Sub#/Point	Name	Address for service	Theme	Topic	Subtopic	Summary
6282-3	Patrick Fontein	patrick@studiod4.co.nz	RPS	Urban growth	B2.1 Providing for growth in a quality compact urban form	Acknowledge the factors effecting intensification and the redevelopment likelihood of a site includes: improvement value verses capital value, parcel size, the number of existing dwellings on a site, the increase of value when re-developed. If a site is to be re-developed related to the maximum extra dwellings able to be developed, the likely capacity utilisation of owners who chose to redevelop and the development chance of properties. These constraints mean only 20 - 50 per cent of intensification potential will actually be developed.
6282-4	Patrick Fontein	patrick@studiod4.co.nz	RPS	Urban growth	B2.1 Providing for growth in a quality compact urban form	Recognise the limitations of theoretical dwelling capacity numbers which take no or minimal account of development market reality and often does not up-zone enough.
6282-5	Patrick Fontein	patrick@studiod4.co.nz	RPS	Urban growth	B2.1 Providing for growth in a quality compact urban form	Recognise that the analysis of development capacity, as shown in the submission [refer to page 6/14], identifies a short fall of 130,000 dwellings.

6282-8	Patrick Fontein	patrick@studiod4.co.nz	RPS	Urban growth	B2.1 Providing for growth in a quality compact urban form	Acknowledge, with regards to intensification in and around local and town centres, there is a lack of understanding of development economics and up-zoning in the wrong areas with greater building height in market attractive areas.
6282-9	Patrick Fontein	patrick@studiod4.co.nz	Residential zones	D1.7 Terrace Housing and Apartment zone desc, obs & pols		Recognise that there will be major intensification and substantial change in the Terrace Housing and Apartment Building zone, however the current zoning has missed opportunities and redevelopment potential has been further reduced.
6282-10	Patrick Fontein	patrick@studiod4.co.nz	Residential zones	Residential	Land use controls	Recognise that the density restrictions in the Mixed Housing Suburban zone will have a huge impact on numbers and restrict opportunities for developers to provide affordable housing.
6282-11	Patrick Fontein	patrick@studiod4.co.nz	RPS	Urban growth	B2.1 Providing for growth in a quality compact urban form	Recognise the need to tidy up errors and omissions to achieve a greater level of quality intensification, identify areas of missed opportunity and have a mind set of looking for intensification opportunity.

6282-17	Patrick Fontein	patrick@studiod4.co.nz	RPS	Urban growth	B2.1 Providing for growth in a quality compact urban form	Acknowledge that intensification of a s further 200-300,000 extra residences within the current MUL within the next 30-50 years is possible but this requires far greater intensification up zoning.
