Pedestrian crossing to be upgraded with contrasting concrete paving to improve visibility for drivers of crossing. Drawing location to be unchanged.

Kerb build outs to contain new native street trees, planting and bio-filtration gardens to visually green Station Road and treat stormwater for pollutants. Visual effect of road narrowing also encourages safer vehicle speeds.

Northern footpath to be repaved in new standard exposed aggregate concrete to length of Station Road to AT specification.

Existing street lighting to be upgraded to match Great South Road.

 Existing loss of parking to allow for new kerb build outs and street trees.
