These defining natural and physical features provide a unique setting and contribute significantly to Aucklanders' quality of life.'
5431-6	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	General	Chapter A Introduction	A1 Background	Amend Background to read 'Auckland is New Zealand's largest city and home to a third of the country's population. The population is largely contained within urban limits but vibrant communities exist in the general rural area and within rural and coastal settlements. It is the dominant commercial centre of New Zealand with its large domestic market, infrastructure, port and airport, nationally significant rural land and regionally significant rural production systems, commercial expertise and diverse manufacturing and industrial base...'
5431-7	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	General	Chapter A Introduction	A1 Background	Amend 1.3 'Our Growing Population' to add new sentence 'When considering urban expansion, a balance must be struck between protecting the rural versatile land resource and providing for greenfields expansion. Our growing population needs to be fed and we need to protect the food supply generated in our regionally significant rural production systems.'
5431-8	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	General	Chapter A Introduction	A1 Background	Amend 1.5 'Our Rural and Coastal Environment' to include new text 'The productive capacity of the rural and coastal environment is critical to the wellbeing of Auckland's residents and the New Zealand economy. To maintain and enhance the rural production system the PAUP must: Recognise Nationally Significant Rural Land, Provide for Regionally Significant Rural Production, Achieve Economic Development Targets, Protect the Food Supply and Support Post Harvest Production. Rural production systems are dependent on the locational advantages Auckland provides through the high quality land resource, rural water resources and for the horticultural sector: post harvest activities including packhouses and under-glass protected cropping horticultural activities. The rural economy supports communities and rural production defines much of the rural landscape.'
5431-9	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	General	Chapter A Introduction	A1 Background	Amend 1.6 'Our Economy' to read 'Auckland's rural areas also contribute significantly to its economic success. Auckland has high quality soils, water resources, transport linkages, gas supplies, post harvest facilities, access to labour and a diverse land parcel structure that support agricultural and horticultural activities. Fruit, vegetables, livestock and forestry supply our domestic and export market. There are also as well as substantial mineral resources. In our coastal environment, aquaculture provides opportunities for sustainable economic growth. The Hunua and Waitakere Ranges in turn provide a significant amount of the water resources for the urban area while surface and groundwater resources support rural economic success'
5431-10	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	General	Chapter A Introduction	A3 Strategic Framework	Amend 3.1 'Auckland Plan' to read 'spatially identifying opportunities and constraints for activities and development in Auckland, such as land with a primary purpose of supporting ongoing rural production activity and expansion in rural production'

5431-16	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.1 Enabling quality urban growth	Add new text 'There are long-term consequences of prolific subdivision across rural areas, the fragmentation of productive land, the domestication and commercialisation of rural landscapes, the introduction of sensitive land uses into working environments and the inefficient use of developable land. Inappropriate choices on greenfield expansion will also compromise regionally significant rural production systems. Around 5.5% of New Zealand's productive land resource is versatile land. Versatile land is land suitable for high value horticultural production because it has a range of enabling factors such as high quality soil, water, frost free climate, shelter, access to labour, transport, close markets and an enabling rule framework that discourages subdivision and land fragmentation.'
5431-17	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.1 Enabling quality urban growth	Add new text 'Between 1990 and 2008 29% of New Zealand's available versatile land has been converted to new urban areas. Urbanisation is a trend that is unlikely to be reversible. Marlborough (59%), Hawke's Bay (49%), Waikato (36%) and Auckland (35%), have seen the highest level of conversion. Planning mechanisms focussed on soil protection have been unhelpful because they indirectly target the problem which is subdivision for rural residential purposes. There are two things that are required to prevent further degradation of the versatile land resource: Maintenance of an operating environment that encourages rural production activities on versatile land, and Prohibition or prevention by other means of subdivision for rural residential purposes on versatile land. Greenfield expansion must not compromise the regionally significant rural productions systems. Inappropriate choices could lead to the removal of versatile land from the production system or constraints on production activities, through reverse sensitivity effects, particularly at the RUB interface.'

The system is complex and diverse and involves a number of integrated elements. For example in the horticultural sector the production system requires access to land, soil, water, gas, transport linkages, post-harvest facilities, labour. Supporting rural production and the economic benefits it achieves is not just about protecting elements such as soil, it is about addressing the system as a whole.'
5431-22	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.2 Enabling economic wellbeing	Add text to Rural and Coastal Economy reading 'Developing and enhancing an innovative rural and maritime economy is an Auckland Plan target which seeks to increase the value added to the Auckland economy by rural sectors (including rural production, complementary rural enterprises, tourism and visitor experiences in rural areas) by 50% by 2040. The approach of the Unitary Plan is pivotal in achieving this target.. 2% to 3% of Auckland's GDP is attributable to agriculture and agricultural services and processing from the region. This is about \$1.22 billion annually. The value of Auckland's rural land for rural production extends beyond the territorial boundaries and influences the national wellbeing of New Zealand. Over the past 20 years, horticulture exports have grown from \$NZ 200 million to \$NZ 2.23 billion. The area of horticultural crops has also increased 40% to 121,000 ha in just over 10 years. Including domestic sales, the horticulture industry is worth \$NZ 5 billion making it New Zealand's sixth largest export industry, and it employs 50,000 people in eight key growing regions – one of which is Auckland.'
5431-23	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.2 Enabling economic wellbeing	Add text to Transport and Land use reading 'Transport management decisions must also consider our rural environment and the connectivity requirements of rural communities and the transfer of rural produce from the land to post harvest facilities and to market.'

5431-32	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.7 Sustainably managing our rural environment	Amend Issue to read ' <u>The rural environment is a large part comprises the majority of the Auckland landmass. It is important for its primary production; natural and physical resource base; significant indigenous biodiversity and natural landscapes; social, economic and cultural value to the urban and rural communities and Mana Whenua; amenity values and rural character. Subdivision, use, and development of rural land are greatly influenced by its proximity to the metropolitan area and the planning mechanisms Council puts in place. The interrelationship between urban and rural Auckland needs to be recognised and managed, to provide for existing and future generations. Auckland contains nationally significant rural land and regionally significant rural production systems that provide food, work and economic prosperity for New Zealand's existing and future generations.</u> '
5431-33	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.7 Sustainably managing our rural environment	Amend Explanation to read ' <u>Rural production, from livestock to viticulture, is a key contributor to our economy. ... Rural character and amenity values and character complement and support the metropolitan environment. ... Managing the competing nature of activities on rural land, the impact of urban growth, the need to increase the value added to the Auckland economy by rural production activities and the desire to live in rural areas creates challenges for how our rural areas function. There are locational reasons why the rural sector is so productive in Auckland related not just to the quality of soil but also access to freshwater, transport linkages, gas supplies, post harvest facilities, access to labour, the proximity of the market and a diverse land parcel structure. There is a need to preserve areas of rural production for rural production and provide for growth and sustained access to land and water. There is also a need to ensure land owners have flexibility to change rural production land use activities and that the regulatory regime is practical and supportive. Food security is paramount for future generations.</u> '
5431-34	Horticulture New Zealand: Pukekohe Vegetable Growers Association	chris.keenan@hortnz.co.nz	RPS	Issues	B1.7 Sustainably managing our rural environment	Amend rural production to read ' <u>Regionally Significant Rural production. However, our rural areas are also under pressure to accommodate a wide range of different activities. Land use, development controls and discharge controls can affect rural production activities.
