

Delivering Auckland's infrastructure requires co-ordination across a number of public and private organisations depending on the type or scale of infrastructure. Typically:

- Government provides state highways, railway lines, and some social infrastructure such as schools and hospitals. It also subsidises other transport infrastructure.
- Auckland Council, including the council-controlled organisations, provides arterial roads, public transport systems, water supply, wastewater and stormwater networks and social infrastructure such as community facilities and parks.
- Developers initially construct local streets and pipe networks which are then vested with council to own and maintain.
- Energy and communications infrastructure is typically supplied by private utility companies.

Key:

- Wastewater
- Drinking water
- Transport
- - - Stormwater
- Community Facilities
