

28 September 2016

Auckland Council  
Private Bag 92300  
Victoria Street West  
AUCKLAND 1142

Attention: Stephen Town, Chief Executive

Dear Stephen

**PROPOSED AUCKLAND UNITARY PLAN: DECISION OF MINISTER OF EDUCATION IN ACCORDANCE WITH S151 (2) OF THE LOCAL GOVERNMENT (AUCKLAND TRANSITIONAL PROVISIONS) ACT 2010**

Thank you for your e-letter dated 19<sup>th</sup> August 2016, containing the Auckland Council's (the Council) decisions and recommendations as set out in the Auckland Council's *Decisions Report 19 August 2016*, as they relate to the "Notice of Requirement by the Minister of Education regarding the inclusion of existing Designations in the Auckland Unitary Plan", dated 28 August 2012 (Notice of Requirement).

Pursuant to s151 (2) of the Act, the Minister of Education accepts in their entirety, the Council's recommendation set out in "7. *Decisions of Auckland Council*, and 44. *Council decisions relating to Panel report entitled "Report to Auckland Council Hearing Topic 074 (Designations), July 2016"*.

Particular reference is made to the specific recommendations included in Attachment E, where the decision of the Minister is to:

1. Accept in its entirety, recommendation no. 34 to confirm the Minister of Education's Notice of Requirement for existing designations with modifications and general submissions as per the Schedule included in Annexure 1 attached to this decision.
2. Accepts in its entirety, recommendation no. 35 to confirm the Minister of Education's Notice of Requirement for modifications to the existing designations as per the Schedule, Text Amendments and Map Amendments contained in Annexure 2 attached to this decision.
3. Accepts in its entirety, recommendation no. 36 to confirm the Minister of Education's Notice of Requirement for the modifications to the designations and submissions from the Minister of Education and Auckland Council included in the Schedule, Text Amendments and Map Amendments contained in Annexure 3 attached to this decision.

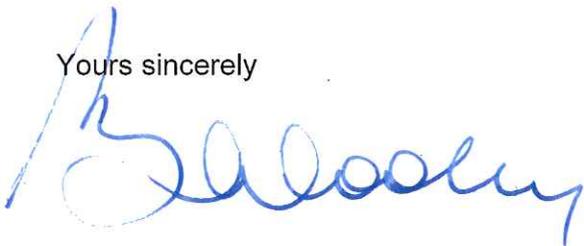

The reasons for this decision are that it is appropriate to confirm the designations as modified because:

- a) the designations, have been demonstrated to be reasonably necessary for achieving the objectives of the Minister of Education
- b) the designations are consistent with the Purpose and Principles of the Resource Management Act under Part 2
- c) the standard and site-specific conditions of the designations as recommended by the Auckland Council will ensure that any potential adverse effects of activities authorised by the designations will be acceptable, and/or appropriately avoided, remedied or mitigated
- d) for the reasons given for recommending confirmation of modified designations set out in the following reports:
  - i. "Report to Auckland Council Hearing Topic 074 Designations – Minister of Education – Inclusion of existing designations with modifications and general submissions, May 2016" (Report #1)
  - ii. "Report to Auckland Council Hearing Topic 074 Designations – Minister of Education – Designations with modifications, May 2016" (Report #2)
  - iii. "Report to Auckland Council Hearing Topic 074 Designations – Minister of Education – Designations with modifications, and submissions from Minister of Education and Auckland Council, May 2016" (Report #3).

I trust this is sufficient to enable the Council, in accordance with the provisions of section 151(5), to carry out service of the notice of this decision to all submitters, landowners and directly affected persons and within 15 working days of your receipt of this letter.

I also look forward to Council including all *Education Purposes* designations in the *Auckland Unitary Plan*, as soon as is practicable following the expiration of the appeal period and without the need to use the First Schedule of the RMA.

Yours sincerely

Brett Dooley

1. In the event that Aorere College is within the Auckland International Airport Moderate Aircraft Noise Area (MANA), the following condition applies: 1(A). The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA.

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA"/NIWA Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow")... capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either: (i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time, otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser; or (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA"/NIWA Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality.

**Changes to text – standard conditions  
Tracked Changes and Clean Versions**

## **Standard Conditions for All Education Designations**

The Minister requires each designation to be subject to the following explanatory notes and conditions:

### **Explanatory Notes**

1. Each of these designations enables the establishment of a school that is able but is not required to cater for all the school years listed in the designation description.
2. “Educational Purposes” for the purposes of these designations shall, in the absence of specific conditions to the contrary:
  - (i) Enable the use of the facilities on the designated site by and for the educational benefit of any school age students (ie: years 0 to 13) regardless of whether they are enrolled at any institution located on that designated site.
  - (ii) Enable the provision of supervised care and study opportunities for students outside school hours in school facilities
  - (iii) Enable the provision of community education (eg: night classes for adults) outside school hours in school facilities
  - (iv) Include but not be limited to the provision of academic, sporting, social and cultural education including through:
    - Formal and informal recreational, sporting and outdoor activities and competitions whether carried out during or outside school hours;
    - Formal and informal cultural activities and competitions whether carried out during or outside school hours; and
    - The provision of specialist hubs and units (including language immersion units and teen parent units) for students with particular educational requirements or special needs.
  - (v) Enable the use of facilities for purposes associated with the education of students including school assemblies, functions, fairs and other gatherings whether carried out during or outside school hours.
  - (vi) Enable the provision of associated administrative services; carparking and vehicle manoeuvring; and health, social service and medical services (including dental clinics and sick bays).
  - (vii) Enable the housing on site for staff members whose responsibilities require them to live on site (eg: school caretaker) and their families.
3. Where any standard condition conflicts with a site specific condition, the site specific condition shall take precedence.

## Conditions

### 1. Height in Relation to Boundary

Any new building or building extension (excluding goal posts and similar structures) shall comply with the height in relation to boundary controls [attached to this Schedule] from any adjoining land zoned primarily for a residential purpose, or zoned for an open space/outdoor recreation purpose.

### 2. Noise

The ~~noise (rating) level arising from the operation of the school must~~shall comply with the following noise ~~levels~~limits ~~when measured within~~at the boundary of any ~~residentially zoned site, or within the notional boundary of any site in any rural zone zoned primarily for residential purpose, or in the case of a rural zone, at a point 20m from the facade of any dwelling, or the site boundary, whichever is closest to the dwelling:~~

DAYTIME	NOISE LEVEL ( $L_{eq}$ ) dBA
Mon – Sun, 7.00am – 10.00pm (0700 – 2200)	55
Mon – Sun, 10.00pm – 7.00am (2200 – 700)	45

$L_{MAX} = 75$ dBA

<u>Time</u>	<u>Noise level</u>
<u>Monday to Saturday 7am to 10pm</u>	<u>55dB <math>L_{Aeq}</math></u>
<u>Sunday 9am to 6pm</u>	
<u>All other times</u>	<u>45 dB <math>L_{Aeq}</math></u> <u>75 dB <math>L_{AFmax}</math></u>

These noise ~~limits~~levels ~~do~~shall not apply to noise from ~~standard school sports and school~~outdoor recreational activities occurring between ~~8am~~0800 and 6pm1800 hours Monday to Saturday.

Noise levels shall be measured and assessed in accordance with NZS 6801:2008 “Measurement of Environmental Sound” and NZS 6802:2008 “Environmental Noise”.

Noise from construction shall not exceed the limits recommended in, and shall be measured in accordance with, New Zealand Standards NZS 6803:1999 “Acoustics – Construction Noise”.

### 3. On-Site Car Parking – Schools

Additional on-site car parking shall be provided at the rate of two carparks per new classroom or classroom equivalent, except where the council accepts, on the basis of a specifically commissioned parking study by an appropriately qualified engineer and/or transportation planner, that a lesser level is appropriate. For the avoidance of doubt, this condition shall only apply where there is a net increase in the number of classrooms or classroom equivalents.

#### **4. On-Site Car Parking – Early Childhood Education (Preschool)**

In addition to any car parking required for the school, on-site car parking for early childhood education (preschool) shall be provided at the rate of one car park per every 10 children the facility is licensed or designed to accommodate, plus one per each full time equivalent staff member required for the license or design capacity of the centre, except where the Council accepts, on the basis of a specifically commissioned parking study by an appropriately qualified engineer and/or transportation planner, that a lesser level is appropriate.

#### **5. Scheduled Trees**

No tree or group of trees specifically scheduled in the District Plan may be cut, damaged, altered, injured, destroyed or partly destroyed, or works undertaken within the drip line of any such tree(s), other than in accordance with an outline plan submitted and processed in accordance with the s176A of the Resource Management Act 1991. This condition shall not apply to minor trimming or maintenance undertaken by hand operated secateurs or pruning shears in accordance with accepted arboricultural practice, or where removal or trimming is required to safeguard life or property.

#### ~~6. Scheduled Heritage Buildings~~

~~Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate:~~

- ~~a. an assessment of the effects on the historic heritage values of the scheduled historic heritage place;~~
- ~~b. a consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled historic heritage place;~~
- ~~c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and~~
- ~~d. an assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place.~~

~~This condition shall not apply in respect of repair or maintenance of the scheduled historic heritage place.~~

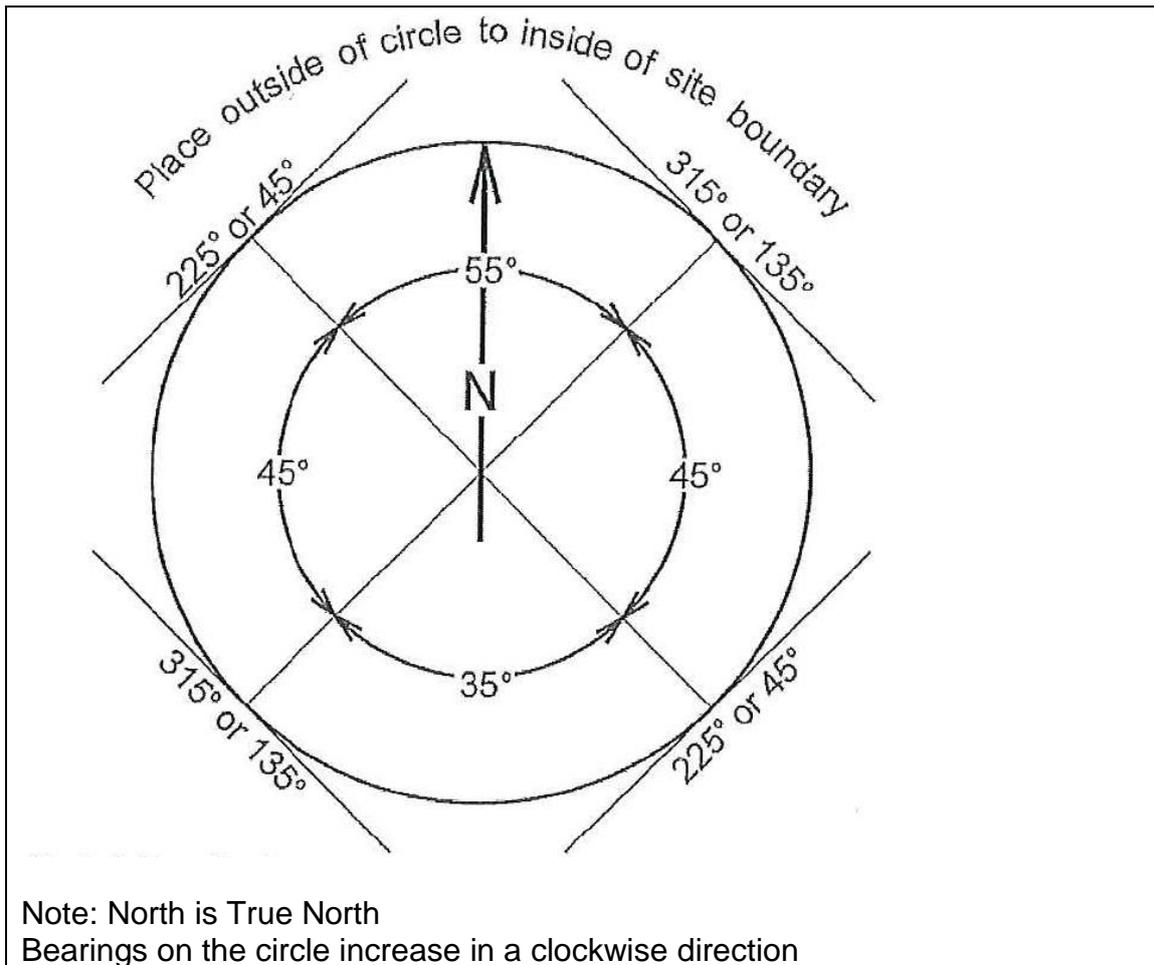

~~This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the construction works are in accordance with this conservation or similar plan.~~

#### **7. 6. Outline Plans**

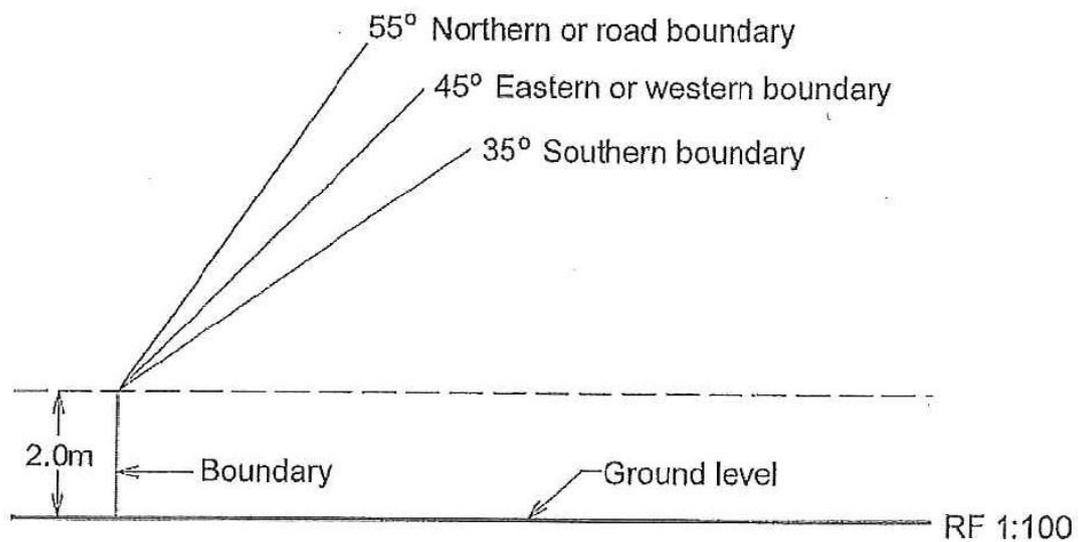

That an outline plan of works shall not be required for:

- a) Any internal building works other than those that result in a net increase in the number of classrooms or classroom equivalents;
- b) General building maintenance and repair work including but not limited to re-painting, re-cladding and re-roofing;
- c) Installing, modifying and removing playground furniture and sports structures (e.g. goal posts);
- d) Amending any internal pedestrian circulation routes/pathways;
- e) Installing, maintaining or repairing any in ground infrastructure services such as stormwater, sewerage and water lines and connections, including any ancillary earthworks;
- f) Provision of landscaping and gardens, provided that it does not conflict with any designation condition or alter landscaping required as mitigation as part of an outline plan for other works; or
- g) General site maintenance and repair work, or boundary fencing otherwise permitted by the District Plan.

## Recession Plan Cross Section

## Standard Conditions for All Education Designations

### Explanatory Notes

1. Each of these designations enables the establishment of a school that is able but is not required to cater for all the school years listed in the designation description.
2. “Educational Purposes” for the purposes of these designations shall, in the absence of specific conditions to the contrary:
  - (viii) Enable the use of the facilities on the designated site by and for the educational benefit of any school age students (ie: years 0 to 13) regardless of whether they are enrolled at any institution located on that designated site.
  - (ix) Enable the provision of supervised care and study opportunities for students outside school hours in school facilities
  - (x) Enable the provision of community education (eg: night classes for adults) outside school hours in school facilities
  - (xi) Include but not be limited to the provision of academic, sporting, social and cultural education including through:
    - Formal and informal recreational, sporting and outdoor activities and competitions whether carried out during or outside school hours;
    - Formal and informal cultural activities and competitions whether carried out during or outside school hours; and
    - The provision of specialist hubs and units (including language immersion units and teen parent units) for students with particular educational requirements or special needs.
  - (xii) Enable the use of facilities for purposes associated with the education of students including school assemblies, functions, fairs and other gatherings whether carried out during or outside school hours.
  - (xiii) Enable the provision of associated administrative services; carparking and vehicle manoeuvring; and health, social service and medical services (including dental clinics and sick bays).
  - (xiv) Enable the housing on site for staff members whose responsibilities require them to live on site (eg: school caretaker) and their families.
3. Where any standard condition conflicts with a site specific condition, the site specific condition shall take precedence.

## Conditions

### 1. Height in Relation to Boundary

Any new building or building extension (excluding goal posts and similar structures) shall comply with the height in relation to boundary controls [attached to this Schedule] from any adjoining land zoned primarily for a residential purpose, or zoned for an open space/outdoor recreation purpose.

### 2. Noise

The noise (rating) level arising from the operation of the school must comply with the following noise levels when measured within the boundary of any residentially zoned site, or within the notional boundary of any site in any rural zone:

Time	Noise level
Monday to Saturday 7am to 10pm	55dB L <sub>Aeq</sub>
Sunday 9am to 6pm	
All other times	45 dB L <sub>Aeq</sub> 75 dB L <sub>AFmax</sub>

These noise limits do not apply to noise from school sports and school recreational activities occurring between 8am and 6pm Monday to Saturday.

Noise levels shall be measured and assessed in accordance with NZS 6801:2008 "Measurement of Environmental Sound" and NZS 6802:2008 "Environmental Noise".

Noise from construction shall not exceed the limits recommended in, and shall be measured in accordance with, New Zealand Standards NZS 6803:1999 "Acoustics – Construction Noise".

### 3. On-Site Car Parking – Schools

Additional on-site car parking shall be provided at the rate of two carparks per new classroom or classroom equivalent, except where the council accepts, on the basis of a specifically commissioned parking study by an appropriately qualified engineer and/or transportation planner, that a lesser level is appropriate. For the avoidance of doubt, this condition shall only apply where there is a net increase in the number of classrooms or classroom equivalents.

### 4. On-Site Car Parking – Early Childhood Education (Preschool)

In addition to any car parking required for the school, on-site car parking for early childhood education (preschool) shall be provided at the rate of one car park per every 10 children the facility is licensed or designed to accommodate, plus one per each full time equivalent staff member required for the license or design capacity of the centre, except where the Council accepts, on the basis of a specifically commissioned parking study by an appropriately qualified engineer and/or transportation planner, that a lesser level is appropriate.

## **5. Scheduled Trees**

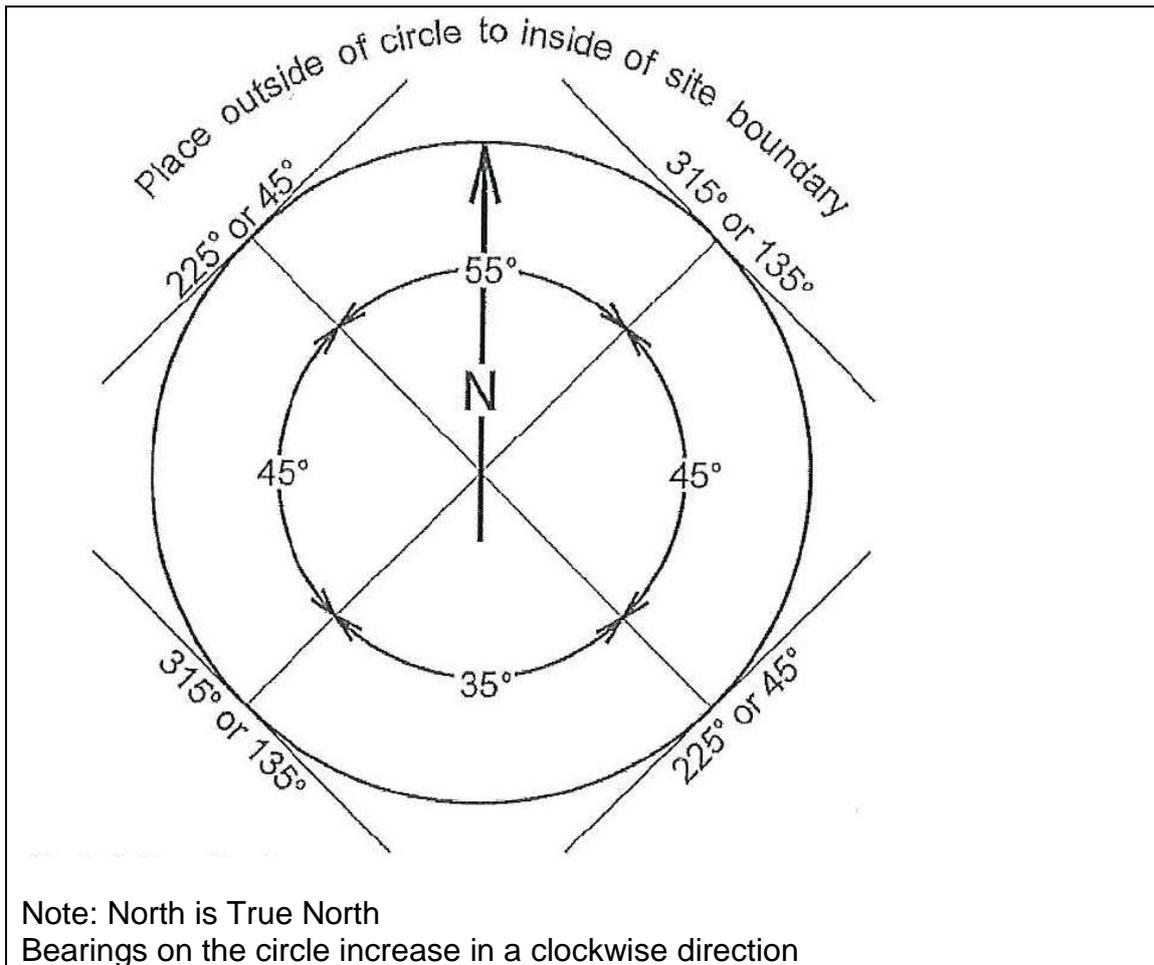

No tree or group of trees specifically scheduled in the District Plan may be cut, damaged, altered, injured, destroyed or partly destroyed, or works undertaken within the drip line of any such tree(s), other than in accordance with an outline plan submitted and processed in accordance with the s176A of the Resource Management Act 1991. This condition shall not apply to minor trimming or maintenance undertaken by hand operated secateurs or pruning shears in accordance with accepted arboricultural practice, or where removal or trimming is required to safeguard life or property.

## **6. Outline Plans**

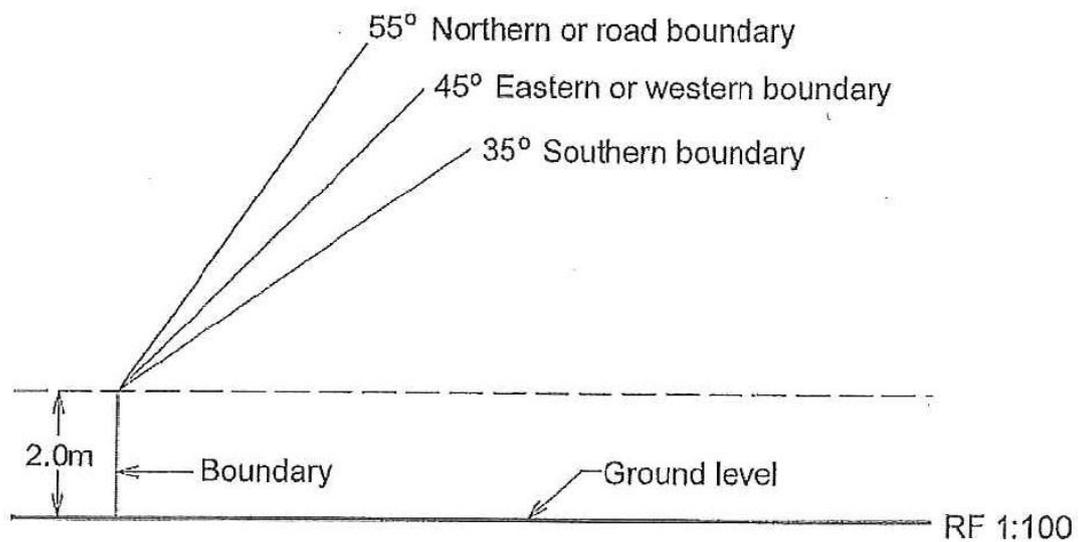

That an outline plan of works shall not be required for:

- a) Any internal building works other than those that result in a net increase in the number of classrooms or classroom equivalents;
- b) General building maintenance and repair work including but not limited to re-painting, re-cladding and re-roofing;
- c) Installing, modifying and removing playground furniture and sports structures (e.g. goal posts);
- d) Amending any internal pedestrian circulation routes/pathways;
- e) Installing, maintaining or repairing any in ground infrastructure services such as stormwater, sewerage and water lines and connections, including any ancillary earthworks;
- f) Provision of landscaping and gardens, provided that it does not conflict with any designation condition or alter landscaping required as mitigation as part of an outline plan for other works; or
- g) General site maintenance and repair work, or boundary fencing otherwise permitted by the District Plan.

## North and West

## 4502 Albany Senior High School

Designation Number	4502
Requiring Authority	Minister of Education
Location	536 and 546 Albany Highway, Albany
Rollover Designation	Yes
Legacy Reference	Designation 17, Auckland Council District Plan (North Shore Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - senior high school (years 11 - 13).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The roll of the school shall not exceed 1,500 pupils.

#### Buildings and Site Layout

2. All buildings and structures shall comply with the following development controls:
  - a. Height in relation to boundary: no part of any building shall infringe a height in relation to boundary control from any adjacent land zoned residential of 2.5m plus the shortest horizontal distance between that part of the building and any site boundary.
  - b. The height of all buildings (excluding any goal posts associated with sporting activities), shall be limited to the height limits shown on the concept plan attached to this designation.
  - c. Minimum building setbacks: From the Albany Highway boundary as at 1 June 2007 – 5m; Side and Rear boundaries — 1.2m (includes unformed road on southwest boundary).
  - d. Maximum building coverage: 35%
  - e. Minimum permeable area: 30%

#### Transportation and Traffic

3. That the School Travel Plan being developed by the Requiring Authority (as a component of the Albany Senior High School project) to actively promote the Traffic Demand Management (TDM) targets for travel modes other than by private vehicles and thereby mitigate the impact of school traffic on Albany Highway, be developed in consultation with Council officers. A preliminary travel plan, shall be prepared prior to occupation of the site for academic, and shall be reviewed and updated annually. The Travel Plan shall be developed in conjunction with the School, Auckland Transport and the Council as part of an overall Integrated Transport plan that covers the needs of all educational institutes within the Albany Basin.

4. The Requiring Authority and the School Board of Trustees shall (i) monitor school related

traffic and parking in the vicinity of the school, and (ii) resource, develop, review and if necessary amend the Travel Plan for the school in consultation with the Council to mitigate real and potential adverse traffic effects as and when the school becomes operational. The monitoring of parking shall have particular regard to any overspill of car parking from the school to the neighbouring residential area of The Landing.

#### Ecological and Arboriculture

5. That within Area C as shown on the concept plan attached to this designation, there shall be no removal of any tree unless such a tree is dead, suffering from an untreatable disease which has caused or will cause a significant decline in its health, or is causing significant risk to people or property. A tree shall be deemed to be within Area C if more than 50% of the trunk is located within this area. No buildings shall be erected within Area C. For the purposes of this condition, the term 'building' means any permanent structure exceeding 0.5m in height. Minor structures associated with the use of tracks such as steps, boardwalks and directional/educational signage not exceeding 0.5m in height shall be allowed under this condition, provided that such works are undertaken in a manner that does not detrimentally affect the health of any trees.

6. The Requiring Authority shall undertake the establishment of 5ha revegetation plantings to off-set the loss of vegetation. This may include new areas of planting and/or enrichment planting of existing planted areas that would benefit from increased planting density. Such planting will be undertaken within the Lucas Creek catchment and, where proposed on reserve land, will meet the approval of [the appropriate Council officer]. In recognition that suitable planting locations may be owned by a third Party (e.g. reserve land administered by the Auckland Council), a cash contribution offered to the Auckland, Council equivalent to the actual cost of undertaking the necessary plantings (on a pro rata basis for any area less than 5ha) shall be deemed to satisfy this condition should the Requiring Authority be unable to reasonably undertake the required planting due to permissions being declined by third parties for suitable locations within the Lucas Creek Catchment. The Requiring Authority shall be required to show it has taken all reasonable steps in trying to secure access to suitable locations for planting before offering any cash contribution in lieu of works to the Auckland Council.

7. The Requiring Authority shall undertake restoration plantings within the cleared tracks within the bush area that were created in order to facilitate the geo-tech investigations (although only where these plantings are outside the footprint of the school buildings sports fields and school operational areas) with the exception of retaining a fire egress track as indicated on the concept plan submitted with the designation which may potentially be required depending on the final design solution adopted.

8. The Requiring Authority shall undertake, dense planting of the edges of the remaining bush with pioneer "edge" type species in order to protect any remaining 'interior' habitats and communities from edge effects.

9. The Requiring Authority shall undertake the planting of tree species that would be attractive to birds along the frontage between the school and Albany Highway (e.g. Puriri and Kowhai), in order to maximise the “invitation area” on the school side of the Oteha Stream wildlife corridor.

10. A comprehensive salvage operation is to be undertaken with regard to lizards (both skinks and geckos) prior to the commencement of any vegetation removal. The methods to be employed in this salvage operation will need to be prepared by a suitably qualified and experienced herpetologist, as will the actual salvage operation itself.

11. The Requiring Authority shall undertake the preparation of a combined Landscape Mitigation, Tree Protection and Ecological Management Plan (LMTPEMP) prepared by suitably qualified and experienced landscape architect, arborist and ecologists, which shall be submitted to the Auckland Council as part of the first Outline Plan of Works. This Plan(s) shall demonstrate achievement of conditions 11 -16 inclusive. It shall have regard to:

- a. The Freshwater Ecological Values Report from SKM dated October 2007;
- b. The evidence of Mr Craig Douglas Bishop report in the matter of the Resource Management Act 1991 and in the matter of a notice of requirements by the Minister of Education regarding the Albany Senior High School dated September 2007; and
- c. The Peer Review of Assessment of Ecological Effects report prepared by Boffa Miskell dated October 2007.

12. The LMTPEMP will include:

- a. Details of how the significant trees on the site which are in close proximity to proposed development are to be protected from damage or accidental spillage during the construction period and supplied with adequate air and water to their root zones. This should include on monitoring of water quality and quantity to ensure changes in available soil moisture levels around the trees are minimized and irrigation undertaken if necessary. These trees are identified in the Arborlab Report (25 September 2006) as trees 6, 7, 8, 10, 11, 12 and 12a (herein referred to as 'Significant Trees') and the group of trees scheduled under the North Shore section of the District Plan as identified in the District Plan as No. 94 and identified in the Arborlab Report as T22 (1 x Kauri), T23 (1 x Rimu) and T24 (1 x Totara).
- b. A report from a qualified Arborist attesting to the effects of the proposed works on these trees will be submitted to Auckland Council for assessment prior to works commencing.
- c. A requirement that no site works or hard surfacing shall occur within 10m of the centre of any Scheduled Trees on sites identified in the District Plan as at 1 June 2007 as No. 94 and identified in the Arborlab Report submitted with the notice of requirement as T22 (1 x Kauri), T23 (1 x Rimu) and T24 (1 x Totara), provided that minor low impact works within this area may occur with the express written permission of the Council,
- d. A requirement that no site works shall occur that have a detrimental effect on any trees or vegetation on neighbouring properties, without their owners and the Auckland Council's express written permission and mitigation to the approval of Auckland Council.
- e. A schedule of the species, number of plants and sizes at time of planting for both

revegetation areas and amenity planting.

f. A landscape plan shall include a date for implementation of the planting which shall be prior to the end of the planting season (May to September) following the completion of site works.

The planting must be maintained in perpetuity on the site being used for education purposes.

g. An implementation and maintenance programme, including a weed management plan for the site (detailing a minimum of three (3) years following initial planting). The plan shall include details or target weed species (actual and likely), methods of eradication, DAA-004682-94-43-V5 ground preparation for the replanting, replacement species types, replacement plant numbers and replacement plant sizes (at the time of planting).

h. The means by which twice-annual weed and animal pest/predator monitoring will be undertaken, and the means by which the result will trigger appropriate control activities.

i. The means by which students will be encouraged to participate in the care of this bush, with particular regard to formal educational opportunities and the school curriculum.

j. The means by which student access into the bush area will be controlled.

13. All stormwater, wastewater and stream alteration plans shall be prepared in consultation with the Auckland Council Arborist and a suitably qualified Arborist for the Minister of Education and final plans shall not have any significant detrimental effects on the significantly Scheduled Trees.

"14. The war memorial plinth located between the trees identified in ~~Condition 19~~Condition 11 above shall be retained in its existing position as at 1 June 2007

15. The stone bollards adjacent to the road frontage that were erected as a World War II memorial to past pupils shall be retained on site, but may be relocated from their existing positions.

16. The Old Albany School Building scheduled as a building of heritage significance in the District Plan as at 1 June 2007 may be relocated within the designation as part of any school development, but may not be demolished or removed from the site (except that it may be temporarily removed from the site during construction of the school for the purposes of protection from construction activity and/restoration). The details of how this building will be reinstated shall be detailed in any Outline Plan of Works involving relocation of this building. This condition shall only apply to the core of the building as it stood in October 1938, and not the more recent additions.

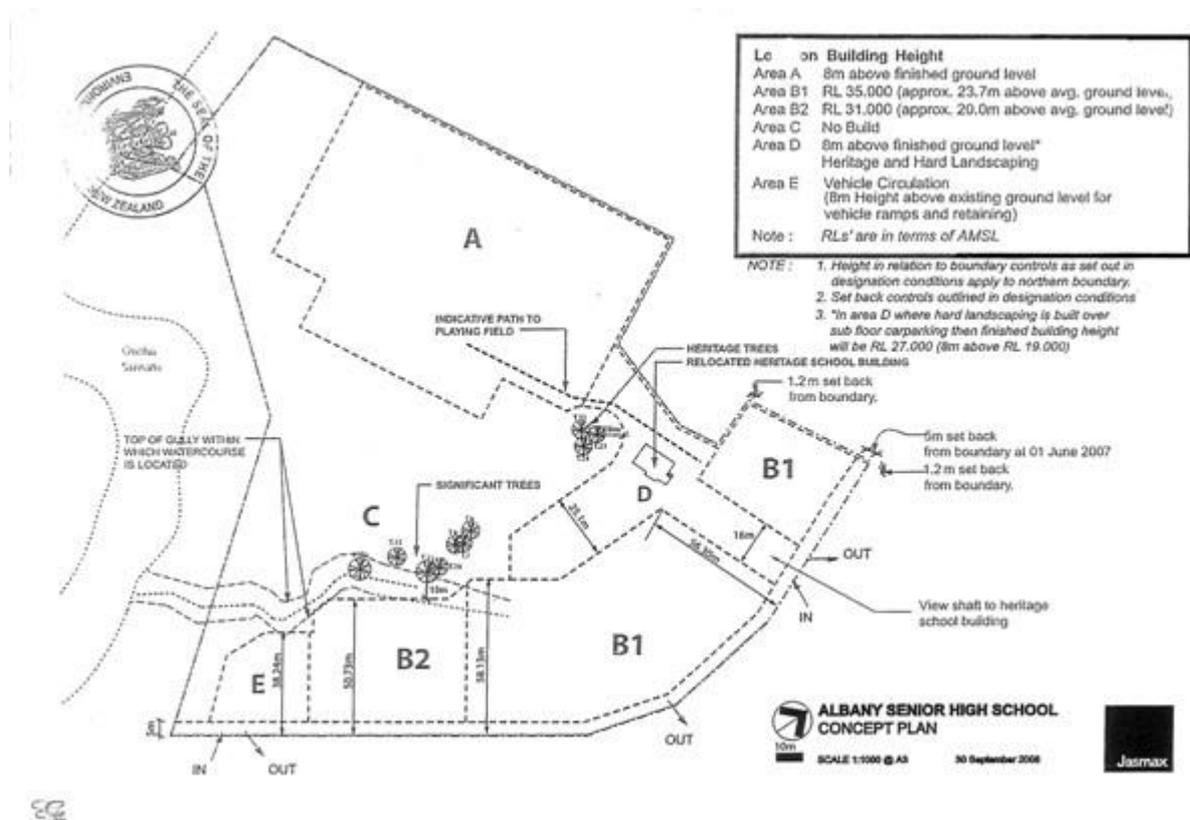

17. A minimum of one parking space for every 10 pupils aged 16 or over, plus one for every employee shall be provided on-site, to a maximum of 300 spaces. For the avoidance of doubt, these parking spaces shall include temporary spaces for drop off and pick up of students.

18. Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate: a. An assessment of the effects on the historic heritage values of the scheduled historic heritage place; b. a consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled

historic heritage place; c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and d. an assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place. This condition shall not apply in respect of repair or maintenance of the scheduled historic heritage place. This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed construction works are in accordance with this conservation or similar plan.

### Albany Senior High School Concept Plan

## 4502 Albany Senior High School

Designation Number	4502
Requiring Authority	Minister of Education
Location	536 and 546 Albany Highway, Albany
Rollover Designation	Yes
Legacy Reference	Designation 17, Auckland Council District Plan (North Shore Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - senior high school (years 11 - 13).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The roll of the school shall not exceed 1,500 pupils.

#### Buildings and Site Layout

2. All buildings and structures shall comply with the following development controls:
  - a. Height in relation to boundary: no part of any building shall infringe a height in relation to boundary control from any adjacent land zoned residential of 2.5m plus the shortest horizontal distance between that part of the building and any site boundary.
  - b. The height of all buildings (excluding any goal posts associated with sporting activities), shall be limited to the height limits shown on the concept plan attached to this designation.
  - c. Minimum building setbacks: From the Albany Highway boundary as at 1 June 2007 – 5m; Side and Rear boundaries — 1.2m (includes unformed road on southwest boundary).
  - d. Maximum building coverage: 35%
  - e. Minimum permeable area: 30%

#### Transportation and Traffic

3. That the School Travel Plan being developed by the Requiring Authority (as a component of the Albany Senior High School project) to actively promote the Traffic Demand Management (TDM) targets for travel modes other than by private vehicles and thereby mitigate the impact of school traffic on Albany Highway, be developed in consultation with Council officers. A preliminary travel plan, shall be prepared prior to occupation of the site for academic, and shall be reviewed and updated annually. The Travel Plan shall be developed in conjunction with the School, Auckland Transport and the Council as part of an overall Integrated Transport plan that covers the needs of all educational institutes within the Albany Basin.

4. The Requiring Authority and the School Board of Trustees shall (i) monitor school related

traffic and parking in the vicinity of the school, and (ii) resource, develop, review and if necessary amend the Travel Plan for the school in consultation with the Council to mitigate real and potential adverse traffic effects as and when the school becomes operational. The monitoring of parking shall have particular regard to any overspill of car parking from the school to the neighbouring residential area of The Landing.

#### Ecological and Arboriculture

5. That within Area C as shown on the concept plan attached to this designation, there shall be no removal of any tree unless such a tree is dead, suffering from an untreatable disease which has caused or will cause a significant decline in its health, or is causing significant risk to people or property. A tree shall be deemed to be within Area C if more than 50% of the trunk is located within this area. No buildings shall be erected within Area C. For the purposes of this condition, the term 'building' means any permanent structure exceeding 0.5m in height. Minor structures associated with the use of tracks such as steps, boardwalks and directional/educational signage not exceeding 0.5m in height shall be allowed under this condition, provided that such works are undertaken in a manner that does not detrimentally affect the health of any trees.

6. The Requiring Authority shall undertake the establishment of 5ha revegetation plantings to off-set the loss of vegetation. This may include new areas of planting and/or enrichment planting of existing planted areas that would benefit from increased planting density. Such planting will be undertaken within the Lucas Creek catchment and, where proposed on reserve land, will meet the approval of [the appropriate Council officer]. In recognition that suitable planting locations may be owned by a third Party (e.g. reserve land administered by the Auckland Council), a cash contribution offered to the Auckland, Council equivalent to the actual cost of undertaking the necessary plantings (on a pro rata basis for any area less than 5ha) shall be deemed to satisfy this condition should the Requiring Authority be unable to reasonably undertake the required planting due to permissions being declined by third parties for suitable locations within the Lucas Creek Catchment. The Requiring Authority shall be required to show it has taken all reasonable steps in trying to secure access to suitable locations for planting before offering any cash contribution in lieu of works to the Auckland Council.

7. The Requiring Authority shall undertake restoration plantings within the cleared tracks within the bush area that were created in order to facilitate the geo-tech investigations (although only where these plantings are outside the footprint of the school buildings sports fields and school operational areas) with the exception of retaining a fire egress track as indicated on the concept plan submitted with the designation which may potentially be required depending on the final design solution adopted.

8. The Requiring Authority shall undertake, dense planting of the edges of the remaining bush with pioneer "edge" type species in order to protect any remaining 'interior' habitats and communities from edge effects.

9. The Requiring Authority shall undertake the planting of tree species that would be attractive to birds along the frontage between the school and Albany Highway (e.g. Puriri and Kowhai), in order to maximise the “invitation area” on the school side of the Oteha Stream wildlife corridor.

10. A comprehensive salvage operation is to be undertaken with regard to lizards (both skinks and geckos) prior to the commencement of any vegetation removal. The methods to be employed in this salvage operation will need to be prepared by a suitably qualified and experienced herpetologist, as will the actual salvage operation itself.

11. The Requiring Authority shall undertake the preparation of a combined Landscape Mitigation, Tree Protection and Ecological Management Plan (LMTPEMP) prepared by suitably qualified and experienced landscape architect, arborist and ecologists, which shall be submitted to the Auckland Council as part of the first Outline Plan of Works. This Plan(s) shall demonstrate achievement of conditions 11 -16 inclusive. It shall have regard to:

- a. The Freshwater Ecological Values Report from SKM dated October 2007;
- b. The evidence of Mr Craig Douglas Bishop report in the matter of the Resource Management Act 1991 and in the matter of a notice of requirements by the Minister of Education regarding the Albany Senior High School dated September 2007; and
- c. The Peer Review of Assessment of Ecological Effects report prepared by Boffa Miskell dated October 2007.

12. The LMTPEMP will include:

- a. Details of how the significant trees on the site which are in close proximity to proposed development are to be protected from damage or accidental spillage during the construction period and supplied with adequate air and water to their root zones. This should include on monitoring of water quality and quantity to ensure changes in available soil moisture levels around the trees are minimized and irrigation undertaken if necessary. These trees are identified in the Arborlab Report (25 September 2006) as trees 6, 7, 8, 10, 11, 12 and 12a (herein referred to as 'Significant Trees') and the group of trees scheduled under the North Shore section of the District Plan as identified in the District Plan as No. 94 and identified in the Arborlab Report as T22 (1 x Kauri), T23 (1 x Rimu) and T24 (1 x Totara).
- b. A report from a qualified Arborist attesting to the effects of the proposed works on these trees will be submitted to Auckland Council for assessment prior to works commencing.
- c. A requirement that no site works or hard surfacing shall occur within 10m of the centre of any Scheduled Trees on sites identified in the District Plan as at 1 June 2007 as No. 94 and identified in the Arborlab Report submitted with the notice of requirement as T22 (1 x Kauri), T23 (1 x Rimu) and T24 (1 x Totara), provided that minor low impact works within this area may occur with the express written permission of the Council,
- d. A requirement that no site works shall occur that have a detrimental effect on any trees or vegetation on neighbouring properties, without their owners and the Auckland Council's express written permission and mitigation to the approval of Auckland Council.
- e. A schedule of the species, number of plants and sizes at time of planting for both

revegetation areas and amenity planting.

f. A landscape plan shall include a date for implementation of the planting which shall be prior to the end of the planting season (May to September) following the completion of site works.

The planting must be maintained in perpetuity on the site being used for education purposes.

g. An implementation and maintenance programme, including a weed management plan for the site (detailing a minimum of three (3) years following initial planting). The plan shall include details or target weed species (actual and likely), methods of eradication, DAA-004682-94-43-V5 ground preparation for the replanting, replacement species types, replacement plant numbers and replacement plant sizes (at the time of planting).

h. The means by which twice-annual weed and animal pest/predator monitoring will be undertaken, and the means by which the result will trigger appropriate control activities.

i. The means by which students will be encouraged to participate in the care of this bush, with particular regard to formal educational opportunities and the school curriculum.

j. The means by which student access into the bush area will be controlled.

13. All stormwater, wastewater and stream alteration plans shall be prepared in consultation with the Auckland Council Arborist and a suitably qualified Arborist for the Minister of Education and final plans shall not have any significant detrimental effects on the significantly Scheduled Trees.

14. The war memorial plinth located between the trees identified in Condition 11 above shall be retained in its existing position as at 1 June 2007

15. The stone bollards adjacent to the road frontage that were erected as a World War II memorial to past pupils shall be retained on site, but may be relocated from their existing positions.

16. The Old Albany School Building scheduled as a building of heritage significance in the District Plan as at 1 June 2007 may be relocated within the designation as part of any school development, but may not be demolished or removed from the site (except that it may be temporarily removed from the site during construction of the school for the purposes of protection from construction activity and/restoration). The details of how this building will be reinstated shall be detailed in any Outline Plan of Works involving relocation of this building. This condition shall only apply to the core of the building as it stood in October 1938, and not the more recent additions.

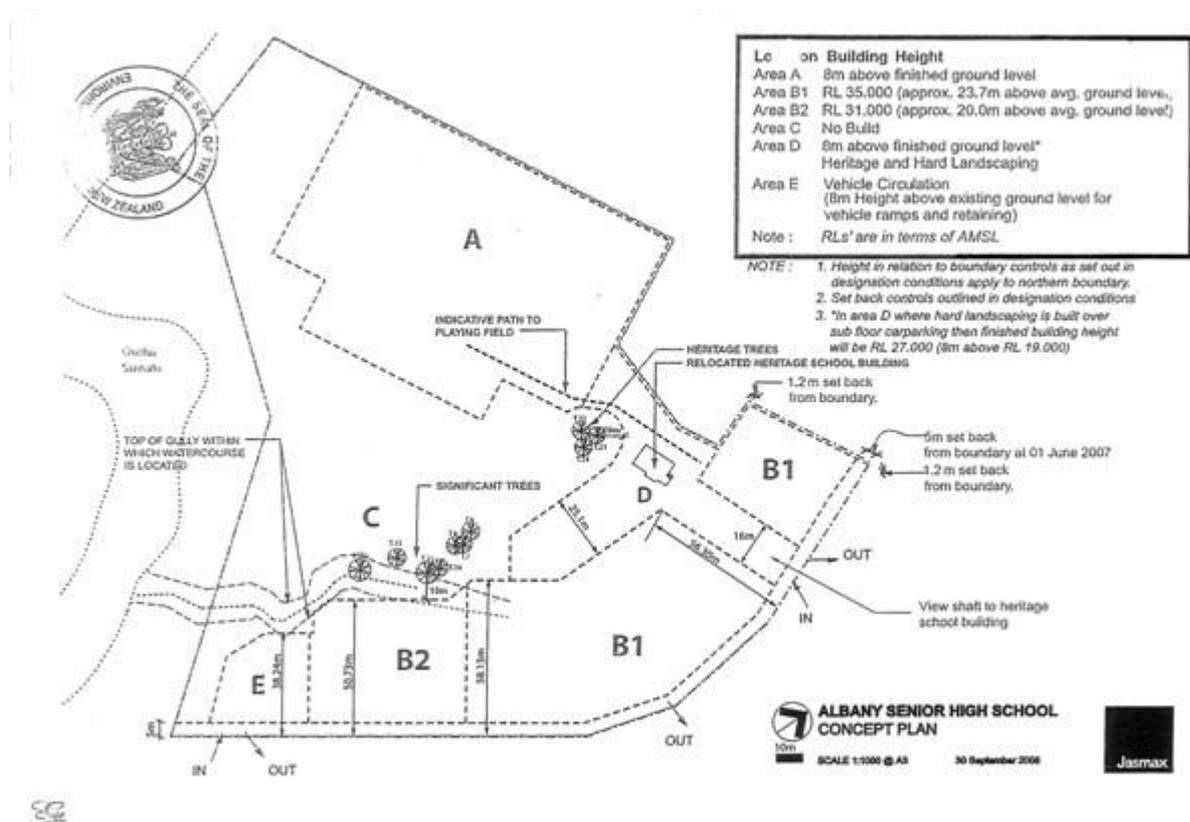

17. A minimum of one parking space for every 10 pupils aged 16 or over, plus one for every employee shall be provided on-site, to a maximum of 300 spaces. For the avoidance of doubt, these parking spaces shall include temporary spaces for drop off and pick up of students.

18. Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate: a. An assessment of the effects on the historic heritage values of the scheduled historic heritage place; b. a consideration of alternative methods and/or appropriate

mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled historic heritage place; c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and d. an assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place. This condition shall not apply in respect of repair or maintenance of the scheduled historic heritage place. This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed construction works are in accordance with this conservation or similar plan.

## 4608 Glen Eden School

Designation Number	4608
Requiring Authority	Minister of Education
Location	3 Glenview <u>Road</u> , Glen Eden
Rollover Designation	Yes
Legacy Reference	Designation ME38, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

### **Purpose**

Educational purposes - primary school (years 0 - 8).

### **Conditions**

The standard conditions for all Minister of Education designations apply to this designation.

Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate:

- a. an assessment of the effects on the historic heritage values of the scheduled historic heritage place;
- b. a consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled historic heritage place;
- c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and
- d. An assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place.

This condition shall not apply in respect or maintenance of the scheduled historic heritage place.

This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed construction works are in accordance with this conservation or similar plan.

## 4635 Hobsonville Point Primary School

Designation Number	4635
Requiring Authority	Minister of Education
Location	<u>Buckley Avenue, 18 De Havilland Rd</u> Hobsonville
Rollover Designation	Yes
Legacy Reference	Designation ME61, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The designation shall lapse on the expiry of 15 years from the date on which it is included in the District Plan if it has not been given effect to before the end of that period.
2. The requiring authority shall, either directly or through the School Board of Trustees:
  - i. Monitor school related vehicle traffic in the vicinity of the school once a year for a period of 3 years following the opening of the school.
  - ii. Resource, develop, review and action a [Travel Plan](#) which:
    - a. Sets the goals of the school with respect to sustainable travel modes and to mitigate real and potential adverse traffic effects;
    - b. Seeks to minimise the provision of on-[site](#) car parking;
    - c. Facilitates the integration of the school with the surrounding transport network (including issues of pedestrian and cyclist permeability into the [site](#));
    - d. Is maintained and updated annually while the school is operating under this designation.

This [Travel Plan](#) shall be developed in consultation with Auckland Council and Auckland Transport or their successors and shall be reviewed at the time of submitting each Outline Plan of Works relating to increased capacity.

3. The proposed development shall be subject to the following conditions regarding traffic and parking:
  - a. For the primary school parking shall be provided on a staged basis at a rate of three parking spaces per two classrooms plus two per three staff members, unless the [Travel Plan](#) developed under Condition 2(ii) identifies that a lower level of parking provision can meet the demands for off street parking.
  - b. For the early childhood education centre car parking shall be provided on a staged basis at a rate of one per four child places per session.
  - c. Disabled and loading parking provisions shall be provided in accordance with the specifications provided in the Waitakere City Council - Code of Practice (or its equivalent document) and in accordance with the minimum requirements stipulated in the Auckland Regional Parking Strategy 2009.
  - iv. The design and layout of group car-parking areas and if required bus/vehicle passenger pick up and drop off areas shall be developed in consultation with [the appropriate Council officer].
4. All activities taking place at the school shall comply with the following noise levels measured at the most exposed location at or within the boundary of properties zoned for residential purposes:

- a. 7.00am-7.00pm Monday-Saturday = [L10](#) 50dBA
- b. 7.00pm-10.00pm Monday-Saturday 7.00am-10.00pm Sundays & Public Holidays = [L10](#) 45dBA
- c. 10.00pm-7.00pm Other times = [L10](#) 40dBA, LMax 70dBA

This provision shall not apply in respect of the noise generated from normal outdoor school activities between 0800hrs and 1800hrs (excluding Sundays and public holidays). Sound will be measured in accordance with the requirements of NZS 6801: 1991 'Acoustics - Measurement of Sound' and assessed in accordance with requirements of NZS 6802:1991'Assessment of Environmental Sound'.

5. In the event of archaeological evidence being uncovered (e.g. shell, middens, hangi or ovens, pit depressions, defensive ditched, artifactual material or human bones) work is to cease in the vicinity of the discovery, and an Archaeologist, Historic Places Trust and Auckland Council are to be contacted so that appropriate action can be taken before any work can recommence there.

6. All [buildings](#) and structures shall be designed in recognition of the matters listed in Condition (12) and shall comply with the following development controls:

[Site](#) Coverage

- a. Maximum [building coverage](#): 35%;
- b. Maximum impermeable surface coverage: 40%;
- c. Maximum building [height](#) adjoining Hobsonville Point [Road](#): 15.0 metres; and
- d. Maximum [buildings](#) adjoining Eastern Avenue and other local [streets](#): 12.0 metres.

[Height](#) excludes goal posts associated with sporting activities; chimneys/flues, flag poles and [aerials](#).

7. The Requiring Authority shall submit with the first Outline Plan of Works a detailed landscape plan in respect of the whole school [site](#). This plan shall include the following details:

- a. Planting and landscape works along the Eastern Avenue boundary:
  - i. This shall comprise information regarding the location of planting, boundary treatments, the location of paths and [vehicle crossings](#) - and the approved plan must align with existing or proposed landscape treatment within or along Eastern Avenue; and
  - ii. This is to be developed in consultation with [the appropriate Council officer];
- b. The location of existing and proposed [buildings](#);
- c. The surrounding street context: show the adjacent [streets](#), footpaths, the location of any pedestrian crossings, and bus stops;
- d.. Contour information;
- e. Framework tree planting (species, grades and locations), and the location and planting (planting plans) for any garden areas, hedges;
- f. The articulation and identification of outdoor space, including outdoor play areas (both hard surfaces and grassed areas). Note: Outdoor space may be defined by a combination of [buildings](#), trees, landform, fences/hedges or other feature;
- g. Vehicle access and parking areas including cycle parks;
- h. Entrances for cyclists and pedestrians; and
- i. The location, style and [height](#) of fencing on exterior boundaries of the school which face roads or other public spaces.

8. A plan detailing how the historic heritage values of the former air force runway will be recognised on the school [site](#). The plan will be developed in consultation with the Historic Places Trust and Auckland Council or their successors and submitted with an Outline Plan of Work on the [site](#).

9. The Requiring Authority shall submit with each subsequent Outline Plan of Works a

landscape plan which demonstrates how the additions continue to contribute to the matters identified in conditions (7) and (8) above.

10. All subsequent Outline Plan of Works submitted by the Requiring Authority in respect of the school [site](#) shall be accompanied by a statement that records the extent to which the design reflects or departs from the detailed landscape plan approved in Condition (7) above.

11. Prior to the opening of the school, the Requiring Authority shall construct separate vehicle access points to the primary school and early childhood education centre. These vehicle access points are to be gained from Eastern Avenue, and a separate visitor/staff car park area and service/loading area may be gained off [Road](#) 14. The location and design specifications shall be developed in consultation with [the appropriate Council officer] prior to the submission of an Outline Plan of Works.

12. Each Outline Plan of Works for built form shall be accompanied with an urban design statement detailing how the design has been developed in response to the following design principles, where they are applicable:

- a. The location of school [buildings](#) shall to the extent practicable contribute to the built form of any adjacent street with the placement of [buildings](#) with, and located as close as practicable, to adjacent street facing boundaries;
- b. All [buildings](#) facing the street, open space, and on-[site](#) car parking areas shall interact with these spaces with openings such as doors and windows to provide passive surveillance;
- c. The [height](#) of [buildings](#) at the intersection of Hobsonville Point [Road](#) and Eastern Avenue shall be maximised where possible, and shall be designed to address both street frontages;
- d. Where fencing on [road](#) boundaries is required it shall be low [height](#), permeable and recessive in colour and design; and
- e. The school shall, to the extent practicable facilitate connectivity from the school [site](#) to the surrounding street and pedestrian networks.

13. Development of the [site](#) shall be undertaken in a way that recognises the principles of Low Impact Design [stormwater](#) management systems (as detailed in the relevant [Integrated Catchment Management Plan](#)) and incorporates measures to mitigate the impact of impervious surfaces and [earthworks](#), utilising soils and vegetation to trap pollutants and reduce [stormwater runoff](#). Details of the proposed Low Impact Design measures shall be submitted to the Council with the first and any subsequent Outline Plan of Works for development.

14. A sustainable water supply system shall be implemented. This shall include installing water re-use tanks for non-potable supply and the use of water efficient fixtures to minimise the amount of [reticulated](#) water supply required.

## 4635 Hobsonville Point Primary School

Designation Number	4635
Requiring Authority	Minister of Education
Location	18 De Havilland Rd, Hobsonville
Rollover Designation	Yes
Legacy Reference	Designation ME61, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The designation shall lapse on the expiry of 15 years from the date on which it is included in the District Plan if it has not been given effect to before the end of that period.
2. The requiring authority shall, either directly or through the School Board of Trustees:
  - i. Monitor school related vehicle traffic in the vicinity of the school once a year for a period of 3 years following the opening of the school.
  - ii. Resource, develop, review and action a [Travel Plan](#) which:
    - a. Sets the goals of the school with respect to sustainable travel modes and to mitigate real and potential adverse traffic effects;
    - b. Seeks to minimise the provision of on-[site](#) car parking;
    - c. Facilitates the integration of the school with the surrounding transport network (including issues of pedestrian and cyclist permeability into the [site](#));
    - d. Is maintained and updated annually while the school is operating under this designation.

This [Travel Plan](#) shall be developed in consultation with Auckland Council and Auckland Transport or their successors and shall be reviewed at the time of submitting each Outline Plan of Works relating to increased capacity.

3. The proposed development shall be subject to the following conditions regarding traffic and parking:
  - a. For the primary school parking shall be provided on a staged basis at a rate of three parking spaces per two classrooms plus two per three staff members, unless the [Travel Plan](#) developed under Condition 2(ii) identifies that a lower level of parking provision can meet the demands for off street parking.
  - b. For the early childhood education centre car parking shall be provided on a staged basis at a rate of one per four child places per session.
  - c. Disabled and loading parking provisions shall be provided in accordance with the specifications provided in the Waitakere City Council - Code of Practice (or its equivalent document) and in accordance with the minimum requirements stipulated in the Auckland Regional Parking Strategy 2009.
  - iv. The design and layout of group car-parking areas and if required bus/vehicle passenger pick up and drop off areas shall be developed in consultation with [the appropriate Council officer].
4. All activities taking place at the school shall comply with the following noise levels measured at the most exposed location at or within the boundary of properties zoned for residential purposes:

- a. 7.00am-7.00pm Monday-Saturday = [L10](#) 50dBA
- b. 7.00pm-10.00pm Monday-Saturday 7.00am-10.00pm Sundays & Public Holidays = [L10](#) 45dBA
- c. 10.00pm-7.00pm Other times = [L10](#) 40dBA, LMax 70dBA

This provision shall not apply in respect of the noise generated from normal outdoor school activities between 0800hrs and 1800hrs (excluding Sundays and public holidays). Sound will be measured in accordance with the requirements of NZS 6801: 1991 'Acoustics - Measurement of Sound' and assessed in accordance with requirements of NZS 6802:1991'Assessment of Environmental Sound'.

5. In the event of archaeological evidence being uncovered (e.g. shell, middens, hangi or ovens, pit depressions, defensive ditched, artifactual material or human bones) work is to cease in the vicinity of the discovery, and an Archaeologist, Historic Places Trust and Auckland Council are to be contacted so that appropriate action can be taken before any work can recommence there.

6. All [buildings](#) and structures shall be designed in recognition of the matters listed in Condition (12) and shall comply with the following development controls:

[Site](#) Coverage

- a. Maximum [building coverage](#): 35%;
- b. Maximum impermeable surface coverage: 40%;
- c. Maximum building [height](#) adjoining Hobsonville Point [Road](#): 15.0 metres; and
- d. Maximum [buildings](#) adjoining Eastern Avenue and other local [streets](#): 12.0 metres.

[Height](#) excludes goal posts associated with sporting activities; chimneys/flues, flag poles and [aerials](#).

7. The Requiring Authority shall submit with the first Outline Plan of Works a detailed landscape plan in respect of the whole school [site](#). This plan shall include the following details:

- a. Planting and landscape works along the Eastern Avenue boundary:
  - i. This shall comprise information regarding the location of planting, boundary treatments, the location of paths and [vehicle crossings](#) - and the approved plan must align with existing or proposed landscape treatment within or along Eastern Avenue; and
  - ii. This is to be developed in consultation with [the appropriate Council officer];
- b. The location of existing and proposed [buildings](#);

12. Each Outline Plan of Works for built form shall be accompanied with an urban design statement detailing how the design has been developed in response to the following design principles, where they are applicable:

- a. The location of school [buildings](#) shall to the extent practicable contribute to the built form of any adjacent street with the placement of [buildings](#) with, and located as close as practicable, to adjacent street facing boundaries;
- b. All [buildings](#) facing the street, open space, and on-[site](#) car parking areas shall interact with these spaces with openings such as doors and windows to provide passive surveillance;
- c. The [height](#) of [buildings](#) at the intersection of Hobsonville Point [Road](#) and Eastern Avenue shall be maximised where possible, and shall be designed to address both street frontages;
- d. Where fencing on [road](#) boundaries is required it shall be low [height](#), permeable and recessive in colour and design; and
- e. The school shall, to the extent practicable facilitate connectivity from the school [site](#) to the surrounding street and pedestrian networks.

13. Development of the [site](#) shall be undertaken in a way that recognises the principles of Low Impact Design [stormwater](#) management systems (as detailed in the relevant [Integrated Catchment Management Plan](#)) and incorporates measures to mitigate the impact of impervious surfaces and [earthworks](#), utilising soils and vegetation to trap pollutants and reduce [stormwater runoff](#). Details of the proposed Low Impact Design measures shall be submitted to the Council with the first and any subsequent Outline Plan of Works for development.

14. A sustainable water supply system shall be implemented. This shall include installing water re-use tanks for non-potable supply and the use of water efficient fixtures to minimise the amount of [reticulated](#) water supply required.

## 4734 Kohia Terrace School

Designation Number	4734
Requiring Authority	Minister of Education
Location	74 Epsom Avenue, Epsom
Rollover Designation	Yes
Legacy Reference	Designation E09-51, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate:

- a. an assessment of the effects on the historic heritage values of the scheduled historic heritage place;
- b. a consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled historic heritage place;
- c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and
- d. An assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place.

This condition shall not apply in respect or maintenance of the scheduled historic heritage place.

This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed construction works are in accordance with this conservation or similar plan.

## 4903 Aorere College

Designation Number	4903
Requiring Authority	Minister of Education
Location	8 Sels Road, Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 2, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - secondary school (years 7 - 13).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. In the event that Aorere College is within the Auckland International Airport Moderate Aircraft Noise Area (MANA), the following condition applies: 1(A). The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 *Ventilation for Acceptable Indoor Air*; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either: (i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*; and - creating no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

1(B). Where Condition 1(A) requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1(A) where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1A), above, has been provided to the Council.

## 4903 Aorere College

Designation Number	4903
Requiring Authority	Minister of Education
Location	8 Sels Road, Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 2, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - secondary school (years 7 - 13).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. In the event that Aorere College is within the Auckland International Airport Moderate Aircraft Noise Area (MANA), the following condition applies: 1(A). The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

- (a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;
- (b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 *Ventilation for Acceptable Indoor Air*, and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either:

(i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*, and - creating no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or;

(ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

1(B). Where Condition 1(A) requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1(A) where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1A), above, has been provided to the Council.

## 4912 Chapel Downs School

Designation Number	4912
Requiring Authority	Minister of Education
Location	170 Dawson <a href="#">Road</a> , Flat Bush
Rollover Designation	Yes
Legacy Reference	Designation 12, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations: (a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either: (i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ

in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4912 Chapel Downs School

Designation Number	4912
Requiring Authority	Minister of Education
Location	170 Dawson <a href="#">Road</a> , Flat Bush
Rollover Designation	Yes
Legacy Reference	Designation 12, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

- (a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;
- (b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either: (i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4940 Kia Aroha College

Designation Number	4940
Requiring Authority	Minister of Education
Location	51 Othello Drive, Wiri
Rollover Designation	Yes
Legacy Reference	Designation 16, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - secondary school (years 7 - 13).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations: (a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA; (b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either: (i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4965 Pakuranga College

Designation Number	4965
Requiring Authority	Minister of Education
Location	500 Pakuranga <a href="#">Road</a> , Highland Park
Rollover Designation	Yes
Legacy Reference	Designation 64, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - ~~primary school (years 0 – 8)~~ secondary school (years 7 – 13) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate:

- a. An assessment of the effects on the historic heritage values of the scheduled historic heritage place;
- b. a consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled historic heritage place;
- c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and
- d. An assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place.

This condition shall not apply in respect of repair or maintenance of the scheduled historic heritage place.

This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed construction works are in accordance with this conservation or similar plan.

## 4973 Papatoetoe South School

Designation Number	4973
Requiring Authority	Minister of Education
Location	58 Milan <a href="#">Road</a> , Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 70, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either:

(i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4973 Papatoetoe South School

Designation Number	4973
Requiring Authority	Minister of Education
Location	58 Milan <a href="#">Road</a> , Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 70, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

## 4973 Papatoetoe South School

Designation Number	4973
Requiring Authority	Minister of Education
Location	58 Milan <a href="#">Road</a> , Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 70, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either:

(i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall: (a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and (b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4980 Puhinui School

Designation Number	4980
Requiring Authority	Minister of Education
Location	116 Puhinui <a href="#">Road</a> , Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 80, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either: (i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser. or; (ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall:

(a) provide the Council with a certificate from an approved person that the installation has been property undertaken in accordance with sound practice; and

(b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4980 Puhinui School

Designation Number	4980
Requiring Authority	Minister of Education
Location	116 Puhinui <a href="#">Road</a> , Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 80, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

- (a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;
- (b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either:

(i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser or;

(ii) Air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall:

(a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and

(b) Not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4982 Redoubt North School

Designation Number	4982
Requiring Authority	Minister of Education
Location	47 Diorella Drive, Manukau
Rollover Designation	Yes
Legacy Reference	Designation 81, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

(a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;

(b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either:

(i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 Ventilation for Acceptable Indoor Air Quality; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser or;

(ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall:

(a) provide the Council with a certificate from an approved person that the installation has been property undertaken in accordance with sound practice; and

(b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4982 Redoubt North School

Designation Number	4982
Requiring Authority	Minister of Education
Location	47 Diorella Drive, Manukau
Rollover Designation	Yes
Legacy Reference	Designation 81, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation.

1. The following acoustic and related treatment measures shall be installed in any new or relocated classrooms, libraries or halls or in any classrooms, libraries or halls that are the subject of additions or alterations:

- (a) Acoustic insulation and related ventilation and/or air conditioning systems to achieve an internal acoustic environment in each classroom, library and hall (with all external doors and windows of the classrooms, libraries and halls closed) of Ldn 40dBA;
- (b) In the case of classrooms and libraries, air conditioning and/or mechanical ventilation systems for each classroom and library, that are: - designed to achieve indoor air temperatures not less than 16 degrees Celsius in winter and not greater than 27 degrees Celsius in summer at 5% ambient design conditions as published by the National Institute of Water and Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000); and - capable of providing outdoor air ventilation at the rate of 8 litres of air per second per person for the maximum number of people able to be accommodated in any such room at one time ("the required airflow"); - capable of enabling, (in the case of classrooms or libraries in which only mechanical ventilation systems are used to satisfy the above temperature and outdoor air requirements), the outdoor airflow to be controlled across the range, from the maximum airflow capacity down to the required airflow when all external doors and windows of the classroom or library are closed; - otherwise complying with the New Zealand Standard NZS 4303:1990 Ventilation for Acceptable Indoor Air; and - capable of creating no more than Leq 35dBA in each classroom, no more than Leq 40dBA in each library, and no more than Leq dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser.

(c) in the case of halls either:

(i) a mechanical ventilation system or mechanical ventilation systems for each hall capable of: - providing at least 12 litres of outdoor air per second per square metre with all external doors and windows of the hall closed; - enabling the outdoor airflow to be controlled across the range, from the maximum airflow down to the rate of 8 litres of outdoor air per second per person for the maximum number of occupants able to be accommodated in the hall at one time; otherwise complying with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*; and - creating no more than Leq 35dBZ in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from any diffuser or;

(ii) air conditioning plus mechanical outdoor air ventilation designed to provide 8 litres per second per person of outdoor air, and internal air temperatures in each hall not greater than 27 degrees Celsius at 5% ambient design conditions as published by the National Institute of Water & Atmospheric Research ("NIWA")(NIWA, Design Temperatures for Air Conditioning (degrees Celsius), Data Period 1991-2000). The mechanical system shall create no more than Leq 35dBA in each hall, and no more than Leq 40dBA in any hallway or corridor. Noise levels from the mechanical system(s) shall be measured at least 1 metre away from the diffuser. These systems shall otherwise comply with the New Zealand Standard NZS 4303: 1990 *Ventilation for Acceptable Indoor Air Quality*.

2. Where Condition 1 requires the Minister to install acoustic treatment and related ventilation measures the Minister shall obtain a certificate from a suitably qualified independent person (or persons) nominated by the Minister and approved by the Council ("an approved person"), certifying that the proposed acoustic treatment and related ventilation measures are sufficient to achieve the internal acoustic environment and ventilation requirements specified in this condition, and where the Minister installs any acoustic treatment and or ventilation or air conditioning measures, the Minister shall:

(a) provide the Council with a certificate from an approved person that the installation has been properly undertaken in accordance with sound practice; and

(b) not be in breach of Condition 1 where the internal noise standards and related ventilation requirements are not met in each instance provided the relevant certificate required in sub-clause (a) of this condition (Condition 1), above, has been provided to the Council.

## 4968 Papatoetoe Central School

Designation Number	4968
Requiring Authority	Minister of Education
Location	317 Great South <u>Road</u> , Papatoetoe
Rollover Designation	Yes
Legacy Reference	Designation 73, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

### Purpose

Educational purposes - primary school (years 0 - 8) and may include early childhood education (preschool).

### Conditions

The standard conditions for all Minister of Education designations apply to this designation. Where any construction works for a project involve total or substantial demolition of, or modifications to, a scheduled historic heritage place, any outline plan that is required shall incorporate:

- a. an assessment of the effects on the historic heritage values of the scheduled historic heritage place;
- b. a consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the scheduled historic heritage place;
- c. an analysis of the extent to which the construction works are required or desirable to enable educational activities to be carried out; and
- d. An assessment of the extent to which the construction works are necessary to address safety concerns and/or the extent to which the costs associated with overcoming safety concerns offset the values associated with the scheduled historic heritage place.

This condition shall not apply in respect or maintenance of the scheduled historic heritage place

This condition shall not apply where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed construction works are in accordance with this conservation or similar plan.
