

Help us Refresh the Upper Harbour Greenways Plan

Local boards across Auckland have been planning and implementing Greenway Plans throughout Auckland over the last 10 years.

Having consistent connections across Auckland has the potential to transform how people travel every day and how they use the city.

The intention of this Greenways Plan is to refresh the Upper Harbour Greenways Plan developed in 2015 and fulfill some of the aspirational outcomes outlined in the Upper Harbour Local Board Plan 2017.

We are refreshing the Upper Harbour Greenways Plan for the Upper Harbour Local Board. The intent of the greenways plan is to create pedestrian and cycle connections between communities and destinations, encouraging safe travel and a reduction in vehicle use for local trips. This is your opportunity to have a say in where these could go.

Please read this information and look at the maps and let us know what you think, include your aspirations for new walking and cycling paths along with any suggestions for changes or additions to what's proposed.

Where we are we in the process?

How will we fund and deliver this network?

The long term vision for the Greenways Plan is to build an interconnected Auckland through the development of a comprehensive walking and cycle network. This will take time to fully implement, however individual projects are being delivered across council each year.

Several funding streams are being actively investigated

- Funding allocated by the local board, out of its local budget
- Long Term Plan funding (regional funding)
- Delivery by central government agencies, such as NZTA
- Central government funding via the Urban Cycleways Fund and/or NZTA cycling subsidies
- Complementary projects by council regional funding, such as stormwater improvement projects, where access and

- ecological improvements can be included
- CCO funding for related projects (e.g Auckland Transport Safe Schools Travel Plan programme)
 - Goodwill partnerships between council and interested parties
 - Parks renewal budgets
 - Community commitment and stewardship. While not a funding source, volunteer community initiatives help reduce funding requirements.
