Issued via email:

Dear Andrew,

Re: Response to request for further information in accordance with section 92 of the Resource Management Act 1991 for the North Projects – Flood hazard

We refer to your email of 16 November 2023 requesting further information under section 92 of the Resource Management Act 1991 (RMA) in relation to the Notices of Requirement by Waka Kotahi for four designations (NoRs 1 – 4) and Auckland Transport for nine designations (NoRs 5 – 13).

This letter contains the response to each flood hazard related request. For ease of reference, the following table includes the request and the relevant response. Where appropriate, reference has been made to the relevant lodgement documentation that should be read in conjunction with a response. The response has been prepared by Flood Hazard Specialists at Te Tupu Ngātahi.

Our responses are set out in **Attachment A** and are grouped as follows:

Part 1: We firstly present a summary of our overall approach to assessing and authorising flooding matters, highlighting the key steps in our assessment process.

Part 2: We address a number of key themes in Healthy Water's (HW's) general comments response, clarifying important points and potential differences/ misunderstandings.

Part 3: We address each of the specific numbered items in the request for information related to flooding. We have aimed to answer the key themes in the items above. This section is included for completeness and to make sure all items have been addressed.

A Supplementary Flood Assessment Report has been prepared and is appended to this letter as **Attachment B**. This addresses the key themes, provides clarification and responds to specific questions in the section 92 request.

In addition, we provide additional information in **Attachment C** - maps of the treatment device catchments and a summary of their attributes.

If you have any queries regarding the information contained in this response, please do not hesitate to contact me.

Kind regards

A handwritten signature in blue ink, appearing to read 'KMBunting'.
