Note: The reports contained within this document are for consideration and should not be construed as a decision of Council. Should commissioners require further information relating to any reports, please contact the hearings advisor.

WHAT HAPPENS AT A HEARING

At the start of the hearing, the Chairperson will introduce the commissioners and council staff and will briefly outline the procedure. The Chairperson may then call upon the parties present to introduce themselves to the panel. The Chairperson is addressed as Mr Chairman or Madam Chair.

Any party intending to give written or spoken evidence in Māori or speak in sign language should advise the hearings advisor at least five working days before the hearing so that a qualified interpreter can be provided.

Catering is not provided at the hearing. Please note that the hearing may be audio recorded.

Scheduling submitters to be heard

A timetable will be prepared approximately one week before the hearing for all submitters who have returned their hearing appearance form. Please note that during the course of the hearing changing circumstances may mean the proposed timetable is delayed or brought forward. Submitters wishing to be heard are requested to ensure they are available to attend the hearing and present their evidence when required. The hearings advisor will advise submitters of any changes to the timetable at the earliest possible opportunity.

The Hearing Procedure

The usual hearing procedure is:

- The applicant will be called upon to present his/her case. The applicant may be represented by legal counsel or consultants and may call witnesses in support of the application. After the applicant has presented his/her case, members of the hearing panel may ask questions to clarify the information presented.
- The relevant local board may wish to present comments. These comments do not constitute a submission however the Local Government Act allows the local board to make the interests and preferences of the people in its area known to the hearing panel. If present, the local board will speak between the applicant and any submitters.
- Submitters (for and against the application) are then called upon to speak. Submitters may also be represented by legal counsel or consultants and may call witnesses on their behalf. The hearing panel may then question each speaker. The council officer's report will identify any submissions received outside of the submission period. At the hearing, late submitters may be asked to address the panel on why their submission should be accepted. Late submitters can speak only if the hearing panel accepts the late submission.
- Should you wish to present written information (evidence) in support of your application or your submission please ensure you provide the number of copies indicated in the notification letter.
- Only members of the hearing panel can ask questions about submissions or evidence. Attendees may suggest questions for the panel to ask but it does not have to ask them. No cross-examination - either by the applicant or by those who have lodged submissions – is permitted at the hearing.
- After the applicant and submitters have presented their cases, the chairperson may call upon council officers to comment on any matters of fact or clarification.
- When those who have lodged submissions and wish to be heard have completed their presentations, the applicant or his/her representative has the right to summarise the application and reply to matters raised by submitters. Hearing panel members may further question the applicant at this stage.
- The chairperson then generally closes the hearing and the applicant, submitters and their representatives leave the room. The hearing panel will then deliberate "in committee" and make its decision.
- Decisions are usually available within 15 working days of the hearing.

Letter: Greetings,

We the people of Rodney, 13, 500 who have signed the petition or so demand that the application by Waste Management to build a mega landfill in the Dome Valley is denied and the application for a zone change is denied.

These are the grounds on which we demand this.

The Auckland Unitary Plan states clearly that natural areas of ecological significance be preserved in perpetuity for future generations.

This landfill will effect numerous streams of high ecological values with increased sedimentation from the extensive earthworks from the constuction and then from leachate from landfill and tyre washing activities turning clean water into contaminated water.

The land in question is riddled with waterways that feed into the Hoteo River, the receiving environment being the Kaipara Harbour. The mouth of the Kaipara is where sea grass beds vital for over 80% of west coast snapper breed and juvenile snapper live in for many years. These are sensitive to sediment levels which impair the sea grass ability to photosynthesis and cause the gills of baby snapper to mutata. Excess sediment from extensive earthworks must not be allowed on this sensitive catchment area.

Below the landfill site watercare has put a bore into an aquifer for Wellsford water supply. This must not be put at risk from contamination from a mega landfill. The Auckland Unified Plan has a job to protect air water and soil.

Allowing this landfill to proceed would be a gross failing of your duty as Mayor to protect scenic areas of high natural values performing important tasks such as habitat for native species, both flora and fauna, a lot of which is currently critically endangered, clean

water charging aquifer, springs , streams, Hoteo river and Kaipara Harbour.

Council should look at purchasing this sensitive land instead of Waste Management and protecting it and enhancing it by planting native trees, many of which are regrowing naturally inside the 86.88 hectare pine forest which us stabilizing land, filtering water, producing water, charging aquifer and streams all of which is vital for the health and eco systems of forest, stream, river and harbour.

86.88 hectares of pine and native understory will be destroyed.

17.3 ha of pasture will be destroyed.

9.11 ha of wattle.

4.62 ha of regenerating forest

0.86ha of mature forest

15.4 km of streams all destroyed.

These natural environments absorb CO₂, purify and produce H₂O.

A landfill will produce methane, nitrous oxide, CO₂ and other noxious gases and contaminate water, destroying and polluting rare and vital habitats.

Therefore the status quo of just leaving the land in forestry is a good argument in itself. However, the visionary approach would be one of preserving and enhancing sensitive rare habitats with native intact ecosystems for future generations as stated clearly in the Auckland Unitary plan.

This landfill must be stopped.

Yours sincerely

| Susan Speedy | Auckland, New Zealand | 2018-11-26 | "The Kaipara harbour is at risk of contamination from land leachate." |
| Yvonne Thorburn | Wellsford, New Zealand | 2018-11-26 | "I am concerned of the toxins going into our waterways and the affect on our environment." |
| Jessica Stephens | Auckland, New Zealand | 2018-11-26 | "As a local resident, I am very concerned about the negative impact this dump will have on our community. The roads will be very unsafe with hundreds of trucks related to the dump driving through an already notorious road. Consider the locals! Don't increase our road toll even more and keep our community green and safe!" |
| Katrina Dyer | Kaipara, New Zealand | 2018-11-26 | "I'm signing because this is a disgrace. The dome valley whether farmland or the forest is a beautiful piece of nature, I understand that the tip is located next or on top of the streams leading into the river that not only runs into the harbour but I believe is wellsford drinking supply, then there is the fact that the road through the dome is dangerous enough as it is without putting another 300 to 500 trucks, and slow rubbish trucks to boot, through there. Ok I dont live in Auckland, but i do live just across the kaipara border and i regularly head to Albany to shop. I get there has to be a tip but the dome valley is seriously the wrong place" |
| Joan Brown | RUAWAI, New Zealand | 2018-11-26 | "I drive through that special valley and find it shocking that anyone could consider a landfill dump there, with the beauty of the place, the fragile ecology, and the watershed and other environmental issues regarding that particular area." |
| Kane Earl-Peacock | New Zealand | 2018-11-26 | "Myself and my partner drive this road every day. Its dangerous enough without adding 300+ trucks a day" |
| Sharon McMurray | Dargaville, New Zealand | 2018-11-26 | "This is a beautiful area and doesn't need to be destroyed by a landfill. Also there is enough traffic on this road daily with out adding 300 or more trucks." |
| Rosanna Donovan | Dargaville, New Zealand | 2018-11-26 | "We need to be reducing waste, and not allowing rubbish dumping to be a business model where profit (in this case to an overseas owned company) is involved. This model will not encourage waste minimisation. The site is unsuitable and increased traffic in a high crash zone is irresponsible." |
| Michael Wright | Meremere, New Zealand | 2018-11-26 | "Am not in meremere am in Wellsford. I feel that the location will greatly affect our town and state highway 1 too significantly" |
| jackie tameris | wellsford, New Zealand | 2018-11-26 | "A landfill in the Dome Valley would ruin a beautiful piece of the country, land and river and with that a harbour. Also the Dome Valley is busy and dangerous enough as it is now and we definitely do not need more traffic." |

| Michelle Crosbie | Auckland, New Zealand | 2018-11-26 | "This is not the right place for something like this - possible leaching into our waterway - 300 extra trucks on this stretch of road - imagine holiday traffic - go somewhere else!" |
| Susan Speedy | Auckland, New Zealand | 2018-11-26 | "Me too Yvonne. Thanks for signing." |
| Tania Matthews | Auckland, New Zealand | 2018-11-26 | "We as a nation and proud people of this little country gotta make a stand for our future generations, our beautiful land and creatures. We as caretakers of this earth have to find a better way and not kill off what we have left including ourselves. If they are willing to pay for it, put it to better use. There have been some great examples on social media for ways to recycle. Your ideas and comments to better the future could prove bigger benefits and payoff. Also other countries have also made some good example. Start with stop making the plastic bag." |
| Peter Buxton | Auckland, New Zealand | 2018-11-26 | "I believe inceased trucking through an already dangerous piece of road is not a very intelligent thing to even consider, let alone implement." |
| leanne woolley | auckland, New Zealand | 2018-11-26 | "I feel there are risks to the water ways and the dome valley is all ready an unsafe road , with the large amount of trucks that will be using the dump this will slow traffic which then creates impatient drivers to do stupid things and more accidents will accur and probably more fatalities." |
| Vicki Johnston | Auckland, New Zealand | 2018-11-26 | "This proposals borders OSNA - Outstanding Significant Natural Area. That fact alone should be reason enough. Rodney has the poorest road conditions in the Auckland region. The Puhoi to Warkworth motorway extension will impact our region immeasurably, by increasing Auckland traffic on the poor infrastructure of our overcapacitated and deadly rural roads. Increasing truck movements to this debacle, increases the danger, risk to public safety in our communities. There are many more options to landfill in treating waste. The Wastecare management in NZ is owned by very wealthy Chinese businessmen, who have access to viable alternative waste management. A solution may be to demand the very latest in modern technology, be applied to their operations here in NZ. The re education of consumers can bring about the changes industry must make in their efforts to reduce waste. I believe there are solutions, that our Government, in particular DoC, have failed us with their lack of research, public consultation and appar" |
| celia attwood | Auckland, New Zealand | 2018-11-26 | "Its bullshit ! The dome is dangerous enough without adding 100s more trucks to it !" |
| Sheryll Clow | Auckland, New Zealand | 2018-11-26 | "There is no need for this to proceed. We have processes in NZ to dispose of rubbish environmentally without destroying this property. What the hell are the Green Party thinking. You signed the authorization to allow this to go ahead. Greens policy do as I say not as I do." |

| Sue Crockett | Wellsford, New Zealand | 2018-11-26 | "Dome Valley is not a suitable place for a landfill. So many reasons why this must not go ahead....high rainfall, sensitive geology, waterways and groundwater entering the Kaipara Harbour, massive increase in heavy traffic through SH1 Dome Valley." |

| Jeff Brewer | Auckland, New Zealand | 2018-11-27 | "I don't want the land fill in the dome" |
| Dr Lynda Braddick | Australia | 2018-11-27 | "The position of this proposed landfill site appears to present medium to high risks of pollution due to the hilly topography and numerous streams situated in the area . The reliance on road transport in an area that has poor roads with high fatality rates also increases the risks involved in proceeding with this project. An area with level topography near rail would be much more appropriate and present far less environmental and social risk. I suggest further research into viable alternatives is undertaken before a decision on this project is undertaken." |
| Ashleigh Tipene | East Coast Bays, New Zealand | 2018-11-27 | "The dome is not a ideal place for this sort of thing, nor is it good for our little town it will pollute our water ways, kill all sea life contaminate our water supply, & flood our roads with traffic and could potentially cause fatalities. Plus why ruin a perfect land for this?? Seriously waste management take your nonsense and shitty plans elsewhere the dome is not a dumping ground. #Domevalley #Notadumpingground" |
| Jeannette Forde | Mangawhai, New Zealand | 2018-11-27 | "The extra 300 truck movements a day make one of the most dangerous sections of SH1 even more dangerous" |

It was where the Archibald Reserve now is. In the 90s it was proved that leachate was seeping into the Whau River more than 30 years on after the rubbish dump had closed. Twenty years on and I wouldn't be at all surprised if there is still leachate still seeping into the river. No-one swims in the river anymore. The reason I remember reading the article in the NZ Herald(or was it the Auckland Star?)and there was mention P.I. families collecting shell-fish from near to the Archibald Reserve and people at the Waitakere City Council were warning locals not to take shell-fish because of the leachate in the area from the old rubbish dump. I remember the old rubbish dump when it was in operation. The smells for many years after it closed down was horrendous especially after a heavy downpour in the winter-time." |

I've seen enough trucks colliding with other vehicles I travel through there everyday and night! Also flooding would end dragging rubbish down the hoteo and into our beautiful Kaipara, just remember people power & RESPECT is more powerful than money!, Money is nothing, and this county is going backwards! 💎💎" |

Would it be great if council supplied everyone with a compostor with worms etc so we can reduce food scraps. Wouldnt be great if we can keep our farm land and forestry clear of these toxic dumps for our future generations to enjoy , and wouldnt be great to reduce the number of vehicles/trucks on the roads around this area, there are too many accidents as it is. Surely we can look to and get advice from Scandinavia countries to see the ways they reduce waste, instead of following the basic methods of dumping found in China." |

The accident rate in that stretch of road is one of the higher ones in NZ. It is horrendous. You have just quadrupled that fact. A serious accident just two days ago stopped traffic on State h/way ! and then filled state h/way 16. This will become a daily occurrence. UNSAFE. UNACCEPTABLE. UNSATISFACTORY. I commute the Dome daily and it is already a treacherous and increasing slow trip to get to work. No proposed road improvements will make it a suitable route for that many extra large trucks. The Dome can't handle the pressure now. We'll all be doing 30km getting to work! Find a flatter, less high traffic place for the land-fill if it is required. Seriously can't believe council can't |

| Clive Wood | Warkworth, New Zealand | 2019-02-20 | "Why are the large rivers and side streams through the tip site not highlighted on Waste Managements map? Those valleys flash flood. They can't possibly guarantee there will be no toxic rubbish. The environmental consequences of a leak over the next hundreds of years would be disastrous. Not to mention the plague of rats to be introduced to the native bush which connects the Dome, Matakana, Tamahunga, Omaha and to the west out as far as the Kaipara. Don't be sucked in by their financial bribes to the local community sports clubs etc. This tip has to be stopped" |

The vital life-giving headwaters of the Hotoe, feeding waterways to both coasts. Regardless of whether this site is on forestry land or native forest, once this valley is gone it is gone forever, and the impacts on the surrounding terrestrial and aquatic wildlife will be profound. We have plenty of retiring farmland around Auckland that is of far less environmental value with little hope for successful remediation - this is a terrible solution, that will be out of site but by no means out of mind." |

Making our waste natures problem simply by burying it, ignoring learnings from our past is not an option. If a sustainable solution means we pay more, then that is the cost we have to pay for the waste we as humans generate. I have friends in Dome Valley it is going to affect them .The amonut of rubbish is huge.Dome valley is beautifull. ee need forest.So Auckland is running out of space wver 5hpught that may be Auckland is as big as it needs to be. Close Auckland.Let the rubbish be Aucklands problem.The lack of water the water pollution should shout out stop building .Admit Auckland is sucking the live out of the sea .Signs saying check to see if pollution is to high to swim today should be a huge red flag .stop allowing pollution. stop allowing more houses more people. the truth is there are mot alot of jobs in Auckland.Acue of people went right around a supermarket in south Auckland looking for a job packing the shelves. 6 people were wanted.If Auckland cannot contain its own rubbish manage on the water it has has poo in the drains in Browns bay when it rains and the smell is bad. Letter: Greetings,

We the people of Rodney, 14,341 who have signed the petition or so demand that the application by Waste Management to build a mega landfill in the Dome Valley is denied and the application for a zone change is denied.

These are the grounds on which we demand this.

The Auckland Unitary Plan states clearly that natural areas of ecological significance be preserved in perpetuity for future generations.

This landfill will effect numerous streams of high ecological values with increased sedimentation from the extensive earthworks from the constuction and then from leachate from landfill and tyre washing activities turning clean water into contaminated water.

The land in question is riddled with waterways that feed into the Hoteo River, the receiving environment being the Kaipara Harbour. The mouth of the Kaipara is where sea grass beds vital for over 80% of west coast snapper breed and juvenile snapper live in for many years. These are sensitive to sediment levels which impair the sea grass ability to photosynthesis and cause the gills of baby snapper to mutate. Excess sediment from extensive earthworks must not be allowed on this sensitive catchment area.

Below the landfill site watercare has put a bore into an aquifer for Wellsford water supply. This must not be put at risk from contamination from a mega landfill. The Auckland Unified Plan has a job to protect air water and soil.

Allowing this landfill to proceed would be a gross failing of your duty as Mayor to protect scenic areas of high natural values performing important tasks such as habitat for native species, both flora and fauna, a lot of which is currently critically endangered, clean

water charging aquifer, springs , streams, Hoteo river and Kaipara Harbour.

Council should look at purchasing this sensitive land instead of Waste Management and protecting it and enhancing it by planting native trees, many of which are regrowing naturally inside the 86.88 hectare pine forest which us stabilizing land, filtering water, producing water, charging aquifer and streams all of which is vital for the health and eco systems of forest, stream, river and harbour.

86.88 hectares of pine and native understory will be destroyed.

17.3 ha of pasture will be destroyed.

9.11 ha of wattle.

4.62 ha of regenerating forest

0.86ha of mature forest

15.4 km of streams all destroyed.

These natural environments absorb CO₂, purify and produce H₂O.

A landfill will produce methane, nitrous oxide, CO₂ and other noxious gases and contaminate water, destroying and polluting rare and vital habitats.

Therefore the status quo of just leaving the land in forestry is a good argument in itself. However, the visionary approach would be one of preserving and enhancing sensitive rare habitats with native intact ecosystems for future generations as stated clearly in the Auckland Unitary plan.

This landfill must be stopped.

Yours sincerely

Susan Speedy admin for No Mega Landfill in the Dome Valley petition,

Signatures
