2041.7	Neilston Homes	Amend in G2 by adding the following explanation: The suitability of a walkable catchment can vary depending on a number of factors, including topography, connectivity and access to a regular public transport network. In some cases, there may be sites that are located outside a 'walkable catchment' that are suitable for additional intensification and building height. Such sites should be considered on their merits having regard to their context and their ability to provide additional housing choice in an area that is well served by a range of amenities, including public transport.	Walkable Catchments	WC General	FS13	Keith Law	Oppose

2041.7	Neilston Homes	Amend in G2 by adding the following explanation: The suitability of a walkable catchment can vary depending on a number of factors, including topography, connectivity and access to a regular public transport network. In some cases, there may be sites that are located outside a 'walkable catchment' that are suitable for additional intensification and building height. Such sites should be considered on their merits having regard to their context and their ability to provide additional housing choice in an area that is well served by a range of amenities, including public transport.	Walkable Catchments	WC General	FS306	Fi Groves	oppose
