	
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Effective local emergency plans

Improving co-ordination and delivery of local services to people affected by emergency events.

**#7620**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

**2. What do you think of the transport proposal?**

**2b. Is there anything you would spend less on?**

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

**Tell us why:**

If the stadium won't be fit for purpose in 10 years' time, better to develop.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

Isn't the share income going to increase? Air traffic is booming!

**4b. Which option do you prefer for the future of Port of Auckland?**

**#7620**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Transport development, however what is proposed is enough under financial consideration of Puketapapa.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

-

## 2. What do you think of the transport proposal?

Support all of the proposal

### Tell us why:

Transport in NZ is of the least effective networks, very unreliable, driving factor of dissatisfaction within community.

### 2a. Is there anything you would spend more on?

Network optimization.

### 2b. Is there anything you would spend less on?

-

## 3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

### Tell us why:

Not the priority right now.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

### Tell us why:

Don't know enough about shares and return of these shares.

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Seems like a sensible action as returns are high, and rates are decreased.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Unsure of how the AFF will be used in the future.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

-

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

-

**5b. What option do you prefer for Bledisloe Terminal?**

#7637

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

Shipments being transferred by truck/rail is good.

**7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?**

I support most priorities

**More specifically, what do you think of each priority we've listed above?**

#7637

Invest in opportunities to support local community leadership.	
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	
Consider our investment in facilities and services to see if there are opportunities to do better.

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We cannot afford to have another event like Jan 23 floods - Auckland needs to be prepared so nobody loses their home or potentially loss of life. Paying extra to cover this would be an option but it needs to be carefully monitored to ensure the funds gathered are used just for this

**#7784**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Need to continue with current plan - Auckland streets are looking pretty unsightly with no weed killers or street sweepers out to keep it clean. Perhaps privatize some works?

**2. What do you think of the transport proposal?**

Support all of the proposal

**Tell us why:**

These raised pedestrians, road cycle ways have been a major waste of council resource. It doesn't make sense to spend on the cycleways on busy roads when there is only a handful of bikes using it - Auckland is not a city like Malaysia for example where a bike is a common mode of transport - driving to work I would be lucky to see one bike on the road, and the infrastructure created to promote bike riding just hasn't work - you can't spend and expect the public to lap it happen - haven't see no positives for this waste of money - raised pedestrian crossings does nothing but slow traffic down.

**2a. Is there anything you would spend more on?**

To be honest, we have the most unreliable transport system in the world - even third world countries have more stable systems than ours. I can't rely on trains, buses that don't run on time - why not privatise this and allow electric toot-toots like overseas to pick passengers up - free up these large buses that are inefficient for our roads - and then see Auckland start to move,

**2b. Is there anything you would spend less on?**

definitely cycle ways on busy roads and the pedestrian crossing are a joke

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct, Change the operational management

**Tell us why:**

**#7784**

can't have an asset like this under utilised. Better to get some coin for its use than have it sit there doing nothing.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

AIAL doesn't need council's investment - let private firms carry the can.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

We need funds NOW - Auckland is broke - we still retain ownership, but it doesn't need to run the Ports - set up competition and get the Ports running efficiently

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

We need the coin to operate - this in conjunction with rates, will help minimize the need increase rates at exponential hikes - keep the increases on the low

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

#7784

Just have to be careful here - the land belongs to the people of Auckland - past generations have built the Port - so due consideration is required concerning the ports

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

We struggle with roads as it is - at this stage (5-15 years) we need less trucks congesting roads and rail is too inconsistent in delivery of services - forget it - keep the ports humming we enough there at the wharf for people to use. I worked down there

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

**Tell us why:**

We need the Ports to keep Auckland moving - shrinking it's size will cause further delays in getting products out - you could spruce it up to allow some public access but it needs to be kept

**6a. What do you think of these proposals?**

It's too far ahead to look at while we have current issues to contend with. Sure have a pipeline dream but make sure current initiatives are being met and future ones are achievable

**8. Do you have any other comments?**

My thoughts are Auckland needs a major rethink. We have retirement villages full of engineers, architects, landscapers that helped build Auckland - perhaps tap into them as a resource to assist with some initiatives - more than likely they have come across this in the past and know what can and cannot work??

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Keeping our parks and streets cleared of rubbish on a VERY regular service; provide more rubbish bins in parks so no rubbish is left flying around

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#7928**

Stop messing around with suburban shopping areas, realigning the road lanes, trying to make the footpaths wider etc. Mt Albert and Mt Roskill have NOT been improved with the recent so called refurbishments. Talk to the shop/building owners, and ask that they keep their windows clean, their buildings in good order, and fresh paint work, this would encourage more customers than wider footpaths.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

Stopping cycleways plans, stopping raised pedestrian crossings is a good start. I don't understand how raised pedestrian crossings stops pedestrian crossing accidents, as by the time the car reaches the raised crossing, it is too late to slow down for pedestrians. A raised pipe type of traffic calming device a few meters from the approach of the crossing would slow a car down before it hits the crossing, and no need for a calming device on the exit side of the crossing. This would make it easier for busses, ambulances etc to negotiate the crossings.

**2a. Is there anything you would spend more on?**

Ensure a regular and reliable public transport service, and dont keep increasing the user charge.

**2b. Is there anything you would spend less on?**

Road cones

**3. Which options do you support for the North Harbour Stadium?**

Change the operational management

**Tell us why:**

Ensure more use of the complex by reducing the fees charged, so more events can hire there. Divide up the areas, so smaller community groups can hire an area to suit

**#7928**

their needs, while ensuring the whole complex can be hired for large sport or cultural events.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

This sounds a logical idea, but I wonder what will happen with future Councils, if they find they are very short of income, will it be easy for them to access the funds? What would be the reason to access the fund or would the income from the fund be the only money available?

**4b. Which option do you prefer for the future of Port of Auckland?**

I don't know

**Tell us here:**

The port is an important part of Auckland; handing over the running to a private company by a lease arrangement sounds problematic. Perhaps keep Council operation, but ensure a competent management plan is in place, and that the Council has some say in this management plan, to ensure a decent return for Auckland ratepayers.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

We need to think about future generations and increasing rates.

#7928

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

The Council just needs to keep the core values of the city as the most important aspect of the Council, and any income from investments be used for those services.

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

As long as it is for all public use, not residential builds. And no pie in the sky stadium.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

**Tell us why:**

Keep it for ports use, so they don't need to expand further into the harbor.

Equitable public transport for South Auckland and climate resilience.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#7934**

Do not change the urban density settings to satisfy the middle-class and rich nimbys.

## 2. What do you think of the transport proposal?

### Tell us why:

I don't know how to answer that multi-choice question as I strongly support the 'pay more, do more' transport proposal, not the central proposal.

### 2a. Is there anything you would spend more on?

I strongly support the 'pay more, do more' proposals on transport.

### 2b. Is there anything you would spend less on?

## 3. Which options do you support for the North Harbour Stadium?

Change the operational management

### Tell us why:

The stadium is a white elephant as is. It would be best for the local community to have the power to decide how best to utilise these facilities for local benefit.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### Tell us why:

I don't support selling off the city's airport shares or leasing management of the ports. This has not gone well where it has been enacted in Australian cities. These assets will increase in value over time. The Future Fund proposal is also overly optimistic about

#7934

the income the fund would make. It's risky and once the assets are sold, we won't get them back. We should continue to pressure central government to change local body funding (no GST, central government paying rates) instead.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

The city should retain control of managing the ports. Where these have been leased out in Australia it has not gone well. We don't want our port being run purely for the purpose of making profit with no concern to social and environmental implications.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

I don't know

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

This proposal will help the redevelopment of the city centre and does not seem likely to have a negative impact on port operations.

#7934

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Council should focus on core services and deliver these efficiently to ensure they are highly effective. Only once these core services of water, sewage, drainage, rubbish removal, public transport, community services everyone can access (not just those with enough money to access) should the council consider 'nice to have' amenities provided there is sufficient funds to do so without raising rates.

**#7950**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

High profile, high cost venues that impose costs that seem to mean that core services are reduced or that some parts of Auckland get poor service.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

The focus on efficiency is reasonably sound. The cap of \$50 for any public transport is in line with many overseas cities that have capped public transport cost for many years. Using credit/debit cards for payment is also useful. Having the option to continue to purchase ATHop cards is important particularly for tourists and those Aucklanders who choose not to have credit/debit cards (where I volunteer we have many clients in this situation). There does seem to be a focus on the North shore for transport improvement yet the Franklin region is growing just as much and has similar public transport access issues. Solving Papakura south public transport issues needs to be considered as part of the next 10 years not after this time. I also understand there have been proposals for a ferry between Clark's beach and Onehunga that haven't eventuated which could relieve some of the south of Auckland transport woes. Linking to a train service at Onehunga would be sensible too.

**2a. Is there anything you would spend more on?**

Footpath maintenance to stop people tripping on footpaths and injuring themselves.

**2b. Is there anything you would spend less on?**

Cycle ways.

**3. Which options do you support for the North Harbour Stadium?**

I don't know

**Tell us why:**

**#7950**

I haven't been to this facility and know little about its use. Would seem to be important for those Aucklanders who use/live near the stadium to inform council of best options for this site.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

Selling assets to pay for a fund 'nice to have' assets does not make sense. Aucklanders are more economically savvy than the council appears to give them credit for. The numbers on this fund don't seem to add up in light of the assumptions made to income from the fund without explanation of any underlying costs that may result in less income than projected. Questions about the economics of this fund are not satisfactory.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

The council needs to up its game on ensuring that the Ports of Auckland do deliver a profitable outcome for Auckland.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

#7950

Core services as noted above are vital for Aucklanders to live in a clean, easy to get around city and making the Ports of Auckland profitable could contribute significantly to this situation. If Aucklanders feel the city is clean, easy to get around then tourists will too. Focus on those who live in the city.

**4d. Do you have any feedback on any other part of the proposal?**

Tell us here:

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

Spending money on the wharves before core service are running efficiently and effectively seems unnecessary. \$110 million added to other council costs sounds like yet more rates being necessary for Aucklanders. Development of this part of the port could

**5b. What option do you prefer for Bledisloe Terminal?**

around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

**6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?**

Do not reduce the rubbish collections from weekly to anything less frequent. For Aucklanders with young children having faeces loaded nappies in a rubbish for two weeks or more is unhealthy, particularly in the summer. For those Aucklanders with bladder issues having incontinence pads in a rubbish for two weeks or more is neither healthy nor good for their mental health. Whilst some Auckland MPs don't think much of those over 65, the reality is that an increasing number of these people will be the Auckland populace in the coming years and this could mean an increase in the number of incontinence products being disposed off through household rubbish collections. Also having sanitary products with blood on them in a bin for two or more weeks seems to be good for the rat population of Auckland, particularly in the hot summer months when rats seem to reach plague proportions (going by the number caught in traps this summer). Rubbish collection is vital to ensuring Auckland is a clean, healthy city. At the moment the amount of rubbish seen around the city we can't really afford to reduce rubbish collections at all. Since the council changed the recycling rules to align with national standards, more waste that used to go into recycling now has to go into general waste meaning fuller rubbish bins, so how does reducing weekly rubbish collection help anyone?

## Local board priorities

**7a. Which local board area does your feedback relate to?**

**8. Do you have any other comments?**

Avoid getting caught up in helping to pay for any more stadiums. I think Aucklanders are still paying for Eden Park so we can't afford another financial burden of this nature.

I read that this proposal includes the council supporting volunteers and community groups to continue providing service to Aucklanders. I am one of those volunteers and would welcome the council's continued support in the same form as we have it now, which includes financial support although we have been told that at least a 50% reduction in income could be expected from June this year. I volunteer at Citizens Advice Bureau in Auckland.

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### **Tell us why:**

**#8505**

Selling our interest in the Airport is a retrograde step. It is a good investment and we should support it by keeping our investment in it. There is no knowing who would buy those shares too, exposing the airport to unfriendly ownership.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

As long as we retain ownership and the lease has a expiry of 30-40 years, this seems a beneficial plan. Retaining ownership is vital though.

If the Auckland Future Fund is dependent on selling the Airport shares then I don't support the proposed fund. But if the Auckland Future Fund can be started with the \$2.1 billion from the leasing of the Port of Auckland, that would be good.

**4d. Do you have any feedback on any other part of the proposal?**

## Puketāpapa Local Board Priorities

7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I support most priorities

More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	Very Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Not Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Very Important
Support initiatives that improve and encourage walking and cycling opportunities.	Not Important
Help coordinate and support local business groups.	Not Important

Tell us why

We support "focus our investment in parks, facilities and programmes on our growing neighbourhoods"

7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

Broadly correct, however Puketapapa is hugely underserved in terms of quality sports fields - especially floodlit ones. Given the demand these should be prioritised over

**#8575**

items such as swimming pool extensions which are used by far less people. Sports fields also provide opportunities for waking when not in use so have a double effect on Local Board priorities.

#### **8. Do you have any other comments?**

The outsourcing of Parks maintenance has resulted in poor quality fields when compared to the previous situation of having council organisations maintaining them. Contractors simply maximise profits rather than looking to provide a quality service, leading to a poor return on Council Investment.

The council investments made in fields as part of the Women's World Cup have virtually been destroyed due to the incompetence of the sub-contractors.

Council should further investigate further the possibility of developing Western Springs racetrack as a boutique stadium - say 10,000 to 20,000 people.

and helping community climate action through our Climate Activator.	
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Not Important
Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Very Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	Not Important
Working with the community on activations in the Mt Albert Civic Square.	Not Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Not Important

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do more
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Reinstate rubbish bins that have been removed, or at least some of them. More large events at Eden Park especially concerts that bring in revenue. More car parking - should not have sold Downtown car park and for the pitiful amount it was sold for

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#8675**

Reduce rubbish collection (non organic) to fortnightly instead of weekly. Reduce Council executives salaries. Less bike lanes.

## **2. What do you think of the transport proposal?**

Support most of the proposal

### **Tell us why:**

A lot more needs to be done to improve public transport - unreliable, infrequent, expensive, limited access.

### **2a. Is there anything you would spend more on?**

Road conditions, across city/suburban public transport, parking at train stations, carpark buildings

### **2b. Is there anything you would spend less on?**

Raised crossings, cycle lanes

## **3. Which options do you support for the North Harbour Stadium?**

I don't know

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Better returns. Needs to be accountability and repercussions for management of the port under lease arrangement

## Puketāpapa Local Board Priorities

**7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?**

I support most priorities

**More specifically, what do you think of each priority we've listed above?**

Invest in opportunities to support local community leadership.	Fairly Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Very Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Fairly Important
Support initiatives that improve and encourage walking and cycling opportunities.	
Help coordinate and support local business groups.	Very Important

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

walking and cycling infrastructure

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

N/A

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

I support investment in public transport. We are in a climate emergency, and urgent action is required to reduce emissions. Transport contributes over 40% of Tāmaki Makaurau's emissions, this is a key area to invest in emission reduction for the city. Council needs to work to massively reduce private vehicle usage, and improve public transport options.

I strongly disagree with stopping funding for raised pedestrian walkways and cycleways. I am a huge proponent of walking and cycling but these have to be made safer, every day I see crashes and near misses.

### 2a. Is there anything you would spend more on?

Walkways and SEPERATED cycle ways. In fairness you could probably fund these with bus lane and red light cameras

### 2b. Is there anything you would spend less on?

## 3. Which options do you support for the North Harbour Stadium?

I don't know

### Tell us why:

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

**#8974**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

Airports are a fantastic investment, selling is insane

**4b. Which option do you prefer for the future of Port of Auckland?**

I don't know

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

I support resuming the Water Quality Targeted Rate, but do not support it decreasing.

## Local board priorities

**7a. Which local board area does your feedback relate to?**

**8. Do you have any other comments?**

I would rather pay a little now than pay a lot later for the consequences of climate inaction. I want a strong partnership between Auckland Transport, Auckland Council and central government so that funding can be used most effectively. Reducing transport time and costs, while encouraging mode change to biking/walking should be a bigger priority in the Auckland region.

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

part of the major events funding should include increased public transport to/from events.

infrastructure resilience and upgrade to support the intensification of housing.

**#9437**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

how much monetary support is given for major events - the money for this should be collected from a more targeted group. Someone in the outer suburbs may not benefit at all from a major event in down town that is attended by tourists or those with means.

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

need public transport to be more accessible and efficient to support housing intensification and reduce need to drive.

Need to have more park and ride options to support people not using motorways and city carparks but still able to get home timely.

**2a. Is there anything you would spend more on?**

Park and ride options at hubs for public buses and trains.

more options to take bikes on public transport allowing people to travel/commute longer distances by bike.

**2b. Is there anything you would spend less on?**

cycle lanes along roads are dangerous and not user friendly. We should look at cities where cycle lanes are part of recreation walkways and utilise Auckland's extensive green belts. Look at having bike/walk paths within green belts away from the road.

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct, Change the operational management

**Tell us why:**

#9437

too many stadiums for the population of Auckland.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Other

**Tell us why:**

proceed with AFF but not having a stake in airport/gate to Auckland and NZ for most international visitors and local travellers is a risk for the future.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Also need to ensure as part of the lease agreement that it does not substantially increase costs for importers and exporters therefore passing costs to the wider economy/consumer.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

rate rises will be too high in the other case. this is money that's not going to be spent in the local communities.

**4d. Do you have any feedback on any other part of the proposal?**

Tell us here:

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

Auckland waterfront is the main attraction down town and need more facilities for public ferries and public recreation space, especially with an increasing number of people living in apartments.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

We need an efficient port to support economic trade, moving to trains/trucks would add more congestion and costs to import/export and to roading/congestion costs.

I support most priorities

More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	Not Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Fairly Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Very Important
Support initiatives that improve and encourage walking and cycling opportunities.	Fairly Important
Help coordinate and support local business groups.	Fairly Important

### Tell us why

Need more recreation space and facilities to support intensification in Kainga Ora housing. Community gardens, child care centres, place for people to learn skills and become part of the community. Also need more security cameras in areas prone to dumping

7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

**#9437**

sounds about right for most points.

Need to look at moving valuable assets to areas that are less/not flood prone.

Cameron pools is in a too flood prone area as it waikowhai intermediate school.

Climate change will exacerbate weather extremes - need to look at managed retreat rather than repairs to existing damage.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	Do less
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Improvements to local intersections to increase traffic capacity by adding lanes, changing light phasing or improved road markings. This should result in minor benefits without having to spend huge sums building motorways, and then finding feeder roads cannot cope anyway.

**#10065**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Stop building speed bumps, instead improve signage and road markings around crossings.

Less fancy cycle lanes and more simple cycle routes

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

Support stopping raised pedestrian crossings and caps on public transport spend.

Would support congestion charging if it was done at a low affordable level

**2a. Is there anything you would spend more on?**

Local intersection improvements. Encourage localised park and ride facilities where parking entry is by HOP card and is free if hop card is used for public transport rides to/from car park, otherwise charged. Make allowance for parking in streets along public transport corridors. How else do you expect people to use public transport? If parking is restricted along public transport routes, how are people going to get to the public transport? They will just drive there instead if AT make it too hard for them.

**2b. Is there anything you would spend less on?**

Don't introduce blanket residents only parking restrictions. Instead allow residents only parking half of the street (eg one side) and free parking on the other side. Helps residents and visitors.

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

**Tell us why:**

**#10065**

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Other

**Tell us why:**

I support the proposal except that Auckland Airport shares be transferred and keep by the fund for perpetuity (never sold) and the fund gains the dividends from the shares.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

POAL should stay in council ownership.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Other

**Tell us here:**

50% to fund council services and 50% to the Auckland Future Fund.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

Introduce low level congestion charging

#10065

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

Don't spend money on something that few residents will benefit from. Allow private development to create points of interest.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

## Albert-Eden Local Board Priorities

### 7b. What do you think of our proposed priorities for Albert-Eden in 2024/2025?

I support most priorities

#### More specifically, what do you think of each priority we've listed above?

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Fairly Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Fairly Important
Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.	Fairly Important
Supporting our community groups with funding, information, learning new skills and building their capability and networks.	Fairly Important
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	Not Important
Working with the community on activations in the Mt Albert Civic Square.	Not Important
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.	Not Important

#### Tell us why

Getting rid of rubbish bins would not be a good idea. People will just litter where they are and the parks will be untidy and need cleaning. Worst idea ever

**#10065**

**7c. What do you think of the Albert-Eden proposed priorities for the 10-year budget 2024-2034?**

**8. Do you have any other comments?**

Keep rates affordable. Reduce council spending on wasteful things. Spend on roads and infrastructure.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Long-term investment in public transport and alternative modes of transport. In particular reducing cars driving and parking on transport routes.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

I'd like to pay our mayor less

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

Strongly opposed to stopping development of cycleways that offer alternative transport modes and stopping installation of raised pedestrian crossing that reduce speed and make pedestrians safer

### 2a. Is there anything you would spend more on?

I would like to see genuine commitment to long term funding for protected cycleways for bikes and scooters

I'd like to see dedicated public transport, light rail and dedicated bus lanes

### 2b. Is there anything you would spend less on?

We do not need any more large road development

## 3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

### Tell us why:

There are more and more people living on the North Shore and a dedicated stadium precinct for them is needed. That alternative is they all have to cross the harbour

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**#10901**

**Tell us why:**

This is a con-job to create an arms-length structure to sell off the port and airport holdings. This has been an aim of our mayor and since he was thwarted directly he is trying a back-door approach. It should absolutely not be established and the mayor should be sanctioned for trying to deceive the public of Auckland

**4b. Which option do you prefer for the future of Port of Auckland?**

Other

**Tell us here:**

Absolutely do not lease the operation of the port - this will inevitably harm Auckland because the leaseholders will have no interest in the city.

But also POAL needs to operate more for the benefit of the city and not just the port so it needs to be restructured and the terms of operation changed to consider the port as part of the city and not just a business

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

I hate the idea of the Auckland Future fund because I believe it will be abused to harm the city

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

#10901

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

The city waterfront is poorly used because of POAL priorities and lack of council imagination. The very least is this proposal to free up these two wharves

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

Bledisloe is largely used for used cars which can be transferred to Onehunga for customs and import clearance without using up valuable waterfront land

**6a. What do you think of these proposals?**

**6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?**

I strongly support increased rates across the board.

Rates are a progressive form of taxation where the wealthiest landowners pay more to support the city to the benefit of all.

#10901

I strongly oppose user pays fees which are a regressive form of taxation and harm poorer communities the most.

The proposal from this mayor is to transfer the costs of the city to the poorest and protect the wealthy from contributing which is frankly evil

Our local board has been excellent in making changes that protect against climate change the Oakley creek is a prime example they have also worked hard to improve public transport and alternative modes but have largely been opposed by AT

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

I'm proud of the priorities proposed by our local board and am disappointed in the city council starving it of funding to protect the wealthy landowners from rate increases

**8. Do you have any other comments?**

Overall I think the poorest regions of the city are being short-changed by the local board funding and the bulk of the money is being gifted to the wealthiest suburbs. the council should be ashamed of this.

I'll reiterate that I believe ratepayers should be paying more and the wealthiest ratepayers should be paying a greater share of the rates. Where possible user-pays should be avoided because of the harm it does to the poorest communities in our city

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

I think the port should stay in Auckland's hands but should be reduced in size (eg, by clearing the goods (eg, the cars) much more quickly so that the increased space could be used to continue the development of the Auckland waterfront.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

I have already submitted at length on various aspects of the future of the port and ran out of space. My key point is that it is very risky to surrender major influence on how the port operates and contributes to our economy and environment for such a long time and almost certainly to very powerful multinationals. The council should continue have a majority shareholding and to appoint the port's directors as it did recently to improve safety at the port.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

#11054

Other

**Tell us here:**

There needs to be majority democratic control of port operations. However, a minority shareholding could be floated on the NZ Stock Exchange like Tauranga does and used for the Future Fund.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

We should not completely self insure. Other insurers may have better diversified assets.

Bledisloe is an integral and profitable part of the port's operations. Any moves of bulk, car, fruit and cement cargoes to other locations are likely to greatly increase costs and carbon footprints.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I would like more investment into better public transport, walking and cycling. Also more investment into community development and environmental protection.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#11350**

I would like Council to look at options to save money. For example, instead of giving various golf courses cheap leases to public land, the Council could instead make them pay a commercial rent for their land. If the golf courses can't afford to pay the same rates as a business then Council should consider alternative uses of those sites. For example, they could sell part of the sites to generate revenue and work with developers through a Master Plan process to provide new affordable housing while still including some provision for a smaller green space.

Council should stop enabling housing at the edge of the city where there is no infrastructure. We need a compact city to grow a strong economy, a lower carbon future and better services for residents.

Auckland Council could do more to ensure compliance with existing bylaws, including proactive measurement and management of noise, pollution and anti-social behaviour.

Do more to realise the Auckland Climate Plan and Transport Emissions Reduction Plan.

Do more to improve community resilience, by investing in planning and infrastructure, and building community networks.

## **2. What do you think of the transport proposal?**

Support most of the proposal

### **Tell us why:**

I support the investment into public transport and initiatives such as improving bus, rail and ferry networks for more reliable service and Time of use charging.

I oppose the proposal to stop initiative such as raised pedestrian crossings and cycleways. These are crucial to help make our streets safer for active modes and to encourage modal shift to walking and cycling. I also oppose cutting some bus routes.

### **2a. Is there anything you would spend more on?**

completing the Downtown and Midtown Bus improvements

more cycleway and walking connections

safety projects around schools and town centres.

**#11350**

better funding for maintaining, expanding and promoting the public transport network, including to more remote areas

rolling out electric ferries and more low-emission buses, plus supporting infrastructure

the Lincoln Road and New North Road corridor upgrades

greater investment in rail: rolling stock, and more support for ongoing Kiwi Rail track maintenance

Street trees and rain gardens

## **2b. Is there anything you would spend less on?**

I think there are areas where council could spend less. For example, instead of expensive and unnecessary widening of already wide roads like Te Irirangi Drive, we could use existing space for bus lanes and active modes.

I also do not support the full expansion of the 'unsealed roads' programme.

## **3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

### **Tell us why:**

## **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### **Tell us why:**

The airport shares are a strategic asset that has paid good dividends in the past and will again in the future. We are also concerned that the fund would be whittled down in time in a reactive way rather than being used strategically to transition to a low-carbon and resilient economy, and city.

#11350

There are currently no ethical parameters for the Future Fund, so it might invest in companies that exacerbate the climate issues that the fund is designed to address. Investing in a non-ethical fund may jeopardise council's access to low-cost infrastructure loans via Green Bonds. If a fund is established it would be good to see it have strong ethical principles like, e.g., a commitment to not funding any fossil fuel projects.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

I feel like there is a lot of risk in leasing the port out for such a long term. Auckland Council will lose a lot of control over the port and it may not offer good employment conditions or have a focus on reducing emissions in that scenario. I also think the port operator will not be motivated at the end of the lease to do a good job, and so it may be that council gets a port back which has been run down for the last 10 years with almost no maintenance.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Port dividends have always been used to fund council services and we do not support a reduction in services when the population is getting larger and the challenges are getting greater.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

it seems important to have a conversation regarding opening up more waterfront and the future of the port but that is only possible with the port remaining in public control.

#11350

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

i think freeing up this area would enable more positive use of this valuable waterfront space.

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

Auckland is our biggest city and it's needs for import freight will only grow over time. Having large volumes of freight move into Auckland from another port (like Tauranga or Northport) will ultimately lead to higher transport emissions and a less efficient freight connection. It may also make the port less financially viable and profitable,

## Puketāpapa Local Board Priorities

7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I support all priorities

More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	Very Important
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	Very Important
Consider our investment in facilities and services to see if there are opportunities to do better.	Fairly Important
Support initiatives that improve and encourage walking and cycling opportunities.	Very Important
Help coordinate and support local business groups.	Not Important

Tell us why

7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

I think it's very challenging for the board right now because so much of the funding you need for repairs of flood damage is centrally funded. I encourage you to advocate for the investment your area will need. I am quite considered that as the population grows in the Board due to major new developments we will soon start to have congestion

**#11350**

issues on main roads like Mt Eden and Dominion Road and the Waterview motorway. Advocating for better bus services and cycleways might help, but I appreciate it's beyond the ability of the board to fund these.

**8. Do you have any other comments?**

i support the proposal to achieve significant local board funding equity through a combination of reallocation of existing funding and new funding at a ratio of 50:50.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

<b>Transport</b>	As proposed
<b>Water</b>	
<b>City and local development</b>	Do less
<b>Environment and regulation</b>	As proposed
<b>Parks and Community</b>	Do less
<b>Economic and cultural development</b>	Do less
<b>Council support</b>	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Look at impact spending such as park and ride stations that will make an immediate impact on reducing motorway and city traffic congestion.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#11413

## 2. What do you think of the transport proposal?

Do not support most of the proposal

### Tell us why:

Traffic flows can be improved by reducing vehicles on the road, providing transport corridor park and ride to reduce congestion locally of traffic trying to get onto the motorways and on the motorways and reducing congestion at destination areas. This will then allow feeder bus services to become more patronised, and further corridor routes established, possibly by cut and fill along wider commuting corridors, allowing double level transport options, and removing level train crossings.

### 2a. Is there anything you would spend more on?

Park and ride stations at all outer main corridor stations, and separation of cycle lanes from traffic along side footpaths or by removing parking on one side of feeder roads, and safe cycle routes on main roads.

### 2b. Is there anything you would spend less on?

Raised pedestrian crossings.

## 3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

### Tell us why:

The stadium precinct has shrunk and developed significantly over the years, and now you want more and different development. Next council will change priorities again. Any development to generate income for council is detrimental to local atmosphere.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

**#11413**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

Surely selling airport shares or port leases and reinvesting in similar operations is of no gain. These can be transferred to a future fund as is, they will organically grow in capital while returning an income. Further investment in more diverse fields will get a more even capital growth and income return.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

Surely this is another operation that could be transferred to the future development fund. Once the lease is sold then there is no further ongoing income.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

It provides ongoing control of the wharf activities in council control, and provide more flexible future use of the land, potentially returning part of the city foreshore back to the citizens of Auckland in the long term.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

The small area of port land and operations should not be up for sale. The area is too precious to the citizens to be lost.

#11413

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

Proceed with returning them to Auckland citizens, but not for residential purposes. Some commercial businesses could benefit, but open air public spaces on the water's edge need to be maintained.

**5b. What option do you prefer for Bledisloe Terminal?**

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

**Tell us why:**

With limited rail and mainly road access to the port, removal of some of the activities would help take congestion off the roads. The transfer of cargo direct from the ship to the inland port would free up space, pity the rail freight lines aren't available.

**6a. What do you think of these proposals?**

Resume the <b>Natural Environment Targeted Rate (NETR)</b> and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. Introduce the <b>Franklin Local Board Paths Targeted Rate</b> of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the <b>Rodney Drainage Districts Targeted Rate</b> to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Other
Increase the <b>Waitākere Rural Sewerage Targeted Rate</b> from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year. Waste money on consultants. Do a proper feasibility study before wasting money on projects which are stopped in the middle after spending time and money on them. Don't use consultants to do the feasibility study, you have enough highly paid employees to deliver them. Control the Council Controlled Organisation especially Auckland Transport and Watercare, they don't listen to AC, they do things as they wish and you end up funding their mess, more control and say into their affairs is the order of the day. Bring Auckland Transport into your head office, why we are throwing money for a big building for AT, when you have capacity to move them back to head office. Mayor said that earlier last year and nothing happened. Mayor has to do the talking. He says big things and no action. He has to perform first to lead by example. Talking is one thing, doing is entirely another thing. He has to stop the media gaffe and start working for the Aucklanders. They trusted him to make a change, but we are not seeing anything other than some media gimmicks from him. Let him start performing. He has to stop bad mouthing about the previous regime, let us see what Legacy he leaves in his first and maybe his last term!

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.	Fairly Important
Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.	Very Important

**#11604**

## 2. What do you think of the transport proposal?

Support all of the proposal

### Tell us why:

#### 2a. Is there anything you would spend more on?

Continue the council-funded extension of the SuperGold subsidy programme for afternoon peak services (e.g. 3pm-6.30pm).

Continue/retain public transport subsidy for students.

#### 2b. Is there anything you would spend less on?

Less investment in residential speed management - in particular installing speed bumps in road surfaces. These bumps are unsightly, they cause bottlenecks during and after installation and erratic driving by some who choose to swerve around the mid lane bumps.

## 3. Which options do you support for the North Harbour Stadium?

Change the operational management

### Tell us why:

The venue hire charge is a significant reason for the lack of use of North Harbour Stadium (NHS) by the community.

If changing the operational management of NHS reduces operational costs, then these savings can be passed down to the community as a reduction in venue hire charges, the use of NHS by the community will increase.

#### 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

**#11604**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

It is vital that people of Auckland / council retain a share in the AIAL and some control/voting rights over the primary entry into Tamaki Makaurau and Aotearoa.

The transfer/sale of the shares (at today's market value) is a short-sighted plan, the funds generated will decrease in value as inflation/CPI fluctuates, also be eroded by fund manager charges, leaving only the slops of the "Auckland Future Fund" for use by the rightful recipients & benefactors - the residents of Auckland super city.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

The Waitemata Harbour is (could be) an economic, tourism and environmental jewel in the crown of Auckland Tamaki Makaurau. The ownership of port land and wharves should remain with Auckland Residents/Council and used to generate a multi-generational income that benefits Auckland City, it's residents and (hopefully repeat) visitors to the city.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Other

**Tell us here:**

Port of Auckland Profits to be primarily used to fund council services with a fixed percentage allocated to be invested in the Auckland Future Fund e.g. 85% Council Services and 15% to Auckland Future Fund.

#11604

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

Developing the area so it benefits and attracts people (residents & visitors) into our city, increase visitation should boost Auckland's economy, enhance our waterfront and bring people into what is currently a dying/dead centre for a NZ's largest city.

**5b. What option do you prefer for Bledisloe Terminal?**

<p>Resume the <b>Natural Environment Targeted Rate (NETR)</b> and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the <b>Water Quality Targeted Rate (WQTR)</b> and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>
<p>Broaden the description of bus services funded by the <b>Climate Action Transport Targeted Rate (CATTR)</b> to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Support</p>
<p>Discontinue the <b>Long Term Differential Strategy</b> which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	<p>Support</p>
<p>Re-introduce <b>recycling charges for schools.</b></p>	<p>Do not support</p>
<p>Continue the planned roll out of <b>rates funded refuse collection</b> to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	<p>Support</p>
<p>Introduce the <b>Franklin Local Board Paths Targeted Rate</b> of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	<p></p>

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

<b>Transport</b>	As proposed
<b>Water</b>	As proposed
<b>City and local development</b>	Do less
<b>Environment and regulation</b>	As proposed
<b>Parks and Community</b>	Do less
<b>Economic and cultural development</b>	Do less
<b>Council support</b>	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

no

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#11622**

everything other than core services, reduce staff, tighten council belts just as the rest of us have to at the moment, people cannot afford to be an open cheque book for council, we have limited funds.

## **2. What do you think of the transport proposal?**

Support all of the proposal

### **Tell us why:**

I think it is great to try and keep Auckland moving, get rid of the cycle lanes and the raised pedestrian crossing as the cost of these are exorbitant.

### **2a. Is there anything you would spend more on?**

no. There is a cost of living crisis, so no, no more spending.

### **2b. Is there anything you would spend less on?**

Cycle lanes, all the speed humps or traffic calming measures, the high tech infrastructure, cameras ect that seem to be popping up everywhere, all the "extra nice to have" get back to basics, good roads, good bus/train service.

## **3. Which options do you support for the North Harbour Stadium?**

Change the operational management

### **Tell us why:**

### **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

I don't know

### **Tell us why:**

**#11622**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

**Tell us here:**

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#11689**

**2. What do you think of the transport proposal?**

Do not support most of the proposal

**Tell us why:**

Not happy with plan to cancel cycleway projects. This infrastructure is a crucial way to ensure aucklanders have transport choices and low carbon transport options.

**2a. Is there anything you would spend more on?**

Cycleways and public transport

**2b. Is there anything you would spend less on?**

Unsure.

**3. Which options do you support for the North Harbour Stadium?**

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

Removing/lowering the number of busses on "low performing" services doesn't help better our transport system - I agree that it would optimise it but it would also impact those who would use them, pushing them to drive rather than use public transport.

Put a stop to the building of cycle ways. Complete the bus lanes that have already been started. Stop any further plans for any more until we are financially able to. I am happy that the light rail project down Dominion rd never got off the planning stages.

**#12184**

Surely a more efficient and cheaper option would be to develop a rail network via the Puhinui rail station out to the airport, instead of or in conjunction with the new bus corridor.

## **2. What do you think of the transport proposal?**

Don't support any of the proposal

### **Tell us why:**

AT and the Council have wasted money already, on many cycleways that are hardly used from my personal observations. I have witnessed a number torn up and redone costing us rate payers millions. Yet after they have been recommissioned, still there are next to no cyclists seen on them. I am not prepared to support this continued waste. (So that you are aware, I own more than three bicycles, including one that is rechargeable. I use these for re reation normally)

Raised pedestrian crossings are put in place to reduce speed and in some areas there is an abundance of them, (six or seven in a small area). These slow down industry, (road transport in heating from A to B effiently costing our economy)

Raised crossings damage the suspension of vehicles, costing companies and private citizens.

There seems to be an agenda behind you people being hellbent on placing these throughout our suburbs with the people having any input or a true choice.

You should be working to speed up transportation in our largest city by improving traffic light phasing and getting behind building a previous National Govt proposed eastern expressway.

### **2a. Is there anything you would spend more on?**

Mentioned above.

### **2b. Is there anything you would spend less on?**

Ditto.

## **3. Which options do you support for the North Harbour Stadium?**

#12184

Consider redeveloping the stadium precinct, Change the operational management

**Tell us why:**

I have used this facility a number of times and agree with those who think it was poorly setup originally.

I would want to see less money poured into it's operational costs annually. Would like to see it used more by the community and wonder if Akld Cricket would be interested in using it once it has been revamped. It seems to be an awful waste of public money just leave it sitting chewing up our money. If there is no suitable alternative use for it, then we should reduce the 33 million spend and tear it down and use as sports fields etc.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Other

**Tell us why:**

I believe at this stage. It is more important to pay down debt. The most efficient way. Whether that is through earning many dollars over time or if it is prudent to sell the shares and pay debt off now. After all I thought that was one of the platforms that the mayor stood during the election, wasn't it?

But this is all very complex. So no simple answer when you are trying to protect council's investments etc.

**4b. Which option do you prefer for the future of Port of Auckland?**

Other

**Tell us here:**

**#12184**

Most important objective is to reduce our debt as I have said above and to keep the rates as low as you are able. I'm leaning this way because of the suffering families in our community.

My choice would be for the Council to retain the ownership of the port land and wharves and encourage improved profitability and more dividends back to the Council and for this to be used wisely in the aforementioned objectives.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Other

**Tell us here:**

As above.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

**Tell us why:**

Important to keep producing a good financial return. So that we can keep rates down and reduce our debt.

**5b. What option do you prefer for Bledisloe Terminal?**

As above.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

**#12349**

**Tell us why:**

There is not enough information on what the Auckland Future fund is, what it entails and what we get as Aucklanders as a result of it going through with in. BE CLEARER

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

The reduction of council services will leave vulnerable communities without a space to gather (in a fourth space) and leave them out on a lurch by themselves.

**4d. Do you have any feedback on any other part of the proposal?**

Resume the <b>Natural Environment Targeted Rate (NETR)</b> and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the <b>Water Quality Targeted Rate (WQTR)</b> and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the <b>Climate Action Transport Targeted Rate (CATTR)</b> to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#12381

## 2. What do you think of the transport proposal?

Support most of the proposal

**Tell us why:**

### 2a. Is there anything you would spend more on?

Have a bus, Train & Ferry monthly pass set at \$150 to \$180 per person per month.  
Issue a family pass for 2 adults & 2/3 kids between \$550 per month max. This will help drive more families to use bus, train & ferries.

### 2b. Is there anything you would spend less on?

For areas that lend themselves to: use the bus to get people to the train station and the train to get people to the CBD, commercial or industrial areas. do not have bus and train starting in the same area and finishing their travel in the same area.

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

**Tell us why:**

### 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

All future funds start with the best intentions, but future councils draw down on it to pay off debts. We need to retain our critical investments and only sell the ones that are not critical to Auckland or NZ. This will ensure that dividends stay in Auckland/NZ and not be sent overseas.

**#12381**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

POAL is a critical asset for Auckland & NZ. It's dividends currently stay in NZ and help reduce the rate payer burden. If AKL Council sell this, there are no guarantees that the new owner/Leasor will keep investing in AKL and also keep the cost of shipping goods lower than Australia. There is strong evidence that an overseas investor will want to recover their \$2.1B within 2 to 3 years and this cost will directly affect all goods imported and exported; and domestic coastal shipping - making it more expensive for people in NZ to live. Cost of living will be much much higher than today and families will find it very difficult to pay AKL council the rates in the future. DO NOT SELL THE PORT or ANY CRITICAL Asset!!

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

No Need to open up a fund and pay huge fees to manage it. Keep it simple and save costs.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

The council does not have the money to invest in anything new on this land for the next 40 years as per Eke Panuku. Also, there are a number of restrictions on this land and it will not be a good investment. The council should work on fixing other parts of the city & transport first.

Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

- Investment in cycleways: despite AT's best efforts in recent years to heavily promote walking and cycling and to creatively report usage statistics of the delivered infrastructure, cycleways remain poorly utilised and are a massive waste of ratepayers'

**#12483**

money. Cycleways are there for the use of a privileged few people and do not offer fair value to all Aucklanders.

- Local board funding and oversight: it appears that local boards do not offer bang for buck in terms of their approach to using precious funding. There is very little visibility on their funding decisions (unless one digs into matters on one's own) due to very little press coverage. Residents often discover wasteful spend once money has been spent (such as renaming a local reserve to include a Maori name, which in itself is OK but not during the current cost of living crisis where this makes not one bit of difference to our lives). Hence, I support tightening the belt on local board funding.

- Urban regeneration programme is well intended but has proven to be a highly irresponsible way to spend ratepayers' money. Funding seems to have been guided by a certain ideology, which has provided worse outcomes and until such time that this changes, this programme must be scaled back.

- While I support the central proposal in the "Environment management and regulation" area, the RENH must be scaled back. Other ideological activities like "Maori-led community partnerships" are not reflective of our present day society. Unless there is empirical evidence for how community efforts offer better outcomes (and importantly, less waste of money) when they are Maori-led, community efforts must not be race dependent and risk alienating parts of our population.

- In the "Council support" space, the review of partnerships with mana whenua iwi and Maori communities must be brought forward and Maori outcome funding should not be increased as proposed in the central proposal. Except to the extent it is explicitly required in existing legislation, all funding allocation decisions should be made without consideration of race or religion.

## **2. What do you think of the transport proposal?**

Do not support most of the proposal

### **Tell us why:**

Do not support the following points included in the central proposal for transport:

- fully fund the unsealed roads improvements programme, with the annual investment programme increasing from year three of the plan ensure our assets remain fit for purpose and provide for flood recovery and network resilience by fully funding the council's share of roading and public transport renewals (in my experience the

**#12483**

approach to prioritise such renewals - even within the same suburb - is highly flawed and I do not support this change unless this is done in a fair and equitable manner)

- progress road corridor projects such as Glenvar Road (Torbay), Hill Street (Warkworth) and the Lake Road/Esmonde Road improvements project
- investment in cycling will be focussed on completing existing projects and delivering lower cost cycleways
- investigate the feasibility of a low-cost bike ferry connecting Northcote and the city centre - this is a niche project and spending should be held back until the council's finances are in better shape
- charging for Park and Ride - this will be wrong and just the opposite of what we need to encourage public transport. On the contrary, there should be further investment to provide more parking in park and ride type setups.
- I have other smaller objections the response selection above.

**Tell us why**

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

There are a number of priorities that are inappropriate in the current economic climate where funding is tight and there is a critical need to think carefully about where money is spent. I do not support the following priorities:

- support our communities of greatest need and celebrating our cultural diversity - this is too high level with no quantifiable benefit and no objective way to assess whether funding any particular initiative in this area was an appropriate fit
- work with Kāinga Ora and Fletcher Living, so that our growing neighbourhoods are well planned, built and serviced - this must not take up any funding from the local board. It is up to these organisations to ensure they deliver a fit for purpose project without funding inputs from the local board
- Support a range of accessible transport options that are easy to find and use invest in climate action initiatives and restore our streams and the Manukau Harbour coastline - what transport options is a local board expected to fund and why? Climate action initiatives are far too often based on ideology rather than facts so it is hard to objectively quantify any benefits from the expense incurred.

**8. Do you have any other comments?**

Equitable funding for local boards should be achieved at the earliest possible without increasing the spend, even if it means promised projects are not delivered. Ratepayers aren't a bottomless pit of money so asking for any more money to address this problem by allocating more to local boards with inequitable funding is a terrible idea.

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

### 2. What do you think of the transport proposal?

**#12866**

Support most of the proposal

**Tell us why:**

Enabling safe access for all across the region is paramount to connectivity and connectedness to the environment. Not proceeding with enhancing the cycle ways is just a backwards step to the progress we are making.

**2a. Is there anything you would spend more on?**

**2b. Is there anything you would spend less on?**

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct, Change the operational management

**Tell us why:**

It seems the best option given it is very costly, under utilized but has huge potential.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

I don't know

**Tell us why:**

I just don't understand the potential risk of not owning the airport shares well enough. But I do very much support a future fund - and I think the concept is good, but how the AIA shares are dealt with feels hard to understand.

**4b. Which option do you prefer for the future of Port of Auckland?**

**#12866**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

We need to capitalize on the wharves and the potential profit they could turn - and if there genuinely is no viable alternative to its current location this seems appropriate. The lease could be canceled if needed too.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Higher rates will cripple many of Auckland's rate paying residents.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Keep Bledisloe Terminal as a Port of Auckland operational area

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

Don't support stopping previously-planned cycleways, but do support additional payment methods for public transport. Support making public transport more reliable, as currently many buses do not show up and just drop off the board without being 'cancelled'.

**2a. Is there anything you would spend more on?**

Decarbonising our public transport fleet and increasing frequency/reliability, particularly on popular routes such as Dominion Road.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Proceed with the central proposal

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Spending too much money on useless road bumps that are then removed mere weeks later. Rate payers shouldnt have to front the cost for poor decision making and incredibly expensive road works

**#13006**

## 2. What do you think of the transport proposal?

Don't support any of the proposal

### Tell us why:

Over investment in public transport that fails time and time again. Particularly train lines which seem to forever need repairs and clearly aren't up to standard.

### 2a. Is there anything you would spend more on?

No. We are in a cost of living crisis

### 2b. Is there anything you would spend less on?

All of the initiatives above

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct, Change the operational management

### Tell us why:

It isn't used often enough to justify keeping things as is. Put houses on this land or change the management so it gets used a lot more

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

### Tell us why:

Better diversification for better return on investment

**#13006**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

Good way to raise urgent funds for Auckland

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

Future fund could be more of a gamble with returned revenue

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

The public don't have enough access to the harbour. There should be shops and a place to hold smaller scale pop up events to boost the local economy. More outdoor space for aucklanders to enjoy

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Fix the wastewater issue which we have in Auckland and do it. To communicate with communities and get feedback from the people.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#13063**

Less Auckland Transport, less carbon neutral, less focus on changing parks etc and more focus on what you can do to upkeep what is already there.

Also, dont sell the council assets, and focus on keeping them. Stop building more houses and apartments and help to look after our beautiful old houses and upkeep the old areas. The areas of Auckland are changing and not the same. Please stop building 3 story or even any apartments, it is changing the nice areas of Auckland and not preserving what Auckland used to be like. (that needs to stop). Also focus on paying back our debt.

## **2. What do you think of the transport proposal?**

Do not support most of the proposal

### **Tell us why:**

Because at a time of resession Auckland should be focused on upkeeping what we have already and not be spending any unnecessary money on creating or planning new transport or roading systems.

### **2a. Is there anything you would spend more on?**

Focus on upkeeping what we already have, so there arent pot holes and roads that are falling apart and paying back our road debt.

### **2b. Is there anything you would spend less on?**

Spend less on getting creative, (tunnels, faster routes etc) and keep the focus on keeping the roads up to standard and paying off our road debt.

## **3. Which options do you support for the North Harbour Stadium?**

I don't know

### **Tell us why:**

**#13063**

Because this makes no fiscal sense to sell any of our land and then have to rent it in the future. When our economy and country is in a better financial situation, we can decide to put maney towards fundung the stadium to be redone.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Why do we need an Auckland Future Fund???

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Supporting local small business is very important. Also, upkeeping our local footpaths may be more important and creating any new ones. (like dominion rd, sandringham, and mt albert rd footpaths). Those are the walking paths you should be concerned about

7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

**#13063**

Stop building houses, and changing our areas by having apartments everywhere. Our residential areas are already feeling the negative effects of these infrastructural changes and community changes. It would be great if the board could focus on upkeep and beautifying our communities and looking after the beautiful areas and protecting our heritage. The heritage buildings and the old houses in the residential streets are what make MT Eden, Mt Albert, and Mt Roskill a special part of Auckland and why people chose to live there in the first place. If we wanted to live somewhere with apartments and the same new developments we would move to somewhere else.

**8. Do you have any other comments?**

I don't know enough about it and it would be nice to be sent this information and have a handout in my letterbox that I can respond to. We miss the Our Auckland updates we used to receive regularly, it would be nice if you could start doing these again.

Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

(1) Overall Direction for the Long Term Plan

Here you have asked which option do we prefer for the overall direction for council’s Long Term Plan 2024/2034? (Do less (reduce council services/ investment), lower rates increases and less debt); Proceed with the central proposal; or Do more (increase council services/investment), with higher rates increases and more debt.

**#13351**

We support the central proposal overall, but are opposed to discontinuing the Long Term Differential Strategy. In addition, we support that aspect of the Pay More, Get More Scenario to attract more visitors, bid for and host major events as well as supporting economic development activities. We wish to be assured Council is properly funding core infrastructure services.

As set out in your Consultation Document, the services and activities provided for in the central proposal are a capital investment of \$39.3 billion and operating spending of \$72.0 billion over 10 years. The Consultation Document says this will strengthen Auckland's physical and financial resilience, while tackling some big budget challenges. We agree.

Overall, the rates increases for the average value residential property will be: • 7.5 per cent in year one; • 3.5 per cent in year two; • 8 per cent in year three; and • no more than 3.5 per cent a year after that. We understand that rates for business properties will be around 1.5% higher for each of these periods. We note that this includes discontinuing the Long Term Differential Strategy, but your Consultation Document does not set out how continuing the Long Term Differential Strategy would affect these rate increases, especially for businesses.

The central proposal also includes establishing the Auckland Future Fund using the Auckland International Airport shareholding and the proceeds of an operating lease of Port of Auckland, along with a \$50 million annual cost reduction target by year three for Auckland Council delivered services and a \$30 million asset recycling target per annum (\$300 million over 10 years).

As we set out below, while we support establishing the Auckland Future Fund with the Auckland International Airport shareholding, we do not support an operating lease of Port of Auckland.

In terms of the need for efficiencies and savings, we believe there should be a sharper focus on finding savings from the management of contractors and consultants by the Auckland Council group. We support a budget package that sharply reduces Auckland Council's group operating costs.

We also support borrowing more than the planned 'less than 270 per cent' of group revenue.

And, while we support Council working with central government on new funding tools to enable more investment into visitor attraction and economic development activities (as set out in the central proposal), in the meantime, we ask that a budget for marketing Auckland internationally, to attract visitors, bid for and host major events as well as support economic development activities be prioritised (as set out in the Pay

**#13351**

More, Get More Scenario). We are concerned that under the central proposal only the basic suite of events and minimum level of economic development projects will be delivered by Tātaki Auckland Unlimited. We also ask that the budget for local board funded events, local economic development and town centre re-generation be at least maintained, but preferably increased. These activities are not only what makes Auckland a 'fun' place to live in, but offer an economic lifeline to small businesses with increases in visitor numbers.

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

**2. What do you think of the transport proposal?**

Support all of the proposal

**Tell us why:**

We agree that a key priority for transport should be to make the most of council's existing assets and planned spend, including the council's significant investment in the City Rail Link (CRL) and other large rapid transit network projects. But we ask that all transport projects are planned and implemented in close collaboration with BIDS. A key concern we have is the disruption caused to business from transport developments, including often excessive temporary traffic management. We ask this to be addressed.

We support the particular focus on renewals and maintenance to ensure roads and other network assets are kept in good order and there be a total capital spend of \$13.4 billion for Auckland Transport to address these priorities. We also support a new focus on smaller-scale changes to more quickly improve performance of our roads and public transport services, including the provision of dynamic lanes and bus lanes.

Making public transport faster, more reliable and easier to use is also supported as is rapid transit investment, focused on busways (following the successful example of the Northern Busway). Transport investment for emissions reduction, such as the ongoing addition of electric vehicles to the bus and ferry fleets is also important to us. Getting more people on to public transport also helps reduce emissions.

Ensuring maximum value from every dollar spent is a given for us, as is driving efficiencies and managing operating costs.

**#13351**

One concern we have along with you is the recent government decision to cancel the regional fuel tax (RFT), ending the scheme four years early. We are concerned that this has resulted in a reduction in the level of investment in and re-prioritisation of transport projects in the Long Term Plan 2024/2034. We are keen to see the detailed plans for congestion charging/time of use charging so we can assess the implications for businesses.

Adding further complexity is the recent release of the draft Government Policy Statement on land transport 2024. In particular, this reintroduces the Roads of National Significance programme (including for Auckland, Mill Road and the East West Link). The introduction of legislation for the fast tracking of consents for major infrastructure, including the Roads of National Significance and rapid transit projects, brings further opportunity, but an alignment of national and regional priorities needs to be established.

**2a. Is there anything you would spend more on?**

**2b. Is there anything you would spend less on?**

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

**Tell us why:**

There are a total of four major stadiums in Auckland. Three are owned and operated by the council: Mt Smart Stadium, North Harbour Stadium and Western Springs Stadium. The fourth is the independent Eden Park. The Auckland region faces substantial costs to maintain and operate the stadia in their current configuration and the current operating models are considered to inhibit optimal utilisation and decision making. Some of these venues are under-used and don't make enough money to cover their operating costs. The 2020 Independent Review of Council Controlled Organisations identified that Auckland has "four under-funded and under-utilised stadiums." The Review also identified that a single operator approach is important to maximise opportunities and efficiencies.

**#13351**

A Political Working Group formed by council is assessing expressions of interest for a National Stadium based in Auckland. A future decision around Auckland's National Stadium may also affect how the regional stadia network operates collaboratively in the future.

North Harbour Stadium is the least utilised facility in the Auckland stadium network. Attendance at commercial events and matches at North Harbour Stadium was approximately 10% of the number of fans who attended similar events at Mt Smart Stadium in the 12 months to July 2023. Sports organisations and concert promoters do not hire North Harbour Stadium for commercial events and matches as in their experience it has been that it is too difficult to attract fans to the venue – in comparison to other venues in the network.

Under this Long Term Plan 2024/2034, the council is consulting on two options for how to get the best community outcomes from the North Harbour Stadium precinct.

We support Option 2.

Under Option 2, it is proposed that Council redevelop the North Harbour Stadium precinct to better deliver for the needs of the North Shore community, funded through reallocation of the \$33 million, the sale of some currently unused stadium precinct land, while retaining the existing community playing fields. We understand that other external funding will be necessary to achieve that. We also agree that the operational management of the stadium should be changed to ensure greater use of the facilities by the community.

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Proceed with the proposal

**Tell us why:**

**4b. Which option do you prefer for the future of Port of Auckland?**

Other

**#13351**

### **Tell us here:**

Overall, we support Option 3 - Auckland Future Fund with AIAL shares only. We do not support a lease of the Port operation.

We have previously supported selling all of Council's shareholding in Auckland International Airport Ltd ('AIAL'). Although you have considered in your Consultation Document using the cash from the sale of the remaining AIAL shares to reduce council debt, you have not formally progressed this as an option. Although our preference would be to use the cash from the sale of the remaining AIAL shares to reduce council debt, the closest option we agree with in your proposals is Option 3 (Auckland Future Fund with AIAL shares only). You have described this option as establishing an Auckland Future Fund and transferring the council's remaining AIAL shareholding into the fund (as in the proposed Option 1), but POAL would continue to operate the port (as set out under the enhanced status quo option, Option 2). Under Option 3, those returns would not be invested in the Auckland Future Fund.

Turning to the proposed lease of Port operations, under this option, you have said that Auckland Council or POAL would grant a lease of around 35 years over the port land and operations to an external private party to operate the port. The council would receive an upfront payment for this lease, and the private operating company would have the right to run the port, make capital investments and earn profits from these operations over the period of the lease. Council would not receive returns from the operations of the Port during the period of the lease. At the end of the lease, control of the port operations (and associated land) would transfer back to the council group. The underlying ownership of the port land and wharves would stay with the Auckland Council group throughout the lease. The lease agreement would also set out key parameters that would help ensure that the council's ownership objectives and lease conditions were met.

There are several reasons why we do not support a lease of the Port operations.

First, the various reports commissioned on the future of the Port of Auckland have reached the same conclusion that the Port will outgrow its present site in 20-30 years. Also, the capacity constraints are not limited to the Port itself. The reports agree that the road and rail networks that service the Port will need significant upgrading to improve connectivity and integration. As a consequence, locking the Port into a lease of around 35 years does not seem to align with the need to integrate transport links or shift the Port in 20-30 years, or provide the flexibility necessary for these decisions.

Further, in recent decades the city centre has transformed dramatically and the area around the Port has become an important commercial and residential centre in its own right. There are differing stakeholder aspirations for the area leading to tensions between the growth in freight volumes on the one hand, and increasing residential and

**#13351**

recreational use of the waterfront on the other. One hundred per cent ownership of POAL and the land on the Auckland waterfront means council can better manage the differing stakeholder aspirations.

In addition, the privatisation of the Port will likely mean Auckland businesses would end up paying increased costs to deliver profits to a private port operator (who will have a monopoly). Major price hikes from private terminal operators have led to concerns recently in Australia. We have concerns that any financial benefits from the lease will be outweighed by increased costs for businesses and consumers. Moreover, the Port of Auckland has recently seen a major turnaround under new management.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

The council's strategic vision for the city centre waterfront involves improving public access to the waterfront for Aucklanders. The proposal in the Long Term Plan 2024/2034 to free-up wharves by consolidating the physical area of the port operations wou

**5b. What option do you prefer for Bledisloe Terminal?**

#13351

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

The longer-term financial implications of the freed-up Bledisloe Terminal would depend on the nature of the alternative uses. Creating new public infrastructure or amenities would generally have a net financial cost to council, while residential or commercial development on the site should have a net financial benefit (after accounting for any necessary infrastructure development or remediation work). This would all likely occur outside the 10-year period of the Long Term Plan 2024/2034.

Overall, we agree to Marsden and Captain Cook wharves being freed-up for alternative uses, but not the Bledisloe Terminal (at least at this stage).

**6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?**

Our overall feedback is that what businesses need most from council is a fair, transparent and stable approach to rates.

Long Term Differential Strategy (LTDS)

We are very concerned about your proposal to discontinue the Long Term Differential Strategy which has been gradually lowering the share of general rates paid by businesses and for business ratepayers.

We do not accept that a business differential should be applied to rates especially for your reasons that “businesses place more demand on, and impose more costs on, the

#13351

council’s transport and stormwater services”, or that “rates are more affordable for businesses” or because “businesses can also claim back GST on rates and expense rates against tax.” These reasons do not justify the business differential, particularly for small businesses who make up most businesses in Auckland.

We ask that the Long Term Differential Strategy remain in place.

We are also very concerned about your proposal to increase the share that businesses pay of generally applied targeted rates (Water Quality, Natural Environment, and Climate Action Transport targeted rates) from 25.8 per cent (originally set at the same level of the end target of the LTDS) to the same share they will pay of the general rate, approximately 31 per cent.

While we agree that Auckland must improve infrastructure to save our harbours, beaches and streams and reverse the decline of biodiversity in the region, we do not accept that a business differential (especially at 31%) should be applied to these rates.

Watercare’s increase in charges

To support a significant increase in capital investment over the next 10-years, Watercare's board of directors has proposed to increase water and wastewater tariffs by 25.8 per cent on 1 July 2024. We question whether the substantial increases in water and wastewater tariffs are reasonable.

Conclusions

As we enter another year where the resilience of small and medium sized businesses will be tested, we ask the Council to consider carefully the needs of these ratepayer businesses as it makes decisions about the priorities and proposed savings in the Long Term Plan 2024/2034.

We cannot emphasise enough that there must be a focus on providing core infrastructure services which grow the economy and support local businesses, especially in our town centres and industrial/commercial areas.

We fundamentally believe further savings can be made with a culture of efficiency being instilled across the council group. Now is the time for the council, and it's significant number of employees, to adopt a rate-payer mindset. But council must not lose sight of Auckland's ongoing economic prosperity.

Higher development of brown field areas requires more and better parks. I would like to see parks addressed properly in brown field developer contributions.

Developer contributions should be higher in greenfield areas to make up for the huge amount of infrastructure required. Brown field development contributions should be going directly into the community the development is in.

More and better cycle lanes!! Get people off the roads on to bikes - people won't ride bikes until they're safe to use.

We need to protect our libraries and look to expand their reach and services - tool libraries etc.

Speed bumps. Cones.

Great Barrier island seems to get a huge amount of funding for a tiny tiny population?

**2. What do you think of the transport proposal?**

Support most of the proposal

**Tell us why:**

The regional fuel tax was a user based tax model which the right leaning governemnt should have been in support of. I do not support the increase of rates going towards more roads - the regional fuel tax was good and worthwhile. Bring it back to fund roading projects.

I do not support reducing bike lane infrastructure. We should be building bike lanes at the same rate as car based transport.

**2a. Is there anything you would spend more on?**

More bike lanes and better public transport.

Why has Auckland not looked into Autonomous Rail Rapid Transit (ART) - these are successful where they are used - when cars are stopped from being the kings of the city. (Same as buses and bikes, all more useable and effective when not having to sit in traffic with cars.)

**2b. Is there anything you would spend less on?**

road calming measures in suburban streets, road cones, random speed bumps, changing speed limits for no reason, the weird big poles AT are putting it to show where a train station is (as if people don't know in this day and age of smart phones)

### Tell us why

Should the rate payer be supporting businesses outside of visiting them? I don't think that is a good use of rate dollars. Rate funding should be going to programs that majority can access if they want - such as parks and libraries.

**#13374**

These goals are airy

**7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?**

These priorities are airy fairy and don't actually say what they mean or how they will be achieved. What does local leadership even mean? Who are local leaders? Who decides who they are?? Never heard of this as a resident.

Why is healthy waters not sorting out the huge areas of Roskill/Wesley that flooded?? Just because it's KO housing, the council doesn't help the houses there? Seems unjust. The area up river of Mount Roskill War Memorial that flooded very badly should not be housing - it should have never been housing. It needs to be a park asap to protect people.

Walking and cycling - yes. More cycle lanes that aren't shared please!! Cycling on a share footpath isn't an efficient way to get around unless you're a school kid.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	Do less
Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Fix Auckland's waste-water and sewage problem,

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#13461**

less cultural centres, and less investment in major sporting events, for example financial help for Rugby or sailing

## **2. What do you think of the transport proposal?**

Support all of the proposal

### **Tell us why:**

All of the above may make it easier and quicker to move around Auckland

### **2a. Is there anything you would spend more on?**

Road maintenance. Improve the roads we already have with continual maintenance

### **2b. Is there anything you would spend less on?**

Build less new roads and less new bus lanes.

Cut back spending on mowing lawns in parks. Currently council mows the lawns every two weeks. This should be changed to every three weeks. and would save a lot of money,

## **3. Which options do you support for the North Harbour Stadium?**

Other

### **Tell us why:**

Change the management to a public-private management, where businesses promote and sponsor events

Even sell the stadium to a private company. Auckland council needs to get out of owning and operating stadiums

### **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

**#13461**

I don't know

**Tell us why:**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Invest in the proposed Auckland Future Fund

**Tell us here:**

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

Great idea, and making Auckland central a better place to visit

**5b. What option do you prefer for Bledisloe Terminal?**

#13461

Keep Bledisloe Terminal as a Port of Auckland operational area

Council support	Do less

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Separating sewage from the stormwater drainage systems to protect our natural landscape and oceans.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#13572**

less creating of new projects and new council companies. it is imperative to pay Auckland City's debt, Creating a new Auckland Futures Fund is jargon for a very costly exercise.... money that could be used to pay some of the debt accrued.

## **2. What do you think of the transport proposal?**

Support most of the proposal

### **Tell us why:**

The speed bumps that litter Aucklands roads are not effective and reduce a driver's responsibility to make conscious safe driving decisions. When one is walking, it is not unusual to witness vehicles racing over the bumps. This brings question to the spending of what appears to be an inordinate amount of public money used to erect them. Some recent Research to do with this form of traffic management has shown that cars negotiating speed bumps produce more carbon emissions than driving on roads without speed bumps.

Hence stopping some of the previously planned initiatives may save on expenditure as well as looking after the environment.

Pedestrian crossing used to be effectively highlighted by Belisha beacons. I wonder what happened to them?

### **2a. Is there anything you would spend more on?**

There are areas in Auckland where the pavements are in such disrepair that they are dangerous for people to transverse. These pavements need to have immediate remedial work to be safe for the public.

### **2b. Is there anything you would spend less on?**

definitely speed bumps!

**4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

**Tell us why:**

This is akin to selling your house and using the money to rent it back. Eventually all the assets and the funds relinquished by the sale are gone. The forefathers of Auckland City had foresight to provide lands for parks and to invest in the Auckland airport and Ports of Auckland... ensuring that access to Auckland via the Air and sea is protected for future generations.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

There is no guarantee that transferring part of the Ports of Auckland into Council hands will not culminate in the sale of that part. This has already been enacted in the sale of the Auckland Airport shares and that money has been spent. Consequently the Port needs protection.

fossil fuel

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

### Tell us why:

Stadiums are useless unless there's a good use or function for them. No need to keep it going if no one is using it. Either change what it can be used for (or increase number of people who can use it) or redevelop it. We need recreational space. So do not use support use for developing for residential or business. However not another golf course. I like something like Trusts Stadium in Henderson where people can use it when it isn't booked, unlike Eden Park where it is closed to public (I realise it isn't auckland council owned. using it as an example of something sitting empty unused unless booked). When not in use or booked, let schools, community groups or public use for free. let schools and community groups book it at discount.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Why create another CCO when on the other hand council (or perhaps the govt) feel CCO is not fit for purpose and are trying to get rid of AT. Why create a structure that seems to have more cost (someone to admin the fund, the CCO structure needs to be created and administered) to it than just do it now without creating more cost.

Just do it but ring fence it without creating and adding to administrative costs.

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

Again, I don't think there's a need to create additional administrative structures to accomplish this. Council group operation of the port is enough. I really don't see how creating a CCO will improve things as it appears existing CCOs like AT are not popular with council (or govt). Also POAL is already its own management etc without needing additional administrative layer between it and Auckland Council.

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

All Futures fund seems to do is add an additional administrative cost. I don't think it can achieve better returns than what is being done now if you are adding to the cost.

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

#13615

I am not in favour of the proposal to move the port to Northland. I am also not in favour of losing POAL as we do need a port in Auckland region rather than rely on ports in Tauranga, Hawkes Bay etc. The bad publicity about it only being used as a giant car park ignores the fact we do need goods coming into Auckland and it can be either using the port or train or road. I don't think Auckland should depend solely on train, road and air for freight. Having a port means we also have option of getting goods shipped to Auckland. I seem to recall how we were grateful for help from ships in POAL to help provide electricity during one of the shortages.

**Tell us here:**

I am not in favour of the proposal to move the port to Northland. I am also not in favour of losing POAL as we do need a port in Auckland region rather than rely on ports in Tauranga, Hawkes Bay etc. The bad publicity about it only being used as a giant car park ignores the fact we do need goods coming into Auckland and it can be either using the port or train or road. I don't think Auckland should depend solely on train, road and air for freight. Having a port means we also have option of getting goods shipped to Auckland. I seem to recall how we were grateful for help from ships in POAL to help provide electricity during one of the shortages.

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Public transport, walking and cycling.

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#13632**

## 2. What do you think of the transport proposal?

Support most of the proposal

### Tell us why:

Weekly public transport fare caps are a good idea, but \$50 is too high.

Public transport priority needs to be on increasing frequent services.

Walking and cycling needs to prioritize a connected network rather than a small number of gold-plated projects.

## 2a. Is there anything you would spend more on?

Public transport.

## 2b. Is there anything you would spend less on?

## 3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

### Tell us why:

It's too inconveniently located and is unlikely to be serviced by rail anytime soon.

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### Tell us why:

Priority should be on sorting out public transport first.

**#13632**

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

My biggest concern is creating a livable, sustainable city for future generations. They should not have to pick up the tab for decades of underinvestment in critical infrastructure and urban development.

**#13696**

**1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?**

Less roads and car dependency. The obsession with roads at the expense of public space, transport options, active and healthy modes of transport. I'm also skeptical of public-private partnerships which to make costs public while profits go to private businesses.

**2. What do you think of the transport proposal?**

Do not support most of the proposal

**Tell us why:**

For the love of god can we just have sound, evidence based policy. Why would you want to stop cycleways and pedestrian safety in a climate emergency. There are people out there who are willingly reducing congestion, freeing up parking spaces, reducing the public health burden, and cutting carbon emissions. Why would you want to discourage that. Dynamic lanes are confusing and do not solve the route of the problem, i.e. too many cars on the road. Please invest in rapid transport though.

**2a. Is there anything you would spend more on?**

Anything to promote safe, sustainable and active transport. Such as cycleways.

**2b. Is there anything you would spend less on?**

Roads and infrastructure that encourages car dependency at the expensive of other modes. Elderly, low income or anyone else unwilling or unable to drive depend on public transport and/or safe walking and cycling infrastructure

**3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

So more people can enjoy it

I'm not sure which of the above options would be the most sustainable and equitable. I support whichever option is most likely to have the best outcome for the most vulnerable Aucklanders and the environment.

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

Great opportunity to capitalise on the tourism opportunities presented by the Spark Arena and many hospitality providers in the area. Could expand public space for all Aucklanders to enjoy, and add to the attractiveness of city living.

Franklin Local Board Paths Targeted Rate - I don't know.

You should be implementing policies to reduce waste - hard to see how removing pay as you waste accomplishes this.

Puketāpapa

**8. Do you have any other comments?**

I want to invest in this city. But your option of more seems quite a lot more with no end in site. 5% rate rise at least every year? Is this for 10 years? What's the long-term plan? Will we always have to pay more. Is this investment or maintenance? Why not 10% for 2 years then CPI for example.

Likewise, you could sell here why more needs to be invested i.e. years of investment, & how an investment now is needed to catch-up & get ahead of this is the case. Is just pay more to get more to get more which is slightly different.

Celebrating different people and cultures, bringing people together with fun and engaging activities, and reducing barriers for those who might struggle to connect with council or others in the community.

Continuing our environmental work through tree planting, parks restoration, supporting volunteer pest control and planting groups and helping community climate action through our Climate Activator.

Planning for how our parks and open space can respond to growth, making the most of what we have, balancing different uses and connecting green spaces together.

#15114

Supporting our community groups with funding, information, learning new skills and building their capability and networks.	
Settling in at the new, medium-term location for the Pt Chevalier library and continuing to investigate what the long-term library solution might be and how we will fund it.	
Working with the community on activations in the Mt Albert Civic Square.	
Making our parks rubbish-bin free to minimise waste and improve environmental and climate outcomes.

Transportation, buses and trains, especially buses are often unbelievable, especially small ones. One hour a bus, often cancel. Its hard to wait. The quality of travel has been one of the biggest problems in this country for many years. The traffic map and network are well drawn and can only be discussed on paper. The actual effect is very poor

Do not sell airport shares or divest port ownership and property. These are long term investments in the life and prosperity of the city and should not be sold to solve short term issues. Control these, influence the city's economy

#15468

## 2. What do you think of the transport proposal?

Tell us why:

### 2a. Is there anything you would spend more on?

All proposals that increase public transport ease of use and alternative means of transport to private vehicles also maximise electrification of bus fleet

### 2b. Is there anything you would spend less on?

Council to strongly lobby the government to reinstate the Auckland fuel tax which is more equitable than putting the cost on to ratepayers. Only enable Apple, Google Pay etc. if there is immediate benefit- not seen as essential

## 3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

Have little interest in this facility + no time to read up on it. Any decision should be well informed + prudent

## 4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

Tell us why:

I don't oppose a future fund but support climate change mitigating as a high priority in any case. Don't proceed with transfer of AIAL shareholding. This is a transfer of the

**#15468**

responsibility/decision making to a fund manager to avoid democratic process and accountability. We should retain influence over the airport + port Oppose lease of port.

**4b. Which option do you prefer for the future of Port of Auckland?**

**Tell us here:**

The principle of the environment should not bbe dependent on a specific "future fund". The lease of the port operation would threaten ASucklands economy being vulnerable to being run down in order to divest

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Continue to use it to fund council services

**Tell us here:**

All council services should be reviewed to ensure climate change + environmental mitigation are core to their operation and policies funded to do this

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Save the \$100 million + put it into climate change+ enbvironmental protection + mitigation. There are plenty of existing options for residential + commercial developments already.

**5b. What option do you prefer for Bledisloe Terminal?**

Keep Bledisloe Terminal as a Port of Auckland operational area

The LTP document is too large for reasonable consultation. Public understanding needs this to be accessible to the ordinary ratepayer. Horizontal contents page of consultation document is confusion - I almost missed parts 5-12

## Your feedback

### 1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

### 1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	As proposed
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	Do more

### 1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Stormwater upgrades- policing of littler especially shopping trolleys (a recovery fine)

### 1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

**#15477**

## **2. What do you think of the transport proposal?**

Support most of the proposal

### **Tell us why:**

Not enough emphasis on footpaths perhaps needs to be one good footpath on residential streets instead of two

### **2a. Is there anything you would spend more on?**

Quicker introduction of congestion charging. Driving in Auckland is not a privilege that incurs additional costs. Public transport is a right congestion charging around schools for better air quality as well

### **2b. Is there anything you would spend less on?**

Reduce extra gold cards spend to 3:30 to 4:30 leave 4:30 to 6:00 unsubsidised

## **3. Which options do you support for the North Harbour Stadium?**

Consider redeveloping the stadium precinct

### **Tell us why:**

Does Auckland not need a proper covered stadium with capacity of 40000 for future growth. Eden park not fit for purpose as well, so proper stadium policy.

## **4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?**

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

### **Tell us why:**

**#15477**

It didn't work previously

No mention of trust holding in perpetuity for future generations

Loss of control of what is Auckland

**4b. Which option do you prefer for the future of Port of Auckland?**

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

**Tell us here:**

**4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?**

Other

**Tell us here:**

Pay off debt

**4d. Do you have any feedback on any other part of the proposal?**

**Tell us here:**

**5a. What option do you prefer for Captain Cook and Marsden wharves?**

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

**Tell us why:**

**5b. What option do you prefer for Bledisloe Terminal?**

#15477

Keep Bledisloe Terminal as a Port of Auckland operational area

are willing to and capable of delivering social, environmental, cultural and economic outcomes in line with the local board plan and support to these organisations to deliver.	
Support environmental and cultural restoration programmes in partnership with Iwi including Te Kete Rukuruku (place naming) and Te Korowai Papatuaanuku (environmental restoration).	
Develop “Franklin Community Occupancy Guidelines” to inform decisions on council-owned facility leases, including leasing charges.	
Find ways to reduce Franklin’s maintenance costs e.g. by replacing lawn with eco-sourced native trees and reducing or relocating public rubbish bins.	
Progress the development and delivery of the Franklin Paths Programme.	
Deliver a refreshed approach to enabling young people in Franklin to access services and participate in their communities.	
Progress a Pukekohe Cemetery memorial project that acknowledges the unmarked graves at the site.
