			Amend standard H5.6.19 (in conjunction with Table H5.9(3)) in the Mixed Housing Urban zone:		
			a. Targets outlined in Tables H5.6.19.1 and H5.9(3) to be converted to m <sup>2</sup> of canopy. This allows flexibility of tree planting between small, medium and large (whoever see para 3 below re medium and large) to better suit the site.		
			b. either reduce this canopy m² value by 50% or include outdoor living spaces and the surface area of hedging and shrubs alongside trees.		
			c. remove the need for continuous areas with minimum dimensions which can be highly restrictive. The spreading of this landscaping throughout the site is more appropriate anyway to break up building form etc.

Amend the walkable catchment distances and the number of walkable catchments to reflect supply and demand calculations and modelling.  Ensure that all walkable catchments include at least one accessible, safe, clean, appropriately maintained and functional natural space and open space area.  Reduce all walkable catchments required by Policy 3(c)(i) to between 200-400m, recognising the greater reduction in uptake of walking the further people need to walk.  Reduce the visual dominance of 6 storey buildings in the walkable catchment and allow for fragmentation which provide viewshafts. 			Amend assessment criteria H8.8.8.2(1) as follows:						
			(1) new buildings and external alterations and additions to buildings not otherwise provided for:						
			(a) building design and external appearance:  Contributing to a sense of place						
			(i) the extent to which the design of buildings contribute to the local						
			streetscape and sense of place by responding positively to the existing and planned built form and character of the zone and surrounding area and significant natural landforms and landscape features including the Waitematā Harbour;						
			(ii) the extent to which the silhouette of the building as viewed from areas surrounding the city centre positively contributes to the city centre's skyline while reinforcing the existing and planned built form and character of the city centre;						
			(iia) the extent to which buildings are designed to create human scale podiums at street level and slender towers above which allow daylight and sunlight into buildings and daylight and sky views to

	Board of Airline Representatives New Zealand Inc	cath@barnz.org.nz	Rezone all THAB or Mixed Housing Urban sites within HANA to Low Density Residential zone (LDR). BARNZ opposes residential upzoning in the HANA as it creates an unclear and inconsistent planning framework for property owners in that the underlying zoning suggests intensification can occur but the Aircraft Noise Overlay prohibits it [refer to planning maps for the extent of the HANA]. [inferred: proposes to rezone some or all of the properties in streets within the Auckland Airport HANA from Residential - Terrace Housing and Apartment Buildings Zone to Residential - Low Density Residential Zone, including: Clendon Avenue, Puhinui Road, Ranfurly Road, Ballance Avenue, Seddon Avenue, Atkinson Avenue, Freyberg Avenue, Stafford Avenue, Wyllie Road, and Milan Road, Papatoetoe; Burrell Avenue, Plunket Avenue, and Noel Burnside Road, Manukau Central] [inferred: proposes to rezone some or all of the properties in streets within the Auckland Airport HANA from Residential - Mixed Housing Urban Zone to Residential - Low Density Residential Zone, including Puhinui Road, Papatoetoe]	Qualifying Matters A-I	Aircraft Noise (D24)			
	Board of Airline Representatives	cath@barnz.org.nz	Rezone all THAB or Mixed Housing Urban sites within MANA to Low Density Residential Zone (LDR). The increased intensification encouraged by these zones would promote thousands of additional people living within this area of significant aircraft noise which BARNZ considers is inappropriate [refer to planning maps for the extent of the MANA].
