Urbanisation is a trend that is unlikely to be reversible. Marlborough (59%), Hawke's Bay (49%), Waikato (36%) and Auckland (35%), have seen the highest level of conversion. Planning mechanisms focussed on soil protection have been unhelpful because they indirectly target the problem which is subdivision for rural residential purposes. There are two things that are required to prevent further degradation of the versatile land resource: Maintenance of an operating environment that encourages rural production activities on versatile land, and Prohibition or prevention by other means of subdivision for rural residential purposes on versatile land. 5431-33	Horticulture New Zealand: Pukekohe Vegetable Growers Association	RPS	Issues	B1.7 Sustainably managing our rural environment	Amend Explanation to read 'Rural production, from livestock to viticulture , is a key contributor to our economy. ... Rural character and amenity values and character complement and support the metropolitan environment. ... Managing the competing nature of activities on rural land, the impact of urban growth, the need to increase the value added to the Auckland economy by rural production activities and the desire to live in rural areas creates challenges for how our rural areas function. There are locational reasons why the rural sector is so productive in Auckland related not just to the quality of soil but also access to freshwater, transport linkages, gas supplies, post harvest facilities, access to labour, the proximity of the market and a diverse land parcel structure. There is a need to preserve areas of rural production for rural production and provide for growth and sustained access to land and water. There is also a need to ensure land owners have flexibility to change rural production land use activities and that the regulatory regime is practical and supportive. Food security is paramount for future generations.'	189	Alan Cole	Support
