Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14217

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#14217

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14217

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	Do not support
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

Franklin

8. Do you have any other comments?

Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Subject: All Aboard TDT Submission on the Auckland Council’s Long-term Plan 2024 (10-year Budget)

01. Introduction

All Aboard believes Auckland Council should use a **climate-focused approach** combined with a **value-for-money approach** to the Long-term Plan.

The direction should be about creating an equitable, low carbon society and improving resilience.

With a focus on:

1. **Fix** what is broken
2. **Finish** what we started
3. **Optimise** what we have

1a. Which option do you prefer for the overall direction for council’s long-term plan?

Do less (reduce council services/ investment), lower rates increases and less debt

Proceed with the central proposal

Do more (increase council services/ investment), with higher rates increases and more debt

Other

I don't know

All Aboard’s focus is in assisting positive transport change. Like Council, we know that meeting our **international commitments** on climate requires **largely decarbonising** the transport system by 2030. Additionally, we all know that the only way to do so involves supporting all people to travel **safely and efficiently** in an **accessible and eco-friendly** transport system.

Council developed the Transport Emissions Reduction Pathway (**TERP**) to help deliver this change. The **economic, social and environmental benefits** of implementing it are **sizable** and Council can definitely surmount the barriers they are currently facing.

02. The Key Messages All Aboard Supports

2.1. A different relationship: We support Mayor Brown, in a call for a “fundamentally different relationship between Auckland Council and central government.” This needs to start with a rejection of the draft GPS. We, the community all over Aotearoa, are taking action on this. Now we need our elected representatives to use any power they have, to ensure government policy puts **people and planet first**.

2.2. Value for money: We cannot afford a Long-term Plan built around the transport sector’s current approach to transport planning. The transport programme needs urgent reprioritisation in line with the **TERP**.

2.3. A quality, compact city: We support Council’s push-back against central government’s penchant for greenfields growth. However, Council has also contributed to the excessive sprawl since the Auckland Plan outlined a quality, compact city approach twelve years ago. Auckland Council’s Long-term Plan should, by now, be fully focussed on **supporting quality intensification**. All projects that support sprawl should be eliminated from the plan as unaffordable spending.

03. Fix what is broken

Identified Issue	How can we fix it and what are the benefits?
<p>3.1. Parking Enforcement</p> <p>Auckland Transport’s parking enforcement is ineffective. Auckland is now flooded by illegally parked cars, reducing visibility, walking and cycling safety, and access to amenities.</p> <p>Auckland Transport has a policy of only responding to callouts for parking enforcement, outside the central area.</p>	<p>Improving parking enforcement is not about legislation to adjust the parking fines to appropriate levels. It’s about improving Auckland Transport’s strategy, which has led to their claim of insufficient resources and to the explosion in illegal parking. Council can fix this by requiring AT to use proactive enforcement.</p> <p>Ticketing illegally parked cars has no downsides: it is justified. Auckland Council and its transport arm, Auckland Transport, would be creating a better, efficient city-wide deterrence</p>

<p>Officers go to the one parked vehicle that receives the complaint and ticket it, or not. Auckland Transport’s policy is not to review all the other illegally parked cars.</p>	<p>effect, and it would make the enforcement team’s practices self-supporting.</p> <p>The funds received from ticketing illegally parked cars will pay its enforcement, and the surplus can be allocated to footpaths, cycle lanes, and public transport.</p>
<p>3.2. Cost-effective Planning</p> <p>Fixing dated assets of a high-carbon transport system, without modifying them is a wasteful approach. Auckland Council has been directing Auckland Transport to combine road renewals, other infrastructure improvements, and street improvements funding to enable a cost-effective planning approach.</p> <p>This has been thwarted due to sprawl and excessive road building, the cost of renewals has highly increased. Those silos in charge of renewals funding have tried to protect it from being used in improvements projects. While their position is understandable, this resistance is preventing a cost-effective approach. Political leadership is required.</p>	<p>Auckland Council must give direction to Auckland Transport to combine renewals and improvements funding. When a street is renewed, it should be brought up to modern standards: including wide and safe footpaths as well as wide and safe cycle lanes.</p>
<p>3.3. Storm Response</p> <p>Auckland Transport’s resilience planning (e.g. in the AT Sustainability Strategy 2016) turned out to be insubstantial claims. With Cyclone Gabrielle, there was no resilience. The budget was stripped of funding for safety and modeshift work, in an attempt to return the damaged roads back to their original state. This is a pathway to financial ruin.</p>	<p>The Long-term Plan needs to outline how Auckland Transport’s response to climate damage is not going to derail the safety and modeshift programmes required to decarbonise the transport system.</p> <p>Limiting comment to just the transport aspects - a sound resilience plan would have:</p> <ol style="list-style-type: none"> 1. Worked with what we have, turning: <ol style="list-style-type: none"> a. disruption into community understanding of the challenges,

<p>Storm damage is the right time for a public discussion about the need for shifting to a system that does not create climate damage. Fixing damage by modifying the road layout to become a safe and low-carbon system, can be done cheaply.</p>	<ul style="list-style-type: none"> b. challenges into opportunities, c. a broken network into a different network, of different modes and patterns <p>2. Ensured funding was not diverted away from climate transition work:</p> <ul style="list-style-type: none"> a. Safety and modeshift capital improvements b. Adaptation work <p>Auckland Transport should not have attempted to build back the same high-carbon network, nor should they have stripped the safety and modeshift budgets to pay for it.</p> <p>Focus should be placed on the benefits: resilience, value-for-money, a healthy thriving city.</p>
<p>3.4. Safety</p>	<p>Take concrete action on the evidence resulting from studies domestically and internationally which support and protect the lives of community members.</p> <p>Low-traffic neighbourhoods, Raised pedestrian crossings, etc.</p> <p>Ask yourselves some of these simple questions:</p> <ol style="list-style-type: none"> 1. Would I be confident allowing my child to travel to school on this road without supervision? 2. If I or my partner went for a walk with the pram and our dog, would they have enough space on the footpath to comfortably walk next to another family? 3. Do I have enough time to cross this intersection without fearing for my life? <i>You probably don't know because the time does not appear on many of the crosswalk signals. Kindly take into consideration elderly, children, people living with disabilities, and able bodied who may be tired or injured or simply don't walk fast.</i> <p>Kindly refer to points:</p> <ul style="list-style-type: none"> 4.3. Vision Zero 4.4. Katoa Ka Ora

3.5. Port

Over the next few decades, there will be immense changes in environmental, political and social conditions. Council needs to **retain the power** to make the following decisions about the port:

1. To change port ship volumes and biosecurity protocol, in response to a biosecurity threat.
2. To change cruise ship volumes and protocol, in response to climate-related luxury travel restrictions and/or air quality requirements.
3. To make choices about the size and type of ships the port will accept, or the volume or type of freight it will accept, in response to sustainable business policy.
4. To get large trucks off our city streets, in response to safety concerns.
5. To stop using the port to import (and store) vehicles, in response to climate-related intentions around land use change and vehicle ownership rate reductions.

A port lease agreement must ensure **Aucklanders retain their right** to determine how Council responds to important issues such those outlined to the left. Yet such a lease agreement would be of low value today, with low corporate expectations to have to internalise the costs of pollution, exploitation and the risks of climate change and its associated effects.

In any case, if the lease is set at a rate that means operating the port returns a profit and is an attractive proposition for a port operator, then Council could be operating it to gain that profit, too.

The only benefit to Aucklanders would be in the very short term if the locked-in rental income provides Council with the ability to borrow more money - which would leave future generations having to pay that money off whilst having no say about port operations.

Leasing the port would create huge and important intergenerational inequity.

It is important that Auckland does not give away such rights to determine how our city responds to climate change and to the need to prevent it.

3.6. Airport

Selling some of the airport shares in the last term has meant losing that revenue, and impacting our financial challenges. As a large private landowner and consenting authority, the Airport has significant influence over an important part of the Auckland region - its land use and the transport options around the airport nexus.

Maintaining public ownership of the Airport company means the city has more ways to have a say in the activities it undertakes. As with the port, the decisions around the airport should be made according to **climate planning and intergenerational equity**.

Put rates up instead.

04. Finish what we started	
Identified Unfinished Business	How should we finish it and what are the benefits? ?
<p>4.1. Cycling Network 2012</p> <p>The Auckland Plan 2012 proposed a Cycling Network with a timeline of 70% completion by 2020 and 100% completion by 2026. Programmes to achieve progress on this, e.g. the 2017 Auckland Cycling Programme and the 2022 Auckland Cycling and Micromobility Strategy, and individual projects in turn, have faced political and investment prioritisation barriers, especially since about 2017. This is despite continued Board and Council approval.</p>	<p>Council needs to direct Auckland Transport to start delivering the programmes already developed, at pace, using a steady annual programme at a scale to mitigate the past sluggishness. The important thing is to get started, prevent further delays, and then allow experience (rather than incessant premature ‘reviews’) to refine delivery approach. Once experience has been gained, tactical reallocation of road space, followed by permanent materials when each street receives ‘renewals’ upgrades will be the most cost-effective way forward.</p> <p>The international evidence for the health, social, environmental, political and economic benefits from cycling investment is extensive and irrefutable. NZ evidence includes, for example, the cycling programme business cases already linked, and: Healthy Future Mobility Synthesis Report Turning the Tide Stuck with the Car and all its harms</p>
<p>4.2. Transport Emissions Reductions Pathway (TERP)</p> <p>The TERP was approved (and endorsed) by Auckland Council and Auckland Transport, respectively, in 2022. The important change is in a ‘paradigm shift’. The TERP’s principles can be immediately applied to project designs and investment decisions, helping develop value-for-money</p>	<p>First, direct AT that delivery now must be sufficiently rapid to mitigate the sluggish start. The paradigm shift required of AT is to accept that the TERP delivers value-for-money, so it is a solution to budgetary pressures, not a burden. This will become obvious with an immediate switch from ‘predict and provide’ to vision-led planning approach. This switch will free up significant money from supersized projects, enabling the raft of smaller safety and modeshift</p>

<p>budgets and programmes while staff climate understanding comes up to speed.</p>	<p>projects to be funded easily. For successful delivery, Council will need to appoint Board members on the basis of their commitment to the delivery of the TERP within its 2030 timeframe, with the direction to require the CEO to appoint an ELT similarly committed.</p> <p>The TERP details the social, environmental and health benefits, and Council has access to the Economic Benefits and Costs report: a 15-page summary is included in this Council meeting agenda.</p>
<p>4.3. Vision Zero</p> <p>When the Road Safety Business Improvement Review was released in January 2018, a key recommendation was to adopt the Vision Zero approach. Auckland Council describes Vision Zero as focusing on, “a core principle that human life and health can never be exchanged for other benefits within society.” Vision Zero sets an upper speed limit of 30 km/hr in “locations with possible conflicts between pedestrians and cars”.</p> <p>Despite committing to each and every recommendation, Auckland Transport delayed training staff in the Vision Zero approach for over a year, claiming the need for “due diligence” on the approach before the Board could adopt it. Thus, unspecified legal or financial risks were prioritised over risks to life and limb, which indicated scepticism about the veracity of the Safe System approach. This patchy commitment to Vision Zero has continued, and today its principles are on display within Auckland Transport’s messaging rather than in the organisation’s programme of work.</p>	<p>Both Auckland Council and Auckland Transport need to immediately stop “exchanging” human life and health for “traffic flow” and so called “economic productivity”. This shift needs to happen right away in decisions about the safety programme (e.g. raised pedestrian crossings and safer speeds), street improvements, throughout all projects, and in prioritising investments.</p> <p>Auckland Transport needs to start delivering a Vision Zero-aligned programme of improvements to our arterials, which are “locations with possible conflicts between pedestrians and cars”. This will need support with a full public information campaign describing how Auckland’s transport network will function far better using Vision Zero, with narrower roads, smoother flow, fewer traffic lights and streets suitable for a 21st Century, people-focused city.</p> <p>Lives will be saved; injuries will be prevented. Additionally, we will have a quieter and more liveable city in which people can move around actively - leading to improvements to health.</p>

4.4. Katoa Ka Ora

Auckland Transport has attempted to bring safer speed limits to Auckland in a series of tranches. This has been a cost-ineffective approach; minimal signage, consultation and education costs would have arisen from doing the city in one go.

The latest tranche is called Katoa Ka Ora, and it was delayed last year, seemingly in response to politics. There had been no change in the law and certainly no reduction in need.

This delay exacerbated other problems with the safer speed programme:

- a) the programme has not proceeded at the pace required, nor at that recommended by the Safety Review.
- b) the changes lower speeds but not to the level required by Vision Zero (see above), especially for arterials.
- c) the programme has been limited to only those areas with Local Board support (and even then, not to the level that they requested). Safe System planning requires that all people are given the safety of Vision Zero speed limits. Auckland Transport should have robustly rejected the suggestion that politicians ignorant of the evidence should determine whether children live or die.

Auckland Transport should **approve Katoa Ka Ora** as supported by Auckland Council in December 2023.

The Long-term Plan should include one remaining tranche of speed limit changes to **apply Vision Zero** speeds comprehensively across Auckland.

Auckland Council and Auckland Transport should **urge the police to take enforcement of urban speed limits** (e.g. 30 km/hr) **seriously**. Adequate enforcement of speed limits contributes to preventing deaths and injuries from air pollution, physical inactivity and climate change, as well as from traffic trauma.

Lowering speed limits is one of the most cost-effective ways to improve safety outcomes, and this is true even before it is possible to improve the street environment or without adequate enforcement.

05. Optimise what we have

Identified Opportunities for Optimisation	How can we optimise and what are the benefits?
<p>5.1. Rooding Network</p> <p>The road network should be optimising the achievement of the Auckland Plan Outcomes, not “traffic flow”.</p> <p>Dynamic lanes can be useful, but only within the TERP and Vision Zero parameters, or they will decrease safety and increase traffic and emissions.</p>	<p>The Long-term Plan should include a programme for implementing low traffic neighbourhoods (LTN) across the city so that most areas are included by 2030.</p> <p>The Long-term Plan should include a programme of road reallocation to protected cycle lanes and, where there is space, bus lanes. This will also require a Traffic Circulation Plan, which will require some sections of road to become one way.</p> <p>The only dynamic lanes projects in the Long-term Plan should be those that support significant reallocation of traffic lanes to protected cycle lanes. This enables an even greater increase in capacity than using dynamic lanes alone, because cycle lanes have a higher capacity than traffic lanes.</p> <p>Optimising the rooding network significantly reduces the project costs for projects like Airport to Botany, Lincoln Rd, and Carrington Rd. Thus, over a billion dollars could be reallocated to safety and modeshift projects, enabling Council to serve people better.</p>
<p>5.2. Deliberative Democracy</p>	<p>Optimise the feedback- Council is making progress on using deliberative democracy. This will help Councillors lead the city towards a more accessible and safe transport system, by keeping them better informed about the strong level of support for progress.</p>

06. Conclusion

The Long-term Plan allocates funding to a transport programme that does not follow Council direction (the TERP). Despite the draft GPS, Council can work to achieve its Climate Commitments and Vision Zero goals. To achieve this successfully, Auckland Council and Auckland Transport need to take action on the TERP as it will deliver the lowest cost best outcomes for the citizens of Tāmaki Makaurau. The **transport section of the Long-term Plan needs a complete rethink. The focus needs to be on investing in safe and accessible public transport, walking and cycling infrastructure - to put the wellbeing of our people and our planet first.**

You are more than welcome, and even encouraged, to email executive.director@allaboard.nz to discuss this submission, ask questions and engage in supportive conversations for the greater good of Tāmaki Makaurau, our communities, and our planet Earth.

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14239

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#14239

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14239

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

28 March 2024

Mayor Wayne Brown, Mayor of Auckland

By email: mayor.wayne.brown@aucklandcouncil.govt.nz / enquiry@aucklandcouncil.govt.nz

Tēnā koe Mayor Brown,

Re: Ngāti Whātua Ōrākei Feedback on Auckland Council's Long-Term Plan 2024-2034 (10-year budget)

Ko Māhuhu ki te rangi te waka

Ko Maungakiekie te maunga

Ko Waitematā te moana

Ko Ngā Oho, Te Taoū, Ko Te Uringutu ngā hapū

Ko Ngāti Whātua Ōrākei te iwi

Ngāti Whātua Ōrākei welcomes and appreciates the opportunity to provide feedback on Auckland Council's Long-Term Plan 2024-2034 (10-year budget) ('the LTP'). This feedback is presented by the Ngāti Whātua Ōrākei Trust as the mandated representative of Ngāti Whātua Ōrākei, the tāngata whenua of central Tāmaki.

We would welcome the opportunity to kōrero with you in respect to this feedback.

This feedback will:

- a) Introduce Ngāti Whātua Ōrākei and the Ngāti Whātua Ōrākei Trust; and
- b) Outline Ngāti Whātua Ōrākei's overall position and feedback on the LTP, with particular focus on;
 - a. Housing and Development Opportunities;
 - b. Economic Prosperity and Asset Growth, with particular focus on the Port of Auckland;
 - c. Environmental Management and Climate Action;
 - d. Cultural Identity and Heritage; and
 - e. Partnerships and Engagement.

Introducing Ngāti Whātua Ōrākei

1. Ko Māhuhu-ki-te-rangi te waka Ko Maungakiekie te maunga Ko Waitematā te moana Ko Ngā Oho, ko Te Taoū, ko Te Uringutu ngā hapū Ko Ngāti Whātua te iwi Tāmaki Makaurau e ngunguru nei!

2. Ngāti Whātua Ōrākei represents the collective rangatiratanga and tribal authority of the descendants of Tuperiri who established Ngāti Whātua Ōrākei mana in Tāmaki, the central Auckland Isthmus from the 1740s. As such, every member of Ngāti Whātua Ōrākei can trace their whakapapa to Tuperiri and are descended from the 3 hapū (sub-tribes): Te Tāōū, Ngāoho, and Te Uringutu, collectively referred to as Ngāti Whātua Ōrākei. Ngāti Whātua Ōrākei is driven by its vision *kia rere te kāhu pokere ki ngā taumata tiketike* (to soar and fly to the highest heights) and its mahi is underpinned by its uara, the values that ground it to tikanga Māori.
3. Ngāti Whātua Ōrākei are the tāngata whenua of central Tāmaki and the tāngata moana of the Waitematā and their rohe on the basis of take tūpuna (ancestral rights and obligations), take raupatu (the taking of land through traditional warfare), tuku whenua (traditional gifting of land) which demonstrates mana i te whenua; and ahi kā (continuous and unbroken occupation and use of land and sea). Our people have lived at the edge and lived off the bounty of the Waitematā since the mid-18th century. The wider rohe of Ngāti Whātua Ōrākei – Te Kahu Tōpuni o Tuperiri – is shown in figure 1 below.
4. The very founding of Tāmaki Makaurau has its roots through the gifting of 3000 acres of whenua in the Tāmaki isthmus by Ngāti Whātua Ōrākei to Governor Hobson in 1840 for use by the English settlers. Te Toangaroa, as a central city precinct owned by Ngāti Whātua Ōrākei as tāngata whenua, is unique globally.
5. The foundations of Tāmaki Makaurau are deeply embedded in acts of generosity and foresight. This act of tuku whenua (reciprocity and partnership through gifting land) forever altered the landscape, underlines our legacy as tāngata whenua, and highlights the significance of Te Toangaroa as a central precinct, reflecting our unique cultural heritage. Such distinct narratives are essential for fostering a city's identity and attracting business, embodying values that Ngāti Whātua Ōrākei believes should be universally celebrated.
6. This tradition of leadership and tuku whenua further cemented the mana of Ngāti Whātua Ōrākei in Tāmaki Makaurau, underpinning our rights and responsibilities through ancestral connections, conquest, and enduring stewardship of the whenua. Our narrative, enriched by these legacies of leadership and guardianship, weaves a tapestry of unity, prosperity, and cultural identity for all who call Tāmaki Makaurau home.
7. We have approximately 7,330 Hapū members throughout Aotearoa New Zealand and around the world. Located in and around the Tāmaki isthmus, in the largest city in Aotearoa, we hold firm to our history, culture, identity and language. While Hapū members are located throughout the motu, the vast majority (approximately 3100) reside in Tāmaki Makaurau. Ngāti Whātua Ōrākei also hold significant commercial land investments throughout Tāmaki Makaurau, including te Taongaroa, meaning that we are significant rates contributors, whilst also committing to ongoing manākitanga with the co-governance arrangement for the Whenua Rangatira and ongoing cultural leadership for Tāmaki Makaurau.
8. Today the collective affairs of Ngāti Whātua Ōrākei are looked after by the Ngāti Whātua Ōrākei Trust. Its purpose is to ensure the cultural, commercial, and social development of

Ngāti Whātua Ōrākei for the benefit of its members through receiving, administering, managing, protecting, and governing its assets.

9. Ngāti Whātua Ōrākei hope that the principles outlined above are reflected in the LTP, and that Auckland Council appropriately recognises the unique status of those who are tāngata whenua through whakapapa and raupatu, and maintained via ahi kā.
10. Ngāti Whātua Ōrākei looks forward to continuing engagement with Auckland Council, as the mandated representative of Ngāti Whātua Ōrākei, being the descendants of Tuperiri of Te Taoū, Ngā Oho and Te Uringutu hapū of the Ngāti Whātua iwi, the tāngata whenua of central Tāmaki.

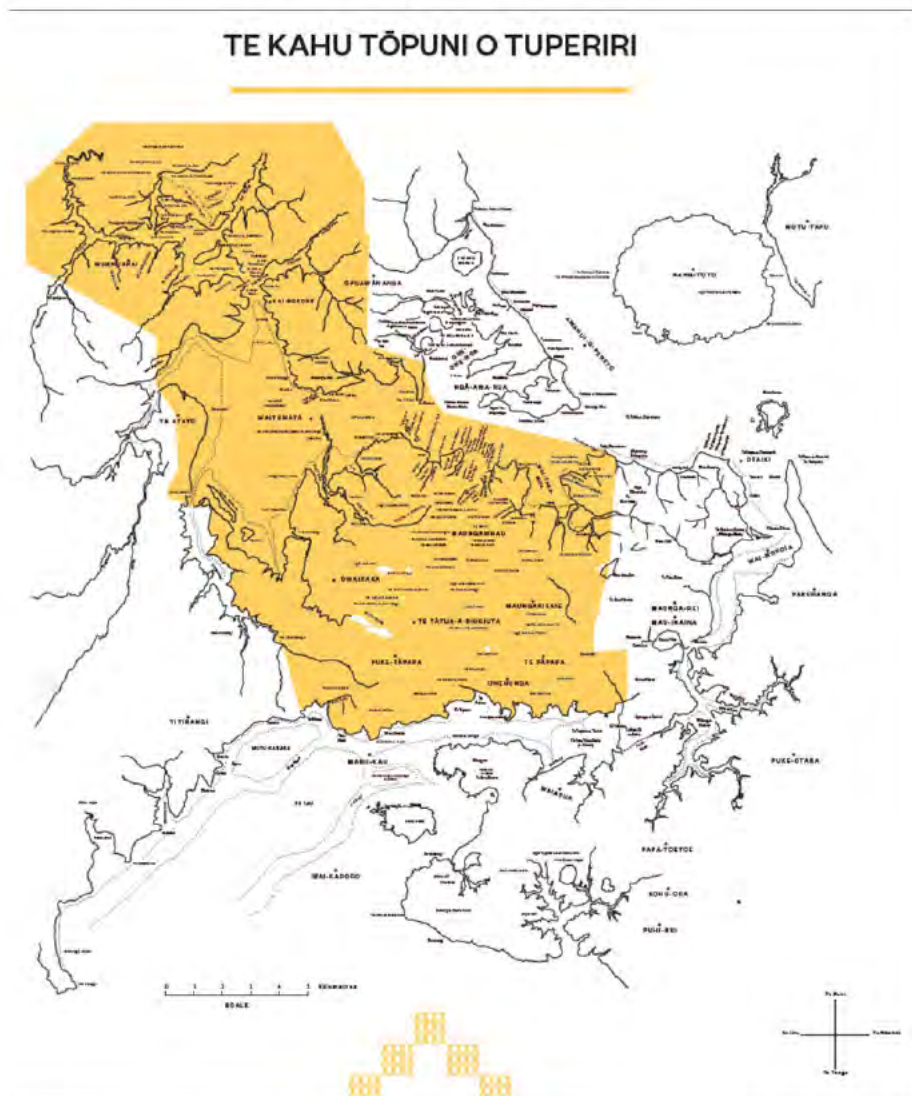

Figure 1 – Map showing Ngāti Whātua Ōrākei’s rohe in Tāmaki Makaurau – Te Kahu Tōpuni o Tuperiri.

Auckland Council’s Long-Term Plan 2024-2034 (10-year budget): General position and comments

11. Ngāti Whātua Ōrākei generally supports Auckland Council's draft LTP, as a key strategic document outlining the Council's activities and how they are managed, delivered and funded and supports the "pay more get more" option. However, Ngāti Whātua Ōrākei requests a meaningful relationship with proactive engagement directly with Auckland Council, recognising our reo and identity through working with us through a genuine Te Tiriti partnership. At a high level, Ngāti Whātua Ōrākei seeks that the LTP is prepared and implemented in a way that:
- a. Transport is improved and better planned for;
 - b. That environmental initiatives to support native plants and native birds returning to Tāmaki Makaurau are prioritised with adequate and ongoing funding; and
 - c. The Waitematā is treated with respect and is protected from inappropriate development and associated environmental effects.
12. ***Only 'appropriate' iwi and hapū should be considered, consulted and involved in the proposed LTP feedback processes.*** Auckland Council must ensure that it is the 'local' or 'right' hapū, and iwi which are recognised and consulted with in Tāmaki Makaurau, being those who are the tāngata whenua (and so those who hold ahi kā status). This tikanga compliant approach is supported by the recent:
- a. Declaration in the High Court by Palmer J that Ngāti Whātua Ōrākei has ahi kā and mana whenua in central Tāmaki with all the obligations at tikanga that go with that¹ (see figure 2 below); and
 - b. High Court decision of Whata J² that decision makers within the Resource Management Act 1991 framework must "recognise and provide for" the relationship of Māori with their whenua, and that to ignore, or refuse to adjudicate on, divergent iwi claims about their relationship with whenua is the antithesis of recognising and providing for their relationship with whenua.

1. *Ngāti Whātua Ōrākei v Attorney-General* [2023] NZHC 74 (Judgment No 5).

2. *Ngāti Maru Trust v Ngāti Whātua Ōrākei Whaia Maia Limited* [2020] NZHC 2768.

Figure 2 – Map showing the area to which the High Court Declaration applies (shown outlined in yellow)

13. Ngāti Whātua Ōrākei is extremely concerned that if those who are tāngata whenua are not involved in processes associated with the development of the LTP, and ongoing partnership opportunities, this will lead to poor outcomes. It is important that the feedback that informs the final LTP is from those who are tāngata whenua in accordance with tikanga Māori. This requires Auckland Council to acknowledge the strengths of relationship iwi and hapū have “at place”. With specific regard to Ngāti Whātua Ōrākei, we seek that the LTP recognises Ngāti Whātua Ōrākei status together with our interests and opportunities for involvement and partnership, within central Tāmaki (as shown in Figure 1 above), as we recognise the status of other iwi and hapū within the areas over which they hold tangata whenua and ahi kā status.
14. Allowing any iwi and hapū to participate in partnerships and joint working groups, as well as being involved in future decision-making, without considering whether they are the ‘right’ hapū and iwi to do so facilitates further claims upon territories and resources within the rohe of tāngata whenua (as Ngāti Whātua Ōrākei has historically experienced in Local Government Act and Resource Management Act processes). This is not just an issue for Ngāti Whātua Ōrākei, but very many iwi and hapū throughout Tāmaki Makaurau and Aotearoa.
15. Ngāti Whātua Ōrākei is frustrated by the persistent lack of direction being displayed by Auckland Council in this space. Too often Ngāti Whātua Ōrākei are incorrectly grouped with other iwi and hapū in engagement on Council projects within central Tāmaki where we hold ahi kā status, as well as within parts of the wider region where we would defer to those iwi and hapū who hold ahi kā status there. Not only does this fail to acknowledge our status as tāngata whenua in central Tāmaki, but enabling 21 iwi / hapū to consult on and be involved

in significant decision-making processes comes with substantial inefficiencies and additional costs. This is completely unsatisfactory when the 'right' iwi and hapū are not being involved, or the feedback from the most appropriate iwi and hapū gets lost or detracted from, through the process.

16. Ngāti Whātua Ōrākei requests that our reo and identity is seen, heard and provided for, through working with us meaningfully, instead of all 21 iwi and hapū for all projects, regardless of where they are located, as a tick-box exercise.
17. **Ngāti Whātua Ōrākei request targeted investments through the LTP, in housing developments and infrastructure to support community growth and affordability.** Ngāti Whātua Ōrākei are of the view that specific policies and investments that prioritise affordable housing, with a particular focus on further support for initiatives such as the development of the Ōrākei Papakāinga through the LTP. Housing, and in particular affordable housing for everyone in Tāmaki, is a foundation for self-determination and community well-being. Warm, safe kāinga for hapū members is a priority for Ngāti Whātua Ōrākei and needs to be a priority for Auckland Council for all Aucklanders. The LTP needs to recognise the growing and changing population of Tāmaki Makaurau, and the basic human right for all to have a place to call home, to ensure that Aucklanders can thrive and prosper.
18. Ngāti Whātua Ōrākei support Auckland Council's commitment in the LTP to provide dedicated resources and support to Māori and tāngata whenua with technical matters related to resource and building consent processes, through the Regulatory Services Directorate and Māori Housing Unit to develop individual and communal housing, however in our view, there is a need to go further than this.
19. Ngāti Whātua Ōrākei have initiated numerous successful housing initiatives including; assisted rental opportunities on our papakāinga, standard rentals and assisted ownership initiatives. Whātua Āhurutanga, Ngāti Whātua Ōrākei's housing strategy, puts people first rather than property, and focuses on a thriving Ōrākei Village, with more whānau housed in Ōrākei with our Marae as the hub. Ngāti Whātua Ōrākei are open to collaboratively working with Auckland Council on this important kaupapa, with Whātua Āhurutanga serving as an exemplar template.
20. **Relief sought:** Ngāti Whātua Ōrākei seek a hui with the relevant Auckland Council departments and staff to discuss partnership opportunities in housing and papakāinga projects.
21. **Ngāti Whātua Ōrākei support the development of financial strategies, investment in infrastructure and services that enhance Tāmaki Makaurau's economic growth, supporting overall economic prosperity and asset growth.** Ngāti Whātua Ōrākei request that Auckland Council align the LTP and Auckland Council's economic development strategies to facilitate our aspirations for asset growth and support of whānau businesses.
22. Ngāti Whātua Ōrākei consider that there is a long way to go to ensure that transport (including public transport, cycling, walking, rail, and roading) is efficient and supports a thriving Tāmaki Makaurau.

23. It is essential that Auckland Council acknowledges and supports economic initiatives that consider the unique position and contributions of iwi and hapū to the local economy, for example through acknowledging the important role of Ngāti Whātua Ōrākei in decision making regarding the future of Port of Auckland and the land and seabed underlying its operations.
24. Ngāti Whātua Ōrākei have a strong historic grievance about the loss of the Waitematā seabed to reclamation, and its ongoing pollution including by regular significant sewage overflows. Our clear expectation, of which we have informed successive Mayors, is that we wish to purchase or lease back whatever remnant we can of the Waitematā seabed, including the land and seabed underlying the Port of Auckland, to restore our rangatiratanga in it, and we would invite other Māori and established New Zealand investors to invest alongside us.
25. Ngāti Whātua Ōrākei generally support the direction in the LTP targeting enhancing Tāmaki Makaurau’s economic growth, along with the specification that port services will be required to operate in alignment with community expectations and the four well-beings (adherence to strict operating, social, cultural, environmental and sustainability, health and safety and maintenance standards). It is important that Ngāti Whātua Ōrākei are identified as one of the key decision makers, in any future decisions that are to be made about the Port of Auckland and the land and seabed underlying its operations.
26. **Relief sought:** Ngāti Whātua Ōrākei seek:
- a. Auckland Council’s formal acknowledgement, through specific provisions in the LTP, that any decisions regarding the future of Port of Auckland and the land and seabed underlying it, and any other relevant initiatives, in particular the regeneration of Te Tōangaroa, include Ngāti Whātua Ōrākei directly;
 - b. Auckland Council consider an option for Ngāti Whātua Ōrākei purchase or lease back whatever remnant of the land and seabed underlying the Port of Auckland that is available, with the support of other investors such as other iwi and hapū and other established New Zealand investors;
 - c. That the LTP is amended to include specific and targeted provisions that support Māori economic development; and
 - d. The establishment of a formal joint working group between Ngāti Whātua Ōrākei and Auckland Council, to explore future economic opportunities that benefit both Ngāti Whātua Ōrākei and wider Auckland region.
27. **Ngāti Whātua Ōrākei support Auckland Council’s LTP proposals that relate to environmental protection, sustainability initiatives and climate action plans, however Auckland Council must do more.** We support the clear acknowledgment and respect embedded throughout the LTP, that the health and mauri of our natural environment in Tāmaki Makaurau is imperative to all who live and work here. Without a sustainable connection to the whenua and moana, we are at risk of losing everything that forms the basis of our individual and collective identities. Ngāti Whātua Ōrākei support all new assets and facilities being required to be

located, designed and managed in an environmentally sustainable manner future proofed from climate change, as well as the Marae Infrastructure Programme, which aims to ensure that marae are healthy and sustainable cultural hubs.

28. Ngāti Whātua Ōrākei understand that Central Government has indicated it will progress changes to the National Policy Statement for Freshwater Management. There is very little detail currently available on the review. Nevertheless, we request that Auckland Council provide for a continual commitment to Te Mana o Te Wai principles in the management of freshwater resources throughout Tāmaki Makaurau. Auckland Council must maintain a focus on improving freshwater quality in environmental initiatives within the LTP.
29. Ngāti Whātua Ōrākei support all environmental and climate action plans within the LTP that align with our values of kaitiakitanga. We encourage the adoption of practices and policies that contribute to the healing and protection of te taiao, including partnership opportunities in environmental restoration projects. It is important that waste is both minimised and separated, and funding is allocated to ensuring that waste services ensure this. Ngāti Whātua Ōrākei is currently working with Auckland Council on the Council's Waste Minimisation and Management plan 2024 and considers the outcomes of that strategy should be supported through the LTP.
30. Ngāti Whātua Ōrākei are forthcoming in sharing our expertise and to lead joint initiatives that are aimed at sustainability and regenerative practices. There are a number of additions required to the LTP to adequately reflect our views and responsibilities in environmental stewardship.
31. **Relief Sought:** Ngāti Whātua Ōrākei seek:
 - a. Auckland Council continue to provide for Te Mana o Te Wai in all mahi relating to freshwater management;
 - b. Environmental initiatives that support native plants and birds back to Tāmaki Makaurau are prioritised for ongoing investment;
 - c. The outcomes of the Council's Waste Minimisation and Management plan 2024 are supported through the LTP; and
 - d. Ngāti Whātua Ōrākei are engaged to develop and implement environmental initiatives throughout Tāmaki Makaurau.
32. **Ngāti Whātua Ōrākei support cultural and heritage preservation, and supports inclusion of this in the LTP, as well as funding for marae development and support for a variety of cultural initiatives.** Ngāti Whātua Ōrākei are strong advocates for Auckland Council's active support in preserving and enhancing Māori cultural identity and heritage within Auckland. This includes support for marae development, and recognition of our historical and contemporary contributions to the city.
33. **Relief Sought:** Ngāti Whātua Ōrākei seek:

- a. Specific funding allocation, along with policy measures which Auckland Council can adopt to support future cultural initiatives that go beyond what is currently being undertaken; and
 - b. Regular and open dialogue with Auckland Council to ensure appropriate cultural considerations are integrated into city development, planning and services.
34. ***Ngāti Whātua Ōrākei strongly support and strive to develop and enhance genuine partnerships and engagement between Ngāti Whātua Ōrākei and Auckland Council.*** Robust mechanisms need to be in place that ensure that only the ‘right’ or ‘appropriate’ iwi and hapū are involved in decision-making processes “at place” on matters affecting their rights and obligations as ahi kā and tāngata whenua.
35. There are a number of successful partnership models which Auckland Council could benefit from considering, including several exemplary models of partnership that we have established over the years. Notably, our collaborations with Eden Park, Foundation North, the Ōrākei Reserves Board and Sky City serve as benchmarks of successful partnership, each embodying principles that can inform areas for improvement for future initiatives.
36. For instance, these partnerships showcase the importance of recognising tāngata whenua and ahi kā within both commercial and cultural frameworks. This collaboration has set up a model that emphasises mutual respect, shared purpose, and mahi ngātahi (working together), reflecting the essence of genuine partnership. Key elements that Auckland Council could incorporate include:
- a. Ahi Kā – Emphasising the recognition of Ngāti Whātua Ōrākei as tāngata whenua in all projects within central Tāmaki, ensuring that our cultural narratives and presence of are woven into urban development and planning. This approach respects the historical significance of the whenua and enriches Tāmaki’s cultural landscape.
 - b. Partnership – Mirroring the principle of partnership through engagement frameworks that respect the insights, knowledge, and authority of tāngata whenua. This would mean genuine consultation and collaboration with us on matters impacting the city, utilising our wisdom for the common good.
 - c. Development – Prioritising support for iwi and hapū educational, social, and economic development as foundational aspects of partnership agreements. Focusing on innovation and sustainability in partnerships enhances the wellbeing of both tāngata whenua and the wider community.
 - d. Heritage, Identity, and Social Good – Contributing to the narrative of Tāmaki Makaurau by making it a better place to work, live, and study. This includes embracing Māori culture, history, and values as central to Tāmaki Makaurau’s identity.
37. By adopting these approaches from our collaborations with entities like the ones we have described above, Auckland Council can lead the way in fostering meaningful, respectful, and mutually beneficial partnerships. Such efforts not only affirm the mana and rangatiratanga of

Ngāti Whātua Ōrākei, but also cultivate a shared vision for the future of Tāmaki Makaurau which benefits all who live, work, and play in Tāmaki Makaurau.

38. **Relief Sought:** Ngāti Whātua Ōrākei request that a formal partnership framework be established, that includes, but is not limited to: regular hui and shared governance structure and consultation processes with Ngāti Whātua Ōrākei in relation to central Tāmaki.

Conclusion:

39. Ngāti Whātua Ōrākei thank Auckland Council for the opportunity to provide feedback on the draft LTP. We trust our feedback will help Auckland Council to develop a well-considered LTP, and Ngāti Whātua Ōrākei look forward to ongoing collaboration and an established partnership with Auckland Council, as the tāngata whenua of central Tāmaki.
40. Ngāti Whātua Ōrākei invite ongoing and direct engagement with Mayor Wayne Brown, and Auckland Council officials responsible for developing and deciding on the LTP, and seeks opportunities to provide further input into the LTP, before it is finalised.
41. Ngāti Whātua Ōrākei request that Auckland Council continues to recognise the importance of balancing 'the budget' with environmental, social and cultural wellbeing, and in turn, seek that Auckland Council aspire to pay more to get more, with a particular focus placed upon protecting and enhancing the health and mauri of the environment.
42. Ultimately, Ngāti Whātua Ōrākei request Tāmaki Makaurau and the Waitematā are treated with respect, and that the 'appropriate' iwi and hapū are involved to ensure the best possible outcomes.
43. Ngāti Whātua Ōrākei request to be heard in support of this submission, if there is an opportunity to do so.

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	As proposed
City and local development	As proposed
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Keeping our free kai in schools

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14254

2. What do you think of the transport proposal?

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

#14254

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by</p>	

#14254

businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14263

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

3.5. Port

Over the next few decades, there will be immense changes in environmental, political and social conditions.

Council needs to retain the power to make the following decisions about the port:

1. To change port ship volumes and biosecurity

#14263

protocol, in response to a biosecurity threat.

2. To change cruise ship volumes and protocol, in response to climate-related luxury travel restrictions and/or air quality requirements.

3. To make choices about the size and type of ships the port will accept, or the volume or type of freight it will accept, in response to sustainable business policy.

4. To get large trucks off our city streets, in response to safety concerns.

5. To stop using the port to import (and store) vehicles, in response to climate-related intentions around land use change and vehicle ownership rate reductions.

A port lease agreement must ensure Aucklanders retain their right to determine how Council responds to important issues such those outlined to the left. Yet such a lease agreement would be of low value today, with low corporate expectations to have to internalise the costs of pollution, exploitation and the risks of climate change and its associated effects.

In any case, if the lease is set at a rate that means operating the port returns a profit and is

an attractive proposition for a port operator, then Council could be operating it to gain that

profit, too.

The only benefit to Aucklanders would be in the very short term if the locked-in rental income

provides Council with the ability to borrow more money - which would leave future generations having to pay that money off whilst having no say about port operations.

#14263

Leasing the port would create huge and important intergenerational inequity. It is important that Auckland does not give away such rights to determine how our city responds to climate change and to the need to prevent it

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.

Resume the **Water Quality Targeted Rate (WQTR)** and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that

#14263

<p>we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	
<p>Re-introduce recycling charges for schools.</p>	
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	
<p>Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.</p>	
<p>Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.</p>

<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14272

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	Do more
Environment and regulation	As proposed
Parks and Community	Do more
Economic and cultural development	Do more
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

invest the same amount of money it take for buildings that we dont use towards marae in Tamaki

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Due drop

#14273

2. What do you think of the transport proposal?

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

#14273

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. **NGĀI TAI KI TĀMAKI SUBMISSION
IN RELATION TO THE
Auckland Council's Long Term Plan
2024-2034**

**TAPUWAE ONUKU
 TAPUWAE ARIKI
 TAPUWAE O TAI**

WE OF THE SACRED FOOTPRINT IN THE EARTH
 THE FOOTPRINTS OF THE HIGH-BORN
 THE FOOTPRINTS ON OUR FORESHORES

- 1.0 Ngāi Tai ki Tāmaki (Ngāi Tai) welcomes the opportunity from Auckland Council to respond to its Long Term Plan 2024-2034.
- 1.1 Ngāi Tai ki Tāmaki (Ngāi Tai) are the original inhabitants and Iwi of Tāmaki Makaurau.
- 1.2 Ngāi Tai trace their ancestry from ancient pre-waka peoples known as Turehu and Patupaiarehe, led by Koiwiriki and his daughter Hinemairangi of the Hūnua, Papakura, Maraetai and Pakuranga districts.
- 1.3 Later Polynesian voyagers including Tāmaki, son of the apical ancestor Maruiwi, and their relative Ruatāmore led a large contingent of their people overland from their initial landing at Taranaki, to become established throughout the Tāmaki, Hauraki and Northland regions.
- 1.4 The pre-waka ancestors of Ngāi Tai welcomed famous voyaging waka such as Tainui to Tāmaki during its passage through the Hauraki Gulf / Tīkapa Moana and Te Waitematā around seven hundred years ago. Some crew members disembarked to settle among the tangata whenua, including Taikehu, who established himself at Te Maungauika (North Head) and on Motutapu, which he named after part of his Hawaiki homeland.

Of Taikehu, it is said:

Ngā waka o Taikehu, me he kaahui kaitaaha kapi tai.

The canoes of Taikehu, like unto a shoal of herrings filling the sea.

- 1.5 The Iwi is now based in Maraetai, Te Waitematā and Tikapa Moana, and exercises mana whenua and mana moana interests across Tāmaki and with a longstanding connection to Te Waitematā and Tīkapa Moana.

- 1.6 The Ngāi Tai main marae is Umupuia at Maraetai, and the iwi has various marae connections across Mātaimiti, Whataapaka and beyond. The Iwi has whakapapa and other relationships with Iwi in the Tāmaki Makaurau and Hauraki regions.
- 1.7 Ngāi Tai have maintained customary interests and ahi kā in Tāmaki Makaurau, Hauraki, and Hauraki Gulf/Tīkapa Moana since time immemorial and are acknowledged as being amongst the original inhabitants of Aotearoa.
- 1.8 The Ngāi Tai ki Tāmaki treaty settlement legislation was passed exclusively in 2018 as the Ngāi Tai ki Tāmaki Settlement Act 2018.
- 1.9 Ngāi Tai also maintains shared interests in the collective settlements of;
 - (13 iwi) via the Ngā Mana Whenua o Tāmaki Makaurau Collective 2014,
 - (63 hapū) Waikato – Tainui Raupatu Settlement 1995;
 - and is awaiting the enactment of the (12 iwi) Hauraki Collective Iwi Settlement likely in 2024 – 2025
- 1.10 The Ngāi Tai area of interest (Figure 1 and 2) encompasses the eastern seaboard of Aotearoa as illustrated below, and is recognised per the Ngāi Tai ki Tāmaki Settlement Act 2018.

Figure 1: Map of Ngāi Tai ki Tāmaki area of interest accessed from Ngāi Tai Ki Tāmaki Take Taiaomaurikura, September 2022.

Figure 2: Map of Tīkapa Moana/Te Moananui-ā-Toi/ Hauraki Gulf Marine Park accessed from Tai Timu Tai Pari Sea Change Marine Spatial Plan, April 2017.

1.11 The Ngāi Tai ki Tāmaki Trust is the Post Settlement Governance Entity or PSGE that represents both the ~1600 registered individuals as well as the thousands who are not, therefore the response of Ngāi Tai should not be treated as a single comment but should be afforded an appropriate status and weight that recognises the collective that it represents.

1.12 The PSGE has established a Commercial Investment Trust (CIT) which is primarily responsible for establishing and advancing the commercial interests of NTKT.

1.13 Similarly, the PSGE has established a Community Development Trust or CDT which has the responsibility of realising the iwi aspirations for social, cultural, environmental outcomes including health, education, housing and kaumātua priorities.

2.0 Ngāi Tai ki Tāmaki Position and Response

2.1 It is with some dismay Ngāi Tai finds itself again having to allocate significant resource and cost in preparing this submission, particularly when this Plan proposes to compromise the values of dare we say it, not just Ngāi Tai ki Tāmaki but most iwi authorities across the motu.

2.2 Further, the formatting does not allow for Ngāi Tai ki Tāmaki to be able to fully express its relationship to Tāmaki Makaurau, particularly its relationship to all Local Boards along the eastern seaboard.

RESPONSES

2.3 Which proposal does Ngāi Tai ki Tāmaki prefer for the overall direction of the Council’s long term plan?

Other. It is the position of Ngāi Tai ki Tāmaki that increasing the rates at the time of a formalised recession is not the way to progress Auckland. While the proposal states that it would increase

services, it is via the messaging from the Mayor that it is a core belief that reduction of services for a period of time is what Auckland Council wants to embrace, and has already put these into effect. An increase and reduction in rates does not return free public transport for those most marginalised and in need of such services.

What would Ngāi Tai ki Tāmaki like Auckland Council to do more or less of?

It is the position of Ngāi Tai ki Tāmaki that as the growth of Auckland continues, as does the need for housing, a do less model does not suit.

Auckland requires more public **transport** options; increased enforcement and fine garnering is not the way to fund better transport options. Auckland Council constantly speaks to requiring a modal shift to better support the growing population of Auckland however the proposal of reduction in ferry services, bus lines – all encourage more vehicles on the road at a time that the roads cannot handle further volume.

The separation of **Watercare** financial operations from the Auckland Council coffers is a preferred option though this is a missed opportunity to rectify the amalgamation of 2010 that left Healthy Waters (then Stormwater) out of the mix. The three should not be separate as they all impact each other, and having two separately housed utilities is a waste of resources, resourcing and funding.

We agree that in regard to **Parks and Recreation**, a service approach versus asset approach encourages innovative whakaaro in relation to open spaces and parks and is a whakaaro to be further pursued.

Economic and Cultural Development has for a long time been the somewhat poor cousin of more asset-based streams within the Council and is a stream that provides an opportunity for good public relations. People are drawn to Auckland for its experiences and activities, and they always feel slightly underdone despite the heart of the people putting in the work. Increased investment in this space is required. Increased funding in this area is required to present Auckland as the largest polynesian city in the world built on the ancient Māori history, bringing back better funded cultural events that draw visitors and the associated revenue into small businesses.

Regarding **Development**, unfortunately the Eke Panuku model of releasing unused council owned property still subscribes to a council control premise which makes it difficult nigh on impossible for entities to take up the opportunities as they, after significant investment into proposals and masterplanning, are then told the properties are in fact for lease, or there will be no right of purchase at the end of the lease, or if you purchase said property this is what your development must look like.

If Auckland Council is seriously looking at divesting Auckland Airport shares as a revenue generating option, it should consider looking at its existing property portfolio and the manner in which it divests those first.

The infrastructure of urban Auckland cannot sustain further intensification without serious investment, and the cost of upgrading it during development phases due to remediation requirements can outstrip that of a greenfield development. Ngāi Tai ki Tāmaki expressed this during the Future Development Strategy engagement and continues to stand by that.

2.4 Auckland Future Fund

Auckland Council is not a financial investment fund. And the setup required to do this, while losing the continued and secured revenue from Auckland Airport seems to be overreaching the bounds of a Council. As with any fund, expected returns vs actual returns are an expected variable and to rely so heavily on something so untested with Aucklands funding is a surprisingly rash proposition.

That the Council has already decided on the format of the fund and its proposed funds drawn from AIAL and Port Lease illustrates that the consultation is a tickbox process when the Mayor expressed last year this was his preferred option. Dilution of the Port size is not what is required; better management of its performance, production, processes and services is what is required. Moving Port transport and logistics to another part of the country only creates more traffic on the roads of Auckland and the requirement for large land based distribution hub. (Ultimately supporting Option 2)

2.5 Port Land

With Ngāi Tai ki Tāmaki having been involved with Eke Panuku in a failed attempt at proposing to convert waterfront property into residential or commercial use, we fail to see how the stopping of port operations on Marsden and Cook wharves would then work when the other proposals have been unable to express. Unless it is the desire of Auckland Council to produce cookie cutter office/residential with commercial/retail ground floor buildings across the city due to the design constraints put on potential development partners.

Further, it is not land but reclaimed seashore or waterfront and is a false economy with no regard to climate change. If it is to be claimed back from Port operations, then it should be returned to its original form, removing the wharves altogether to enhance te Waitematā.

2.6 Financials

How the Council then chooses to manage its debt to revenue ratio is on the operations of the entity, however, Ngāi Tai ki Tāmaki has previously expressed its position regarding increasing rates at a time of financial duress for the average resident of Tāmaki Makaurau, that has not yet recovered from cost of living increases and supply chain impacts since Covid-19.

2.7 Strategic Direction on Climate Change

In reading the Councils strategic direction on climate change, Ngāi Tai ki Tāmaki noted the limited reference to protection of the natural environment and a strong focus on risk to business and finance, with the proposed establishment of green bonds and sustainable financing. Ngāi Tai ki Tāmaki would like to see a more taiao centric approach from Auckland council that looks to restore the natural environment where possible (see above regarding repurposing of wharves)

2.8 Leading and Influencing Better Outcomes for Māori

Despite Mayor Brown declaring in an iwi leaders hui that it would be much easier if Tāmaki Makaurau had just one iwi like up North, which is incorrect, there is more than one iwi, and mataawaka entity in the very large Tāmaki Makaurau landscape.

Ngāi Tai ki Tāmaki supports absolutely bilingual signage, encouragement and support of Māori businesses, and the provision for kaitiakitanga. This area has seen a noted and significant improvement in services to Māori in Tāmaki Makaurau and we hope that it continues. We would

encourage Auckland Council in its official documentation however to look beyond central Auckland for its narratives however.

2.9 Responding to Housing & Growth

Ngāi Tai ki Tāmaki would take this opportunity to remind Auckland Council of its opposition to the Future Development Strategy proposal to decline Ngāi Tai its ability to develop and provide housing for its own people and existing community in its heartland.

Which is ironic given that in the changes to the Unitary Plan, Auckland Council then has proposed to allow development of the sacred waterways and pā whakawairua of Ngāi Tai ki Tāmaki, the Wairoa. Significant opposition will come at a later time to that Kaupapa specifically but we are signalling our disappointment now.

2.10 Local Boards

Ngāi Tai ki Tāmaki has interests along the Eastern Seaboard and therefore works with multiple local boards. It appreciates the intention to ensure more locally based decisions, however, it does make it difficult at times for Ngāi Tai ki Tāmaki to meaningfully engage on all Kaupapa.

The overarching proposal to reduce lawnmowing costs in public or open spaces through creation of indigenous and eco sourced planted areas has long been a preferred option for Ngāi Tai ki Tāmaki and we look forward to that being able to occur on some of our cultural redress areas currently used by members of the public.

What is important to Ngāi Tai ki Tāmaki is that the current co-governed projects are enabled to continue and be completed, as well as the co creation of places and spaces together wherever possible.

2.11 Ngāi Tai would remind the Auckland Council that despite its withdrawal from Local Government NZ (LGNZ), it remains accountable to the Crown's commitment built into the Ngāi Tai ki Tāmaki Settlement Act as well as having its own obligation to mana whenua or iwi of Tāmaki Makaurau. That being said, Ngāi Tai ki Tāmaki enjoys healthy relationships with the local boards and Auckland Council and understands the position Council has had to take in regards to ensuring the sustainable delivery of services to the people who choose to live in this beautiful region.

2.12 **Summary:** Ngāi Tai Tāmaki does not believe a simplified choose one of three options approach is going to fix the issues of a highly complex city that is Auckland, and this proposal is evidence that 10+ years down the track perhaps the centralization of services hasn't worked as well as pitched back in 2009. There are some areas that have seen service improvements however some have degraded further. Ngāi Tai will continue to work alongside Council for the improvement and sustainability of the city, and to help make decision that will benefit our tamariki-mokopuna in the long run, but would firmly suggest Council do not rip out the good plants with the weeds in this process.

Mauri ora ki a tatou,

Te Kaiurungi | Chief Executive

On behalf of Ngāi Tai ki Tāmaki Trust

Organisation (if applicable): Hoani Waititi Marae

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

- To promote ahurea (culture), bi culturalism and multi culturalism
- Extend upon their vision of pepe (babies) to progress from kohanga through to tertiary learning, to bring people through the learning process and returning back to the Marae as the next generation of leaders.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14278

2. What do you think of the transport proposal?

Tell us why:

“Speed bumps aren’t necessarily bad things, but they are when they are at the expense of our indigenous population.”

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

#14278

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	

#14278

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

- Noted: Requests for funding assistance
- a) \$150,000 Rangatahi Kapahaka national attendance
- b) Funding for carving restoration
- c) support and funding for the whare kai development
- d) Funding to support the tertiary wananga development
- e) Community support and funding support for the Te Atatatu Marae Development

#14278

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

- Spoke of the Waipereira Way – “you don’t say no – you jump on board – you don’t do what is good for you, you do what is good for the community”.
- What’s good for Māori is good for everyone.
- Advocating for Māori within the education system – we saw Māori shifted to the side within the organisation – wanting to essentially shift that back to the centre - Māori to the centre.
- The group challenges us (council) to do something with the information they provide – not just show up and do nothing about it, i.e., “like my white managers in the past [referencing his time within the education system]”
- “Things are tough – cost of living is high – its hard for Māori – there is no reprieve for the poor. The system is based on capitalistic greed”.
- Noted: that petrol stations make \$4 million profit per day and Supermarkets make \$1,000,000 per day” .
- Cost of living issues for whanau – Grandparents are now having to raise grandchildren.
- Noted: 2% of whanau can’t make mortgage payments – Rates going up will make this worse.
- Noted: Council is willing to spend \$100,000 in an instant – but Iwi have been asking council to support funding for the Marae over 20 years with no result.
- We are borrowing for the future from our children.
- Noted: Over \$2,000 was spent today for kai on this hui – but nothing for shoes for our rangatahi who need them.
- One cycling lane that nobody uses could have put shoes on every kid in Tamaki.
- We are spending money to drive a plan from Denmark that doesn’t transpose onto NZ context.

#14278

- “Democracy is not freedom – Democracy is two wolves and a sheep at the table deciding on what is for dinner”
- Noted: 14 % rates raise is –
 - o 14% less kai in the cupboards
 - o 14% less is not planning for the future – it is a future where babies have not shoes or clothing
 - o Nothing we are doing helps any of our in need families.
- Noted – “What do we want – we wanted ward seats and the statutory board taken seriously, a well resourced local library and kids with shoes and jackets.”
- Noted: “Should we have Māori Board seats or the Māori Statutory Board – we should have BOTH.
- Noted: The Independent Māori Statutory Board can only be disestablished by Government – Not Council.
- Councils’ delivery of service to Māori should be “For” Māori.
- Comment: “I am here to make sure of and fight to make sure Council services to Māori is about Māori.”
- Comment: We pay for our rates – For what? (Lack of tangible change).
- Comment: “We generally get no more than the generic population”.
- Democracy is not our saviour – We (the Māori people) are our saviour.
- Unless you get numbers on council (elected representatives) you will never get Māori seats.
- Noted: On Rangatahi: “We are still at the bottom of the totem pole – no – we are beneath the totem pole - holding the ***** thing up so that others (rangatahi were pointed to) can climb up it. “
- Rangatahi feel best when they are
 - o Together
 - o Feel looked after
 - o When there are things in the community for them
- Comment: “Speed bumps aren’t necessarily bad things, but they are when they are at the expense of our indigenous population.”
- Its not actually about the engagement its what happens after the engagement.

#14278

- Noted: We like Eke Panuku model where 16% of their procurement spend is focussed on Māori – good example of what council can do.
- Noted: This sort of hui is the right path – but what did you get out of the hui, what did they deliver. “ They didn’t deliver for our people – deliver to people who have no power – use your power to do the things people without power can’t.
- Noted: It would be nice to have our own base – (To the three councillors present) It would be nice to have some Māori only councillors responsible only to us – not to all their diverse constituents. Current councillors have obligations to all – would be good to have two or three councillors accountable to only us.
- Te Atatatu new Marae development – Council could have given the land – however thanks for the development.

Long-term Plan 2024-2034

AUCKLAND COUNCIL DRAFT LONG TERM PLAN 2024-2034

SUBMISSION OF OPEN SPACE FOR FUTURE AUCKLANDERS INCORPORATED

TO: Auckland Council
BY EMAIL: akhaveyoursay@aucklandcouncil.govt.nz

SUBMITTER: Open Space for Future Aucklanders Incorporated

Introduction

1. Open Space for Future Aucklanders Incorporated (**Society**) makes this submission on the Auckland Council Draft Long Term Plan 2024-2034 (**LTP**).
2. The Society has an interest in ensuring that, as Auckland intensifies, enough good quality and easily accessible open space, for a variety of recreational and conservation purposes, is provided for. The Society is interested in this issue generally but particularly in relation to Mt Albert and the redevelopment of the former Unitec land.
3. There are three key areas that the Society considers that the LTP does not provide adequate funding for, being:
 - a. Funding to allow Auckland Council (**Council**) to actively participate in fast-track planning processes on behalf of its community where the environmental benefits that arise from additional scrutiny from public participation have been lost due to the public being excluded from the planning process.
 - b. The acquisition of land for additional open space required to service areas that are being intensively developed.
 - c. Upgrading railway crossings to provide grade separated crossings where closure of level crossings is proposed to accommodate the increased train frequencies that will be enabled by the City Rail Link (**CRL**).
4. The Society seeks that funding for these matters be significantly increased, made commensurate with the level of intensification anticipated, and that the democratic deficit resulting from fast track consenting processes is adequately responded to by Council adopting a wholistic and long-term perspective.

The Society

5. The Society is an incorporated society that was formed in 2023. The primary purpose of the Society is to represent its members in relation to planning applications in Auckland and specifically around Mount Albert and other central Auckland areas subject to high levels of planned for intensification.
6. The Society wishes to ensure that such proposals and Council plans are far sighted and provide sufficient open space to serve the needs of existing and future residents and otherwise contribute to a well-functioning and high amenity urban environment.

7. The Society is made up primarily of Mt Albert community members who own or occupy property close to the Wairaka Precinct (**Precinct**) in the Auckland Unitary Plan (**AUP**). Unitec has consolidated its operations on the Southern portion of the Precinct and the former Unitec land has been acquired by the Crown for intensive residential redevelopment (known as the Carrington Residential Development). The Ministry for Housing and Economic Development (**MHUD**) is leading the Carrington Residential Development.
8. A key concern of the Society is that the level of open space in the Precinct needs to be significantly increased beyond that proposed to recognise the significant increase in population that is proposed for the Precinct.
9. The area surrounding the Precinct is also proposed to be significantly intensified. As the surrounding suburbs of Mt Albert, Point Chevalier and Waterview are already established residential suburbs (and proposed to be significantly intensified due to the proximity to western line railway stations), the Precinct presents the only realistic opportunity to provide sufficient open space for existing and future residents.
10. The Society takes an active role in planning matters that are relevant to its purpose. In that regard:
 - a. The Society has lodged a submission in opposition on MHUD's Private Plan Change 94 (Wairaka Precinct) to the AUP (**PC 94**). MHUD seeks to (among other things) rezone additional land within the Precinct to Business Mixed Use, enable up a minimum of 4,500 dwellings (possibly up to 6,000), and increase the number of people able to be accommodated within the Precinct from 8,200 to 12,000 (possibly to 18,000 based on some models), enable taller buildings throughout the Precinct (including 43-72m high buildings in part of the Precinct), remove building setbacks designed to better integrate future development and alter the configuration of open space in the Precinct.
 - b. The Society is an interested party on MHUD's Environment Court appeal on Plan Change 75 (Mason Clinic) to the AUP. The land rezoned by PC 75 is within the Precinct. The Council's decision on PC 75 required open space that would be displaced by the Mason Clinic's expansion to be provided elsewhere in the Precinct. MHUD's appeal seeks to remove that requirement for open space in the Precinct.

Carrington Residential Development

11. The Society considers that it is not just how new neighbourhoods are planned, built and serviced *within* the Precinct that is important, but also how those new neighbourhoods integrate with the existing residential and commercial areas particularly in terms of open space, visual effects and traffic.
12. A key aspect of achieving this level of integration, and safeguarding the success of the Carrington Residential Development, will be ensuring that the Precinct is properly master planned.
13. Aspects of the Carrington Residential Development have been consented a under the Covid 19 Fast Track Act 2020, which provided for the "*Residential development stages within Wairaka Precinct of a multi-stage comprehensive mixed-use urban development in Point Chevalier, Auckland*" as a listed project.
14. Despite the obvious intention that the Carrington Residential Development be a comprehensively planned development, there is no multi-stage comprehensive

Master Plan for the Precinct. This crucial master planning, required to ensure the long-term success of the Precinct, has not occurred and resource consents are being sought by individual developers, and granted, on a site by site basis.

15. In addition, some severely sub-optimal developments have been consented in the areas outside, but nearby the Precinct.
16. Given the deliberate removal of the public notification and submissions process under the Fast Track Act, the Council is one of the few entities that has the ability to comment on resource consents applications sought using this procedure.
17. The Society considers that the Council has a duty to advocate on behalf of its existing community to ensure that the Carrington Residential Development is properly master planned and provides appropriate levels of quality and accessible open space that serves a variety of recreational purposes.
18. Accordingly, the Society seeks that adequate funding be allocated in the LTP to enable the Council to actively participate in and adequately scrutinise fast track development proposal. This is a matter of some urgency given the potential for ongoing subdivision and development to foreclose on potential open space options.

Open Space Funding

19. The LTP records that “*networks of parks and open spaces have been determined by Council to be strategic assets given that they are critical to delivering services.*”¹ The Society strongly supports this recognition of the strategic value of open space and urges the Council to strengthen its LTP to take an “open space as critical infrastructure approach” to ensure that it is prioritised when planning for the development of the region.
20. The LTP records that the proposed open space acquisition budget is insufficient to fund the level of acquisition proposed in the Parks and Open Spaces Strategic Action Plan 2013 and the Open Space Provision Policy 2016.² However, the Society understands that these Council open space strategy documents are being reviewed because they are out of date and not fit for purpose to meet the community needs for open space given the levels of intensification now being seen. The Society considers that there needs to be a bespoke approach to the provision of open space for higher density urban developments such as the Carrington Residential Development. The Society asks that the LTP be amended to increase the funding for the significant levels of open space acquisition required to meet community needs.
21. In relation to charges to recover the cost of growth, the LTP proposes that the change to Council’s development contributions policy to enable infrastructure to be funded over a 30 year timeframes that has been adopted for Drury, will be applied to other areas of Auckland.³ The Society seeks that the LTP be amended to provide that the new a 30 year approach for funding for development infrastructure be applied to the Carrington Residential Development immediately to ensure that MHUD and developers there pay or contribute their fair share to infrastructure, and open space funding.

¹ Supporting Information page 684.

² Supporting Information page 114.

³ LTP Consultation Document pages 90-91.

22. The LTP contains proposal to change the basis of Local Board funding to an equitable funding model based on population numbers and needs.⁴ The current population in Mt Albert is approximately 13,000 (over an area of 500 hectares). The Precinct is approximately 60 hectares and is proposed to accommodate at least another 12,000 people (i.e. doubling the population of Mt Albert). In addition the existing residential area is programmed for significant intensification around western line railway stations. The Society says that if the new local board funding model is pursued then proposed intensification in local board areas needs to be taken to account, with the funding for the Albert-Eden Local Board significantly increased to enable it to properly serve its growing community.
23. The Albert Eden Local Board Plan contained in the LTP includes "Reviewing community services and the open space required in response to growth, including the Carrington Development"⁵. The Society strongly supports this proposal and asks that additional funding be made available to the Albert-Eden Local Board fulfil this role.

Pedestrian connectivity and rail crossing closures

24. The LTP is proposing to remove rail level crossings to facilitate the CRL as follows:

Rail crossing removal Level crossings across the rail network will need to be removed to improve minimum safety requirements and enable more frequent trains to realise the full benefits of the City Rail Link (CRL). Decisions are required about the funding of the rail and surrounding transport networks. Frequent train services will require rail crossings to be closed more often with an associated reduction in the functioning of the surrounding transport network. Maintaining rail crossings will also limit the frequency of train services. Central government investigations for rail crossing removals (or alternatives such as grade separation) are currently in an early stage. In the meantime, Auckland Transport is removing a road crossing at Church Street East and will either close or improve some initial pedestrian-only level crossings to prepare for the planned frequency of CRL for opening services. It will take many years to 'fix' rail crossings. The earlier that this work begins the sooner we can enjoy the benefits and impacts of City Rail Link.⁶

...

Remove the level crossings including those to make the most of CRL to allow quick and easy access to town centres (\$190 million).⁷

25. The Society understands that Council's desired outcomes for urban areas include transport infrastructure which allows people to use alternative travel options easily and safely, whatever the weather, such as walking and cycling paths, bike parking and bike shelters, and bus shelters.⁸
26. However, the LTP proposals appear to have overlooked that there are significant challenges to maintaining even the existing level of pedestrian connectivity around the Mt Albert Town Centre.

⁶ Supporting Information page 147.

⁷ Supporting Information at page [246].

⁸ Draft Local Board Plan, page 15, 30 and 31.

27. Auckland Transport (**AT**) has recently ignored public and local board feedback and decided to close the pedestrian level crossing at Lloyd Avenue without investigating or funding a grade separated replacement level crossing.
28. This is a well-used crossing that makes a positive contribution to pedestrian connectivity in the area and provides an alternative mode (walking) to short private vehicle trips around the area. The Society says that if Council wishes to achieve the goal of reducing private vehicle trips then upgrading the PT network should unreasonably degrade the pedestrian network. This particularly the case for crossings such as Lloyd Avenue that are close to destinations such as Town Centres.
29. Further there are a number of vehicle level crossings in Mt Albert that are potentially being investigated for closure (Asquith Avenue, Ross Grove Terrace, Woodward Road, St Judes Street). In recent community consultations,⁹ AT has raised the potential for Carrington Road and the surrounding local road network to become gridlocked due to the railway vehicle crossings being closed for 45 minutes out of every hour and the as yet uncertain effects on the level of service of the Carrington Residential Development.
30. The Society considers that AT's planned road corridor improvements for Carrington Road¹⁰ and grade separation of the above railway crossings are constructed are urgent priorities for Mt Albert.
31. The Society asks that the Council exerts control over AT, works closely with the Albert Eden Local Board, and CRL to ensure that changes to the existing network to accommodate the CRL do not result in reductions in pedestrian and vehicle connectivity. The Society seeks that the LTP be amended to provide funding for grade separation of the Asquith Avenue, Rossgrove Terrace, Woodward Road, and St Judes Street railway crossings will be prioritised and fully funded prior to the opening of the CRL. This should be seen as a priority and a necessary aspect of the CRL infrastructure project.

Next steps

32. The Society would be happy to meet with Council to discuss any questions regarding this submission on the LTP.

Other

Tell us why:

AMRCT supports the central proposal 'Future Fund', which includes leasing Auckland's port operations and investing potential

multi-billion dollar proceeds into a council-owned diversified regional wealth fund, on the basis Auckland Council:

- helps consolidate the AMRCT's long-term tenure in its building and parking location, inclusive of the area known as Teal

Park, coastal permitted breakwater and marina activity, and

- allocates \$8-12m from the Central proposal's Council Support \$875m Capex 10-year budget (p50 LTP Consultation

Document) and/or

- allocates \$8-12m from the Future Fund returns to help AMRCT develop and expand the AMRC facility to ensure more

people benefit in the future (p57, pp 71 LTP Consultation Document), and

#14294

- collaborates with AMRCT to implement a plan change to support dedicated marine rescue service activities and consolidated tenure

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	Do less
Economic and cultural development	As proposed
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Good public transportation , Hospital, public clinic services Grants for community organization

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

lower council property rates water rates

#14303

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

we need better public transportation

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Tell us why:

good to have access by the community for events with lower rates

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

#14303

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

communities will have more benefits through council services

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.

Do not support

#14303

<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Support</p>

Organisation (if applicable): Ngāi Tai ki Tāmaki Trust

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

It is the position of Ngāi Tai ki Tāmaki that as the growth of Auckland continues, as does the need for housing, a do less model does not suit.

Auckland requires more public transport options; increased enforcement and fine garnering is not the way to fund better transport options. Auckland Council constantly speaks to requiring a modal shift to better support the growing population of Auckland

#14304

however the proposal of reduction in ferry services, bus lines – all encourage more vehicles on the road at a time that the roads cannot handle further volume.

The separation of Watercare financial operations from the Auckland Council coffers is a preferred option though this is a missed opportunity to rectify the amalgamation of 2010 that left Healthy Waters (then Stormwater) out of the mix. The three should not be separate as they all impact each other, and having two separately housed utilities is a waste of resources, resourcing and funding.

We agree that in regard to Parks and Recreation, a service approach versus asset approach encourages innovative whakaaro in relation to open spaces and parks and is a whakaaro to be further pursued.

Economic and Cultural Development has for a long time been the somewhat poor cousin of more asset-based streams within the Council and is a stream that provides an opportunity for good public relations. People are drawn to Auckland for its experiences and activities, and they always feel slightly underdone despite the heart of the people putting in the work. Increased investment in this space is required. Increased funding in this area is required to present Auckland as the largest polynesian city in the world built on the ancient Māori history, bringing back better funded cultural events that draw visitors and the associated revenue into small businesses.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

It is the position of Ngāi Tai ki Tāmaki that increasing the rates at the time of a formalised recession is not the way to progress Auckland. While the proposal states that it would increase

5

services, it is via the messaging from the Mayor that it is a core belief that reduction of services for a period of time is what Auckland Council wants to embrace, and has already put these into effect. An increase and reduction in rates does not return free public transport for those most marginalised and in need of such services.

Regarding Development, unfortunately the Eke Panuku model of releasing unused council owned property still subscribes to a council control premise which makes it difficult nigh on impossible for entities to take up the opportunities as they, after significant investment into proposals and masterplanning, are then told the properties are in fact for lease, or there will be no right of purchase at the end of the lease, or if you purchase said property this is what your development must look like.

#14304

2. What do you think of the transport proposal?

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

If Auckland Council is seriously looking at divesting Auckland Airport shares as a revenue generating option, it should consider looking at its existing property portfolio and the manner in which it divests those first.

The infrastructure of urban Auckland cannot sustain further intensification without serious investment, and the cost of upgrading it during development phases due to remediation requirements can outstrip that of a greenfield development. Ngāi Tai ki Tāmaki expressed this during the Future Development Strategy engagement and continues to stand by that.

Auckland Council is not a financial investment fund. And the setup required to do this, while losing the continued and secured revenue from Auckland Airport seems to be overreaching the bounds of a Council. As with any fund, expected returns vs actual returns are an expected variable and to rely so heavily on something so untested with Auckland's funding is a surprisingly rash proposition.

#14304

That the Council has already decided on the format of the fund and its proposed funds drawn from AIAL and Port Lease illustrates that the consultation is a tickbox process when the Mayor expressed last year this was his preferred option. Dilution of the Port size is not what is required; better management of its performance, production, processes and services is what is required. Moving Port transport and logistics to another part of the country only creates more traffic on the roads of Auckland and the requirement for large land based distribution hub. (Ultimately supporting Option 2)

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

With Ngāi Tai ki Tāmaki having been involved with Eke Panuku in a failed attempt at proposing to convert waterfront property into residential or commercial use, we fail to see how the stopping of port operations on Marsden and Cook wharves would then work when the other proposals have been unable to express. Unless it is the desire of Auckland Council to produce cookie cutter office/residential with commercial/retail ground floor buildings across the city due to the design constraints put on potential development partners.

Further, it is not land but reclaimed seashore or waterfront and is a false economy with no regard to climate change. If it is to be claimed back from Port operations, then it should be returned to its original form, removing the wharves altogether to enhance te Waitematā.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

#14304

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>

<p>Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.</p>	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

How the Council then chooses to manage its debt to revenue ratio is on the operations of the entity, however, Ngāi Tai ki Tāmaki has previously expressed its position regarding increasing rates at a time of financial duress for the average resident of Tāmaki Makaurau, that has not yet recovered from cost of living increases and supply chain impacts since Covid-19.

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Strategic Direction on Climate Change

#14304

In reading the Council's strategic direction on climate change, Ngāi Tai ki Tāmaki noted the limited reference to protection of the natural environment and a strong focus on risk to business and finance, with the proposed establishment of green bonds and sustainable financing. Ngāi Tai ki Tāmaki would like to see a more taiao centric approach from Auckland Council that looks to restore the natural environment where possible (see above regarding repurposing of wharves)

2.8 Leading and Influencing Better Outcomes for Māori

Despite Mayor Brown declaring in an iwi leaders hui that it would be much easier if Tāmaki Makaurau had just one iwi like up North, which is incorrect, there is more than one iwi, and mataawaka entity in the very large Tāmaki Makaurau landscape.

Ngāi Tai ki Tāmaki supports absolutely bilingual signage, encouragement and support of Māori businesses, and the provision for kaitiakitanga. This area has seen a noted and significant improvement in services to Māori in Tāmaki Makaurau and we hope that it continues. We would encourage Auckland Council in its official documentation however to look beyond central Auckland for its narratives however.

Responding to Housing & Growth

Ngāi Tai ki Tāmaki would take this opportunity to remind Auckland Council of its opposition to the Future Development Strategy proposal to decline Ngāi Tai its ability to develop and provide housing for its own people and existing community in its heartland.

Which is ironic given that in the changes to the Unitary Plan, Auckland Council then has proposed to allow development of the sacred waterways and pā whakawairua of Ngāi Tai ki Tāmaki, the Wairoa. Significant opposition will come at a later time to that Kaupapa specifically but we are signalling our disappointment now.

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Free parking in CBD

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

parking tickets

#14306

2. What do you think of the transport proposal?

Do not support most of the proposal

Tell us why:

Support the ACT's but nit the amount spent. Could use elesewhere

2a. Is there anything you would spend more on?

Potholes

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

#14306

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14324

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Long-term Plan 2024-2034

Keep the stadium precinct as it is

Tell us why:

so the council can use money on other area

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

to upgrade the airport to offer more space for airlines

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

#14336

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	

#14336

<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	
<p>Re-introduce recycling charges for schools.</p>	
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	
<p>Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.</p>	
<p>Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.</p>	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14348

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14357

Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	Support
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	

#14384

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

To facilitate key outcomes aligned with the physical wellbeing of all Māori, accessibility and exposure

to sports and recreation opportunities need to be enhanced. To enable this, Waipareira proposes that

through TPHoT, an integrated sports and wellbeing programme can be established targeting all age

#14390

representations, i.e. Juniors, High School, Seniors, Masters, and supporting a broad number of sports.

Further to this, using the community-based co-management of facilities, TPHoT would create

efficiencies in the ongoing care and maintenance of facilities, parks and sport grounds across Tāmaki

Makaurau, reducing costs for Auckland Council.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14390

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

To support Council's debt reduction strategy, Waipareira proposes an opportunity for Council to

maintain ownership of land assets and be provided with a First Right of Refusal, renewable 99-Year

Ground Leases on suitable green and brownfield developments in West Tāmaki Makaurau, enabled

through Community Housing Provider (CHP), Health NZ and Auckland Council funding. This would

be for the express purpose of building more kaupapa-Māori housing, health clinics, and urban marae.

Such action would see Council receive additional income on previously under-utilised/unused (rezoned)

land assets in West Tāmaki Makaurau, as well as support long-term aspirations for strategic

outcomes within Council.

Local board priorities

This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#14406

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

- Issues with the Tech – Riki could not get online.
- 2nd attempt 10.55

#14406

- From Rotorua – waka nationals – feed was broken – difficult to hear.
- Noted: Main focus of conversation was the need to access funding for the Whare Kai.
- Priority started 25 years ago for us. We are yet to be in a place to settle with the crown, this makes it hard to engage across the motu.
- Background – Asked to find out what the people wanted (Matua Rikki) so I did – from 1985 to today we are still waiting for our whare Kai – we have a wharenui – opened by Tawhio in 1860, we renovated it in 1972. Our priority remains our whare kai.
- We need a place to practice our tikanga on all occasions.
- Currently unable to have a tangi – (as we cannot provide (hospitality))
- (Communication was intermittent – and difficult to hear) Support funding of a temporary facility but the building spent 1.2 million \$ didn't know what we wanted - we discussed with Phil Goff at the time what our priorities were.
- Noted: Whare Kai – Biggest issue for the Iwi. For the whanau – can't hold hui on our Marae.
- Thanks to our contacts in council.
- Noted: Priority – Manukau Harbour – it is our countdown our Pak n Sav – (Environmental priority to ensure access to kai moana and healthy waters)
- Noted: Rangatahi need to learn safety first aid
- Noted: Rangatahi see what's happening in our waterways.
- Noted: Need to involve the next generation in that space – want to grow our capacity - environment – waterways – are there opportunities for rangatahi in this space.

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14422

Tell us why:

The provision of public transport services is important for disabled Aucklanders in terms of the ability to undertake social connection, inclusion and participation in their
8

communities. It is also important to ensure that public transport is fully accessible as electric wheelchair users have had difficulties accessing the ferries on the accessible ramps.

Last year DPA made a submission on the Council's 2023/24 Budget which criticised the proposals to reduce public transport services.

We strongly urge that there is sufficient funding in the budget for Auckland Transport (AT) to be able to fully realise their Accessibility Action Plan⁶ which aims to make the city's transport network fully accessible for everyone, including disabled people.

DPA supports the extension of the electric train network and future integration works for the rapid transit network mega projects. We see rail as potentially one of the most accessible ways for disabled people to access public transport and play our part in reducing carbon emissions.

Another set of proposals we endorse are those around maintaining and increasing the levels of public transport services provided. Undertaking more investment in this space will ensure that more Aucklanders – including disabled people - can enjoy the benefits of more modern, environmentally friendly, accessible buses as we move towards 2030.

DPA would really like to see other much needed safety improvements realised including plans to remove more rail crossings (where serious accidents involving disabled people have occurred both locally and nationally) alongside the construction of more walking and cycling connections.

From our perspective, the development of active transport modes is important for everyone, including disabled people as many of Auckland's disabled community are

#14422

either walking or wheelchair/mobility device using pedestrians and need to mobilise safely. At this point, we want to reiterate the need for any walking, cycling or micromobility connections to be placed separately but parallel to one another for

2a. Is there anything you would spend more on?

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

- Spend more on safety – driver licencing
- Spend more on investment into improved transport
- More internal alignment , learning about communities of interest.

#14423

- You have a lot of data available before going out – understand that information before engaging.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

- Work less in silos across council
- High turnaround in staff – creates more efficiencies

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Whanau Haua priority – safety measures to be taken into account driveways, open road marae and rural area access. Prioritise meaningful engagement with community.

- Noted: Engage and support whanau haua with transport options.

2a. Is there anything you would spend more on?

- Noted: Increase - Progressive procurement opportunities for Māori, to engage and participate
- Spend less
- Noted: Less high cost contractors
- Comment: Share skills and knowledge

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

8. Do you have any other comments?

- Te Ahiwaru rohe of interest – map shown
- Noted: Support for the continued independence of the Mangere Otahuhu local board and Otara Papatoetoe local board.

#14432

- Commentary: Census is not a justified record to align the two largest social economic spaces – Cannot see how there would be equity across the two areas If they combined.
- Acknowledge the rangatiratanga of Te Ahiwaru in this area.
- Noted: Support hapori entity – support partnerships
- Commentary: Regional services , local board services and regional contestable grants help our people – we (Te Ahiwaru) assist council to deliver programmes and projects
- Te Ahiwaru representatives acknowledged the Mayor and the robust proposal for the long term plan
- Comment: “Personally found proposal quite inspiring”
- Te Ahiwaru rohe – map shown
- Noted: Support for the continued independence of the Mangere Otahuhu local board and Otara Papatoetoe local board.
- Commentary: Census is not a justified record to align the two largest social economic spaces – Cannot see how there would be equity across the two areas If they combined.
- Acknowledge the rangatiratanga of Te Ahiwaru in this area.
- Noted: Support hapori entity – support partnerships
- Commentary: Regional services , local board services and regional contestable grants help our people – we (Te Ahiwaru) assist council to deliver programmes and projects
- Proposed operating cost table;
- Noted: Detailed on presentation.
- We believe further HR supports are needed in regulatory spaces.
- Noted: Group shared services – we agree with statement on group shared service duplication.
- Noted: Property management – we are not unreasonable to request appropriate care and maintenance post production (re facilities and artworks of significance. (Reference to facilities, and other works – payment for outcome however no ongoing consideration of cost of maintenance)

#14432

- Noted: Reducing costs - Te Awhiwaru are disappointed at the slow pace of change through council.
- Noted: We support reduction of management layers where partnership is absent.

Roading/ Transport

- Recommended: Capital efficiency re road renewals and noted that a dig once approach needed.

Community grants/ Funding

- Noted: Any waiver of accountability reports on community grants is to accept complacency and limit fresh innovative prospectives.

Non Rates Revenue

- Noted: Non rates revenue: Concerns re monetisation of data sets or photographs.

Rates Revenue

- Noted: Rates on undeveloped land – Te Ahiwaru do not support this initiative as it will affect Māori populations

Environment – Partnership activity

- Noted: Wai monitoring and stormwater inspection pilot running well.
- Commentary: Light industry continues in the vicinity of papakainga at Ihumatao

Ports of Auckland Comments

- Noted: Ports of Auckland we do not recommend Auckland casting one grievance to cast another. Submission is forthcoming.
- Noted: Re Port – don't lease and discuss/ deal with Ngati Whatua.
- Commentary:
 - Direction is not quite clear. Bring it back to Auckland as an acquisition – fixed in the Auckland Council asset regime.
 - Noted: This is a major discussion to be held with Ngati Whatua Orakei – any ports under treaty claims redress – two succinct avenues to discuss with redress iwi and co-management systems.
- Nick Question: Did you have views on three options with rates?

#14432

- A: Te Awhiwaru response – “No we did not present an option – within submission” . We have had to consider the various regional fuel taxes as well as rates rise – so we will leave them there (in submission)

Long-term Plan 2024-2034

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to	

#14436

the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

#14436

8. Do you have any other comments?

Long-term Plan 2024-2034

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More rubbish bins

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14441

Do not support most of the proposal

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

#14441

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	

#14441

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.

8. Do you have any other comments?

- Last submission on Māori wards was a disappointing result. (Reference to no Māori wards/ Councillors)
- Surprised to get LTP over the line so quickly – congratulations.
- This is to complement our Whanaunga Therefore – the korero of our uri should prevail.

#14453

- Noted: Te Runanga o Ngati Whatua Trust Board - We do agree that the central proposal should go ahead – 3.5% increases.
- First proposal to see increase of 3 Million (Reference to Māori outcomes funding?) I do really support that for council.
- Comment: Can't help but think its a trade off as community funding is taken away from others and may affect - \$20 Million for community organisations – they actually do a lot of work for you.
- Noted: Toi Tu Te Tiriti - Stand up
- Comment: This council was built on the back of an act where the crown could confiscate land under the public works act.
- Comment: That Act was enabled by Tiriti.
- Comment: Your councillors couldn't even get across the first step to have Māori representative/ wards.
- Comment: Multi billions council gets is from land confiscations – Manawhenua should e interwoven into every governance decision in the consultation document – Manawhenua need to be at the table in a co-governance position when speaking of ports – we need to look at the history of how the port was added as a council asset.
- Noted: Water – parks Community etc – in favour of proposed way forward.
- Comment: Want AC to do more around resilience – in flooding zones – our communities are impacted disproportionately in these areas.
- Comment: Overall we think AC should do more in terms of Tai Ao preserving as much as we possibly can.

Q: CR Hill

What big priorities from funding – is there a focus from your perspective.

A; Noted: We support majority transport proposal

Comment: Faster more reliable transport – our community relies on this – hesitation re forcing people our of cars and into transport – tolls or taxes – our people have no choice – most are in jobs that aren't flexible. Really against conditions or balance is needed - Others are disproportionally negatively affected – it will squeeze already squeezed pockets of our people – its getting on top of them – even govt appears to be getting at the most vulnerable – increase in property prices – our people don't get the gains from that – now they get increased rents – landlords will pass on increased rate to our tenants – 30% increase in water as well expected – increases compound on our

#14453

people with fixed incomes, our elderly – they cant pull \$30 extra – Transport needs to be more thinking – do you give concession cards to those who live out further.

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

- Foster a world where everyone is safe supported and celebrated.
- Noted: Council can aid – providing safe spaces for youth and whakatakatapui – crucial environments which offer more than just physical safety.
- Access to safe spaces impacts mental health and wellbeing.

#14465

- Noted: LGBT who have safe spaces available have better wellbeing outcomes than those without – based on world statistics.
- Noted: Homelessness – not solely a cost of living issue – unfair treatment is common – Takatapui youth are particularly vulnerable – there is a significant proportion of individuals who are homeless, who are queer – 2 – 5 % homeless in the broad community compared to 20 – 25% Queer.
- LGBT are often forced out of homes or unbearable conditions living with families.
- LGBT experience higher rates of depression, suicide etc.
- Our rangatahi - suffer the harsh reality of homelessness.
- Comment: Support with resources and advice – Our youth need to be safe and validated.
- Trans health care services are required.
- Comment: 9-5 operating hours do not meet their needs – we need extended hours to fit around individual needs.
- Comment: Discrimination – regular screening for health conditions needed – sexual health clinics with wider operating hours needed.

Public Transport

- Comment: How do we ensure access (to services and facilities) – Public Transport – What new infrastructure I available - explore reviewing transport plans
- Noted: Prioritise support for public transport.
- Noted: Accessible transport supports wellbeing.
- Noted: Safe spaces offer refuge
- Noted: Homelessness a pressing issue
- Noted: Accessible health care
- Increase operating hours of clinics
- Noted: Establish a resource hub and transport accessibility.
- CR Dalton: Your presentation is powerful. If we were truly inclusive you would not need to be here. Hope you get to speak to local boards. They have decision making power over facilities – they may need your information to share.
- CR Ferrie: Homelessness – City Centre and town centres – rough sleeping – how we provide appropriate services – rejection – danger in homes.

#14465

- A: Within our Māori and Pacific whanau – instead of accepting all genders in the old culture, changing views to a more Christian centred mindset so they (LGBGT) face a lot of discrimination within their communities – it is changing slowly – more supports within our impoverished communities and community of colour are needed – It is hard to know how to change a culture – my answer – if they sit on the floor - sit on the floor with them and do not stand over them telling them what you think.
- Possible pathways are available.
- CR Hills – We do good work – proud centres and events – a light touch – are our facilities more open and accepting or do we need to do more to protect within council facilities.
- A; Council can only support via infrastructure – Govt does services. Accessibility in council centres – is more about understanding they are available – can we make that more known - create a resource centre – a website to access or pamphlets – where they can find council spaces – supportive of takatapui whanau.
- There are accepting people but may not reflect that the whole space is accepting. Especially for those who lack housing and information on where they can gain support.
- CR Hills – Is homelessness support still ongoing
- A: Do not know about – those services.

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14470

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

- Comment: Post settlement entity – settled 2012.
- Cultural, commercial and social advancement of Ngati Manuhiri
- Auckland Council is a partner and we have had a relationship for many years in good ways – have had some rocky times but above all local boards and council work closely with Ngati Manuhiri supporting our community and whanau.

#14470

- LTP is important stepping stone.
- Noted: Reinstate funding for Natural environment state – Secure this do not reduce it. Economy cannot be at the expense of our environment.
- Aucklanders love our gulf and parks and reserves – ensure that funding stays in place
- Noted: Increase the number of urban regeneration projects
- Comment: Great beaches north of Auckland – new motorway – now takes 30 Minutes – a lot of property development – we want to be part of planning and decision making as opposed to just development or resource consenting – ensure local jobs local people. Care in development.
- Noted: Renew and strengthen critical assets
- Comment: Large floods – parts of community cut off from emergency services – at Leigh a new pump station failed. Disposed waste into harbour – issue is oyster farms rely on pristine waters – product cannot be brought to market (as at today) – where infrastructure exists we need extra support and care.
- Noted: Focus on waste pump stations please.
- Noted: Roothing and infrastructure
- We consider ourselves experts – underbudget , good working with Iwi – Puhoi to Warkworth highway – looking forward to Warkworth to Wellsford process.
- Q: CR? Proposed to seal gravel roading – in budget. Between Leigh and Pakiri beach – road from Matakana has been recently sealed...
- A: would like more sealed – Pakiri community deserve sealing to lower stress and support emergency service access.
- Q: CR Māori procurement – big opportunities going forward in procurement space.
- A: Everyone is short of money – Our Māori companies cannot compete with the big guys – on a smaller scale we can't compete – council needs to look at ways we can procure – access – but we can't compete with big groups. We will always lose to cost margin – If they want partnership with Iwi/ Māori – we don't have the capital to compete, so we need to come in on another level. Give little guys a go.
- Q: Can we do better with our funding models across directorates – seeking a certain % for Māori outcomes across directorates.

#14470

- A: we support ways we can partner for strong environmental outcomes. Capital value of Hauraki Gulf – so we know how valuable it is for our economy – opportunity to work with manawhenua / tangatawhenua – how rates investment can be applied – your strategic plans recommend those outcomes need to be met through partnership with each other.
- Small Iwi like ourselves – we gave 211 hectares to Auckland City after we procured that – we (still) have metal roads to the golf course – we need council to help us develop that for Aucklanders – help us get our outcomes – we paid we gave reservation space.

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Economic Development support - commentary

- Businesses need storytelling, promotion, urban renewal.
- Major events are GDP drawcard – Matatini – excellent outcome – growth and revenue.
- Lead and influence outcomes for Māori.
- Priorities
- Noted: Encourage effective Māori participation – 16,000 Māori businesses in Auckland. We want to build a collective for Māori businesses for help support and promotion – (there is) no one stop shop – (the) level of support is dispersed across Auckland and hard to navigate. One united collective entity (is recommended) where they can all go – united enterprise – build hubs.
- Noted: Realising Rangatahi potential – Māori employ Māori – work to build capacity and improve programmes to recruit retain Māori into employment to access (build) lower rates of NEATs and unemployment – enhance relationship between Māori employers and Māori work forces and job seekers instead of relying on immigration.
- Noted: Assist through procurement – under \$1 million – we don't have capacity size to win contracts so we welcome conversation on how we can overcome that with council.
- Noted: Capable but small businesses.
- Noted: Māori Business tourism
- I (Tonui Consultancy) support central proposals.
- Q: CR Leonie – have you got a relationship with Whariki – or are they a silo with other organisations.
- A: I used to be CEO – know their work well – more predominant – strong database – work with micro business – 2 – 300 businesses on their database.
- Need is for one collective entity – Like the Ministry of Pacific people – Pacific Business Trust. A one way link from MPI – We need one collective for support. Amotai

#14472

was close, Whariki another – about 20 orgs are doing this. Those orgs would have to come together – council need to lead that.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We support the Pay More Get More option that would significantly increase and speedup

investment to support housing growth and infrastructure alignment.

We support the creation of an Auckland regional wealth fund to benefit Aucklanders, with a

#14482

specific focus on housing for Aucklanders.

We support the intensification of priority areas and access to a housing acceleration fund.

We support a local board funding policy which will contribute to growing local communities.

We support spend on the making space for Water Programme

We support a CCO accountability policy.

We support reinstating Eke panuku's strategic development fund which will enable faster and

better regeneration outcomes.

#14493

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#14493

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14493

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	Do more
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Emphathise more for the business owners and support them who are working

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14501

Pay less to the people who work less

2. What do you think of the transport proposal?

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14559

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	Do not support
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	As proposed
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

All that are listed above. I'd like to prioritise education transport community first though.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14573

I would like to pay less city and local development so they can focus on the "pay more" list

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

I would like to get to work faster therefore I support better and faster transport. Public transport also.

2a. Is there anything you would spend more on?

Spending more on road works to get it all done.

2b. Is there anything you would spend less on?

Spend less on red light cameras etc.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

Too far for me, even if it were redeveloped it is far and gas is expensive

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

#14573

Enhancing cash returns to council to help pay for council services is great community wise

4b. Which option do you prefer for the future of Port of Auckland?

I don't know

Tell us here:

Not really sure about the Auckland Future fund, 35 years sounds long too.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

I think council does so much for the community and I would like that to stay

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

No other feedback.

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

I think it would be more useful and appreciated if it were for public benefit.

5b. What option do you prefer for Bledisloe Terminal?

#14573

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

Again I think the place would be much more appreciated from the public.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in	Support

#14573

2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	Support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

No other feedback.

Local board priorities

7a. Which local board area does your feedback relate to?

Māngere-Ōtāhuhu

Kaipātiki Local Board Priorities

7b. What do you think of our proposed priorities for Kaipātiki in 2024/2025?

More specifically, what do you think of each priority we've listed above?

#14573

Investing in the maintenance and renewal of our parks, playgrounds, recreation facilities, and other public spaces so they continue to meet our communities needs.	
Supporting a community-led approach for the delivery of relevant and diverse services that connect the community	
Supporting environmental groups, community volunteers, and our diverse communities to carry out environmental restoration projects, including stream clean-ups, habitat improvement, native riparian planting, and pest control.	
Begin implementing the Mini Shoreline Adaptation Plan for the Little Shoal Bay / Te Wai Manawa alongside our community to address the issues caused by flooding and seawater inundation.	
Supporting a community climate activation programme to support and amplify community initiatives identified in the Kaipātiki Climate Action Plan.	
Building relationships with local iwi and mataawaka groups so that Kaipātiki is rich with Māori identity and culture.	

Tell us why

7c. What do you think of the Kaipātiki proposed priorities for the 10-year budget 2024-2034?

I support all priorities

#14573

Māngere-Ōtāhuhu Local Board Priorities

7b. What do you think of our proposed priorities for Māngere-Ōtāhuhu in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Strengthen partnerships with local mana whenua through project delivery, including Te Kete Rukuruku, completion of David Lange Park playground and improvements.	
Deliver community climate initiatives such as Low Carbon Lifestyles, and Māngere Bike Hub with our community partners.	
Deliver a community-driven safety action plan aimed at tackling anti-social behaviour and addressing local safety concerns enhancing the overall sense of safety within our local community.	
Improve employment and economic opportunities through our local economic broker programme.	
Support community-led activations at our parks and facilities through our community grants.	I would just like to make New Zealand a better and safer place for the community and future generations

Tell us why

7c. What do you think of the Māngere-Ōtāhuhu proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

No other comments.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14627

2. What do you think of the transport proposal?

Tell us why:

2a. Is there anything you would spend more on?

Safety from speeding drivers: AKA supports measures to keep tamariki and rangitahi safe around

kindergartens and schools. The safety and wellbeing of tamariki is most important to us. We support

Auckland Transport in keeping Auckland's roads free from deaths and serious injuries, particularly

for the thousands of children aged 2-5 attending our early childhood education services. Our

youngest learners are the most vulnerable to injury and death from vehicles.

- We support speed restrictions around schools and early childhood education facilities, along

with other safety measures.

Safe access, parking, traffic disruption: Some of our sites are situated next to primary schools, while

others stand alone, in cul-de-sacs, suburban streets and on busy roads. Many have little or no off-street parking. This has been worsened by the large increase in development in Tāmaki Makaurau.

Eke Panuku, Kāinga Ora and private developers operate in the neighbourhoods our kindergartens

work in. We find that contractors often take the carparks our whānau would usually park in.

Roads are frequently coned off and traffic management plans in force. Sometimes bus stops are

moved e.g at Beach Haven a bus stop has been relocated to in front of the kindergartens driveway.

Changes rarely taking into account the realities of whānau navigating their way – with a pre-schooler

#14627

and perhaps a baby in a carseat, and primary school-aged children.

2

Increased development and temporary traffic management is disruptive and costly for AKA. It

means whānau often have to walk their tamariki a distance to kindergarten, navigating busy roads

with no crossings. If parks are taken by construction vehicles, whānau sometimes double-park on the

street to drop off tamariki. Whānau often have other children with them – perhaps a baby in a

carseat, and/or school aged children. Lack of parking and safe access often deters whānau from

bringing their tamariki to early childhood education. Traffic and parking issues also impact our

funding because of government attendance rules, which don't take into account traffic-related

issues for tardiness in Tāmaki Makaurau.

- We ask that traffic management around developments takes into account the presence of

early childhood learning facilities, in particular kindergartens.

- We ask that dedicated carparking is allocated outside kindergartens.

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

#14627

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by</p>	
--	--

#14627

around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025,	

#14627

2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Safety from speeding drivers: AKA supports measures to keep tamariki and rangitahi safe around

kindergartens and schools. The safety and wellbeing of tamariki is most important to us. We support

Auckland Transport in keeping Auckland's roads free from deaths and serious injuries, particularly

for the thousands of children aged 2-5 attending our early childhood education services. Our

youngest learners are the most vulnerable to injury and death from vehicles.

- We support speed restrictions around schools and early childhood education facilities, along

with other safety measures.

Safe access, parking, traffic disruption: Some of our sites are situated next to primary schools, while

others stand alone, in cul-de-sacs, suburban streets and on busy roads. Many have little or no off-street parking. This has been worsened by the large increase in development in Tāmaki Makaurau.

Eke Panuku, Kāinga Ora and private developers operate in the neighbourhoods our kindergartens

work in. We find that contractors often take the carparks our whānau would usually park in.

Roads are frequently coned off and traffic management plans in force. Sometimes bus stops are

moved e.g at Beach Haven a bus stop has been relocated to in front of the kindergartens driveway.

Changes rarely taking into account the realities of whānau navigating their way – with a pre-schooler

and perhaps a baby in a carseat, and primary school-aged children.

2

Increased development and temporary traffic management is disruptive and costly for AKA. It

means whānau often have to walk their tamariki a distance to kindergarten, navigating busy roads

with no crossings. If parks are taken by construction vehicles, whānau sometimes double-park on the

street to drop off tamariki. Whānau often have other children with them – perhaps a baby in a

carseat, and/or school aged children. Lack of parking and safe access often deters whānau from

bringing their tamariki to early childhood education. Traffic and parking issues also impact our

funding because of government attendance rules, which don't take into account traffic-related

issues for tardiness in Tāmaki Makaurau.

- We ask that traffic management around developments takes into account the presence of

early childhood learning facilities, in particular kindergartens.

- We ask that dedicated carparking is allocated outside kindergartens.

Water

Weather hazards: Several of our kindergartens were severely damaged by the extreme weather of

#14627

Auckland Anniversary Weekend 2023, Hurricane Gabrielle, and other storm events.

- We support measures to mitigate the impact of extreme weather and flooding, including the

reinstatement of awa and creation of flood sinks.

- We note the safety risk to very young children in events that may require evacuation, and

request prioritisation in Auckland Emergency Management planning.

Parks and Community: Whānau have benefited from Auckland Council's support via community

leases and maintenance of Council properties, since the partnership with AKA began in 1908. This is

an investment in stable communities and a positive start for tamariki on their journey of life-long

learning. Auckland Kindergarten Association has been experts in early childhood education for 116

years. As a not-for-profit charitable organisation, our focus is purely on education, rather than profit

from land investments.

- We ask for continued support for our community leases.

- We ask for continued support by way of Local Board Grants, which we have used to purchase heat pumps and items that support education of tamariki.

Environment

NETR and Enviroschools: The Natural Environment Targeted Rate (NETR) makes an important

contribution in protecting and restoring our natural environment. Kindergartens play a role in

teaching tamariki and whānau about sustaining people and places. We have 41 Enviroschools

kindergartens. We receive NETR funds which helps grow conservation capability and knowledge

through community action in an Enviroschools setting, in addition to AKA's resource.

#14627

Increased, rather than decreased, funding is needed to create more Enviroschools. We encourage

Council's further support of kindergartens to help them look after the environment, reduce waste

and manage pests, as well as increasing understanding of te ao Māori and te taiao.

- We ask for increased support and no reduction in environment/sustainability education.

3

Waste removal: AKA supports Council's inorganic rubbish disposal, and use it to minimize what we

send to landfills. Our kindergartens also actively practice a reduce, reuse, recycle philosophy and

they minimise use of plastics.

Because our kindergartens are often situated in suburban streets, our waste pickup is residential.

We are concerned about the move away from weekly pickups to fortnightly. Many of our tamariki

still wear disposable nappies, and we use wet wipes for cleaning. Bins full of nappies and wetwipes

for two weeks will be smelly, are likely to attract flies and vermin and will be overflowing. We ask

that weekly pickup continue or an alternative found e.g support for introducing reusable nappy use.

- We ask for continued weekly waste pickups for kindergartens.

- We ask for consideration of funding applications through Council's Waste Minimisation and

Innovation Fund.

Economic and Cultural Development, Council Support

- As an organisation, AKA is on a bicultural journey, with a Board Director appointed by Ngāti

Whātua. We support investments made to increase Māori outcomes.

#14627

Whānau and tamariki using AKA kindergartens are diverse, with less than 50% being NZ

European/Pākeha. We support events and programmes that enhance the cultural wellbeing of our

diverse communities, including the Pasifika Festival.

We encourage protection of heritage sites such as Myers Park Kindergarten, which was gifted by Sir

Arthur Myers to the “children of Auckland.” Disrupted maintenance led to the degradation of parts

of that building, and several parts of the building were closed for some months until they were

restored.

- We encourage continued remediation and protection of Myers Park Kindergarten.

We look forward to your consideration of our submission and would be happy to appear in person to

discuss further

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount</p>	<p>Support</p>

#14660

for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Other
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	I don't know
Re-introduce recycling charges for schools .	Other
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Do not support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	I don't know
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	I don't know

Local board priorities

7a. Which local board area does your feedback relate to?

Maungakiekie-Tāmaki

Maungakiekie-Tāmaki Local Board Priorities

7b. What do you think of our proposed priorities for Maungakiekie-Tāmaki in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Support community groups and community-led activities by continuing to provide local community grants.	
Building the capacity and capability of local community and sporting groups towards long-term sustainable funding models and independence through our strategic partnerships programme.	
Empowering community groups and organisations to deliver community events through sustainable funding models.	
Collaborate with mana whenua and neighbouring local boards to protect and restore our waterways through Tāmaki Estuary Environmental Forum and Manukau Harbour Forum.	

#14695

<p>Encourage our rangatahi / youth and community to be leaders in climate action. For example, through programmes like Tiakina te taiao and Ope (biodiversity and climate action education programme in schools), Love Your Neighbourhood (environmental volunteer grants) and Songbird programmes (community pest control and biodiversity initiative).</p>	
<p>Support business associations to continue supporting local businesses and ongoing growth, development and liveliness of town centres, including assisting Onehunga Business Associations proposed BID expansion.</p>	<p>Don't understand</p>

Tell us why

7c. What do you think of the Maungakiekie-Tāmaki proposed priorities for the 10-year budget 2024-2034?

7d. Onehunga Business Association is seeking an expansion of its Business Improvement District programme boundary area. If it is successful, businesses ratepayers and owners located within the expansion area will become members of the Onehunga BID programme and pay the associated BID target rate.

Do you support the expansion of the Onehunga Business Improvement District (BID) programme and associated BID targeted rate?

Tell us why

8. Do you have any other comments?

Keep the same unless needed/

#14703

2. What do you think of the transport proposal?

Tell us why:

No change needed too much interference

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

No

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

No sure

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

Tell us why:

N/A

4b. Which option do you prefer for the future of Port of Auckland?

I don't know

#14703

Tell us here:

vM, NOT SURE

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

Use funds if needed to keep funding if nothing proceeds

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

N/A

5a. What option do you prefer for Captain Cook and Marsden wharves?

Other

Tell us why:

Have no idea

5b. What option do you prefer for Bledisloe Terminal?

Other

Tell us why:

N/A

6a. What do you think of these proposals?

#14703

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Other</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Support</p>
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Support</p>
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	<p>Other</p>
<p>Re-introduce recycling charges for schools.</p>	<p>I don't know</p>
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	<p>Other</p>
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	

#14703

Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Other
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	Other

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

No at all.

Local board priorities

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do less
Water	Do more
City and local development	As proposed
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Would want things to stay so that there wouldn't be much to pay

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Not at the moment.

#14714

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Most transport are reliable its more likely the road works won't interfere

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

More road lanes.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

Don't stay around the area.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

Not sure

Local board priorities

7a. Which local board area does your feedback relate to?

Puketāpapa

Puketāpapa Local Board Priorities

7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I support all priorities

More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	
Consider our investment in facilities and services to see if there are opportunities to do better.	
Support initiatives that improve and encourage walking and cycling opportunities.	
Help coordinate and support local business groups.	

Tell us why

7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	

#14747

Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Puketāpapa

Puketāpapa Local Board Priorities

7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I support most priorities

More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	
Consider our investment in facilities and services to see if there are opportunities to do better.	
Support initiatives that improve and encourage walking and cycling opportunities.	
Help coordinate and support local business groups.

2. What do you think of the transport proposal?

#14775

Tell us why:

Significant gaps in rapid transit systems need to be closed and plans for these need to be outlined more clearly now in order to implement these plans incrementally over time.

More specifically, a heavy rail line is favoured by the PTUA from Wiri to Onehunga, continuing to Orewa via Britomart and a new combined road, rail, cycleway and pedestrian bridge. The road aspect will be for heavy vehicles only to preserve the current bridges future for light vehicles and so not to attract any more road vehicles into the city centre, but to provide heavy road freight transport and buses access to go to and through the CBD. (Requirements: Bridge as mentioned; Extend tunnel from Britomart to Fanshaw St; Develop elevation along Fanshaw St for rail; Motorway connections for heavy vehicles at Victoria Park (Beaumont St end); Rebuild middle line at Newmarket railway station into a cut and cover trench to avoid traffic conflict at the junction).

Surface light rail is required on the Auckland isthmus, initially on the Dominion and Sandringham Rd routes connected by Richardson Rd and Maiora Rd. The PTUA is against this system going to Mangere as it will conflate multiple roles with negative outcomes. The airport and Mangere need a rapid rail system, but the isthmus needs a mass transit system. Also the people of the isthmus should be the exclusive users of the LR as it will be problematic to share with Mangere and airport travellers. The proposed Avondale to Southdown line for freight could connect at Dominion and Maiora Rds to provide connections to Mangere.

The current plan to grade separate all level crossings is to be applauded, and the PTUA agrees with the proposed plan to begin with the Takanini straight on the Southern Line and move through the system incrementally over time.

The PTUA supports to progress of the Ameti busway which should be future proofed for an eventual LR system

The PTUA supports the current rapid transit busway to Westgate, but we would urge builders to future proof this system for conversion to LR. As any form of effective public transit is decades away from Huapai/Kumeu, we urge the development of a shuttle service from Huapai to Swanson to connect with the remainder of the Auckland railway network. As the rail, stations and trains are all currently available, and as KiwiRail have little prospects of frequent number of freight trains on this route, NOW s the time for this trial.

The PTUA supports the payment of maintenance costs to KiwiRail for Auckland rail, as Auckland must now commit itself to having a below wheel infrastructure that is a higher standard than the rest of the system in order to produce a smoother ride, but also

#14775

avoid the problems of Rolling Contact Fatigue (RCF) due to the profile of the Auckland electric multiple units (EMU).

Fare Structures

The current proposal to cap fares at \$50 is commendable, but all fares will work best if they are competitive with the alternative car option. Two of the major goals of public transport is to reduce congestion and carbon emissions. A third is to offer an affordable option for those on low income.

Lower off peak fares may increase ridership, and favour some shift workers.

The PTUA urges the immediate move toward a universal system of fare payment such as the use of credit cards, so visitors to Auckland are not at a disadvantage when using public transport.

Walking and Cycleways

These must be incorporated into future planning and the future proofing of all transport developments to avoid being add-ons that clash with other modes. The PTUA supports the idea of a barge across the harbour initially, prior to the eventual building of a multi-purpose bridge as mentioned above. We support the ongoing development of all walk and cycleways as afforded by the budget.

2a. Is there anything you would spend more on?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by	
---	--

#14775

around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025,	

#14775

2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Organisation (if applicable): Surface Light Rail for Auckland

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We support further investment into a surface light rail rapid transit network starting with a route from the City Centre to Mt Roskill, and then further expansion to Onehunga and Māngere. This would then be followed by other transport corridors such as the north-western and northern corridor. Any busway development along the North-Western corridor should be future-proofed for surface light rail upgrades.

#14811

Additionally, we support improvements and works done for urban development and regeneration in preparation for a surface light rail network. Areas in the catchment of Stage One, should be prepared for surface light rail, with preparatory works and appropriate zoning changes, as well as design work for regeneration and development that would occur during Stage One construction. Funding should be allocated to areas which are further from the proposed first stage (see Stage One map) for development and regeneration projects, as well as improvements to transport in preparation for future expansion of the surface light rail network.

A notable example for the Stage One line in SLR's plan, is the removal of the Dominion Road flyover, and freeing up land for development which the consultancy MRCagney estimates could be worth up to \$95million, which could net a tidy profit for Auckland Council. It's been estimated in the past to cost \$20million to rebuild the flyover and this is work that could be undertaken at any time. The flyover itself is redundant and constitutes a large area of wasted council owned land, estimated at 72,000m² from the flyover to Newton Road, that otherwise could be used for housing.

We ask Auckland Council to fund the redevelopment of the Dominion Road flyover, as an initial priority, and use profits from the work to fund further pre-work on surface light rail. While this is a project that by itself makes perfect financial sense, the redevelopment of this flyover is needed for surface light rail as any bridge structures of Dominion Road would need to be rebuilt and strengthened. There is also a foundation of prior work to build off from the City Centre Masterplan, so this is a perfect project to produce funds for work on surface light rail by Auckland Council, without taking away funding from other projects and priorities.

Consistent work over the last decade, reflected in the Auckland Rapid Transit Pathway 2023 report by Auckland Transport, has shown that to effectively address Auckland's congestion issues we cannot rely solely on a bus network. The busiest bus corridors in our city are already reaching capacity, and the long-term plan should reflect that reality. Without surface light rail, we believe Auckland will fall behind the ambitions of a first rate city. Success of surface light rail in cities like Sydney, should be motivation for us to follow. Congestion costs Auckland over a billion dollars a year, and so doing nothing costs us. Delaying also costs us.

Additionally, we support Auckland controlling its own transport priorities. An "Auckland Deal" (or city deal) provides the means for the central government to support Auckland Council's priorities, rather than the other way around. A surface light rail network would provide opportunities for growth, development, and productivity in the city. Common in city deals overseas is increased funding opportunities and funding methods for local government that enable greater spend and investment. Therefore, we believe surface light rail should be included in an Auckland Deal with the central government. We urge

#14811

Auckland Council and the Mayor to make the development of a surface light rail network, starting with the City Centre to Mt Roskill line, a priority for a future deal.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

We do not fully support this Transport proposal as it does not include investment and commitment to a surface light rail rapid transit network. Any work on a busway in the north-western corridor should be future proofed for surface light rail. This can be done based on the North West Rapid Transit Corridor Indicative Business Case work where a dedicated busway is constructed from Te Atatu to Westgate, and dedicated shoulder lanes and bus lanes connect Te Atatu to the City Centre. This can all be future proofed for surface light rail, and would provide quality improvements to the northwestern corridor, until such time as a surface light rail upgrade is ready.

There should be commitment to surface light rail along the City Centre to Māngere corridor, starting with Stage One from the City Centre to Mt Roskill and followed by expansions to Onehunga and Māngere. Without constructing surface light rail we believe Auckland will not catch up to its infrastructure deficit, deal with congestion or deal with our emissions. Without a surface light rail network Aucklanders will continue to waste time and money that is better spent elsewhere.

2a. Is there anything you would spend more on?

We want to see Auckland Council spending more to develop a surface light rail network, with a City Centre to Mt Roskill line constructed as a priority. There has been significant design work done by Auckland Transport and Waka Kotahi on surface light rail pre-2019. Adopting these plans will allow any work to be fast tracked with only minor updates and improvements needed. SLR's Stage One, with the route outlined in our attached plans, is an affordable and practical first stage which would have significant benefits to the city that is based on this previous work. ALR vastly

#14811

overestimated the cost of surface light rail and, using comparisons to international norms, surface light rail should cost between \$50-150 million/km. If we use the conservative estimate of \$150 million/km, our 9km route would cost \$1.35 billion. Funding should be allocated in the LTP in order to appropriately cost Stage One, as well as begin preparation works and route protection, so that when further resourcing is available through a city deal, work can begin. We propose this funding can be sourced from profits due to the redevelopment of the Dominion Road flyover that we outlined above.

Specifically, we ask Auckland Council that funding, primarily through profits from the redevelopment of the Dominion Road flyover, be allocated to investigating the work done by ALR, and how they came up with the figures for their project. Additionally, we ask that \$500,000 be allocated to research how light rail is built and run internationally, with a particular focus of reliability, environmental impact, cost, and cost overruns. Learnings from this should then be applied to Auckland, to ensure any work is cost effective and efficient. Pre-works can also be initiated using this funding, and could include station design and location, land acquisition, route protection, and funding of future proofing when any work is done along the route. By initiating pre-works, route protection and research, the Council can push this project to a state that is not only ready for Central Government funding, but also create the conditions for it to be an inevitability. This is reflected historically with City Rail Link, and how Auckland led initial work on it to make it an inevitability. Additionally, the more work that Council undertakes will mean the project will more closely reflect Auckland's priorities and needs, rather than Central Government, avoiding what occurred with ALR.

Work on Stage One, and the eventual completion of this stage, would enable future staging. Excess and future funding should be allocated for work on the expansion of surface light rail, such as what is proposed in Auckland Transport's Auckland Rapid Transit Pathway 2023 report. The line should be expanded to Onehunga and Māngere. This will connect communities that are severely lacking in reliable public transport to the rest of Auckland's rapid transit network. Surface light rail will be a very important transport option for many people in these areas to reach employment, leisure, and business locations. Additionally, it is important to maintain momentum when constructing a wider network, and these further expansions ensure an infrastructure pipeline to retain experience in light rail construction. This will allow Auckland to continue building out its surface light rail network eventually expanding it to other transport corridors such as the north-western or northern corridors, upgrading any busway infrastructure.

Staging the development of the network in this way ensures it remains affordable for Aucklanders and is practical to build. Interim improvements should be made in areas that are further out from Stage One. Improvements in the LTP, specifically busway construction in the northwest corridor, should be future proofed for surface light rail.

#14811

This can be done based on indicative business case work where a dedicated busway is constructed from Te Atatu to Westgate, and dedicated shoulder lanes and bus lanes connect Te Atatu to the City Centre. This would provide quality improvements to the northwestern corridor, until such time as a surface light rail upgrade is ready.

Later Stages of the line that would connect to Onehunga and Māngere (and possibly the Airport to connect the major employer with the surrounding area), should have interim improvements as well. This is specifically important in Māngere, where a bus improvement plan should be designed and funded, to provide a better bus network that improves connectivity in the area. This would help build public transport usage and provide better connections for the area in the interim period, until surface light rail is extended there.

Congestion is a major issue in our city that costs Aucklanders time and money. It restricts our growth and potential. Consistent work done over the last decade has shown that we cannot rely solely on the bus network in our busiest corridors to address our cities transport issues. Surface light rail provides a higher capacity solution that is affordable, deliverable, environmentally friendly, and will connect communities in Auckland. It provides a plethora of economic benefits that will create jobs and help businesses while improving our streetscapes to make our city a better place to live. Using the redevelopment of the Dominion Road flyover there is a way to pay for the required initial works, without taking away funding from other priorities in the LTP and without raising rates. If we don't look toward the future we will continue to burden ourselves with the costs of congestion and stagnation. Surface Light Rail urges Auckland Council that the transport measures in the LTP need to include commitment to the network we need in the future, not just finishing projects of the past.

2b. Is there anything you would spend less on?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by	
---	--

#14811

around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025,	

#14811

2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Surface Light Rail would like to note other benefits of surface light rail for Auckland in other areas of the LTP.

City and Local Development opportunities are a secondary benefit enabled by surface light rail and can transform Auckland for the better. If we draw on recent light rail lines that have been constructed, such as Sydney (note the support for surface light rail from Sydney Business), we can see that surface light rail transforms streets into people friendly places, which are more vibrant and encourage higher foot traffic for businesses. This would be very beneficial in Stage One for the City Centre, Uptown, and Dominion Road.

The regeneration and development opportunities that are enabled by surface light rail also contribute to the economic and cultural development of Auckland, as more people-friendly town centres leads to more spending by customers and visitors. Additionally, higher density development that is enabled by surface light rail supports growth of the city. A more reliable and efficient network also connects people with businesses, employment, and commercial areas, allowing increased economic efficiency and opportunities. Lastly, economic growth is hampered by congestion, and surface light rail has consistently been identified as essential to build the transport network Auckland needs to deal with congestion.

Transport emissions are Auckland's highest form of emissions, and surface light rail gives people the choice to not have to use their vehicles, and instead use a low emission form of transport. Additionally, it frees up road space for those who do have to drive, so they are stuck in traffic less and therefore produce less emissions. Additionally, surface light rail is quieter than buses and private vehicles, and therefore

#14811

reduces noise pollution from traffic that affects residents, and reduces business due to the oppressive environment it creates. Lastly, construction of surface light rail, and the opportunity for the regeneration of town centres, means we can increase green and permeable spaces through greentracking and increased vegetation like street trees. This increases our resilience to flooding, and creates a more livable city through increasing the green spaces in Auckland.

Long-term Plan 2024-2034

Note: this simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Faster constructions on roads

Invest in emergency management for communities

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14822

No

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

I think this is necessary for faster results of efficient transport but inflation is a thing that happens

2a. Is there anything you would spend more on?

Air for tyres

2b. Is there anything you would spend less on?

Food

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

#14822

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

I don't know

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

no

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#14844

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Havent settled yet – limits our capacity – on the backfoot – ability to execute wants is limited

Main priority is finishing the wharekai – enable us to practice our tikanga – priority for 35 years

#14844

Previous council assessment of Taahuna Pa marae – toilets need doing, wharenuī needs work, wastewater system needs upgrade – want to continue conversation with Council

What do we do if we have a hui tomorrow (no wharekai), what do we do in the meantime?

Rangatahi development – our kids are a biggie for us, call them te apopo (people of tomorrow):

Want to develop our young people to represent our iwi, understand and engage with Council and it's processes - how can young ones be a part of conversation with council?

- their education in our Ngaati Te Ata tikanga
- our tikanga is a safe place for our kids
- water safety from tribal perspective
- we are proactive with schools, teaching schools/staff about importance of our place
- want rangatahi to have more opportunities
- developing tribal capacity to be guardians of whenua and waterways – look to talk to council about this going forward how can we team up on drowning prevention, water safety - would like to partner in water safety/drowning prevention

Our backyard is the Manukau 'guardian of the Manukau Harbour' – we have the responsibility.

How can Ara Kōtūi/Council awahi that journey with our young people?

How to harness rangatahi innovation – Ngaati Te Ata rangatahi great innovators

Health space also a priority

Priorities can change – need to be flexible, priorities can change quickly – community working together (example of COVID, teaching kaumatua to use zoom).

Te apopo – those people of tomorrow – getting them more involved in what we are doing, how do we engage with them in completion of our wharekai, get them to involved in completing that project

Producing 15 credits through our programme on the water – adds to our kids enthusiasm about the water, they are the ones who lead the safe elements of that, need to build other elements, safety is not just wearing a jacket, it's about respect, how to reach each-other, in the water domain, help building confidence within kids,

#14844

programmes help kids/provide support, not just for elite kids, also for kids who struggle at school, we make space in the waka for them too.

Waka ama – lots of young people involved in this, opportunity to learn other things too eg fishing, other kai gathering etc; growing sport, success for rangatahi – waka - keeps us together.

Stopping investing in such public spaces is a false economy. The investment has a long-term life over several generations so should be paid for by intergenerational loan which reduces the short-term effect on rates increases. The effect on rates is very modest, particularly when compared with the benefits to the community and local economy.

#14852

We know that wise public investment in streetscape and usable public spaces attracts private investment in buildings and businesses. Shutting up shop by not investing in public spaces will significantly and detrimentally affect business growth and economic development in your patch and leave your centers tired and unappealing.

While your community is doing it hard with high interest rates and cost of living, a modest investment in usable public spaces shows that you care for your local community.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We support the Making Space for Water programme outlined on page 38, however, the scope needs considerable expansion – for example in Piha where previous flooding and the cyclone have wreaked havoc. The Piha Wetland Project should be listed among the Waitākere Ranges projects.

We strongly support improving fairness of funding of local boards. (Parks and Community (page 39). We understand that this will benefit our local board (WRLB)

#14859

which is considerable underfunded given its role and responsibility for the environment in the west, including protection of the Waitakere Ranges in accordance with the WRHA.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

we do not support a reduction in environmental/sustainability education programmes. ((Environmental Management and Regulation (page 44).

Although we have no school in Piha, we have identified environmental school programmes as being a key feature for capacity building for environmental groups – this will also ensure the longevity of this type of volunteer work. School programmes should be strongly supported.

Organisation (if applicable): Business East Tamaki

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Whilst, we have a preference for the central proposal, with a "do more for infrastructure" approach.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

We support a "do less" for back office council function and want to see less red tape and costs cut in the council.

#14866

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

We agree that a key priority for transport should be to make the most of council's existing assets and planned spend.

- We support the focus on improving public transport, renewals and maintenance
- We support investment in rapid transit options, focused on busways, such as the success of the Northern Busway.
- We share council's concern in the recent government decision to cancel the regional fuel tax. We are concerned that this will result in a reduction in the level of investment in and re-prioritisation of transports projects in the Long Term Plan.

2

- With the release of the draft Government Policy Statement on land transport, and the need for there to be alignment of national and regional priorities.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

#14866

Tell us why:

We do not want to see a Future Fund established, rather, the dividends are used for the infrastructure projects we need now.

4b. Which option do you prefer for the future of Port of Auckland?

Other

Tell us here:

Would like to see the sale of all shares in the POA and AIAC.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Tell us here:

We do not support continued council operation of the port.

- We do not believe Auckland Council should run a business POA or hold shares and do not see this as a council function.

- We believe the Port should leave Auckland within 10- years and the land released and used for public benefit.

- We do not want to see a Future Fund established, rather, the dividends are used for the infrastructure projects we need now.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

#14866

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	
<p>Re-introduce recycling charges for schools.</p>	

#14866

<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	
<p>Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.</p>	
<p>Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.</p>	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

out a 50/50 combination approach and the reallocation of some existing funding between local boards and providing some new funding (\$20 million opex and \$30 million capex) over the first three years of the LTP 2024-2034.

- We support the proposed amendments to the CCO Accountability Policy to reflect recent changes in legislation as well as the new/updated council policies and plans

Conclusions

#14866

There needs to be a focus on providing core infrastructure services which grow the economy and support local businesses

We want to see a culture of efficiency within the council group to generate savings and adopt a mindset focused on the interests on the ratepayers.

Long-term Plan 2024-2034

**SUBMISSION TO
AUCKLAND COUNCIL LONG TERM PLAN 2024/2034 (10-Year Budget)
ON CLIMATE ACTION**

28 March 2024

Introduction

We make this submission to the Auckland Council Long Term Plan 2024/2034 (10 Year Budget) ('LTP 2024/2034') on Climate Action on behalf of the Equal Justice Project (EJP) at the University of Auckland. The EJP is a non-partisan pro-bono charity that utilises law students' legal training and knowledge to advocate for change in our community. We seek to promote effective climate action in Auckland.

The Intergovernmental Panel on Climate Change (IPCC), in their Sixth Assessment Report, released on March 20, 2023 at the Panel's 58th Session, declared:

"Global warming is more likely than not to reach 1.5°C between 2021 and 2040 even under the very low GHG emission scenarios (SSP1-1.9), and likely or very likely to exceed 1.5°C under higher emissions scenarios. Many adaptation options have medium or high feasibility up to 1.5°C (medium to high confidence, depending on option), but hard limits to adaptation have already been reached in some ecosystems and the effectiveness of adaptation to reduce climate risk will decrease with increasing warming (high confidence)."

Climate scientists are warning that some impacts of climate change are so severe they cannot be adapted to. Not only is there is an over 50% chance that global temperature rise will reach or surpass 1.5°C between 2021 and 2040, it is likely it will happen sooner.

As you have stated, Tātaki Auckland Unlimited plays a key role in the implementation of the economy section of Te Tāruke-ā-Tāwhiri: Auckland's Climate Plan and in contributing to Auckland Council's emissions reduction target of 50% by 2030.

We wish to comment, in particular, on two issues regarding the LTP 2024/2034: Specific emissions reduction opportunities for Auckland Council Group; and

Specific emissions reduction opportunities for Auckland Council Group¹

Section 2.2 of the LTP 2024/2034 Supporting Information document notes that the Auckland Council Group (Auckland Council and its CCOs, excluding Ports of Auckland) has committed to a 50 per cent reduction in operational GHG emissions (also referred as scope 1 and 2) by 2030 compared to those in 2019, and net-zero emissions by 2050. Ports of Auckland has also committed to net-zero emissions by 2050.

As part of the LTP 2024/2034 development, a specific package was designed to meet the 50% reduction (scope 1 & 2) for AC group by 2030 and lay the path towards the net-zero emissions by 2050. This package was developed excluding POAL and Watercare.

¹ Long Term Plan 2024/2034 (10-year Budget) Supporting Information, pages 3-26. [Link](#)

This expenditure package supports the Emission Reduction Plan and mostly targets actions that provide a good return on investment.

This Emission Reduction Plan is expected to deliver significant cost savings, particularly in relation to reducing our energy use, by installing solar panels and transitioning to electric alternatives across our asset portfolio and activities.

Below are the actions identified, of which the GHG savings, CAPEX and OPEX expenditures and savings have been estimated. Such plan would need to be monitored and updated regularly to adjust to the changing environment and conditions under which AC operates, as well as to reflect any decisions taken after the consultation (e.g. reduction of our asset portfolio) or external factors (e.g. energy cost, ...).

- Replace gas boiler from the Wintergardens with a biomass boiler (wood pellets) – This action is already funded and underway
- Reduce live stock across all Auckland Council farmland • Plant an additional 200ha of unproductive farmland
- Apply regenerative farming on all Auckland Council farmland (1200ha) and seek to convert to organic farming
- Refrigerant Phase out from Auckland Council owned buildings
- Reduce the use of fertiliser and use alternative low carbon fertilizers and products in sports fields • Aquatic Centres : Phase out gas boilers and implement energy efficiency improvement projects – This action is partially funded and underway (for some aquatic centers only) and would cover 11 Aquatic Centers out of the 28 owned by AC
- Installation of solar panels across several AC buildings and assets to reach around 20MW solar capacity by FY 2033/2034
- Corporate property Energy Efficiency Improvement Projects
- Te Wharau o Tamaki/ Auckland House - Energy Efficiency and Boiler Upgrade Projects
- Implement Energy savings through eco-advice across our community buildings and facilities
- Reduce travel by flight through a low carbon travel policy and a flight levy
- Fleet Decarbonisation (across Auckland Council Group) - This action is already funded and underway
- Implement a power purchase agreement to source 100% Renewable Energy for the remaining energy demand not produced by Auckland Council solar projects
- Mt Smart Stadium: Replace two natural gas boilers with one wood pellet boiler. 23 Section one: Our key strategies 1.2 Summary of the climate findings
- North Harbour Stadium: Replace two 94kw natural gas boilers with hot water heat pumps. Replace 800kw natural gas boiler with one wood pellet boiler.
- AAG Café, Zoo Café and Aotea Centre: Replace gas stoves, ovens and fryers with electric stoves, ovens and fryers.
- Aotea Centre: Replace gas patio heaters with electric patio heaters.
- Implement Energy metering and Energy Management System to further track and reduce energy consumption.
- Implement actions to reduce travel and freight emissions
- Energy switch in Westhaven and Wynyard Quarter
- Extra resources to implement the actions across the organisation, monitor and report the results.

We welcome these actions, but are very concerned that Auckland Council's current Emission Reduction Plan would require a CAPEX investment (over 10 years) of around \$76m (of which around \$70m is currently unfunded). In other words, only \$6m of the \$76m is currently funded.

We implore Auckland Council to prioritise and fully fund its Emission Reduction Plan.

Sustainable finance²

As noted in the LTP 2024/2034, growing Auckland Council's sustainable finance programme is one of the ways the council can respond to the risk of Inability to access capital and other financial products affordably and easily as a result of climate change.

Auckland Council has been issuing green bonds since 2018 and expanded its sustainable finance programme in 2022 to include the use of sustainability-linked financial products. As a signatory to the C40 Divest/Invest declaration, the council has committed to issue the majority of its debt through sustainable finance mechanisms. As a growing part of debt capital markets, sustainable finance products give access to a wider pool of investors and pricing can be more attractive. To meet the growing demand for these financial products, the council should ensure that as many as possible of the assets council invests in meet the council's green bond and loan eligibility criteria set out in Auckland Council's Sustainable Finance Framework 2023.

The eligible asset criteria are in line with applicable market standards and are amended regularly to reflect evolving science and policies. Of concern is that the LTP 2024/2034 says that currently, Council does not have enough assets on its books that meet the applicable criteria to enable council to raise all of our debt in a green format.

The council has made public commitments around sustainability and the need to focus on adapting to climate change. The LTP 2024/2034 says that if council's capital investment programme is not delivering sufficient assets that meet the green bond criteria, council will not be able to continue to offer green bonds and other sustainable finance products in key financial markets. "This creates a risk that access to the financial markets becomes more restrictive and expensive and we suffer reputationally."

We are very concerned that council's capital investment programme is not delivering sufficient assets that meet the green bond criteria and that council risks not being able to continue to offer green bonds and other sustainable finance products in key financial markets. We are further concerned that this creates a risk that access to the financial markets will become more restrictive and expensive and that Auckland Council will suffer reputationally.

We implore Auckland Council ensure that council's capital investment programme is delivering sufficient assets that meet the green bond criteria.

Note: this simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	As proposed
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

#14868

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount</p>	<p>Support</p>

#14868

for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools .	Support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Do not support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	Support
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year. 5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	

#14891

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Transport Plan

Improving transport in Auckland, and specifically making it easier overall to access the city centre is a significant priority for HOTC. We would like to see improved, equitable access for

2

#14941

all Aucklanders; a more resilient transport system; the efficient movement of people and goods around our city; faster and more frequent bus services and upgraded rail networks.

We support maximising the use of our existing road and public transport networks, targeting investments to the most significant challenges and the reduction of carbon emissions from the transport sector. We also believe that investment should be prioritised where it will make the biggest impact.

HOTC is broadly supportive of the “Central Proposal”. Specifically, as identified:

- Support for City Rail Link (CRL) and improving some of the level crossings.
- Making public transport faster, more reliable, and easier to use through investing in a rapid transit network, and improvements to the bus network in the city centre.
- Introducing capped weekly public transport fares to improve affordability.
- Network optimisation such as dynamic lanes.
- Reducing the cost of and disruption of temporary traffic management
- Development of ‘time of use’ scheme to help manage traffic congestion (noting the importance of ensuring updated assessments on possible impacts to places like the city centre through the next stages of the project).

What would we like to see more of? To further improve Public Transport in Auckland, HOTC would also like to see investment into programmes identified within the “Do More” scenarios, specifically:

- An accelerated programme of electric ferries to support improved accessibility and air quality.
-

#14941

Increasing levels of public transport services that support greater access to public transport.

City and Local Development

The continued public investment into the city centre recognises the important role that the city centre plays regionally (and nationally) as well as the opportunity to continue to attract private investment.

HOTC supports the ongoing investment into the city centre, as outlined in the Central Proposal, including the City Centre Targeted Rate programme. However, our support for this ongoing investment is conditional on the operational needs of a growing city centre being met, that planning is integrated and holistic, and that business impacts are mitigated.

In addition, we would also like to ensure master planning and staged implementation for waterfront areas including Wynyard Point's Te Ara TukuTuku and Queen's Wharf; as well as Captain Cook Wharf and Marsden Wharf (and Bledisloe Terminal) – should these be released back into Auckland Council ownership.

3

Economic and Cultural Development

We must ensure we maintain a vibrant event offering, attract investment, and continue to market Auckland to New Zealand, and the rest of the world. Whilst HOTC recognises and is supportive of securing sustainable, alternative funding mechanisms to support visitor attraction and economic development activities, investment into this activity should not only occur once alternative funding is secured. We are concerned that the Central Proposal would mean that investment into economic development and major events would be at reduced levels compared with pre-COVID 19 funding levels (and only if the \$5M gap for investment is secured will further investment into economic and visitor attractions be made). HOTC supports initiatives identified in the "Central proposal", specifically as identified:

-

Working with central government on new funding tools, such as bed night visitor levy to enable more investment into visitor attraction and economic development activities.

-

Continuing to provide the existing free and subsidised entry to programmes and events and the delivery of events including Diwali (and Lantern and Pasifika) recognising the significant social and economic value that these events have for our city centre (and region).

#14941

HOTC would like to see the following programmes of activity undertaken as outlined in the “Get More Scenario”, Specifically:

-

Resuming activity to actively bid for major events and concerts and attract more overseas investment. A pipeline of major events must be secured for Auckland.

-

Development of additional initiatives like the Aotea Entertainment Precinct (Aotea Arts Quarter). There is significant need and opportunity to strengthen this part of the city centre, and to capitalise off the City Rail Link (CRL) and other private sector investment such as the Symphony Centre to consolidate and realise the full potential of the Aotea Arts Quarter, and the expected restoration of the St James Theatre. This investment should maximise opportunities for arts and culture in the area.

Environmental Management and Regulation

Effective Bylaw enforcement and investment into safety programmes will help support a safer city centre. Concerns around safety is one of the barriers to visitation. Given the level of public investment into the city centre, and its regional importance, we would like to see Auckland Council’s continued investment in this area.

Therefore, we are supportive of investment into the following, which we assume would support initiatives such as CityWatch, to manage compliance with the Public Safety and Nuisance bylaw:

-

Continue providing regulatory services which reduce risk and harm.

-

Fund safety and initiatives which support a safer city centre.

Parks and Community

4

We want to emphasise the importance of ensuring funding to support the arts and the creative industries, through mechanisms such as grants funding, and ensuring service levels are maintained for central city community assets such as opening hours for the central library and services offered by the Ellen Melville Centre in the city centre.

This would at minimum mean support for the Central Proposal.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#14941

2. What do you think of the transport proposal?

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

#14941

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

This supports long term strategic aspirations of better public access to the Waterfront, and reuse of space to provide better amenity and greater benefit for the public. This also allows for the incremental expansion of public space. It is important that

5b. What option do you prefer for Bledisloe Terminal?

I don't know

Tell us why:

HOTC is supportive of developing a long-term view of what the Port Land could be used for and would like to see the work to develop an integrated Master Plan continue.

•

We are supportive in principle of continuing to turn over as much waterfront land into Council (public) ownership over time to allow for improved public access and/or alternative (appropriate) commercial use. This is on the basis that the efficient and cost-effective delivery of goods is maintained through the operating model and location deemed most appropriate for the port as part of a wider upper north island supply chain strategy.

•

Whilst there are benefits in giving certainty to the future ownership of Bledisloe Terminal Land, particularly in relation to integrated master planning, there is significant work and investigation required to determine how the land could be released within a 15-year timeframe, with significant cost and implication on the transport network.

#14941

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	
<p>Re-introduce recycling charges for schools.</p>	
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	

#14941

Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

See attached

Local board priorities

7a. Which local board area does your feedback relate to?

Waitematā

8. Do you have any other comments?

Rates/Fees and Charges: Outdoor Dining Fees:

Businesses located in the city centre pay 65% more per sqm [\$1620 per annum, per sqm vs \$980 per annum, per sqm] for outdoor dining rentals compared with businesses located in other town centres, including Ponsonby, Parnell, Newmarket and Karangahape Road.

Outdoor dining contributes to overall vibrancy in town centres and should be encouraged and enabled. With the understanding that these costs are largely based on 'cost recovery' for council, and when taking into consideration rates for other equivalent areas, HOTC does not consider the current charging regime for city centre businesses to be fair or equitable. We would like Council to review the current city centre outdoor dining rental costs, with a view to making them consistent with other equivalent areas.

Local board priorities

7a. Which local board area does your feedback relate to?

Puketāpapa

Puketāpapa Local Board Priorities

7b. What do you think of our proposed priorities for Puketāpapa in 2024/2025?

I support all priorities

More specifically, what do you think of each priority we've listed above?

Invest in opportunities to support local community leadership.	
Invest in climate change response initiatives and support volunteer groups working on local environmental restoration / protection and climate action programmes.	
Consider our investment in facilities and services to see if there are opportunities to do better.	
Support initiatives that improve and encourage walking and cycling opportunities.	
Help coordinate and support local business groups.	

Tell us why

7c. What do you think of the Puketāpapa proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#14961

Tell us why:

1. Time of Use Pricing

NZTA notes the Auckland Council intends to develop a 'time-of-use charging' scheme. As the national land transport agency, we have an interest in ensuring that any time-of-use charging schemes have a positive impact on the overall performance of the land transport network. We are taking a collaborative approach with the Ministry of Transport (which is leading policy development) and other interested councils to support consideration of pricing schemes, and we look forward to working with Council in developing any 'time of use' pricing scheme.

While there is not presently national legislation enabling time-of-use schemes such as Auckland proposes, the Draft GPS 2024 identifies this tool as having a critical role in addressing transport challenges. Council should ensure the purpose of any time-of-use charging scheme aligns with that signalled in the final GPS 2024.

We encourage Auckland Council to make key decisions on its time-of-use charging scheme in light of both the final GPS 2024 and the enabling legislation that will be required before any schemes can proceed. Any such legislation could materially affect scheme objectives, parameters and design. Government has indicated that legislating for time-of-use charging is a priority in this term.

2. Funding mechanisms

We continue to encourage the Council to continue to explore options for additional revenue, especially where this helps deliver improvements to the transport system – for example growth paying for growth. We note that there is a shortfall in Council funding under current funding settings to deliver key transport improvements and are keen to work with the council in a collaborative way to ensure ongoing integration and alignment.

3. One Network Framework

Section Three- Table 6 (Roads and Footpaths: Additional notes to Performance measures table) in the supporting documents refers to ONRC. All council network classifications are expected to be replaced by the One Network Framework classification (ONF). The terminology of ONRC should not be used going forward as this has been replaced by the ONF. Please contact us to discuss this further if required.

2a. Is there anything you would spend more on?

AK Have Your Say
Auckland Council
AUCKLAND

Sent via email: akhaveyoursay@aucklandcouncil.govt.nz

Dear Sir/Madam

AUCKLAND COUNCIL LONG TERM PLAN 2024-34

On behalf of the Campaign for Better Transport Incorporated (**CBT**), we would like to thank Auckland Council for the opportunity to submit on the Long Term Plan 2024-2034, both in person and through the below submission.

The CBT is an apolitical advocacy group lobbying for transport improvements in New Zealand, with a specific focus on Auckland. We note that while our efforts have historically focussed on public and non-vehicular forms of transport, we are not necessarily adverse to roading improvements where these can be justified.

Our submission will primarily focus on the transport side of the Budget, but we do acknowledge that other areas are of importance and that Council need to balance out the competing needs of each area to implement a Budget that achieves the most for Auckland out of limited resources.

Proposal

While the CBT would like to see some of the projects under the “Pay More, Get More” option advanced, we also acknowledge that during this time of economic crisis, it is very difficult to get households to wear a 14% rate increase this year, and then 10% rate increases in next year and 2026. We hope that some of the projects which Council may not be in a position to fund right now might be advanced in coming years, whether it is because efficiency gains mean more funds are available, or because economic conditions improve enough to make further rate increases more tolerable to the public at large.

\$50 Fare Cap

The CBT queries whether the \$50 Fare Cap is the best solution for addressing transport costs. We note that fares on short distance trips have increased at more than double the rate of inflation since the start of the century, while fares on longer distance trips are still comparable with levels paid in the mid-2010s and that a fare cap would primarily benefit longer distance travelers, while short distance trips are still subject to heavy fares. It may transpire that indeed the proposed fare cap is the best solution and if that were the case, then we would favour this proposal.

Level Crossings

The CBT welcome the inclusion of the grade separation of the Takanini level crossings as part of the base case for the Long Term Plan. Removal of these level crossings would mean that, apart from a couple of pedestrian level crossings, the entirety of the Eastern Line and the Southern Line through to Papakura is grade separated.

The CBT would like to see an unfunded line item in the Long Term Plan for the further removal of level crossings penciled in for the period 2027-2034. Grade separation of level crossings beyond the Takanini level crossings is something which would need to be spread over numerous iterations of the Long Term Plan. By including the unfunded line item, this would show Council's indication to progress level crossing removal work post the opening of the City Rail Link rather than be completely silent on the matter.

We understand the signaling system on the Western Line is partly designed around the presence of level crossings and that even with the City Rail Link open, the practical capacity of the Western Line would be limited to 7 trains per hour per direction. Assuming this is true, it would mean the full potential of the City Rail Link is not realized.

If any grade separation projects are to be given priority, the CBT considers the following three are of particular importance:

- Morningside Drive
- Woodward Road
- Metcalfe Road

Morningside Drive is a key arterial route and is used by a frequent bus service (Route 22). If grade separation of this road is not advanced in the near future, then gridlock will ensue.

Woodward Road is an extension of the crosstown Richardson Road route and is busy throughout the day. It also acts as a bypass of the Mount Albert town centre. Grade separation of this road would help encourage traffic away from the Mount Albert town centre and could enable improvements to be made in that area.

Metcalfe Road is a road which connects the newer development to the south of the Western Line with Ranui village, as well as being a major connector for people travelling to Westgate and the Northwestern Motorway via Universal Drive. Metcalfe Road is also the route of a connector bus service, specifically the 145 route.

Points of Support

The CBT wishes to offer some bouquets around some of the proposals. Proposals we favour include:

- Enable payment for standard adult public transport fares with Apple and Google Pay, debit cards and most credit cards in addition to the current HOP card, and transition to the National Ticketing Solution
- Support the CRL with the expansion of the electric train fleet and removal of the level crossings required for day one operation

- Investment in cycling will be focused on completing existing projects and delivering lower cost cycleways
- Develop a 'time-of-use' pricing scheme to help manage traffic congestion

The National Ticketing Solution will enable people from throughout New Zealand and around the world to use Auckland's public transport with ease. The CBT supports cycling improvements, and agrees that the focus should be on completing existing projects and ensuring that future cycleway projects represent good value for ratepayer money.

Our support of the 'time-of-use' pricing scheme comes with a caveat. Auckland's public transport system must be back to 2010s levels of reliability before this is rolled out. At the moment, the public transport system – and in particular the rail system – faces too much disruption and there is a risk that a 'time-of-use' pricing scheme will face hostility from people who choose to drive because they don't want to face the uncertainty (and potential consequence) of being late to work because the train services are stopping short.

Points of Concern

The CBT has three main areas of concern:

The first area of concern is the proposal to remove or reduce lower performing bus services. While we are comfortable with reducing bus service where level of service is currently above minimum acceptable levels¹, we are concerned this could be used to reduce the quality of bus service. This has happened in the recent past, an example being bus service in South Auckland being reduced in 2017 and again in 2018, with evening services often being hourly. A reduction in service would discourage people from using the service, thus reducing patronage and creating a downward spiral.

Our second area of concern is delaying paying the full requested increase in KiwiRail track maintenance costs. We fear this would simply create animosity between Auckland Council and KiwiRail and that rail commuters would be the ones bearing the consequence of this animosity as further speed restrictions are implemented, resulting in longer journey times.

The CBT is firmly opposed to the Maungakiekie-Tamaki's board proposal to "remove the Onehunga KiwiRail designation for the Avondale Southdown connection to give certainty that there will not be significant disruption of the Onehunga community through this designation". The CBT considers it imperative that the existing Avondale Southdown railway designation is maintained as this route will be needed to enable freight to bypass the inner suburbs. Alternate routes cannot be used by freight trains which need shallower gradients than passenger trains.

The Port

The CBT believes an opportunity may arise from the shifting of ownership of Captain Cook and Marsden Wharves to rearrange the operation of cruise vessels in Auckland. At the moment, when cruise vessels dock at Princes Wharf, this causes disruption to ferry services when those vessels leave port. To make things worse, it is often at the height of the afternoon rush hour that cruise vessels are leaving – meaning people wanting to get home find their day disrupted.

¹ The CBT defines minimum acceptable service as a service every 15 minutes.

Trains to Huapai

The CBT wishes to express disappointment about the lack of progress on trains to Huapai. This is a low cost proposal that would provide a better quality public transport service to the people of Huapai and Kumeu now, rather than those people needing to potentially wait a decade for a busway connection.

Alternative Sources of Funding

When presenting to Council, the question was raised about the CBT's views on alternative sources of funding. We offer our comments on this question, whilst acknowledging it was not specifically noted in the Long term Plan.

There are two alternative sources of funding that we think Council should lobby government on.

The first alternative source of funding involves government providing some of the GST revenue. The two leading alternatives are either a share of the GST revenue on property development or the full share of GST arising on rates paid to Council². With respect of the former, most of the capital costs faced by Council are the result of population growth and the fact the only source of revenue Council can get from such developments is in the form of development contributions is concerning. Accessing some of the GST arising on property development would not only provide a deeper pool of funds but would provide incentive for further urban development. With respect of the latter, it would provide a more consistent revenue stream and would counteract the argument that GST on rates is a tax on a tax.

The second alternative source of funding is a betterment tax which would see land values from infrastructure improvements being taxed and that revenue earmarked to repaying the costs of those infrastructure improvements. This has a precedent in the form of a little-known section of the Income Tax Act 2007³.

If you have any queries about the submission, please contact me at convenor@bettertransport.org.nz.

Yours faithfully

The Campaign for Better Transport Incorporated

Convenor

² The share of GST revenue on property development proposal has support from the ACT Party, while the full share of GST arising on rates paid to Council has support from the Future for Local Government Review

³ Section CB 14 of the Income Tax Act 2007 treats gains from the disposal of land within 10 years as taxable where that gain resulted from planning changes

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do less
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

If I could pay for more if I wasn't living on a really bad wage and having to pay more for everything living food etc

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#15020

why do we have to pay for parking when we live in our own street, cycle lane hardly anyone uses it

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

cut out cycleways, we see more traffic jam than before, easier transport especially for my grandma who doesn't have a car

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

useless spending a lot of money on pieces of art when it can go elsewhere like in our schools and housing

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

I like the idea of the community using it more

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

#15020

why can't we keep it here, soon NZ won't belong to us kiwis. Don't - why does everything have to go to outsiders, why can't we make rich and the poor poorer

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

I would like to see our future secure not by overseas people by us, why can't we have a chance

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

Better parks better bus stop shelters and bigger, one can only fit 4 people in a shelter and you don't stay dry in winter

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

leave it

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

#15020

Tell us why:

keep it the same

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Franklin Local Board Paths Targeted Rate - Do not Support

Local board priorities

7a. Which local board area does your feedback relate to?

Franklin

Franklin Local Board Priorities

7b. What do you think of our proposed priorities for Franklin in 2024/2025?

I support most priorities

More specifically, what do you think of each priority we've listed above?

Develop fit for purpose facilities and respond to growth challenges through projects like the Clevedon Village Heart programme, 'Belmont' Sports Park development and the Unlock Pukekohe programme.	
Fund three-year Strategic Community Partnerships with local organisations that are willing to and capable of delivering social, environmental, cultural and economic outcomes in line with the local board plan and support to these organisations to deliver.	
Support environmental and cultural restoration programmes in partnership with Iwi including Te Kete Rukuruku (place naming) and Te Korowai Papatuaanuku (environmental restoration).	

#15081

Develop “Franklin Community Occupancy Guidelines” to inform decisions on council-owned facility leases, including leasing charges.	
Find ways to reduce Franklin’s maintenance costs e.g. by replacing lawn with eco-sourced native trees and reducing or relocating public rubbish bins.	
Progress the development and delivery of the Franklin Paths Programme.	
Deliver a refreshed approach to enabling young people in Franklin to access services and participate in their communities.	
Progress a Pukekohe Cemetery memorial project that acknowledges the unmarked graves at the site.	

Tell us why

7c. What do you think of the Franklin proposed priorities for the 10-year budget 2024-2034?

Do you have any additional thoughts on the proposed Franklin Paths Targeted Rate?

As our local board area is so large, please tell us where you live so we can better understand the views from different communities

8. Do you have any other comments?

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

Coastguard Auckland is pleased to submit the following feedback on the Auckland's waterfront port land <https://akhaveyoursay.aucklandcouncil.govt.nz/auckland-s-waterfront-port-land>

The Auckland Marine Rescue Centre (AMRC) is situated at the eastern end of the port. It is the purpose-built base of operations for marine rescue in the Auckland Region and fulfils an important national role.

Coastguard Auckland operates from the AMRC alongside Coastguard New Zealand Comms Centre, Northern Region Surf-Lifesaving, Maritime Police and the Harbourmaster.

Coastguard Auckland does not have a position on future models of operation of the port, however, of great importance to our operational unit is the need for Auckland Council and any future operator of Auckland Port to work in partnership with

#15098

Coastguard Auckland and the AMRC Trust to ensure that Coastguard Auckland and our partner agencies at the AMRC can continue to operate successfully from this unique facility.

Of importance to the effective provision of marine safety services for Auckland residents and visitors will be the ability for the AMRC Trust and its tenants to adapt the AMRC and its surrounding area to meet future business needs with the support of any future port operator, including security of tenure and funding.

In its decision-making and subsequent development and execution of its port strategy, Auckland Council is asked to ensure that the future operation of marine management and rescue organisations at the AMRC is explicitly safeguarded.

Many thanks for the opportunity to “have our say”. We of course remain at your disposal for any additional information you may need.

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

more changes and activities around port for children

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

as above

6a. What do you think of these proposals?

#15104

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	

#15104

Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	Support

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

2a. Is there anything you would spend more on?

Cultural and sporting events

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

not on north shore

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

move AIAL shares for the public is a good thing

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

#15125

the current operation of the port needs to be changed, lease to other parties will bring in a diverse range of other uses at the port

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

funds for council services are necessary

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

give ngati whatua their land back

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

needs change

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

necessary port operational area

6a. What do you think of these proposals?

#15125

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. Local board priorities

7a. Which local board area does your feedback relate to?

Papakura

Papakura Local Board Priorities

7b. What do you think of our proposed priorities for Papakura in 2024/2025?

I support all priorities

More specifically, what do you think of each priority we've listed above?

<p>We know you value the community being brought together through free events which we will continue to support including the Anzac day events. This is particularly special to our area given the strong military history in Papakura.</p>	
<p>We will continue to support Māori-led initiatives and aspirations with Mātauranga Māori (Māori knowledge), including the Māori Wardens. We also are pleased to partner with mana whenua in the delivery of Te Kete Rukuruku project which is the dual naming and storytelling of our parks and reserves.</p>	
<p>We have recently been working on enhancements to the Te Koiwi Reserve pond and are looking at further work that can be done in this area.</p>	
<p>We will continue to support the Takanini Business Association in their Business Improvement District (BID) establishment.</p>	

#15243

Papakura has a talented and culturally rich community, and we will continue to showcase this through the community arts programme.

Tell us why

7c. What do you think of the Papakura proposed priorities for the 10-year budget 2024-2034?

8. Do you have any other comments?

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do more
Environment and regulation	Do more
Parks and Community	Do more
Economic and cultural development	Do more
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Paying more will benefit all to get out of poverty

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

just less of a focus on economic growth at the moment

#15246

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

I fully support as it'll be good for the environment

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

No need to waste money by starting from scratch

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and lease the operation of the port for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund

Tell us here:

As long as our Pacifica's working there are not affected

#15246

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.

Support

#15246

<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	Support
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	Support
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	Support

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The three options (central, more, & less) proposed in the consultation are not the only options, the same goes for the corresponding rates rises. For example, we could get much-needed investment in transport services and climate resilience, as stated under the 'pay more get more' option, with a rate rise of less than 14% in year one. There are

#15320

other areas where savings could be made which are not interdependent. The 'overall direction' oversimplifies very complex decisions.

We must prioritise looking after our people and planet by investing in the things that provide us with life's essentials, such as fresh air, clean drinking water, hazard resilient landscapes and basic needs, like accessible transport and a sustainable waste network. Accounting for progress based on GDP and financial metrics alone are inadequate indicators of the sustainability of our quality of life

Where I'd like Auckland Council to do/spend more

- Public Transport - Ensure public transport is affordable, accessible, and reliable, prioritising investment in public transport infrastructure over road spending.
- Active Transport - Urgently transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.
- Water Quality - Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.
- Environment and Regulation - Ensure appropriate funding is allocated to increase monitoring activity of current/active and future resource consents to enable better environmental outcomes.

As well as the options provided in the structured consultation, I would also like the Council to do more of the following:

- Protecting and working with communities by continuing to prioritise the funding and delivery of Making Space for Water in partnership with Central Government.
- Ensuring adequate support for community and social services, including contestable grants (such as the Climate Action Grant), the Live Lightly programme, the Communities in Need programme, and supporting work on Council land and marae. This can be achieved by re-establishing pre-2023/2024 budget funding for these areas.
- Supporting frontline, volunteer powered communities by ensuring local boards are adequately funded and grants are available. Grants and investment into community-led services provide great value to Aucklanders. For every dollar that Council invests we get back many more volunteer hours.
- Supporting moves to a circular economy and zero waste, ensuring waste materials are seen as resources to be reused, repaired, repurposed and recycled, and are diverted from landfill.

#15320

- Lowering emissions by becoming a leader in localised renewable energy generation by enabling local integrated energy solutions to support community owned energy groups.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

2a. Is there anything you would spend more on?

I want Auckland Council to spend more on safe, accessible, and attractive active transport infrastructure such as cycleways.

I want Auckland Council to spend more on ensuring public transport is affordable, accessible, and reliable.

I want Auckland Council to spend less on new roading projects that prioritise private vehicles as the primary transport mode.

Auckland Council's Transport Emissions Reduction Pathway sets out actions required to reduce the region's transport emissions by 64% by the year 2030. Transport is the biggest emitter contributing to over 40% of the region's total emissions. Within the transport emissions, 86% come from road transport. This sets a clear directive. We need to get people out of private cars, into buses, trains and ferries and onto cycleways. Failing to understand and action this will result in a continuation of over investment in roading projects and underinvestment in the public and active transport networks. The evidence is there and the evidence is clear.

Regarding the Mayoral proposal, I am encouraged to see initiatives to make public transport more accessible, such as the \$50 weekly cap and introduction of diverse payment options. Another positive is the work programmes which look to improve public transport services, such as network optimisation, expansion of the electric train fleet and completion of the City Rail Link. Here in Warkworth we are investing wisely in building up access to our newly commissioned park and ride facility. Unfortunately, alongside these positives, there are some concerns. A couple of examples are; the

#15320

removal of 'low performing' bus services, and the several references to roading focused projects.

As well as continuing to invest and improve our public transport network, it is essential that the Council urgently supports the transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Cutting "low-value initiatives, including raised pedestrian crossings and expensive gold-plated cycleways" is an ideological move underpinned by a misinformation campaign (grossly inflating the supposed cost of crossings etc) that fails to align with the Council's own Transport Emissions Reduction Pathway. In monetary terms, this means cutting funding for cycleways by \$141.5 million. This makes no sense as we know increasing funding for active transport infrastructure is a smart investment that can benefit the economy, the environment, and public health. Cycling is a low-cost, low-carbon and low-impact mode of transport that can reduce congestion, pollution, and greenhouse gas emissions. Cycling also promotes daily, incidental physical activity, mental wellbeing and social inclusion. By improving the safety, accessibility and attractiveness of walking and cycling, more people will be encouraged to choose it as a regular means of travel, creating a virtuous cycle of benefits. This approach also creates better use of existing roading assets by making space for those who cannot choose cycling, walking or public transport.

#15320

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

Rodney

Rodney Local Board Priorities

7b. What do you think of our proposed priorities for Rodney in 2024/2025?

More specifically, what do you think of each priority we've listed above?

Deliver new and/or improved playground and play spaces in Goodall Reserve, Te Hana Reserve, Rautawhiri Park and Riverhead War Memorial Park.	
Support communities to develop local community emergency leadership groups and emergency action planning in response to the findings of the Emergency Response Assessment study being undertaken in 2023/2024.	
Provide additional activities and programmes for children and young people maximising the use of our libraries, halls and open spaces, where possible.	
Continue to support our local arts centres in Helensville and Kumeu and look to extend arts experiences to other parts of Rodney.	
Continue to support community groups and mana whenua to keep our waterways clean and healthy and restore biodiversity.	

#15320

Support the community to minimise waste, turn it into resources, and promote education on waste reduction.	
Develop and refurbish toilet facilities in Glasgow Park, Dinning Road Esplanade Reserve and Port Albert Recreation Reserve.	
Develop pathway connections in Green Road Park.	

Tell us why

7c. What do you think of the Rodney proposed priorities for the 10-year budget 2024-2034?

I support the following local board priorities (other):

- Funding and support for community driven environmental work (e.g., habitat restoration, plant and animal pest control).
- Funding and support for community groups that focus on climate action (e.g., waste, active transport, education, etc).
- Growth of active transport networks such as cycleways and walkways.
- Establishment and development of green corridors.
- Development and implementation of Climate Action Plans.
- Circular economy strategies and actions.

Grants and investment into community services provide great value to Aucklanders and the Rodney Local Board's prioritisation of and commitment to supporting these services has been highly appreciated and acknowledged to date. For every dollar that the council invests we get back many more volunteer hours both at the "doing" and management levels. Many boards invest a significant amount into support for local community conservation to protect taonga species or landscapes to excellent effect. Efforts like these are important for both nature and communities, enabling and empowering residents to take action for themselves, increasing ownership of our environmental challenges across the community, resulting in more long-term sustainability for conservation activity.

#15320

As our local board area is so large, please tell us where you live so we can better understand the views from different communities

8. Do you have any other comments?

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#15348

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	As proposed
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Government is not in a position to do more for our Pasifika communities so what do we trust in paying more?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#15361

paying less for our \$\$ to not get more # needs to be for our Tamariki needs.

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

only part I agree with- other countries are far ahead of us.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

Why?? This not relevant to all of Auckland.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

#15361

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

No change – leave Captain Cook and Marsden wharves to be managed as part of the port operations

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Transfer Bledisloe Terminal to council to be used for something else, that provides public benefit, within 15 years

Tell us why:

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Long-term Plan 2024-2034

Note: this simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	As proposed
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

less taxes, support other organization

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

#15431

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

because it would be easier

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

I don't know

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

not really knowledged

#15431

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

its fine right now just continue

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

not really, do your thang!

5a. What option do you prefer for Captain Cook and Marsden wharves?

I don't know

Tell us why:

doesnt really relate to me, keep as is

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

dont really know the area

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This

Support

#15431

increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	Support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	I don't know
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	Support

#15431

Increase the **Waitākere Rural Sewerage Targeted Rate** from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Auckland Council Long Term Plan 2024-2034

1. Summary

- 1.1 Property Council New Zealand Auckland Region (“Property Council”) welcomes the opportunity to submit on [Auckland Council’s draft Long Term Plan 2024-2034](#) (“Long Term Plan”). It is vital that Auckland Council implements a Long-Term Plan that is financially responsible whilst continuing to invest in the critical services that Auckland needs.
- 1.2 Property Council broadly supports most of the direction set out in Auckland Council’s ‘Central Proposal’, with some exceptions. We believe that overall, this proposal strikes the appropriate balance between investment in Auckland’s future, and continued affordability for ratepayers.
- 1.3 However, we are extremely concerned that the proposed discontinuation of the Long Term Differential Strategy (“LTDS”) will deliver significant harm to the business community in Auckland. We strongly oppose the proposed discontinuation of the LTDS and urge Auckland Council to recommit implementing the LTDS as planned, or to a temporary pause of the LTDS until the financial situation improves, to ensure fair and equitable treatment for business ratepayers across the city.

2. Recommendations

- 2.1 At a high level, we recommend that Auckland Council:
 - Adopts the ‘Central Proposal’, with the exception of considering further co-investment in public transport alongside central government;
 - In the first instance, recommit to implementing the LTDS as previously planned, or in the second instance, a temporary pause of the LTDS until the financial situation improves;
 - Investigates the use of alternative funding and financing tools for infrastructure;
 - Does not increase the differential on targeted rates;
 - Explores alternative funding and financing for water infrastructure; and
 - Allocate appropriate funding to improve resourcing and processes within the consenting team, in order to meet expected increases in consenting volumes.

3. Introduction

- 3.1. Property Council is the leading not-for-profit advocate for New Zealand’s most significant industry, property. Our organisational purpose is, “Together, shaping cities where communities thrive”.
- 3.2. The property sector shapes New Zealand’s social, economic and environmental fabric. Property Council advocates for the creation and retention of a well-designed, functional and sustainable built environment, in order to contribute to the overall prosperity and well-being of New Zealand.

- 3.3. Property is Auckland's largest industry. Property provides a direct contribution to Auckland's GDP of \$12 billion (12 percent) and employment for 71,940 Auckland residents.
- 3.4. Property Council is the collective voice of the property industry. We connect property professionals and represent the interests of 398 Auckland based member companies across the private, public and charitable sectors.
- 3.5. This document provides Property Council's submission on [Auckland Council's draft Long Term Plan 2024-2034](#). Comments and recommendations are provided on issues relevant to Property Council's members.

4. Strategic direction for Auckland

- 4.1. Auckland Council is consulting on three general options for Auckland's strategic direction and operational/capital investment program. These are the 'Central Proposal' (which is favoured by Auckland Council), 'Pay Less, Get Less' and 'Pay More, Get More'.
- 4.2. Property Council is broadly supportive of the direction set out in Auckland Council's 'Central Proposal'. We support various elements of this proposal and acknowledge that there is upward pressure on rates due to interest rates and inflation. There are also areas where we see scope for an alternative approach to be taken by Auckland Council (such as transport investment or water infrastructure).
- 4.3. In our view, the 'Pay Less, Get Less' option would starve Auckland of critical infrastructure investment and public services, whereas the 'Pay More, Get More' would result in significant affordability challenges across the city, at a time that the cost of doing business is rising steeply and interest rate as well as inflation pressures are affecting all ratepayers.
- 4.4. We recommend that Auckland Council adopt the 'Central Proposal' as Auckland's Long Term Plan, with the exception of considering further co-investment in public transport alongside central government. We believe this will strike the appropriate balance of investment in Auckland's infrastructure and improving public transport.

5. Rating Differentials

- 5.1. Property Council is extremely concerned to see that Auckland Council has proposed to discontinue the LTDS, leaving the commercial sector's share of rates at around 31% and walk away from their longstanding commitment to reduce rating differentials overtime.
- 5.2. The use of rating differentials has been consistently opposed by Property Council. Rating differentials are an inequitable approach to generating revenue. Rating differentials are collected as general rates, leaving businesses unable to identify where the additional funds raised by differentials are spent. This leads to significant concerns regarding a lack of transparency.
- 5.3. Our position on transparency is consistent with the 2019 New Zealand Productivity Commission report on local government funding and financing¹ which found that: "councils rating practices are too often not transparent." The report recommends councils should make better and more transparent use of their rating and other funding tools.

¹ Local government funding and financing. Retrieved from <https://www.productivity.govt.nz/inquiries/local-government-funding-and-financing/>

- 5.4. Auckland Council's existing Revenue and Finance Policy makes clear that the commercial sector pays too high of proportion of the total rates take and acknowledges that high rating differentials hamper economic development across the city. As it stands, the commercial sector contributes around 31 per cent of the total rates take and Auckland Council had previously committed to gradually lowering this to 25.8 per cent through the LTDS.
- 5.5. Prior to the last year's pause of the LTDS, it was being implemented on an elongated timeline. Property Council members have supported the gradual reduction of rating differentials. This is because it provides certainty to the commercial sector that inequities within the rating system were being addressed overtime. Discontinuing the LTDS not only has a financial impact on the property sector, but also negatively impacts the sectors confidence to invest across Auckland in new developments.
- 5.6. In the first instance, Property Council recommends that Auckland Council recommit to implementing the LTDS as planned. In the second instance, if Auckland Council is unwilling to recommit to the LTDS for this financial year, we recommend a temporary pause of the LTDS until the financial situation improves. For example, if City and Regional Deals unlock significant new funding avenues, there would likely be sufficient financial headroom next financial year to restore Auckland Council's commitment to the LTDS.

6. Alternative approaches to funding and financing

- 6.1. Property Council strongly supports the use of alternative funding and financing tools, such as targeted rates, public-private-partnerships, or Special Purpose Vehicles ("SPVs") as enabled under the Infrastructure Funding and Financing Act. We recommend that Auckland Council investigates the use of alternative funding and financing tools for infrastructure.
- 6.2. For example, SPVs are an important tool for funding and financing infrastructure in a fair and equitable manner. SPVs are advantageous as they sit off a Council's balance sheet and do not impact debt levels. Property Council has previously supported Tauranga City Council's use of SPVs for the Transport System Plan and Civic Precinct project, as well Wellington City Council's use of SPVs for the Moa Point sludge minimisation project.
- 6.3. As another example, there is also significant scope for private capital to complement existing public investment in infrastructure. There is growing demand for high-quality infrastructure investments across New Zealand and as such, increasing potential for Auckland Council to explore public-private-partnerships to unlock investment in critically needed infrastructure.
- 6.4. All these additional tools are transparent, beneficiary pays funding models for local government, that are more equitable to ratepayers and better meet the legislative principles of transparency and objectivity for funding local government set out in both the Local Government Act 2002 and Local Governing (Rating) Act 2002.

Role for central government funding

- 6.5. Given the significant scale of investment required in Auckland's infrastructure, and the funding constraints facing Auckland Council, there is a critical role for central government in helping fund new infrastructure across Auckland. Having greater financial support from central government will drive improved infrastructure outcomes across Auckland. This will help unlock Auckland as an exciting place to live, work, play and shop, as well an attractive destination for investment and development.
- 6.6. Property Council shares Auckland Council's view on this topic and strongly supports continued advocacy from Auckland Council to unlock additional co-investment from central government

in Auckland. This could be through mechanisms such as City and Regional Deals or other initiatives and revenue streams such as congestion pricing.

7. Targeted Rates

- 7.1. Property Council is broadly comfortable with Auckland Council's proposal to retain targeted rates to fund specific projects, such as the Climate Action Transport Targeted Rate or Water Quality Targeted Rate. Targeted rates are an important funding tool that enables infrastructure and public services to be funded in a transparent manner for ratepayers.

8. Transport

- 8.1. It is critical to improve Auckland's transport system, to ensure that people and freight can move around the city faster and more efficiently. Overall, the transport system in Auckland does not deliver the outcomes that should be expected in a major city. This has negative consequences across a range of areas such as city-wide productivity, transport emissions, and housing supply.
- 8.2. We are pleased to see that Auckland Council recognises the ongoing transport challenge, and the importance of sustainable investment in improving transport, in particular public transport. At a minimum, Property Council supports the 'Central Proposal' for transport. However, transport is an area where we see scope for further investment in the future. We also acknowledge the financial impact for Auckland Council in central government removing the regional fuel tax.
- 8.3. Unlocking improved transport outcomes in Auckland is critical for improving our cities economic productivity, which is currently dampened by time lost because of congestion. Improved transport will also support greater housing supply through enabling urban intensification. Being strategic around the placement of future public transport and connecting improved transport solutions to existing and new housing is critical to increase productivity across Auckland.
- 8.4. We recommend that Auckland Council consider further co-investment in transport alongside central government. Future investment in transport could be funded through co-investment with central government through mechanisms like City and Regional Deals or the use of alternative funding and financing tools. Our position on alternative funding and financing tools is discussed earlier in this submission.

9. Water

- 9.1. Property Council broadly supports the direction set out in the Central Proposal for water. We acknowledge that there is significant capital investment in water infrastructure required across Auckland. However, we are concerned about the significant escalation in water growth charges. Higher water growth changes will have financial impact on new housing developments and represent an additional cost at a time of cumulative cost pressure on the development sector.
- 9.2. Where possible, we recommend exploring the use of alternative funding and financing tools for water infrastructure. This will help alleviate the financial pressure on new developments and contribute towards Auckland reaching its housing supply and affordability ambitions.

10. Development Contributions

- 10.1. Property Council acknowledges that Auckland Council's Development Contribution policy will be updated separately from the Long Term Plan and informed by final decisions on the capital programme.

- 10.2. Property Council has longstanding concerns regarding the 30-year collection timeframe and significantly increased development contribution fees that was introduced in Drury and is planned for implementation in other Investment Priority Areas (Mt Roskill, Tāmaki, Mangere, Northcote, Oranga, CRL stations, Inner Northwest).
- 10.3. Our members can offer substantial assistance with this work through feedback on the draft Development Contributions Policy. We look forward to future engagement with Auckland Council on this matter.

11. Consenting Process

- 11.1. Property Council would like to make a general comment on consents. We have a longstanding desire to see improved consenting processes across Auckland. While we appreciate the constraints facing Auckland Council in this space, time delays for consents (as well as other matters such as traffic permits) have too often been a significant barrier to development in Auckland.
- 11.2. With the decline in the residential property market, our Auckland based members have noticed very recent improvements to wait time for resource consents. However, on 13 March 2024, we surveyed 155 Property Council members on the question of "For you or your customer's most recent project, how long did it take to obtain Resource Consent?" The top response for 30% of people was four to six months. This was followed by 28% of responses reporting more than twelve months for resource consent.
- 11.3. It is critical that Auckland Council work towards reducing wait times, particularly when the market returns to strength. Property Council recommends that in the Long Term Plan Auckland Council allocate appropriate funding to improve resourcing and processes within the consenting team, to meet expected increases in consenting volumes. We look forward to continued engagement with the regulatory services team on this and other topics.

12. Other Matters

Economic and Cultural Development

- 12.1. Property Council supports a leadership role for Auckland Council in developing and implementing a clear strategy to support the cities economic and cultural development. There is an important role for cultural and recreational infrastructure to support our cities economic development. Furthermore, events are critical driver of economic growth across Auckland, providing opportunities for local employers and communities. Collectively, these enhance Auckland as a desirable destination to live, work, play and shop, while also improving the business environment across the city.

Local Purpose Reserves

- 12.2. Property Council notes the ongoing importance of continued funding for local purpose reserves, that have been agreed to through granted resource consents. Ensuring Local Boards have sufficient funding for this in the Long Term Plan is critical to delivering a quality open space network for Aucklanders.

Auckland Unitary Plan review

- 12.3. Property Council notes that the Auckland Unitary Plan review is currently scheduled for 2026. When further information is available, the development community would appreciate timely updates as to the program and scope for this work. This will in part inform planning and investment decisions by the private sector.

13. Conclusion

- 13.1. Property Council broadly supports most of the direction set out in the 'Central Proposal', with some exceptions. However, we strongly oppose the proposed discontinuation of the LTDS. We urge Auckland Council to recommit implementing the LTDS as planned, or to a temporary pause of the LTDS until the financial situation improves, to ensure fair and equitable treatment for business ratepayers across the city.
- 13.2. Property Council members invest, own, and develop property in Auckland. We wish to thank Auckland Council for the opportunity to submit on [Auckland Council's draft Long Term Plan 2024-2034](#) as this gives our members a chance to have their say in the future of our city.
- 13.3. Any further enquires do not hesitate to contact Logan Rainey, Advocacy Advisor, via email: Logan@propertynz.co.nz or cell: 021410787.

Yours Sincerely,

Auckland Committee Chair

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#15458

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

#15493

Thank you for the opportunity to submit, so that together we can achieve sound environmental, biosecurity, economic, food sovereignty, and cultural outcomes...with council prioritizing truly sustainable integrated management.

Who we are:

Our community group works constructively with all Northland territorial authorities, the Northland Regional Council, Tai Tokerau and Tāmaki Makaurau mana whenua, Northland Conservation Board, Northland/ Auckland primary producers, and various other organisations as well as Landcare groups to protect our existing valuable GE/GMO free status...to protect our biosecurity, unique biodiversity, wider environment, conventional, IPM and organic primary producers, our economy, food sovereignty, cultural values, growing organic sector (including certified Maori organic produce/ Hua Parakore), and the public health from the risks/ adverse impacts of outdoor use of GMOs.

Submission to the Auckland Council 2024-34 Plan

Our submission focuses on the important GE/GMOs issue (GMOs = Genetically Modified Organisms), due to our commitment to our members, who include many farmers/ primary producers/ home gardeners/ seed savers, and our biosecurity/ wider environment. GMOs include controversial and risky CRISPR/gene edited organisms.

We oppose any outdoor use of risky and controversial gene edited organisms (CRISPR) or "gene drive" (a sterility technique that presents grave risks to NZ's biosecurity, indigenous biodiversity, and wider environment). While we strongly support council addressing climate change, the use of such risky new genetic technologies would be counter productive and potentially create far more serious problems than it solves.

We thank Auckland Council for its innovative work to date on this important issue, as a full member of the Northland/ Auckland "Inter Council Working Party on GMO Risk Evaluation & Management Options".

Auckland has shown true leadership and worked closely with all the councils of Northland, in a collaborative and fiscally responsible manner, responding to the

-concerns of local farmers & other ratepayers/ residents in Auckland region including mana whenua

-risks of outdoor GE/GMO experiments/ field trials and releases

-to complement the Hazardous Substances and New Organisms (HSNO) Act with additional local protections

#15493

-to protect our growing organic sector and cultural values

1) The 10 Year Plan needs to mention the precautionary and prohibitive GE/GMO provisions contained in the operative Auckland Unitary Plan

(2) The 10 Year Plan needs to include funding for Auckland Council to participate and defend the interests of local communities in response to proposed government changes to regulation of genetic engineering / GMOs.

3) A budget of \$80,000 per year for the next 5 years is needed/ the minimum needed to enable Auckland Council to have a voice on behalf of Aucklanders on the direction of new legislation, emerging threats and remedies to protect ratepayers from adverse effects.

4) Cost-sharing and collaboration with other councils has enabled protection of local interests to date. Cost-effective collaboration with other councils will maximise the value of this budget. Issues and remedies may include strict liability, mandatory commercial insurance and other measures previously explored collaboratively with other councils (all the other member councils of the ICWP on GMOs"

See

Whangarei District Council GENETIC ENGINEERING REVIEW

<https://www.wdc.govt.nz/Council/Council-documents/Reports/Genetic-Engineering-Review>

5) The operative Auckland Unitary Plan has protections for the local interest in management of GMOs. These must be defended against detrimental impacts on ratepayers from proposed changes in central government policy (any weakening of the HSNO Act).

<https://www.aucklandcouncil.govt.nz/plans-projects-policies-reports-bylaws/our-plans-strategies/unitary-plan/history-unitary-plan/documentssection32reportproposedaup/2-49-genetically-modified-organisms-v2-2013-09-09.pdf>

6) Proposed legislative changes (to weaken regulation for outdoor GE/GMO experiments, field trials, etc) that the current Government is advocating means there is likely to be a significant expansion of financial, economic and environmental risk and ongoing exposure of Council and ratepayers to future costs.

"National will end ban on GE and GM to benefit NZ"

Plans by irresponsible parties (including overseas multinational companies) to develop GE/GMO grasses, trees or animals (without being held liable for unintended/unforeseen adverse impacts of EPA approved activities) are ill-advised and of particular concern .

#15493

Such new organisms would be impossible to prevent from contaminating our existing GMO free agriculture, horticulture, apiculture, forestry, as well as the wider environment/ finite resources like soils and waterways. Vectors for GE/GMO contamination including soils, water, wind, pollen, seeds, vegetative material, insects, animals, machinery, human error, extreme weather events including floods, etc.

To date proponents of these hazardous new technologies

- refuse to be personally and financially liable for unintended or unforeseen adverse impacts of an EPA approved outdoor GE/GMO experiment/field trial or release.

-are indifferent to the fact that under the Hazardous Substances and New Organisms (HSNO) Act there are inadequate liability provisions and no mandatory requirement for the EPA to take a precautionary approach to outdoor GE/GMO applications. I.e. they do not support/ actively oppose the concept of "the polluter shall pay" and the Precautionary Principle.

NZ is a signatory to the Cartagena Biosafety Protocol (the Precautionary Principle, as formulated in the Cartagena Protocol on Biosafety to the Convention on Biological Diversity, was based on the presumption that living modified organisms (LMOs or GMOs) were likely to have adverse effects on the environment and human health).

We thank council again for it's hard work addressing the risks of GE/GMOs to date.

7) The 10 year plan must provide funding for consideration and implementation of protections for farmers/ primary producers/ home gardeners/ seed savers and other ratepayers/residents (specifically regarding the GE/GMO issue).

We urge council to ensure that the new Plan funds Auckland Council participation in issues of Liability and delivery of protection of GE-free agriculture (conventional, IPM and organic) and the environment.

#15493

Gene Drive:

Our community group shares the concerns of many councils, environmental groups/ NGOs, organisations and Iwi/ hapu about the risks of "gene drive", a particularly dangerous type of sterility experimentation (in the case of possums, completely unsuitable and unethical, as the risks are huge and possums are indigenous just across the ditch in Australia).

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	Do more
City and local development	Do less
Environment and regulation	Do less
Parks and Community	As proposed
Economic and cultural development	Do less
Council support	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#15497

Support all of the proposal

Tell us why:

Transport is currently a weak point for AKL as an ever-growing urban area

2a. Is there anything you would spend more on?

Train railway

2b. Is there anything you would spend less on?

Cycling

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

I don't know

Tell us here:

#15497

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

I don't know

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual	Support

#15497

<p>programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	Support
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	Do not support
<p>Re-introduce recycling charges for schools.</p>	I don't know
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	I don't know
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	Do not support
<p>Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.</p>	Support
<p>Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.</p>	Do not support

#15497

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

Franklin

Franklin Local Board Priorities

7b. What do you think of our proposed priorities for Franklin in 2024/2025?

I do not support most priorities

More specifically, what do you think of each priority we've listed above?

Develop fit for purpose facilities and respond to growth challenges through projects like the Clevedon Village Heart programme, 'Belmont' Sports Park development and the Unlock Pukekohe programme.	
Fund three-year Strategic Community Partnerships with local organisations that are willing to and capable of delivering social, environmental, cultural and economic outcomes in line with the local board plan and support to these organisations to deliver.	
Support environmental and cultural restoration programmes in partnership with Iwi including Te Kete Rukuruku (place naming) and Te Korowai Papatuuuanuku (environmental restoration).	

#15497

Develop “Franklin Community Occupancy Guidelines” to inform decisions on council-owned facility leases, including leasing charges.	
Find ways to reduce Franklin’s maintenance costs e.g. by replacing lawn with eco-sourced native trees and reducing or relocating public rubbish bins.	
Progress the development and delivery of the Franklin Paths Programme.	
Deliver a refreshed approach to enabling young people in Franklin to access services and participate in their communities.	
Progress a Pukekohe Cemetery memorial project that acknowledges the unmarked graves at the site.	

Tell us why

7c. What do you think of the Franklin proposed priorities for the 10-year budget 2024-2034?

Do you have any additional thoughts on the proposed Franklin Paths Targeted Rate?

As our local board area is so large, please tell us where you live so we can better understand the views from different communities

8. Do you have any other comments?

#15533

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

5. Rating Differentials

5.1. Property Council is extremely concerned to see that Auckland Council has proposed to discontinue the LTDS, leaving the commercial sector's share of rates at around 31% and walk away from their longstanding commitment to reduce rating differentials overtime.

5.2. The use of rating differentials has been consistently opposed by Property Council. Rating differentials are an inequitable approach to generating revenue. Rating differentials are collected as general rates, leaving businesses unable to identify where the additional funds raised by differentials are spent. This leads to significant concerns regarding a lack of transparency.

5.3. Our position on transparency is consistent with the 2019 New Zealand Productivity Commission report on local government funding and financing¹ which found that: "councils rating practices are too often not transparent." The report recommends councils should make better and more transparent use of their rating and other funding tools.

5.4. Auckland Council's existing Revenue and Finance Policy makes clear that the commercial sector pays too high of proportion of the total rates take and acknowledges that high rating differentials hamper economic development across the city. As it stands, the commercial sector contributes around 31 per cent of the total rates take and Auckland Council had previously committed to gradually lowering this to 25.8 per cent through the LTDS.

5.5. Prior to the last year's pause of the LTDS, it was being implemented on an elongated timeline. Property Council members have supported the gradual reduction of rating differentials. This is because it provides certainty to the commercial sector that inequities within the rating system were being addressed overtime. Discontinuing the LTDS not only has a financial impact on the property sector, but also negatively impacts the sectors confidence to invest across Auckland in new developments.

5.6. In the first instance, Property Council recommends that Auckland Council recommit to implementing the LTDS as planned. In the second instance, if Auckland Council is unwilling to recommit to the LTDS for this financial year, we recommend a temporary pause of the LTDS until the financial situation improves. For example, if City and Regional Deals unlock significant new funding avenues, there would likely be sufficient financial headroom next financial year to restore Auckland Council's commitment to the LTDS.

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The council has tried to funnel people into this 'one or the other' decision making structure with the feedback on the last budget too. The three options (central, more, & less) proposed in the consultation are not the only options, the same goes for the corresponding rates rises. For example, we could get much-needed investment in transport services and climate resilience, as stated under the 'pay more get more'

#15567

option, with a rate rise of less than 14% in year one. There are other areas where savings could be made which are not interdependent. The 'overall direction' oversimplifies very complex decisions.

We must prioritise looking after our people and planet by investing in the things that provide us with life's essentials, such as fresh air, clean drinking water, hazard resilient landscapes and basic needs, like accessible transport options and a sustainable waste network.

Where I'd like Auckland Council to do/spend more:

- Public Transport - Ensure public transport is affordable, accessible, and reliable, prioritising investment in public transport infrastructure over road spending.
- Active Transport - Urgently transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure. Including:
 - Eke Panuku's redevelopment of town centres, which often includes making safe walking and cycling connections, as well as improving access for disabled people.
 - Improvements aligned with the Central Rail Link like the Karanga-a-hape station improvements project, which includes a protected cycleway along part of Pitt street & a pedestrian mall in Mercury Lane,
 - The Making Space for Water programme's inclusion of "blue-green corridors". These are walking and cycling paths through greenspaces and alongside streams, adding to our walking, cycling network while also creating a natural drainage area.
 - Auckland Climate Grants and the Live Lightly Programme which can fund community-led programmes to empower people to ride bikes for transport
 - More investment for local boards: enabling them to better deliver on local climate action plans and local transport priorities
- Water Quality - Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.
- Environment and Regulation - Ensure appropriate funding is allocated to increase monitoring activity of current/active and future resource consents to enable better environmental outcomes.

As well as the options provided in the structured consultation, I would also like the Council to do more of the following:

#15567

- Protecting and working with communities by continuing to prioritise the funding and delivery of Making Space for Water in partnership with Central Government.
- Ensuring adequate support for community and social services, including contestable grants (such as the Climate Action Grant), the Live Lightly programme, the Communities in Need programme, and supporting work on Council land and marae. This can be achieved by re-establishing pre-2023/2024 budget funding for these areas.
- Supporting frontline, volunteer-powered communities by ensuring local boards are adequately funded and grants are available. Grants and investment into community-led services provide great value to Aucklanders. For every dollar that Council invests we get back many more volunteer hours.
- Supporting moves to a circular economy and zero waste, ensuring waste materials are seen as resources to be reused, repaired, repurposed and recycled, and are diverted from landfill.
- Lowering emissions by becoming a leader in localised renewable energy generation by enabling local integrated energy solutions to support community owned energy groups.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

2a. Is there anything you would spend more on?

I want Auckland Council to spend more on safe, accessible, and attractive active transport infrastructure such as cycleways.

I want Auckland Council to spend more on ensuring public transport is affordable, accessible, and reliable.

I want Auckland Council to spend less on new roading projects that prioritise private vehicles as the primary transport mode.

#15567

Auckland Council's Transport Emissions Reduction Pathway sets out actions required to reduce the region's transport emissions by 64% by the year 2030. Transport is the biggest emitter contributing to over 40% of the region's total emissions. Within the transport emissions, 86% come from road transport. This sets a clear directive. We need to get people out of private cars, into buses, trains and ferries and onto cycleways. Failing to understand and action this will result in a continuation of over investment in roading projects and underinvestment in the public and active transport networks. The evidence is there and the evidence is clear.

Regarding the Mayoral proposal, I am encouraged to see initiatives to make public transport more accessible, such as the \$50 weekly cap and introduction of diverse payment options. Another positive is the work programmes which look to improve public transport services, such as network optimisation, expansion of the electric train fleet and completion of the City Rail Link. Unfortunately, alongside these positives, there are some concerns. A couple of examples are; the removal of 'low performing' bus services, and the several references to roading focused projects.

As well as continuing to invest and improve our public transport network, it is essential that the Council urgently supports the transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Cutting "low-value initiatives, including raised pedestrian crossings and expensive gold-plated cycleways" is an ideological move that fails to align with the Council's own Transport Emissions Reduction Pathway. In monetary terms, this means cutting funding for cycleways by \$141.5 million. This makes no sense as we know increasing funding for active transport infrastructure is a smart investment that can benefit the economy, the environment, and public health. Cycling is a low-cost, low-carbon and low-impact mode of transport that can reduce congestion, pollution, and greenhouse gas emissions. Cycling also promotes daily, incidental physical activity, mental wellbeing and social inclusion. By improving the safety, accessibility and attractiveness of walking and cycling, more people will be encouraged to choose it as a regular means of travel, creating a virtuous cycle of benefits. This approach also creates better use of existing roading assets by making space for those who cannot choose cycling, walking or public transport.

I would also like Auckland Council to advocate to Central Government and Waka Kotahi for a lane on the existing Harbour Bridge to be reallocated for walking, cycling and wheeling. The UN for Environment recommends 20% of our transport budgets are towards walking & cycling but Auckland Transport typically allocates under 1% of our transport budget on cycling - that is a massive under investment.

#15567

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

#15567

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	Other
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	Support
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by	Support

#15567

businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

I support all my local boards priorities particularly ones that:

- Fund and support community driven environmental work (e.g., habitat restoration, plant and animal pest control.)

#15567

- Fund and support community groups that focus on climate action (e.g., waste, active transport, education, etc).
- Grow active transport networks such as cycleways and walkways.
- Establish and develop green corridors.
- Develop and implement Climate Action Plans.
- Incorporate circular economy strategies and actions.

Grants and investment into community services provide great value to Aucklanders. For every dollar that the council invests we get back many more volunteer hours. Many local board plans stress their huge reliance on volunteers. Investment in community services is vital and creates resilience - something that we rely on in times of crisis, like the January 23 floods. Many boards invest a significant amount into support for local community conservation to protect taonga species or landscapes. Efforts like these are important for both nature and communities, enabling and empowering residents to take action for themselves, increasing ownership of our environmental challenges across the community, resulting in more long-term sustainability for conservation activity

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#15569

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	As proposed
City and local development	Do less
Environment and regulation	As proposed
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#15603

Support most of the proposal

Tell us why:

We support most of the central proposal for the transport plan including the focus on public transport, completing cycleways, and building low-cost cycleways, limiting raised tables and reviewing Auckland Transport's costs.

- Our recommendation is to consider shift workers in the design of services and routes, traditionally our public transport services are designed for 9-5 workers going in and out of the central city.

- We recommend that Auckland Council continue to provide support for Te Whau Pathway as part of the wider transport network.

- We recommend the time-of-use charge is implemented on motorway entrances where there are good public transport options to and from the central city e.g. From suburbs such as Northcote (Onewa entrance), Albany (Greville entrance), St Lukes (Western Springs entrance) and Remuera (Greenlane Road entrance) into the city centre. As these are areas where more higher income families live, they will be able to afford such charges and these charges should not impact the outer industrial areas where there are higher numbers of low income workers (West and South Auckland).

- Our recommendation is to invest in low-cost infrastructure that slows down cars and provides other benefits at the same time. Planting trees, artwork, sculptures, seating and planter boxes make places feel more inviting, create a sense of belonging (which means more people will be walking around) and makes roads feel narrow which slow cars down. Our insights from Henderson Intermediate and Waitākere College show that the raised tables put in as part of the Home and School Zone funding, have not slowed cars down and students wish to be part of placemaking to encourage more walking and cycling.

- Our recommendation is to consider community engagement costs when making savings on Auckland Transport's internal costs. Meaningful community engagement is crucial to the success of transport initiatives in community and must remain a key focus for Auckland Transport.

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	As proposed
City and local development	As proposed
Environment and regulation	Do more
Parks and Community	As proposed
Economic and cultural development	As proposed
Council support	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

no

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

no

#15629

2. What do you think of the transport proposal?

Support all of the proposal

Tell us why:

Public transports around Massey are never on time so I would like the Councils to do something about it

2a. Is there anything you would spend more on?

For better and cleaner buses

2b. Is there anything you would spend less on?

Traffic lights

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Tell us why:

If there is nothing wrong with the stadium or where it is there so shouldn't need to spend money on it.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

Tell us why:

not too sure or understand what this means.

#15629

4b. Which option do you prefer for the future of Port of Auckland?

I don't know

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

6a. What do you think of these proposals?

#15629

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The three options (central, more, & less) proposed in the consultation are not the only options, the same goes for the corresponding rates rises. For example, we could get much-needed investment in transport services and climate resilience, as stated under the 'pay more get more' option, with a rate rise of less than 14% in year one. There are

#15643

other areas where savings could be made which are not interdependent. The 'overall direction' oversimplifies very complex decisions.

I agree, I started this have your say form on the internet but I realise the issues are so complex I need a week to read the material on each question and come to the right conclusion. Also the pro's and con's can be worded in a way biased to the outcome Auckland council want to see. I was almost at the end of this have your say and stopped sending it. Complicated financial decisions to be made in the future is not something a rate payer with no experience in such area can have a say in. So this is why I have chosen this path to inform you of my views. I do understand they like to tell us that nothing comes for free and explain the rate increases needed in the current economic conditions. Point taken.

We must prioritise looking after our people and planet by investing in the things that provide us with life's essentials, such as fresh air, clean drinking water, hazard resilient landscapes and basic needs, like accessible transport and a sustainable waste network.

Where I'd like Auckland Council to do/spend more

- Public Transport - Ensure public transport is affordable, accessible, and reliable, prioritising investment in public transport infrastructure over road spending.
- Active Transport - Urgently transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.
- Water Quality - Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.
- Environment and Regulation - Ensure appropriate funding is allocated to increase monitoring activity of current/active and future resource consents to enable better environmental outcomes.

Yes, I agree with the above. Auckland council can work with the above and come up with a plan how to achieve this. As a rate payer I don't have all the ins and outs of problems and opportunities to make a decision on how to improve them. I leave that up to the council.

As well as the options provided in the structured consultation, I would also like the Council to do more of the following:

- Protecting and working with communities by continuing to prioritise the funding and delivery of Making Space for Water in partnership with Central Government.

#15643

- Ensuring adequate support for community and social services, including contestable grants (such as the Climate Action Grant), the Live Lightly programme, the Communities in Need programme, and supporting work on Council land and marae. This can be achieved by re-establishing pre-2023/2024 budget funding for these areas.
- Supporting frontline, volunteer powered communities by ensuring local boards are adequately funded and grants are available. Grants and investment into community-led services provide great value to Aucklanders. For every dollar that Council invests we get back many more volunteer hours.
- Supporting moves to a circular economy and zero waste, ensuring waste materials are seen as resources to be reused, repaired, repurposed and recycled, and are diverted from landfill.
- Lowering emissions by becoming a leader in localised renewable energy generation by enabling local integrated energy solutions to support community owned energy groups.

I agree with the above. I am a volunteer myself and spend hours doing pest control to give our native birds a fighting chance. Climate change feels like doom day in the making with the lack of incentives in this area. Recycling, renewable energy, lowering emissions is the way to go.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Auckland Council's Transport Emissions Reduction Pathway sets out actions required to reduce the region's transport emissions by 64% by the year 2030. Transport is the biggest emitter contributing to over 40% of the region's total emissions. Within the transport emissions, 86% come from road transport. This sets a clear directive. We need to get people out of private cars, into buses, trains and ferries and onto cycleways. Failing to understand and action this will result in a continuation of over investment in roading projects and underinvestment in the public and active transport networks. The evidence is there and the evidence is clear.

#15643

Regarding the Mayoral proposal, I am encouraged to see initiatives to make public transport more accessible, such as the \$50 weekly cap and introduction of diverse payment options. Another positive is the work programmes which look to improve public transport services, such as network optimisation, expansion of the electric train fleet and completion of the City Rail Link. Unfortunately, alongside these positives, there are some concerns. A couple of examples are; the removal of 'low performing' bus services, and the several references to roading focused projects.

As well as continuing to invest and improve our public transport network, it is essential that the Council urgently supports the transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Cutting "low-value initiatives, including raised pedestrian crossings and expensive gold-plated cycleways" is an ideological move that fails to align with the Council's own Transport Emissions Reduction Pathway. In monetary terms, this means cutting funding for cycleways by \$141.5 million. This makes no sense as we know increasing funding for active transport infrastructure is a smart investment that can benefit the economy, the environment, and public health. Cycling is a low-cost, low-carbon and low-impact mode of transport that can reduce congestion, pollution, and greenhouse gas emissions. Cycling also promotes daily, incidental physical activity, mental wellbeing and social inclusion. By improving the safety, accessibility and attractiveness of walking and cycling, more people will be encouraged to choose it as a regular means of travel, creating a virtuous cycle of benefits. This approach also creates better use of existing roading assets by making space for those who cannot choose cycling, walking or public transport.

Yes I agree with this. I would say go EV as soon as possible. Including, busses, trucks aeroplanes. Get these carbon emission down. Come up with ideas to get the ball rolling. Low emission communities I like. Paying more for carbon creating activities and less for carbon reducing activities would be a way to go. There must be a greener alternative available though. Cycle ways should be focused on major routes going to work. Business should promote cycling/e-bike to work. Having showers or give financial incentives.

2a. Is there anything you would spend more on?

I want Auckland Council to spend more on safe, accessible, and attractive active transport infrastructure such as cycleways.

#15643

I want Auckland Council to spend more on ensuring public transport is affordable, accessible, and reliable.

2b. Is there anything you would spend less on?

I want Auckland Council to spend less on new roading projects that prioritise private vehicles as the primary transport mode.

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#15643

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	<p>Support</p>
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	<p>Other</p>
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	<p>Support</p>
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.</p>	<p>Support</p>

#15643

We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	Do not support
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	Support
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Natural Environment Targeted Rate (NETR)

Re-establish the full funding of the Natural Environment Targeted Rate (NETR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.

Revenue gained from NETR affects the delivery of essential projects to protect our biodiversity and taonga species. For example, the rate funds kauri dieback track upgrades, treatment support for landowners with kauri dieback, monitoring of the health of our forests and education for visitors to prevent further spread of the disease and predator control on our islands and the mainland. This work supports the health of our environment, which we need to be healthy to keep humans healthy, by filtering our water, catching and intercepting rainfall, holding our soils and slopes together and cleaning our air. Having spent years with large parts of the track network closed to protect kauri it is important to ensure this work continues as planned to enable safe

#15643

access to our wild places, which are so important for our mental and physical health, and the health of our forests.

Yes, on all the above

Water Quality Targeted Rate (WQTR)

Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Local board priorities

I support the following local board priorities (other):

- Funding and support for community driven environmental work (e.g., habitat restoration, plant and animal pest control).
- Funding and support for community groups that focus on climate action (e.g., waste, active transport, education, etc).
- Growth of active transport networks such as cycleways and walkways.
- Establishment and development of green corridors.
- Development and implementation of Climate Action Plans.
- Circular economy strategies and actions.

Grants and investment into community services provide great value to Aucklanders. For every dollar that the council invests we get back many more volunteer hours. Many boards invest a significant amount into support for local community conservation to protect taonga species or landscapes. Efforts like these are important for both nature and communities, enabling and empowering residents to take action for themselves, increasing ownership of our environmental challenges across the community, resulting in more long-term sustainability for conservation activity.

Long-term Plan 2024-2034

Where I'd like Auckland Council to do/spend more

- Public Transport - Ensure public transport is affordable, accessible, and reliable, prioritising investment in public transport infrastructure over road spending.

#15684

- Active Transport - Urgently transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.
- Water Quality - Re-establish the full funding of the Water Quality Targeted Rate (WQTR) to pre-2023/2024 budget levels to ensure delivery and growth of related work programmes.
- Environment and Regulation - Ensure appropriate funding is allocated to increase monitoring activity of current/active and future resource consents to enable better environmental outcomes.

As well as the options provided in the structured consultation, I would also like the Council to do more of the following:

- Protecting and working with communities by continuing to prioritise the funding and delivery of Making Space for Water in partnership with Central Government.
- Ensuring adequate support for community and social services, including contestable grants (such as the Climate Action Grant), the Live Lightly programme, the Communities in Need programme, and supporting work on Council land and marae. This can be achieved by re-establishing pre-2023/2024 budget funding for these areas.
- Supporting frontline, volunteer powered communities by ensuring local boards are adequately funded and grants are available. Grants and investment into community-led services provide great value to Aucklanders. For every dollar that Council invests we get back many more volunteer hours.
- Supporting moves to a circular economy and zero waste, ensuring waste materials are seen as resources to be reused, repaired, repurposed and recycled, and are diverted from landfill.
- Lowering emissions by becoming a leader in localised renewable energy generation by enabling local integrated energy solutions to support community owned energy groups.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

#15684

Tell us why:

Auckland Council's Transport Emissions Reduction Pathway sets out actions required to reduce the region's transport emissions by 64% by the year 2030. Transport is the biggest emitter contributing to over 40% of the region's total emissions. Within the transport emissions, 86% come from road transport. This sets a clear directive. We need to get people out of private cars, into buses, trains and ferries and onto cycleways. Failing to understand and action this will result in a continuation of over investment in roading projects and underinvestment in the public and active transport networks. The evidence is there and the evidence is clear.

Regarding the Mayoral proposal, I am encouraged to see initiatives to make public transport more accessible, such as the \$50 weekly cap and introduction of diverse payment options. Another positive is the work programmes which look to improve public transport services, such as network optimisation, expansion of the electric train fleet and completion of the City Rail Link. Unfortunately, alongside these positives, there are some concerns. A couple of examples are; the removal of 'low performing' bus services, and the several references to roading focused projects.

As well as continuing to invest and improve our public transport network, it is essential that the Council urgently supports the transition towards low emissions communities by prioritising and increasing, not reducing, investment in walking and cycling infrastructure.

Cutting "low-value initiatives, including raised pedestrian crossings and expensive gold-plated cycleways" is an ideological move that fails to align with the Council's own Transport Emissions Reduction Pathway. In monetary terms, this means cutting funding for cycleways by \$141.5 million. This makes no sense as we know increasing funding for active transport infrastructure is a smart investment that can benefit the economy, the environment, and public health. Cycling is a low-cost, low-carbon and low-impact mode of transport that can reduce congestion, pollution, and greenhouse gas emissions. Cycling also promotes daily, incidental physical activity, mental wellbeing and social inclusion. By improving the safety, accessibility and attractiveness of walking and cycling, more people will be encouraged to choose it as a regular means of travel, creating a virtuous cycle of benefits. This approach also creates better use of existing roading assets by making space for those who cannot choose cycling, walking or public transport.

2a. Is there anything you would spend more on?

#15684

I want Auckland Council to spend more on safe, accessible, and attractive active transport infrastructure such as cycleways.

I want Auckland Council to spend more on ensuring public transport is affordable, accessible, and reliable.

2b. Is there anything you would spend less on?

I want Auckland Council to spend less on new roading projects that prioritise private vehicles as the primary transport mode.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Tell us why:

Since the data shows low attendance and utilisation in combination with high costs, it makes sense to re-evaluate and re-align the stadium's future and purpose with the needs of the community.

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

Tell us why:

The Auckland Airport is a natural asset and therefore should be retained at all costs to benefit all Aucklanders. Also, public money should not be managed through a private fund.

4b. Which option do you prefer for the future of Port of Auckland?

#15684

Retain underlying council ownership of port land and wharves, and continue council group operation of the port (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council

Tell us here:

As above, the port is a natural asset and therefore should be retained at all costs to benefit all Aucklanders.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Tell us here:

Council services are a public good and benefit all Aucklanders now.

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

5a. What option do you prefer for Captain Cook and Marsden wharves?

Proceed with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Keep Bledisloe Terminal as a Port of Auckland operational area

Tell us why:

#15684

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. <p>around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	
<p>Re-introduce recycling charges for schools.</p>	
<p>Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.</p>	
<p>Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.</p>	
<p>Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.</p>	
<p>Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025,</p>	

#15689

2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

#15700

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

We acknowledge that the Auckland council cannot afford the same level of activities and services without changing its financial settings or vice versa.

We note the three immediate priorities that must be addressed to manage the impacts of urgent water infrastructure needs, environmental damage in the Huaraki Gulf, and the loss of the regional fuel tax revenue.

#15700

We have considered your key questions on the direction you need to take 'Do we raise more rates and increase our ability to invest in infrastructure and services for Auckland? Or do we keep rates rises lower, reduce services, delay investment and therefore limit cost to the ratepayer?'

We do not believe that New Zealanders can sustain a steady increase in their rates, and we agree that the council must focus on what it can control and put its efforts where they will make the biggest difference for Auckland and its people.

Long-term Plan 2024-2034

Organisation (if applicable): Bike Auckland

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	Do more
Water	
City and local development	Do more
Environment and regulation	
Parks and Community	Do more
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Do Mores, bundled together instead of distinguishing into each relevant budget section:

- Pumptracks, learn to ride tracks, bike skills courses, trails, and other recreational cycling facilities where people can safely grow their confidence on a bike

#15712

- Eke Panuku's redevelopment of town centres, which often includes making safe walking and cycling connections, as well as improving access for disabled people.
- Improvements aligned with the Central Rail Link like the Karanga-a-hape station improvements project
- We support the Making Space for Water programme's inclusion of "blue-green corridors".
- Auckland Climate Grants and the Live Lightly Programme which can fund community-led programmes to empower people to ride bikes for transport
- More investment for local boards: enabling them to better deliver on local climate action plans and local transport priorities

28 March 2024

- Franklin Local Board areas targeted rate for trails
- We support the walking-cycling bridge for crossing over Papakura stream (bridging Papakura Local Board and Manurewa Local Board). This bridge would enable people to more quickly and easily get from Manurewa to Takānini, as well as to bypass the unsafe and unappealing Great South road.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Tell us why:

Investing in cycling has benefit-cost ratios of anywhere from 10:1

#15712

up to 25:1. It's highly cost-effective! Walking infrastructure also typically scores very highly.

- The UN for Environment recommends 20% of any given high-level transport budget be allocated towards walking and cycling, but Auckland Transport typically allocates under 1% of our transport budget on cycling, and not much more for walking – note how we are massively underinvesting!
- Auckland Council has a commitment to the Transport Emissions Reduction Pathway, and to Te Tāruke-ā-Tāwhiri, Auckland's Climate Plan. Ignoring walking and cycling infrastructure goes against these commitments.
- If people can't get to the public transport hubs because their sidewalks are a mosaic of cracks and roots and uplifted concrete, and their streets are too dangerous to cycle, the spending on public transport will not serve as many people as it could. By underspending on the connective tissue of the city, you fail to provide viable transport choice, and fail to get the best bang-for-back in both active modes and public transport.
- We support the \$50 weekly capped public transport fares

2a. Is there anything you would spend more on?

Cycleways! Safe cycle infrastructure, accessible for all kinds of bikes, that get people where they want to go. More end-of-ride facilities for all kinds of bikes (eg. bike parking), more repair stations along key routes, and better, more regular maintenance of pathways throughout the city. The sooner this stuff is in the ground, the better off our city will be.

#15712

- A safe, connected cycle network can be delivered fast and affordably by reallocating road space and using pop up protection like concrete or rubber separators. The budget will go further if you invest in these types of infrastructure.
- Our footpaths are in dire need of repair, city-wide.
- Some of our cycleways and footpaths are, by design, exclusionary to disabled and mobility-impaired users. In particular we are talking about disabled and mobility impaired people who cycle - sometimes they need wider and longer bikes but our existing cycleways sometimes aren't accessible for these types of bikes. This should be rectified with adequate funding, so that all people are able to get to where they need to go in this great region.
- More raised pedestrian crossings, which are substantially cheaper than recent media has misled people to believe. Raised pedestrian crossings have been proven to dramatically increase safety for all road users and they are also incredibly important for increasing accessibility for disabled people, especially for people who use wheeled mobility. Other types of road crossings can leave people who use wheeled mobility devices stuck in the gutter and stranded on the road, which is highly dangerous. The other ways of providing a safe road crossing (signalised, under or over the road) are also more vastly expensive than raised crossings. Raised crossings are the best solution, and the most affordable.
- There is no walking/cycling connection between the CBD and the North Shore. This can be delivered fast and affordably by

28 March 2024

reallocating 1 of the 8 motor traffic lanes towards walking, cycling,

#15712

and wheeling. Auckland Council and Auckland Transport should advocate to the Central Government and Waka Kotahi for this crucial active modes connection.

- More safe speeds (30km/hr) for residential areas, around schools, and through town centres, with traffic calming measures and raised pedestrian crossings so that everyone can get to where they are going, safely. Katoa Ka Ora showcased the immense amount of support Aucklanders have for safe speeds, with many not wanting to miss out. 30km/hr streets are a fast, affordable, and effective way to make streets safe for walking, cycling, and wheeling, and have been shown to dramatically increase modeshift - saving the region a bunch of money in the process!
- Low traffic neighbourhoods or using modal filters (stuff like planter boxes and bollards which prevent cars coming through into a neighbourhood from a main road, but allow for bikes and pedestrians) are a fast and affordable way to reduce rat-running, make safer streets, and empower people to walk, cycle and wheel for their local trips. They've also been shown to provide huge value for money with health gains up to 100 times more than their cost. Invest in more of them!
- You can save money with the "Dig Once" approach, ensuring walking and cycling improvements are put in while other facilities like power and water are being addressed.
- You can save even more money by closing roads to motor traffic for the majority of the infrastructure build, with a signposted alternate route instead. This saves money on traffic management and the overall project because it can be completed faster

#15712

2b. Is there anything you would spend less on?

Investigating a bike ferry across the Waitematā seems a waste when there is a perfectly good bridge right there that you could put an active modes lane on for a much much cheaper amount of investment.

- We don't think it is fiscally responsible to widen roads to provide for private motorcars. Reallocation of existing road space for walking, cycling and public transport is more in line with the goals of the LTP, and more fiscally responsible in general. We only have a limited amount of space in our road corridors: we should prioritise infrastructure which encourages space-efficient, affordable, healthy modes that save us money overall: walking, cycling, wheeling, and public transport

3. Which options do you support for the North Harbour Stadium?

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Kia ora Auckland Council Representatives,

Submission for Long-Term Plan 2024-2034

Please keep the Sport and Recreation Facilities Investment Fund

Implement the proposal for \$35 million to retain the Sport and Recreation Facilities operating grant. Invest in the well-being of your citizens.

#15721

Review the Facilities Maintenance Plan to keep our sports and recreation facilities in a good usable condition.

Ngā mihi,

Aroha nui,

Dee Landon

Tāmaki Makaurau ratepayer

Joint Submission on Auckland Council Long Term Plan 2024—2034

Thank you for the opportunity to put forward a submission on the Auckland Council Long Term Plan 2024—2034.

This is a joint submission from the following organisations:

He karakia whakahoki mai i te mauri ki ngā hapori

An invocation for the return of the life force to communities.

Hoki mai...

Hokia mai te mauri

Hoki mai te akiaki

Kia tupurearea

Kia tupu hapori momoho e!

Return

The life force

Let it be dynamic

Let it blossom

Let it flourish

To grow thriving communities!

We are Community:

We, as a collective of social not-for-profit organisations supported by the Kaipātiki, Devonport/Takapuna, and North Harbour Local Boards, appreciate the chance to address critical issues affecting our community. Our partnership with the Local Boards has enabled us to deliver community development programmes, environmental initiatives, and well-being services that are integral to the thriving of our Community on Tāmaki Makaurau’s North Shore for over 40 years.

However, we emphasise that community organisations, with proper funding support, are best positioned to drive the realisation of Auckland Council’s *Ngā Hapori Momoho—Thriving Communities Strategy 2022—2032*.

This necessitates an increase in Local Board ‘*Locally Delivered Initiatives*’ (LDI) funding to address historical underinvestment in social infrastructure and rectify existing inequities across Wards. The decline in support for community organisations since amalgamation is alarming, compounded by stagnant funding levels that fail to match inflation, resulting in degraded community facilities and compromised service delivery.

We urge a shift towards a community-led approach, as outlined in the *Ngā Hapori Momoho* strategy, to enable diverse and relevant services that truly connect with our community’s needs.

Our summary position in respect of the LTP:

- Community organisations are better placed to deliver on mutually-agreed outcomes that meet Auckland Council’s *Ngā Hapori Momoho—Thriving Communities Strategy 2022—2032* alongside our Council and Local Board partners.
- Community-led Thriving Communities offer a more cost-effective and targeted approach compared to Auckland Council, drawing upon our extensive experience and capacity to deliver services effectively. With increased investment, we can achieve even better outcomes.
- Council services, such as Libraries, risk duplicating existing providers' efforts, leading to potential funding diversion away from community organisations. Prioritising improved funding for Community would yield superior results, aligning with Council's role as an enabler rather than an expert.
- Increasing Local Board ‘*Locally Delivered Initiatives*’ (LDI) funding is essential to address generational underinvestment in social infrastructure and rectify existing inequities across different Wards.
- There has been a gradual decline in support for community organisations across Tāmaki Makaurau since amalgamation and nothing within the LTP suggests this will change for the better.

How did we get here?

Under-investment in physical infrastructure is easy to see and has consequences that are immediately apparent like the broken water pipes in Wellington or the potholes in Northland. At Auckland Council, under-funding has eroded critical parts of the system because rates have been too low for generations and no one is elected on a ticket that suggests the public will need to pay more. This leads inevitably to a tipping point beyond which multiple systems begin to break down and cascade toward crisis. Events such as the pandemic, and climate events like the Auckland Anniversary flooding and Cyclone Gabrielle have served to highlight the fragility of the system in a number of key areas.

By comparison, under-investment in social infrastructure has had more subtle consequences with the effects less easy to see, but which have similarly been growing over some time. The Auckland amalgamation has been a mixed bag for Community, to say the least. Standardisation of some services like Watercare and Auckland Transport has allowed larger scale projects to progress across Tāmaki Makaurau without having to negotiate between bickering city-states, but it has been a double-edged sword for Community. Funding from one Ward to the next is inequitable and has placed undue pressure on Local Boards to fund maintenance, capital investment and delivery of services to their respective communities.

CP Funding has effectively been static since amalgamation in 2010 with the principal topped-up by an annual CPI increment but the base has not been grown to match inflation that has increased on average by 2.4% every year. For example, if your CP Agreement base was \$1 in 2010, this would be the equivalent of \$1.36 in 2023¹ that's 36% just to keep up with the rising cost of living but that is not where we find ourselves today.

Council has effectively reduced funding year on year for community facilities that are under increased pressure to deliver services to a growing population. This has resulted in a gradual decline in respect of both physical and social infrastructure resulting in degraded community facilities, difficulty in terms of staffing costs as wages fail to keep pace with the market, and is short-term rather than long-term thinking.

This needs to change and the proposed 'prudent' response in the LTP fails to address this issue.

Ngā Hapori Momoho Thriving Communities Strategy 2022—2032:

Released in 2022, this Council strategy document says “We want a future where communities work together to take action on the things they care about...”

So do we.

The strategy is summarised in the following graphic:

It notes the key shifts Council needs to make to deliver on this strategy:

- Move from an ‘ad hoc silo’ approach to one that is integrated and connected;
- Move from a ‘one-size-fits’ all to ‘targeted’ approaches; and
- Move from Council as ‘expert’ to Council as ‘enabler’.

Community service providers already work to support the four outcomes, investment priorities and objectives in this plan and have the institutional knowledge, skills and track record to demonstrate our collective success.

Sadly, this is becoming in spite of Council rather than in partnership with it.

Supporting a community-led approach for the delivery of relevant and diverse services that connect the community:

Community development falls under the *‘Enable local leadership and innovation’* objective in the strategy and notes:

“Community leadership and innovation already exists in neighbourhoods, in local networks, and in voluntary and community organisations where people come together to overcome challenges and support each other. This comes to the fore in times of crisis, such as with the sudden flourishing of mutual aid during the Covid-19 pandemic but has endured for decades in many forms.

Often community innovation needs support or resourcing from allies, partners or co-producers. Real change cannot involve just bottom-up or top-down innovations. It requires collaboration at various stages, and it thrives when these conditions are actively created and nurtured for diverse participation.

We need to work harder to ensure that all Aucklanders can meaningfully participate and that they have power to make change in their communities.

We should employ community-led approaches that recognise the knowledge, wisdom, and skills of communities and what diverse communities value (such as church and family). They told us that communities have their own lived experiences and knowledge to draw on which should be trusted and heard above what council staff or elected members may think.”

Great minds think alike.

In conclusion:

In conclusion, the Auckland Council must recognise the pivotal role of community organisations in fostering thriving communities and commit to robust support through increased LDI funding. Embracing a community-led approach, as outlined in the *Ngā Hapori Momoho* strategy, will empower diverse participation and ensure that the knowledge, wisdom, and skills of our communities are valued and utilised effectively. It is imperative that the Council acknowledges the urgent need for investment in social infrastructure and commits to equitable funding distribution across all Wards to address existing disparities and secure a prosperous future for all residents on Auckland’s North Shore and across Tāmaki Makaurau.

We thank you for your consideration.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7a. Which local board area does your feedback relate to?

Franklin

Franklin Local Board Priorities

7b. What do you think of our proposed priorities for Franklin in 2024/2025?

I support most priorities

More specifically, what do you think of each priority we've listed above?

Develop fit for purpose facilities and respond to growth challenges through projects like the Clevedon Village Heart programme, 'Belmont' Sports Park development and the Unlock Pukekohe programme.	
Fund three-year Strategic Community Partnerships with local organisations that are willing to and capable of delivering social, environmental, cultural and economic outcomes in line with the local board plan and support to these organisations to deliver.	
Support environmental and cultural restoration programmes in partnership with Iwi including Te Kete Rukuruku (place naming) and Te Korowai Papatuuuanuku (environmental restoration).	

#15774

Develop “Franklin Community Occupancy Guidelines” to inform decisions on council-owned facility leases, including leasing charges.	
Find ways to reduce Franklin’s maintenance costs e.g. by replacing lawn with eco-sourced native trees and reducing or relocating public rubbish bins.	
Progress the development and delivery of the Franklin Paths Programme.	
Deliver a refreshed approach to enabling young people in Franklin to access services and participate in their communities.	
Progress a Pukekohe Cemetery memorial project that acknowledges the unmarked graves at the site.	

Tell us why

Most of priorities are reasonable.

7c. What do you think of the Franklin proposed priorities for the 10-year budget 2024-2034?

Do you have any additional thoughts on the proposed Franklin Paths Targeted Rate?

As our local board area is so large, please tell us where you live so we can better understand the views from different communities

8. Do you have any other comments?

Long-term Plan 2024-2034

Note: this simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by</p>	

#15776

businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Local government plays a crucial role in addressing the escalating challenges posed by climate change, urbanisation, economic uncertainty, and threats to social cohesion. Prioritising physical activity can serve as a means to tackle these overarching issues. For example, effective placemaking that promotes recreation can enhance the

appeal of cycling or walking, creating more attractive, safer, and inclusive spaces for social interactions. This, in turn, encourages spending time in and around local businesses and retailers. Active local communities contribute to the overall health, of individuals and families, leading to reduced strain on the healthcare system and improved well-being outcomes.

Recreation Aotearoa submits its support for the Natural Environment Targeted Rate option 4.

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

108. Recreation Aotearoa submits its support for the proposal to improve equity in the allocation of funding for local boards. Local Boards play a pivotal role in decisions pertaining to local Play, Active Recreation, and Sport infrastructure provision, as well as in supporting activation efforts. We endorse transitioning from the historical funding model to one that a more fairly distributes funding for local boards, taking into account their varying population sizes and geographical areas.

109. Recreation Aotearoa submits its support for the proposed urban regeneration initiatives and urges that such projects make sufficient provision for integrated play, spaces for active recreation and the

#15791

inclusion of active transportation options.

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I am also concerned about the exploding population in Auckland and the creeping into Market Garden country (Pukekohe) and the new subdivisions at Paerata, Bellfield, Drury and in the vicinity of Bombay and Ramarama.

The width of the roads I am predicting will be an issue for the likes of Fire and Ambulance, getting to a Fire Scene. Furthermore my next comment would be Infrastructure, water, sewage, waste water and where it is going to go.

#15793

I would also urge Council to dispense with the Consultants who are clearly milking the system.

My final word as a born and bred Aucklander is what was once a wonderful city, with plenty of entertainment and more importantly it was a safe place to be on Friday and Saturday nights, sadly that is not the case today.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Tell us why:

2a. Is there anything you would spend more on?

I note a lot of the new areas do not have off street parking and the roads will be blocked if residents park kerb side, which will then result in Parking Enforcement ticketing and towing vehicles.

Please don't tell me residents should use public transport as many folk are in a situation where trains / buses do not work, that combined with the unreliability of the trains and buses.

Speaking of Public Transport, I note that Auckland Transport stuff things up at a large number of events, such as Western Springs where they take the Bus off the motorway at St Lukes Rd, drop the passengers at the venue, yet tell people they have walk up Gt North Rd to Williamson Ave to get a bus back to the city. What a total exercise in stupidity. I can't possibly think why anyone in a Council owned operation would think that's a good idea.

I could go chapter and verse on the failing of Auckland Transports many failures at special events.

The closure of a section of Queen St has resulted in approx. \$12,000,000.00 in fines. This is not a safety issue, there is no question in my mind this is a revenue gathering exercise by AT.

#15793

I am in full support of Bus Lanes where they are needed. AL and PM services through Manukau, Mt Eden, Dominion and New North road where under ARA, Yellow Bus and Stagecoach buses were operated on a 4 minute service.

The Bus Lanes operated between 0700hrs to 0900hrs.

We currently have a short Bus Lane in Khyber Pass 12 hours a day seven days a week, this despite no bus service to South Auckland. We also have a 12 hour a day seven days a week bus lane in Lambie Drive and Puhinui Rd Manukau despite only one service operating on a 15 minute frequency.

These Bus Lanes are nothing more than another revenue gathering exercise.

Truck / Bus Lane Mt Wellington Highway between Roslyn Rd and Mahora Way Lanes does not have signage detailing times of operation, which suggests it is in operation 24 hours a day, seven days a week.

On a busy day for one to access Sylvia Park Shops safely is nigh on impossible when travelling south from Penrose Rd.

Gt South Rd between Church St and Portage Rd Truck Lane seven days a week 12 hours a day?

2b. Is there anything you would spend less on?

My view is that Council and its entities such as Auckland Transport should stick to their core responsibilities, rather than get involved in Feel Good Vanity projects, such as multi coloured rainbow crossings, cycle lanes that go nowhere as is the case in St. Georges Bay Rd Avondale where there is a 100 metre cycle lane and let us not forget the cycle lanes in Thomas Rd / Orly Ave and Mascot Rd in Mangere that are divided from the main traffic lane by oblong barrier placed approx. every 10 metres approx. Having used those roads many many times, I have never ever seen a cyclist on them.

Then there is the really dumb cycle lane on Federal St between Victoria and Wyndham St that is used by electric scooters travelling against the flow of traffic.

But more importantly somebody in Council thought it was a great idea to provide parking next to the cycle lane, thus reducing the room for Tour Coaches departing the Rydges Hotel.

I submit that millions of dollars are being wasted on Speed Humps and the proliferation of Pedestrian Traffic Lights as is the case on Hillsborough Rd. I don't have a problem

#15793

with the pedestrian lights on Donovan St outside Countdown or outside the school on Hillsborough Rd.

I am saying the number of speed humps all over Auckland will delay Fire or Ambulance to dire emergencies. For example there are 10 speed humps / raised intersection of the Gt North Rd between Blockhouse Bay Rd and Clark St New Lynn. 2 Axle Fire Appliances would weigh approx. 16000 kgs, can you imagine the damage caused by one of these vehicles going over the speed hump at a speed above 5 to 10 kph. I suspect a cracked Chassis would be highly likely.

Clearly no thought was given to Ambulance racing the a heart attack or stroke victim where seconds count, nor has consideration been given to those seriously injured (Broken Neck , Bones) and the agony they are in when the Ambulance has to all but stop to go over the speed humps.

When I look at the proliferation of Speed Humps, Traffic Lights and Cycle Lanes, I and many of my mates cannot help thinking corruption is alive and well in Auckland Governance.

My eyes water when I think of the money being wasted on so called traffic calming measures and reduced speed limits.

I want Auckland Council to stop with immediate effect installing raised crossings, speed humps, cycle lanes where there are no cyclists, 24/ 7 truck and bus lanes, all at eye watering extortionate costs to us the rate payers.

#15793

harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	
Re-introduce recycling charges for schools .	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	

#15793

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

All I hear from Council and Council owned entities such as Auckland Transport is that they need more money and that result in rate increases.

You have millions of dollars from the Regional Fuel Tax and millions of dollars from Bus and Truck Lane infringements.

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

In summary, I want Auckland Council and its entities especially Auckland Transport to complete existing work before starting new work on new projects.

#15840

around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

no

Local board priorities

7a. Which local board area does your feedback relate to?

8. Do you have any other comments?

Long-term Plan 2024-2034

Note: this simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: I don't know

Your feedback

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

1b. What would you like Auckland Council to do more or less of?

Transport	
Water	
City and local development	
Environment and regulation	
Parks and Community	
Economic and cultural development	
Council support	

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

#15851

Tell us why:

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Tell us why:

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Tell us why:

4b. Which option do you prefer for the future of Port of Auckland?

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Tell us here:

#15851

5a. What option do you prefer for Captain Cook and Marsden wharves?

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

Tell us why:

6a. What do you think of these proposals?

<p>Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.</p>	
<p>Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.</p>	
<p>Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).</p>	
<p>Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.</p>	

#15851

Re-introduce recycling charges for schools.	
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.
