AREA	NAME	LOCATION	DESCRIPTION	NATURAL CHARACTER VALUES		
201	Man O 'War Bay	Waiheke Island	Clearly articulated sequence of hill country and extensive forest tracts that forms the eastern end of the Puke Range and backdrop to Man O 'War Bay. Intact and remnant indigenous vegetation, including native forest remnants (taraire, puriri and totara) and large tracts of mature kauri forest, reinforce the topography of the Puke Range. As such, the integrity of the land cover remains unmodified, providing a highly coherent and very dramatic sequence from the crest of the inland ridge to the coastal edge. Despite the adjoining areas of pasture and buildings on the beach front, the unit imparts a strong sense of remoteness and wildness.	Bio-physical characteristics:		Key Values
