Plan Change 36

Rural Activities and Social, Cultural and Economic Wellbeing of the People and Communities in the Waitakere Ranges Heritage Area

Additions are underlined and deletions are ~~struckthrough~~.

Insert a new Section 5B.4 to the District Plan as follows:

5B.4 WELLBEING OF PEOPLE AND COMMUNITIES IN THE WAITAKERE RANGES HERITAGE AREA

5B.4.1 Issue

Failure to provide for appropriate non-residential activities in the Waitakere Ranges Heritage Area will adversely affect the social, cultural, economic and environmental wellbeing of the people and communities of the Area.

Failure to manage the scale, intensity and character of non-residential activities may result in adverse effects on the heritage features of the Waitakere Ranges Heritage Area and/or lead to activities locating in the area that are more appropriately located in the metropolitan urban limits of Auckland.

Failure to provide for future uses of rural land may result in dereliction of rural land, inefficient supply of food from local resources, pressure for urbanisation or countryside living and decline of rural character in the rural areas of the Waitakere Ranges Heritage Area.

Failure to provide opportunities for nature, rural and wilderness experiences, recreation, and relaxation in close proximity to metropolitan Auckland will not assist Aucklanders' and other New Zealanders' access, enjoyment and use of the area and their wellbeing.

5B.4.2 Objective

To provide for appropriate local and small scale social, cultural and economic non-residential activities that benefit the people and communities of, and visitors to, the Waitakere Ranges Heritage Area. These activities shall be clearly connected to the wellbeing of those people and communities, or to the enjoyment, protection or enhancement of the natural and rural character and amenity of the Waitakere Ranges Heritage Area.

5B.4.3 Policy

To enable the people of the Waitakere Ranges Heritage Area to provide for their social, economic, cultural and environmental wellbeing in a way that is compatible with and/or enhances the heritage features and character of the area. The scale, intensity, context and character of activities will seek to retain and/or enhance a rural or natural character or cultural association with the area. This is achieved by:

In the Waitakere Ranges Heritage Area:

- i. ensuring activities protect, restore and enhance heritage features (section 5B.1.2.1);**
- ii. ensuring activities contribute to the achievement of the desired future character and amenity of a local area (as specified in section 5B.3);**
- iii. avoiding activities that because of their scale, intensity and characteristics are contrary to the long term goals for the area (as specified in section 5B.1 and 5B.3), and/or are more appropriately located within the metropolitan urban limits of Auckland;**
- iv. avoiding the development of activities that do not rely on or support the productive use and capacity of rural land, or the character, amenity, communities, recreational or attributes of the Waitakere Ranges Heritage Area and coast;**
- v. limiting any commercial and office activities to home occupations and activities that support the area's distinctive communities, creating opportunities for local business support and innovation;**
- vi. limiting any commercial overnight accommodation to that associated with home occupation activities;**
- vii. providing for small scale local convenience retail and services in appropriate locations to support the wellbeing of the area's distinct communities and help reduce the need for travel outside of the area;**

- viii. encouraging creative endeavour, creative industries and arts and crafts;
- ix. providing opportunities for the appropriate expansion of existing activities to ensure they continue to provide for the wellbeing of the community and/or the quality of the visitor experience;
- x. enabling nature, rural and wilderness experiences, outdoor recreation and pursuits, and relaxation activities that are compatible with, and appropriate to, the amenity of the area and the natural and rural environment;
- xi. encouraging the reuse of existing buildings that relate to the historic and/or rural character of the area and controlling the design, scale and location of new buildings, structures and development to ensure they are appropriate to the area, avoid adverse effects on road and/or streetscape, and are subservient to the natural and/or rural landscapes of the area;
- xii. avoiding activities that result in inappropriate earthworks and vegetation removal;
- xiii. avoiding activities that result in adverse noise, lighting and odour effects on adjoining properties;
- xiv. avoiding, remedying or mitigating adverse amenity effects on adjoining properties;

And in the Foothills Environment:

- xv. enabling a diversity of small-scale rural business activities with a focus on food production, eating and drinking, history, culture, creative endeavour and innovation, festivals and events, outdoor recreation activity and activities focused on health and wellbeing that have a clear and genuine connection with the resources, communities or the character and amenity of the rural areas of the Waitakere Ranges Heritage Area;
- xvi. enabling greenhouse activities provided that their adverse effects on the environment can be avoided, remedied or mitigated;
- xvii. limiting any industrial activities to those that support the productive use of rural land and/or provide services to rural activities, and involve the manufacturing of goods from, or processing of agricultural and horticultural produce;
- xviii. limiting any storage activities to those that are ancillary to home occupations, rural activities or the manufacture or processing of agricultural and horticultural produce;
- xix. encouraging the on-going maintenance and enhancement of rural landscapes and rural character by enabling rural business activities that maintain connections with the foothills' productive past, including retaining and maintaining orchards, vineyards and shelterbelts, and designing landscape elements in new activities to reflect the area's history and rural production;
- xx. requiring rural business activities to contribute to rural character and amenity through the re-establishment or continued management of agricultural or horticultural activities on site;
- xxi. developing Oratia Rural Village as a distinct rural community and service centre, different from the metropolitan urban limits of Auckland (refer section 5B.3.1);
- xxii. limiting retail activities outside of the Oratia Rural Village to small scale home occupations, nurseries, garden centres, creative endeavour, food and beverages and agricultural and horticultural produce;
- xxiii. maintaining a clear visual boundary and contrast between metropolitan Auckland and the Foothills Environment and reinforcing the metropolitan urban limit boundary through design and location of rural business activities and associated infrastructure on the rural side of the boundary, to reinforce rural character and amenity; and
- xxiv. locating buildings to retain a rural road character and roadscape distinct from urban residential or commercial streets.

Explanation:

In 2005, more than 21,000 people lived in the Waitakere Ranges Heritage Area (outside the Regional Park), mostly in forest dominated urban, rural, or coastal communities (Bush Living, Waitakere Ranges, Coastal Village and Foothills Environments). The objective and policy provides for these people and communities to provide for their wellbeing through the provision of appropriately scaled activities.

The policy creates two distinctions about the appropriateness of non-residential activities in the Waitakere Ranges Heritage Area. The first is that activities need to relate to the communities they

are located within, to the recreation amenity of the Waitakere Ranges Heritage Area, to creative endeavour or to rural character and the productive use of rural land.

As there are distinctive communities within the Waitakere Ranges Heritage Area, including rural communities, the policy recognises that these communities need many of the convenience retail, services and community facilities that are found at the neighbourhood level in metropolitan Auckland. In the distinctive communities of the Waitakere Ranges Heritage Area definitions of urban and rural activities are not clear cut.

The second policy approach is to manage non-residential activities by avoiding activities that because of their scale, intensity, context and characteristics are contrary to the long term goals for the area and are more appropriately located within the metropolitan urban limits of Auckland.

Waitakere Ranges Heritage Area has a high proportion of residents working from home, drawn to the lifestyle and/or opportunities to work on the land, while retaining ease of access to urban facilities and services. Opportunities for home occupations enable business services, business innovation and the incubation of new business activities. The majority of business activities in the Waitakere Ranges Heritage Area will comprise home occupations, some of which cater for the visitor market through the provision of commercial overnight accommodation. These activities, as they are home based occur at a small-scale and are appropriate to the Waitakere Ranges Heritage Area.

There are a wide range of existing non-residential activities in the Waitakere Ranges Heritage Area, including retail, services, commercial overnight accommodation, restaurants and community facilities and community-based groups. These existing activities provide for the wellbeing of people and the community and are an existing resource. The policy provides for limited expansion of these activities in appropriate circumstances so that they may continue to provide wellbeing to people and communities.

The Waitakere Ranges Heritage Area is appreciated by people seeking rest, respite and recreation within a natural and rural environment. The value of the area for appropriate recreation is recognised as a matter of national significance. The Waitakere Ranges Heritage Area, and particularly the Foothills Environment, provide opportunities for people to connect with and experience nature, rural, wilderness, history, food, wine, creative endeavour, culture, gardens and the outdoors. The policy supports existing activities and the establishment of a diverse range of new and innovative activities focussed on rural production, creative endeavour and visitor experiences (particularly visitors from metropolitan Auckland).

It is also recognises that the Waitakere Ranges Regional Park is an important community resource which protects natural and historic resources for their intrinsic worth and for the benefit, use and enjoyment of the people and communities of Auckland and New Zealand. The Waitakere Ranges Regional Park is under pressure from visitors and the approach of the policy is to provide alternative visitor and recreation experiences to draw visitors away from the Park, particularly towards the Foothills Environment.

The establishment of a diverse range of new and innovative rural business activities in the Foothills Environment will provide for the future use of rural land in order to retain a rural character and a worked-in landscape. These will be small-scale activities with an intensity, character and context appropriate for a rural area, and that will enhance the community's wellbeing and/or the productive use of rural land. The policy focuses on the rejuvenation of rural land through requiring many non-residential activities to be directly associated with rural activities such as farming, orchards and vineyards, and for their continued management to provide food and rural context and landscapes. Provision is also made for greenhouses to support the growing of food in close proximity to Auckland.

The policy provides for the wellbeing of rural producers by allowing small scale manufacturing, processing and retail sales of agricultural and horticultural produce. The policy seeks to support economic vitality by enabling activities that to add value to agricultural and horticultural produce through various levels or stages of production and marketing, often on the same site. In so doing, it allows people to better provide for their wellbeing by reducing their reliance on commodities as

being their primary (or even sole) source of income. As an example, integration of the wine industry involves the location of wine making activities and cellar door sales and in some cases associated restaurants/cafes, on the same site as a vineyard (hence the integration of primary production, wine production, retailing and visitor activities).

Rules for non-residential activities should not be considered as part of any permitted baseline comparison with residential activities or subdivision in the Waitakere Ranges Heritage Area.

For objectives and policies for Oratia Rural Village refer to section 5B.3.1. For objectives and policies for Titirangi village refer to section 5B.3.3.

Refer also to the objectives and policies within section 5.
