

## Outcome

# Belonging and Participation

## Measure 3

### Aucklanders' quality of life

#### Respondents to the Quality of Life Survey who rated their overall quality of life (%)

#### Data

Proportion of respondents to the Quality of Life Survey who rated their overall quality of life positively.

#### Source

Auckland Council, Quality of Life Survey 2012, 2014, 2016 and 2018.

#### Frequency

Every 2 years.

#### Availability

The reports are available on Knowledge Auckland ([www.knowledgeauckland.org.nz](http://www.knowledgeauckland.org.nz)).

#### Note

Respondents were asked to rate their overall quality of life and to also indicate the extent to which they felt their quality of life had changed from 12 months prior.

The Quality of Life survey changed from a five scale rating to a seven scale rating reducing direct comparability.

From the 2012 Quality of Life survey method changed from a Computer-Assisted Telephone Interviewing (CATI) survey to an online self-complete survey. The 2018 survey used a sequential mixed-method methodology, enabling respondents to complete the survey either online or via a hard copy of the questionnaire.

#### Relevance

Aucklanders' perception of their quality of life is central to their health and wellbeing. Satisfaction with overall quality of life is a measure of subjective wellbeing. A number of factors contribute to satisfaction with quality of life, which are further explored in the Quality of Life survey.

#### Baseline (2018)

42% of Auckland respondents rated their quality of life as extremely or very good.

41% of Auckland respondents rated their quality of life as good.

13% of Auckland respondents rated their quality of life as neither good nor poor.

5% of Auckland respondents rated their quality life as poor or very poor.

No Auckland respondents rated their quality of life as extremely poor.

Quality of life has increased significantly or to some extent.

#### Analysis

Further analysis will be provided as part of July 2019 annual scorecard.
