Policy purpose and overview

The purpose of the Revenue and Financing Policy is to provide predictability and certainty about sources and levels of funding available to the council. It explains the rationale for, and the process of selecting various tools to fund the operating and capital expenditures of the council.

Policy background

Funding principles

To assist with the identification of the appropriate funding methods, the council has used a set of guiding principles that incorporate the matters set out in Section 101 of the Local Government Act 2002. These are set out in table 3.1.1 below.

Table 3.1.1

Principle	Rationale for its application
Paying for benefits received or costs imposed	<p>Under this principle, the council considers benefit distribution and cost causation and the period in or over which benefits and costs are expected to occur. The allocation of costs to those who benefit from a council service or those who impose costs to the council (whether the community as a whole, any identifiable part of community, or individuals) is considered economically efficient and equitable and the extent to which the actions or inaction of individuals or a group contribute to the need to do the activity.</p> <p>Section 101(3)(a)(ii), Section 101(3)(a)(iv), Section 101(3)(a)(iii)</p>
Transparency, accountability and costs and benefits of funding activities separately	<p>This principle is applied when considering the costs and benefits of separate funding. Transparency of funding enables the users of services to assess whether they get value for money. Accountability makes the council more efficient in providing these services. From the perspective of the service users, transparency and accountability also enables them to make more informed decisions in using council services.</p> <p>Section 101(3)(a)(v)</p>
Market neutrality	<p>This principle is relevant when the council is competing with the private sector in producing or delivering services. The council can be placed in an advantageous position vis a vis the private sector because of its ability to fund such services from rates, either fully or partially. This can lead to market distortions and economic inefficiencies. It can also discourage private enterprise. To avoid this, in tandem with other principles such as affordability, the council will apply commercial best practice when providing such services.</p> <p>Section 101(3)(b)</p>
Financial prudence and sustainability	<p>This principle is relevant in determining appropriate funding mixes. It is recognised that additional revenue may be required to support debt repayment and manage treasury ratios.</p> <p>Section 101(2)</p>
Optimal capital usage	<p>This principle relates to the effectiveness of funding tools in achieving efficiencies. The council's limited financial resources should be used in such a way to maximise the benefits provided to the community, while minimising the burden on ratepayers. Among other things, this principle influences the council's decisions on the best mix of funding (between rates income, other revenue sources, borrowings and asset sales) to pay for its assets and activities.</p> <p>Section 101(3)(b)</p>
Strategic alignment	<p>The Auckland Plan sets out a vision for the city over the next 30 years. The Revenue and Financing Policy should have regard to its impact on the broader strategies and priorities as set out in the council's vision and the Auckland Plan.</p> <p>The infrastructure strategy outlines how the council intends to manage its infrastructure assets. The Revenue and Financing Policy will show how investment in infrastructure is funded.</p> <p>Section 101(3)(b)</p>

Principle	Rationale for its application
Overall social, economic, environmental and cultural impacts	Decisions on how the council's revenue requirements will be met (by ratepayers and other groups) should take into account the impact of such decisions on the current and future social, economic, environmental and cultural well-being of the community and the community outcomes to which the activity relates. Section 101(3)(b)
Community outcomes in the Auckland Plan	Decisions on how the council's revenue requirements will be met (by ratepayers and other groups) should take into account the impact of such decisions on the community outcomes in the Auckland Plan. Section 101(3)(a)(i)
Affordability	The council needs to consider the impact of funding methods on people's ability to pay as this can have implications for community well-being. Section 101(3)(b)
Minimise the effects of change	Decisions that change funding methods may lead to major changes in the incidence of rates and user charges for services. Funding and financial policies should seek to minimise or manage the impact of these changes. Section 101(3)(b)
Efficiency and effectiveness	The council's financial policies should have regard to the costs of carrying them out, and how effective they will be in achieving their objectives. Section 101(3)(a)(v)
Practicality of policy	The council's funding policies must be achievable and unconstrained by practical issues that will prevent compliance. Section 101(3)(a)(v)
Legal compliance	The LGA 2002 and related legislation include a number of legal requirements for the development of the Revenue and Financing Policy. All aspects of the policy will comply with legislation.

There are some inherent conflicts between these guiding principles. In practice, establishing the council's specific revenue and financing policies involves balancing competing guiding principles. For example, the principle of paying for benefits received may call for a high degree of user pays for an activity, but this must be balanced against the principle of affordability. In practice, when the council applies these principles to assess how to fund the separate activities, the council then considers the overall impact of any allocation of liability on the community.

Other guiding principles

In addition to the matters set out above, Section 102(3A) of the Local Government Act 2002 requires that our Revenue and Financing Policy support the principles set out in the Preamble to Te Ture Whenua Māori Act 1993. The relevant principles are set out below:

- reaffirmation of the special relationship between the Māori people and the Crown established in the Treaty of Waitangi
- recognition that land is a taonga tuku iho of special significance to Māori people
- promotion of the retention of that land in the hands of its owners, their whānau, and their hapū, and to protect wāhi tapu
- facilitation of the occupation, development, and utilisation of that land for the benefit of its owners, their whānau, and their hapū.

The council will take these principles into account when considering funding decisions that specifically impact Māori landowners.

Policy details

Expenditure to be funded

Legislation requires the council to make adequate and effective provision in its long-term plan to meet the expenditure needs identified in that plan. Generally, this will mean that all expenditure is funded.

Funding depreciation

Depreciation is a non-cash charge that reflects the decrease in value of our assets over their useful lives. Because this is a non-cash expense, any revenue raised to cover depreciation (referred to as “funding depreciation”) generates a cash surplus which is used to fund capital expenditure.

Fully funding depreciation from rates and current revenue would mean that on average, over the long run, we are not relying on borrowing to fund asset replacement expenditure. This represents a sustainable approach.

In some cases, it is not financially prudent to fund depreciation. In determining the level of non-funded depreciation, the council will have regard to:

- a. whether at the end of its useful life, the replacement of an asset will be funded by way of a grant or subsidy from a third party
- b. whether the council has elected not to replace an asset at the end of its useful life
- c. whether a third party has a contractual obligation to maintain the service potential of an asset throughout all or part of its useful life or to replace the asset at the end of its useful life
- d. whether fully funding depreciation in the short-term will result in an unreasonable burden on ratepayers, presenting conflict between funding principles, for example between affordability and financial prudence and sustainability. In such circumstances, the council will remain prudent and ensure it promotes both the current and future interests of the community by forecasting to reach a position over time where it fully funds depreciation (apart from the exceptions above).

On creation of the Auckland Council the legacy councils only funded, on average, 63 per cent of the qualifying depreciation (that which does not come under a-c above). The council adopted a policy of moving towards funding 100 per cent of qualifying depreciation by 2025. Given the impacts of COVID-19 on our operating revenues maintaining this target would present an unreasonable burden on ratepayers so we have extended this target by three years to 2028.

Table 3.1.2 below sets the targeted minimum levels of depreciation funding for this long-term plan.

Table 3.1.2 Targeted minimum proportion of depreciation expenditure to be funded

Year	2024/25	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	2031/32	2032/33	2033/34
Funded	85%	90%	95%	100%	100%	100%	100%	100%	100%	100%
Not funded	15%	10%	5%	0%	0%	0%	0%	0%	0%	0%

The council considers that this policy on funding depreciation and the consequential impacts on council’s operating budgets and debt levels is financially prudent, reasonable and appropriate having had regard to our funding principles, the factors in section 100(2) of the Local Government Act 2002 and all other relevant matters.

Sources of funding

The sources of funding applied under this policy are limited to those set out under section 103 (2) of the LGA 2002.

Sources of funding: Operating expenditure

The council has determined the funding sources for operating expenditure after considering the funding principles set in Table 3.1.3.

Table 3.1.3 Funding sources for operating expenditure

Funding source	Rationale
Fees and charges	Fees and charges can be applied where the users of a service can be identified and charged according to their use of the service (and those that do not pay are denied access to the service). This is based on the paying for benefits received principle. Fees are also appropriate where an individual's action or inaction creates the need for an activity (cost causation). For example, the cost of obtaining a building consent is met by the building owner.
Grants and subsidies	Grants and subsidies are generally only appropriate for funding the operating costs of the particular activity that the grant or subsidy is intended to pay for. For example, NZTA (government) transport subsidies can only be used to fund transport projects.
Development or financial contributions	Development contributions or financial contributions can only be used to fund capital expenditures related to growth. Development contributions also include financing costs incurred due to timing differences between growth-related capital expenditure being incurred and the related development contribution being received.
Targeted rates	Appropriate to fund operating expenditure (including projects to support growth) where one or more of the following apply: <ul style="list-style-type: none"> that benefit a specific group of ratepayers to incentivise land owners to develop land in response to a commitment to the provision of infrastructure to provide certainty of the council recovering its costs where greater transparency in funding the cost of the activity is desirable where an individual or a group of ratepayers voluntarily chooses to adopt the rate, such as for business improvement districts or the Retrofit Your Home scheme where the rate is for a specific service, or bundle of services, such as for waste collection.
General rates	General rates are appropriate for funding activities where it is not practicable or cost-effective to identify the individual or group of beneficiaries (or causers of costs) of the service and charge them for the benefits received or costs imposed (e.g. regional parks and open spaces). It is also appropriate for general rates to partially fund activities where the provision of a private good also generates wider social benefits or where the application of fees and charges either causes affordability issues or compromises the wider objectives of the activity. This is consistent with the guiding principle of affordability.
CCO profits, and net rental and interest from investments	CCO profits and net returns from investments will be used to offset the general rates funding requirement of other council activities, reducing the burden on all ratepayers.
Borrowing	Borrowing will not generally be used to fund operating expenses. The council may choose to borrow for an operating expense where it is providing a grant to an external community organisation that is building an asset such as a community facility or in other cases where operating expenditure provides enduring economic benefits. Borrowing may also be used to fund the interest expense accrued on borrowing during the period of construction of an asset; and to fund the cost of discovered liabilities such as the council's share of weathertightness claims. In these cases borrowing and repaying the debt over time promotes intergenerational equity by spreading the responsibility for funding across the generations who will benefit.

Funding source	Rationale
Trusts, bequests and other reserve funds	Certain operating expenditure may be funded from restricted or special funds that are subject to special conditions of use, whether under statute or accepted as binding by the council. Transfers from reserves may only be made when the specified conditions for use of the funds are met.
Other funding sources	The use of any other funding sources should be assessed with regard to the guiding principles. Any miscellaneous revenue not linked to a specific activity should be used to fund activities that would otherwise be funded through the general rate.
Surpluses from previous financial years	A surplus may be available to be carried forward if the actual surplus/(deficit) is improved compared to the forecast surplus/(deficit). Generally, only those factors that are cash in nature will be available for use in determining the level of surplus to be carried forward. The amount of any surplus carried forward will be accounted for as an operating deficit in the year the benefit is passed to ratepayers.
Regional Fuel Tax	A Regional Fuel Tax may be used to fund the operating expenditure associated with the approved list of transport capital projects as set out in the Regional Fuel Tax scheme.

Note: Auckland Council does not intend to use lump sum contributions or proceeds from asset sales to fund operating expenditure.

The funding mix for activities shown in Table 3.1.6 below reflects the application of the above principles and rationale to the operating expenditure of individual activities.

Sources of funding: Capital expenditure

The council has determined the funding sources for capital expenditure after considering the funding principles set out in Table 3.1.4.

Table 3.1.4 Funding sources for capital expenditure

Funding source	Rationale
General rate	Appropriate funding source where it is not practicable or cost-effective to identify the individual or group of beneficiaries (or causers of costs) of the capital expenditure.
Targeted rates	Appropriate to fund capital expenditure projects (including projects to support growth) where one or more of the following apply: <ul style="list-style-type: none"> that benefit a specific group of ratepayers to incentivise landowners to develop land in response to a commitment to the provision of infrastructure to provide certainty of the council recovering its costs where greater transparency in funding the cost of the activity is desirable.
Fees and charges	Appropriate funding source where users of a service can be identified and charged according to their service. Examples include water charges and Infrastructure Growth Charges from Watercare Services Limited.
Interest and dividends from investments	Interest and dividends from investments may be used where appropriate and consistent with the council's funding principles to fund capital expenditure projects and to reduce the reliance on ratepayer funding.
Borrowing	Borrowing is used to spread the funding requirement for capital expenditure across multiple years. Given assets deliver benefits throughout their useful lives it is appropriate that the funding is spread across the useful life.
Proceeds from asset sales	Funds received from the sale of surplus assets will generally be used to repay borrowings. On a case-by-case basis these surpluses may be used to fund investment in another asset of higher strategic priority than the asset sold.
Development or financial contributions	Appropriate to fund capital expenditure in anticipation of or in response to development (growth) that will generate a demand for additional reserves, network or community infrastructure (such as stormwater systems). Contributions are set through the council's Contributions Policy.
Grants, subsidies, and donations	Appropriate to fund specific capital expenditure projects as per terms of the grant, subsidy or donation. An example of this is NZTA subsidies to partially fund transport projects.
Trusts, bequests and other reserve funds	Certain capital expenditure may be funded from restricted or special funds that are subject to special conditions of use, whether under statute or accepted as binding by the council. Transfers from reserves may only be made when the specified conditions for use of the funds are met.
Other sources	Other revenue sources may be used where appropriate and consistent with the council's funding principles to fund capital expenditure projects and to reduce the reliance on ratepayer funding. An example of this is the use of commercial returns from property holdings to fund capital spend on those property assets.
Regional Fuel Tax	A Regional Fuel Tax may be used to fund the capital expenditure associated with the approved list of transport capital projects as set out in the Regional Fuel Tax scheme.

Note: Auckland Council does not intend to use lump sum contributions to fund capital expenditure.

The funding mix for activities shown in Table 3.1.6 below reflects the application of the above principles and rationale to the operating and capital expenditure of individual activities.

Rating Policy

The council will use general rates to fund activities which have a ‘public good’ element, e.g. civil defence, or where it wishes to subsidise the provision of services because of the wider social benefits they provide e.g. libraries.

Valuation basis

The general rate will be set on the basis of capital value. Capital value better reflects the level of benefit a property is likely to receive from services rather than land value or annual value.

Application of a uniform annual general charge

To ensure that the rates incidence isn’t disproportionately borne by higher value properties the council sets a uniform annual general charge (UAGC). Every ratepayer will therefore make a minimum contribution to meeting the council’s costs.

The charge will apply to every separately used or inhabited part of a rating unit e.g. shop in a mall or minor dwelling. This ensures equal treatment between these properties and main street shops or apartments on individual titles.

Rates differentials

It is the council’s view that some land uses receive more benefit from, or place more demand on, council services and/or may have a differing ability to pay rates. The differentials will be determined based on land use (including consideration of land use classifications determined under the Rating Valuation Rules), location, and the activities that are permitted, controlled, or discretionary for the area in which the land is situated, and the rules to which the land is subject under the Auckland Unitary Plan.

The council will apply general rates differentially (the base level for rating is the urban residential sector) and may also apply targeted rates differentially to:

- business properties in the urban area
- business properties in rural areas
- residential properties in the rural areas
- farm/lifestyle properties in the rural areas
- moderate-occupancy online accommodation providers in the rural areas
- moderate-occupancy online accommodation providers in the urban area
- medium-occupancy online accommodation providers in the rural areas
- medium-occupancy online accommodation providers in the urban area
- properties with no direct or indirect road access
- properties where the council chooses not to charge rates (eg: zero-rated).

The council will set the differential for business to raise around 31 per cent of the general rates take. From 2024/2025 any general rates increase will be applied evenly across all ratepayers. This approach to the business differential removes the impact that changes in property values resulting from the triennial region-wide revaluation have on the split of rates between business and non-business properties.

Targeted rates

The council mainly uses targeted rates where there is a clearly identifiable group benefiting from a specific council activity. Targeted rates will apply to properties that receive certain services, or which are located in specified areas. Targeted rates may be used where the council wishes to incentivise development in areas where infrastructure investments have been made and/or to provide more certainty over the timing of payment for those investments. Targeted rates may also apply universally to fund a specific activity where a greater degree of transparency is desired. The council does not have a lump sum contribution policy and will not invite lump sum contributions for any targeted rate.

The council intends to set targeted rates to fund activities as set out in Table 3.1.5 below.

Table 3.1.5: Services to be funded by targeted rates

Targeted rate	Services to be funded or part funded
Waste management targeted rates	Refuse collection and disposal services (including the inorganic refuse collection), recycling, food scraps collection, waste transfer stations and resource recovery centres
City centre targeted rate	Investment in projects to enhance the central city environs
Local targeted rates as proposed by local boards	Local or regional activities in the local board's area
Business improvement district targeted rates	Investments to enhance the environs in the area of the business association as agreed with the business association
Loan repayment targeted rates	To repay financial assistance provided by the council to ratepayers for specific purposes
Waitākere rural sewerage targeted rate	To pay for the provision of inspection and pump out services for on-site waste management systems
Swimming pool fence inspection targeted rate	To pay for the provision of pool fence and barrier inspections including associated administrative costs
Infrastructure targeted rates	Activities requiring infrastructure investment
Water Quality targeted rate	Additional investment in improving water quality
Natural Environment targeted rate	Additional investment in improving environmental outcomes
Electricity network resilience targeted rate	To pay for the maintenance of trees near powerlines
Rodney drainage districts targeted rate	To pay for maintenance of drainage assets in the drainage districts
Climate action transport targeted rate	Additional investment to reduce emissions and mitigate the effects of climate change.

Annual adjustments to regulatory fees and charges

The council will amend its regulatory fees and charges annually to:

- reflect increases in costs as measured by the council rate of inflation and/or
- maintain the cost recovery levels underlying the basis for setting the fee levels.

The change to fee levels will be made on a practical basis recognising that the percentage change applied to individual fees may not precisely equal the council rate of inflation. This also means smaller fees may increase by more material amounts in one year and remain constant for a period before being adjusted again.

Application of funding principles to the funding of operating and capital expenditure for each activity

The council has determined the sources of funding for capital and operating expenditure for each of its activities after considering the principles set out in Table 3.1.1 and the rationale for the use of funding sources in Tables 3.1.3 and 3.1.4 above. A brief summary of the decisions and consideration of funding principles for each activity is set out in Table 3.1.6 below.

Table 3.1.6 Funding sources for operating and capital expenditure for each activity

Groups of Activities: Council controlled services

Activities	Consideration of funding principles	Funding policy
Auckland Development	<p>This involves both commercial operations that deliver private benefits and public initiatives that benefit the community as a whole</p> <p>Lessees, tenants and purchasers derive the full benefit</p>	<p>Costs of commercial operations are funded from user charges and other non-rates revenue</p> <p>Costs of public initiatives are primarily funded from the general rate</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Economic development and destination	<p>The related industries benefit from increased visitor numbers</p> <p>The community as a whole benefit from growth in the economy and employment</p>	<p>Visitor attraction and major events expenditure is primarily funded from the general rate</p> <p>Economic development expenditure is primarily funded from the general rate</p> <p>Subsidies from government and other sources are utilised where available</p> <p>User charges are applied where benefits are private (event tickets)</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Regional facilities	<p>Users of the facilities derive a direct benefit</p> <p>The community as a whole benefit through a more diverse and vibrant lifestyle and an increased sense of pride and identity created by the events hosted in the facilities.</p> <p>An enhancement to the overall economy and employment resulting from increased visitor numbers</p>	<p>Costs are funded from a mix of general rates and user charges, such as venue hire</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>

Groups of Activities: Local services

Activities	Consideration of funding principles	Funding policy
Local planning and development	<p>Business improvement districts (BIDs) directly benefit from council expenditure on local economic development made at their direction</p> <p>The rest of the council's service in local planning and development benefits the community as a whole</p>	<p>Grants provided to each BID for spending in the BID area are funded from the respective BID targeted rate</p> <p>Revenue from any other sources (including from any user charges, targeted rate, grants, donations and sponsorships) will be utilised should they become available</p> <p>The balance of the costs are funded from the general rate</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Local environmental management	<p>These are public goods that benefit the community as a whole</p>	<p>Costs are fully funded from the general rate</p> <p>Revenue from any other sources (including from any user charges, targeted rate, grants, donations and sponsorships) will be utilised should they become available</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Local governance	<p>These are public goods that benefit the community as a whole</p>	<p>Costs are primarily funded from the general rate</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Local community services	<p>Service users derive a direct benefit</p> <p>The wider public benefit from a more vibrant and friendly community, a safer community environment and access to high quality open space</p> <p>In most cases it is impractical to directly charge users</p> <p>In some cases the service is private and a charge can be implemented (e.g. use of park space or facilities for private functions)</p> <p>The target recipients of the services may have affordability issues</p>	<p>Costs are primarily funded from the general rate</p> <p>User charges may apply where the service is private and a charge can be implemented without compromising the council's social objectives</p> <p>Subsidies from government and other sources, (including from any targeted rate, grants, donations and sponsorships) are utilised where available</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>

Groups of Activities: Regional council services

Activities	Consideration of funding principles	Funding policy
Regional planning	<p>The community as a whole benefit from this activity</p> <p>The city centre redevelopment programme directly benefits businesses in the city centre area through enhancing the quality of the environment in the city centre for workers and visitors</p>	<p>Costs are primarily funded from the general rate</p> <p>Costs associated with the city centre redevelopment programme are funded from a combination of the city centre targeted rate and general rates</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Regulatory services	<p>The need for the council involvement is mainly caused by licence or consent applicants or holders whose activities, if unregulated, could cause nuisance to the public or pose a threat to the safety or health of the community</p> <p>In some cases it is difficult to identify and charge the parties who cause the costs (e.g. owners of unregistered dogs)</p> <p>In some cases charging the full cost may discourage compliance</p> <p>Certain related services (e.g. provision of property information) deliver private benefit to users</p>	<p>Costs are primarily funded from user charges</p> <p>Certain charges are set at a level below cost to encourage compliance, with the balance funded from general rates</p> <p>Where costs cannot be easily attributed to individual parties, they are funded from the general rate</p> <p>Targeted rates are used where there is a clearly identifiable group benefiting from a specific council activity (e.g. on-site sewerage pump out)</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Organisational support	<p>Certain services within this activity (e.g. provision of financial assistance to certain ratepayers and supply of information for commercial or private use) deliver private benefits</p> <p>The remainder of the activity contributes to the council's provision of other external services</p>	<p>Targeted rates are used where financial assistance is provided by the council for a specific group of ratepayers to fund local projects that solely benefit those ratepayers</p> <p>There is a small amount of revenue from fees and charges</p> <p>The remainder of the costs are allocated to the council's external services</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>

Activities	Consideration of funding principles	Funding policy
Regional governance	These are public goods that benefit the community as a whole	<p>Costs are primarily funded from the general rate (see note below)</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Regional community services	<p>Service users derive a direct benefit</p> <p>The wider public benefit from a more vibrant and friendly community, a safer community environment and access to high quality open space</p> <p>In most cases it is impractical to directly charge users</p> <p>In some cases the service is private and a charge can be implemented (e.g. use of park space or facilities for private functions)</p> <p>The target recipients of the services may have affordability issues</p>	<p>Costs are primarily funded from the general rate</p> <p>User charges may apply where the service is private and a charge can be implemented</p> <p>Subsidies from government and other sources (including from any targeted rate, grants, donations and sponsorships) are utilised where available</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>
Environmental services	The provision of environmental services is primarily a public good that benefits the community as a whole	<p>Costs are funded predominantly from the general rate</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p> <p>Targeted rates applied universally on a differential basis (business and non-business) are used where a greater degree of transparency is desired in relation to how funds are spent</p>

Activities	Consideration of funding principles	Funding policy
Solid waste services	<p>Service users derive a direct benefit</p> <p>The waste minimisation goals set by the council support recycling and resource recovery initiatives</p> <p>The community as a whole benefit from the public services such as street cleaning, waste minimisation education and hazardous waste collection and disposal</p> <p>In some cases, it is difficult to identify and charge the parties who cause the costs (e.g. illegal dumping)”</p>	<p>Costs for the collection and disposal of kerbside refuse will be funded from user charges and targeted rates until 2024/2025 and then from targeted rates from 2025/2026 onwards.</p> <p>Costs for recycling, food scrap, and resource recovery initiatives are funded from targeted rates.</p> <p>Cost for the operation of Waitākere Refuse and Recycling Transfer Station are funded from user charges.</p> <p>Subsidies from government and other sources are utilised where available.</p> <p>Where the benefit is public or it is difficult to identify the exacerbators, the costs will be funded from the general rate.</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences.</p>
Investment	<p>All ratepayers as a whole bear the risk of the investments</p>	<p>Any operating profit realised is used to reduce the general rate requirement</p> <p>Any operating loss would be funded from the general rate or other revenue</p> <p>Borrowings are used to address cash-flow timing differences</p>
3 rd party amenities and grants	<p>Regional amenities such as MOTAT and Auckland War Memorial Museum benefit the community as a whole</p> <p>Council is required under legislation to provide funding for amenities included in this activity</p>	<p>Costs to the council are primarily funded from the general rate</p> <p>Borrowings may be used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>

Note: Revenue from council owned cafeteria is currently grouped under this activity and is used to offset the general rate.

Groups of Activities: Roads and Footpaths

Activities	Consideration of funding principles	Funding policy
Road and footpaths	<p>Road and footpath users derive a direct benefit</p> <p>There are legal and practical constraints in directly charging users</p> <p>The vast majority of the public are users</p>	<p>Costs are primarily funded from a combination of the general rate, user charges, and government grants.</p> <p>Targeted rates may also be used where financial assistance is provided by the council for a specific group of ratepayers to fund local projects that solely benefit those ratepayers</p> <p>Costs associated with the city centre redevelopment programme are funded from a combination of the city centre targeted rate and general rates</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Targeted rates applied universally on a differential basis are used where a greater degree of transparency is desired in relation to how funds are spent</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p> <p>The Regional Fuel Tax may be used to fund the some of the operating and capital expenditure associated with approved list of transport capital projects as set out in the Regional Fuel Tax scheme</p>

Groups of Activities: Public Transport and Travel Demand Management

Activities	Consideration of funding principles	Funding policy
Public Transport and travel demand management	<p>Service users derive a direct benefit</p> <p>Public transport provides benefit for the wider community by reducing demand from private transportation for roading infrastructure</p>	<p>Costs are primarily funded from a combination of the general rate, user charges and government grants</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Targeted rates applied universally on a differential basis are used where a greater degree of transparency is desired in relation to how funds are spent</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p> <p>The Regional Fuel Tax may be used to fund the some of the operating and capital expenditure associated with approved list of transport capital projects as set out in the Regional Fuel Tax scheme</p>
Parking and enforcement	<p>Parking customers derive the full benefit</p> <p>Individuals failing to comply with restrictions create the need for the council involvement</p>	<p>Costs are fully funded from user charges and fines</p> <p>Borrowings are used to address cash-flow timing differences</p>
Organisational support (Auckland Transport)	<p>Certain services within this activity (e.g. provision of financial assistance to certain ratepayers and supply of information for commercial or private use) deliver private benefits</p> <p>The remainder of the activity contributes to the council's provision of other external services</p>	<p>Costs are allocated to the council's external services</p> <p>Targeted rates are used where financial assistance is provided by the council for a specific group of ratepayers to fund local projects that solely benefit those ratepayers</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p>

Groups of Activities: Stormwater Management

Activities	Consideration of funding principles	Funding policy
Stormwater management	These are public goods that benefit the community as a whole (except for a small number of local projects that benefit a specific group of ratepayers)	<p>Costs are primarily funded from the general rate</p> <p>Targeted rates are used where financial assistance is provided by the council for a specific group of ratepayers to fund local projects that solely benefit those ratepayers</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) not funded from development contributions where a project benefits a specific group of ratepayers</p> <p>Development contributions are used to fund the majority of the total cost of interest and capital expenditure on qualifying growth-related public infrastructure</p> <p>Financial contributions are used to fund the costs of environmental mitigation through the resource consent process</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of ratepayers and to address cash-flow timing differences</p> <p>Targeted rates applied universally on a differential basis (business and non-business) are used where a greater degree of transparency is desired in relation to how funds are spent</p>

Groups of Activities: Wastewater treatment and disposal

Activities	Consideration of funding principles	Funding policy
Wastewater	Water and wastewater customers derive the full benefit	<p>Costs are mainly funded from user charges</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) and are not funded by other user charges and/or development contributions where a project benefits a specific group of ratepayers</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of water users and to address cash-flow timing differences</p>

Groups of Activities: Water Supply

Activities	Consideration of funding principles	Funding policy
Water supply	Water and wastewater customers derive the full benefit	<p>Costs are mainly funded from user charges</p> <p>Targeted rates are used to fund operations, maintenance and renewal costs where a project benefits a specific group of ratepayers</p> <p>Targeted rates are used to fund interest and capital expenditure cost for infrastructure (including projects to support growth) and are not funded by other user charges and/or development contributions where a project benefits a specific group of ratepayers</p> <p>Borrowings are used to spread the costs fairly and prudently across different generations of water users and to address cash-flow timing differences</p>
