Existing palm trees to be retained at landmark locations along Great South Road.

New concrete raised tables at intersections with side streets to make it easier to cross them on foot and move up and down the street. They will also work to slow down traffic and deter heavy vehicles from Town Centre.

Barriers to be located along building edges.

Pedestrian crossing to be relocated away from Hall Ave intersection to align with Victoria Arcade entrance. This will improve crossing safety and encourage public visibility into the arcade for passive crime prevention.

Crossing to be paved in concrete to contrast with asphalt road carriageway.

Widened footpath with new exposed decorative aggregate concrete paving to match recent Avenue Road and Mason Avenue projects. To include new native street trees, seats, bins and benches and an improved lighting layout.

Patterned feature band of natural stone paving to run along footpath edge on both sides of Great South Road.

Existing car parking to be retained where possible. Parking bays to be re-paved in exposed decorative aggregate concrete to contrast with asphalt road carriageway. Mobility car park positions adjusted as shown.
