

# Parks and Open Spaces Strategic Action Plan

2013

Motuora Island, Hauraki Gulf

# He mihi

E koro mā, e kui mā, i te pō  
 Ki a koutou ngā iwi tuaroa i roto i ngā tau whakapūrehurehu  
 Kia papakura mai koutou i te kākarauritanga o te rā  
 E kore rawa koutou e ngaro i te mahara

Ki a koutou e noho nei i raro i te maru o te pai me te whai rawa o Tāmaki,  
 Tāmaki, makau a te rau, makau a te tini, wenerau a te mano  
 Nei te ngākau ka mihi  
 Nei te ngākau ka tangi

Ka mihi ki ngā maunga, ngā puke, ngā tihi matarau, ngā wai e rere nei,  
 ko ngā uri a Tāne, a Haumia, kei tēnei takiwā

Nā ngā iwi, e nohoia nei, nā tō rātou hūmārie, tautoko, poipoi hoki i te Kaunihera  
 o Tāmaki Makaurau, tēnei mahere ka puta, kua puta ēnei kōrero a te Kaunihera ki  
 te marea

E te ihi korangaranga, te ā tē kitea, te ā tē rangona, he hiringa taketake i hua mai  
 nei i a koutou ngā ringa raupā, ahakoa piki, ahakoa heke

Tēnei pai me te whai rawa o Tāmaki e kīa nei... tukuna tō wairua kia rere.

---

To those who have passed  
 To you the people, the continued strength through some challenging times  
 Your commitment will never be forgotten

To all who reside in this place of plenty, Auckland  
 Auckland – beloved of hundreds, famed among the multitude, envy of thousands  
 This warmth greets you  
 This warmth yearns for you

Greetings to the many mountains, hills, sites, rivers and descendants of Tāne and  
 Haumia that reside in this region

To those people who reside in this region, it is because of your commitment, your  
 perseverance and encouragement, of this document, that Auckland Council presents  
 the Parks and Open Spaces Strategic Action Plan

This research is the result of much commitment, that which may not be seen, that  
 which may not be heard, however the determination of many, despite the challenges

This place of plenty, Auckland says... let your spirit soar.

Adopted by the Regional Development and Operations Committee, 19 September 2013  
Resolution number: CP2013/18848

# Auckland's parks and open spaces

Te Hauturu-o-Toi (Little Barrier Island), Hauraki Gulf Marine Park

## Hauraki Gulf Marine Park

The Hauraki Gulf Marine Park is our national park of the sea. The park protects the combination of natural richness, environmental quality, and landscape that make the Hauraki Gulf outstanding in New Zealand.

## Regional parks

Auckland's network of 26 regional parks cover more than 40,000ha of land. They provide outstanding access to our amazing natural and rural landscapes, conserve our heritage and biodiversity and offer diverse recreation opportunities.

Comans Track, Karekare, Waitākere Ranges Regional Park

Farley Point, Karekare

## Wild, remote places

Auckland's open spaces provide opportunities to access wild and remote places. The Waitākere and Hunua Ranges, Great Barrier Island or even some of our large urban parks, offer us respite from our busy lives, and allow us to connect with nature.

## Natural areas

Healthy coastal and natural environments are some of the special places of Auckland. Our open spaces have a valuable role to play in protecting and enhancing Auckland's landscape and biodiversity.

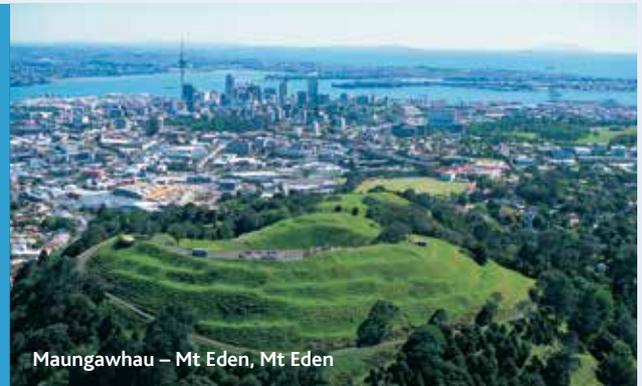

Takapuna Beach, Takapuna

## Beaches

Auckland has some amazing beaches on its doorstep. They are a big part of what makes Auckland a great place to live and visit. Some are remote, such as Te Arai, Anawhata and Whangapoua, and offer a real feeling of escape and solitude. Others, such as Takapuna, Mission Bay and Long Bay are popular destinations for many Aucklanders on a fine summer day.

## Volcanic cones

Fifty volcanic cones have shaped Auckland into the city that it is today. From the unique landform the city is built on, to the distinct identity and sense of place they inspire, cones such as Motukorea (Browns Island), Maungauika (North Head) and Maungakiekie (One Tree Hill), all inform Auckland's rich cultural and historic heritage.

Maungawhau – Mt Eden, Mt Eden

Tui Glen Reserve, Henderson

## Local parks

Auckland has a wide variety of local parks providing spaces for playgrounds, sports fields, walkways and community gardens. Our local parks provide places for Aucklanders to relax, socialise and play.

## Civic spaces

Our civic squares, town centres and streets are a vital, if often forgotten, type of open space. They are places which help to establish connections and linkages and where people can move through, visit and congregate.

Vulcan Lane, central Auckland

Tawharanui Regional Park, Tawharanui

# Auckland – the world's most liveable city

## Te pai me te whai rawa o Tāmaki

The vision for Auckland is set out in the Auckland Plan – to become the world's most liveable city. As the world's most liveable city Auckland will be a place that:

- Aucklanders are proud of
- they want to stay or return to, and
- other people want to visit, move to, or invest in.

The Auckland Plan sets out a 30-year strategy to achieve this vision, to make Auckland an even better place than it is now and to create the kind of place Aucklanders have told us they want. Auckland's parks and open spaces make a major contribution towards Auckland's quality of life and are integral to achieve the vision and strategy set out in the Auckland Plan.

The following outlines how Auckland's parks and open spaces contribute to the outcomes of the Auckland Plan.

### A Māori identity that is Auckland's point of difference in the world

Tikanga Māori and partnerships between mana whenua, Auckland Council and the wider Auckland community are increasingly important to enhance the prosperity and quality of life for all Aucklanders. Mana whenua have an active role to play in Auckland's open spaces, including the maunga (volcanic cones), wahapū (harbour), motu (islands) and kaitiakitanga (guardianship) of our land and marine resources.

### A fair, safe and healthy Auckland

Auckland's open spaces are the venues for many sport and leisure activities. Our parks and open spaces provide opportunities for all Aucklanders to get active and stay fit, as well as spaces for respite, relaxation and escape from our busy lives. They provide places for our children and young people to have fun, participate in sport and learn. Our clubs, community groups and volunteers activate our parks and help to improve them.

### A well-connected and accessible Auckland

Parks, open spaces and streets are places for people to meet, socialise, and get involved in the community. Streets and open spaces link the city together, allowing people to get where they need to go. Parks protect our coastline, waterways and link areas of native bush together to protect and enhance Auckland's native biodiversity.

### A beautiful Auckland that is loved by its people

Auckland's isthmus location, surrounded by islands, and dotted with volcanic cones has influenced the way the city has developed and will continue to do so in the future. Our parks and open spaces play a big role in how Auckland looks and feels. The landscape, historic heritage and cultural features of our parks add to the character and identity of the region, while our neighbourhood parks and civic spaces create distinct and vibrant town centres and suburbs.

### A green Auckland

Auckland parks and open spaces play a critical role in conserving our rich natural heritage. They protect the ecosystems and landscapes that make Auckland unique, such as our coastline, volcanic cones, beaches and streams. Parks are places where people can learn about and connect with the natural world. Auckland's parks form part of the green infrastructure network, helping to manage our stormwater, improve air quality and mitigate climate change.

### A culturally rich and creative Auckland

Auckland's park network expresses our values, history and stories. Parks are places where we celebrate our culture, learn about our historic heritage and care for Auckland's special features on behalf of future generations. Many open spaces accommodate artworks, events and festivals where Aucklanders express their creativity. Auckland's parks provide the facilities for many Aucklanders to participate in sport.

### An Auckland of prosperity and opportunity

Auckland's parks and open spaces, our temperate climate and natural environment provide for diverse recreation opportunities. Auckland's lifestyle – organised sport, swimming, bush walking, events or picnicking in a park – is one of the factors that attract people from across New Zealand and around the world to live in Auckland. Parks and open spaces are also the venue for many of the experiences and events that bring tourists to Auckland.

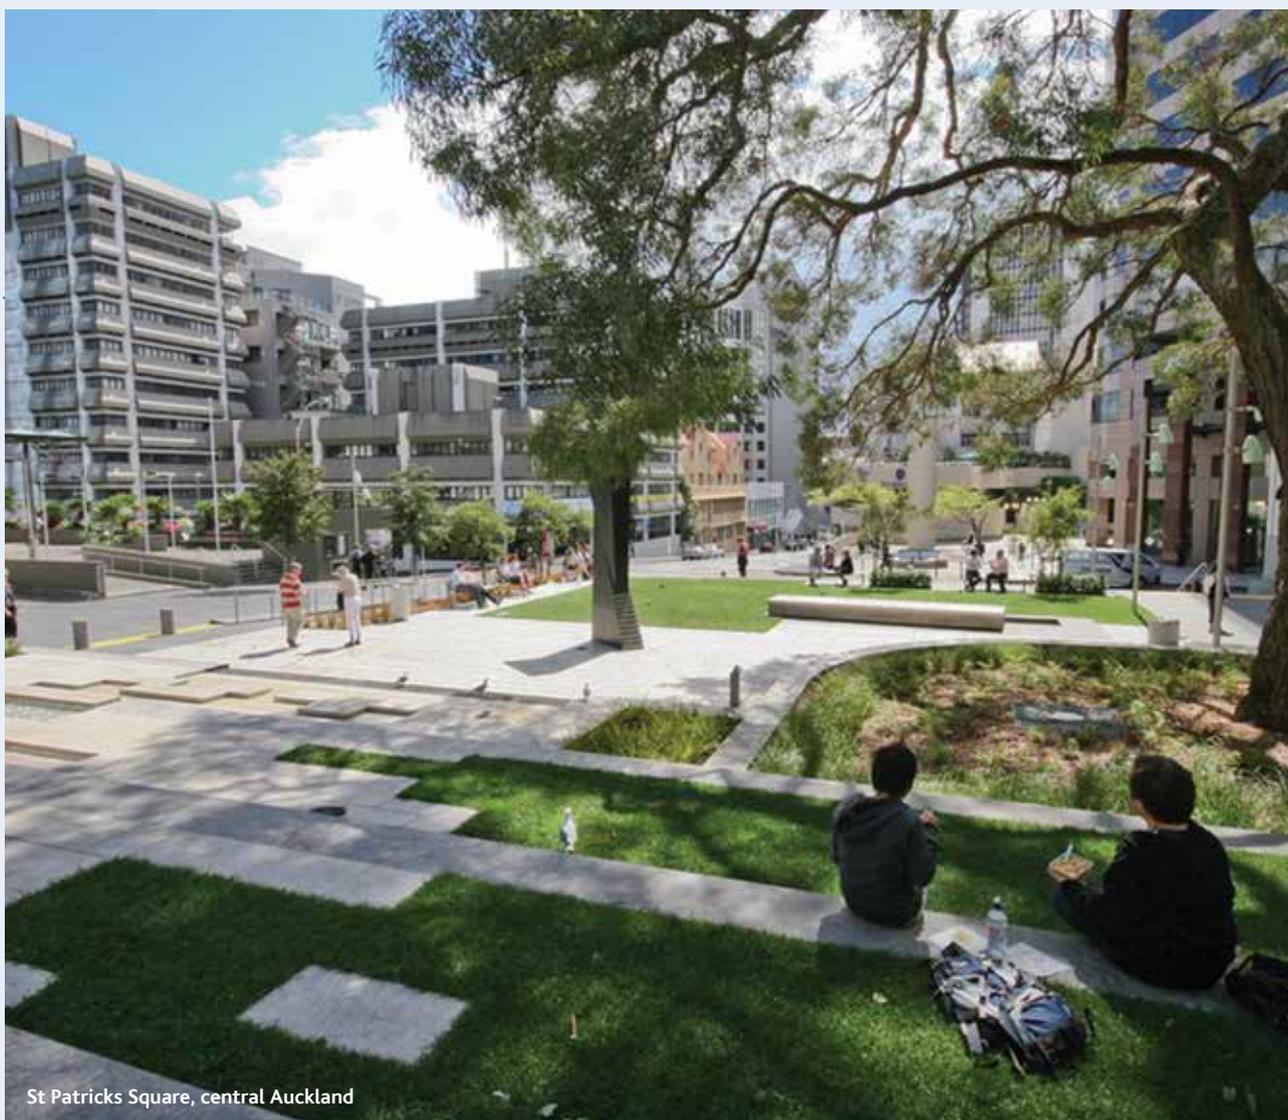

# Auckland's parks and open spaces in 2040

To realise Auckland's vision to be the world's most liveable city, our network of parks and open spaces will need to continually grow and improve.

This is recognised in the Auckland Plan, which includes a target to:

*Maintain and extend an integrated network of quality open spaces across the region that meet community needs and provide a diverse range of recreational opportunities by 2040.*

To achieve this target we need to consider how the place and people of Auckland will change over the next 30 years and identify where we need to focus our efforts to ensure our parks and open spaces contribute to and enhance Auckland's liveability.

St Patricks Square, central Auckland

## A changing Auckland – the place and the people

The Auckland Plan identifies some of the main influences and trends that will affect the way Auckland grows and develops over the next 30 years. As an integral part of Auckland’s social, cultural and physical environment, many of the following factors will affect how we provide and manage Auckland’s network of parks and open spaces.

### A growing population

Like many successful cities, Auckland’s population is growing and changing. The Auckland Plan sets out how growth will be a catalyst for enhancing our prosperity and quality of life. Over the next 30 years, a further one million people are expected to live in Auckland. A larger population will mean our parks and open spaces will need to accommodate more use.

### A place of diversity

Auckland is diverse – both the people and the place. Auckland is already home to 180 ethnicities and the population is expected to get more diverse over the next 30 years, with the Asian and Pacific proportion of the population expected to grow the most significantly. The proportion of Auckland’s population over sixty will almost double by 2040. Auckland’s natural and urban geography is also diverse. The region includes a variety of natural landscapes, environments and settlements – from the densely developed city centre, to suburbs, rural towns, farms and islands. Our planning and management of Auckland’s parks and open spaces needs to respond to this diversity to meet the differing expectations and needs of Auckland’s communities.

### A compact city

To accommodate Auckland’s growing population, the Auckland Plan anticipates 400,000 new dwellings will be required over the next 30 years. The Auckland Plan intends that between 60–70 per cent of all new dwellings will be located within the existing urban area in the form of apartments, infill housing and town houses. Greenfield developments and expanding the urban limits will accommodate the remaining dwellings. This will mean some public open spaces will be used more intensively, as residents use local parks, streets or squares for activities that may have traditionally occurred in the suburban backyard. New parks will need to be acquired, existing parks upgraded and our streets will be an integral part of Auckland’s open space network.

### Māori identity as Auckland’s point of difference

The Tiriti o Waitangi/Treaty of Waitangi settlement process and increasing Māori participation in Auckland’s parks and open spaces will become more influential over the next 30 years. Māori cultural activities will be celebrated as Auckland’s point of difference in the world. Tikanga Māori and customary activities will influence how our parks and open spaces are planned, developed and managed.

### An emerging international city

As New Zealand's largest city and commercial centre, Auckland is New Zealand's gateway to the rest of the world. In an increasingly globalised world, cities compete with each other to attract innovative, dynamic businesses and the highly skilled workforce required for economic prosperity. Auckland's open spaces are integral to our quality of life and the physical attractiveness of Auckland, which is one of our competitive advantages that attract businesses, tourists and workers to Auckland.

### Increasing environmental awareness

As our climate changes, people are more aware of their impact on the environment. Over the next 30 years, Auckland could face changes to its temperature and rainfall, have more frequent storms and sea-level could rise. The health of our ecosystems, freshwater quality and air quality are under pressure. The Auckland Plan recognises that we need to commit to environmental action and green growth. The way we develop and care for open spaces will play a part in addressing Auckland's environmental challenges.

The ways Auckland will change over the next 30 years present challenges and opportunities for planning, developing and managing our parks and open spaces. A fast growing city inevitably means more people will use our parks and open spaces and undertake a wider range of activities. The key challenge for Auckland is to provide for our growing population's social and recreation needs while ensuring the special features and intrinsic values of our parks and open spaces are protected. We need to carefully balance these demands so that generations now and in the future continue to enjoy the parks and open spaces that make Auckland special.

### Our changing lifestyles

Aucklanders' lives are getting busier, so making the most of our leisure time is important. Concerns about obesity and physical inactivity mean there is an increasing focus on healthy living. People want opportunities to be active that are affordable, convenient and close to home. Our parks and open spaces are the venue for many of the sports that get Aucklanders active. They also provide active ways to get around the city by bike or on foot. As Auckland grows and changes, it is essential that people have doorstep access to high quality recreation facilities and a connected open space network that allows Aucklanders to live healthy lifestyles.

Cox's Bay Reserve, Westmere

# The Parks and Open Spaces Strategic Action Plan

The Parks and Open Spaces Strategic Action Plan sets out what needs to happen to Auckland's park and open space network over the next 10 years in order to implement the aims of the Auckland Plan. The action plan identifies what Auckland Council will focus on, outlines how we will do it and what the priorities are.

There are two main parts to the strategic action plan:

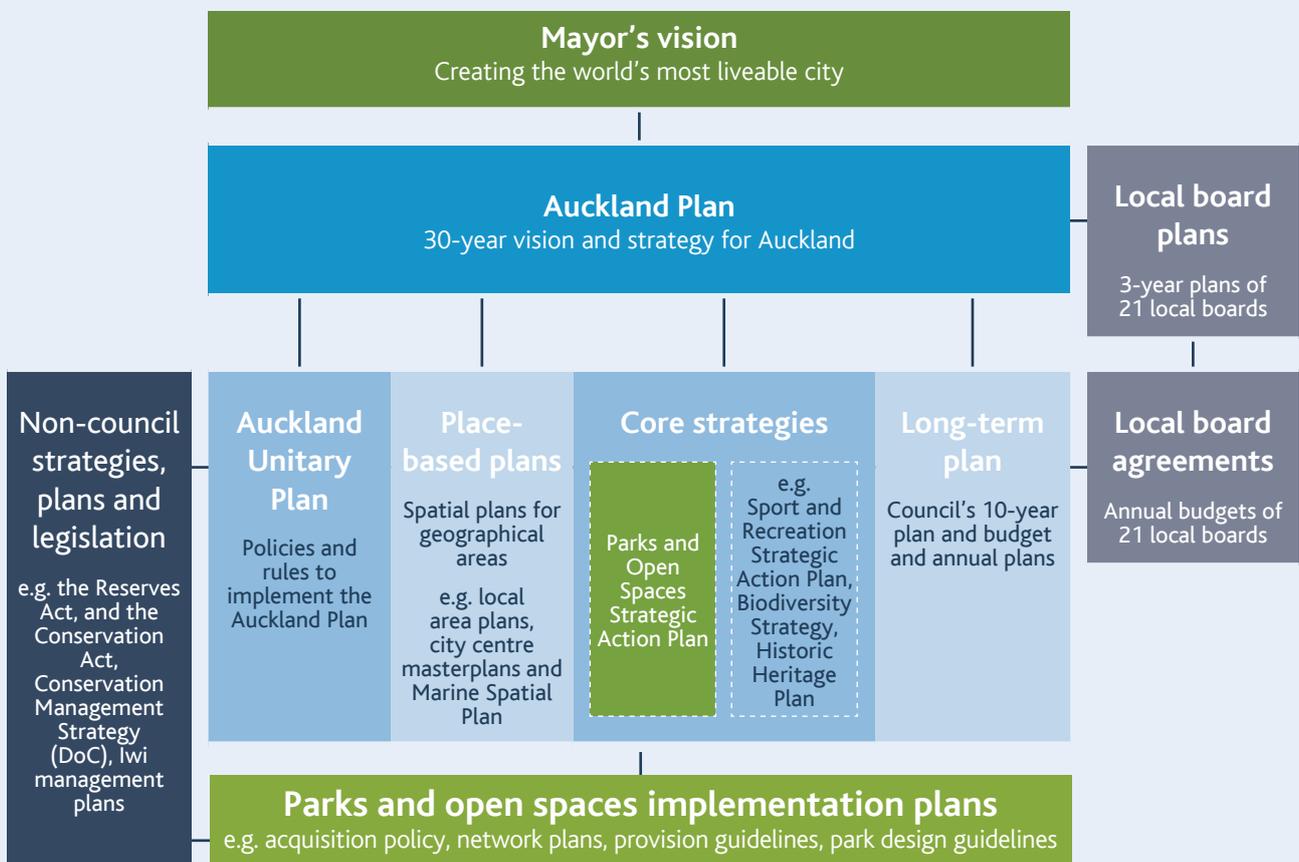

- **what we will do** – outlines what we will focus on and our priorities for parks and open spaces over the next 10 years
- **how we will do it** – provides detail on the actions required to implement the strategic action plan.

## Related plans and strategies

The Parks and Open Spaces Strategic Action Plan is one of Auckland Council's core strategies. It will influence, and is influenced by, a range of other council strategies and planning documents that determine how we plan, develop and manage the parks and open spaces network, such as the Sport and Recreation Strategic Action Plan, Indigenous Biodiversity Strategy and the Historic Heritage Plan. There are also a range of non-council strategies, legislation, plans and agreements that influence how both the council and other providers manage parks and open spaces in Auckland. The diagram in Figure 1 shows how the strategic action plan relates to other strategies and plans.

**Figure 1:** Relationship between the Parks and Open Spaces Strategic Action Plan and other strategies and policies that influence parks and open spaces.

## Achieving it together

Creating the network of open spaces that Auckland needs to become the world's most liveable city will require collaboration and effort from a wide variety of organisations and communities.

We will need to work in accordance with the principles of the Auckland Plan, which are:

- valuing Te Ao Māori
- working together
- being sustainable
- acting fairly
- making the best use of every dollar spent
- being affordable
- checking progress and adapting to improve.

Below are some of the ways we will partner with mana whenua and involve stakeholders to develop and improve the parks and open spaces network.

### Valuing the place of mana whenua

Co-governance arrangements and tikanga Māori will become increasingly influential on Auckland's open spaces included in the treaty settlement process. It is critical that relationships are established with mana whenua, either through statute or in less formal settings.

### Recognising the importance of open space not owned by Auckland Council

Open space not owned by the council makes up a big part of the open space network in Auckland. Auckland Council's role in relation to this part of the network is as an advocate, enabler and partner. Auckland Council needs to partner with mana whenua, other government organisations such as the Department of Conservation and private providers of sporting facilities, schools and the rural sector to protect open space, increase the capacity of the network and maximise the benefits to Auckland.

### Supporting groups that help to look after parks and open spaces

Many community groups, mana whenua, sports clubs and volunteer organisations have a long association with caring for and improving Auckland's parks and open spaces. We will share our knowledge and expertise with groups who get involved with looking after our parks and open spaces. We fund volunteer schemes and community planting days, support mana whenua and 'friends of' groups and are committed to co-ordinating and providing opportunities for people to be involved in how our parks are designed, developed and managed.

### Promoting the benefits of investing in quality open space

We will undertake local research to build the case for investing in open spaces and explain the wide range of benefits they provide to Auckland. We will advocate to other landowners, developers and infrastructure providers to achieve practical solutions that create quality open spaces.

# What we will do

---

## Areas of focus

The role of parks and open spaces in providing for Auckland's quality of life and liveability, along with the changes Auckland will face over the next 30 years, influence the areas we need to focus on when planning, developing and managing the parks and open spaces network.

To create the network of parks and open spaces required to achieve the outcomes identified in the Auckland Plan, there are four areas Auckland Council will focus on over the next 10 years.

### Treasure our parks and open spaces

We will focus on protecting and conserving Auckland's environment, heritage and landscape. We will improve opportunities for people to learn about and appreciate the special features and values of our parks and open spaces.

### Enjoy our parks and open spaces

We will focus on expanding and developing our parks and open space network to accommodate more use and activities to meet the needs of our growing and diverse population while ensuring what makes our parks special is not lost. We will design and develop our open spaces to be safe, fun and welcoming places that Aucklanders love to use.

### Connect our parks and open spaces

We will focus on visually and physically connecting Auckland's network of parks, open spaces and streets to create opportunities for people to move around the city and to enhance our native biodiversity. We will enhance accessibility so that all Aucklanders can easily access and enjoy the opportunities our parks and open spaces have to offer.

### Utilise our parks and open spaces

We will recognise that parks and open spaces are an integral part of what makes a successful city and have wide-ranging social, economic and environmental benefits. We will focus on maximising synergies between our open spaces and creating a green, resilient and prosperous city with thriving communities.

These four areas of focus inform the priorities and actions outlined in this strategic action plan. Aligning our work to these areas of focus will ensure our parks and open spaces enhance Auckland's liveability while responding to the way the city will change over the next 30 years.

**Figure 2:** Relationship between the outcomes of the Auckland Plan and the areas of focus and priorities of the Parks and Open Spaces Strategic Action Plan.

Shakespear Regional Park, Whangaparaoa Peninsula

## Treasure our parks and open spaces

### Manaakitia te taiao

We will focus on protecting and conserving our parks and open spaces and improving people's ability to understand and appreciate their value and significance.

The following are our priorities for the next 10 years.

#### Protect and care for Auckland's special places

Many of our parks contain significant ecological, natural, cultural and historic heritage values. We will develop a robust information base about the values of our parks and open spaces and lead by example in conserving and managing Auckland's special places. We will work in partnership with mana whenua to understand and protect the values of places of significance to mana whenua, including waahi tapu and other taonga.

#### Celebrate our volcanic landscape

Our volcanic features are among the most treasured and distinctive landscape and heritage features of Auckland, and are of particular significance to the Ngā Mana Whenua o Tāmaki Makaurau (the Tāmaki Collective). To recognise its importance, we will bid to obtain world heritage status for the Auckland volcanic field.

#### Protect our coastline and waterways

Auckland's coastal environment and waterways are defining features of Auckland's landscape and lifestyle. Our growing population and development may put pressure on popular beaches, coastal parks and our waterways. We need to carefully manage these places in an integrated way, sustaining and enhancing their natural values while ensuring Aucklanders continue to enjoy easy access to our beaches, coastline, streams and lakes.

### Restore and enhance Auckland's native biodiversity

Many of our parks and open spaces provide habitat for our unique flora and fauna. We will care for and improve native vegetation and habitats through weed and pest management, planting programmes and partnerships with landowners.

### Tell our stories and history

Our parks and open spaces give Auckland a sense of identity and have great educational value. Through interpretation, design, activities and information, we will provide ways for people to understand the unique values of our open spaces and learn about Auckland's heritage, including the stories of how our parks and open spaces were established.

# Enjoy our parks and open spaces

## Ngā papa rēhia

We will focus on ensuring our parks and open spaces meet the needs of our growing population so that people can experience all they have to offer.

The following are our priorities for the next 10 years.

### Accommodate more use and activities

Our growing and diverse population will mean more people will want to do more in our parks and open spaces. We need to make the best use of our open spaces, ensuring they cater for a range of activities and users by redeveloping existing parks, and creating new parks that are flexible, accessible, safe and welcoming. Not all open spaces can provide something for everyone, but across our network we need to provide for a variety of experiences locally, from high-quality sports grounds, attractive streets and spaces for playing through to quiet, natural areas to relax in.

### Balance diverse demands

Parks and open spaces in a growing city face pressure from neighbouring developments and proposals for new facilities, commercial activities and infrastructure. We need to make sure the integrity of our parks and open spaces is maintained by ensuring uses are appropriate and that development and infrastructure are designed to enhance, not detract, from their values and benefits.

### Create safe, healthy and enjoyable places

It is critical that people feel safe when using parks and open spaces. Auckland's parks and open spaces need to be fun, healthy, creative and stimulating places where people feel safe and comfortable when they visit. It is also important the basics are right – that our parks and facilities are well maintained. We need to understand how Auckland's diverse communities use their parks and open spaces to ensure we are providing experiences people want and enjoy.

### Expand the open space network

Acquiring new land will provide a variety of parks and open spaces that accommodate the recreation and social needs of our growing population and conserve and protect our environment. We will acquire more land and work with other landowners, such as schools, to secure public access to open space where there is a need and opportunities exist. We will focus on the places where growth is occurring to ensure residents can easily walk to a high-quality local park.

### Promote our parks and open spaces

By improving information about the activities and facilities our parks offer, their history and their special features, Aucklanders and visitors can make the most of our parks and open spaces. We will use innovative technologies so people can find out about the facilities, trails and features of parks and open spaces around them while out and about, or plan ahead for the weekend.

# Connect our parks and open spaces

## Ngā papa haumi

We will focus on creating a green network across Auckland by physically and visually connecting our parks, open spaces and streets. We will work closely with partners towards achieving long-term goals to connect our open space network.

The following are our priorities for the next 10 years.

### Create greenways across Auckland

Building on the work already being done by local boards across Auckland, we will develop greenways that connect our parks, streets and esplanade reserves with a network of walkways, cycleways and trails. Greenways will make moving around our neighbourhoods easy, whether visiting the local shops, going to school or getting out for some exercise.

### See our streets as places

Our streets are increasingly an integral part of Auckland's open space network, being popular places for recreation and socialising. We need to make the most of our streets to create attractive and vibrant town centres and suburbs while ensuring people can easily get around Auckland – by bus, car, foot or cycle. Balancing demands for trees, transport, utilities and stormwater in attractive streets will be a key challenge as Auckland develops.

### Create a regional trail network

Developing an integrated network of trails that are destinations for walking, riding, and paddling will provide world-class recreation experiences for locals and tourists alike. We will identify, plan and develop existing and new trails to form an integrated regional network that showcases the best Auckland has to offer.

### Connect our natural areas

Connecting natural areas allows wildlife to move through the region, protects our landscape, maintains Auckland's hydrology and enhances our biodiversity. We will focus on enhancing waterways and streams, wetlands and esplanade reserves. We will identify areas to target revegetation and ecological restoration initiatives to maximise the benefits to Auckland's biodiversity.

### Link with the transport network

The relationship between open space and the transport network will become more important as the city grows. Our open spaces link with streets to form routes for pedestrians and cyclists to get around. We need to maximise synergies with the transport network in ways that enhance our open spaces. Parks and open spaces are also the venues for activities and events that draw people from around the region. We need to carefully plan how people will get to our sports facilities, beaches, large parks and events so that it is easy to experience all that Auckland's parks and open spaces have to offer.

Elliott Street, central Auckland

## Utilise our parks and open spaces

### Ngā papa rangahau

We will recognise the wide-ranging benefits of parks and open spaces in creating a green, resilient and prosperous city with thriving communities.

The following are our priorities for the next 10 years.

#### Connect our communities

Parks and open spaces are the places where all of the community can get together – to meet at the local playground, bump into a neighbour when walking the dog, or play for the local sport club. Our parks and open spaces need to provide quality facilities and experiences that are part of people's daily routine and respond to Auckland's diverse communities. We must ensure that our network of parks and open spaces are inclusive and accessible, for all Aucklanders to enjoy.

#### Build a green infrastructure network across Auckland

Developing a resilient green infrastructure network can help to manage stormwater, improve air and water quality, reduce flood risk and help to mitigate climate change. Within the open space network, we will plant more trees and encourage sustainable design solutions to maximise the role of our parks, open spaces and streets in creating a green city.

#### Provide world-class experiences

Some of Auckland's most popular parks and open spaces are also major tourist attractions, such as Maungawhau – Mt Eden, Wynyard Quarter, Waiheke Island's beaches and the walks of the Waitākere Ranges. We will create places that Aucklanders love to visit that are also excellent experiences for visitors, contribute to our tourism economy and enhance our global reputation.

### Respond to our changing environment

Our changing climate will impact on our parks and open spaces and how they are managed. Some areas of the network may become more susceptible to natural hazards, such as coastal erosion, and changing weather patterns may influence vegetation. We need to understand how our parks will be affected, the implications for how we manage them, and how to create a resilient open space network that helps to address the environmental challenges facing Auckland.

### Use parks and open spaces to create attractive urban areas

High quality parks, open spaces and streets can create vibrant town centres and suburbs. Smart investment in open spaces, accompanied by private sector development, can be a catalyst for radically improving the quality of urban living in Auckland. We need to ensure our investment in open spaces aligns with where and when growth is occurring, creates distinct places and helps deliver a high-quality compact city.

# How we will do it

This section of the strategic action plan outlines how we will turn the priorities of each area of focus into 'on the ground' changes to the way we plan, develop and manage our parks and open spaces over the next 10 years.

The actions identified in this section do not cover all the work Auckland Council does in relation to parks and open spaces. Auckland Council, other organisations and community groups undertake activities in areas such as biosecurity, environmental monitoring, urban planning, community development, transport and stormwater infrastructure that all influence parks and open spaces to varying degrees. Additionally, every day Auckland Council undertakes a wide range of work directly related to maintaining and improving Auckland's parks and open spaces.

The actions in this section identify additional initiatives Auckland Council will undertake, or is already progressing which will help us deliver the areas of focus and priorities over the next 10 years.

The actions are grouped into four activity areas:

- policy and planning
- development and management
- advocacy, partnership and promotion
- research and monitoring.

## Auckland Council – decision-making roles

Auckland Council's decision-making responsibilities are shared between the governing body and 21 local boards. The governing body focuses on issues, decisions and strategies affecting the whole region and has decision-making responsibility for regional parks. Local boards represent their communities, make decisions on local matters, and have decision-making responsibility for local parks. Both the governing body and local boards have a critical role in the successful implementation of the actions identified in the strategic action plan.

## Enabling Māori aspirations

The actions identified in this section will contribute towards achieving mana whenua aspirations identified in the Auckland Plan and confirmed through engagement with mana whenua on the strategic action plan. While mana whenua share many of the aims of the strategic action plan, some of the actions that significantly relate to mana whenua aspirations include the actions listed in the table below.

## Actions to enable Māori aspirations

A2	Co-govern maunga and parks with mana whenua identified through the Treaty of Waitangi settlement process, including preparing development and management plans for co-governed parks and open spaces.
A3	Work with mana whenua to tell stories of Māori cultural heritage throughout our parks and open spaces network, including through place names, interpretation, artwork and memorials.
D7	Support and undertake initiatives to enhance the biodiversity value of our parks, open spaces and waterways through partnerships with mana whenua, planting programmes, community groups and volunteer programmes.
R5	Work with mana whenua to identify, protect, preserve and manage waahi tapu and other places of significance within the public open space network.
P8	Bid for world heritage status for the Auckland volcanic field.
P12	Establish a framework for mana whenua to partner and participate in policy, planning, design, development and management of parks and open spaces based on recognition and respect.

See tables on pages 30-33 for the full action lists.

## Policy and planning

Region-wide policies and guidelines inform consistent and transparent decision-making, backed by thorough analysis. They assist in implementing best-practice management and development to our parks and open spaces. Planning prioritises the actions and funding required to make the changes needed to improve Auckland’s parks and open spaces.

### Open space network planning

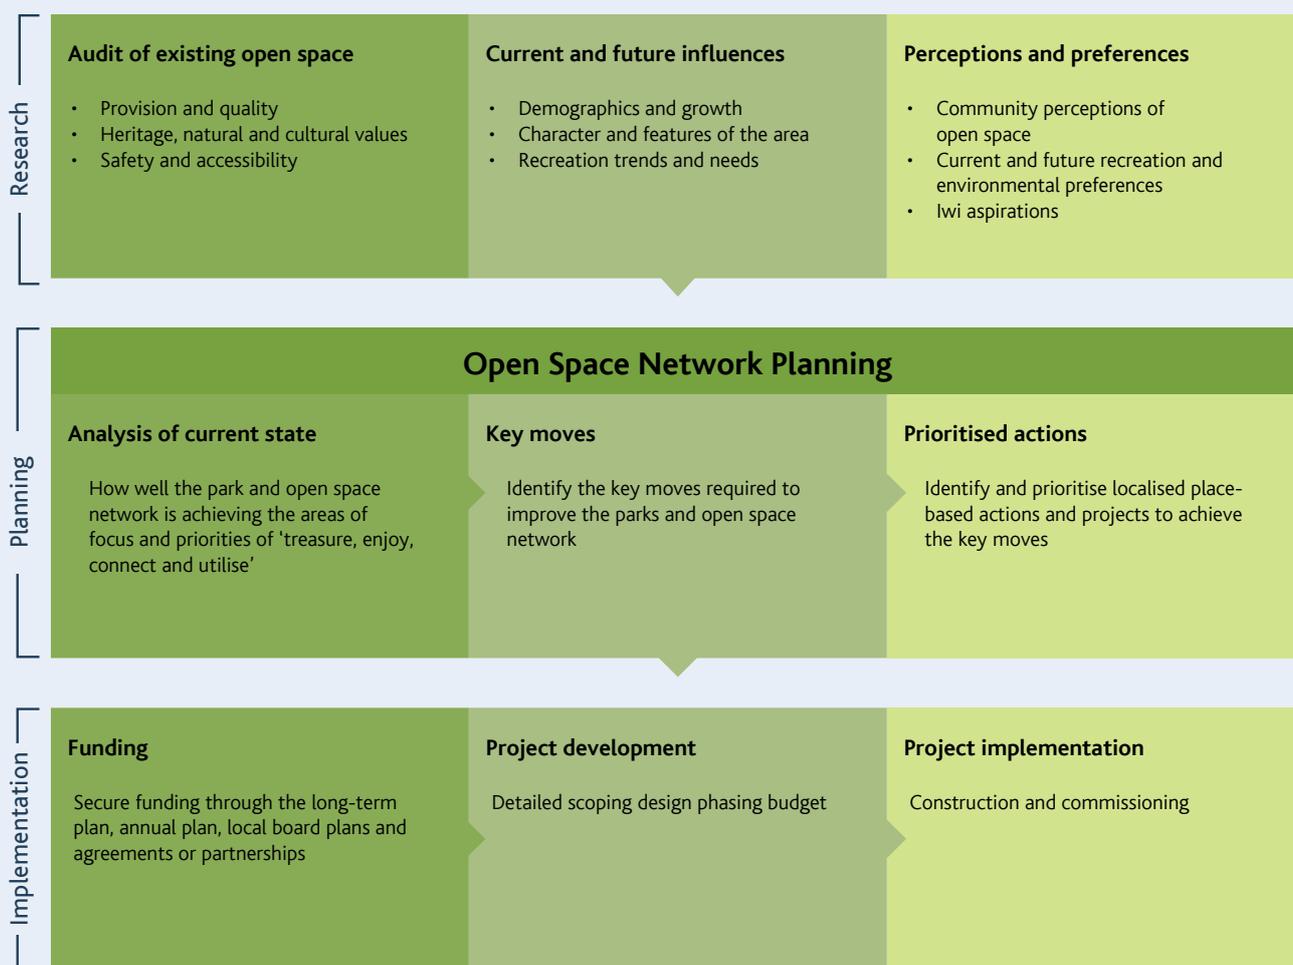

Open space network plans are one of the key tools to implement the Parks and Open Spaces Strategic Action Plan. Network plans map the aspirations for our parks and open spaces at a local scale.

A network plan will also be developed for the regional park network. A region-wide open space network plan will consider key initiatives and investment priorities at a region-wide scale.

Developing open space network plans for each of the 21 local board areas will identify actions to improve local parks and open spaces in response to local diversity and preferences.

The main components and process for developing open space network plans are summarised in Figure 3.

Figure 3: Overview of the open space network planning process.

Policy and planning: actions		Next 2 years	2-5 years	5-10 years
P1	Develop policy to guide acquiring land for parks and open spaces.			
P2	Develop provision guidelines to inform land acquisition and investment in parks and open spaces, both in existing urban areas and greenfield development areas.			
P3	Develop greenways plans for all local board areas that identify and prioritise opportunities to enhance connections between local destinations and provide recreational opportunities through streets, parks and open spaces.			
P4	Develop local park network plans for all local board areas based on analysis of the current network and that prioritise actions for improvement.			
P5	Develop a regional park network plan based on analysis of the current network and that prioritises actions for improvement.			
P6	Develop a regional open space network plan based on analysis of the provision of parks and open spaces across Auckland and outlines investment priorities at a regional scale.			
P7	Plan and implement a regional trail network that aims to provide destinations for walking and riding that will attract users from across Auckland and tourists.			
P8	Bid for world heritage status for the Auckland volcanic field.			
P9	Review and develop operational guidelines and reserve management plans to ensure consistent and transparent decision-making about how our parks and open spaces are managed.			
P10	Develop parkland design guidelines that encourage innovation and best practice in development and design of parks and open spaces.			
P11	Develop visitor strategies for parks that receive high levels of visitation to ensure visitors' experiences are enhanced while protecting the values of the park.			
P12	Establish a framework for iwi to partner and participate in policy, planning, design, development and management of parks and open spaces based on recognition and respect.			
P13	Develop guidelines for the design of play spaces and the provision of play opportunities and experiences.			
P14	Develop a policy on weed management.			
P15	Finalise and implement guidelines for the stewardship of council-owned and/or managed heritage assets.			
P16	Develop provision guidelines for recreation and sport facilities to provide informal and formal opportunities for active recreation in areas of intensification and greenfield development.			
P17	Develop policy on the provision of network and utility infrastructure and community buildings on parks and open spaces.			
P18	Identify locations where targeting ecological restoration initiatives will maximise the benefits to Auckland's biodiversity.			

## Development and management

Auckland Council undertakes a wide variety of activities to develop and manage the network of parks and open spaces. It acquires new land for new parks, designs and develops parks in new subdivisions, upgrades existing facilities, manages weeds and pests as well as regular day-to-day maintenance of our parks and open spaces.

Development and management: actions		Next 2 years	2-5 years	5-10 years
D1	Undertake landowner responsibilities to manage and maintain our parks and open spaces in the public interest, in accordance with council policy and legislative requirements.			
D2	Undertake a land acquisition programme to expand and improve Auckland's network of parks and open spaces.			
D3	Improve signage throughout the parks and open space network, including wayfinding and interpretive signage to increase awareness of our parks and open spaces and their values. Investigate the use of online and multimedia interpretation techniques and resources.			
D4	Increase the capacity of the sports field network to provide for current and future demand.			
D5	Prioritise upgrading and investment in new parks, open spaces and streetscapes in areas identified for growth (intensification and greenfield development) in the Auckland Unitary Plan.			
D6	Develop our network of walkways and cycleways through parks and open spaces to implement connections identified in greenway plans.			
D7	Support and undertake initiatives to enhance the biodiversity value of our parks, open spaces and waterways through partnerships with mana whenua, planting programmes, community groups and volunteer programmes.			
D8	Implement a coordinated and prioritised programme of conservation and management of historic heritage for our parks and open spaces to ensure that the values of these places are not lost.			
D9	Promote and manage Auckland's parks and open spaces as smoke-free environments, in accordance with Auckland Council's Smoke-Free Policy.			
D10	Manage the effects of kauri dieback disease, including using education programmes and restricting access where appropriate.			

## Partnership, promotion and advocacy

We recognise that collaboration is essential to achieve the outcomes for Auckland's parks and open spaces outlined in the priorities of this strategic action plan. The way we promote our parks and share information is also important.

Development and management: actions		Next 2 years	2-5 years	5-10 years
A1	Improve the promotion of parks and open spaces, including the provision of information about their values and recreational opportunities, as well as educational resources.			
A2	Co-govern maunga and parks with mana whenua identified through the Treaty settlement process, including preparing development and management plans for co-governed parks and open spaces.			
A3	Work with mana whenua to tell stories of Māori cultural heritage throughout our parks and open spaces network, including through place names, interpretation, artwork and memorials.			
A4	Advocate for and require high-quality open space outcomes by working with consent applicants and developers.			
A5	Collaborate and work with CCOs from the early stages of projects that have the potential to contribute to improved open space outcomes.			
A6	Develop planting guidelines to facilitate the establishment of native ecosystems and increase biodiversity values of both public open space and private land.			
A7	Develop best-practice guidelines and processes for Auckland Council working with community groups, 'friends of parks' and other special interest groups to improve parks and open spaces.			
A8	Investigate partnership opportunities with potential providers of open spaces such as schools, infrastructure providers and private sports facilities.			
A9	Support a range of volunteer programmes to facilitate community participation in the management, maintenance and enhancement of our parks and open spaces.			
A10	Establish processes to align leases and licences with strategic priorities for parks and open spaces. Ensure public open spaces subject to community leases are used efficiently through development of the community facilities network plan.			

## Research and monitoring

Good decision-making is based on sound evidence and analysis. To ensure we make the right decisions, achieve the outcomes Aucklanders value, and make good use of our resources, we need to research our parks and open spaces and understand how people use and value them.

Research and monitoring: actions		Next 2 years	2-5 years	5-10 years
R1	Establish a region-wide customer research programme to understand how Aucklanders use and value parks and open spaces.			
R2	Investigate public access to Auckland's coastline, beaches, coastal parks (including boat launching opportunities) and how population growth may affect demand and impact on these open spaces and facilities.			
R3	Identify and map historic heritage and cultural values within parks and open spaces to allow for the effective management and protection of these values and heritage sites.			
R4	Identify major tourism destinations within the open space network and identify issues and opportunities with promoting and facilitating tourism initiatives in the public open space network.			
R5	Work with mana whenua to identify, protect, preserve and manage waahi tapu and other places of significance within the public open space network.			
R6	Investigate the impact of climate change on Auckland's parks and open space network, including potential management implications and responses.			
R7	Investigate issues and options with facilitating public use of open space from alternative providers, such as schools.			
R8	Map Auckland's open space network, identifying the functions and significance of each open space to the regional network.			
R9	Support the Australasian Parks Forum research agenda and research strategy.			
R10	Develop a practical set of criteria to monitor implication of the strategic action plan and the state of Auckland's open spaces.
