I am concerned about the toxic run off coming from the landfill which is proposed to be built, in a high rain fall area.

This flows on down to the Kaipara harbour affecting shell fish and fish in particular the foraging of the threatened Fair Tern a sea bird which winters and breeds on the Kaipara particularly in that area. They feed on small fish and need water clarity to see them also the quality of the fish, as their only food source they. If the fish have been compromised with toxins these will pass on to the birds, and they are ~~at~~ already at dire numbers less than 40!

also as a regular fisher woman in the Kaipara I take for granted my fresh fish are toxic free and would like to keep it that way.
