

Outcome

Belonging and Participation

Measure 5 Aucklanders' health

Respondents to the Quality of Life Survey who rated their personal health (%)

Data

Proportion of respondents to the Quality of Life Survey who rate their health positively.

Source

Auckland Council, Quality of Life Survey 2012, 2014, 2016 and 2018.

Frequency

Every 2 years.

Availability

The reports are available on Knowledge Auckland (www.knowledgeauckland.org.nz).

Note

Respondents were asked to rate their general overall health.

From the 2012 Quality of Life survey method changed from a Computer-Assisted Telephone Interviewing (CATI) survey to an online self-complete survey. The 2018 survey used a sequential mixed-method methodology, enabling respondents to complete the survey either online or via a hard copy of the questionnaire.

Relevance

Good health is critical to wellbeing as it enables people to participate in society and the economy. Without good health, people are less able to enjoy their lives to the fullest extent, and their options may be limited. Self-rated health is a widely used indicator of health status and has been shown to have a strong relationship with objective measures of health status.

Baseline (2018)

78% of Auckland respondents rated their health as good, very good or excellent.

18% of Auckland respondents rated their health as fair.

4% of Auckland respondents rated their health as poor.

Analysis

Analysis will be provided as part of July 2019 annual scorecard.
